And, in considering the above table, the important fact that plenty of horses that get a considerable number of 2:10 trotters do not come within its precincts should be remembered. For example, there is Bellini whose 1914 figures are seventy-nine trotters, and fourteen of them are in the 2:10 list. He does not qualify under the "one hundred trotters" test, but his percentage of 2:10 trotters is 16.45 per cent., compared with 16.98 per cent. for Peter the Great, 10:19 per cent. by McKinney and 9:48 per cent. by Axworthy, the only sires in the above list whose 2:10 trotters run into double figures. In another article, I shall give some account of the sires that, lacking one hundred trotters in the list, still have gained a creditable position among the sires of 2:10 trotters.

A 1,000 POUND FOAL AT 7 MONTHS.

Pullman Peggy is a Percheron foal bred and owned by Washington State College. She was foaled on April 3 and on Nov. 3, the day she was 7 months old, she tipped the scales at 1,000 pounds. Occasional weighings of the foal showed that on June 2 she weighed 439 pounds, on July 12 600 pounds, and on Aug. 28 800 pounds.

Pullman Peggy is not just a chunk of beef; in fact, she does not impress one as being fat. She has quality combined with substance. Some have commented upon her as being too heavy for her legs. Time alone can verify this opinion. At the present time there is not the slightest evidence that she will go wrong in her legs. She possesses a clean and strong set. She has the flat, flinty bone and the large, open hoofhead so characteristic of the Percherons. She is both stylish and rugged.

The size of this foal is no doubt the result of judicious feeding and management. She has been fed in a boxstall with her mother and given plenty of exercise in a large paddock. The dam was fed largely on ground oats and bran, with a liberal quantity of clover and oat hay. No attempt was made to push the foal to early maturity.

ROD, GUN AND KENNEL

JOHN X. DeWITT, for over twenty years editor of the Rod, Gun and Kennel department of the Breeder and Sportsman, ended his life early Monday evening by shooting himself through the heart with a shot gun. This tragic act took place while he was alone in the editorial rooms of the Breeder and Sportsman early in the evening, and was the result of a mind crazed by weeks of suffering from an incurable affection of the valves of the heart. It was his practice to come to the office and do a portion of his work after dark, and evidently on this occasion he found his suffering more than he could bear, as is attested by the following note which he left on a table near where the body was found:

"The past forty-eight hours has been a period of distressful torture. My illness seems to grow worse, and, with other complications coming on, even with health partially regained, I see nothing encouraging in the future. I'll quit the game for good and all. J. X. DeWITT."

DeWitt had always been a strong, hearty man up to within the last six months when his health commenced to fail, he complaining of his stomach and heart. Recently he put in three weeks at the Fairmont Hospital and came back to the office on December 22, apparently considerably better, but this improvement did not last.

DeWitt was one of the best known newspapermen in San Francisco, especially among the older contingency. He was born in this city and except for a few years spent in the east, has lived here all his lifetime, and was unquestionably one of the best informed men on field sports generally of the Pacific Coast. He was an ardent angler, hunter, naturalist, and an enthusiast on all kindred subjects. He was equally at home when writing about field sports or actively enjoying them with the rod or gun. It was because of his knowledge and the interesting style in which he handled his work, and his personality, his conviviality, and good fellowship that he was held in high esteem by thousands who follow the pleasures of the field and stream.

As a kennel editor and expert he knew the fine points of the bench show dogs and took great interest in the field trials, having attended most of the annual trials held near Bakersfield.

He was a member of the Olympic Club for many years and belonged to the Anglers' Club as well as the Native Sons. His sad departure from this life will be regretted by all who remember him, and no one who knows the pain that he suffered with no prospect of permanent relief will blame him for taking a short cut over the divide to the hereafter, where, we all hope, he has found the peace that he was seeking.

DUCK HUNTING IN THE SNOW.

California hunters had the odd and unique experience last week of tramping over snow and ice to follow their favorite pastime. Quite a number of parties took advantage of the holiday season to travel up-state and burn up some smokeless powder. On the whole the reports were quite pleasing, limit bags as a rule rewarding their efforts.

Local conditions, however, remain as unfavorable as in the past several weeks. The storm had the effect of scattering the birds still farther away and the operations on the bay counties' salt marshes were practically at a stand-still. Not in years past have the bay hunters experienced such poor sport.

Up around Colusa and the Butte country game was reported in abundance. There was from five to six inches of snow on the ground and ice formed on the still water in the ponds and creeks, but this did not seem to interfere with the activities of the wild fowl. Ducks and geese were there to feed on the extensive rice fields and they stayed around despite the white covering on the ground.

Superior Judges William H. Donohue and T. W. Harris together with Frank Roop, Charles Helms and Myron Harris of San Francisco made up a party that had some exciting sport at the Colusa Gun Club, but spent some hours in reaching their respective homes with limit bags. They started out on New Year's Day and ran right into the teeth of the terrific storm that swept the state.

Superintendent Fred Watson met the brave hunters and had some entertainment for their benefit and then they repaired to the blinds. Mallard were found plentiful and some teal and a few canvasbacks were brought down. The birds were flying well and the eleven hunters that were at the club did not have any trouble bagging the limit.

The troubles commenced in getting home. A train was taken at Colusa at two o'clock on Sunday afternoon and they did not reach San Francisco until 6 o'clock the following morning. The train was held up five hours at the Suisun crossing because of the high wind and more delay was met later on because of flood conditions. It was a tired bunch of hunters, but happy with plenty of game.

A. G. Wilkes and wife enjoyed some good hunting at the Green Head Club near Live Oaks in the Buttes. Snow and ice were in evidence but the ducks were flying and conditions were rather pleasant. Both are crack shots and it was no difficult feat for each to get a limit bag.

Down in the Los Banos and Dos Palos country there are many ponds and overflows, but for some reason or other ducks are rather scarce. Farther up the valley, near Newman, Charley Huber and Otto Feudner report first class hunting conditions.

Charles A. (Spide) Baum and Louis Sepulveda, two ball players on the San Francisco team, are back from a two-months hunting trip into Mendocino county and are enthusiastic over hunting and fishing prospects. They say mountain and valley quail, bear, deer, trout, salmon—black and spring—were found in abundance. They traveled a wild country.

They took a train to Longvale and went in some twenty-five miles by stage and foot. The diamond stars located at George Lovejoy's ranch and took the limit of game and fish while they were in season. It's a great trapping country, too, says Baum, who has often been dubbed the "boy trapper."

Baum is trying to work up interest among the baseball players to purchase a tract of land in Mendocino county and establish a gun club. He expects to have everything in readiness by next fall.

TOM ROUSE'S BEAR STORY.

"Speaking of bear," said Tom Rouse, as he raked a baked potato out of the hot ashes of the campfire, "reminds me of the little tussle we had with a big grizzly back in the sixties on the east side of the Tehachapi mountains." Tom broke his potato in two, dug out the salt can from the camp mess and took a bite a little too big and so much too hot that he had to roll it about for some time before he dared to either chew or swallow it. When he at last succeeded in clearing his mouth, he exclaimed: "Gosh, boys, but that was hot, but no hotter than the time we had with that bear. Wait till I finish this spud and I'll tell you all about it."

Tom Rouse was an old hunter, and while sometimes the boys thought he "put a little too much risin' in his dough," they still knew that he had an enviable record as a bear hunter and carried a few unmistakeable scars to bear mute witness to encounters a little too close for anyone with less courage than Tom was known to possess. The day's hunt had been very unsuccessful and accordingly the little group around the campfire was rather dull, so Tom's promise of a good bear story at once commanded attention; for they all knew that when Tom Rouse characterized an encounter as a "hot one" it was sure to be entertaining.

After Tom's baked potato was finally stowed away and his pipe lighted, he began:

"If any of you have hunted on the east side of old Tehachapi you'll remember the big rock cliffs. We were camped close to the south end of these cliffs, just where the wall was broken down with the earthquake of '51 and left those two big leaning rocks in the form of a tent. I wasn't there in '51 but I'm inclined to think that the Indians lied about the earthquake putting those rocks in that shape. My experience in San Francisco on a certain historic occasion was that earthquakes aren't particular about piling things up in a useful way, any more'n a bronco mule is about what becomes of you after he has given you a broadside from his business end. My belief is that them rocks were put in that shape by the good Lord for the very purpose of saving Bill Piper's life.

"Well, there were three of us in the camp, and me and Lige Dickens had left Bill Piper to keep camp and had gone to look for bear. Lige had gone up on the ledge of rocks where he could look down while I took along the side of the mountain about fifty yards below. We had nearly reached the northern end of the ledge when I heard Lige whistle. I looked up to the top of the ledge and there was Lige waving his hand to me to go back as if he was in a big hurry about it. I stood still and listened and looked ahead of me but I could neither hear nor see anything, while all the time Lige was waving his hand frantically for me to fall back. But I was looking for bear, and if there were any of 'em near I didn't want to retreat without seeing 'em and at least getting a shot. The brush was pretty thick and about as high as my head so that I couldn't see more 'n ten or fifteen feet ahead of me, but I wasn't going to back out until I knew what was there. Lige was about sixty feet above me and some fifty yards away and was therefore looking down so he could see what was doing. At last when he saw that I wasn't going to retreat he called down: 'It's two big grizzlies—and they're not fifteen feet from you!'

"At the sound of Lige's voice I heard a snort and the breaking of brush right in front of me. I made a jump to get behind a clump of brush, but my foot caught in a vine or something of the kind and I was just falling beyond the brush when the end of the nose of one of the bears hit me in the side and knocked me clean out of his way and over against the dead branches of a fallen tree. Maybe you think I wasn't scared. Well, I was, but not half so much as that bear. The two of them had been waddling along leisurely up to the time Lige called me. His voice scared them and they broke into a run, not knowing that I was right in front of 'em, so that when I tripped and fell before the leader just in time to be caught by his nose he didn't realize what he had run into, and hadn't time to stop to investigate, but went tearing through the brush, snorting at every jump. As soon as they had passed me, and before I had extricated myself from the dead tree and recovered my rifle, I heard Lige shoot. Our guns in those days were muzzle loaders and of course he had but the one shot and the bears went on.

"As soon as I had assured him that I was not hurt Lige began reloading, telling me not to follow them too close as I would have no show with them in such thick brush. After reloading he followed along the ledge, while I had no difficulty in following their trail from below, which was taking a direct course for our camp. Every minute or two I would look up to Lige—who was now keeping pretty well out of sight—for directions as to where and how far the bears were ahead of me. A grizzly never runs far at a time, when he does run; and he never runs when he thinks he is in close quarters and can see his adversary, and very seldom after he is wounded, unless it's after the fellow who did it, so I expected any moment to come onto them.

"When I had been so unceremoniously knocked out of the way I didn't have time to see how big the brute was but Lige said one of them was a monster, and this being the case I didn't propose to let him get away, so I kept following 'em up pretty close. We had got to within less than two hundred yards of the camp when Lige motioned that they were right in front of me. While I was working up cautionsly Lige raised his rifle and fired. At the crack of his rifle I again heard the brush snapping and rushed up to get a shot at them myself. But the brush at this point was considerably higher than my head and quite thick, so it was difficult to see any distance at all. At the same time Bill Piper rushed out from the camp, calling to know what was up. Lige hallooed to him to get back out of sight, that the bear was coming right toward him. Just at this the big fellow broke into the open where our camp was located, and seeing Bill made straight for him. Bill drew a bead but failed to stop him. I tore through the brush as best I could and reached the open just in time to see Bill running around the rock tent with a fifteen hundred pound bear not more than ten feet behind him.

"The two leaning rocks that formed the tent were close up to the perpendicular ledge, and a lot of other rocks in falling had piled up between them so as to form a high connection with the ledge. Over this Bill came scrambling as fast as he could and down the side toward me with the bear too close a second for Bill's peace of mind. 'Go round again!' I yelled as I fired at the bear's throat over Bill's head. My shot hit him hard in the sticking place and he half rolled down to the level ground. As he rocovered his feet and made after Bill I called to Lige to look out for him as he came over again, and drawing my revolver rushed up to close quarters. In less time than it takes to tell it I saw Bill coming over this course on the second lap. Lige had reached a point not more than ten feet from the hurdle over which they were coming and nearly above them, and I had gained a rock within six feet of the course. On account of the bear stumbling from my shot Bill had gained a lead of fully twenty feet, and the bear, weakened from the three good shots that were now in him, wasn't taking the hurdle as clean as he did on the first lap. As Bill came over I called to him, saying: 'Keep it up, Bill! If you gain as much the next lap as you have on this you'll have him by the tail.' As the bear appeared Lige caught him with a good shot from above in the neck, while I, reaching to within four feet of his ear, directed my fire for the brain and he went down like a felled ox, hitting the ground at the bottom of the rocks with such a thud that further shooting was unnecessary. Billy, however, had taken my advice and came over the hurdle for the third lap with such a rush that he almost landed on the dead bear, while Lige, from his perch on the cliff, called out: 'Bill wins in the third round; time, one minute and twenty-seven seconds.'"

As Tom seemed to have finished his story and began raking in the ashes again, one of the boys asked:

"What became of the other bear?"

"Oh," said Tom, "the little fellow kept right on when the big one took after Bill. As soon as Bill had recovered his wind we all three took his trail and got him within less than half a mile of the camp. But that's another story," he said, as he raked another potato out of the fire, "and I'm not going to let this spud burn for the sake of a young grizzly that didn't weigh more'n five hundred pounds."

FIELD TRIALS AT BAKERSFIELD.

Conditions were most propitious for the thirty-third event of the Pacific Coast Friield Trial Club. The weather was perfect, the dogs were in fine fettle, the ground just ripe from recent rains to hold the scent, and the cover in most places excellent. The attendance was good although only a few of the Old Guard were present. Among the new enthusiasts was Mrs. A. G. Wilkes who enjoyed the test of long heats, riding horses of different ages and dispositions. She was there at the finish each time and enjoyed the sport immensely. She knows a good dog, too, and is an impartial judge.

The judging at the trials was done by John Schumacher and Walter Scott, whose decisions generally gave satisfaction.

At the annual meeting of the association the following officers were elected: President, A. G. Wilkes, San Francisco; first vice-president, John Schumacher, os LAngeles; second vice-president, John Flynn, San Francisco; third vice-president, J. Walter Scott, San Francisco; secretary and treasurer, S. Christenson, San Francisco; executive board, J. S. French, J. Walter Scott, J. A. Chanslor, Phil Wand and Martin I. Smith.

The date of next year's trials was considered and if conditions are favorable they will be held the second week in December.

Devotees of field trials had the pleasure of seeing a private exhibition of moving pictures of the events staged at Bakersfield. It was the first time that the Pacific Coast Field Trial Club has had moving pictures taken of their contests and the clear vision of the star setters and pointers in action afforded a deal of pleasure to the fanciers.

Those present at the exhibition were President A. G. Wilkes, secretary-treasurer S. Christenson, J. A. Chanslor, John W. Considine, J. S. French, William S. Tevis, Lansing Tevis and A. Walter Scott. The trials this season were pronounced the best in the history of the organization. Birds were plentiful and the ground in excellent shape for the dogs to work.

Summaries.

December 16—ANNUAL DERBY, open to pointers and setters whelped on or after January 1, 1914. Twelve starters, ten English setters and two pointers.

Blue Gladerigo, blue belton setter dog, by Old Forester—Dixie Chase. Joseph Canslor, owner; W. B. Coutts, handler.

With

Willing Actor, white, black and tan setter dog, by Western Boy—Bessie Whitestone. Wilkes & Avery, owners; Roy Avery, handler.

Freebooter, white, black and tan setter dog, by Free Lance—Lightheart. S. Christenson, owner; W. B. Coutts, handler.

With

Kenwood Beauty, white, black and tan setter bitch, by Melrose Dude—Caesar's Keepsake. Joseph Chanslor, owner; Fred Coutts, handler.

Kenwood Fan, white, black and tan setter bitch, by Melrose Dude—Caesar's Keepsake. W. B. Coutts, agent and handler.

With

Luana, white, black and tan setter bitch, by Western Boy—Bessie Whitestone. Jack McKee, owner and handler.

Kenwood Rock, white, black and tan setter dog, by Old Forester—Caesar's Keepsake. L. Titus, owner; W. B. Coutts, handler.

With

Rod Gladerigo, white, black and tan setter dog, by Old Forester—Dixie Chase. Avery & Wilkes, owners; Roy Avery, handler.

Babe, white, black and tan pointer bitch, by Ladess of Stockdale—Doctor's Daughter. Dr. Brown, owner; T. C. Dodge, handler.

With

Kenwood Sam, white, black and tan setter dog, by Old Forester—Caesar's Keepsake. Mrs. A. G. Wilkes, owner; Fred Coutts, handler.

Woodrow Gladerigo, blue belton setter dog, by Old Forester—Dixie Chase. J. S. French, owner; Ray Avery, handler.

With

Del Rey Kee, black and white bitch, by Deuce II—Anna Dee. M. I. Smith, owner; Fred Coutts, handler.

II.

Rod Gladerigo with Kenwood Sam.
Woodrow Gladerigo with Kenwood Fan.
Kenwood Beauty with Del Rey Dee.

Result.

1st Kenwood Sam. 2nd—Del Rey Dee. 3rd—Kenwood Beauty.

December 17—ALL-AGE STAKE, open to all pointers and setters. Ten starters, all English setters.

St. Ives, white, black and ticked setter dog, by Uncle Jimmie Whitestone—Belle Fontaine. H. S. Russ, owner; W. B. Coutts, handler.

With

Melrose Rod, white, black and tan setter dog, by Melrose Dude—Caesar's Keepsake. W. B. Coutts, agent and handler.

Shasta Maid, white, black and tan setter bitch, by Bohemian Prince—Shasta Queen. Frank Ruhstaller, owner; Fred Coutts, handler.

With

Dixie Chase, blue belton setter bitch, by Sven C—Blue Bonnet. J. S. French, owner; A. J. Wilkes, handler.

Melrose Dude, white, black and tan setter dog, by Melrose Prince—Kil's Jessie. Mrs. A. G. Wilkes, owner; Roy Avery, handler.

With

Orange Blossom, white and orange setter bitch, by Bohemian Prince—Peach Nugget. S. Christenson, owner; Fred Coutts, handler.

Old Forester, blue belton setter dog, by Count Whitestone—Harter's Cleopatra. Joseph Chanslor, owner; Fred Coutts, handler.

With

Terry, white, black and tan setter dog, by Melrose Dude—Caesar's Keepsake. Joseph Terry, owner; W. B. Coutts, handler.

Kenwood Beauty, white, black and tan setter bitch, by Melrose Dude —Caesar's Keepsake. Joseph Chanslor, owner; Fred Coutts, handler.

With

Melrose Chief, white, black and tan setter dog, by Melrose Dude—Caesar's Keepsake. J. W. Considine, owner; W. B. Coutts, handler.

II.

Orange Blossom with Shasta Maid.
Melrose Dude with Melrose Chief.

Result.

1st—Melrose Dude. 2nd—Orange Blossom. 3rd—Shasta Maid.

December 19—MEMBERS' STAKE, open to pointers and setters owned and handled by members. Five starters, three pointers and two English setters.

Peach Nugget, white and orange setter bitch, by Count Whitestone—Peach Blossom. S. Christenson, owner and handler.

With

Saddle, white and black pointer dog, by Ladas of Stockdale—Blue Ribbon. Lansing Tevis, owner and handler.

Wilson, white and orange pointer dog, by Rexall—Hoosier Girl. Dr. Brown, owner and handler.

With

Del Rey Flash, white and liver pointer dog, by Dooley —Del Rey Rose. Martin Smith, Jr., owner and handler.

Dixie Chase, blue belton setter bitch, by Sven C—Blue Bonnet, a bye. J. S. French, owner; A. J. Wilkes, handler.

Result.

1st—Dixie Chase. 2d—Wilson. 3d—Del Rey Flash.

NATIONAL SPORTSMEN'S SHOW.

The Sportsman's Review of the current month calls attention to the coming exposition of sports to be held in Madison Square Garden, New York, and says:

"When the Wild will be calling loudest, in mid-March, American sportsmen will rally at the 1916 National Sportsmen's Show at Madison Square Garden. The coming event will be unusually interesting for various reasons, including the fact that it will mark the twenty-first year of Sportsmen's shows, which were begun in May, 1895, at the Garden. These annual exhibitions are held by the National Sportsmen's Show Corporation, under the auspices and approbation of the National Sportsmen's Association, Inc. The managers are Captain J. A. H. Dressel and Allen S. Williams. Captain Dressel is the founder of these shows. The president of the association is Mr. W. H. Allen, of Penniac, New Brunswick, and the association is almost as strong in Canada as in the United States.

"The coming show will open March 15 and close March 22. Besides the usual commercial exhibits of sportsmen's arms, ammunition and general equipment for all outers there will be picturesque and panoramic exhibits representing sportsmen's paradises in Wyoming, Montana, the Adirondacks, Maine, Florida, Virginia, Louisiana, Long Island, the British Northwest and Canadian provinces of Ontario, Quebec, New Brunswick and Nova Scotia. An extensive exhibit of big game trophies will represent Africa.

"Guides will appear at the show in greater number than ever before. These pilots of the forest will bring with them pine trees, their log cabins, canoes, snow shoes and other paraphernalia, and within their exhibit spaces will practice their handicraft, ranging from making moose calls to tying flies which will beguile the wiliest trout. These hardy game scouts with their woodsy environment and lore of the trail make the strongest appeal to the ardent hunter and angler of any feature of the show.

"The center of the arena floor of the Garden will be a lake in which will float canoes, duck boats and hunters' motor boats. In the water will swim live fish, to interest the young folks, who will be glad to meet friendly Indians in beads, buckskin and feathers, who will give the children free rides in birchbark canoes around the lake, affording the young voyagers opportunities to inspect at close range rare wild aquatic birds domiciled on an island in the lake's center.

"With no intent to take the wind out of the sails of the circus which will take possession of the Garden when the sportsmen leave it, the show will have its own menagerie of wild animals, live game, game birds, game fish and interesting specimens. The New Brunswick guides are going to bring a moose as their mascot, and Ambler D. Moncure from the Blue Ridge Mountains of Virginia, will exhibit in his characteristic hunters' retreat, some tame non-venomous snakes along with pet possums and baby bears.

"In the Concert Hall of the Garden will be conferences of conservationists, lectures with lantern slides and motion pictures illustrating fishing, hunting, camping and forestry and other special attractions."

ENORMOUS OUTPUT OF FISH EGGS AT THE GREAT LAKES HATCHERIES.

According to the Government report made public on the 30th of December, the Great Lakes fish hatcheries accomplished satisfactory results with commercial fish this year, as evidenced by the annual report of United States Fish Commissioner H. M. Smith.

"Although storms and sudden ice formation hampered fishing operations during the spawning season," reports Mr. Smith, "yet the losses in some fields were in most instances compensated for by unusual success in others, and the final outcome of the collecting season was an aggregate of 1,843,492,540 eggs of all species handled as compared with 1,634,591,880 during the corresponding season of 1914.

"The egg collections of only one species, the common whitefish, fell behind those of the previous year, the total shortage in this instance amounting to about 42,000,000.

"The take of lake trout eggs, on the other hand, was more than 8,000,000 in excess of that in 1914 and there was a small gain in the collection of pike-perch eggs over last year.

"The whitefish propagation in Lake Erie was satisfactory. A scarcity of fish occurred in the Put-In-Bay field, and there was a shortage in the catch at Monroe piers, owing to the destruction of fishermen's nets by floating ice fields at the height of the spawning season.

"The take of eggs in all other fields in this lake was greater than ever before and the yield from some of them was twice that of the preceding year.

"While the aggregate egg collections, amounting to 479,290,000, were nearly 10,000,000 less than in 1914, their quality was so good that there was a decided increase in the white-fish output of the Put-In-Bay station.

"Notwithstanding the fairly good results obtained with the pike-perch in Lake Erie, as regards both quality of eggs and number taken, the collection period was the shortest ever known in Lake Erie."

HEARING ON FISH SCREENS.

The subject of placing fish screens in the irrigation ditches, a conservation measure passed by the State Legislature in 1915, has been having a hearing before Carl Westerfeldt, a member of the State Fish and Game Commission, in the office of Andy Ferguson, at Fresno this week.

Under the provisions of the new law, the irrigation companies are given the privilege of having a hearing and of introducing whatever evidence they may wish and of hearing evidence from the commission. The action taken by the Fresno County canal owners to bring the matter to a hearing is the first of its kind in the state. The screens are provided as a measure of preventing the loss of thousands of fish each year.

The companies which were represented at the hearing were the Turner Ditch Co.; Reed Ditch Co.; Riverdale Ditch Co.; Stinson Canal and Irrigation Co.; Kings River and Fresno Canal Co., and the Emigrant Ditch Co., owners of these canals supplying practically all the irrigation waters used in the county of Fresno. The companies were represented by Short & Sunderland and the Fish and Game Commission by their attorney, R. D. Duke of San Francisco. A. E. Culver, of the State Hatchery Department, under whose direction is the enforcement of the new law, also attended the hearing.

Thousands of screens have been placed in canals through out the northern part of the state. Final decision regarding the directions for the placing of these screens in the ditches of Fresno county will be made by Commissioner Westerfeldt after the evidence introduced at the hearing has been received.

These screens must be provided at the intake or mill race of irrigating ditches, pipes, flumes or canals as directed by the commission. Practically all the power companies of the state have complied with the provisions. They must be of the fineness and quality that will prevent the passing of all fish from river, creek or lake from which the canals conduct their water.

"The law has not been enforced in the past because of the lack of a screen that would serve the purpose and at the same time not interfere with the flow of the water," a member of the Fish and Game Commission said. "But now that there has been invented several screens that serve the purpose the law will be strictly carried out. This safeguard will result in the saving of fish in large quantities."

Michael J. Connell, Fish and Game Commissioner of Los Angeles, reports that there is to be expended $50,000 this year in permanently improving southern California sporting conditions. Under the supervision of William H. Shebley, State Superintendent of Hatcheries, a large modern hatchery will be located in the Sierras in Inyo county, either at Independence or Lone Pine. The hatchery will have cement floors and the installations throughout will be of the best. Superintendent Shebley has been given authority to expend as much as $30,000 on the hatchery, which will have a capacity to stock all southern California streams and lakes beyond anything attempted heretofore. A new patrol boat with a speed of fifteen knots will be built in Los Angeles, plans having been drawn for such a boat, to be in charge of the Game Commission.

San Jose Club Braves Rain.—Despite a 40-mile gale, accompanied by rain, a little bunch of marksmen attended the regular shoot of San Jose Rifle and Pistol Club near Alum Rock Park. Six intrepid shooters started, but only two finished. Carroll and Knobel shot it out in the storm for three hours, Carroll winning out by only one point. The result:

Carroll, high gun, with 417.

Knobel, second high gun, with 416.

First best shot, Knobel 22; last best shot, Knobel 24; sharpshooter, Carroll 25.

Scores: Carroll 211—206; Knobel 210—206.

McGlynn, Carroll and Knobel shot a contest with pistols, 25 shots each, at 20 yards, McGlynn winning handily, the scores of each being 198, 189, 186 respectively.

A very handsome trophy offered by William Gilbert was to have been shot for Sunday, but owing to the bad weather the match was postponed until the regular shoot on the 16th of this month.

* * *

Miss Hammond and Mrs. Riley Winners of the Diana Trophy.—The shoot of the Nemours (Ladies') Trapshooting Club for the Diana Trophy Contest, which has been running since October 7, closed December 30. This contest was arranged by Mr. Ellwood A. Davis of the Millard F. Davis Company and Mr. W. M. Hammond of the Hercules Powder Company. Mr. Davis gave a beautiful sterling silver vase for high scratch score covering the ten shoots that the contestants were obliged to make between October 7 and December 30, and Mr. Hammond gave a vase of the same style for high handicap score covering the same number of shoots.

At the close of the contest yesterday, when scores were compiled it was found that Miss Harriet Hammond had made the highest scratch score, having a total of 188 actual breaks to her credit. When it came to handicap scores Mrs. E. L. Riley was in the lead, her actual number of breaks with her added targets giving her a total of 186. The ladies are very proud of their trophies which are beautifully engraved and have the monogram of the club on them.

The spoon event was also won by Mrs. Riley, who with her handicap scored on more break than Miss Hammond. Scores (25 targets) follow:

	Score.	Hdc.	Total.
Miss Hammond	18	0	18
Mrs. Riley	15	4	19

* * *

High Averages.—High Professional average at Indianapolis, Ind., Nov. 23, was won by Mr. F. K. Eastman, who scored 142 ex 150 with Peters "steel where steel belongs" shells.

At Miamisburg, Ohio, Nov. 25, high ameteur average was won by Mr. Ed. Cain of Dayton, 95 ex 100, closely followed by Ike Brandenburg of Dayton, 93 ex 100, both using Peters shells. Mr. C. A. Young of Springfield cleaned up the program of 100 straight without a miss, also with the "P" brand.

High amateur and general high averages at Dallas, Texas, Nov. 25, were won by Mr. W. H. Bertrand of Dallas, 130 ex 150; Mr. Phil. Miller was second with 129, and Mr. S. L. Hassell, Jr., third, 127, all using Peters factory loaded shells.

At the St. Thomas, Ont., tournament, Nov. 29, Dec. 1, the most important tournament of the latter part of the 1915 season, Mr. Rolla Heikes, shooting Peters shells, won high professional and high general averages, shooting almost continuously in a blizzard, his score being 385 ex 400. Another shooting record of even greater merit was the winning of the Grand International Handicap by Mr. W. J. McCance, captain of the St. Thomas Gun Club, by the fine score of 96 ex 100. Mr. McCance also shot Peters "steel where steel belongs" shells.

CHANGE RULES FOR RIFLE TOURNAMENT.

Washington, Dec. 30.—Rules for the 1916 national rifle matches have been drafted by a committee appointed to formulate them for consideration of the board for the promotion of rifle practice, which will meet here Jan. 13 for its annual session. The committee was composed of Gen. Spencer, New Jersey National Guard, chairman; Gen. Drain, Washington National Guard; Capt. Shindel, U. S. A., and Capt. Harlee, marine corps. The suggested changes of rules were made public today by the war department and are in substance as follows:

To substitute for the present method of division of teams by standing into three classes with trophies and prizes for each class, a Class A, B and C division on standing, the first of the state teams to form the first class, the next fifteen the second and the remaining teams the third. Class A team members would receive gold medals, Class B silver and Class C bronze. Cash prizes would be dispensed with in the national matches.

Teams from the army, navy and marine corps and also from schools and colleges would be added to the various classes according to standing, a single trophy to be awarded to the highest United States service team and a single trophy to the highest school or college team. The highest score team of the trophy winners would be awarded the national trophy, the second team the Hilton trophy and the third team the bronze Soldier of Marathon trophy.

The committee suggests that the coast artillery be represented by a team and that officers with the rank of major be admitted to the competition as team captains, previous regulations having excluded grades above captain.

A general revision of rules governing pistol matches is recommended and it is proposed that the number of cash prizes be increased in the national individual matches.

The board will decide at its January meeting the place of the 1916 matches.

ELKS' TEETH NOT EMBLEMATICAL.

Dr. Ralph Hagan, President of the California Elks State Reunion Association, takes exception to the following article which appeared in the Breeder and Sportsman on January 1st:

Underground Elk Dentistry.—A curious fact was developed in the recent round-up of elk at Buttonwillow, in Kern county, none other than that the teeth or tusks of the bull elk were uniformly missing. These teeth, as is well known, are prized as charms by members of the Order of Elks and therefore have a commercial value. The teeth are not used or needed for mastication by the animals and it is said that at a previous round-up many elk were roped and the teeth extracted. Also, the story goes, that vaqueros have frequently lassoed the animals and pulled the teeth. In any event, of some fifty bull elks examined, none had the usual teeth and presumably many a member of the B. P. O. E. is wearin an elk tooth charm at the expense of the antlered herd at Buttonwillow.

His statement regarding the matter will be seen below:

"Los Angeles, Cal., Jan. 4, 1916.

"Editor Breeder and Sportsman,
"San Francisco, Cal.

"Dear Sir:

"I note the enclosed article in the Jan. 1st issue of your paper and desire that you be placed right in the matter.

"The National Order of Elks is a benevolent and charitable organization and not one of a barbarous nature as you would lead your readers to believe. Some years ago our Order went on record condemning the use of the elk tooth by our members and at the same time took the matter up with our government and arranged to have the herds of American elks fed and cared for as much as possible during the long cold winters. The elk tooth in question is not in any way emblematic of our Order and may be worn by any person who desires an ornament, if the same may be classed as such.

"I sincerely hope you will see fit to right your readers in this matter.

"Respectfully yours,
"RALPH HAGAN."

NATION MAY ENTER SEALSKIN TRADE.

Secretary William C. Redfield of the Department of Commerce, in his annual report says that the Government is considering plans to dispose of more than 3,000 sealskins which are now held in cold storage. It is suggested that the Government may have the skins dressed and dyed in this country, bringing here an industry which before the European war flourished abroad. In discussing the question, Secretary Redfield says:

"In February, 1915, Congress, by joint resolution, authorized the Secretary of Commerce to postpone the sale of sealskins then in his possession to such time as he might deem advisable. Under the law as it existed theretofore, the annual sale of sealskins was required. In the unsettled state of the international fur market, arising from the European war, a material loss in revenue would have resulted had the sale been forced during the past fiscal year.

"There are now in cold storage 3,290 sealskins, to which should be added the number taken from animals slaughtered during the summer season of 1915. If war conditions continue so as to close international markets, it may be necessary to postpone the sale of the skins taken this season as was done last year.

"The department has under consideration, however, a plan whereby all of these raw skins, those taken both in 1914 and 1915, may be dressed and dyed in this country by the best process known anywhere for the purpose and not hitherto used in this country, which would result not only in saving the skins from any possible deterioration in storage but would permit their sale as fully dressed and dyed furs of the best quality at prices remunerative to the Government. This would save the purchasers the cost of shipment to Great Britain for dyeing and dressing, as heretofore has been necessary, the expense of reshipment to this country, and the duty heretofore imposed upon them when so reshipped.

"The result of this arrangement would be to put into American control the entire process from beginning to end, to bring to this country an industry not existing here before, and to save upon this valuable product a large amount of unnecessary expense which has hitherto been imposed thereon by reason of our dependence upon a foreign source for dyeing and dressing.

"When commercial killing of fur seals shall be renewed—and the rapid growth of the herd will make that soon both possible and desirable—other products of that herd than the fur skins should have a consideration which has never been given them. The seal carcasses contain materials of economic value which have hitherto been wasted and which are far beyond the power of the native community to utilize. The department is giving the profitable utilization of seal meat and refuse careful thought."

PROGRESS ON JOHN MUIR TRAIL.

Work on the John Muir Trail, in the High Sierras, which is being built by co-operation between the State and the Forest Service, has suspended for the season and reports as to the results accomplished have been received from the Forest Supervisors who had charge of the work on the Sierra and the Sequoia National Forests.

Twenty-one miles of new trail were constructed, two and one-half miles of old trail were repaired, and one bridge built.

The trail has a minimum tread of thirty inches, with plenty of turnouts in dangerous places, and the grade, except in a few stretches, was kept below fifteen per cent. Where grading work was done, ample clearance was made for packs, and in timber country six feet clearance between trees was obtained. All prominent trees along the trail were blazed with the Forest Service blaze, and above timber-line monuments of large size were placed at frequent intervals.

The total cost of the work done last summer was $4,733.49—or about $200 per mile. Portions of the trail were hewn through solid granite, and cost at the rate of $2300 per mile. The work was done by the Forest Service under the direction of the State Engineer.

When completed the trail will furnish a practicable saddle route from the Yosemite to Mount Whitney through the High Sierras.

RAIN SPOILS ANGLING.

The heavy rain and storm played havoc with fishing conditions. With prospects bright for some good steelhead angling on the Russian River the downpour came along and swelled the stream to overflowing. It is doubtful if the river will clear enough to permit the sport before the season closes.

It has been quiet, too, with the striped bass fraternity along the San Antonio. It rained so hard last Sunday that few of the boys ventured out.

NATIONAL RIFLE ASSOCIATION DOINGS.

The first two weeks in January will be busy times for the National Rifle Association and the National Board for Promotion of Rifle Practice. The former will hold its annual meeting of the Board of Directors at the New Willard Hotel on the evening of Wednesday, January 12, and the following day the annual meeting of the National Board will be held in the office of the Assistant Secretary of War. There will also be meetings of subcommittees on rules and range construction and legislation and it is probable that meetings will be held with the military committees of the House and Senate. At the National Board meeting it will be decided whether there will be annual matches during 1916. Sentiment outside of the War Department seems to be unanimous for these matches to be held annually but the Department will probably take the stand that it is impossible to spare the troops for the matches during maneuver year, which will be in 1916. This objection could probably be met by the use of National Guardsmen to do this work. As to a range for holding the 1916 matches there are still only three ranges available: Camp Perry, Ohio, Sparta, Wis., and Jacksonville, Fla. The Sparta range would require the expenditure of considerable money to get it ready for the matches. Quartermaster storehouses and mess buildings would have to be constructed and considerable repair work done to the range itself. Sea Girt, of course, is anxious to have the matches and everybody would be pleased to go to the beautiful and salubrious seaside range in Jersey, but if more than forty teams should attend the shoot, it would be almost impossible for the Sea Girt range to accommodate the match.

It has been suggested that with very little expense and trouble the Camp Alger range, the State range of the Illinois National Guard, could be made available for the national matches if Illinois wanted them. All required of the range would be the construction of an additional butt of 50 targets. As an alternative the War Department may ask Congress for an appropriation to be made immediately available for the construction of a large federal range near Washington. Efforts have been made for the last ten years to provide the National Capital with a model federal range which could be used jointly by all branches of the service stationed in and around Washington, as well as the National Guard and civilian rifle clubs, the high school cadets and the boy scouts. It is only a matter of time when the National Guard range at Congress Heights, D. C., will have to be abandoned. A commission appointed by the War Department investigated the question of a federal range near the District and reported to Congress three sites which were available, two in Virginia and on in West Virginia. It is understood that one Virginia site, recommended was within ten miles of Washington and on or near a local suburban trolley line. Without doubt all the States of the Union would welcome and look forward with great pleasure to sending a State team to national matches that might be held in or near the City of Washington, and the latter part of September is generally productive of ideal weather. The whole question opens up possibilities which would mean the great enhancement of rifle practice interest in this country. Beyond doubt nothing has ever been done to increase this interest as much as the national matches and the Government is well repaid for the expenses connected with holding them.

THE FARM

GREEN FEED IN WINTER.

Green feeds for poultry contain only a small percentage of actual food nutrients, but are important because of their succulence and bulk, which lighten the grain rations and assist in keeping the birds in good condition. The poultryman should secure a sufficient supply of such feeds to last through the winter months in sections where growing green feeds can not be obtained. When chickens are fattened without the use of milk, green feed helps to keep them in good condition.

Cabbages, mangel wurzels, clover, alfalfa, and sprouted oats are the green feeds commonly used during the winter. Cabbages do not keep as well in ordinary cellars as mangel wurzels, so where both of these feeds are available the cabbages are fed first. They are often suspended, while the mangel wurzels are split and stuck on a nail on the wall of the pen. Clover and alfalfa may be fed as hay, cut into one-half to 1 inch lengths, or may be bought in the form of meal. Rlfalfa meal has a feeding analysis equal to bran, but is not as digestible on account of its larger percentage of fiber. Clover and alfalfa should be cut while slightly immature, if they are to be cured and fed to poultry. The leaves and chaff from such hay are especially adapted for poultry feeding.

Sprouted oats make a very good green feed and are used quite extensively in this country. The oats can be soaked for 12 hours in warm water and then spread out in a layer of from one-half to 1½ inches deep on a floor, or in a tray or tier of flats, which have openings or holes or a three-sixteenths inch mesh wire bottom, so that the water drains freely. They may be stirred daily and sprinkled, or allowed to sprout without stirring, until ready for feeding. They are usually fed when the sprouts are from 1 to 1½ inches long, although some poultrymen prefer to allow the sprouts to grow to 2 to 3 inches long. Oats need a moist and warm atmosphere in which to sprout quickly, so that it is necessary to furnish heat or keep them in a warm room during the winter, while they may be sprouted out of doors during the rest of the year. It takes from 6 to 10 days to sprout oats, depending on the temperature of the room. Oats frequently become moldy while sprouting. To prevent this, they may be treated with formalin, using 1 pint of formalin to 30 gallons of water, which is sprinkled over and thoroughly mived with 30 bushels of oats. Cover the oats with a blanket for 24 hours; then stir until they are dry. Keep them in a sack which has also been soaked in formalin. Oats thus treated and dried may be held for a long time for sprouting.

Where the double-yard system of confinind poultry is used, one of the yards is kept in green feed into which the hens are turned when the crop attains a height or 4 or 5 inches. This method of alternately yarding poultry furnishes green feed for the birds and at the same time freshens the yard. Rape, wheat, rye, oats, and barley are usually sown for this purpose. Rye is good for late fall and early spring feeding, as it will live through the winter in most sections. Oats, wheat, and barley are used throughout the spring, summer and early fall. Several of these grains may be sown together to secure a greater variety of green feed, and any quick-growing grains may be used for this purpose.

GOMBAULT'S
CAUSTIC BALSAM

A safe, speedy and positive cure for

Curb, Splint, Sweeny, Capped Hock, Strained Tendons, Founder, Wind Puffs, and all lameness from Spavin, Ringbone and other bony tumors. Cures all skin diseases or Parasites, Thrush, Diphtheria. Removes all Bunches from Horses or Cattle.

As a HUMAN REMEDY for Rheumatism, Sprains, Sore Throat, etc., it is invaluable.

Every bottle of Caustic Balsam sold is Warranted to give satisfaction. Price $1.50 per bottle. Sold by druggists, or sent by express, charges paid, with full directions for its use. Send for descriptive circulars, testimonials, etc. Address

THE LAWRENCE-WILLIAMS COMPANY, Cleveland, Ohio

ONE COW WOULD SUPPLY 47 PERSONS.

If you were keeping forty-seven persons in a boarding house and had only one cow to supply milk and butter, what would you do?

If the cow were Carlotta Pontiac, a 12-year-old Holstein bred and owned by the dairy husbandry department of the College of Agriculture of the University of Missouri at Columbia and you gave each boarder an amount equal to the per capita consumption of milk and butter in the United States you would not need to do anything but sell 9,643 pounds of milk every year. That is the amount she produced each of the last three years above the per capita allowance for forty-seven persons. The per capita consumption is figured, on the calculation of the P. S. Department of Agriculture, as 17.6 pounds of butter a year and one-third of a quart of milk a day.

In three years Carlotta Pontias has produced 64,957 pounds of milk and 2,480 pounds of butter. The average Missouri cow would have furnished in that time 10,500 pounds of milk and 420 of butter, about one-sixth as much as Carlotta.

At the average price in Columbia of 7½ cents a quart for milk, Carlotta's product in the three years would be worth $2,319.90. At 30 cents a pound for the butter and 25 cents a hundred pounds for skim milk, it would be worth $882.05. The later return would involve little cost of handling.

Carlotta Pontiac's three year old record perhaps has not been equaled by any other cow in Missouri. She is still producing milk, having given birth to a heifer calf three weeks ago. However, she is not an test now. The production of Carlotta Pontiac is made possible by her breeding. A record made by her three years ago was broken a year later by her ungrateful sister.

Like other cows in the dairy herd at the University, Carlotta eats grain, corn silage, and alfalfa hay. Of the silage and hay she has all she will eat. With the grain she gets cottonseed meal and bran.

Carlotta's home is a large box stall of iron bars with straw for a bed. The only favor that she has which is not shared by other cows in the herd is that her door is fastened with an extra button on the outside. For a time she enjoyed the privilege of lifting the latch of her door and walking out without the permission of her keeper. When the keeper leaves her now, Carlotta knows that he will turn the button and stands resigned to her imprisonment. But let a stranger leave the stall, Carlotta suspects his ignorance of her methods and tries to lift the latch. Often she is successful.—Missouri Stockman.

CO-OPERATION IN MARKETING AND PURCHASING.

The advantages of co-operation in marketing of farm products are emphasized in the annual report of the office of markets and rural organizations of the department of agriculture, which has just been published. "The conclusion seems warranted," says the report, "that in communities where co-operation is practically applied to the farmer's business, the results obtained are far more satisfactory than those secured by the individual methods." It is estimated that farmers' co-operative marketing and purchasing organizations will transact this year a total business amounting to more than one billion, four hundred million dollars. Agricultural co-operation in the United States is, therefore, far more prevalent than is generally believed, but it is not yet upon a sufficiently strong business basis. For this reason the office of markets has studied the various methods employed by these associations and has worked to devise means by which these methods can be perfected. The studies also have included the prevailing methods of marketing perishable products — cotton, grain, cottonseed, livestock and animal products.

FARM THAT WAS MADE TO PAY.

A significant instance of what proper methods of farm management can accomplish is afforded by a certain 500 acre farm in central Michigan. For ten years this farm failed to pay interest on the capital invested. One year after the owners had been induced to make certain radical changes the farm paid all the expenses of operation and returned them 5 per cent on an investment of $60,000. The changes which accomplished this financial revolution were as follows:

Four horse power was substituted for two-horse.

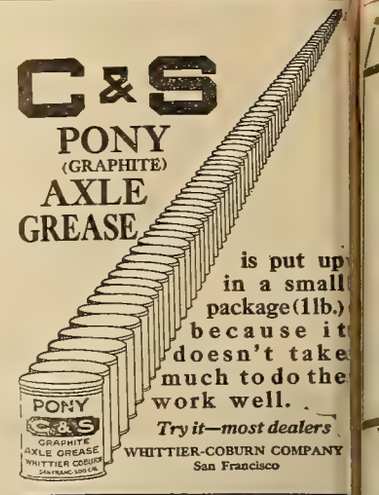
The unprofitable cows in the dairy herd were weeded out and sold and the money received for them invested in better stock.

A silo was built.

The foreman was allowed, in addition to his salary, 10 per cent of the net income from the farm. The expenses of operating the farm, but not the interest on the capital, were deducted from the income before the foreman received his percentage.

It was this last suggestion which met with the most opposition from the owners o fthe farm, but when it was pointed out to them that for every dollar the foreman received under such an arrangement they would get $9 they yielded.—Field and Farm.

WINTERING IDLE HORSES.



At this time of the year practically all the heavy work on most farms has been finished, and with the approach of winter horses are more or less idle. Since idle horses give no return in labor performed, the feeding should be as economical as possible, and proper care should be taken of the animals in order that they may be in the best possible condition for work in the early spring.

Horses should not be confined to the barn during the winter on a liberal supply of grain. It is far better to "rough" them through the cold months. They should be given the run of the yard or lot during the day. This should be provided with a protected shed, one that is thoroughly dry and well provided with bedding. While nature does her part and protects the horse with a heavy coat of hair during the cold months, the shed is necessary in order to afford the necessary shelter and protection against rains, snow, and cold winds. Winter winds come mostly from the north and northwest, and the shed should be so situated and constructed as to give the proper protection from this quarter.

In the feeding of idle horses the high-priced feeds should be avoided in order to keep them in proper condition at the lowest cost. It has been found that idle horses do very well on a winter feed consisting of all the hay, oat straw, cornstalks, or sorghums they will consume, so that little grain is necessary. Idleness also permits of a more through mastication of the feed, thus insuring proper digestion.

From six to eight weeks before the spring work is started the horses should be put at light work and started on a small grain ration in order that they may be in proper condition for the work required of them. The grain ration may then be gradually increased until the regular allowance has been reached for the working season.

Growing colts require considerable protein. They should be so fed as to secure proper development and at a minimum cost. Rough feed, such as cleaned mixed hay, alfalfa or clover, may be fed along with a mixture of bran, oats, and corn.

PERCHERON STALLION WANTED
Will buy, lease or trade. Must be blocky and registered.
J. H. NELSON,
Box 361, Selma, Cal.

FOR SALE.
BEST POLICY 42378, one of the best bred horses in the world. Handsome bay horse, small star in forehead, left hind pastern and left fore heel white. Has size, heavy boned, stylish, pure gaited trotter, sound, and a splendid individual in every respect. Best Policy is by Allerton 5123, dam Exine 2:18¼ by Expedition, next dam Euxine by Axtell, next dam Russi by Harold 413, next dam Miss Russell, dam of Maud S., etc. Best Policy has trotted a mile on the Hanford half mile track in 2:12. He is ten years old and with little training would make a good game race horse, and ninety percent of his colts are trotters. He will be sold at a great sacrifice. For price and further particulars address
BREEDER & SPORTSMAN,
P. O. Box 447, San Francisco, Cal.

FOR SALE.
The five-year-old pacer The Fool, trial this season with limited opportunity in 2:11, halves in 1:03, quarters in 30 seconds. A pleasure to drive this fellow and an amateur will drive him in better than ten in the matinees next season.
Also Oro Bond, three-year-old. But for a slight injury late in the season would have been heard from in the stakes this year. He is now sound and ready for some one to point for the races next year. Will make a sure enough racehorse. These two priced to sell.
Breeding and price on application.

BREEDER AND SPORTSMAN.

HIGH-CLASS TROTTING BRED COLTS FOR SALE.
No. 1. Three-year-old filly sired by Al Style, dam Dr. Hicks. This filly is registered.
No. 2. Two-year-old colt, full brother to the above.
No. 3. Two-year-old filly sired by Dan Logan, dam a Wilkes mare who was a great natural pacer but unfortunately was crippled by a barbed wire accident as a yearling and was never worked.
The All Styles are large, strong built with all the style of their sire, perfect in action, and all three of the above colts should make race horses second to none. The Dan Logan filly is perfectly gentle to handle and drive and is a high-class filly in every respect. Apply to or address,
I. F. EATON, Chico, Cal.

BEAUTIFUL BELVEDERE

LOTS FOR SALE

CORINTHIAN ISLAND Subdivision to Belvedere is the most beautiful spot on the shores of San Francisco Bay for a suburban home. It commands an extensive view of the City of San Francisco, Alcatraz and Angel Islands, Raccoon Straits, San Francisco Bay, Richardson's Bay, the Berkeley shore, beautiful Belvedere and Mt. Tamalpais. It is in Marin County, directly opposite San Francisco, and forms the eastern shore of Belvedere cove. It has a naturally terraced, sunny, western slope that is well adapted for many choice residence sites, every one affording most picturesque views of the bay and mountain. It is protected from the prevailing western trade winds in summer by Belvedere Island, and from the southerly storms in winter by Angel Island. The soil is fertile and part of the island is well wooded.

It is less subject to fog than any other place near San Francisco. The summer fog, as it rolls in from the ocean, splits on the western slope of Sausalito, part of it flowing in a line with Angel Island towards the Berkeley shore, and part of it along the southern slope of Mt. Tamalpais, leaving Belvedere, Corinthian Island and Raccoon Straits in the bright sunlight, while the fog banks can be seen as a white wall both to the north and the south.

There is very little available land about the shores of San Francisco Bay that is desirable for homes, especially for those who love boating and kindred sports. The Alameda and Contra Costa shores of the bay are the lee shores and receive the full brunt of the boisterous trade winds which lash the shoal waters near the land into muddy waves, making boating both unpleasant and dangerous. To the north of the city and in Marin County the land from Sausalito to the entrance of the bay is a Government reservation and will never be placed on the market. The shores of Richardson's Bay are not at present convenient to boat service and, aside from Belvedere and Corinthian Island, there is little or no land near any ferry landing that possesses the natural advantages, improvements and possibilities that are offered on Corinthian Island. Concrete roads, pure water, telephone service and electric light wires are already installed. It is only ten minutes' walk from any point on the property to Tiburon boats, and but forty-three minutes' ride to the foot of Market Street.

On the point of Corinthian Island the Corinthian Yacht Club has had its home for many years, and on any summer day the white sails of its numerous fleet add to the charming scene, as the trim yachts glide about the cove. Excellent fishing of all kinds for bay fish, including salmon, the gamey striped bass, rock fish and the toothsome silver smelt, is to be had in the cove. There is probably no spot so accessible and in such close proximity to any large city in the world that offers the attractions of climate, magnificent scenery, fishing and boating as will here be found.

FARMERS NEED FERTILIZERS.

Washington, Jan. 2.—A gloomy view of prospects for fertilizing next year's crops was presented in a statement issued today by Secretary Houston of the department of agriculture. The secretary urged farmers to conserve all fertilizing materials and to use lime and ecostate crops, so as to increase the productivity of the soil.

Relief measures undertaken by the department since the European war disrupted the American phosphate industry and cut off potash imports from Germany, will help, the statement says, but they offer slim possibilities that the American farmer will get a small part of the fertilizing materials necessary for his needs. Nitrogenous fertilizers alone will be available in the quantities needed.

The secretary took up first the potash supply, long since exhausted in the United States by the German embargo on shipments. Investigation, said his statement, has shown four sources of supply in this country, but none immediately available. These are the kelp beds of the Pacific coast, alunite deposits in Utah, feldspathic rocks in the East, and the mud of Searles lake, California.

Manufacture from feldspar has been found feasible, but the cost is high. Development of Searles lake deposits presents technical difficulties and title to the property is involved. Manufacturers are experimenting, the statement said, with alunite. Kelp was offered as the best material. Three large companies have begun manufacture from kelp and government experts will be sent to the Pacific coast to aid the experimental work.

Production will be slow for a long time, it was pointed out, and demand for potash in other manufactures in the United States will be so great that none will be available for agricultural purposes for a long time.

The prices offered under existing conditions by the manufacturers of articles will cause practically the entire output of these concerns to be diverted from the fertilizer industry. It would require 90 or more plants costing approximately $50,000 each, and having an operating capital of $25,000 each, to produce the quantity needed for agriculture. This would involve the assumption that commercial phases of the problem were satisfactorily solved.

The crippled state of the phosphate industry was attributed to the high price of sulphuric acid, much of which is being used in the manufacture of war munitions. The price has jumped from $5 to $25 a ton. Demand for the acid is so heavy that abandoned plants are being refitted for its manufacture. The bureau of soils, meanwhile, is experimenting with the manufacture of phosphoric acid as a substitute for sulphuric acid.

Nitric prices have advanced, but there is an abundant supply of nitrogenous fertilizing material, and the department of agriculture is endeavoring to find methods to cheapen the cost of manufacture.

AIM OF AGRICULTURAL CLUBS.

The principal objects to be attained through the promotion of boys' agricultural clubs in the South, as defined by those in charge of this work, are:

1. To encourage and train boys along the lines of the activities of country life.
2. To put into practice the facts of scienti,c agriculture obtained from books, bulletins, etc.
3. To bring the school life of the boy into closer relationship to his home life.
4. To assist in the development of the spirit of co-operation in the family and in the community.
5. To dignify and magnify the vocation of the farmer and by demonstrating the returns which may be secured from farming when it is properly conducted.
6. To enlarge the vision of the boy and to give him definite purposes at an important period in his life.
7. To furnish to the aggressive, progressive rural school teacher an opportunity to vitalize the work of the school by correlating the teaching of agriculture with actual practice.

ABSORBINE
TRADE MARK REG. U.S. PAT. OFF.

Reduces Strained, Puffy Ankles, Lymphangitis, Poll Evil, Fistula, Boils, Swellings; Stops Lameness and allays pain. Heals Sores, Cuts, Bruises, Boot Chafes. It is an ANTISEPTIC AND GERMICIDE

Third Edition Within One Year of Publication.

CARE AND TRAINING OF TROTTERS AND PACERS

NEVER before in the history of the publishing world has a horse book gone into a third edition within one year of publication. Yet the explanation is simple—the book fills a long-felt want. Never before has this subject been treated in a distinct manner. It has been handled in connection with autobiographies of trainers, but such works are out of print or out of date, for they were published 20 years or more ago. Conditions and methods have changed since then, and former treatises are just as much out of date as the high-wheel sulkies then in vogue.

"Care and Training of Trotters and Pacers" is as modern as a 42-centimeter gun. It does not contain the ideas of one man, but of 100 of the leading horsemen of the day, including Thomas W. Murphy, Walter R. Cox, and Edward F. Geers. These ideas were converted into book form by two prominent American turf journalists.

This book enables anyone to do his own caretaking and training until it is time to send the colt to a professional trainer, or the owner can train and race the colt himself. The treatise covers the details of a colt's life from the moment it is foaled until after its first year's campaign. The facts are clearly presented. Nothing is left to guess work. The language is lucid. Both theoretical and practical views are outlined and compared. The instructions are concise and easily understood. The work contains no advertisements—it is not a catch-penny publication that looks big in the advertisement but proves disappointing when received.

Many professional trainers have purchased the book and have found it interesting. Despite the war, over 300 copies have been sold in Europe and Australia.

Price $1.00 postpaid. Cloth, illustrated, 178 pages, 5x7 inches.

Harpers Weekly and The Breeder and Sportsman

$5.50 WORTH FOR $3.25

Breeder and Sportsman
One Year, 52 Copies, Regular Price $3

THE BREEDER AND SPORTSMAN is the oldest weekly journal devoted to the Horse west of Chicago, having been established in 1882. This interest, together with the Kennel, Gun, Fishing, Coursing and kindred sports receiving the most attention in its columns; together with Agricultural and Dairying Departments, under whose headings especial attention is paid to the breeding, etc., of Cattle, Sheep, Hogs, Poultry, and all other animals connected with stock raising.

As an advertising medium to Racing Associations, Horsemen, Stock Breeders, Manufacturers of Sulkies, Carriages, Wagons, Agricultural and Dairying Implements and Machinery, Sporting Goods, Fanciers, Stock Foods, and all others desiring to bring their wares to the attention of the classes to whose interests the paper is devoted within the field mentioned above, the BREEDER AND SPORTSMAN will be found indispensable.

Harpers Weekly
Six Months, 26 Copies, Regular Price $2.50

At no time has it been so evident to Americans as now, that the most important thing in the lives of all of us is the progress of the European War.

Next to your daily bread the war interests you most vitally. It may even come to be the most important part of your problem of living.

The periodical of greatest fundamental interest to you today is the one that can best report those phases of the war that come closest to your country and you.

Because of connections abroad and at home, HARPER'S WEEKLY is that publication.

As a critical commentary that presents inside facts, it is the necessary bridge for intelligent readers between the daily newspaper and the monthly review.

You want HARPER'S WEEKLY now. You can get it now on trial at a remarkable reduction.

Send $3.25 Now and Get Them Both

THIS OFFER is made to all who will send us $3.25 before January 31st, 1916, whether for extension of subscription, renewal of subscription or a new subscription. Address:

GUNCRAFT

By W. A. Bruette

A modern treatise on guns, gun fitting, ammunition, wing and trap shooting.

The theoretical side of the subject has been covered with a scientific accuracy which makes it an up-to-date book of reference, and the practical side of wing shooting, gun fitting, the master eye, defects in vision and other important questions have been treated in a way that will enable either the expert or the amateur to determine if he is shooting with a gun that fits him and how to decide upon one that does. It will enable him to ascertain why he misses some shots and is successful with others. The secrets of success in trap shooting, as well as the peculiarities in flight of the quail, the jacksnipe, the woodcock, the ruffed grouse, and the duck family, are illustrated by drawings and described in a way that will facilitate the amateur in mastering the art of wing shooting.

Cartridge board cover, $1.00; Cloth, $1.50

A Practical Treatise on the Training of Hounds

Training the Hound

Foxhounds Beagles and Coonhounds

The system of training advocated is simple and effectiv , so that anyone who carries out instructions can easily develop a foxhound, a beagle or a coon dog to the highest state of usefulness or organize a pack in which each hound will work independently and at the same time harmoniously with the others. The subjects are: The Hound's Ancestry, History, Instinctive Tendencies, English and Native Hounds, Developing the Intelligence, Training the Foxhound, Voices and Pace of the Hound, Qualities of Scent, Manners, Training the Coon Dog, Coon Hunting, Training the Beagle, Forming a Pack, Field Trial Handling, Faults and Vices, Conditioning, Selecting and Rearing Puppies, Kennels and Yards, Diseases of Hounds and Their Treatment. The chapters on field trial training and handling are alone worth the price of the book, which is one that every man who loves the voice of a hound should read.

The book contains 224 pages, is clearly printed, nicely bound, and handsomely illustrated with bloodhounds, various types or English and American foxhounds, beagles and cross-bred dogs for 'possum and coon hunting.

Price, in heavy paper cover, $1; cloth, $1.50, postpaid.

WINCHESTER

REPEATING RIFLES FOR HUNTING

In choosing a rifle for any purpose, its reliability and accuracy should be carefully considered. Winchester rifles enjoy the highest reputation the world over for reliability, accuracy, strong shooting qualities and finish. They are made in all desirable calibers from .22 to .50, and in eleven different models. From these a Winchester can be selected that will meet any shooting requirement.

WINCHESTER CARTRIDGES shoot straight and hit hard. These two cardinal points of a good cartridge, and also that of reliability, are always found in Winchester ammunition. No matter what caliber cartridges you want or whether they are for use in a rifle, revolver or pistol, you will get the best results by using Winchester make. Accept no substitute but insist upon the **W** brand.

THE GRAND PRIX—the highest possible honor—was awarded to the entire Winchester line of rifles, shotguns, metallic cartridges and loaded shotgun shells, etc., at the Panama-Pacific International Exposition.

$1100 for Pacing Foals

$100 to Owners of Stallions

$1000 for Three-Year-Old Trotters.
50 to the Nominator of the Dam on whose Original Entry is named the Winner of Three-Year-Old Trot.
600 for Two-Year-Old Trotters.
25 to the Nominator of the Dam on whose Original Entry is named the Winner of Two-Year-Old Trot.
50 to Owner of Stallion, Sire of Winner of Three-Year-Old Trot when Mare was bred.

$700 for Three-Year-Old Pacers.
50 to the Nominator of the Dam on whose Original Entry is named the Winner of Three-Year-Old Pace.
400 for Two-Year-Old Pacers.
25 to the Nominator of the Dam on whose Original Entry is named the Winner of Two-Year-Old Pace.
50 to Owner of Stallion, Sire of Winner of Three-Year-Old Pace when Mare was bred.

SPECIAL CASH PRIZES FOR STALLION OWNERS.

Given to Owners of Stallions standing highest in number of Mares nominated in this Stake that were bred to their respective horses, divided as follows:

FIRST PRIZE, $35; SECOND PRIZE, $15.

The Above Prizes will be Paid on February 20th, 1916

ENTRANCE AND PAYMENTS—$2 to nominate mare on February 1, 1916; when name, color, description of mare and stallion bred to must be given; $5 August 1, 1916; $10 on Yearlings January 1, 1917; $10 on Two-Year-Olds January 1, 1918; $10 on Three-Year-Olds January 1, 1919.

STARTING PAYMENTS.—$25 to start in the Two-Year-Old Pace; $35 to start in the Two-Year-Old Trot; $35 to start in the Three-Year-Old Pace; $50 to start in the Three-Year-Old Trot. All Starting Payments to be made ten days before the first day of the meeting at which the race is to take place.

Nominators must designate when making payments to start whether the horse entered is a Trotter or Pacer.

Colts that start at Two Years Old are not barred from starting again in the Three-Year-Old Divisions.

CONDITIONS:

The races for Two-Year-Olds will be mile heats, 2 in 3, not to exceed three heats, and if not decided in two heats will be finished at the end of the third heat and money divided according to rank in the summary; and for Three-Year-Olds—three heats, money divided 25 per cent to the first heat, 25 per cent to the second heat, 25 per cent to the third heat, and 25 per cent to the race according to rank in the summary. Money in each division 50, 25, 15 and 10 per cent. Should two or more horses be tied for first place at the completion of the third heat, such horses only shall contest in a fourth heat and money divided according to rank in the summary at the termination of that heat. A horse having won the first two heats and drawn or distanced in the third heat shall not lose position in the summary. Distance for Two-Year-Olds, 150 yards; for Three-Year-Olds, 100 yards.

If a mare proves barren or slips or has a dead foal or twins; or if either the mare or foal dies before January 1, 1917, her nominator may sell or transfer his nomination or substitute another mare or foal, regardless of ownership; but there will be no return of a payment, nor will any entry be liable for more than amount paid in or contracted for. In entries, the name, color and pedigree of mare must be given; also the name of the horse to which she was bred in 1915.

Entries must be accompanied by entrance fee.

Nominators liable only for amounts paid in. Failure to make any payment forfeits all previous payments. This Association is liable for $3000, the amount of the guarantee, only.

Hopples will be barred in trotting and pacing divisions.

Right reserved to declare off or reopen these Stakes in case the number of entries received is not satisfactory to the Board of Directors.

Money divided in each division of the Stake 50, 25, 15 and 10 per cent. There will be no more moneys in each division or heat than there are starters.

Entries open to the world. Membership not required to enter; but no horses, wherever owned, will be allowed to start until the owner has become a member.

TED HAYES DIES IN BUTTE.

Friday morning of last week news reached Los Angeles by wire that Ted Hayes had just passed away as the result of a sudden attack of heart trouble, the sad news being confirmed later through the columns of all the Butte dailies. Only a few short weeks ago Ted was in our midst, apparently in the very best of health and spirits, and the news of his passing comes with all the more shock on that account.

Christened "Charles Fonda" by his parents, he became known at a very early age under the nickname of "Ted," and Ted he will always remain in the hearts of the thousands of horsemen and sportsmen in general who held him in high esteem. Indeed, in trotting horse circles, he was never known by any other name, most people having the idea that the Ted was a corruption of Edward or Theodore.

Born some fifty years ago in the neighborhood of Saratoga, N. Y., according to the Butte reports of his death, he came west when a young man and became identified with the famous Bitterroot Ranch of the late Marcus Daly, Bitterroot at that time being one of the world's greatest producers of both the thoroughbred and the trotter. It was Hayes who secured for the copper magnate the imported colt Ogden by Kilwarlin—imp. Oriole, who won several good races in the Daly colors, including the Futurity and the Great Eastern at Sheepshead Bay as a two-year-old. It was as trainer and driver of trotters, however, that Ted achieved his greatest success, racing from the Western tracks to the Grand Circuit with the horses of Bitterroot Ranch, and later with those belonging to William and Charley Morris, the widely known mining men of the little but rich camp of Pony, Montana. After the Morrises discontinued their racing operations on a large scale he became identified with the stable of W. A. Clark, Jr., and for a number of years made his headquarters at Los Angeles. Most widely known and successful of the several horses he handled for Mr. Clark were those good race trotters Bon Voyage 2:08 and Bon Courage 2:08½, the latter a trotter of exceptional merit. As a two-year-old his record of 2:12¾ at Los Angeles stamped him as one of the best geldings of the age and gait in the entire country, while both as a two- and three-year-old he was a futurity contender of rare quality. Last year he was entered in a number of races here at the exposition, and when Ted went to Los Angeles to put the finishing touches to his preparation he drove him to his new record of 2:08½, which was the fastest mile trotted by a four-year-old gelding during the entire season of American harness racing.

With the decline of the sport on the Pacific coast and the withdrawal of Mr. Clark from active engagement in the same to any great extent, Mr. Hayes went back to Montana and engaged in business in Butte, where he had a very wide acquaintance. He purchased an interest in the Tuxedo cigar store on West Broadway and with Mrs. Hayes assumed the management of the Lyric theater on East Park street. Both ventures were flourishing, and a new and most modern motion picture house, now in process of construction, was to come under the Hayes management upon completion.

One of the sad features of his demise was that his wife was out of the city at the time, not arriving until the evening after he had passed away. Friends and acquaintances throughout the country, and especially here in the west where Mr. Hayes was best known and best loved, will join us in extending to Mrs. Hayes the most profound sympathy and respect.

THE STALLION'S OWNER'S INTEREST IN THE P. C. T. H. B. A. STAKES.

While practically every horseman in the west is more or less familiar with the opportunities for profit presented to them through the medium of the local futurities, we wish at this moment to lay especial stress upon the attractions offered to stallion owners by the sixteenth number of the series promoted by the Pacific Coast Trotting Horse Breeders' Association, entries to which close with Secretary Kelley, Drawer 447 this city, on Tuesday, February first, as their interests have always been protected in these stakes and are, as usual, looked after in the present event.

In fact. the very first division of the money is made payable to stallion owners, fifty dollars of the three thousand that compose the entire stake to be paid to them on February twentieth, only a little more than a month from today. This sum will be divided into two awards, one of thirty-five dollars to be paid to the owner of the stallion who has the largest representation of mares bred to him in 1915 and nominated in the stake, while the remaining fifteen dollars will go to the owner of the horse having the second largest list in the original entries. An additional one hundred dollars is also provided for the benefit of the stallion men, to be paid in equal sums of fifty dollars each to the owners of the sires of the winners of the three-year-old divisions of the stake at the time the dam of the winner was bred. These awards are well worth working for, and the larger the number of mares bred to your stallion and nominated in this stake, the greater will be the opportunity for a winner to be developed from among their foals.

To assist stallion owners in securing nominations of mares bred to their stallions Secretary Kelley sent out a call some days ago asking them to send in to him a list of broodmare owners who patronized their horses in 1915, and quite a number have made prompt response to the request. To each man on the various lists Mr. Kelley is making a personal appeal for nominations, and through the combined efforts of the stallion owner and the Association, every worthy mare now with foal should be provided with a nomination in Stake Number Sixteen, thus guaranteeing to her foal the very best opportunity for development for speed and an early earning capacity. Every foal that has a futurity engagement is an advertisement for both the sire and dam, and no good youngster should have to remain in the barn or pasture and see an inferior rival win a good stake merely because its owner failed to provide it with an engagement in the same. The saddest thing that can be written of a really good two- or three-year-old trotter or pacer is this: "He had no futurity engagements and hence was not fully developed, as he had no earning capacity at that age."

Do not let this be said of youngsters that are by your good stallion. Make an effort to have every mare bred to him represented in this stake, and if you have not already sent the list of your patrons to the secretary, do so at once, that his efforts may be joined to yours. You will find it well worth the slight trouble to which you will be put.

THAT WHITE SOX—HAL BOY MATCH.

Some weeks ago Mr. Clarence J. Berry in a conversation with "the boys" who congregate almost daily about a certain billiard table at Chick Wright's academy in this city, let drop a few remarks concerning the relative merits of White Sox and Hal Boy, the pair of fast sidewheelers who were the winners of the two big stakes given during the exposition race meetings last season, and who are without doubt two of the classiest racing pacers that the country has produced in recent years, both representatives of the Pacific coast. After considerable talk had been indulged in by those present, part of it serious and a good deal of it of the "airy persiflage" brand, Mr. Berry executed a neat little bunch shot, anchored the ivories in the corner of the table long enough to click off a run of sufficient length to put the bill up to his opponent for settling, and then proceeded to express himself to this effect: That he would like to see the pair come together over a real good track on a real good day, with no outside parties to help or hinder either one, as a true test of their respective merits, their former meetings having been of the catch as catch can order in large fields where racing luck necessarily played a considerable figure in the deciding of the ultimate result; that as a part of the program of any meeting of the Grand Circuit the match ought to prove most attractive from the standpoint of the general public, and that as a purely sporting proposition it ought to be worth about five thousand a side to the owners of the horses, and that he, as the owner of the mare, would not be averse to wagering this modest sum that he had the better horse of the two.

One or two newspaper men chanced to be among those present and they at once proceeded to give Mr. Berry's ideas a little airing in the public prints, an airing that has resulted in the Hal Boy people sitting up and taking notice of the same, as they are of the dyed-in-the-wool variety of sportsmen who are not at all averse to having a bit of pleasure of this kind out of life as they go along. While no "defi" has been issued from either party, and Mr. Berry's original remarks on the matter were not intended as such, the Indianapolis folks are evidently talking the matter over and find that it appeals to them. Early this week the editor of this paper received a personal letter from an Indianapolis horseman, now retired, a friend of both Mr. Fletcher and his racing manager, Greeley Winings, which said in part: "By the way, if your folks out there really mean it, the match race you spoke of a week or so ago will surely materialize, as the Hal Boy fellows are ready to put up the kale—and that would be one race in 1916 that I would certainly try to see. If a series of about three such meetings could be arranged it would be a grand thing for the interest in harness racing, so push them along, at least for one match."

Since the foregoing paragraphs were written the current issue of the Western Horseman has come to hand and under the heading "Fletcher Accepts Challenge" has the following to say concerning the matter:

"Stoughton Fletcher, who owns the famous pacing gelding, Hal Boy 2:01½, has signified his willingness to match his horse against White Sox 2:05¼, owned by Clarence J. Berry, of San Francisco. His statement is made in response to a challenge recently issued through the Breeder and Sportsman by the coast horseman for a match race for $5,000 a side.

"Mr. Fletcher says he is perfectly willing to match his pacer against the California mare for one or three faces, $5,000 a side, winner to take all, the race or races to be contested at Grand Circuit meetings where the most money will be offered for the appearance of the pair, and the race to be best three in five. A forfeit of $1,000 placed in charge of The Western Horseman Company, of Indianapolis, is all that is necessary, the remainder of the amount to be put up later."

While we take a slight bill of exceptions to the wording of the final sentence of the first paragraph of the comment of our esteemed contemporary, our original mention of the proposed race not being made in the nature of a definite challenge on the part of Mr. Berry, from the way matters stand at present we are inclined to the idea that the voicing of Mr. Fletcher's views by the Indiana journal means that the race will come off, as Mr. Berry is not much given to talking just for the pleasure of hearing his own voice and his original proposal for such a meeting was made in good faith to those present at the time, and with the endorsement of his trainer, Mr. William G. Durfee.

Owing to the fact that at this moment Mr. Berry is out of the city, having returned a few days ago from Los Angeles only to leave the city almost immediately on another mission, we are unable to publish definite acceptance of the match, but expect to be able to do so in our next issue, as he will in all probability be back again a very short time.

It will be "some race."

WE HAVE IN COURSE OF PREPARATION a number of stallion cards and other advertising matter for various California owners who realize the importance of early and extensive advertising. If you are not one of those who have already given us your order we suggest that you take the matter up with us at once, giving us ample time to prepare the data and put it in the best shape possible. Such matters cannot always be handled properly on short notice, and the earlier we get to work on your advertising, the greater chance it has of being pleasing to yourself and the public and consequently truly effective. We do printing of all kinds for stock farms and stallion owners, and our best efforts are always at your service. Send along your order while there is plenty of time to handle it well.

A Visit with the Los Angeles Horsemen

Having safely survived two big New Year's celebration dinners at Hemet, and having escaped intact from the snow banks that hemmed in that pretty little hamlet on all sides, I dropped off at Los Angeles early last week and spent two or three days there, giving the once over to the various stables of trotters and pacers that are being prepared for the campaigns of the coming season, some being bound for the northern routes over the Canadian prairies, some for the Great Western Circuit, some for the smaller meetings of the central west, and some for a trip down the big line, while still others will remain at home to take in the fairs and race meetings that will be provided for them in California and the adjoining states of Oregon and Arizona. A recent visit from our old friend Jupiter Pluvius had curtailed training activities to mere jogging on the inside track, but breeding and individuality were present in large quantities, and the Los Angeles delegation can be depended upon to have plenty of speed on tap when the time comes for their horses to face the starter.

This prophecy is based on the same grounds as the one immortalized some years ago in the New England village of Barnstable when Squire Si Hoskins suffered that attack of pneumonia that for a time threatened so seriously to prove fatal. As the situation increased in gravity certain friends of the Squire's, in the depths of their anxiety, hunted up Uncle Ezra Endicott, the village seer and prophet, and made inquiry of him as to the probability that the Squire's illness might prove fatal. Uncle Ezra, after devoting to the question the deliberation due such a weighty matter, gave it as the result of his cogitations and the consumption of half a plug of "Star" that, in his opinion, their beloved fellow townsman would undoubtedly live until spring. Pressed for the grounds upon which he based such a strange belief, he finally gave voice to the following classic: "Waal, he al'us hez, hain't he?"

The Los Angeles bunch always have had the speed, haven't they?

* * * *

Jim Stewart, who usually penetrates to the "farthest north" at which harness racing is conducted, is occupying his customary winter quarters with the horses belonging to the Stewart family, master and madame, and to his principal patron, J. W. McClain of Monarch, Alberta. Homer Mac 2:06¾, whose numerous campaigns over the two-lap tracks of the western portion of the Dominion have gained for him the title of "Monarch of the Canadian Prairies," has spent the last several months in comparative idleness, his last engagements having been at the spring meeting at the exposition here in San Francisco, where he chiseled a piece of money from the purse every time he started. He is big and husky and as he came through in pretty good shape he will be fixed up for another whirl at the halfmile free-for-alls and the faster classes. This time last winter he was pacing right around the world's record time on the ice in eastern Canada, and no doubt he has appreciated the rest that he has had this season. Homer has a son in the McClain string that has the appearance of being a chip off the old block, the now four-year-old bay colt Garland Mac, out of Titus Maid by Titus, the youngster having worked at the pace at a three-year-old in 2:10, with halves in 1:01 and quarters in :29½. He is a good looking fellow and Stewart is confident that in him he has the making of a real pacer.

The bright particular star of the McClain portion of the stable, however, is the bay horse Patrick de Oro (3) 2:22¼, the first of the line of youngsters that has sprung from the matings of Copa de Oro and the bay mare Easter D. (2) 2:13½. Jim had this lad up in Canada in 1914 and won all his starts in the three-year-old events for pacers, taking a win race record as above given. At Edmonton it was the intention to start him for the Canadian record, which is somewhere along in the neighborhood of 2:14, or at least was at that time, but rain headed off the attempt. Unofficially, over the Edmonton track, he worked a long mile in 2:08¾, witnessed by a large number of horsemen who pronounced it the he worked a long mile in 2:08¼, witnessed by a by a colt of the age. Pat had some engagements at the exposition along with other members of the stable, but on the ship from Ottawa at the conclusion of the ice racing season he became a very sick horse and came very near hitting the long trail. Only the best of care and treatment brought him through, and when he did get to a point where he took much interest in his oats it was too late to get him ready for his races. Now, however, to look at him no one would ever know of the hard deal he had and he looks husky and hearty as can be. He is a much more rugged horse than Rayo de Oro, and Jim has no hesitation in stating that he will do to take into any kind of company whenever he is ready to race.

This tells the tale so far as the McClain horses are concerned, but while I am on the subject of the Copa de Oro—Easter D. dynasty I wish to arise to state that Easter D. is an exceptionally fine type of a ten-year-old matron. I had never seen her prior to this visit and she was not at the track at the time of my arrival, but Jim very kindly sent over to the Maben place and had her brought over for me to take a look at, the "look" being well worth waiting for. She is a good sized mare, bay, nicely turned and showing a great deal of breeding in her makeup. Her legs are clean and hard and she has plenty of heart and lung room as well as carrying capacity for a foal. She is a regular breeder and her line of Copa de Oro colts is unbroken by a single miss or death, while she is again in foal to the cover of the same son of Nutwood Wilkes. Stewart has sold three of her colts for good prices and has two left, a chestnut two-year-old that was given a yearling record of 2:22½ late in December and a mighty pleasing yearling filly, just being given her first lessons with the ground lines. Both of them are engaged in all the local stakes, of course, and are liable to prove troublesome to some folks when the futurities roll around.

Stewart has two other pacers in the stable that are his own property, one the bay gelding Humpa Hill by F. S. Turner out of a mare by California Dillon, that paced last year in 2:13 and was in the money in a few starts at Riverside and Santa Ana, and a three-year-old brown filly by Copa de Oro out of Elleen Dillon by California Dillon. This lass has no engagements and is hardly more than really well broken but can show standard speed for the long route, so she seems to be the making of a useful thing with a bit of age. Two nice trotters round out the string, the six-year-old gelding Guy Boy and a two-year-old black filly, not staked, by Carlokin 2:07½ and out of a Guy Dillon mare, grandam by McKinney and great grandam By By by Nutwood, which is a pretty sturdy line of breeding. She promises to live up to her pedigree, as while not a great deal has been done with her she went the route in 2:50 as a yearling. Guy Boy, who is the especial pride and property of Mrs. Stewart, is also by Guy Dillon and is out of Russie Russell, dam of Ruth Dillon 2:06½. He is good headed and attends strictly to business and has developed to a mile in 2:11¼, while also being in the money last fall at the two southern California fairs mentioned above.

* * * *

Fred Ward, who had one of the best seasons in his entire career in 1915, is taking things very easily at present and so are his horses, a bit of easy jogging and plenty of play time in good paddocks being about all that they are getting for the present. Last May, instead of coming to the spring meeting at the exposition as he had originally planned, Fred shipped out to the halfmile tracks in the western edge of the corn belt and raced back through the eastern states of the Rocky Mountain section, Colorado, Wyoming and New Mexico, his three good trotters running up their winnings to a figure very close to the nine thousand dollar mark. The star of the three is the brown gelding Great Northern 2:12¼ by Wayland W., out of Cecile M. 2:25½ by Robin, his share of the stable's winnings being a trifle in excess of $5,200, a remarkable record indeed when it is considered that he was racing all the time for very moderate sized purses. In all he started in twenty-three races, winning fifteen, being five times second, twice third and but once so far down in the summary as fourth. When I last saw this fellow in action, in 1914 at the Kings County Fair, I thought him one of the lightest going trotters that I had ever seen, and Fred tells me that he is even more of a "gum shoe" horse now, as he has lightened the weight on his front feet by several ounces. He is only a seven-year-old now, and from what I have seen of him and his way of going I expect Fred will still be racing him when he is well along toward twice this age.

Dr. Wayo 2:12¼, the Kansas bred trotter whom Fred has raced for the last five seasons, with winnings in that time amounting to over ten thousand dollars, came home in better shape than ever before, a fine example of a horse that has gotten sound while racing. He was never outside the money last season in fourteen starts, El Bel Maden being the only one of the three Fred started out with that failed to wind up the season with a clean score. She was three times unplaced out of a total of eighteen races, and at that came home with a brand new record of 2:17 and ran up almost as much money as did the redoubtable Doctor. In addition to racing his own horses Fred also did quite a bit of catch driving at various times throughout the season, being actively engaged in nearly eighty events, in only six of them finishing behind the money, and running up a total of winnings in excess of twelve thousand dollars.

In addition to the older campaigners, Ward also has a nice lot of young things to begin work on before long, including the four-year-old trotter Beirne by Beirne Holt, out of Emily W. 2:10 by James Madison, and a number of Dr. Wayo colts and fillies out of such mares as Emily W., Lady Madison and El Bel Maden. They all show natural trotting qualities and Fred will undoubtedly develop some race goers from them to take the places of the ones he now uses to bring home the winter oats when the days of usefulness of the latter have passed.

* * * *

H. W. Brown, who for a good many years was a resident of Salt Lake, removed the scene of his activities from that city to Los Angeles about three months ago, and one of first things he did on landing in the city of angels was to buy a half interest from C. C. Price in the five-year-old mare Miss Imbro by Imbro 2:10¼ and out of that old time race mare Miss Williams 2:09¼ by Williams 2:20½. Imbro has but few foals in California but this mare makes him appear a real son of Zombro as a sire, as last season she paced the local track in 2:12, with halves in 1:04¼ and eighths in fifteen seconds. Mr. Price also has at his home a couple more young things from Miss Williams, a bay mare called Miss Carlokin by Carlokin 2:07½ and a yearling colt by Copa de Oro 2:01. The Carlokin lass has quite a nice turn of speed and has a record of 2:20, taken at the pace during the closing days of December a year ago, she being one of the last performers of 1914 to "go in the book."

* * * *

Charles W. Winter, the enterprising Alhambra horseman and horseshoer who cut such a wide swath at the exposition horse show with that good show horse and trotter, Alhambra Prince (3) 2:27, cleaning up all the classes to which he was eligible, makes the daily trip in from his home to Exposition Park and is getting to be a "regular fellow" when it comes to training trotters. The Prince is a son of Redlac 2:07½ and out of the double producer Patti Mack (dam also of Alarich 2:09) by George W. McKinney 2:14½, grandam Alhambra Lily by Idler, and has had a letup from training for the past season or so. Last year he was bred to a few mares and will be allowed a few more this spring, though it is not Mr. Winter's intentions to let him do enough stud duty to interfere with his training. He has been brought along slowly and a few days ago was given an easy mile in the same notch as his record, and if he continues to come along and stands up well under the work he will probably join the Durfee stable later on in the season. Mr. Winter also has a three-year-old son of the Prince in training, out of Ezelda W. (sister to Bertha Frazier trial 2:08½) by Del Coronado 2:09½, well engaged in the local futurities. Originally he was a genuine pasture pacer but when put to work acted like he would trot and last season worked some very nice fractional parts of the route at that gait. Now, however, he has gone back to his old way of going and is taking all his exercise as a sidewheeler, and a rather promising one, at that.

Mr. Winter is also handling a couple of young things for Alex Grant, the Los Angeles contractor, both out of the producing mare Sona 2:16 (dam of Cima 2:22, a brand new one for the standard list) by McKinney, grandam Nelly K. (dam of four trotters including Era 2:10) by General Grant Jr. One is a three-year-old black filly, Juanita G. by Escobado 2:13¼, a trotter that worked quarters last season in her breaking in forty seconds, and the other is a

two-year-old colt known as Kinsman G., by Wilbur Lou (3) 2:10¼, whose get attracted so much attention this last season through the excellence of their performances. This is a sturdy bay youngster, just well broken, with a nice way of going and a frame that promises much future development in the way of size and individuality. Mr. Grant still owns Sona, who is at present in foal to the cover of Copa de Oro, and also has at home a yearling full sister to the Wilbur Lou colt.

* * * *

A. Cuthbert, whose winter tarrying place is Pasadena but whose real home is the Canadian city of Toronto, whiles away a good many of the pleasant winter days acting in the combined capacities of owner, trainer and groomster extraordinary to the good pacing mare Dolly Zombro, who has been a familiar figure in the matinees and show rings in the Pasadena neighborhood for the past few seasons. As her name would imply to the initiated, Dolly is a daughter of the dead Zombro, whose descendants continue to give such good accounts of themselves in the hottest kind of company, while her dam is Connie by Connor. She has a non winning performance record of 2:16½ made over the two-lap track at Riverside at the last fair there, and has traveled miles in 2:09 with quarters in :29½, so that she has a well developed turn of speed. Mr. Cuthbert, who usually makes the European trip in the summer time as guide and mentor to touring parties, found California much more to his liking last season than his customary haunts in war-ridden Europe would have been, and has derived a good deal of pleasure and much healthful exercise out of the ownership of Dolly Zombro. In the spring when the International stable ships east he plans to send her along and race over the halfmile tracks of eastern Canada, where she ought to do very nicely.

* * * *

J. H. Torrey of Long Beach has three head at the Los Angeles track that have all made considerable speed, a stallion, a mare, and a son of the pair, very much of a family circle. The boss of the bunch is the brown horse Baronteer Todd 2:09¼ by Todd 2:14¾, dam the great brood mare Bon Bon (dam of five) by Baron Wilkes 2:18, grandam Mary A. Whitney 2:28 (dam of five) by Volunteer 55, etc.—a nice line of breeding of which Baronteer Todd is a very worthy representative. He has already proven himself a speed sire and has shown an even greater flight of speed than that indicated by the record which he annexed at the breeders' meeting at Los Angeles last October. The female representative of a good family in the Torrey stable is the bay mare Bessie T. 2:22 by Zombro 2:11, dam the double producer Manilla by Shadeland Hero. Bessie, now eleven years of age, is a most attractive type of the standard bred trotter and her record is hardly a fair measure of her true speed, as she has a number of authentic trials to her credit of from 2:10 to 2:12. The third member of the string as intimated above, is a son of the stallion and mare just mentioned, a five-year-old brown horse called Joe Todd, bred by Mr. Torrey here in California. Individually he is very pleasing and has a fair turn of speed, though he has apparently not yet made up his mind whether to be a wiggler or a line trotter. He has a good way of going at both gaits, and has trotted in 2:28 and paced in 2:25. When he flattens he is going to be a useful horse, from present indications.

* * * *

Charles Chick, whose chuck doesn't lay good on his stomach unless he has a trotter or so somewhere around the place to masticate a little mash, imbibe a bit of "h-two-c" and require a certain amount of exercise, has a pair of four-year-old geldings in hand at present that keep his circulation in good shape and give him something to think about. One is by Kentucky Todd, and while Charley didn't have the lad's pedigree about his clothes at the time of my stop at his stable I ran across it in the register after my return. His dam is Bow Wow by Libertine 2:21, grandam Cactus Bloom by Belsire 2:18, great grandam Petrea by Belmont 64, fourth dam Petrel by Onward 2:25¼, fifth dam Cygnet by Harold 413, sixth Juliet by Pilot Jr. 12, etc., this certainly being far enough back to go to make good Chick's claim that his dam was sure a well bred mare. Ebe has not fully decided what gait suits him best and Charley has spent some hard work on him, the present indications being that he will eventually wake up and find himself a very fair kind of a pacer. The other one of the same age and color that keeps him company in the stable has no doubts to assail his mind, as he has his notions all set to become a trotter. He is a nice son of Bon McKinney (3) 2:24¼ and out of the dam of Belle Frazier, that trialed in 2:08½, so he has a strong speed inheritance from both sides of the house. He was brought along as a three-year-old to the point where he could show a thirty clip, and is a clean going, level headed young trotter. Bon Actor is the name that he gets his meal tickets under, and you can watch for the same name to appear in the summaries some of these days, well up toward the top.

* * * *

P. J. Brown, whose connection with the trotter dates away back to the time when he had Magna Charta 2:33½ and who later on in life brought out that good trotting mare of the late seventies and early eighties, Trinket 2:14, is not merely the patriarch of the Los Angeles colony but is one of the oldest men in the country actively connected with the harness horse. Mr. Brown is getting well along towards the sunset of life and physical misfortunes have left him weakened in health and bodily strength, but the old spirit is still there and his love for the trotter is as keen and true as it was away back in the days before most of us were born. Very much activity is for him an utter impossibility nowadays, but he has a nice two-year-old filly that he takes care of personally, and on good days does his own driving. She is a nice tempered thing and behaves herself like a little lady for her elderly mentor, who says she is as nice gaited a trotter as he ever sat behind. She is a nicely bred one, too, and Mr. Brown may stay with us long enough to see her at the races some day, as she is by Dr. Wayo 2:12¼, a good game race horse who is beginning to loom as a coming sire of speed, and her dam is Zombretta 2:15¼ (dam of Good Policy (2) 2:29¼) by Zombro 2:11, grandam Fortune by Dextator 25381.

* * * *

Wm. Nesmith, who with his family came to California from Missouri a few years ago and brought along a number of horses of the Clay Edwin line, now has fourteen head of trotters and pacers in all, a number of them at Exposition Park and the balance at their home. King Lilly Pointer, who is at the head of their band, was not at the track but from what I heard of him as an individual and from the turn of speed that he has shown I would consider him about the best son of Star Pointer in the west. Charley DeRyder bred him at Pleasanton and his dam is the Direct mare Lilly S. that trialed for Charley in the neighborhood of 2:16, grandam Lily Stanley 2:17½ (dam of three performers and three sires) by Whippleton, etc. This fellow has a breeder's record of 2:14, but has worked the Los Angeles track in 2:08½, with halves in 1:01¼, quarters in :29½ and eighths in :14. So far this horse had been bred to practically no outside mares, but the Nesmiths have raised several foals by him from their Clay matrons and now have six of the mares of this family due to foal to him within the next several weeks. I noticed a couple of very pleasing fillies from this cross now in the stable at the park, both pacers, one a three-year-old brown lassie that developed speed very close to the pacing standard limit as a two-year-old, while the other is a black girl, a year younger, that paced eighths in eighteen seconds when just past the thirteen months old stage. That this son of Star Pointer will also breed trotters is shown by a couple of two-year-old horse colts by him from Clay mares, both of whom are trotters with no inclinations, so far, toward pacing. They are nice sized, smoothly built and good colored.

Among the other aged horses to which Mr. Nesmith and his son are devoting their attention are a couple of husky geldings that look like they might do to take to the races later on, one of them a son of Imbro 2:10¼ out of Bedelia Clay by Clay Edwin, and the other by Clay Edwin out of a mare by Ayers' Hambletonian, this one a double gaited boy. The Imbro lad is a trotter and worked the Los Angeles track at that gait as a three-year-old in 2:30, with halves in 1:10, while Happy Clay has both trotted and paced, on the same day, in a flat 2:15. Last winter he was used as a saddle horse, merely as an evidence of his versatility, but he is taking his work now at the trot, and it is the intention to continue his development at that gait. Mr. Nesmith has another gelding at home that will be brought to the track in the near future and put in active training, an inbred Clay that has been halves in 1:05 and is a promising prospect.

Prior to Mr. Nesmith's experience with the members of the family of Clay Edwin he had never attempted to develop speed among harness horses, and the results obtained from the band he brought to California prove two things, that the Clay Edwins were endowed by nature with a pronounced trotting and pacing instinct and also that Mr. Nesmith is a pretty shifty amateur trainer. Every one of the Clays that he has handled has shown standard speed at one gait or the other, one of the very best ones being the mare Julia Clay, a trotter, now ten years of age and soon due to foal to the embrace of King Lilly Pointer. Three years ago she beat 2:10 for her trainer and every season since then has equaled or beaten the figures that define the limit of the "charmed circle," trotting in 2:08½ some time after being bred. Owing to the condition of his health, Mr. Nesmith has never been able to take advantage of the speed possessed by his horses by going to the races with them, but he has built himself up to a point now at which he thinks he will be able to stand a campaign, and plans to make a number of starts over the California tracks during the coming season.

* * *

One single story is hardly sufficient in which to do justice to all of the horses and trainers at Exposition Park, and as I have about as much more data in storage as was used to this point, I think it a good time to stop for the present, leaving another story of the Angelenos to follow in our issue of January 22. The horses in the stables of J. W. Cooper, Lou Baker, Charley Parker, N. G. Boyd, Henry Peterson, Railey Macey and Will Durfee remain unmentioned for the present, but next week will be given the attention that is due them. Until then let it be a case of "so long, Letty" for the above mentioned members of the Los Angeles colony, and don't forget the prophecy made in the first of this story—that the Southern California bunch will be there with the bells on when the time comes to race.—[N.]

———o———

Charley Atkinson, whose friends in California are legion and who made his last memorable campaign in select company in 1913 with the Del Coronado pacing filly Little Bernice, who forced William to pace to his three-year-old record of 2:05 at Peoria and later in the same season achieved a winrace record of 2:09¼ over the same course, will handle the stable of the well known Michigan horseman, T. W. Ready of Niles, during the coming season. Charley is already on the job and has some very nice things to work on, so the new combination should figure pretty extensively in the season's activities in the central west. His friends here join us in wishing both gentlemen the very best of success. In the meantime, Atkinson Junior remains in the old familiar place with the stable of W. G. Durfee of Los Angeles, where he is making good in a very satisfactory manner.

———o———

"THE LAST LEAF ON THE TREE."

Just about the time each year that Mr. Knight and his corps of able statisticians get the Year Book forms about ready to close, along comes the delegation from Los Angeles with a record meeting that tears a hole in the last page of the form, their valedictory address having been delivered this time on Tuesday, December 28 at Exposition Park. Mention of the same should have been made in these columns last week, save for the fact that the editor was out joy riding in Southern California his own self and did not get back to work until the paper had duly made its appearance. However, "mieux tarde que jamais," which, translated into the Milwaukee dialect of the language that the whole world will have to learn if the plans of Kaiser Bill do not miscarry, means practically the same as "besser spaet als nimmer," or words to that effect. Anyway, let it go at that.

The meeting, which was purely of the breeders' variety, was staged under the rules of the N. T. A., of which the Los Angeles Harness Horse Association is a member, was the means of adding four brand new performers to the standard list, while one three-year-old trotter made a material cut in the figures that followed his name as a two-year-old. James Stewart, Park Kelley, Harry Messmore and Will Durfee all performed as drivers for the occasion, while Secretary E. J. Delorey officiated as starter, with Dave Stewart, Thomas Goldsmith and W. R. Thomas looking to the enforcement of the rules, and Charley Nickerson, L. E. McLellan and Railey Macey catching the time. The story of the day is told in full by the following summary:

Los Angeles, Tuesday, December 28, 1915.

To beat 2:25¼ pacing:

Robert Bruce, ch c (1) by Copa de Oro 2:01—Easter D. (2) 2:13½ by Diablo 2:09¼..(Stewart) 2:22½

To beat 2:30¼ trotting:

Cima, b m (8) by Limonero 2:15¾—Sona 2:16 by McKinney 2:11¼ .....(Kelley) 2:22

To beat 2:30¼ trotting:

Manuelito, ch c (2) by Manrico (3) 2:07¼—My Irene S. (2) 2:28¾ by Petigru 2:10½.....(Durfee) 2:24½

To beat 2:30¼ trotting:

Stabe, b m (a) by Limonero 2:15¾—Thelma by Zolock 2:05¼ .....(Messmore) 2:25

To beat 2:19 trotting:

Carl, bl g (3) by Carlokin 2:07½—My Irene S. (2) 2:28¾ by Petigru 2:10½.....(Durfee) 2:14¼

Thad Stevens' Most Famous Race, 1873

Since the revival of thoroughbred racing here in California last summer by the gentlemen composing the Golden Gate Thoroughbred Breeders' Association and the more recent inauguration of the same brand of contests at the plant of the Lower California Jockey Club at Tia Juana, we have had a number of inquiries at this office for information concerning the famous four mile heat races contested in the seventies at local tracks in both of which Thad Stevens was the winner. Interest has centered especially in the race at the old Ocean House track in this city during the course of which True Blue suffered an accident that retired him from the contest, after he had won the second heat, and we have had so many inquiries that we reproduce herewith the story of the race. Thad Stevens, the winner, was a son of Langford, the first thoroughbred foaled on California soil, and Mary Chilton by imp. Glencoe, being foaled here in California in 1865; Joe Daniels, foaled in 1869, was by imp. Australian out of Dolly Carter by imp. Glencoe; True Blue, foaled in 1869, was a son of Lexington and Balloon by imp. Yorkshire, while Mamie Hall, foaled in California in 1866, was by Norfolk and out of Miama by Williamson's Belmont, the grandsire of Thad Stevens. The following story is from an account written at the time of the race, Nov. 15, 1973:

Never since the first introduction of horse-racing into this state have its residents been so excited over a race as they have been today over the great four-mile heat race. Nor can one wonder at the interest taken in it, for was not a California bred horse to contend against two of the very best horses from the East? One the son of the grandest four-mile horse that ever looked through a bridle (Lexington), and the other a son of imp. Australian, in whom was combined the best blood of the English turf. Added to the natural interest thereby engendered, the day was one of the most delightful of the season, and one peculiarly Californian. A mellow haze enveloped the surrounding hills, while a gentle breeze from off the Pacific toned the atmosphere to a refreshing temperature, added to which the music of the surf as it rolled in, nearly touching the western extremity of the track, made the scene one of almost inexpressible grandeur. By twelve o'clock the grand rush had fairly set in, and a dense column of horse, foot, and carriages streamed steadily over the hill and down the avenue leading to Ocean Park. Every available means of conveyance appeared to have been brought into service—from a four-in-hand drag to a rickety cart of the vegetable peddler. Thousands of persons came by the trains of the San Jose railroad and walked the intervening distance of a mile. Within the park the scene was fairly suggestive of the English Derby day. Hundreds of aristocratic establishments were crowded together, occupied by gay votaries of fashion, who discussed the probability of the approaching race with animation and the contents of their hampers with equal earnestness. The hackmen are charging $40 a load from the city, customers finding their own conveyance back. The great speculator offered the managers of the race $5,000 for the receipts of the gate, independent of the receipts of the stands and extras. The offer was refused. True Blue, Thad Stevens, Joe Daniels and Mamie Hall were moderately exercised this morning, and appeared to be in excellent condition. The friends and supporters of True Blue remarked from time to time that the horse was a little stiff about the knees and lacked the desired amount of lustre in his eyes—a statement that was invariably received with significant winks, nods, etc., by the keen adepts in matters pertaining to the turf. The true state of affairs was shrouded with a suspicious mystery that the race alone could explain to the uninitiated. The gossip of the stables failed to contain any point of interest other than the report that the owner of True Blue depended upon distancing Thad Stevens in the first heat, and failing in this he had serious doubts of winning the contest.

At 1 p. m. the grounds presented a dazzling scene of animation. The proportions of the ground had swollen with marvelous rapidity, and there was at least 10,000 people on the course. The main road leading thereto was hidden for a mile by a cloud of dust, and a continuous procession of buggies poured steadily down the hill to the east. The pool-selling was commenced at noon, and opened briskly at large figures in the two hours that intervened before the horses were called. A heavy sum was deposited in the banks for cashing pools, the sum of which was between $40,000 and $50,000. Thad Stevens was the favorite by greatly increased odds. A report industriously circulated that True Blue had exhibited symptoms of stiffness may have had some influence, but the confidence in the California favorite was still very strong. The ratio in pools between Thad Stevens and True Blue at that hour (1 p. m.) was nearly three to one. The following shows the average pools an hour before calling the horses:

Thad Stevens.....	$260	$275	$325	$300	$325
True Blue.....	165	152	165	165	155
Joe Daniels.....	105	100	90	80	75
Mamie Hall.....	10	9	8	5	5

A strong detachment of police under command of Captain Douglass maintained order in the vast assemblage, a portion of the men being mounted. In addition to the great crowd in the park, hundreds of gratuitous spectators took positions on the neighboring hills, where a view of the course could be obtained. At fifty-five minutes past 1 p. m. the alarm of fire was sounded by a series of yells proceeding from the grand stand adjoining the eastern end of the refreshment saloon near the course, and soon the smoke rolled up in dense volumes. A scene of intense excitement ensued, the crowd shouted lustily, the shrill whistles of the police increased the nervousness of susceptible persons, and for a few moments a terrible catastrophe was imminent. A few cool men, however, wrested the burning planks from the building and stamped on the fire, and the event soon passed from the mind as scarcely worthy of notice on an occasion so prolific of interest. The fire originated in the cook-house of the saloon. The damage was trifling. At half past 1 p. m. at a moderate estimate there was upwards of 12,000 people in the park and immediate vicinity, and the enormous seating accommodations were almost entirely occupied at an extra charge, while thousands occupied the vehicles in the field.

First Heat.—Promptly at the call Thad Stevens, Joe Daniels, True Blue and Mamie Hall went to the post. At the signal Mamie Hall jumped off with the lead and held on for the first mile, with Thad Stevens running second, True Blue third, and Joe Daniels fourth. In the second mile True Blue took the lead and held it to the fourth mile, when Joe Daniels, who had been trailing, made play for the lead, and after a fine brush with True Blue, took it, winning the heat by two lengths in 7:45, True Blue second, Thad Stevens third, and Mamie Hall last. The unexpected turn of the first heat produced an excitement that could only find vent at the pools, and consequently the sales sprang to a high figure. Pending the disposition of the second heat, the friends of Thad Stevens rallied promptly to his support and freely backed their opinion of his speed and endurance with coin, the impression prevailing that the rider of Thad held him in during the entire heat and simply strove not to be distanced. The horse was in fine condition when he left the track, and was applauded as vigorously as though the winner of the race. In one of the first pools sold Thad Stevens was taken as first choice for $2,100, Joe Daniels bringing $1,500, True Blue $800, Mamie Hall having been withdrawn, she being badly blown. The pools continued large, and heavy sums of money found their way into the box, they averaging from $1,500 to $3,000.

Second Heat.—The horses were called for the second heat at a quarter to four, and the preliminary rubbing down and saddling having been accomplished, at five minutes to four another excellent start was made, the three horses passing the score even. Before reaching the half-mile Thad had pulled out ahead three lengths, True Blue following, and at the end of the first mile Thad crossed the score three lengths ahead, True Blue second, and Daniels lagging five lengths. On the second mile the relative positions of the horses were about the same, Thad gaining a few yards, if anything. On the third mile all of the horses crossed the score in close company, Thad a neck ahead of True Blue, with Daniels lapping on the flank. On the fourth mile Thad and True Blue began a neck-and-neck struggle, with Joe Daniels close up. In the last half True Blue shoved ahead and opened up a gap of five lengths, which he held in crossing the score, Thad Stevens being seven lengths behind Joe Daniels. Time, 8:08.

Pool-selling was again resumed, and a number of heavy pools sold, in all of which True Blue was the choice, with the second choice alternating between Thad Stevens and Joe Daniels, True Blue selling at about four to three for the others.

Third Heat.—The horses were called for the third heat at about half-past 4, and got off in good style at twenty-five minutes to 5. Thad took the lead again and pulled out handsomely a couple of lengths before reaching the first quarter, with True Blue second. Thad held his own through the first mile and crossed the score two lengths ahead, True Blue and Daniels running neck-and-neck. The second mile was a close run between the three. They crossed the score in almost precisely the same order as in the first mile. The third mile was a repetition of the first and second. They crossed the score as follows: Thad Stevens leading, Joe Daniels lapping him, and True Blue a close third. At the first quarter of the fourth mile True Blue quit and fell behind, and was speedily lost in the distance. Thad Stevens pulled out at his best, and parting company with Daniels, crossed the score nearly ten lengths ahead in 7:57, with True Blue distanced. The excitement was tremendous at this result. Deafening cheers ascended, and the air was filled with flying hats, as the race was now between Thad Stevens and Joe Daniels, and consequently looked upon as a sure thing for the California horse. But amid the joy intelligence was received from up the track that True Blue had broken his leg and was a ruined horse. He was lying disabled on the track, about midway between the first quarter and the half-mile pole. The noble animal was removed from the track and the course cleared for the final heat, with Thad Stevens the favorite at 100 to 20 over Joe Daniels.

Fourth Heat.—It was almost dark when the horses got the word for the fourth and deciding heat. They made a capital start, Thad Stevens at once taking the lead, and as they disappeared in the gloom the old horse was leading by fully five lengths, an advantage he held all through the heat, Joe never once being able to overtake him, the result being that Thad won the heat and race in 7:46, which is remarkable time, considering the distance he had run.

The best of order prevailed and the city is jubilant over California's triumph. It is not unlikely that Thad Stevens will be sent East during the coming season to contend with the "cracks" of Kentucky and New York in their own strongholds. Mr. Chamberlain, the owner of True Blue, says he believes the horse permanently disabled as a racer by the accident. Various conjectures have been made as to the manner in which the accident occurred, but no one knows certainly. It is generally believed the horse must have got his foot into a hole made by a gopher. True Blue was at his stable next day, very stiff and lame.

The winner, Thad Stevens, who has so suddenly become historical as the best four-mile-heat horse in America, was bred in California in the year 1865, consequently he is now eight years old. He is by Langford, out of Mary Chilton, she by imported Glencoe, out of an American Eclipse mare; grandam Queen Mary by Bertrand. Consequently, he is, on his dam's side of the same family as Longfellow, Lyttleton, Extra, Fadladeen, Allie Hunt, Woodpecker, etc. He is described as a chestnut sorrel with one white hind foot, and stands about fifteen two or three high. As a runner he first appeared on the California turf in 1870, with but little success. In 1871 he won several races of one-mile and two-mile heats. In 1872 he began on New Year's day by being beaten in a race of mile heats three in five, by Pillbox, after winning the first heat in 1:54½, and making the fourth a dead heat in the same time, he running second in each of the others. On the 31st of January he turned the tables on Pillbox in a similar race, winning the third, fourth and fifth heats in 1:50¼, 1:51½ and 1:49¾. On the 8th of June, over the Oakland track (the others having been run over the Agricultural Park track), he was beaten by Irene Harding in three straight heats, in 1:48¾, 1:48 and 1:47¾; but on the 22d he defeated her, winning the first, third and fourth heats in 1:51½, 1:47¾ and 1:49, Irene winning the second heat in 1:45¾. On September 24, over the Union Park course, Sacramento, in a race of two-mile heats, he won the third and fourth heats in 3:41¼ and 3:45¼, beating Nettie Brown, Irene Harding, Alice May and Modesto, Nettie Brown winning the first heat in 3:40¼. At one time it was contemplated to enter him for the $20,000 purse race to have taken place at New Orleans, La., last spring; but the Louisiana Jockey Club withdrawing the purse, all idea of sending him east was given up. He has run several good races this year, but none better than his race of mile heats at Sacramento on the 5th of July, when he won the third, fourth and fifth heats in 1:43½, 1:46½ and 1:45, Thornhill winning the first two heats in 1:43 and 1:43, Nell Flaherty running second and third in all the heats. His last grand performance previous to the 15th was his race of four-mile heats on the 18th of October, when he beat Joe Daniels, Ballot Box, Irene Harding, Target and Kate Gift, Thad winning the second and third heats in 7:30 and 7:43, Joe Daniels winning the first heat in 7:42½, the time for the second being the best for a second heat on record.

A SMALL BOOK WITH A BIG PURPOSE.

During the editor's recent absence in Southern California there arrived on his deck a nicely printed little booklet entitled "Statement of Fact and Scientific Truth," from the pen of Louis Petersen, the well known farrier of Santa Ana, who has devoted to the welfare of the horse's foot the thought and study of a lifetime. When a man starts in to do anything we always like to see him lay out a good task for himself, and in going at the work of preparing his latest booklet, Mr. Petersen has certainly "matched himself" against three mighty adversaries, it being written, in his own language, "with the object to prevent lame horses, divorces and wars." Being, perforce of circumstances, a bachelor and, by natural inclinations, devoid of the martial inclinations that have added so much glory and renown to the name of our friend and fellow turf writer, Joseph I. Markey, we are not in a position to speak with authority concerning those portions devoted to the prevention of divorce and war, but there is much written concerning the lameness in horses that appeals to us as sound matter concerning a very practical, everyday sort of a subject in which very many people are vitally interested, be they single or married, warlike or peaceful. The booklet is put together in plain, forceful, understandable language, and the time spent in its reading will not prove devoid of either interest or enlightenment. It may be obtained from Mr. Petersen by mail at a very moderate cost and we recommend it to your consideration.

Remember, the Breeders' Futurity closes Feb. first.

NOTES and NEWS

Cima 2:22.
Stabe 2:25.
Manuelito (2) 2:24½.
Robert Bruce (1) 2:22½.
Are all newcomers to the standard list.
It happened at Los Angeles on December 28.

◈◈◈

While Carl reduced his record to 2:14¼ at the same time.

◈◈◈

And down at Hanford last Sunday at a matinee the boys raced halfmile heats as fast as 1:08.

◈◈◈

Not really so worse even for California at this season of the year.

◈◈◈

Having contributed the first two-ten trotter for the season of 1915 and also the last standard performers, our horsemen can now settle down for the work of getting ready for 1916, remembering that this little record of their achievements in 1915 must be lived up to or surpassed during the present year:

◈◈◈

World's champion yearling trotting filly—Anselila 2:17½.
World's champion yearling trotting gelding—Anselot 2:28½.
World's champion yearling trotting filly, halfmile track, Verbena Ansel 2:26.
World's champion three-year-old pacing gelding—Rayo de Oro 2:07¼.
Season's fastest four-year-old racing pacing gelding—John Malcolm 2:09½.
Season's fastest two-year-old pacing filly—Verna McKinney 2:13.
Season's fastest two-year-old pacing colt—Rico 2:12¼.
Season's fastest new trotting gelding—Spriggan 2:08¼.
Season's fastest four-year-old trotting gelding—Bon Courage 2:08½.
Season's fastest four-year-old racing trotting gelding—Future Tramp 2:09¼.
Season's four-year-old racing trotting filly—Miss Perfection 2:08¼.

◈◈◈

It is rather a generous order, folks, but what man has done, man can do again, so go up against the bit in earnest.

◈◈◈

Robert Bruce (1) 2:22½, who appears in the list at the head of the column, is a full brother to Rayo de Oro (3) 2:07¼.

◈◈◈

While Manuelito (2) 2:24½ is another one to add to Will Durfee's evidence in support of his idea that My Irene S. (2) 2:28¾, now twelve years of age and the dam of eight living foals, five of which are standard performers, is one of the most wonderful young matrons in the land.

◈◈◈

Robert Smith, father of "our Bob," who died December 30 at his home in Philadelphia at the age of eighty-two, was a lifelong friend of the trotter, explaining the source from which the love of the horse evidenced by Robert Junior had its inception. In the course of a long and useful life he had owned a number of horses of more or less note, including Genevieve 2:13¼, an excellent trotter of the nineties, and was for years a member of the Belmont Park and Point Breeze driving clubs.

◈◈◈

Walter Maben, one of the most successful colt trainers in the west, is taking things easy this winter at his home in Los Angeles, and for once in his life is "afoot," so far as having anything to train is concerned. Let things begin to pick up a little, however, and Walter will be found in the training cart as of old, as he is merely resting while waiting to see just what is going to develop in the future. One of his last and most successful tasks was the giving of first lessons in trotting to the filly Anselila, who gave such eloquent testimony to the excellence of her early training by trotting to the world's record for yearling fillies. Walter has all the appearance of a steed to whom the letup has been highly beneficial, and finds the leisure time very enjoyable after the former strenuous seasons that he has been through.

◈◈◈

Charley DeRyder is among the numerous members of the trotting horse fraternity who have been taking in the running meeting at Tia Juana, the big boss of the Pleasanton Driving Park even sporting an entry in a number of the races, though to this time the bird's name has failed to appear with the brackets. Up at Pleasanton she was known simply as "Ryan's filly," George usually being her pilot in her many miles traveled as a prompter to the various members of the MacKenzie stable, but down at Tia Juana she broke into print under the appellation of Right Smart. There is a rumor that she got a right smart play at one of her first starts, but it was a bum steer. Incidentally, Mr. and Mrs. DeRyder have been having the first real vacation that has come their way in many a long month, and are getting some genuine pleasure from it.

W. F. Whittier is spending several days in the Hemet Valley, looking after his varied interests there and incidentally taking advantage of the occasion to put in as much time as possible at Hemet Stock Farm, watching the Wilbur Lou youngsters take their kindergarten lessons.

◈◈◈

Articles of incorporation of the Palo Alto Stock Farms were filed with Secretary of State Jordan Wednesday. Herbert Fleishhacker, president of the Anglo-California Bank of San Francisco; Edgar Sinsheimer, C. F. Hunt and J. C. McKinstry, all of San Francisco, and Myron H. Tichenor of Palo Alto, are the promoters of the company, which has leased a large acreage of the famous old Palo Alto establishment of Governor Stanford to be used as a stock and dairy farm.

◈◈◈

Clarence J. Berry tore himself away from his accustomed haunts in this city last week long enough to make a short trip to Los Angeles, where his futurity prospects and Grand Circuit candidates are wintering in the care of Will Durfee. The editor of this paper left the city of all the angels on the same day that C. J. landed there, but was with him long enough to hear his most gracefully and positively decline a bona fide offer of ten thousand dollars for Virginia Barnette. Here is the situation in a nutshell: The genial Alaskan knows several places where he can make ten thousand dollars in a reasonable length of time but does not know just where or how he could get another Virginia. All things are very simple if you understand them. He came back home early in the week very well pleased with the way all the horses are wintering, and enthusiastic over the outlook for an enjoyable season in 1916.

◈◈◈

T. W. Stiles of New Haven, Conn., who has a winter home in Southern California, arrived there several days ago and has been among the frequent visitors to the horsemen's colony at Exposition Park. On the occasion of his last visit, Mr. Stiles, who is a partner in the racing stable handled by Ed Gillies under the name of the Clay-Cotton Stable, purchased from W. G. Durfee and Gen. C. C. Watts the trotting filly Josephine Watts (3) 2:09½ by Gen. Watts (3) 2:06¾, shipping her direct to his stable in Connecticut. Last season she was raced over the eastern halfmile tracks, and while hardly at herself early in the year rounded into nice shape later and made a very good showing. At the Chicago sale Mr. Stiles acquired the former Durfee trotter Sargo 2:07½ and will use him over the eastern two-lappers this year, while it is not improbable that he will make another purchase or so locally before going east in the spring.

◈◈◈

Samuel J. Fleming of Terre Haute, Indiana, for many, many years one of the most widely known and successful trotting horse breeders and campaigners in this country, died quite recently at his home, well along in years. Mr. Fleming and his son, Dr. Charles I. Fleming, conducted the family breeding operations in partnership, though the elder member did the greater part of the training and practically all of the campaigning. Their Indiana farm was long the home of the good trotter and speed sire, Margrave 2:15½ and his full brother Baron Review 2:21¼, both progenitors of extreme trotting speed, the latter horse still being owned at the Fleming establishment. "Sam" Fleming, as he was known to horsemen of all ages and conditions, was a familiar figure on both the major and minor tracks of the central west and east, and rarely went to the races that he did not have something worth while, one of the most memorable of his campaigns in the last several years being the one made with the black pacer John M., who won sixteen straight races in the season of 1903, never losing a start, and eventually raced to a record of 2:02¾. Many other famous horses have been bred, developed and raced to fast records by Mr. Fleming in the long time that he has been identified with the harness horse industry, and his place in the ranks of Indiana breeders will be a hard one to fill.

◈◈◈

A. B. Spooner of San Luis Obispo, who with his sons owns and operates some eight thousand acres of ranch land along the coast near that city, including the choicest portion of the old Pecho grant, was among the recent welcome visitors to this office. While harness hore breeding is practically at a standstill in his community, Mr. Spooner still raises a few and has at present a very promising two-year-old filly that is just being broken, a full sister to the pacer Bay Jeff that trialed at Los Angeles a few seasons ago in 2:01½, her sire and dam, Morris A. and San Luis Belle, as well as a couple of aged sisters never trained for speed, also being owned at the same establishment. Morris A., who is the sire of the fast pacer Choro Prince 2:08¾, gets very few trotting mares at his court, but is siring some most useful general purpose animals from the ordinary run of mares, the Spooners finding them especially useful for riding purposes over their ranges. Quite a dairy herd is maintained at the ranch in addition to the range cattle, and grain farming is conducted on a pretty fair scale, so the father and the boys manage to keep fairly busy. Mr. Spooner really had very little reason for the last trip to San Francisco, coming up merely to charter a steamer to make the trip to their private landing and take on some four thousand sacks of barley (you read it right, four thousand sacks) **produced on the ranch this year.** How annoying! Yes?

MID-WINTER MATINEE AT HANFORD.

Hanford, Cal., Jan. 10, 1916.

A card of three harness events and a running race made up the program of the second matinee given by local horsemen at the Kings County Fair Grounds yesterday. Unfavorable weather conditions prevailed; some rain fell during the afternoon but did not dampen the enthusiasm of the crowd of some two hundred people that were in attendance. Each event was well contested and exciting finishes were quite frequent. Firebaugh, a Fresno horse, won the free-for-all pace from Julius Caesar with Allie Glen a close third. The two-thirty trot went to the magnificent son of Best Policy, King Policy, whose faultless gait has caught the eye of our railbirds. The two-year-old pace produced a pretty good race, the first heat seeing a nose-to-nose finish between Queen Mona and Ira Basler. The veteran trainer and driver, Mr. Jake Broiller, took the mount behind Ira Basler in the second heat and led to a hundred yards of the wire. Queen Mona won the heat and race in an exciting finish. The halfmile dash was won by Pearl from Johnnie White by a head. The summaries:

Free-for-all pace (halfmile heats):

Firebaugh	(Burks)	1	1
Julius Caesar	(Smith)	2	2
Allie Glen	(Lavine)	3	3

Time—1:12, 1:08.

2:30 trot:

King Policy	(Legett)	1	1
Zip McKinney	(Burks)	2	2
Mountaineer	(Senter)	3	4
Dexter W.	(Lavine)	4	3

Time—1:15, 1:15.

Two-year-old pace:

Queen Mona	(Owens)	1	1
Ira Basler	(Perry-Broiller)	2	2
Stone Direct	(Gallup)	3	3
Mollie 2nd	(Legett)	4	4

Time—1:14½, 1:13¾.

THAT DURFEE "CHAIN GANG."

"Boss," said Little Henry Atkinson to Deputy Sheriff Willie Durfee one day last week at Los Angeles, "that sod has got to come off the terrace at the flower beds so we can sow some seed and get a stand of real grass. How about it?"

"Sure," said D. S. W. D., just like that, "good idea whenever we can get the help." Then he leaned back in his office chair at the track at Exposition Park and as his thumbs sought a comfortable hanging place in the armholes of his vest his left fingers accidentally brushed the nice little badge that Los Angeles county says he can wear so long as the present officials stay in office. "This thing might just as well be useful as so darned ornamental," mused D. S. W. D., just like that, and he called to Henry to rustle the proper tools while he himself rustled some men to wield them, which to a man in his official capacity ought to be a fairly simple matter.

It was simple, too, when he really got down to work.

The first culprit he impressed was the well known International speed impresario, Railey W. Macey, who was sent to the chain gang on an indefinite sentence charged with having filched the 1915 coast record for a public performance with Power Patch as his accessory away back in October, the said D. S. W. D. being no respecter of the statute of limitations, at least not when the flower bed needed men to work on it.

Frederick Ward, having the misfortune to round into view about this time, was made the second victim of the pressing needs of the posey patch, charged with conspiracy to win all the slow trots in the short grass circuit last season with the trotter Great Northern, the complaint being lodged at the instigation of a number of horsemen from the other side of the mountains.

Just as he had gotten Ward in tow, there came a wireless from Barney Barnes in Winnipeg accusing Watt Cleveland of using one-workout-steel last winter on Strathtell when Barney had especially specified that metal be used that would stand off the pony pacer for at least two weeks, so that luckless farrier was also added to the bunch. Henry was being hard-put to find tools enough to supply all the victims of the Durfee activities by this time, but had to rustle one more rake for the use of Ike Lipson of Tulare, who had violated all the accepted rules and regulations for the conduct of both native sons and professional Californians by absenting himself from our glorious clime for over three consecutive weeks, owing to his trip to the Chicago sale and then on to New York city. Ike begged hard and pleaded that he had already been sufficiently punished, but the will of D. S. W. D. was adamant and Isaac went to it with the bunch.

Then Little Henry got his. By some sad error he had rounded up one extra tool and Durfee, recalling the fact that on that very morning the said Henry had refunded thirty dollars of expense money out of two hundred with which he had been furnished six weeks or more ago, very promptly made him go to it with the other criminals, any stable manager that cannot get away with thirty bucks in twice as many days laying himself wide open to suspicion on general grounds.

Then the camera man flock shot the bunch, including the said D. S. W. D., who will be readily recognized by his badge of authority and his air of indolent ease. Why worry or work when you can get a good gang like this to do the sweating?

Truly, this thing of being a deputy sheriff has its convenient features—in Los Angeles county. In the mountains of Kentucky it's a different matter.

ROD, GUN AND KENNEL

CONDUCTED BY FISHER HUNT

TRAPSHOOTING BOOMING ON COAST.

Soon the season for live game hunting will be over and the lovers of the gun will divert their attention to trapshooting, appropriately termed "The Sport Alluring." On about the middle of next month the various clubs along the Pacific Coast will commence to schedule events and the fun will run continuously until late in November.

In the history of sports it is doubtful if any pastime has made greater progress in recent years than has trapshooting. This is especially true on the Pacific Coast. Not so many years back there were only a few clubs scattered here and there while today there are 250 recognized organizations in California, Oregon, Washington, Nevada and Arizona. The explanation is that it is an outdoor sport that has proved fascinating to women and children as well as men. The growing interest of the fair sex has exerted an influence that is bound to make the sport prosper and flourish. Men from all walks of life have become interested and it is this democratic condition that has made the appeal.

Steel nerves, quick and unerring judgment and unfaltering action are required by your skilled trapshooter. Science to an extreme degree is needed for high scores. The public at large will eventually appreciate trapshooting and thus establish it with the leading sports of America. The recreation is not limited to this country by any means. Fact is, it has given competition to the racing game in recent years as "The Sport of Kings." Practically all the crowned heads of Europe are devotees of the traps.

We, however, do not intend to go into a history of trapshooting for it is too firmly established and known for that purpose. What we are pointing out is the growth of the pastime on the Pacific Coast. There is none better qualified to tell of this than Clarence A. Haight. Billy Price and others of the pioneer guard of trapshooters refer to him as the "Father of the Sport in the Far West." In matter of actual experience and work in behalf of the fascinating game they cannot be far wrong for it was back in the Eighties when he was banging away at clay pigeons and enjoying his young self.

"I regret to say that there are few if any of the boys active at present who used to make up the parties at the traps of the old Lincoln Gun Club," says Mr. Haight. "That was back in 1888 when the club's grounds were down at Colma. In those days we used a common brick-colored clay pigeon. Still we used to have the same old recreation and enjoyed the sport. Shortly afterwards the club moved to Alameda, where events were held practically every week in the year until 1901.

Giant strides have been made in the improvement of trapshooting. In the first place, it has grown to wonderful proportions and more interest is attached to it. The equipment has been made modern. The blue rocks put in an appearance and all down the line improvements have been coming steadily. I have confidence that the coming year will keep pace with those just gone. The sport is bound to take hold and I look to the day when it will class with baseball as the national pastime."

Clarence A. Haight follows this up with a bit of news that will be received with pleasure by Coast shots. It is to the effect that the Interstate Trapshooting Association has decided to reconsider the action at its recent meeting in not alloting a Pacific Coast handicap tournament. The Portland Gun Club has filed application to hold the fixture, some time in August, and in all likelihood it will be granted. This is considered just inasmuch as the Coast classic was staged at San Diego, Cal., in the southern part of the territory, last season. A movement is already on foot to programme a banner array of events to attract all of the crack shots from the Coast points.

In the next couple of weeks the gun clubs will commence work for staging an auspicious opening. Among the many big organizations that will get under way are the Golden Gate, and Bay View clubs of Alameda; San Jose and Garden City clubs of San Jose; Vallejo Gun Club; Moraga Club of Contra county; Big Time Club of Sacramento; Stockton Club, Fresno Club; Alhambra Club of Martinez; Alturas Club, Venice Club, San Diego Club, Vernon Club, Family Club of Menlo Park, San Bernardino Club, Long Beach Club, Hollister Club and a hundred others in different parts along the Coast.

Prospects are for a big season in 1916. While Hugh O Poston was in Sacramento during the week he gave evidence of his faith in the sport by the following interview in the Sacramento Union:

"California is to see a remarkable increase of trapshooting this season, according to Hugh E. Poston of the Hercules Powder Company, who was at the Sacramento hotel yesterday. He bases his prediction on the inquiries being received from the scatter gun men the state over.

"Poston's explanation of the increasing interest in trap work is that game is getting so scarce it is harder and more expensive each year to secure any decent shooting.

"Throughout the United States there has been a remarkable increase during the last few years in those addicted to the clay pigeon game, but the trap enthusiasm has not progressed as rapidly in this State as elsewhere, due to the abundant game supply of the past."

OLDEST GUN CLUB IN UNITED STATES IS LOCATED IN SAN FRANCISCO.

San Francisco claims the honor of possessing one of the oldest gun clubs in the United States, if not in the world. It is the California Wing Shooting Club. Back in 1873 it was organized and has existed ever since. At present its membership consists of thirty-five, who are active throughout the season. The California Wing Shooting Club's grounds have been located at Sobrante on the Bay Shore but a new spot will be secured inside the next couple of months. The club has brought out a number of fine shots, some of whom have shown their skill in England, France, Belgium, Italy, Monte Carlo and other European countries.

INTEREST IN RIFLE SHOOTING.

Washington, D. C.—At the present time there is an unprecedented revival on throughout the country in rifle shooting, brought about by the enactment of a law by Congress last year authorizing the free issue of rifles and ammunition to rifle clubs organized by civilians. Under this act ten citizens in any locality can organize themselves into a government rifle club and adopt by-laws approved by the Secretary of War. The club then affiliates with the National Rifle Association of America and there is issued by the War Department one new Krag rifle for every five members of the club and 120 rounds of ammunition to each member annually for use on the rifle range. The work of organizing the clubs, looking after them, issuing decorations and medals, and classifying their work, was put in the hands of the National Rifle Association of America, and this organization, which for forty-two years has been working to make rifle shooting a popular sport in this country, has suddenly sprung into prominence through its co-operation with the government by the organization of these clubs. Within the last year the association reports that it has completed the organization of over 400 clubs, not only in the United States proper, but in Porto Rico, Canal Zone, Alaska and Hawaii. Over 1,500,000 rounds of ammunition have been issued to these clubs during the year, and about 3,000 rifles. The possibilities of this movement are unlimited and depend only upon the securing of range facilities where such clubs can carry on their work. With this object in view, Congress will be asked at this session to provide for a commission to investigate the entire subject of range construction from a national defense standpoint, survey the entire country and recommend a permanent national policy of range construction and localities where such ranges should be constructed. In addition the National Rifle Association will ask for a national charter and an annual appropriation of $25,000 from Congress to assist it in carrying on the work as it should be done. Although the association has a perfect organization, with secretaries and branches in every state, there is no way in which it can reimburse these secretaries for their traveling expenses and time, and it is hardly to be expected that these men, who are active and prominent in business, should devote their time and money to this work without reimbursement.—American Field.

FIELD TRIALS FOR TACOMA.

At a meeting of the Washington Field Trial Club at Tacoma, Wash., it was decided to hold the first annual trials of the club on February 21 and 22. The club has been endeavoring to secure the privilege of running its trials on certain grounds about twenty-five miles from Tacoma, where is located the best trials ground in the Northwest, but has been unable so far to complete the desired arrangements, although it is satisfied that all arrangements will be completed for use in the fall of 1916, in which case the trials will be held about September 15. The grounds there will be about five by eight miles in extent, practically a level field, with good footing and with quantities of birds of several varieties. All the trials will be run on mixed game birds.

The club is running a Membership and open Derby and open All-Age stakes. No one barred in the open stakes. Entry fees, $3 to enter and $2 starting fees, sixty per cent of entry fees in each class to be divided as prize money.

Entry blanks for the coming trials may be had from F. E. King, secretary, P. O. Box 63, Tacoma, Wash.

The officers of the new club are: President, Elliott Kelly; vice-president, A. H. Nelson; secretary-treasurer, F. E. King; board of trustees, J. A. Balmer, W. W. Kurtz, D. G. Macdonell, Al Weiseman, Elliott Kelly, A. H. Nelson and F. E. King.

LOCAL DOGS FOR NEW YORK SHOW.

Quite a few California kennels will be represented at the Westminster show which opens in New York City on February 20th. Walter Stettheimer of the Tallac Fox Terrier Kennels; John M. Williams who had the imported airedale Crofton Chum, winner of 100 ribbons in England, on exhibition at the exposition; O. F. Vedder, Pacific Coast representative of the American Kennel Club, and John Bradshaw with Country Model, judged best dog at the exposition show, are among those who have declared their intentions of making the trip. Mrs. Anita Baldwin is also considering the possibility of taking back some bull dogs, airedales and Russian wolfhounds from her Anoakia Kennels in the southern part of the State. Mrs. Baldwin is importing six airedale terriers from England for breeding purposes.

‡ ‡ ‡

In all probability the Golden Gate Kennel Club of San Francisco will stage its annual show in April. An invitation has been extended to Walter H. Reeves of London, England, to judge all breeds. Mr. Reeves is manager of the famous Victor Fox Terrier Kennels of Great Barrington, Ill. There promises to be an extensive local kennel circuit this season to be made up of shows promoted by the Golden Gate, San Mateo, San Jose, Oakland and Marin clubs.

‡ ‡ ‡

The Pacific Cocker Spaniel Club held a well attended meeting on December 28, 1915, and elected the following officers for the coming year: W. H. Dennis, president; F. N. Burns, vice-president; J. C. Rutten, secretary-treasurer; Miss L. Hering, trustee; Mrs. F. M. Scheik, trustee. The election for judges will take place at the January meeting.

‡ ‡ ‡

H. M. Robertson of Pasadena, a well-known Southern handler, will bring a large string of dogs for the Golden Gate show.

‡ ‡ ‡

Champion Khartoum, a once famous bull dog, died this week at the home of his owner, Mrs. Agnes Fenwick, 2376 Jackson street. Khartoum was bred by Mrs. Penfold Field of London. He was imported several years ago, and after defeating many famous champions at the Philadelphia show he was sold to Mrs. Hamilton of New York for $2000, then a record price for a bull dog.

‡ ‡ ‡

Mrs. Anna Elliott, owner of the crack little Maltese terrier, Sir Francis Drake, intends to show him at all the coming local shows. Drake recently won the required number of points to entitle him to his championship.

‡ ‡ ‡

Mayor Rolph has added to his Mission kennels a brace of English harriers and a foxhound. The Mayor intends to send them to the country to get them in condition so trat they will be in trim when the time comes to use them for hunting.

‡ ‡ ‡

"Pat" Moran, manager of the Phillies, has bought an airedale puppy. The youngster will be called "Alex," in honor of the Quaker's star pitcher. Alex will be the mascot of the team next year.

‡ ‡ ‡

Mr. Nat McConnell, Vancouver, B. C., reports a splendid litter of nine pups, four dogs, whelped September 14th. They are sired by Mr. McConnell's crack dog, Bachelors Boy and out of Kilarney Pandora, the dam of Ch. Killarney Marion.

JOHN X. DeWITT LAID TO REST.

John X. DeWitt, for many years in charge of the rod and gun department on the Breeder and Sportsman, was laid to final rest on January 7, interment being at Mount Olivet Cemetery. The funeral services were held under the auspices of California Parlor No. 1, Native Sons of the Golden West, of which the deceased was a member.

A large delegation, including many anglers and huntsmen, was in attendance. Phil Bekeart spoke feelingly of his old departed friend. "Never in all my experience have I ever met a man with a kinder and sweeter nature than Jack DeWitt," he said. "Not once did I ever hear him speak an unkind word of a brother, and he was always ready to grasp a friend by the hand.

"There are many in this gathering who held the friendship of Jack DeWitt dearly. I see some of his boon companions back in the eighties, when he was a member of the Olympic Club. Others met him by the stream and brook. There are many of us who will miss Jack DeWitt in the days to come."

Turning to the casket with eyes dimmed by tears, Bekeart continued: "Jack, I wish with all my heart that you will find in the place where I know you are going a large, green meadow and that you will have your favirite rod in your hand, so that pleasure and comfort will be yours."

It was a beautiful speech filled with deep feeling and expressed the sentiment of all of the late John X. DeWitt's many friends.

Secretary E. Reed Shaner of the Interstate Association announces that the following committee has been named to allot handicaps to entrants in the coming Grand American Handicap: Jas. W. Bell, chairman, St. Louis, Mo.; Ray E. Loring, Marseilles, Ills.; Geo. K. Mackie, Lawrence, Kans.; Guy V. Dering, Columbus, Wis.; John H. Noel, Nashville, Tenn.

Drink Jackson's Napa Soda.

Sportsmen's Row

W. H. Price, President of the Golden Gate Gun Club, has been suffering with a severe cold for the past week or so but is getting better. Billy's place on Stevenson street off Second is the gathering point for the boys and they have a most genial host. Billy is one of the pioneers of the shooting brigade.

* * * *

It will be several days before Max Rosenbach will be sighting his trusty shotgun at a bird on the wing. While reading the paper the other night he had the misfortune to stick his finger in his eye and he has been laid up with a bandage over his lamp. Max says he is going to wear interference boots on his hands hereafter.

* * * *

A. J. Stevenson pulled a funny one at Alviso on Sunday. He became drowsy while in the blind and dropped off to sleep. It was only a few minutes before he opened his eyes and was surprised to find a whole flock of spoonbills around the decoys. His gun was in such an awkward position, however, that the birds got pretty well up before he could get a shot and he only landed one. Stevenson is going to take an alarm clock into the blind the next time he goes hunting.

* * * *

The blue-rock busters are looking forward to Dick Reed's early return from Portland, where he went on business. Dick has a flock of friends who are anxious to listen to many of his original stories.

* * * *

Hugh Poston has had Bill Price fit a new stock to his shotgun and expects to miss but few this coming season. He places his faith in the single barrel gun, not discarding it even for quail. Hugh is visiting San Joaquin valley and will be back next week.

* * * *

Theodore Kytka, the handwriting expert, is an ardent devotee of the rod and gun. He is a crack shot and understands wild birds thoroughly. Fact is, he conducts a miniature game farm in the back yard of his residence at Union and Broderick streets in this city. Some years ago Mr. Kytka secured permission from the Fish and Game Commission to raise wild ducks. He has mallard and teal running wild. Their wings are clipped and they have developed into great pets. A pond is provided for the birds and they seem contented and happy in their home surrounded by civilization.

* * * *

Some thirty members of the Sutter Gun Club and their guests recently enjoyed a big turkey supper and on the following morning turned out and enjoyed good sport on the preserves in banging away at ducks and geese. Those who were in attendance included C. R. Boyd, E. M. Boyd, Charles Boyd, Jr., C. D. O'Banion, E. B. Starr, Frank Bremer, Lawrence Schillig, Phillip Chism, C. W. Rankin, Donald Wilkie, Mr. Summerville of Sacramento, Hobart Miller, E. S. Kimball, S. McLean, Glen Onstott, and John Onstott, Jr.

* * * *

H. A. Harms, A. A. Brown, W. H. Keaton, J. E. Robinson, and Frank Ely had the good fortune to get the limit of geese in the San Joaquin volley, all of which provided a grand "goose supper" for the Woodmen of the World lodge at Sacramento.

* * * *

One of the few shooting accidents of the season was reported on the banks of Butte Creek last week. W. B. Dobson was stooping over a trap when he was peppered with bird shot. Tony Mattiazzi, a sixteen-year-old lad, confessed to the authorities that he did the shooting. He explained that he heard a stir in the brush and let go a barrel, thinking it was a duck. An investigation proved that it was wholly accidental and no action was taken when the lad's father guaranteed to pay the expenses of Dobson, who was not seriously injured.

* * * *

Carl Tobiasson of Indian Flat had a thrilling experience with a mountain lion while returning to his home on Christmas eve. He encountered the animal in his path and took a shot with his shotgun. The lion became enraged when some of the leaden pellets took effect in his side and made a charge. Tobiasson says he did not hesitate to make tracks for his house and broke some speed records in reaching safety.

* * * *

If you have a claim on the friendship of Al Drendell get him to make you a dish of his celebrated "mystery stew." Homer Gambler and Mark Weyman, who went on a hunting trip with him last fall, had the pleasure of sampling it and they give it the seal of their O. K. The ingredients are so varied and kept so secret by Drendell that it has justly earned its name of "mystery." Drendell is an enthusiastic huntsman, angler and dog fancier and many years of experience in camps stand back of his famous stew.

* * * *

John Fisher, game expert of the Fish and Game Commission, has been standing many a good laugh this week. He received a quiet tip from a friend at Dixon to the effect that geese were to be found in abundance along the Sacramento river. Mr. Fisher is pretty handy with shotgun or rifle and forthwith made known to his friends that they could make arrangements for a goose dinner. While to make the story brief, said John Fisher went out Sunday in all the rain and wind and he returned burdened down with one (1) goose. Hence the laugh.

STEELHEAD ANGLING JUST ABOUT OVER.

Devotees of that sport par-excellence, steelhead angling, have reached the conclusion that their operations for the season are just about over. The heavy rain came along at a time when the fighting demon fish were arriving and the rivers have been placed in such a condition that the rod and reel activities are out of the question.

The season opened on December 15th and lasts two months and anglers were enthused over the news that the bar was open on Russian River. Many were the parties planned to visit the favorite spot at Duncan's Mills before the rain came down. The anglers are usually afforded opportunities to make catches while the steelheads stay in the tide waters. With the rivers rising, however, the fish went right on through up-stream to the small streams that empty into the main body of water.

The Paper Mill creek in Marin county, Sonoma creek, Salmon creek and the San Gregorio and Pescadero creeks in San Mateo, other favorite steelhead fishing waters, have been affected the same as the Russian river.

The striped bass seekers were forced to places of shelter by the rain and wind. Fact is, the sport has not been as good along the San Antonio as many of the regulars had hoped for.

The San Francisco Striped Bass Club is going to make merry this coming Thursday night. The annual dinner will be held at the St. Germain Restaurant on Ellis street just off Market. President Alvin W. Thornton and James Lynch of the entertainment committee invite all members to be present and to bring their wives, sweethearts and friends. The club is arranging some merry entertainment to amuse the big gathering that is expected.

GREWELL BEST AT VERNON TRAPS.

With several old timers on hand and several men prominent in trap shooting circles as visitors, the Vernon Gun Club staged its postponed clay pigeon shoot last Sunday morning and afternoon despite the chances of rain.

The contest of fifty targets covered the W. H. Wilshire trophy, the final shoot for the blackbird watch fobs and the initial shoot for the four silver loving cups.

Fred Grewell of William Hoegee company, shooting from the seventeen-yard range, successfully showed that he was the best shooter of the day, by copping a leg on the Wilshire trophy by breaking forty-six birds out of the half century thrown.

Grewell makes the tenth shooter who has won a leg on this prize, which goes to show that the handicaps carefully selected for each shooter are what they should be and again that the shooters who were in the "dub" class six months ago are coming to the front and are up with the former cracks, who used to annex every prize in sight shoot after shoot.

R. L. Hall broke 161 out of 175 in practicing. This was as good as the best. He has improved wonderfully of late, and is now one of the 90 per cent class, shooting in class A.

Class shooting covered the loving cups and watch fobs competition. Hall was victor in class A with a 45x50 score. In class B Doc Fitzgerald and Forrest of the Fillmore Gun Club tied with 44x50 scores. Grewell copped a leg on a cup in class C with his score of 46x50, and C. E. Groat, president of the Vernon Gun Club, won in class D with 46x50. The four best scores made during the last three months on the watch fobs will be looked over and announced in a few days by the club management.

Barham of Arizona, a crack shot of the Cactus state, came out with "Pop" Haight of the Du Pont Powder Company. Haight pinged a number of targets at practice shooting and broke 109 out of 125.

Ed Mitchell of Selby Load fame also journeyed out to the club on Sunday, it being his first trip. He came out in his brand new gasoline buss and explained how his car had it on Henry Ford's silent "four." At the traps he broke 71 out of 75.

The scores are as follows:

Wilshire trophy and loving cup competition of 50 birds—

Name—	Hdcp.	Match. Th.	Match. Br.	Practice. Th.	Practice. Br.

COURSING RESTRICTED TO MEMBERS.

At a meeting of the Capital City Coursing Club, held Monday afternoon at Sacramento, it was decided that only members will be permitted to enter dogs at future meets. The action was taken for the purpose of promoting membership as well as to make it easier to properly handle the meets. The initiation fee will be $1 and the monthly dues will be 25 cents.

R. K. Malcolm and J. H. Rossiter of San Francisco offered $50 each to the club to be included in the stake offered at the next meet, which will be held some time early in February, the date to be announced later.

John Grace, J. H. Rossiter and R. K. Malcolm were made honorary members of the club. Such membership will in future be a prize.

ANGLERS FIGHT FOR McCLOUD RIVER.

Anglers of the state, counties whose fishing streams are among their important resources and various sportsmen of California are watching with much interest the condemnation proceedings instituted by the county supervisors of Shasta against the Hearst-Wheeler interests, who control nine miles of the river which was stocked with fish by the state, and who now are preventing citizens from fishing. So keen is this contest that anglers of the state are preparing to rally to the fight, $1000 already having been raised in Siskiyou county to aid in the legal battle.

George Neale of the Fish and Game Commission asserted that he hoped the people of California were alive to the threat to their interests which is found in the Wheeler-Hearst action in setting up a baronetcy on this river. Similar action, if permitted on the part of others, would mean that seventy persons could control all the streams of Shasta county and no Californian other than themselves would be permitted on the premises.

Involved in the legal fight is the Rutherford law passed at the last legislature purposely to regulate this very evil. This law, which Governor Johnson signed despite hundreds of protests from the big interests of the state, provides that land along a stream may be condemned for a highway, thus permitting fishermen to follow that stream and fish.

Under this act the supervisors of Shasta county instituted condemnation proceedings along the nine miles of the McCloud river where the Wheeler-Hearst holding are situated and now the legal forces are squaring away for the battle.

Questioned on the matter recently F. W. Newbert of the fish and game commission said: "Not only have the Hearts prevented the people of the state who paid, by direct taxation, for the stocking of the stream, from nshing in front of their property, but the people are unable to reach other parts of the river so controlled because they are not permitted to pass the Hearst estate. An armed guard warns every one away.

"What these interests think of the poor people is shown by the establishment of the Hearst preserve on the McCloud river, and the fight to prevent the people of California from catching the fish they themselves have paid for."

It is understood that the big estate is controlled by Charles S. Wheeler, attorney for Mrs. Hearst.—Sacramento Union, Jan. 10.

WINNERS OF DuPONT LONG RUN CONTESTS.

The DuPont Powder Company makes announcement of the trapshooters who shot well enough during the year to win the DuPont Long Run Trophy Watches. They are:

H. B. Shoop, Harrisburg, Pa.; W. S. Behm, Esterly, Pa.; J. W. Bell, St. Louis, Mo.; F. G. Bills (p), Chicago, Ill.; J. S. Frink, Worthington, Minn.; L. S. German (p), Aberdeen, Md.; Fred Gilbert (p), Spirit Lake, Iowa; J. M. Hawkins (p), Forest Park, Md. (2); Woolfolk Henderson, Lexington, Ky.; Chas. Hummel, La Porte City, Iowa; S. A. Huntley, Chicago, Ill.; A. Killam (p), St. Louis, Mo. (2); C. N. Newcomb, Philadelphia, Pa.; Jno. H. Noel, Nashville, Tenn.; A. B. Richardson, Dover, Del.; C. G. Spencer (p), St. Louis, Mo.; J. R. Taylor (p), Newark, Ohio; W. H. Tolen, Fort Dodge, Iowa; F. M. Troch, Vancouver, Wash.; J. P. White, Watertown, S. Dak.; F. S. Wright, Buffalo, N. Y.; C. A. Young, Springfield, Ohio.

The letter "p" indicates the professionals. In this connection it will be noted that Arthur Killam and J. M. Hawkins have both won two watches. The rules governing the award of these watches provide that an amateur make fifteen runs of 50 or over and a professional twenty-five runs of 50 or over. Runs to count against the watches must be made with DuPont, Ballistiite, Schultze or Empire powder and at tournaments registered with the Interstate Association. This Long Run Trophy Plan is continuous through 1916 or the present year, and shooters who have not made the runs necessary to win a watch may complete their runs in 1916. The competition is continuous through 1916 in that shooters may win any number of watches or merchandise to the value of the watch and that the watch may be either a lady's or gentleman's design.

The five thousand acre farm of Col. Frank O. Lowden of Oregon, Ill., has been leased for a period of five years to the state of Illinois as a game preserve. Col. Lowden will live on the farm and till the soil, as formerly, but no hunting will be allowed on the premises.

REGISTERED TOURNAMENT AVERAGES OF THE INTERSTAE ASSOCIATION FOR 1915.

Pittsburgh, Pa., January 1, 1916.

To the Breeder and Sportsman:

Following herewith is the official Interstate Association list of amateur and professional shooting averages for 1915, with names of contestants, total number of targets shot at in Registered Tournaments, total number of targets scored, and percentages.

The averages for single targets for both amateurs and professionals are based on a minimum of 2,000 targets, as per The Interstate Association ruling to that effect.

The averages for double targets are computed on The Association Tournaments only, and they are based on taking part in two tournaments as a minimum, as per The Interstate Association ruling to that effect.

THE INTERSTATE ASSOCIATION,
E. REED SHANER, Secretary.

Where, O Where Are Northern Ducks?

Where, O, where are those flights of northern birds that have been awaited by local hunters ever since the first of December? Each week they have confidently been expected but up to date but comparatively few have put in an appearance. Experts—men who have followed hunting conditions and traditions year after year—are at a loss to understand the absence of the northern visitors.

One of the theories advanced is that the cold season set in in the north at a late date this winter and that the birds may be along later on. Another is that the flights started arriving at the time our terrific storm of a couple of weeks ago was raging and the bright fowls set a course inland and in a southerly direction. They may have gone to the Imperial valley. Certainly, few stayed in these parts and the local shotgunners have depended on local ducks for their sport.

It is fortunate that there were many local birds in evidence, otherwise the season would have been very disastrous. At the San Francisco office of the Fish and Game Commission the information is given out that the ducks about the bay shores bred in larger numbers last season than in years past. This is attributed to the fact that the late shooting in the spring was prohibited earlier than usual. The bombarding stopped on the last day of January and the birds were enabled to nest here with the pleasing results that have been set forth.

Shooting last Sunday was practically at a standstill on the bay points. M. S. Clark, a game deputy, made an inspection in a launch of the northern points of the bay on Sunday and found little or no game bagged. On Wednesday and Thursday he was on the south bay and found the waters just as barren of birds. Another evidence of the lack of birds is contained in the shipping reports turned in to the Fish and Game Commission. There were but seven limits shipped in from the different clubs and points about the bay, while when the season is in full blast there are scores of limits.

Phil Bekeart and Charley Breidenstein, a couple of well posted authorities on hunting, take a pessimistic view of the duck hunting season. "There will be no more duck hunting on the bay or salt water marshes for the rest of the season," says Bekeart. "When the storm came along the ducks scattered inland to feed at the new ponds and puddles that have been created. The northern birds have failed to put in an appearance for some unaccounted reason and it looks as if the only shooting that can be had is up in the rice field country up the state."

Breidenstein declares that it looks like the rod and gun fraternity will have to take a rest until May first, when the season opens for trout angling.

The recent turnout hasn't been very large. Some of the boys who went inland had some good sport last Sunday but it was raining close to home. Down in the Alviso marshes good bags were in evidence. A. J. Stevenson, Adolph Sutro and C. W. Kirke shot at the bridges and brought down spoonbills and some canvasbacks. The Eureka Gun Club had a good shoot and Frank Graves was in a party at the Auto Gun Club that got limits. Quite a few of the hunters got on the train at the draw-bridges and proudly displayed big bags.

From Los Banos it is reported that there is a bit too much water at present for high class results.

At Arton on Sunday Charles H. Kewell found conditions good, with duck weather and plenty of birds. Tony Korbel and John Connolly made the party to get limits.

A. Hebten, George Dreuiki and Fred W. Kewell were out and between them they gathered in 62 birds, which was not a bad day's sport.

Ed Bosqui and John Coleman worked along the Alameda shore and had a fair shoot. Snow and ice was still on the ground near Colusa but at that birds were flying.

Several law breakers have been taken into the toils in this section of the state the past week. Mike Egan was gathered in at Burlingame by Deputy Commissioners Burke and Leahy and fined $10 for killing robins. John Delacaza was arrested in the same locality and fined $25 for hunting without a license. Both men appeared before Judge Lamb.

Among others scooped into the net was Carlo Sorenzo, head waiter at a well known San Francisco restaurant. He was arrested in South San Mateo and fined $35 by Judge Davis, whow is rapidly becoming a terror for violators of the game laws. Sorenzo is an old offender. Last year he was arrested on a similar charge and fined $25. This time he was warned that if convicted he will be sent to jail.

CONVICTED BY A DOG.

An interesting story came to our desk last month, says an exchange, telling of a Pittsburgh judge who found a defendant guilty largely on the testimony of a dog. So many newspaper articles about animals are without foundation in fact that we wrote to the judge himself to learn the truth of the clipping. The story was that a little girl, Florence Boening, was attacked by a peddler, one John Madie. She was alone in the house. A pet collie dog attacked the assailant and so allowed the child to escape and seek refuge at a neighbor's. The man was afterwards arrested and brought into court. As the child was the only human witness against him the dog was summoned into court. The dog immediately sprang at Madie and was with great difficulty prevented from doing him serious injury. The judge decided that the corroborative evidence of the dog left no doubt of the man's guilt.

Drink Jackson's Napa Soda.

OPPOSITION TO OAK CREEK HATCHERY.

Strong opposition has been aroused among Southern California sportsmen over the proposal of the California Fish and Game Commission to build a hatchery in the Oak creek district, five miles from Independence, in the Owens valley.

The opposition culminated in a meeting held in Azuza with W. D. Frederick as the leading spirit and Supervisors Hamilton and Henshaw, L. J. Mathews of Covina and C. A. Griffith of Azuza among those present. A protest has been lodged with Secretary Pritchard of the Los Angeles office of the commission and a number of sites suggested nmuch closer and more accessible than the one in the Owens valley. The co-operation of the San Bernardino authorities has been sought and granted.

Ice House canyon near Camp Baldy has been suggested, as has Grouse creek in Bear valley, the San Gabriel river canyon and a number of other places. Commissioner Connell's objection to the Ice House canyon site is that it is accessible only over a private toll road and that material for the hatchery would have to pay toll over this road, the same as other merchandise, while sportsmen and other visitors would also be compelled to pay toll.

The opponents of the Oak creek site claim that the objection to the Ice House canyon site can be done away with, and anyway, that other just as good sites can be obtained much closer to civilization. H. A. Parkford, a prominent fisherman of Ontario, is one of those most active in the opposition in San Bernardino county.

FISH NET DEFENDANT IN COURT.

"One Fish Net," come into court and be sworn. You are charged with existing illegally and you are to be decapitated, cut to pieces, burned and otherwise destroyed, if the proper legal qualification is given in a court of justice. But for goodness sake do not file a demurrer, because County Clerk Harry Saunders of Yolo would not know how to proceed in entering the proper order in the big book in his office, which is always necessary in such cases made and provided.

There is a case filed in the county court entitled, F. H. Newbert, Carl Westerfeld and M. J. McConnell vs. One Fish Net." The complainants are members of the Board of Fish and Game Commissioners of the Sovereign State of California; the fish net is one found last July 17 in a slough between Broderick and Davis by Lee Sinkey, and has been in his possession ever since. The owner was never located, consequently to have the legal right to destroy the net, suit was brought directly against the unlucky contrivance.

This is, of course, unfortunate for the net, but the dignity of the law must be upheld, so after the legal technicalities have been complied with there will be a solemn conclave of officialdom and the stern work of destruction will proceed with neatness and dispatch. "So mote it be."

DOGS CARRIERS OF DISEASES.

The dog in the country is a useful and pleasing adjunct to the farm if he is properly controlled and cared for, but when neglected may readily become a carrier of disease to stock, in addition to gaining opportunity to kill sheep and destroy gardens and other property. Dog ordinances, as a general rule, have been intended chiefly to curb the dog's power of doing harm by attacking, biting, killing, or running sheep or stock. The part he plays as a carrier of diseases to animals only recently has been recognized, according to the zoologists of the department, who believe that when this is better understood, rural ordinances and laws which lessen this danger will gain the support of the community.

In case of the foot-and-mouth disease the dog acts as a mechanical carrier of infection. The dog which runs across an infected farm easily may carry in the dirt on his feet the virus of this most contagious of animal diseases to other farms and thus spread the disease to the neighboring herds. In infected localities it is absolutely essential, therefore, to keep all dogs chained and never allow them off the farm except on leash.

There are, however, many other maladies in the spread of which the dog takes an active part. In Bulletin 260 of the Department, "The Dog as a Carrier of Parasites and Diseases," it is pointed out that rabies, hydatid, ringworm, favus, double-pored tapeworm, roundworm and tongue worm are often conveyed to human beings in this way. It occasionally happens also that the dog helps fleas and ticks in transmitting bubonic plague or the deadly spotted fever.

Hydatid disease is caused by the presence in the liver, kidneys, brain, lungs and other organs of a bladder worm or larval tapeworm. Bladder worms are often as large as an orange and may be larger. A dog which is allowed to feed on carrion or the raw viscera of slaughtered animals may eat all or part of a bladder worm containing numerous tapeworm heads. These tapeworm heads develop into small segmented tapeworms in the intestines of the dog. The tapeworms in turn develop eggs which are passed out in the excrement of the dog. They are spread broadcast on grass and in drinking water where animals can very well eat them and thus become infected. The hog is particularly liable to this disease because of its rooting habits. The egg may get into human food, and persons who allow dogs to lick their hands and face also run the risk of getting the eggs of the tapeworm in their systems.

Prevention on the farm consists in so restraining the dog that he can not get at carrion or raw viscera. Viscera should be boiled before being fed to dogs and should never be thrown on the fields. If not cooked and fed, viscera and carcasses should be burned, buried with lime, or so disposed of as not to be accessible to dogs. Proper feeding of the dog is essential, and the owner who does not feed a dog properly has no right to keep one.

The parasite which causes gid in sheep somewhat resembles the hydatid worm. A dog allowed to eat the brain of a giddy sheep may swallow this parasite and later distribute the eggs of the resulting tapeworm over the pasture. Sheep while grazing swallow the eggs with the grass which they eat. In the case of sheep dogs it is important to administer vermifuges often enough to keep them free of these worms. In the case of sheep measles, the bladder worm in the meat, typical of this disease, is swallowed by the dog and again the tapeworm eggs are passed by the dog to grass or water, and thy are eaten by the sheep.

Of the external parasites which dogs may carry to animals, fleas and the various kinds of ticks are both troublesome and dangerous. The remedy is clear. The owner must keep his dog clean, not merely for the comfort and happiness of the dog, but to prevent it from becoming a carrier of disagreeable and dangerous vermin.

These reasonable measures, important to the stock on the farm, have a direct connection with the health of the family. Where ringworm or other skin diseases break out among the children, or the worm parasites develop, it is well to determine whether a dirty or uncared-for dog may not be carrying infection on his skin or hair, or be conveying disease from carrion directly to the food and persons of his friends. Even if no one is infected with disease, the folly of allowing a dog to remain dirty and have the freedom of a home where personal cleanliness and hygiene are respected is apparent.

NOTES GATHERED HERE AND THERE.

Philip Sousa, the famous bandmaster, is also an enthusiastic sportsman and trapshooter, and when his official duties permit he spends much time with his gun in the field and at the trap, where he finds much mental relaxation and also much healthful recreation. Mr. Sousa owns a 2,000-acre game preserve in North Carolina, and on this he spends a great deal of time during the open shooting season. "When out with my gun," says Mr. Sousa, "I completely relax, mentally and physically. There is always sufficient excitement and anticipation connected with field shooting to cause me to forget all business cares and enjoy life, and then the study of game and its habits is most interesting."

The recent heavy snowstorm—one of the worst in years—in New York, New Jersey and other Eastern states, has, it is feared, killed by strvation many game birds as well as deer and other game. The snow fell to such a depth in many localities that it was days before the farmers could make the roads passable. In some instances the farmers could only get out to feed their stock by digging a passageway through the heavy drifts.

Berks County, Pennsylvania, had 7,660 licensed hunters this year, and it is estimated that between 38,000 and 40,000 rabbits were killed in that county this season during the month of November, many gunners shooting the bag limit of ten rabbits in one day. There was no snowfall in that section of the country in November, or the number would probably have been larger. Most of the hunting was done in the cornfields, which seemed to be a favorite rendezvous for the bunnies. Most of the hunters think that if the open season on rabbits was from two to four weeks later than it now is, much better sport could be had. According to the present game law of the Keystone State rabbits cannot be marketed, so the number killed this year were not killed for profit.

As a part of his plan to instruct the New York police force in methods of warfare, Police Commissioner Woods announced that he has begun the organization of a rifle club to be known as "The Police Department Rifle Club of the City of New York." The federal government has notified him that 500 army rifles will be furnished by the War Department.

Interest in the sport of bait and fly casting is steadily increasing in the Northwest. Seattle, Wash., is now organizing a casting club and expects to be in the field next year. The Tacoma organization is in a most flourishing condition and is planning for an increased activity next season. The Portland, Ore., club has announced its intention of holding a big casting tournament next year. This will probably be known as the Pacific Coast Tournament and will be held early in August, or prior to the international tournament at Newark. The Tacoma club may also hold a tournament.

Reports from Grass Valley are to the effect that hundreds of wild pigeons have been seen there this fall. These birds are now fully protected by law and it is illegal to kill them. Years ago they were very numerous, but the slaughter was so great that it became necessary for the State Fish and Game Commission to prohibit their killing altogether in order to save them from the fate of the passenger pigeon, now declared to be extinct.

The wild pigeons that frequented California are migratory birds. They come from the north in the fall of each year in great flocks. In years gone by when they were very numerous it was nothing to see several thousand in one flock. They seek foothill locations, seldom coming down below an elevation of 1,500 feet.

It is quite evident that, under the protection now given them, they will become numerous once again and will be one of California's best game birds at some future date, when it will be permissible to kill them in small numbers.

Trappers coming into Chico from the Sacramento river bottoms west of the city report an unusually successful season. The catches of small fur-bearing animals have been good and the prices are high. They say the center of the world's fur market now is in St. Louis, instead of London.

Word was received last week from F. C. Hammond, who is prospecting in southern Monterey county, that he killed a big grizzly bear last week. Mr. Hammond was working his way slowly through a thicket, when he suddenly heard an ominous growl, and he found himself staring a big bear in the face. The bear reared on his haunches with a snarl and Hammond promptly shot him with his rifle. The animal was only about fifteen feet away when discovered by the hunter.

PATTBERG HIGH GUN AT SHELL MOUND.

George A. Pattberg scored 225, 231, 232 and 236 in the monthly rifle competition o fthe Golden Gate Rifle and Pistol Club at Shell Mound Park on Sunday. Pattberg's score of 236 is better by two points than the highest score made in 1915.

The clubs practicing on the Shell Mound range were represented by their best talent, and only expert marksmen recorded good scores. Following were the best scores of the day:

Golden Gate Rifle and Pistol Club's monthly medal shoot—George A. Pattberg 225, 231, 232, 236; Ben Jonas, 223; E. Schierbaum, 208, 206, 216, 206; M. W. Hoousner, 218, 221, 227; K. O. Kindgren, 215; W. F. Blasse, 226; Martin Blasse, 213; E. W. Helm, 227.

Golden Gate Rifle and Pistol Club's pistol scores—Dr. R. A. Summers, 80, 80; C. T. Sisson, 84; C. W. Whaley, 86, 89, 86; E. W. Helm, 65, 69, 83; W. C. Pritchard, 90, 94, 92, 91, 94; C. W. Randall, 96, 93.

Swiss Rifle Club's monthly medal shoot—John Frei, 216, 211; F. Muehlebach, 215, 213; Charles Ott, 210, 191; H. Perrin, 208, 207; A. Schwarz, 206, 205; J. A. Sutter, 204, 181; J. R. Stalder, 200, 198; L. Hauser, 194, 191; Charles Bachmann, 194; Henry Tschopp, 185, 187.

Swiss Rifle Club's monthly bullseye shoot—J. R. Stalder, 265; John S. Lutenegger, 340; H. Tschopp, 732; L. Hauser, 960; A. E. Hintermann, 1072; J. A. Sutter, 1140; H. Perrin, 1227; C. Bachmann, 1320; A. von Weyl, 1342; J. Iten, 1400; Charles Ott, 1412; F. Muehlebach, 1450; John Frei, 1500; A. Schwarz, 1045.

Norddeutscher Schuetzen Club's monthly medal shoot—E. Schierbaum, 211, 205; G. W. Dieckmann, 208; August Westphal, 208, 202, 186; P. F. Rathjens, 201, 199; John de Wit, 197, 194, 186.

Independent Rifles' monthly medal shoot, best scores of the day—M. Andressen, 60; P. Schong, 59; Major B. Hilken, 59; Lieutenant J. Siebe, 44; Sergeant R. H. Hilken, 48; H. Marzolf, 49; J. Westergard, 45; E. Abraham, 49; Sergeant L. Mayer, 39; C. Edel, 37; J. M. Hansen, 44; Lieutenant P. Volkman, 38; Corporal J. Meinke, 36; J. Steiger, 38; H. Schlichtmann Jr., 33.

Company A, Irish Volunteers, monthly medal shoot—Captain J. F. Waters, 90; William Gaul, 92; M. Gaul, 84; T. Moynihan, 78; B. Reilly, 65; J. F. McArdle, 51; Frank Dugan, 89; D. Harnedy, 21.

HOW WAR AFFECTS BIRDS.

The tumult of arms and the noise of artillery do not make the same impression on all kinds of birds. Whereas some do not seem at all exercised nor affected, others are terrified and take flight, so says a writer in L'Ami des Animaux, Geneva, from which we have translated the following:

In the north of France, in the midst of the horrors of battles, blackbirds stay in the bushes or hedges, practising the strictest neutrality. The lark delights the combatants with his morning song. A pair of swallows made their nest in the heart of the trenches, where, due to the humanity of the soldiers, they were not allowed to want for anything. The starling and the gray bunting have no fear of the war. On the contrary, the yellow bunting, the titmouse, the chaffinch, and the goldfinch, have almost entirely disappeared. The partridges and the buzzards fly with all the strength of their wings to escape bombs and bullets.

England has become a place of refuge, a sort of terrestrial paradise for these fugitive birds. But there also they may be reached at times by the flying projectiles.

THE FARM

FEED AND CARE OF THE DAIRY HEIFER.

Although the first few months of the heifer's life are the most critical period of her existence, many calves are stunted, due to lack of attention after being weaned.

It is a rather common practice to have cows calve in the spring, yet this is not usually the best time. It is a fact that a calf born in the fall will get a better start in life than one born in the spring.

It makes little difference in the rate of growth of a calf whether it has pasture or has only dry feed in connection with its milk. But after weaning time the calf that has pasture will make by far the cheaper and more rapid growth. A fall calf will also be ready for breeding so that it will drop its own calf in the fall at the age of two years.

Until a calf is weaned it receives a liberal allowance of protein in its milk, but when milk is removed from the ration it is necessary to supply protein in some other form, such as legume hay or a high protein concentrate. It is advisable to keep the heifer in a thrifty, growing condition, although there is no need of fattening her. However, if she does not become rather plump it will not injure her dairy qualities.

If fed so as to produce a thrifty growth, yet not produce fat, dairy heifers will gain on an average close to one pound daily from the age of six months up to two years, or calving time.

For heifers from six to twelve months old the following rations will give good results:

Ration 1.—About two pounds daily of a mixture of seventy-five pounds corn chop and twenty-five pounds bran; all the alfalfa hay the heifer will eat.

Ration 2.—Six to ten pounds silage; about two pounds daily of a grain mixture of forty pounds corn chop, forty pounds linseed meal or cottonseed meal, and twenty pounds bran; all the alfalfa hay the heifer will eat.

For heifers ont to two years old the following rations are finely adapted:

Ration 1.—About three pounds of corn daily; all the alfalfa hay the heifer will eat.

Ration 2.—Corn silage, twelve to 20 pounds; about three pounds daily of a grain mixture of equal parts corn chop, bran and linseed meal or cottonseed meal; all the alfalfa hay the heifer will eat.

The proper age at which to breed a heifer will depend very largely upon the size and thrift of the animal, as well as upon the breed.—Bulletin Nebraska Experiment Station.

LIVESTOCK MEN TO MEET.

President Dwight B. Head of the American National Livestock Association has made a call for the 19th annual convention to be held at El Paso, Texas, January 25, 26 and 27, 1916, the convention to be called to order at 10 o'clock Tuesday, January 25; morning sessions only.

Many subjects will be discussed at this meeting, among them being the following:

Federal control of public grazing lands; the 640-acre grazing homestead bill; administration of forest reserves; eradication of poisonous plants; marketing of livestock and its products; delays at terminals; stockyard facilities; financing livestock loans; valuations in railroad livestock contracts; charge for cleaning and disinfecting cars; railroad rates and services; recent cases before the Interstate Commerce Commission; suppression of the foot and mouth and other infectious diseases; sanitary regulations of different states; prohibition of the importation of livestock and animal products from countries where contagious diseases exist; inspection of meats and hides from Mexico; protection of American livestock owners and ranchmen in Mexico; livestock conditions in foreign countries; destruction of predatory animals; exports and imports of livestock and meats; meat-inspection law; prohibitive tax on oleomargarine; needed legislation; reports of officers and standing committees.

Prominent cattlemen will be present to take part in the meeting. An interesting program will be prepared, but free and open discussion on all subjects in which stockmen are interested will be welcomed. Representatives of the Bureau of Animal Industry and the United States Forest Service will be present.

WHAT FARM IMPLEMENTS HAVE DONE.

The influence of the plow on production is remarkable. It is said that man and the plow have been developed side by side. And it is a question whether the plow has not had more to do with man's development than any other agent with which he has been asociated. The story of agriculture is intimately associated with the development of farm implements. And the manner in which improved implements have increased production, afforded more time for education and recreation will never fully be known, nor can it be duly appreciated.

The nation that grows and increases in population, in wealth and in human intelligence must have an abundance of food. That economy requires that most of the food necessary to the support of the people be produced at home will not be questioned. The danger, the distress and the enormous expense of providing food for a people cut off on account of war is now evident to those who read the horrors caused by the present conflict of arms in Europe.

Primitive peoples existed, conquered or were overcome according to the food supply. The Gauls were a mighty people largely because they were producers. Pliny the elder tells us the reason. He describes their fields and gives a description of the implements they used. The Indians had vast acreage over which to roam. The number was not more than 400,000 people, yet they were not able to subsist and increase in population because of their crude way of tilling the soil to procure food, as the hunting and fishing failed. Only those tribes that were skilled in tilling the soil and which learned to use farm implements have met the new conditions of civilization.

A noticeable change in the length of the working day has been made since the use of improved implements has become general. Harvest was oncea very laborious task that required heavy physical strain from early dawn till dusk. Now the header or the binder finishes the work in a very short time and the men are released for other work. Formerly as much as 16 hours a day was spent in the field, but now even in harvest time the working day is seldom longer than 10 hours.

Farm laborers were afraid that improved implements would reduce wages, but the contrary was the result. According to McMaster in 1794, in the state of Pennsylvania, the wages of the common laborer was not more than $3 per month, and "in Vermont good men were employed for 18 pounds sterling a year." In 1849 wages did not exceed $120 a year. Now farm laborers are sought and they are offered two, three and even five times such prices. This is not the case in some countries where hand labor is general, Asia for instance. There men work from early morning till late at night for 14 cents a day. Women receive from nine to ten cents a day and children from seven to eight cents a day in some of these countries.

The cost of production on our American farms has decreased, although labor is paid better than ever before. This is largely the result of better implements and machines. According to the 13th census it required three hours and three minutes to produce a bushel of wheat under hand labor methods; now it takes but nine minutes and 58 seconds with improved implements and machines. The cost was 20 cents a bushel in 1829 and 1830 when produced by hand; in 1895 and 1896 a bushel of wheat cost but 10 cents. It required 11 hours of man labor to cut and cure a ton of hay in 1895; a few years ago it required one hour and 39 minutes with machinery. The cost of a ton of hay was thus reduced from 83 1-3 cents to 16¼ cents.

Machinery has improved the qutlity of farm products. It was once necessary to begin harvest before crops were ripe; now it takes but a few days, hence the quality of the product is greatly improved under present methods. Grain is cleaner, purer and heavier than when tramped out with animals or when beaten out with a flail.

It is not too much to say that the manufacture and use of improved farm machinery is very greatly responsible for the growth and value of agriculture in this country. This is a nation of farmers and of farm products. Farm implements have relieved the laborer of much drudgery; made his work and his hours of service shorter; stimulated his mental faculties; given an equilibrium of effort to mind and body; made the laborer a more efficient producer, a broader man and a better citizen.—From Farm and Ranch.

TRANSPLANTING PREPARATIONS.

Early preparation of the orchard land for transplanting will be highly desirable for best results with the home orchard. It will be easier to transplant, there will be less likelihood of loss in trees and the trees will begin growth under better circumstances if early preparations be made.

The mistake should not be made of waiting till time to transplant, then stake off, dig the holes in the grand ground, then hurriedly transplant with a view of breaking between the trees later. This plan has been followed too often and always means poor preparation, unnecessary work in setting the trees and poor growth the first year.

The change that takes place with the transplanting of the tree and its adaptation to its new condition is considerable. A young tree taken from the nursery row, trimmed and set in the orchard needs the best possible preparation of the soil so it may callous the roots, send out fine root hairs to take hold of the soil and begin to nourish the tissues of the tree.

The work of transplanting will be very little when the soil is prepared properly. It doesn't take much time nor labor to dig holes and set a tree in soft mellow land that has been prepared for trees.

No one knows what the weather will be in the spring. We sometimes have drouth. A good way to store up soil moisture is to break the soil as early as possible, pulverize it as well as it can be done with the harrow, the disc, etc., and then make the best possible use of rains that fall early.

One need not wait till spring to transplant fruit and shade trees, shrubs, etc. They can be transplanted most any time in winter here in the west. In fact, they are more likely to live and begin growth under proper conditions when transplanted early than if left till spring.

FOOD SUPPLY OF THE FARM HOME.

Much public interest has been excited by the recent announcement of the United States Public Health Service, to the effect that the development of the disease known as pellagra in human beings depends on faulty diet. Among the suggestions of the Public Health Service for the modification of diet to prevent the development of pellagra are a number of items which emphasize the importance of the campaign of the department and the State Agricultural Colleges to increase the production of food supplies on the farm, especially to bring about a home supply of meat, eggs, milk, and butter.

Among other specific recommendations of the Public Health Service are:—

(a) The ownership of a milk cow; an increase of milk production for home consumption.

(b) Poultry and egg raising for home consumption.

(c) Stock raising.

(d) Diversification and cultivation of food crops.

These four specifications give an added argument for the campaign of livestock raising and farm diversification, which has been especially urged.

THE BEST LINIMENT

OR PAIN KILLER FOR THE HUMAN BODY

Gombault's

Caustic Balsam

IT HAS NO EQUAL

For the Human Body —It is penetrating, soothing and healing, and for all Old Sores, Bruises, or Wounds, Felons, Exterior Cancers, Boils Corns and Bunions, CAUSTIC BALSAM has no equal as a Liniment.

We would say to all who buy it that it does not contain a particle of poisonous substance and therefore no harm can result from its external use. Persistent, thorough use will cure many old or chronic ailments and it can be used on any case that requires an outward application with perfect safety.

A Perfectly Safe and Reliable Remedy for Sore Throat Chest Cold Backache Neuralgia Sprains Strains Lumbago Diphtheria Sore Lungs Rheumatism and all Stiff Joints

REMOVES THE SORENESS—STRENGTHENS MUSCLES

Cornhill, Tex.—"One bottle Caustic Balsam did my rheumatism more good than $120.00 paid in doctor's bills." OTTO A. BEYER.

Price $1.50 per bottle. Sold by druggists, or sent by us express prepaid. Write for Booklet R.

PERCHERON STALLION WANTED.

Will buy, lease or trade. Must be blocky and registered.

J. H. NELSON,
Box 361, Selma, Cal.

FOR SALE—Black McKinney stallion and mare—brother and sister—7 and 8 years old. Standard and Registered. Both converted to high class gaited saddle horses—single foot, running walk, etc. Lady can ride; perfectly sound. Make excellent cross with any highly bred stock. They are both ribbon winners in show ring. Can be seen at San Francisco Riding School, 701 Seventh Ave. Phone Pacific 1655. OSCAR ROMANDER.

FOR SALE.

BEST POLICY 42378, one of the best bred horses in the world. Handsome bay horse, small star in forehead, left hind pastern and left fore heel white. Has size, heavy boned, stylish, pure gaited trotter, sound, and a splendid individual in every respect. Best Policy is by Allerton 5128, dam Exine 2:18¼ by Expedition, next dam Euxine by Axtell, next dam Russia by Harold 413, next dam Miss Russell, dam of Maud S., etc. Best Policy has trotted a mile on the Hanford half mile track in 2:12. He is ten years old and with little training would make a good game race horse, and ninety percent of his colts are trotters. He will be sold at a great sacrifice. For price and further particulars address

BREEDER & SPORTSMAN,
P. O. Box 447, San Francisco, Cal.

FOR SALE.

The five-year-old pacer The Fool, trial this season with limited opportunity in 2:11, halves in 1:03, quarters in 30 seconds. A pleasure to drive this fellow and an amateur will drive him in better than ten in the matinees next season.

Also Oro Bond, three-year-old. But for a slight injury late in the season would have been heard from in the stakes this year. He is now sound and ready for some one to point for the races next year. Will make a sure enough racehorse. These two priced to sell.

Breeding and price on application.

DR. I. L. TUCKER,
Oroville, Cal.

FOR SALE.

New "Ideal McMurray" light track cart for matinees, workouts, speeding and jogging. First-class, down to date cart, weight 45 to 50 pounds. Great strength and carrying power, absolute freedom of any horse motion. Constructed from the best second growth white hickory. Best guaranteed grade of pneumatic tires, handsomely finished in rich carmine or royal blue, with brass screen dash, detachable, and accessories consisting of serviceable foot pump, complete tool and repair kit, wrenches, oil can, etc., etc. Weight crated 90 pounds. Brand new and will be shipped to any address. For price address:

F. W. KELLEY,
BREEDER AND SPORTSMAN.

HIGH-CLASS TROTTING BRED COLTS FOR SALE.

No. 1. Three-year-old filly sired by All Style, dam Dr. Hicks. This filly is registered.

No. 2. Two-year-old colt, full brother to the above.

No. 3. Two-year-old filly sired by Dan Logan, dam a Wilkes mare who was a great natural pacer but unfortunately was crippled by a barbed wire accident as a yearling and was never worked.

The All Styles are large, strong built, with all the style of their sire, perfect in action, and all three of the above colts should make race horses second to none. The Dan Logan filly is perfectly gentle to handle and drive and is a high-class filly in every respect. Apply to or address,

I. F. EATON, Chico, Cal.

BEAUTIFUL BELVEDERE

LOTS FOR SALE

CORINTHIAN ISLAND Subdivision to Belvedere is the most beautiful spot on the shores of San Francisco Bay for a suburban home. It commands an extensive view of the City of San Francisco, Alcatraz and Angel Islands, Raccoon Straits, San Francisco Bay, Richardson's Bay, the Berkeley shore, beautiful Belvedere and Mt. Tamalpais. It is in Marin County, directly opposite San Francisco, and forms the eastern shore of Belvedere cove. It has a naturally terraced, sunny, western slope that is well adapted for many choice residence sites, every one affording most picturesque views of the bay and mountain. It is protected from the prevailing western trade winds in summer by Belvedere Island, and from the southerly storms in winter by Angel Island. The soil is fertile and part of the island is well wooded.

It is less subject to fog than any other place near San Francisco. The summer fog, as it rolls in from the ocean, splits on the western slope of Sausalito, part of it flowing in a line with Angel Island towards the Berkeley shore, and part of it along the southern slope of Mt. Tamalpais, leaving Belvedere, Corinthian Island and Raccoon Straits in the bright sunlight, while the fog banks can be seen as a white wall both to the north and the south.

There is very little available land about the shores of San Francisco Bay that is desirable for homes, especially for those who love boating and kindred sports. The Alameda and Contra Costa shores of the bay are the lee shores and receive the full brunt of the boisterous trade winds which lash the shoal waters near the land into muddy waves, making boating both unpleasant and dangerous. To the north of the city and in Marin County the land from Sausalito to the entrance of the bay is a Government reservation and will never be placed on the market. The shores of Richardson's Bay are not at present convenient to boat service and, aside from Belvedere and Corinthian Island, there is little or no land near any ferry landing that possesses the natural advantages, improvements and possibilities that are offered on Corinthian Island. Concrete roads, pure water, telephone service and electric light wires are already installed. It is only ten minutes' walk from any point on the property to Tiburon boats, and but forty-three minutes' ride to the foot of Market Street.

On the point of Corinthian Island the Corinthian Yacht Club has had its home for many years, and on any summer day the white sails of its numerous fleet add to the charming scene, as the trim yachts glide about the cove. Excellent fishing of all kinds for bay fish, including salmon, the gamey striped bass, rock fish and the toothsome silver smelt, is to be had in the cove. There is probably no spot so accessible and in such close proximity to any large city in the world that offers the attractions of climate, magnificent scenery, fishing and boating as will here be found.

FLOOD WATER GOES TO WASTE.

Hundreds of dry land farmers stand in their yards after every spring and summer rain and watch increased hay and pasture yields go swirling down every creek and coulee in the shape of the waste of flood water. Water in a country of limited rainfall is the most important agricultural factor. Yet thousands of dollars' worth of it is allowed to go to waste each season through negligence in conserving it.

This flood water is and can be used by dry land farmers in two ways. The easiest and cheapest, though not the best, method of getting dollars out of this waste is by catching the flood water as it runs down the coulee and spreading it over the hay and pasture areas by means of a small dam and ditches. A small earthen dam should be built in the coulee at a point higher than the highest spot in the field which is to be flooded. Not less than one inch of fall for every 100 feet of ditch should be allowed.

In determining the site for the dam, levels should be run from the highest point in the field to a point high enough up the coulee or creek so that the ditch connecting the two will have sufficient fall to carry the water. If it is not practical to put the dam as high up as this the best site should be first determined, then the ditches run out on one or both sides of the coulee to best advantage. If a level or transit is not available a ditcher's triangle or carpenter's level and board can be made on the farm and used with reasonable accuracy.

In most cases these ditches can be dug with the plow, and home made ditch slips, or by means of a small road grader to be pulled by four or six horses. The ditch above the land to be flooded should be wide and shallow, the size depending on its length and the amount of water to be handled. Below the ditch, furrows and smaller lateral ditches following the contour of the land will be of great assistance in handling the flood water. In fields of gentle, even slope these will not be needed, provided the slope is long enough to handle all the water without waste.

The best practice is for the owner to build his main ditches and then observe carefully the manner in which the water spreads over the ground after it leaves the ditch. He will find that he can improve the overflow from the ditch by deepening it in places and perhaps by building check dams in it, if it is not spreading the water evenly. Then by watching the water as it spreads across the field, he will find that a few furrows or shallow ditches will spread it more evenly and assist in holding it on the land for a greater period of time. In some sections under more favorable conditions a definite system similar to terraces could be worked out to advantage.

Flood water can be used in this way on hay and pasture fields, but it is not generally advisable on grain and cultivated fields. The water and silt are hard to control, are apt to cause lodging and uneven growth and ripening. There is also danger of washing. When used on alfalfa and hay fields care should be taken that the field is not flooded when the hay is heavy or after it is cut. At this time the ditches should be closed and the water directed down the coulee.

The experience of a number of farmers who are using flood water in this way is that alfalfa fields will yield a good ton more to the acre, that smaller but good gains can be expected on other meadow, and that the pastures will double in feeding value.

The best results are obtained by spreading the water slowly over a small area and holding it as long as possible on it, rather than letting it run hit and miss over a large area.—Geo. E. Piper in Agricultural Age.

ASHES VALUABLE AS FERTILIZER.

The farmer who burns wood for heating and cooking should carefully store the ashes, and not permit them to leach, as they have a peculiar fertilizing value. They not only contain potash and phosphoric acid in appreciable amounts, but also contain magnesia and lime, and when applied to the land they also act indirectly to increase the available nitrogen content of organic matter in the soil.

Ordinary house ashes contain on the average about 8 or 9 per cent of potash and 2 per cent of phosphoric acid. Investigators have considered that there is enough potash and phosphoric acid in a bushel of ashes to make it worth 20 or 25 cents. Besides that, some 10 or 15 cents additional might be allowed for the "alkali power" of the ashes. This power is that which enables ashes to rot weeds and to ferment peat. The potash content of ashes will be lost if they are permitted to leach, and care should be taken to store them in a dry place.

FARM HANDICRAFT CLUB.

To encourage boys and girls, especially those in the country, to spend their spare moments during the fall and winter months usefully, the department's directors of juvenile club work in the North and West, working in co-operation with the State colleges of agriculture, have developed plans for boys and girls. The purpose of these clubs is two-fold: First, to maintain interest in the agricultural club during the season when active work in the field and garden is suspended, and, second, to develop manual skill in members through practical work that readily may be correlated by teachers with the manual-training work of the school as well as with the agriculture of the farm and the domestic activities of the home.

The work is so planned as to be capable of extension throughout the year. While effort will be directed primarily toward interesting members of the agricultural and home economic clubs in these activities, membership is to be open to children 10 to 18 years of age.

These clubs will be directed much as are the corn clubs, girls' gardening clubs, canning clubs, and other organizations aimed to give skill and experience in raising crops or animals or in utilizing by-products of the farm. The leaders of the clubs will supply the members with specially prepared circulars of direction, in which are to be included working drawings and lists of materials for accomplishing the different projects.

The clubs, while directly vocational also will be designed to minister somewhat to the winter social needs of children and will provide for exhibits and even for contests. Members will be encouraged to select and carry through during the year 10 or what might be called the handicraft units suggested in the list below. This list, designed for the guidance of the directors of these special clubs, and of teachers, offers valuable suggestions also to parents who wish to plan useful activities for their children, and should be found suggestive by those concerned with the development of almost any type of organized work for the amusement and improvement of rural children.

If the sheep grower had his wish there would be no wolf in America. The flockmaster thinks that the only thing wolf was made for was to kill sheep. The lobo must have some other calling in life or the good book misses fire when it said: "Nothing was made in vain." "My opinion of it," says A. B. Shubert, president of the largest house in the world dealing exclusively in American raw furs, "is that the wolf is here to give up the ghost and surrender his hide to the furrier, who by the way makes economic use of good pelts, but has little use for the poor ones."

Winter eggs depend a good deal on the food supplied and the following has afforded satisfactory results: For morning feed, whole wheat. Noon bran mash with meat scraps or house scraps and some green food such as roots, cabbage or steamed alfalfa. Evening, corn and oats mixed. It is also important that the hens have some grit, as crushed granite or crushed oyster shells to furnish lime for shell making. The housing is important too. The poultry house should be well lighted and well ventilated.

Harpers Weekly and The Breeder and Sportsman

$5.50 WORTH FOR $3.25

Breeder and Sportsman

One Year, 52 Copies, Regular Price $3

THE BREEDER AND SPORTSMAN is the oldest weekly journal devoted to the Horse west of Chicago, having been established in 1882. This interest, together with the Kennel, Gun, Fishing, Coursing and kindred sports receiving the most attention in its columns; together with Agricultural and Dairying Departments, under whose headings especial attention is paid to the breeding, etc., of Cattle, Sheep, Hogs, Poultry, and all other animals connected with stock raising.

As an advertising medium to Racing Associations, Horsemen, Stock Breeders, Manufacturers of Sulkies, Carriages, Wagons, Agricultural and Dairying Implements and Machinery, Sporting Goods, Fanciers, Stock Foods, and all others desiring to bring their wares to the attention of the classes to whose interests the paper is devoted within the field mentioned above, the BREEDER AND SPORTSMAN will be found indispensable.

Harpers Weekly

Six Months, 26 Copies, Regular Price $2.50

At no time has it been so evident to Americans as now, that the most important thing in the lives of all of us is the progress of the European War.

Next to your daily bread the war interests you most vitally. It may even come to be the most important part of your problem of living.

The periodical of greatest fundamental interest to you today is the one that can best report those phases of the war that come closest to your country and you.

Because of connections abroad and at home, HARPER'S WEEKLY is that publication.

As a critical commentary that presents inside facts, it is the necessary bridge for intelligent readers between the daily newspaper and the monthly review.

You want HARPER'S WEEKLY now. You can get it now on trial at a remarkable reduction.

Send $3.25 Now and Get Them Both

THIS OFFER is made to all who will send us $3.25 before January 31st, 1916, whether for extension of subscription, renewal of subscription or a new subscription. Address:

1915 Now for 1916

Get ready now—do not wait until spring is upon you. It will pay you to be sure and safe in treating your horse.

The experience of the most successful trainers all favor Save-The-Horse, because no other known remedy so perfectly and permanently cures;—the cure made with Save-The-Horse stands every test.

Procrastination is dangerous. Write today for our 96 page Save-The-Horse Book. Remember, it will cost you nothing—describe your case and you will get a prompt reply.

Every bottle is sold with a binding contract to refund money or cure any case of Bone andBog Spavin, Thoroughpin, Ringbone (except low), Curb, Splint, Capped Hock, Wind-Puff, Shoe Boil, Broken Down, Injured Tendon and Other Lameness. Horse works as usual. Winter or Summer.

TROY CHEMICAL CO., BINGHAMTON, N. Y.

D. E. NEWELL, Agent, 80 Bayo Vista Ave., OAKLAND, CAL.

SAVE-THE-HORSE is sold with Contract by Druggists and Dealers Everywhere or we send prepaid on receipt of price.

SPOHN'S DISTEMPER COMPOUND TRADE MARK

TRAINING DISTEMPER.

Ever hear of this? Yes, of course you did, but under different name. You have seen it in cases where the horse was "overtrained," worked a little too fast and regular. The nervous system gets the shock, after the voluntary muscular system has been taxed too heavily. The trouble starts in the mucous surfaces and the digestive apparatus, too, must then be impaired. He begins to cough when the glands are materially affected.

"SPOHNS" is your true salvation. It restores the appetite and normal functions of the whole system. The action in such cases is remarkably rapid and sure for recovery when you use this remedy according to instructions with each bottle. Only 50c and $1 a bottle; $5 and $10 a dozen. Sold by all druggists, horse goods houses, or express prepaid by manufacturers.

SPOHN MEDICAL CO., Chemists and Bacteriologists, Goshen, Ind., U. S. A.

Makes Them Sound **SMITH'S WONDER WORKER** Keeps Them Sound

Allays fever and inflammation at once, this must be done to effect a cure. UNEXCELLED AS A REMEDY for bone and bog spavins, curbs, splints, ringbones, capped hocks, shoe boils, wind puffs, thoroughpins and bunches of all kinds, bowed, strained and ruptured tendons, shoulder, hip and stifle lameness, weak joints, sweeny, cording up, throat trouble and rheumatism. Relieves pains and soreness without loss of hair or a day's let up. As a leg and body wash it has no equal, invigorates and restores the distressed horse between heats and after hard workouts.

Price $2.00 per bottle, prepaid on receipt of price. $16.00 per doz.; $10.00 per gal.

W. E. DETELS, Pleasanton Cal., Distributing Agent, for the Pacific Coast.

GUNCRAFT

By W. A. Bruette

A modern treatise on guns, gun fitting, ammunition, wing and trap shooting.

The theoretical side of the subject has been covered with a scientific accuracy which makes it an up-to-date book of reference, and the practical side of wing shooting, gun fitting, the master eye, defects in vision and other important questions have been treated in a way that will enable either the expert or the amateur to determine if he is shooting with a gun that fits him and how to decide upon one that does. It will enable him to ascertain why he misses some shots and is successful with others. The secrets of success in trap shooting, as well as the peculiarities in flight of the quail, the jacksnipe, the woodcock, the ruffed grouse, and the duck family, are illustrated by drawings and described in a way that will facilitate the amateur in mastering the art of wing shooting.

Cartridge board cover, $1.00; Cloth, $1.50

BREEDER & SPORTSMAN,

Third Edition Within One Year of Publication.

CARE AND TRAINING OF TROTTERS AND PACERS

NEVER before in the history of the publishing world has a horse book gone into a third edition within one year of publication. Yet the explanation is simple—the book fills a long-felt want.

Never before has this subject been treated in a distinct manner. It has been handled in connection with autobiographies of trainers, but such works are out of print or out of date, for they were published 20 years or more ago. Conditions and methods have changed since then, and former treatises are just as much out of date as the high-wheel sulkies then in vogue.

"Care and Training of Trotters and Pacers" is as modern as a 42-centimeter gun. It does not contain the ideas of one man, but of 100 of the leading horsemen of the day, including Thomas W. Murphy, Walter R. Cox, and Edward F. Geers. These ideas were converted into book form by two prominent American turf journalists.

This book enables anyone to do his own caretaking and training until it is time to send the colt to a professional trainer, or the owner can train and race the colt himself. The treatise covers the details of a colt's life from the moment it is foaled until after its first year's campaign. The facts are clearly presented. Nothing is left to guess work. The language is lucid. Both theoretical and practical views are outlined and compared. The instructions are concise and easily understood. The work contains no advertisements—it is not a catch-penny publication that looks big in the advertisement but proves disappointing when received.

Many professional trainers have purchased the book and have found it interesting. Despite the war, over 300 copies have been sold in Europe and Australia.

Price $1.00 postpaid. Cloth, illustrated, 176 pages, 5x7 inches.

THE OFFICIAL HIGH AMATEUR AVERAGE

FOR THE YEAR 1915

WAS WON BY MR. WOOLFOLK HENDERSON, OF LEXINGTON, KY., USING

Peters SHELLS

He Shot at 2800 Registered Targets, Broke 2731; Percentage .9753

THE HIGHEST YEARLY AMATEUR AVERAGE ON RECORD.

The wonderful record of Mr. Henderson in 1914, when he won the Four great amateur honors, is still fresh in the minds of the shooting fraternity. In that year he captured the Grand American Handicap, the Single Target and Double Target Championships of the United States and the High Amateur Average. His performance in 1915 is therefore but the continuation of a marvelous and thoroughly consistent record, made possible by ammunition of superlative quality.

PETERS SHELLS have been used by the winner of the United States Hight Amateur Average (official) FIVE OUT OF THE PAST SIX YEARS

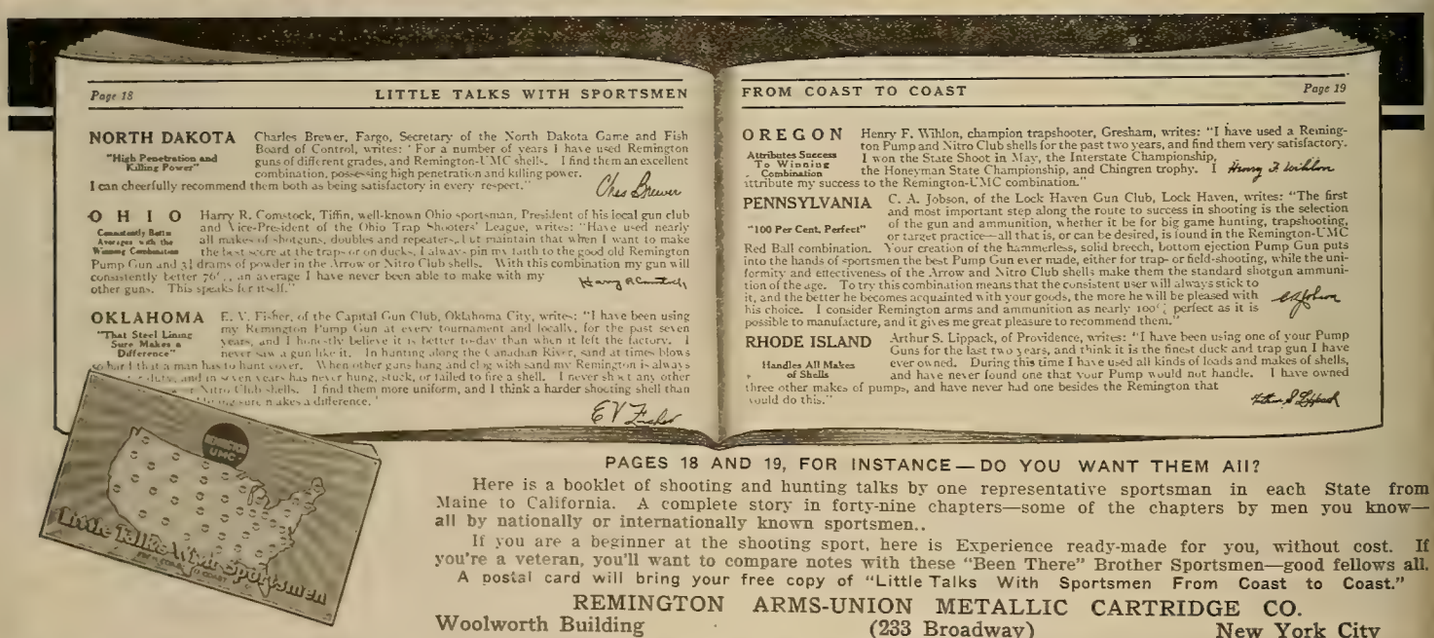
THE PETERS CARTRIDGE CO., Pacific Coast Branch, 583-585 Howard Street, San Francisco, Cal.

The Big Winner In 1915

The Interstate Association's Official High Professional Average for the season of 1915 was won by Charles G. Spencer, of St. Louis, Mo., with the marvelous record of 97.5% for 5620 targets. Such an average for such a large number of targets not only shows Mr. Spencer's great skill, but also proves the uniform and unequalled quality of

WINCHESTER

LOADED SHELLS AND SHOTGUNS



which Mr. Spencer used exclusively. It was this same combination that he used when he made his marvelous straight run of 565 targets—the World's Record.

Contests for the Season's Trapshooting Averages have been held 16 times and 12 of them have been won by W shells or guns, or both, which is undeniable evidence of their superiority.

Lester German, of Aberdeen, Md., who was second high for the season, and who also made the greatest score of the year for a single tournament—499 x 500—used Winchester shells in performing this great feat.

J. Mownell Hawkins, of Baltimore, Md., shot 7,265 targets in competition during 1915, and made the splendid average of 95.56%, using Winchester shells and shotguns exclusively—more proof of their uniform shooting qualities. These performances show the reason why Winchester shells and guns are

PREFERRED AND USED BY MEN OF ACHIEVEMENT

Page 18 LITTLE TALKS WITH SPORTSMEN

NORTH DAKOTA "High Penetration and Killing Power" Charles Brewer, Fargo, Secretary of the North Dakota Game and Fish Board of Control, writes: "For a number of years I have used Remington guns of different grades, and Remington-UMC shells. I find them an excellent combination, possessing high penetration and killing power. I can cheerfully recommend them both as being satisfactory in every respect." Chas Brewer

OHIO Constantly Betts Averages with the Winning Combination Harry R. Comstock, Tiffin, well-known Ohio sportsman, President of his local gun club and Vice-President of the Ohio Trap Shooters' League, writes: "Have used nearly all makes of shotguns, doubles and repeaters, but maintain that when I want to make the best score at the traps or on ducks, I always pin my faith to the good old Remington Pump Gun and 3¼ drams of powder in the Arrow or Nitro Club shells. With this combination my gun will consistently better 76', an average I have never been able to make with my other guns. This speaks for itself." Harry R Comstock

OKLAHOMA "That Steel Lining Sure Makes a Difference" E. V. Fisher, of the Capital Gun Club, Oklahoma City, writes: "I have been using my Remington Pump Gun at every tournament and locally, for the past seven years, and I honestly believe it is better to-day than when it left the factory. I never saw a gun like it. In hunting along the Canadian River, sand at times blows so bad that a man has to hunt cover. When other guns hang and clog with sand my Remington is always [illegible] and in seven years has never hung, stuck, or failed to fire a shell. I never shot any other [illegible] Nitro Club shells. I find them more uniform, and I think a harder shooting shell than [illegible] makes a difference." E V Fisher

FROM COAST TO COAST Page 19

OREGON Attributes Success To Winning Combination Henry F. Wihlon, champion trapshooter, Gresham, writes: "I have used a Remington Pump and Nitro Club shells for the past two years, and find them very satisfactory. I won the State Shoot in May, the Interstate Championship, the Honeyman State Championship, and Chingren trophy. I attribute my success to the Remington-UMC combination." Henry F Wihlon

PENNSYLVANIA "100 Per Cent. Perfect" C. A. Jobson, of the Lock Haven Gun Club, Lock Haven, writes: "The first and most important step along the route to success in shooting is the selection of the gun and ammunition, whether it be for big game hunting, trapshooting, or target practice—all that is, or can be desired, is found in the Remington-UMC Red Ball combination. Your creation of the hammerless, solid breech, bottom ejection Pump Gun puts into the hands of sportsmen the best Pump Gun ever made, either for trap- or field-shooting, while the uniformity and effectiveness of the Arrow and Nitro Club shells make them the standard shotgun ammunition of the age. To try this combination means that the consistent user will always stick to it, and the better he becomes acquainted with your goods, the more he will be pleased with his choice. I consider Remington arms and ammunition as nearly 100% perfect as it is possible to manufacture, and it gives me great pleasure to recommend them." C A Jobson

RHODE ISLAND Handles All Makes of Shells Arthur S. Lippack, of Providence, writes: "I have been using one of your Pump Guns for the last two years, and think it is the finest duck and trap gun I have ever owned. During this time I have used all kinds of loads and makes of shells, and have never found one that your Pump would not handle. I have owned three other makes of pumps, and have never had one besides the Remington that would do this." Arthur S Lippack

PAGES 18 AND 19, FOR INSTANCE—DO YOU WANT THEM All?

Here is a booklet of shooting and hunting talks by one representative sportsman in each State from Maine to California. A complete story in forty-nine chapters—some of the chapters by men you know—all by nationally or internationally known sportsmen..

If you are a beginner at the shooting sport, here is Experience ready-made for you, without cost. If you're a veteran, you'll want to compare notes with these "Been There" Brother Sportsmen—good fellows all.

A postal card will bring your free copy of "Little Talks With Sportsmen From Coast to Coast."

—TRAINING THE HOUND—

A PRACTICAL TREATISE ON THE TRAINING OF FOX HOUNDS, BEAGLES, AND COON HOUNDS.

The system of training advocated is simple and effective, so that anyone who carries out instructions can easily develop a foxhound, a beagle or a coon dog to the highest state of usefulness or organize a pack in which each hound will work independently and at the same time harmoniously with the others. The subjects are: The Hound's Ancestry, History, Instinctive Tendencies, English and Native Hounds, Developing the Intelligence, Training the Foxhound, Voices and Pace of the Hound, Qualities of Scent, Manners, Training the Coon Dog, Coon Hunting, Training the Beagle, Forming a Pack, Field Trial Handling, Faults and Vices, Conditioning, Selecting and Rearing Puppies. Kennels and Yards, Diseases of Hounds and Their Treatment. The chapters on field trial training and handling are alone worth the price of the book, which is one that every man who loves the voice of a hound should read.

The book contains 224 pages, is clearly printed, nicely bound, and handsomely illustrated with bloodhounds, various types of English and American foxhounds, beagles and cross-bred dogs for 'possum and coon hunting.

Price, in heavy paper cover, $1; $1.50, postpaid.

600 for Two-Year-Old Trotters.
25 to the Nominator of the Dam on whose Original Entry is named the Winner of Two-Year-Old Trot.
50 to Owner of Stallion, Sire of Winner of Three-Year-Old Trot when Mare was bred.

$700 for Three-Year-Old Pacers.
50 to the Nominator of the Dam on whose Original Entry is named the Winner of Three-Year-Old Pace.
400 for Two-Year-Old Pacers.
25 to the Nominator of the Dam on whose Original Entry is named the Winner of Two-Year-Old Pace.
50 to Owner of Stallion, Sire of Winner of Three-Year-Old Pace when Mare was bred.

SPECIAL CASH PRIZES FOR STALLION OWNERS.
Given to Owners of Stallions standing highest in number of Mares nominated in this Stake that were bred to their respective horses, divided as follows:
FIRST PRIZE, $35; SECOND PRIZE, $15.

The Above Prizes will be Paid on February 20th, 1916

ENTRANCE AND PAYMENTS—$2 to nominate mare on February 1, 1916; when name, color, description of mare and stallion bred to must be given; $5 August 1, 1916; $10 on Yearlings January 1, 1917; $10 on Two-Year-Olds January 1, 1918; $10 on Three-Year-Olds January 1, 1919.

STARTING PAYMENTS.—$25 to start in the Two-Year-Old Pace; $35 to start in the Two-Year-Old Trot; $35 to start in the Three-Year-Old Pace; $50 to start in the Three-Year-Old Trot. All Starting Payments to be made ten days before the first day of the meeting at which the race is to take place.

Nominators must designate when making payments to start whether the horse entered is a Trotter or Pacer.

Colts that start at Two Years Old are not barred from starting again in the Three-Year-Old Divisions.

CONDITIONS:

The races for Two-Year-Olds will be mile heats, 2 in 3, not to exceed three heats, and if not decided in two heats, will be finished at the end of the third heat and money divided according to rank in the summary; and for Three-Year-Olds—three heats, money divided 25 per cent to the first heat, 25 per cent to the second heat, 25 per cent to the third heat, and 25 per cent to the race according to rank in the summary. Money in each division 50, 25, 15 and 10 per cent. Should two or more horses be tied for first place at the completion of the third heat, such horses only shall contest in a fourth heat and money divided according to rank in the summary at the termination of that heat. A horse having won the first two heats and drawn or distanced in the third heat shall not lose position in the summary. Distance for Two-Year-Olds, 150 yards; for Three-Year-Olds, 100 yards.

If a mare proves barren or slips or has a dead foal or twins; or if either the mare or foal dies before January 1, 1917, her nominator may sell or transfer his nomination or substitute another mare or foal, regardless of ownership; but there will be no return of a payment, nor will any entry be liable for more than amount paid in or contracted for. In entries, the name, color and pedigree of mare must be given; also the name of the horse to which she was bred in 1915.

Entries must be accompanied by entrance fee.

Nominators liable only for amounts paid in. Failure to make any payment forfeits all previous payments. This Association is liable for $3000, the amount of the guarantee, only.

Hopples will be barred in trotting and pacing divisions.

Right reserved to declare off or reopen these Stakes in case the number of entries received is not satisfactory to the Board of Directors.

Money divided in each division of the Stake 50, 25, 15 and 10 per cent. There will be no more moneys in each division or heat than there are starters.

Entries open to the world. Membership not required to enter; but no horses, wherever owned, will be allowed to start until the owner has become a member.

REATER LOVE HATH NO MAN THAN THIS."

Down in the heart of the Potrero, the name by hich is known the major portion of the industrial d manufacturing settlement of San Francisco's eat south side, there lived until a few days ago a laint little wisp of a man in whose heart were stilled in generous quantities true attributes of eatness and nobility. Who he was or whence he me was known to none, but some mother bore m, and loved him, and taught him well in childood; to what heights he had at some time attained aspired cannot be said, and the years, in their ssing, had robbed him not only of physical strength d mental power but had stripped him of identity well. For years he had lived in a tumble-down tle shack and eked out a precarious existence at d jobs at whitewashing, owning a rickety cart and equally rickety mule, sharing, with the latter, such elter as he possessed. To the community at large was known only as Old Jimmy Allaround, and his ule as Jimmy Whiskers.

Day in and day out, uncomplaining and uncomained against, the decrepit old-time partners waged unequal battle against the world around them. most people theirs would seem an existence of ualid misery, but such is far from being true, for to the depths where they made their daily rounds ere pierced a warm and cheering ray that made e beautiful—the ray of love and human kindliness. ily when their work was done, or on the many, any days when there was no work for them to do, ere assembled to worship at their shrine the chilen of the neighborhood. These brought with them ferings of potato peelings, and apple cores, and rnip and carrot scraps, and such things dear to the opetite of any normal mule, and while Jimmy Whisers contentedly munched these tidbits and stood by ith drooping ears and drowsy eyes, Old Jimmy Allround took the children with him to another world, e world of the fairies where all is bright and cheery d where the drudgeries and miseries of human life ay not intrude. Wondrous were the tales he told ese fascinated listeners, and more wondrous were e "conjur" tricks performed before their very eyes, reatest of evidence that their old friend was truly league with the "little people," and hence far more an mortal man.

So the two Jimmies grew old and yet older toether, the human Jimmy caring for his humble artner and servant with pitiable, but beautiful, solicude. At last, not many nights ago, there came a orm of unusual severity, and the wind whistled rough the cracks of the old shack and the cold in beat down in torrents that neither roof nor wall ould turn aside, and Old Jimmy Allaround, in dire istress lest Jimmy Whiskers might come to harm, rose from his bunk and tied around the body of his omrade, snug as could be, the only bit of bedlothing that the pair possessed, a tattered quilt. hen down again he laid his own weazened, unprocted old body, and as he dodged the invading eleents as best he might his heart grew warm at the ought of Jimmy Whiskers, snug and sheltered, hile the cold crept deeper and deeper into the very arrow of his own bones and the storm grew fiercer nd fiercer.

Many hours afterward, when the storm had passed nd the sun had come to brighten the world again, ame some children to see how their old friends had eathered the gale. There in the room they found immy Whiskers, so hungry that he had gnawed the acks of a couple of rickety chairs, but still alive and ith the comfort still wrapped securely about him—but the spirit of Old Jimmy Allaround had flown; and because the latter was beyond the reach of human ministrations, they took Jimmy Whiskers and treated him to a banquet such as he had seldom known.

Somehow, I don't like to say to myself that Old Jimmy Allaround died of cold and exposure. Heaven and hell and God don't play very big parts in the horse business, I know, but there must be a God, and there may be a hell, and there has to be a heaven, or else what would become of the sweet spirits of all the myriad mothers of men? It seems to me that the Lord and the major angels must have been looking down at the world as it turned below them that stormy night, and when the war-rent portion passed before them their faces must have been sad and worn; perhaps they brightened when peaceful America came beneath their eyes, though they must have regretted the wild scramble that so many of us are making to get rich at the expense of the other side of the world; I like to think that when Old Jimmy Allaround's shack came into view the worn looks passed away entirely, and only love and compassion shone out. It seems to me that they must all have smiled and conferred for a moment in lowered, loving tones, and then the Lord must just have reached down a kindly hand and beckoned for Old Jimmy Allaround to come up with him—and Jimmy, without pain or suffering or travail of body or spirit just answered the call and went "home."

That's the way I like to think of it—don't you?

EXCELLENT OUTLOOK FOR DRAFT HORSES.

There is no keener student of the draft horse situation in the United States than Secretary Wayne Dinsmore of the Percheron Society of America, and trade reviews emanating from that office over his signature may safely be accorded the greatest consideration and respect, as they invariably prove to be plain statements of fact based upon authentic information of a very comprehensive nature. In view of the approaching second annual sale of the California Draft Horse Breeders' Association, to be held on Wednesday, February second, at the University Farm at Davis, we were just preparing a little sketch of what the future holds in store for the producer of horses of this class when a letter from Mr. Dinsmore came to hand, containing a review of the situation and some of the "whys" of the draft horse business; the whole matter is so much to the point that we take a great deal of pleasure in reproducing the same herewith, with thanks to the writer. Before beginning the perusal of Mr. Dinsmore's welcome contribution, allow us to remind you of the benefits accruing to California draft horse breeders from the extensive patronage of this sale, of which E. W. Westgate, Rio Vista, is the secretary, the same having been emphasized in previous notes on this page. Make your entries early, in order to allow proper time for advertising and cataloging, and then see that your stuff goes to the sale ring in the pink of condition. Now for Mr. Dinsmore's summing up of the situation:

1916 ushers in what promises to be one of the most favorable seasons horse breeders have ever faced. Draft horse producers have especial reason to feel optimistic. The marked improvement in the industrial world has brought transportation facilities again into active service and all transportation agencies,—railroads, motors, and teams,—are being used more freely than for two years past. Draft geldings have been in good demand at higher prices, and the farm demand for useful draft mares is already so strong that horse dealers are being eliminated as buyers of good draft mares.

Pure bred draft horses are also in keen demand. The elimination of imports since August 1914 have resulted in a marked stimulus to horse breeding in this country, and more satisfactory prices have been paid to the breeders and raisers of good American bred draft colts than at any time in our past history.

The total number of horses on farms, April 1st, 1910, was 19,833,113 head, and the Government estimates for Jan. 1st, 1915, credited this country with 21,195,000 head—an increase of 6.86% over 1910.

The fifteen states on which we have definite data as to stallions in service are Illinois, Iowa, Kansas, Nebraska, Wisconsin, Minnesota, North and South Dakota, Michigan, Pennsylvania, New Jersey, California, Washington, Oregon and Montana. These states had, January 1st, 1915, a total of approximately 11,085,352 horses, assuming the same rate of increase for these states as for the United States as a whole. They also had, according to the latest available Stallion Board reports, 47,697 stallions, all told, in service, 23,671 of which were pure bred draft stallions.

If this proportion holds good throughout the United States, it would give us a total of 91,357 stallions in service, approximately half of which could be classed as pure bred drafters. As a matter of fact, however, the number is probably somewhat less, as all the important horse producing states, except Indiana, Ohio and Texas, are included in our figures and the proportion of stallions in use in other states is unquestionably lower, as less attention is given there to horse production. Assuming, for the sake of argument, that these percentages hold good, however, we have about 40,000 pure bred draft stallions and approximately the same number of stallions of other kinds, most of which are grades and mongrels. Any well informed horse breeder will admit that at least ten per cent of the stallions in service are annually being retired because of age, death, unsoundness, or other cause, and it therefore follows that about 8,000 stallions are annually being retired from the breeding ranks. To make good on wastage alone, therefore, we must replace 4,,000 pure bred draft stallions annually, and as the other stallions, grade and otherwise, should for the most part be replaced by pure bred draft sires, we actually need around seven thousand good draft sires annually to fill the places of horses dropping out of service.

During the fiscal years of the various draft horse record associations ending in 1915, approximately 12,000 American bred draft horses were recorded. This includes both sexes and all ages of Percherons, Clydesdales, Belgians, Shires, French Draft and Suffolks. Less than half of these were stallions, so that we are producing annually now less than 6,000 draft stallions. It is recognized by all horsemen that at least one-fifth of the stallions that are recorded are not good enough to be of any real service in improving the draft horse stock of the country. It therefore follows that we are really producing less than five thousand good pure bred draft sires annually, when we need at least 7,000 per year, at the lowest calculation.

Aside from the foregoing considerations, there are other factors which augur well for the draft horse industry. High priced land and labor have led our farmers to study methods of reducing costs in farm work. The advantages draft horses have over light horses in farm work are numerous. The tractive power horses can exert is governed by weight, strength and temperament. Under extraordinary pressure horses can exert from four to six horse power, but under conditions of daily work exert a pull which is about one-tenth of their working weight. The horse power traction required to move farm implements depends on the soil, climatic conditions, and the condition of implements used. Under favorable conditions five draft horses weighing 1600 pounds or over will pull a two plow gang of 14 inch plows a little more than twenty miles, averaging from five to five and a half acres per day. It will take seven horses that weigh from 1100 to 1300 pounds to do the same work, and it is not practicable to work seven horses on one gang plow with the ordinary class of farm labor. It will therefore require two men on single plows, one with four and the other with three light horses, to do the same amount of work that one man will do with five draft horses. The same general ruling applies in seeding, discing and harvesting, for while one man can readily handle five draft horses on the implements needed, he cannot advantageously nor safely use enough more light horses to give his equivalent power. The use of draft horses therefore increases the amount of work one man can do in the field; and in actual practice the work is better done when drafters are used. When to this we add the fact that less barn room is needed, and less labor required in handling the heavy horses, than is necessary where enough more light horses are used to make up equivalent power, the advantage becomes marked.

Besides this, the heavy horses sell more readily and at higher prices, when surplus is to be sold. Light weight horses have been bought at prices ranging from $110 to $150, while draft horses have brought from $200 to $300 each. This is an important factor, for every well managed farm has a few surplus horses to sell annually, and the readier the sale, and higher prices realized for draft stock, are factors which must appeal strongly to all thinking farmers. Maximum cash returns are what we are all interested in, and this we obtain from drafters used in farm work.

These are facts which thinking farmers will ponder well. Horse buyers have scoured the United States as never before. More than half a million horses and over one hundred thousand mules have gone for war purposes. Demands from abroad will continue as long as the war lasts, and will be strong for years afterward, for the battling nations must call on us for horses for industrial purposes. Country sales already reflect the feeling of conservative farmers, who are reported good buyers at strong prices, on first class mares weighing 1600 pounds or over, whether grade or pure bred.

The recent cable from President Aveline, Percheron Society of France, that the Government there has agreed to allow the exportation of two hundred stallions, foaled in 1912 or earlier, only serves to emphasize the extent to which war has curtailed supplies abroad.

Good blood and liberal feeding will pay better in draft horses than in any other class of stock, always providing that a man buys no more mares than he needs in his farm operations, and exercises good management—essential to success in any line.

A Visit with the Los Angeles Horsemen

CONTINUED FROM LAST WEEK

Last week we took the readers of the Breeder and Sportsman with us and paid a visit to the stables of a number of the trainers who are wintering at Exposition Park at Los Angeles, but night and the limitations of space overtook us before we had much more than gotten half way around the place, so we will start in again this morning and see if we can "do" the balance of the sights.

* * * *

J. W. Cooper, who handled the Borden horses up in the San Francisco neighborhood a few seasons ago, is stabled in the barn next to the grandstand, handling mostly matinee horses belonging to local drivers and breaking some youngsters for L. J. Christopher. The four-year-old bay mare Caroline Holt, owned by Frank Orr, has been worked only about six weeks but she has a nice way of trotting and looks like a good prospect, having learned even in this short time to trot in 2:35 with quarters in :36. She is by Beirne Holt 2:11¼, the son of Cochato that Fred Ward developed and sold to good advantage a few years back, and her dam is a daughter of McKinney. W. L. Thomas has a pretty nifty matinee pacer in the Cooper Stable, the black horse Zomack by Zolock out of a Zombro mare. He is a husky, rugged fellow and has a fun record of 2:16, while he has turned quarters at the 1:56 gait.

Reminiscent of the short grass country is the pedigree of the big fellow that heads the Christopher stable—the black gelding Alaca by Symboleer 2:09½, out of a mare by Young Joe 2:18. As might be gathered from the tone of his pedigree, Alaca is a side-wheeler and has a matinee mark of the 2:10 variety, while last season he worked the Los Angeles track in 2:08¼ with quarters in thirty seconds. Cooper has just recently taken him up again and he is in nice shape to get ready for another whirl with the boys. Before being gelded, Alaca was bred to a few mares, and two of the Christopher youngsters are by him, from mares by Redlac and Direcho respectively, while the third of the trio of two-year-olds that Cooper is just starting to break is a filly by Carlokin out of a James Madison dam.

* * * *

L. G. ("Lou") Baker, the former Illinois trainer who has made his home in California for the last year or so, has the south end of the stable along with Mr. Cooper and has his horses nicely quartered in freshly whitewashed stalls, with half screened doors and other similar little "kinks" that add to the attractiveness and serviceableness of a stable. At the time of my visit Lou had but one aged horse in the barn, the good trotter F. S. Whitney 2:09¾ (by F. S. Turner 2:24 and out of the great brood mare By Guy by Guy Wilkes 2:15¼), the lad that raced so well two years ago for Will Durfee. He is still owned by Sutherland and McKenzie of Orosi, and while not raced last season owing to the scarcity of fairs and meetings locally, he will be prepped for another campaign this year. He is taking his light work very nicely, and has made a very attractive horse. Two two-year-olds are getting their early lessons at Baker's hands, a trotting colt by Junior Dan Patch 2:05½, dam by Moses S. 2:19½, that is up to a three-minute gait at present, and a black pacing colt by Six Bells, dam by Zolock and grandam by Nutwood, that has had very little done with him but paced an eighth in eighteen seconds when but two weeks off pasture.

W. A. McKibben has a very promising baby pacer that Baker expects to begin handling in the near future, the two-year-old black filly Leta Patch by Junior Dan Patch out of Baby Wilkes by Roy Wilkes, and a couple of older mares have probably been added to the stable since my visit, as Lou was expecting them at any time. One is the mare Maggie N., that trotted last season for W. R. Murphy in 2:13¼, with halves in 1:05½, owned by C. H. Morgan, at present one of the city officials of Los Angeles, and the other is a five-year-old with less education, owned by the Los Angeles lumberman, Schepp. Both are daughters of W. G. Durfee's great son of McKinney, Carlokin 2:07½, Maggie N. being out of the dam of Bystander 2:07¼ while the Schepp mare is out of Lady Vasto (dam of Carsto (2) 2:22½) by Vasto. She was not trained last season but was handled a bit as a three-year-old and developed to a mile in 2:40.

Last season Lou developed what he believes to be one of the best green trotters in the west, the five-year-old stallion Zomrect by Zombro 2:11, out of Lilly S. trial 2:16 (dam of King Lilly Pointer 2:14, etc.) by Direct 2:05½, grandam Lilly Stanley 2:17½ by Whippleton. This fellow ran out in the hills with a number of other horses of both sexes and various breeds until last January, when Baker, then located at Riverside, took him up and broke him. He was a full five-year-old and had had absolutely nothing done with him, but in Baker's hands soon began to show indications of a desire to keep from trampling on his pedigree and to regulate his performances in accord with his blood lines. In March Lou drove him his first mile in three minutes, followed in the middle of June by his first one in 2:20. A little later on Baker moved to the mile track at Exposition Park, bringing the horse with him, and at the breeders' meeting there on October 19 gave him a time record of 2:12¼. The weather remained favorable for going ahead with the big fellow, and on November 5 he drove him in 2:10½ before letting up on him for the winter. Lou sent him home sound and in the best of shape, and he is now taking things easy at the establishment of his owner, J. J. Fitzgerald of Covina. He looks like a most excellent prospect for the coming season, and Mr. Fitzgerald will doubtless have him trained and raced, perhaps by Baker.

Lou is a sample of the bred in the bone horse lover who cannot stay away from the trotters. Back in the central west he raced those good halfmile track campaigners, Pert 2:10 and Marian 2:16¼, among others, and was for a time at the International 1:55 Farm of M. W. Savage, during the period that Ned McCarr was the major domo of that establishment. Some years ago he quit the trotters for a nice easy "inside" berth as assistant cashier of a suburban bank near Milwaukee, but the confinement was too much for his health and the trotters "kept a-callin'," so back to the trotters he came, with the results that he has regained his health and has no cause to regret his return.

* * * *

Charley Parker, with Park Kelley as his right hand man, has only a pair of horses up at present, both trotters and both in nice shape. Alta Mac by Redlac 2:07½, who annexed a record of 2:19½ some time ago, has not been worked much of late but will be gotten ready for 1916, while the other member of the pair has just been let down. This is an eight-year-old bay mare by Limonero 2:15¾ out of Sona 2:16 by McKinney 2:11¼ and under the name of Cima was driven to a record of 2:22 by Park at the recent breeders' meeting of the Los Angeles Harness Horse Association. She is a nicely made mare and as she has fully matured without being knocked out by hard work she may make a fair sort to race this season. Anyway, Charley will probably give both of them a chance to show what they can do later on.

* * * *

N. G. Boyd of Long Beach bought a mare some years ago under circumstances that had a rather odd twist to them, the seller of the lady in question refusing, for reasons of his own, to furnish a pedigree with her but assuring Mr. Boyd that she was as well bred as the next one, and while the buyer never did succeed in finding out the true breeding he did convince himself that she was a well bred mare. He mated her with good stallions and the way the offspring have shown him speed is his guarantee that the vendor was not lying to him, as they all have had natural inclinations to make speed. Down at his home at Long Beach Mr. Boyd has two mares out of her, one by Zolock and the other by Zombro, that are both possessed of many excellent qualities, and at Exposition Park he has a pair of her produce in training that have shown their trotting inclinations very plainly. One is a three-year-old brown colt called Ben Beach, and as a two-year-old he negotiated the local course in 2:26½, with halves in 1:11½ and shorter fractional parts of the route at a still brisker gait. He is a nice tempered lad with a good head and an honest way of acting at all times, a son of J. H. Torrey's speed sire Baronteer Todd 2:09¼. The other member of the old mare's family is the black mare June Bug, now seven years old and a well developed trotter. She is a daughter of Zombro, which is self-evident explanation as to the source of a certain portion of her trotting inclinations, and has worked the Los Angeles track in 2:12¾, with halves in 1:04½, quarters in :31½ and eighths in :14½. She can go the route and repeat, too, judging from a recent workout, as one day during the month of December, just passed, Mr. Boyd gave her five heats better than 2:16, four of them below 2:14, which is speed and stamina of an amount sufficient to win quite a bit of money in certain parts of the country.

* * * *

Henry Peterson has only three head in his stable at present, but as one of them is a season champion for 1915 and the other two are by the same sire out of good mares, "he should worry." Bon Courage, who was the boss two-year-old trotting gelding of 1913 and the best four-year-old gelding of that gait last season, has put on a little flesh since coming home from the exposition and looks very fit to prepare for a campaign this season. Last year he was not taken in hand until fairly late but made speed very nicely toward the end of the season and was driven to his record by his old trainer and driver, the late Ted Hayes. Here at the exposition everything in the world was against a trotter of his likes and dislikes making any sort of a showing, but he drew down several hundred dollars at that. He was a light made sort as a colt and has not yet matured into a really "husky" fellow, but he had a lot of lick and always had the strength to carry it. He is the kind that a bit of age should benefit greatly, and his most useful season still lies before him, in the writer's estimation. Bon Bell, a year older than the champ, is a brown gelding by Bon McKinney and out of a mighty good mare, School Bell 2:16¼ by Prodigal, School Bell being the dam of Charley McCarty's trotting stallion George Hammett (3) 2:15¼, that trotted the Pleasanton track later in life in 2:08¼, or thereabouts. Contrary to what might at first glance be expected, Bon Bell is a pacer and apparently the making of a pretty handy one, as he trialed for Henry as a four-year-old in 2:13. The third of the Bon McKinneys is a snappy scamp of a yearling belonging to Dr. Dodge. He has not been weaned many weeks and is just beginning to get somewhere near bridle wise, but has reeled off an eighth in twenty-seven seconds at the trot.

* * * *

Railey Macey, with about the same bunch of good boys that he brought to the country with him when he came out from Minneapolis last spring, has the ten head composing the International 1:55 Stable in excellent condition, the greater portion of them carrying faster records than those appearing with their names at the time they left home. The Savage stable has had hard luck in great gobs come its way here in California, but no kick has been made by either owner or trainer, as bum luck is all part of the game, to be taken by good sportsmen as it comes. There is an old saying to the effect that the higher the hills are the deeper the valleys will be, so when they once more begin getting a fair break on this luck business, the Savage horses will more than make up for this off season. At that, with all the things they had to buck, the stable might have fared far worse, and as the horses and the men connected with them have made a host of western friends for Dan Patch and the International establishment in general, the journey lacks a whole lot of having been made in vain.

Dazzle Patch 2:09¾, the horse that Ned McCarr always claimed was endowed with all the natural inclinations that make a successful clown or contortionist, has had practically nothing but very light jogging ever since the vets announced last spring that a year's let-up was necessary to get him into shape to train again. No fresh filled jug was ever fuller of vinegar than this fellow, and in a stall or paddock he is always trying some new stunt, being so everlastingly at it that a padded stall is the only thing in which he can be kept with safety. He goes through so many different kinds of acrobatics that it has always been a question as to whether his front fin was injured on the track or in the stall. Sure it is that by nature he is one of the fastest horses ever foaled, and every effort is being made to get him in shape to send for one good record, even if he never stands racing. His record is only 2:09¾, but authentic trials in 2:02½ and one halfmile flight in :56¾ give a pretty fair idea of what is to be expected of him at any time that he gets to the point where Macey says he will do to turn for the word.

Electric Patch (3) 2:09¼ that made such a nice campaign for Macey in the three-year-old classes down in the central west in 1914 and who, save for

ne accident that spilled his driver in the big stake t the fall meeting at the exposition, would certainly ave claimed a part of the big twenty thousand dolar purse, is wintering in excellent shape and should ake a good trotter in his class this season. After Macey was turned out of the sulky at San Francisco he horse trotted on without a break, with one line rrapped in a wheel and locking it, so that he was ot only trotting with a strong pull on one side of is mouth but also dragging the bike—pretty good vidence of real race horse quality. After that he ame on and was barely behind the cash division in oth the following heats, while later in the meeting e trotted a nice race with Peter Scott, Albaloma nd Virginia Barnette, finishing ahead of the star of he Durfee stable in two out of the three heats. He s a horse of a good deal of front action at the trot, nd as he is one of the oiliest gaited pacers imagin.ble when shod for that way of going there has been ome talk of allowing him to turn over to the pace, ut not for the present. He worked the Los Angeles rack last summer in 2:06¾.

The trip to California resulted, among other things, n the development of the fastest member of the Dan 'atch family to this date, the husky bay pacer 'ower Patch 2:03½ who came out with a record of nly 2:09¼. Power has the advantage of the other ast members of the tribe by a matter of nearly two econds, and Macey is very optimistic over the pros- ect for his making a high class race horse, as he as all the natural qualifications that go with "class" n a campaigner. His dam, Effie Powers 2:08¼, was ne of the gamest mares ever raced in this country, nd this one of her sons is a big sturdy fellow, good eaded and sound and right now a good age for hard sage, this being his sixth year. Princess Patch :06¾ is one of the band that failed to take kindly o the change to California for some reason, and ardly developed as much whizz here as she has reviously had back in the central west. She is oing very well, however, and Railey thinks she will e pretty useful where he is going this season, as he will be eligible to about the 2:13 class.

Jean Arion 2:08¾, who is the especial favorite of Harold Savage and who trotted second to Maymack n the amateur free-for-all at the spring meeting for hat clever young teamster, was doing so nicely late in the summer that Macey expected to lower the Arion family record with her, and just as she was about ready for the trip against the watch the season jinx overtook her and she had to be let up on. Whether or not she will be raced this season I am not aware, but she will be bred this spring to Electric Patch, and should make a brood mare of renown. Mary E. Patch, the other trotting mare of the stable, cut her record from 2:17¼ to 2:12¾ at the record meeting in October, and it is probable that she too will join the brood mare ranks, it being the present intention to send her to the Blue Grass to be mated with J. Malcolm Forbes 2:08, the son of Bingen whose youngsters have made such rapid strides into the limelight in the past season.

Buzz Patch, who reached out and grabbed a nice new record of 2:09½ for herself some weeks ago, is getting over the extreme nervousness that used to be her greatest fault, and has quieted down to such an extent that the goat who has previously kept her stable company is being "weaned away from her" gradually, and Buzz doesn't seem to mind. Drift Patch and Agnes Patch, both three-year-olds in 1915, now adorn the 2:10 list, the former in flat figures and the filly in time half a second faster, and are a nice pair for their age. Agnes won the three-year-old pace at the spring meeting at the exposition very handily and her subsequent performance shows that she has the speed of that field by several seconds. The last member of the string, the two-year-old filly Judith Patch, now three, of course, has always been my personal favorite of the stable for some reason, and I was pleased to learn that she suffered no lasting ailment as the result of the nail she picked up in her race at the exposition, where she took her first record of 2:25, a mark that she has since reduced to 2:21¼. Nothing but running that spike into her foot prevented her from getting a win race record in her very first start, and if she gets any sort of an even break in the future I believe that she will make a very high class mare. She is a perfect little lady in harness or out and is making a very nice growth, and if there is anything in breeding, individuality and natural inclinations she ought to do. She is the first performer to the credit of Dazzle Patch 2:09¾ and her dam is the fastest daughter of the great pacing sire, Hal B.—Hal Raven 2:03¾.

Macey and his boys have caught the gardening fever from the Durfee outfit and at the time of my visit were getting things well under way to add to the attractiveness of their surroundings by the growing of a big bank of sweet peas and other flowers, a course that might well be followed by every stable at the park. Just where he will race has not been decided, but it will probably be down the Great Western Circuit and at the major western fairs, that being the farm's favorite route. Mr. Savage is expected to pay Los Angeles a visit along in March, and definite plans for the campaign will probably be made at that time.

* * * *

While all the Los Angeles colony find plenty to keep their time well occupied, the gentleman who puts up the one original and lifelike imitation of the busy little bee is none other than our old friend William George Durfee—that, is, when he works. Ever since the Pleasanton futurities were raced, Henry Atkinson has had a hard job keeping cases on the boss and getting much work out of him, for at the season's close Will declared himself for a rest, which most people who know him will concede that he had coming to him. The inclement weather that has graced Southern California ever since he and Mrs. Durfee returned home just before Christmas has prolonged the vacation, as speed making has been out of the question, and Will has confined his activities largely to getting things shaped up for the busy time that is coming when the weather settles, while the big stable of horses take their daily exercise at the hands of the capable men that Will always keeps around him. Including the new crop of yearlings there are over forty head of trotters and pacers now stabled in the Durfee stalls, ranging from the embryonic youngsters to the finished product, while the brood mares and stallions under shelter bring the total number close to the fifty mark or perhaps a trifle in excess of it.

While there is a story that goes with practically every horse in the barn, interest right at this moment centers in the little band that will in all probability compose the string that will go across the mountains this summer to try conclusions with the pick of the land on the Grand Circuit, a section of the land that the Durfee horses have not invaded since 1912. Some weeks ago Will announced his intention of making the trip with at least half a dozen of the speediest of his big stable, the six individuals meant being the trotters Virginia Barnette (3) 2:08¼, Esperanza (3) 2:09 and The Lark (4) 2:09½, and the pacers Clara Mac 2:04½, White Sox 2:05¼ and Contention B. (3) 2:10, the latter's Phoenix record of 2:08¼ being lost to him on a technicality. There may be some others to make the trip, but if this half dozen meet with no accident and keep coming as they should they are almost sure to make the journey.

Virginia Barnette, who enjoys the distinction of having been one of the very few trotters that won heats from the redoubtable Peter Scott during the season of 1915, is carrying more flesh than I ever saw on her frame before and is the picture of health, while her spirits if anything are just a trifle too high for comfort. If I owned this girl I would certainly try to learn horse language long enough to have a heart to heart talk with her in an effort to persuade her to resign her membership in the Exposition Park Suicide Club, if not for good and all at least until after her racing career is over. Last spring she ran away for miles over the paved streets, finally landing in an open sewer from which she was extricated through the combined efforts of some six or eight men, and then, after an enforced letup, came on and made a very creditable campaign. On the last day of my visit this trip she again tried the suicide route by running full tilt the length of her paddock, falling when she tried to turn and going clean through the fence. Aside from a few patches of hide knocked off in the scramble she seemed none the worse for the escapade, but it must be rather hard on the nerves of the owner to have a lass of her value indulging so regularly in tantrums of this kind. She is a bundle of nerve and muscle, with a head chock full of race, and as she is of the frail type that should improve greatly with a bit of maturity I look for her to be a contender in the hottest kind of com-

Entries to State Fair Futurity Number Eight, Foals of 1916

Never before in the history of colt stakes in California has so poor a patronage been accorded any event as that which fell to the lot of the State Fair Futurity Number Eight, entries to which closed on January first, nominations to the same appearing herewith. The scant entry list is most eloquent testimony to the condition of affairs in light harness circles in California at this moment, and the closing of the event meant facing a certain loss; however, at the recent meeting of the directors of the California State Agricultural Society it was the concensus of opinion that everything possible should be done by them to promote and safeguard the interests of harness horse breeders through this period of depression, confident that they will be more than repaid in the future for any losses incurred pending the improvement of conditions in this great industry. Every patron of the stake owes his thanks to the directors for this course, and every colt should be kept in to the moment that it proves its unfitness for early racing. Through the courtesy of Secretary C. W. Paine we present the following complete list of nominations:

OWNER.	MARE.	STALLION BRED TO.
J. N. Anderson	Della Derby by Chas. Derby	McDillon
I. L. Borden	Gold Lily by Copa de Oro	Expressive Mac
I. L. Borden	Cleopatra by Zolock	Barney Barnato
S. Christenson	Ella J. T. by Bob Mason	True Kinney
I. J. Cornett	Salinas Princess by Eugeneer	McDillon
I. J. Cornett	Malvina by Oh So	Vernon McKinney
S. H. Cowell	Hulda C. by Dexter Prince	Panama
S. H. Cowell	Dione II by Cupid	Peter McKlyo

pany. One of her knees filled a bit after coming home from the exposition but the ailment was purely temporary and yielded readily to treatment, so that she goes into her five-year-old form sound as ever and much huskier.

Esperanza and The Lark are also five-year-olds, and while the daughter of Carlokin and My Irene S. was something of a disappointment to her friends last season Durfee has full confidence in her and says to tag her for along about 2:05 this year. Last spring she took a decided dislike to the exposition track and never got to a point where she fancied it any too well, though performing much better at the fall meeting. Like Virginia, she starts her season's training in the very best of condition, and Mr. Durfee is pretty apt to know what he is talking about when he figures her as a 2:05 performer. The Lark, also by Carlokin and out of the dam of White Sox, is the handsomest individual of the three, and while she has a well developed turn of speed she has had very little racing and is eligible to the slow classes. Her four-year-old mark of 2:09½ is a breeder's record only, though she has a non-winning performance race record of 2:12¼ made last fall at Phoenix, where she went a couple of very nice races, driven once by Mr. Durfee and once by the stable's second trainer, Henry Atkinson.

Among the wigglers that are included in the first Grand Circuit plans the mainstay of the stable is White Sox 2:05¼, whose performances of the past season are too fresh in the minds of coast horsemen to need reviewing at this moment. The daughter of Del Coronado and Subito was let down right after the Arizona State Fair, where she won both her starts, pacing each mile of the last race in the same notch, 2:05¼, and at the time of my visit had not had the harness on her for some weeks, taking her daily exercise in a roomy paddock. Always a good doer, physically, she looks more rugged than ever and is clean and hard in leg and muscle. The proposed match between Sox and Hal Boy is arousing a good deal of interest and causing considerable comment, and while the preponderance of opinion favors the pony pacer, I for one cannot see that the Boy is going to have things all his way by a good deal, providing both stay sound and go to the post really fit for a race. Both Sox and the Boy are the kind that improve with a bit of racing, and I have it in my head that Sox is going to be a much better mare this year than ever before. Given the proposed match under equitable conditions of fitness on the part of each horse, date it well down the line at about Syracuse or the second meeting at Columbus, or at Lexington, and there will be a horse race as is a horse race.

Clara Mac, from the standpoint of physical condition, looks better than I ever saw her before, but she has not done quite as well for Will along speed making lines as might be wished. She had a pretty hard deal just before he secured her and it took her some time to round into shape, and she has never flattened properly to her gait. The best mile she had after coming to the Durfee stable was along around 2:04, and while this it not standing still by a good deal it was hardly as fast as her teamster expected to travel when he started on the journey. She improved for him along toward the close of the season, and by starting in on her pretty early Will believes he will get her squared away to a point where she will be formidable in the 2:06 classes, to which she is now eligible by time allowance. Once back at her old form she is a mare that should pace around 2:03 at least, perhaps a bit better.

Contention B., who rounds out the pacing brigade, has just turned the corner into his fifth year, and if he improves as he should he will be no slouch of a pacer for the moderate classes, his winrace record being 2:18¼, I believe. Like the other members of the stable that were raced last season, he has added some very welcome "mahogany" to his young bones since his return, and begins to look like a horse. He was a light built colt and will never mature into any giant, but age should bring him a considerable amount of strength, which has always been his greatest need. He has about as much lick as any man's pacer, having unbelted quarters in the immediate neighborhood of twenty-eight seconds, but until late last season always had a good deal of trouble in maintaining a flight of extreme speed for the full route, though as a three-year-old I saw him pace a mile around 2.07¾ under circumstances that were anything but advantageous and he was one tired little hombre when he got to the end of the route. He had a little trouble with a curb last spring, if I remember rightly, and his training was shortened a bit on that account, but he gained in strength and staying quality and at Phoenix late in the fall was separately timed in a race in 2:04¾, evidence that he has progressed considerably. He is a good headed little fellow with a nice mouth and I believe that he is going to make a very useful pacer.

* * * *

How many horses did I say that this man Durfee had in the stable—somewhere in the neighborhood of forty or fifty? And I have paid my respects to a whole half dozen of them! The amount of space that I have set aside for this portion of my visit to the Angelenos is already shot full of type, and there is a whole string of horses in the Durfee stable yet to be looked at, so I will quit for the moment while the quitting is good, leaving all the younger things—and a nice lot they are—for consideration in a following issue.—[N.]

COMING TROTTING CONGRESSES.

Hartford, Conn., January 6, 1916.

A Biennial Meeting or Congress of Members will be held at the Murray Hill Hotel, New York, at noon, Wednesday, February 9, 1916, in accordance with Article VII, Sec. 1, of the By-Laws, N. T. A.

W. H. GOCHER, Secretary.

Chicago, Ill., January 10, 1916.

The Thirteenth Biennial Congress of The American Trotting Association will convene at the Auditorium Hotel, Chicago, Tuesday, February 15, 1916, at 12 o'clock M., at provided by the By-Laws of The American Trotting Association, for election of Directors and transaction of such business as may be properly presented.

W. H. KNIGHT, Secretary.

NORTH PACIFIC MANAGERS TO MEET IN SEATTLE.

The annual meeting of the members of the North Pacific Fair Association will be held on Thursday and Friday, February third and fourth, not only members but all parties directly interested in the welfare of northwestern fairs being cordially invited to attend. Secretary J. W. Pace, who maintains a permanent office in Seattle, is in charge of all arrangements for the affair and requests that all who expect to attend notify him in advance, that proper provision may be made for their entertainment and a place on the program provided for them in case they have any remarks to make upon topics of interest. Just as large an attendance as possible is desired, and as many expressions of ideas as there are attendants. The northwestern fairs were successful to a marked degree last season, due in no small measure to the spirit of co-operation that exists between the various local associations, and the putting into effect of theories advanced and practical knowledge gained through the medium of the annual meeting of the general association. By all means attend the meeting next month if possible, and write to Mr. Pace at once expressing your intention of being among those present.

Andrew Robertson, one of the foremost horsemen of Australasia and with a considerable acquaintance with California horse breeders owing to previous visits and numerous purchases of the produce of their farms, spent some days in San Francisco and vicinity recently, en route to his home at Allendale Farm, Melbourne, after a trip to England in the interests of Tye & Company, for whom he secured a draft of over a score of high class thoroughbreds at the English auctions. War conditions in the mother country have caused the offering of many horses for sale which in ordinary times would not be priced even for private treaty, and the Australian breeders, like many of our American horsemen, have taken advantage of the opportunity for adding desirable animals to their studs and racing stables. Mr. Robertson speaks very highly indeed of the stallion Honeywood, imported by George Wingfield for his Nevada Stock Farm, and has no hesitation in declaring the best horse in England at this moment to be Pommern, another son of Polymelus. Trotting horses taken to the antipodes through his agency have proven most satisfactory in every way, but the Allendale trainer contented himself this trip with the English thoroughbreds, making no purchases in this country. The horses were shipped direct from an English port, but Mr. Robertson found the return by this route more to his liking from the standpoint of both safety and comfort, sailing Tuesday on the Sonoma, of the Sidney Short Line. His local visit was enjoyable both for himself and his California friends, who regret that he was not longer among them.

◈ ◈ ◈

Ned McCarr, formerly chief speed maker at the International 1:55 Horse Farm and for the last season or so the right hand man in the stable of Thomas W. Murphy, the Poughkeepsie wizard, has gone to a still more pleasant berth as trainer for the stable of Pittsburg's millionaire matinee driver, J. D. Callery. Murphy attributed a good deal of the preparedness of his stable throughout the season, and especially at the exposition meeting, to the capable work done by Ned, and the Pittsburg folks will find him a mighty handy man to have around.

NOTES and NEWS

Little Prince 2:04¼ changed hands recently at a consideration of two thousand dollars and will be seen exclusively in 1916 in the twice around free-for-alls. His new owners are Messrs. Haley & Johnson, Madison, Wis.

◈ ◈ ◈

Rhythmell 2:04¼, who as a three-year-old was the principal contender in the famous Kentucky futurity won by Manrico (3) 2:07¼ and who afterwards added more laurels to her name by winning the Walnut Hall Cup in 1914, will be mated this season to Peter the Great.

◈ ◈ ◈

The Grand Circuit dates for the coming season have been arranged and provide for continuous racing from July 17 to October 21. North Randall starts the ball rolling and proceedings will come to a close at Atlanta rather than at Lexington, as has been the case since Memphis quit the big line.

◈ ◈ ◈

George Nugent of Phoenix, who shipped east at the conclusion of the June meeting at the exposition and has been east of the Mississippi ever since then, is racing over the ice in eastern Canada, winning second money with the Del Coronado trotting mare, Princess Louise, in his first start at Toronto some days ago.

◈ ◈ ◈

Little Express (2) 2:20, Hi Hogoboom's futurity winner of 1914, who was purchased by the Canadians at the DeRyder sale here during the exposition race meeting, won second money in her first start over the ice at Winnipeg, being second in the first two heats and winning the third. The time was not fast. She is a nice young mare and as she was secured very reasonably her present owner ought to get his money out of her several times over.

◈ ◈ ◈

At a recent meeting of the members of the Business Men's Race and County Fair Association at Nebraska City, Nebraska, where California horsemen often drop off for a few starts on their way east in the early part of the season, the following officers were elected for the ensuing year: President, George W. Leidigh; vice-president, L. W. Rodenbrock; secretary, H. B. Swalley; treasurer, W. A. Hughey; directors, A. Billings, Earl Beezely, E. H. Fisher, Tom Kastner and D. W. McCallum. A meeting will be given on June 13, 14 and 15, with liberal purses.

◈ ◈ ◈

Word comes from his home in Thomasville that W. J. Andrews is gaining so satisfactorily that his physicians predict that he will again be able to do the teaming for the Pastime Stable by the time the Grand Circuit opens. In the meantime Ben White continues the active trainer for the Cleveland folks and will have the string in shape to race, by either Andrews or himself. Ben certainly stepped into the breach last summer when Billy had to retire and delivered the goods in excelent shape. "Two strings to your bow" are still advisable, even though the bow has given place to more modern arms.

◈ ◈ ◈

C. C. Christy, Kansas City, Mo., at one time one of the most prominent campaigners of trotters in the central west, died on January third at his home, at the age of sixty-five. Dick Benson raced his horses, one of the most successful of their number being the California bred gelding The Roman 2:09½, by McKinney 2:11¼ and out of the late F. H. Burke's famous old time trotting mare Wanda 2:14¾ by Eros. Dick won a number of excellent races with The Roman in 1902, and as Mr. Christy was a plunger of some pretensions when prices and conditions were to his liking, the cash returns from the campaign were not limited to the receipts from stakes and purses.

◈ ◈ ◈

Bon Voyage 2:08, who for the past year or so has been in the hands of the well known Indiana horseman, James Hazelton, of Frankfort, is being offered for sale again. His son Bon Courage 2:08½, still owned here in California, was the fastest four-year-old trotting gelding of the season just passed, and as a two- and three-year-old was one of the best youngsters ever seen in this part of the world. Mr. Hazelton owns the grandly bred stallion Border Knight 2:12¼, whose blood is a combination of that of the two great present day families of Bingen and Peter the Great, and the overwhelming popularity of this fellow probably has something to do with the disposal of Bon Voyage.

◈ ◈ ◈

Sam Harris of Plymouth, Illinois, who made the long trip to the exposition fall meeting with the good trotter Axtien 2:06¼, only to have the big fellow go wrong with him at the critical moment, reports that the son of Axworthy has rounded to in fine shape since getting home and that he will do to race again in 1916, from all present indications. Axtien is one of the few horses who had the honor to wrest a heat from the redoubtable Peter Scott during the season just passed, and his lack of condition at the races here in California was a great disappointment not only to his owner but to the crowds as well, as he had been figured as one of the principal contenders for honors in the big stake.

The expatriated Oklahoma trainer, Bi Shively, celebrated his advent in Canada by winning a seven-heat race on the ice at Hillcrest Park, Toronto, with Patchen Wilkes II. He also won second money in another race with Widower Peter, owned by his employer, W. H. Grosch of Milverton, Ont.—Horse Review. [This man Shively always was a "simultaneous" sort of a cuss, as more than one western trainer and driver can testify from personal experience.]

◈◈◈

Six head of trotters and pacers composing the stable handled by the Canadian trainer, Vic Fleming, were suffocated in a Sunday morning fire at Dundas, Ontario, a couple of weeks ago, chief among them being the fast pacer Billy Brino 2:06¼, whose campaign over the two-lap tracks in 1915 was a model of consistency. Starting in seventeen races on the circuit he was twice arounds he was sixteen times first and once second, and was expected to figure extensively in the eastern ice racing this winter. He was just recovering from an attack of pneumonia when death put an end to his career. None of the horses lost in the fire were insured and the blow is a hard one for the owners and trainer.

◈◈◈

V. L. Shuler of Indianapolis, who consigned Peter McCormick to the Old Glory sale and then withdrew him when the time came for the auction to commence, evidently has the big fellow pretty well patched up again, as he is already being mentioned as a probable candidate for the next number of the M. and M. His many friends out here wish Mr. Shuler the best of luck with Peter, as he is without doubt one of the fastest and gamest sons of the premier of Patchen Wilkes Farm. Like the bird whose good looks were exceeded only by the size of his feet, the only thing about Peter that outranks his real racing qualities is his misfortune. Perhaps this is one year in which he can manage to escape the jinx that has hung to his trail.

◈◈◈

Does it pay a caretaker to attend as strictly to his humble business as though it were his own, and a more pretentious and profitable one at that? We always advanced the idea that it did, and can submit a number of authentic instances in support of that theory. The latest man to profit materially through the adoption of this system is Jack Clark, who has taken care of Peter Scott ever since that horse became a member of the Murphy stable, Owner Henry Oliver's holiday remembrance to Peter's groom coming in the shape of a check for one thousand dollars. Jack, whose husky likeness appeared on the cover page of this paper some weeks since along with that of Peter Scott, is a credit to his calling and the worst luck we wish him is that he draw down another thousand next season.

◈◈◈

Lulu Lumine 2:06¼, the little western trotting mare for whom A. H. Cosden of New York paid somewhere in the neighborhood of twelve thousand dollars after the wonderful showing she made in 1913 over the tracks of the Great Western Circuit, died very suddenly a few days ago at Walnut Hall Farm, where she had been left at the conclusion of the Lexington meeting last fall. So unexpected was her death, with no visible indications of any of the customary virulent illnesses to which horseflesh is heir, that an autopsy was held by a number of veterinarians, their investigation revealing that she was a sufferer from an affection of the heart, a weakness that in all probability accounts for the disappointing showing made by her for the past two seasons in Tommy Murphy's hands. Had she lived she would have mated in the spring to one of the prominent stallions of the Lexington neighborhood, though to which one had not been determined.

◈◈◈

In accordance with the usual custom, Allen Farm, Pittsfield, Mass., has recently issued the annual year book and price list, and attractive and instructive little booklets they are, even if the reader be not in the market for trotting horses. The year book gives a concise record of the performances of the various animals bred at the farm, or sired by its stallions, that were raced during the season of 1915, and by referring to both year book and price list a prospective buyer, or student of pedigree and performance, may learn exactly how the contemporary representatives of the various crosses are racing, and be guided thereby. Every animal listed in the season's offering has the exact price appended to the description, and buyers know exactly what to expect when they go to do business. Horses are absolutely as represented, the price asked in every instance is based on a full knowledge of their earning capacity under fair conditions, and by these methods the farm has built up a market for practically everything it produces.

MR. BROOD MARE OWNER, do not by any chance neglect to nominate every mare bred in 1915 in the Pacific Breeders' Futurity Stake No. 16 which closes on Tuesday, February first. The decrease in breeding means that prices for really good horses will be just so much higher in the future, and the consequent falling off in futurity patronage means that your foals have just so much better chance to become money winners. It costs but $2 to make a nomination, a very small risk for the return it may make.

Indiana horsemen are already booming Single G. 2:02¾ as the next two-minute pacer, and as the Cambridge City bearcat came perilously near that mark at Lexington and then went home in excellent shape, the grounds for the Hoosier hopes are pretty solid. Along with nine other candidates for honors during the coming season he is being wintered by Curt Gosnell at Cambridge City.

◈◈◈

Mr. and Mrs. C. L. DeRyder, who had been in southern California since the closing days of last year, came home rather unexpectedly a few days ago, with Charley quite a little "under the weather." Several times during the year just passed he has been subject to attacks of illness of a similar nature, superinduced by too many miles in the sulky in all sorts of weather, and some months ago he was warned by his physician that his riding activities in the future must be considerably curtailed. A long rest from that sort of work is on the program for him, and his countless friends join in wishing him a quick and complete return to health.

◈◈◈

Andrew Albright, Jr., of Prospect Farm, Newark, N. J., has just added to his stable by purchase a young lady that is considered the very best one of her age in that section of the country, the brown filly Brownie Watts (2) 2:21½, now a three-year-old. This lass took her record last season over a very poor halfmile track after sixty days of work at the hands of her amateur owner, and the canny eastern trainers who know her have her tagged for a mile around 2:06 this season, if no untoward bad luck cuts her trail. Long distance information is that she is sound and good headed and she certainly is bred to be a trotter, her sire being General Watts and her dam Sarah Hamlin 2:11¼, making her a full sister to that excellent campaigner Dick Watts 2:12¼, who has been such a good winner for the past two seasons in the hands of Herman Tyson. Mr. Albright left the east this week with California as his objective point, and may have arrived in Los Angeles on the tag end of the big storm that has just visited that section.

◈◈◈

The first death of the season among California horses of any note is reported by W. L. Hale of Bakersfield, the stallion Athablo 2:24½ having died at his place on the first day of the new year. Athablo, who was bred by George L. Warlow of Fresno, was a son of Diablo 2:09¼ and the famous matron Athalie, dam of six performers and four speed sires, by Harkaway 2:28¼. Athablo, foaled in 1896 but owned almost all his life in a section where harness horses were not bred to any great extent, is represented in the list by half a dozen standard performers, as follows: Athol R. 2:07¼, Roan Hal 2:07¾, Nogi 2:10½, Dan S. 2:11¾, Sextette 2:18 and Miss Dividend 2:20¾, certainly an excellent showing for a sire of his opportunities. He was owned at the time of his death by the estate of E. J. Boust, his owner for the last several years, who died some three months ago at Taft. The estate has a number of excellent colts and fillies by Athablo, but under present conditions finds them hard to dispose of at any kind of an advantageous figure.

◈◈◈

While the various portions of the country have been reporting winter weather of exceptional severity, California, and especially the southern portion of the state, has been visited by the most severe storm of many years, the wind in certain localities attaining hurricane proportions and the rainfall, in the course of a very few hours' time, measuring from four and a half to thirteen inches. The loss in life and property has been heavy in certain neighborhoods, livestock being drowned in some instances and many buildings, bridges and oil rigs being swept away by either wind or water or the combined efforts of the two. Clarence Berry chanced to be in the Maricopa district at the height of the storm and saw twelve out of fifteen rigs on one of his leases blown to pieces in almost as many minutes, all the operators in the district suffering to a similar extent. The wind at that point attained a velocity of over a hundred miles an hour, and while Mr. Berry admits that the sight was a wild and wonderful one while it lasted and that, since it had to happen he is glad he saw it, he admits with equal readiness that "once is enough."

◈◈◈

A. B. Coxe of Paoli, Penn., arrived in California a few days ago on his annual winter visit and has been staying at the Palace Hotel in this city, visiting with local friends and horsemen prior to his departure for the southern portion of the state, where he will remain for some weeks. A trip or so to Pleasanton produced much pleasure, and some congenial company at the Palace has resulted in the inauguration at that hostelry of a "Coal Stove Circuit de Luxe," with mixed racing the order of the day. With Mr. Coxe as presiding judge some very fast miles have been driven or ridden by himself, John W. Considine, Andrew Robertson of Melbourne, George Wingfield, and other chance comers whose entries were acceptable to the stewards, the sundown clause being disregarded with a great deal of regularity and other numerous infractions of the rules passing without censure. Nawbeek Farm, Mr. Coxe's home place, boasts one of the choicest bands of brood mares in the east, and has for the head of its stud at present the excellent young trotter Dillon Axworthy (3) 2:10¼, a futurity winner and at five years of age a member of the great table of sires.

THE GRAND CIRCUIT FOR 1916.

The meeting of the stewards of the Grand Circuit on January eleventh at Cleveland was marked especially by the spirit of complete accord existing among those in attendance, none of the discordant elements that have made themselves manifest at various times in the past being in evidence. Unsettled conditions in Canada caused Montreal to relinquish her claim for dates for the present, and Atlanta was added to the circuit, a move that will be noted with pleasure, heralding as it does the establisment of the trotter on a fitting scale in the south. Both Cleveland and Columbus will stage two meetings during the season, the circuit as finally decided upon being as follows:

North Randall, O.	July 17-22
Detroit	July 24-29
Kalamazoo	July 31-August 5
Grand Rapids	August 7-12
Columbus	August 14-19
North Randall	August 21-26
New York	August 28-September 2
Hartford	September 4-9
Syracuse	September 11-16
Columbus	September 18-30
Lexington	October 2-14
Atlanta	October 16-21

The resolution introduced by President Devereux calling for a uniform series of stakes throughout the circuit, with an automatic elimination clause for money winners after a certain sum is credited to them, was adopted for a thorough trial, the conditions reading as follows:

"$5,000 stake for trotters that never won $2,000 gross, nor have a time or race record faster than 2:14¼. To be raced for in three heats, $1,200 for the first heat, $1,500 for the second heat and $1,800 for the third heat, purse in each heat to be divided 50, 25, 15 and 10 per cent. Of the balance, $150 to the winner of the event, $150 to the driver of the winner and $200 to the horses standing fifth and sixth in the final summaries, of which 70 per cent shall go to the fifth horse and 30 per cent to the sixth.

"No starter in any heat can win more than one money. A distanced or drawn horse retains what money he has won prior, but loses his position in the final summary.

"Of the horses that start in the third heat, the winner of the event shall be the horse, not distanced, that has won the most money; should there be a tie in the gross amount won, the horses tied shall race a fourth heat to determine the winner.

"If a sum less than $5,000 is offered, all awards shall be made, in the same proportions.

"A horse entered in these events shall be elegible to start until it has won $7,000 gross in them, when it becomes ineligible to start again in said events, and all entrance in said stakes to which said horse has become ineligible shall be refunded and the horse entitled to start in any early closing event to which its winning race record makes it eligible at the time it was so barred. The amount of entrance fee to be refunded is to be determined by the member in whose events the horse is permitted to start. start.

"Every Grand Circuit meeting for 1916 is hereby required to offer the above stake under the above conditions. Entries to them to close at the same time as for all other early closing events of each meeting."

A uniform time allowance system for the entire circuit was also adopted, in the following language:

"Horses that have started anywhere in 1915 or 1916 without winning a race shall be allowed one second. Horses that have started two or more times in 1915 or 1916 without winning a race shall be allowed two seconds. Horses whose winning race records were made prior to 1915 shall be allowed two seconds, provided they have not won a race in 1915 or 1916.

"These allowances shall hold good until a horse wins a race, and a horse granted any of these allowances shall, on winning races, be eligible to the class only in which his record made in that race entitles him to start, provided such record does not admit him to a class slower than that to which his time allowance made him eligible. If already entered in a class in which he gets an allowance and to which his winning performance renders him ineligible he shall be entitled to start in any other class to which he is eligible. But if a horse has been entered in any races in which no allowance is claimed for it he shall be allowed to start in such races. These allowances to be good for both early closing and class races."

The Grafton Country Club, Worcester, Mass., was recently the scene of an unusual social event, a dinner given in honor of the Whitinsville sportsman, Chester W. Lasell, who not only owns and breeds horses but trains and races them in person, with an unusual degree of success. Coupled with Mr. Lasell as the guest of honor was the three-year-old trotter Henry Todd (3) 2:10 with whom he won the Champion Stallion Stakes at Empire City last season, the colt being brought to the banquet with all his paraphernalia, bearing the inscription "Oakhurst Farm." The big room at the club house was decorated as a racing stable, in the colors of Oakhurst Farm, and those present included not only the wealthy owner and his friends, but all the employees that participate in the establishment's activities.

ROD, GUN AND KENNEL

CONDUCTED BY FISHER HUNT

WORLD'S LARGEST HATCHERY FOR OAK CREEK.

The State architect's office is at work on plans and specifications for the largest fish hatchery in the world. The structure will be on Oak Creek near Independence in Inyo county and the definite news that it will be located there will be of interest to anglers in Southern California.

Ernest Schaeffle, executive officer of the Fish and Game Commission, announces that work on the structure will be rushed in order to get everything in readiness to operate in full capacity this season, which should see the hatchery completed by the first of June or the middle of the same month by the latest. The cost of the new plant will be in the neighborhood of $20,000 or $30,000, he estimates.

It is planned to hatch 6,000,000 trout per season in the new hatchery. This will be sufficient to stock all the streams and creeks in Southern California. As a deal of revenue is derived from the southern portion of the state and there has been some protest in the past in not spending enough money in that territory, the expenditures and the good work outlined will be welcomed by our fellow statesmen in the south.

There was some opposition from San Bernardino county for locating the new hatchery on Oak Creek, but the commission announces that for years the situation has been studied closely and it is confident the best place possible has been selected. It is necessary to get the right kind of water and to be close to the supply of eggs to make a success of the new fish farm. Oak Creek is near the Rae Lakes, sixty in number, and is well stocked with rainbow trout. The commissioners are satisfied an abundance of eggs will be obtainable. Transportation facilities have also been considered and it has been learned that pack trains and wagons will be able to do the work.

The hatchery will be the last word in a structure of its kind. The hatchery room proper will measure 160 feet, making a 180 feet over all, and it will be 42 feet wide, measured from inside. It will be constructed of stone which will be found on the site and the roof will be of red tile. There will be cement floors and the finest equipment possible. The hatchery will easily be the largest and most modern to be found anywhere on the face of the globe, according to the fish and game commissioners, and Californians can take pride in it.

Plans have been outlined to make the hatchery operations for 1916 just as extensive as they were last season.

—o—

Quite a change is to be made in the Fish and Game Commission. The Fresno Division in charge of A. D. Ferguson is to be abolished and the territory divided between the Sacramento and Los Angeles Divisions. This will leave the state three divisions to control the fish and game. A. D. Ferguson has been offered a position as special assistant to Ernest Schaeffle, executive officer. His work will consist in superintending the work of the deputies of the State. He will also assist in other lines.

—o—

THE FALL RUN OF SALMON.

The fall run of salmon on the Sacramento river has been a very light one this year. The take of salmon eggs at the spawn-taking stations, which may be taken as an index of the size of the run, was no more than half the usual amount.

The runs on Eel, Klamath, and Smith rivers, however, have been good and up to the average. On Eel river two species of salmon are taken, the quinnat (known in the North as king and chinook) and the silver salmon. The netting season now opens on this stream on October 7, a much better arrangement, for the fish caught on the opening day were in excellent condition this year, which was far from the case in previous years, when the season opened later. The netting season now closes on December 7, which may be a little late to give the best protection to the two species of salmon and to the steelhead, which begins running in increased numbers late in November, but it is far better than the old law which allowed netting until the end of January. Large numbers of the two species of salmon on Eel river are shipped fresh to San Francisco. A few are salted and mild cured. Salmon have not been canned on this stream for several years.

On Klamath river two species, the quinnat and silver, are taken, and practically all are canned, very few being shipped fresh.

On Smith river also both quinnat and silver salmon are found. Here the fish are canned, none being salted or shipped fresh.

Quinnat salmon are caught in commercial quantities in Monterey Bay in June, July and August. They are caught entirely by trolling. The catch this past summer exceeded two and a half million pounds, slightly exceeding the catch of last year, which was the largest catch ever made in the bay up to that time.—Fish and Game Commission.

GAME DEPUTY CLARENCE J. BERRY WOULD ARREST HIS OWN BROTHER HEN.

"Investing authority in a man often makes him walk a pretty straight and narrow path," commented Clarence J. Berry, the well-known sportsman the other day in a fanning bee. "I remember some years ago when I was living at my home in Selma that the game warden swore me in as a deputy. Immediately I secured all the literature possible on fish and game laws and I made the boys toe the mark. My brother Henry announced one day that he was going out after some quail.

"You can't shoot quail at this time of the year," I told him.

"'Well, you just watch me,' was his come-back.

"We argued for awhile and in the end I threatened to arrest him. I would, too, and Henry realized it and gave up his proposed hunting trip. The idea of having deputies is a great one."

—o—

GAME SEASON POOR IN NORTH.

Guess how many ducks, geese, rails and coots were killed during the 1915-1916 open season, which closed Jan. 15 in the state of Oregon.

Here is the answer, or approximately so—26,000. This is the estimate volunteered by Wardens T. J. Craig and E. H. Clark, chief aids in Game Warden Carl Shoemaker's office.

Last year, after a careful compilation, the game warden's office estimated the wild fowl killing at 38,000 birds, but this figure is thought to exceed the present season by some 10,00 or 12,000 birds.

Early in the season many of the lakes on the islands between Government Island and the lower end of Deer Island were dried up, necessitating pumping, and later in the season, along about the middle of December, too much moisture produced the opposite extreme.

"Arrests for violation of the night hunting law have not been as many as in former years," vouchsafed Mr. Clark. "This is due to the fact that more sportsmen are becoming educated to game and fish protection."

The season opened on October 1, but by far the best shooting was enjoyed during November. Severe storms drove the birds inland and, as the ponds had become normal, nearly all the hunters bagged the limit. In the latter part of November and in December, the clubs encountered just the opposite condition which bothered them in October, too much water. During that time there was a continual downpour and many of the clubs were dater-logged and their blinds looked like so many fallen-down boathouses with just the roof sticking out of the water.

As stated, the average bagging of the hunter fell far below that of years gone by, but even at that a lot of sport has been enjoyed by the "thoroughbreds." The usual delegation of sportsmen from Eastern cities, Seattle and other sections of the country took part in the many shoots this season. These came to the Columbia lakes in preference to hunting around their own localities, because of the finer birds here.

There are about 150 duck clubs on the Oregon side of the Columbia river between Givernment Island and the lower end of Deer Island. Each club feeds the birds more than five tons of wheat every season. Wheat, combined with the natural food of wild fowl, will keep them in the finest condition.

Carl Shoemaker, game warden, was operated on two weeks ago for a goitre and left a few days ago to recuperate at his home in Roseburg.

—o—

The Golden Gate Gun Club, which plans to be active with a number of trap-shooting events this season, may be forced to locate new club shooting grounds. A dredger has been at work at West Alameda and may interfere with the blue rock brigade. President W. H. Price, secretary-treasurer T. D. Riley and the other officers are hoping that they will be able to stay there as it is handily located and all the members have come to know the grounds pretty well.

* * * *

It will not be long before every public student and scholar in our schools will be instructed in the value of wild game. The Fish and Game Commission is launching a campaign to have the instruction included in the regular studies. In addition there will be a new forestry course at the University of California.

* * * *

To the Breeder and Sportsman:

"I very much regret to learn that our mutual friend, Mr. J. X. DeWitt, has "passed to that bourne from which no traveler returns." I met Mr. DeWitt on my first trip to the West Coast in 1905. A friendship which sprang up at that time between us was never broken.

ELMER E. SHANER,
Treasurer and Manager.

HEARD IN KENNEL CIRCLES.

Miss Jean Forgeus, of the S. V. Kennels, intends to send her Russian wolfhound Nicholas East to compete with America's best at the Westminster show in New York on Washington's birthday. Nicholas won everything offered at the P.-P. I. E. show.

‡ ‡ ‡

D. J. Tobin, an ardent fancier of the bull terrier, and owner of several good ones, reports that his bitch had a litter of eight puppies. The sire is King V. also owned by Tobin. Tobin intends to keep the litter and show them at the Golden Gate show.

‡ ‡ ‡

The officers of the Golden Gate Kennel Club will hold a meeting this week to decide on the judges for their coming show. Irving C. Ackerman, president of the club, favors bringing an Eastern judge. Among the prominent judges whom Ackerman has extended invitations are: George S. Thomas, Walter H. Reeves, Dr. Henry Jarrett, Vint Breese and Alf Delmont. All of the above judges with the exception of Reeves are well known on the Coast.

‡ ‡ ‡

Mrs. Anita M. Baldwin, who recently imported four Airedale terriers for breeding purposes, intends to breed them to Tintern Tip Top, a recently imported dog with a big English record.

‡ ‡ ‡

Mrs. E. F. Brown, of Redwood City, owner of the largest aggregation of collies on the Pacific Coast, has started to prepare her best dogs for the show ring. They will be shown over the local circuit.

‡ ‡ ‡

Fred B. McCay of Cathay, California, owner of the Oak Ridge Beagle kennels, will send a pack of twenty down to the Golden Gate show. The above kennels won all the honors at the Exposition show.

‡ ‡ ‡

W. R. Bartley has bred his Airedale terrier Harvester to Floradora, a bitch that has done considerable winning. Bartley expects to get a flier from this mating.

‡ ‡ ‡

American fanciers have been unusually active in importing Pomeranians of late and the following, taken from the Illustrated Kennel News, an English publication, gives an account of some notable purchases made by American fanciers from the Pomeria Kennels at Aberdare:

"Business has been brisk at the Pomeria Kennels, Aberdare. Mrs. Williams has shipped to the order of Mr. Wakeman, of South Australia, two blacks in Aberdare Prince and Aberdare Queen. Another sale is that of the sweet black bitch Aberdare Jewel, that weighs 3 pounds. She goes to the kennel of Mrs. Hurning, of Pennsylvania, to be the companion of Aberdare Teddy and Aberdare Doll. It is to be hoped that Jewel will arrive safely and well, where she should render a good account of herself, as already she is a winner under Messrs. Raper and Reeves, her latest victories being two firsts and two cups at the hands of Mr. Theo. Marples at Tonypandy. She is well bred and is a direct descendant of Ch. Haughty Prince. Another beautiful black dog, Aberdare Tiny Blackie, has gone to join a kennel comrade in Aberdare King at the Fortuna Kennels in Los Angeles, Cal. We hope he will accomplish his long journey successfully, and no doubt will maintain his reputation when exhibited. Still another sale is of Aberdare Wee Prince and Aberdare Pansy, a lovely brace of small Poms that have gone to Mr. Davis, an American fancier."

‡ ‡ ‡

Heathcote Enchantress is the name of Messrs. Baldwin and Jones' recent importation. This young Airedale bitch has been a good winner in England and was placed reserve to the famous Vickery Kennel's Aman Gem at the last Birmingham all terrier show. She is a well bred one, claiming as her sire the noted champion Tintern Tip Top recently purchased by Mrs. Anita Baldwin, of California, which is said to be the best Airedale in England. Enchantress is being groomed for the Westminster and will make her debut in America at this important fixture.

‡ ‡ ‡

At the Barbican the other day (this is where the coursing greyhounds are usually put up to auction in London), there was no lack of bidding, one first season greyhound going for about $750—at auction, mind you, and war times! Another lot of 38 brought about $2,500.

‡ ‡ ‡

Mr. Andrew Albright, Jr., owner of the Baughfell Kennels, will pay California a visit next month. He has just purchased the great wire fox terrier Champion Wycollar Boy. Wycollar Boy has beaten the lot on the other side, his latest win being at the Great Joint Terrier Show last month, where he topped the lot again. It took a long price to get him, but Mr. Albright is much pleased with his purchase. Mr. Albright has also purchased a very high class wire bitch, which he will bring out at New York, and thinks her capable of holding her own with the best.

‡ ‡ ‡

Mr. Earl K. Breen is on a hunting trip in Mexico. Among the Airedales he has taken with him are the good winner, Blizzard Breen, and West Coast Water Baby (the latter by Champion Boughfell Briar), both of which he recently purchased from Kyle Onstott. Mr. Breen writes The Kennel Review that both are making good on everything from monkeys and parrots to wild burros.

GAME REPORTS FROM VALLEY AND NORTH.

A. D. Ferguson, in charge of the Fresno division of the Fish and Game Commission, has some interesting reports on conditions in the San Joaquin valley, a favorite shooting country. He was in San Francisco during the week and looks forward to even more birds this coming season.

"The present duck season has not been as good in our section of the State as in former years," said Ferguson. "At some places it was good, at others fair and in some it was very poor. The best shooting by far that has been recorded in the San Joaquin valley has been at the Widgeon Gun Club. Birds have been plentiful and the boys have taken the limit pretty nearly every time they have gone out.

"At Gustine it was only fair. Los Banos has been very poor. This was caused by Miller and Lux draining the water off their lands during the summer. South of Los Banos at Fireball birds have been numerous. Tulare Lake has not produced as good sport as expected. Western Tulare, North Kern and Kernell have been good. There have been so many gunners out at Buena Vista Lake that limit bags have been rather scarce.

"Geese are just commencing to put in an appearance. The big birds have arrived late this season for some reason but the hunters will find game plentiful until the season closes on the last of this month.

"Our quail season was very successful. The new law closing the season on the last day of December proved satisfactory to the sportsmen. They appreciated the fact that the birds will be left for next season. Prospects are that 1916 will be the greatest quail hunting season we have had in 20 years. They produce well in wet years and it looks like we are going to have plenty of rain.

"San Joaquin stands out as the greatest dove country in the state. To show how they are hunted and pursued it is estimated that 40,000 doves were killed in Fresno county alone on the opening day of last season. The vast number of birds in our section is attributed to the fact that for the past six years the season has opened as late as September first while in former years it was in July and August. The doves were accordingly given a chance to breed by countless millions. The restriction of the open dove season to the months of September, October and November will have a general beneficial effect all over northern California.

"I am pleased to report that the deer is increasing in our section. The opening of the season on August 15th instead of July first has had a good effect. In the Sierra they are increasing in numbers and the game commission is being supported by the people in enforcing the law."

Frank Cady, a deputy who has been patrolling Lassen and Modoc counties, gives some data on game in those sections.

Sage hen are reported as increasing, particularly in the Madeline Plains, where in the past two years a 50% increase has been reported. In Willow Creek Valley it is now possible to get the limit of sage hens, and only a few years ago there were no birds in that section at all.

Ducks still breed in goodly numbers throughout the entire county. The people of the county are uniform in their request that the present open season for the taking of ducks be changed. They suggest that either September 15th or October 1st would be very acceptable to them. If September 15th were given the season could close on December 15th; if October 1st, it could close on Jan. 1st. They also recommend a smaller bag limit,—not greater than 15 per day, and many advocate only 10.

Antelope are also increasing. The band near Spanish Springs, which numbered two years ago nine now numbers 17 or 18. A band has shown up in the region to the northwest of Eagle Lake where for a number of years there have been no reports whatever. There have been one or two instances where antelope have been killed along the state line by Pyramid Indians. The people of the county, however, very generally respect the protection given the antelope and very few are killed.

Last winter it was reported to Cady by a reliable individual that he had counted 107 mule deer in the hills to the south of the Madeline Plains. Another individual at the same time reported a band of nearly 100 in the hills to the north of the plains. This was in the latter part of December or the first of January in the winter of 1915.

Pheasants are increasing. A brood of 12 birds was raised about 25 miles farther down the valley from where the original plant was made. Near Susanville on one ranch there are about 40 or 50 that show up every day for feed. The ranchers uniformly are in favor of protecting the birds and as soon as it is reported that any are on the ranch, hunting is prohibited.

Cady believes that he ran on to three Hungarian partridges on the east side of Honey Lake. These birds were seen in a location which is not favorable to mountain quail, and while Cady is somewhat in doubt as to what they were, he believes that they were the Hungarian partridges.

The "farthest north" gun club is situated at Nome, Alaska. The "gold diggers" are not satisfied with this claim, and every once in awhile pull off a midnight target shoot under the northern sun.

Drink Jackson's Napa Soda.

O. N. Ford Proposes Big Trap Shoot

O. N. Ford, manager and secretary of the San Jose Blue Rock Club, is out with a proposal to launch an interclub trap-shoot in Northern California. Mr. Ford points out that the trap season will soon open and now is the time to get out and work up some interest in the "sport alluring." His idea is for a ten-man team match between four or five clubs in the northern part of the State. Details as to the conditions of the matches, etc., can be found in the following letter received on Monday:

"To the Breeder and Sportsman:

"I want to propose to the gun clubs of Northern California that we get up a ten-man shoot for five or six clubs. This would be my idea of the same: Have five or six clubs enter the contest and shoot one contest on each club's grounds once every month. With five clubs entered it would extend the competition to five months. Then have a BIG ONE at the finish.

"Ten men to a team would mean fifty or sixty shooters at each contest. The conditions would be to shoot 200 targets. Each club could add $100 in cash to the program, second $100 to count in full contest. We can get five entries all right in a close radius. San Francisco, Sacramento and San Jose could enter one team apiece. Vallejo, Martinez and the Family Club could combine to get one aggregation. Stockton, Newman and Modesto could furnish the other team to make five all told. All south of San Jose to Santa Maria could put up a good team of ten men. Los Banos, Fresno and Lindsay could also enter the competition with a combined squad.

"We have five right here, however, in a golden circle. My idea of the financial end is to have each shooter put up $1 at each shoot, which would make $50 for a total of $250 for the five meets. For the sixth meet either buy ten trophies for the winning team or add the $250 to the money secured from the club that will secure the event. Let all the boys shoot for this.

"The match could be started in May and have one shoot each month until it is over. This will attract a fine crowd to the traps each Sunday of the competition. One man can be selected from each team entered to form a committee to decide how the money will be divided. A vote could be taken at the first shoot to determine what will be done with the money at the finish of the season.

"Let us get busy, boys, and show the East that we are alive out here on the Pacific Coast. Let's hear from some of the clubs I have mentioned relative to a shoot of this kind.

"Yours respectfully, O. N. FORD."

"San Jose, Cal., Jan 17th."

The Breeder and Sportsman will be pleased to publish the views of any other enthusiastic sportsmen regarding the match trap-shoot as suggested by Mr. Ford. The idea appears to be a good one as it will have a tendency to increase the interest in trap-shooting and attract public attention.

In Eastern sections, competitions similar to the one outlined by Mr. Ford are held at regular intervals and have proved a success. It will serve another purpose of bringing the blue rock busters together in friendly gatherings and afford a chance to get better acquainted with the boys you read about. So, get busy, trap shooters and talk over the proposition, and if it looks all right get in line with Mr. Ford.

PRESS REPORTS ON FIELD TRIALS.

The condensed press reports on the field trials held in the south last week are as follows:

Montgomery (Ala.), January 14.—Gunner, a setter, the winner of the American Field Futurity, was awarded first money, $500, in the Derby stake of the National Field Trials Club, whose 1916 meet was concluded on the reservation at Calhoun today. Gunner is owned by Bedford & Fleischmann of New York city.

Second money, $300, went to Attakapa's Rap, the entry of I. G. Abney of Shreveport, La., and third money, $200, was awarded to King's Cy, the entry of Dr. T. E. Barber of Grand Fords, N. D. The free for all stake of the National Field Trials Club will be run over the reservation of the club at Calhoun, beginning January 24th.

The all-age stake of the National Field Trials Club was completed yesterday. The pointer Lewis C. Morris, entered by I. J. Rowe, Birmingham, Ala., was awarded first money, $500, and a silver cup. Second money,, $300, was won by Gibraltar Ollie, a setter, owned by George C. Parsons of Kennebunk, and third money, $200, went to John Proctor, a pointer, owned by A. L. Curtis of Belton, Tex. The trials will close with the running of the second series of the Derby Stake tomorrow.

Rogers Springs, Tenn., Jan. 15.—Mississippi Sport, a setter owned by R. H. Sidway of Buffalo, N. Y., and handled by P. C. Ellis, Booneville, Miss., today was awarded the title of amateur champion hunting dog over a field of fifteen which competed in the championship stake of the All-America field trials club here.

Mississippi Sport ran in the finals against the setter Netherby Jack, entered by William Armstrong of High Point, N. C., and handled by Dr. V. H. Miller of Bolivar, Tenn., and won first place by a narrow margin on bird work. Netherby Jack was placed second.

Bain's Dam, another Sidway entry, handled by Ellis, won the third money, and the setter Doc Roller, owned by T. T. Ashford, Birmingham, Ala., and handled by H. W. Brooks, Springville, Ala., was placed fourth.

The amateur Derby, the final event of the All-American trials, was not concluded today.

SCHUETZEN CLUB ELECTS OFFICERS.

The California Schuetzen Club, at its annual meeting held last week, elected the following officers for the current year: President, John S. Leutenegger; vice-president, Otto A. Bremer; secretary, John Heissner; treasurer, Captain Joseph Straub; trustees, A. L. Ott, L. Willie, J. Waller; directors, A. L. Ott, J. S. Leutenegger, E. Pohli, F. Levers, J. Waller, C. von Hartwig, A. Pollak. President Leutenegger, who was re-elected, was presented with a silver cup. Ex-President A. L. Ott made the presentation on behalf of the club as a token of appreciation of President Leutenegger's services. The annual distribution of prizes was followed by a banquet.

At the monthly shoot, held Sunday on the California Schuetzen Club range, San Rafael, Charles B. Morris won the best ticket on the honorary target with a score of 67, no re-entry. Following are the highest five scores on tha target:

Charles B. Morris, 67; Otto A. Bremer, 66; L. Willie, 65; George A. Pattberg, 64; H. Schroeder, 64.

Monthly competition shoot.—L. Willie, 219, 213, 212; John Frei, 219, 208; Otto A. Bremer, 216, 210; John S. Leutenegger, 195; H. Schroeder, 184; J. H. Millett, 179, 179, 168; A. von Wyl, 171; Joseph Capelli 161, 161, 143, 143.

Monthly bullseye competition.—George Heissner, 161; George A. Pattberg, 404; John Frei, 444; Philo Jacoby, 754; C. B. Morris, 824; Otto A. Bremer, 939; Joseph Capelli, 1223; L. Willie, 1340; Charles Ott, 2132; Captain Joseph Straub, 2157; H. Schroeder, 2300; John S. Leutenegger, 2491; J. H. Millett, 2702; A. von Wyl, 2730.

NATIONALS SHOOT AT SHELL MOUND.

Sergeant Frank J. Povey made a score of 76, the highest of the day in the initial shoot of the year of the Nationals on the Shell Mound range on Sunday.

Following are the principal scores of the day:

Captain H. H. Mitchell, 57; Lieutenant A. R. Coons, 73; P. Lichtenstein, 73; Sergeant C. A. Hauge, 64; Corporal J. Edwardson, 37; C. McMillan, 24; J. L. Beamont, 71; W. E. Bassett, 57; Corporal M. D. Sullivan, 42; Corporal J. H. Lunn, 53; E. Ramsey, 50; C. Bauer, 42; G. Stokes, 16; T. O'Leary, 28; H. McNally, 43; H. McLaughlin, 20; R. L. Yaeger, 61; Sergeant M. T. Langlais, 54; Corporal E. C. Carrasco, 45; L. M. Behr, 56; A. F. Povey, 40; C. R. Eaton, 62; W. E. Laycock, 64; G. W. Bantel, 18; E. Love, 18; A. W. Fox, 53; Sergeant E. Carr. 38; R. Carr, 9; G. Timmermann, 29; Corporal G. T. O'Neill, 62; Corporal L. A. Crabbe, 44; P. Chatard, 29; R. J. Landini, 28; H. Smith, 43; F. Collins, 14; J. Schunk, 13; W. McGowan, 11; H. Hauegress, 21.

Veterans—Captain J. C. Nagel, 51; Lieutenant H. W. Mitchell, 60; Lieutenant S. H. Stewart, 72; Sergeant F. J. Povey, 76; Sergeant B. Hopkins, 61; C. J. Weatherby, 64; C. B. Heinemann, 71.

Pistol scores—F. J. Povey, 83; Captain J. C. Nagel, 68; P. Lichtenstein, 80; F. R. Diebold, 44; C. J. Weatherby, 65; J. L. Beaumont, 77; C. R. Eaton, 60; T. O'Leary, 56; W. H. Finley, 37; H. McLaughlin, 67; W. E. Laycock, 26; Lieutenant S. H. Stewart, 75; Sergeant C. A. Haufe, 65.

OUR AMBASSADOR IS SOME MARKSMAN; KILLS TWO DEER WITH ONE SHOT.

Berlin (By Mail).—Out hunting with the American Military Attache in Berlin, Colonel Kuhns, Ambassador Gerard killed two small deer with one shot. The colonel on the other hand, fired two shots without hitting a deer!

Did Gerard's friends not know that he was an expert-crack-never-miss-an-aim rifleman, they would think this an accident, but this is the second time this winter that Gerard killed two deer with one shot. Today it happened thus:

Gerard and the colonel went out to the ambassador's game preserve near Berlin. Two small deer appeared. Gerard fired at one. The bullet went through its heart, stock a rib, glanced out the side and went through the second deer. More game appeared and the officer took a shot and another shot, but the deer disappeared.

On their way home Gerard decided he would like to bag a duck for dinner, because Mrs. Gerard's mother is visiting here and likes duck. It was dark. The ambassador spotted one, fired and bagged it. But when he got it home it was too old to eat.

"That's what I get for shooting ducks at night," remarked Gerard smilingly when he reached the embassy.

Sportsmen's Row

Col. E. R. Cuthbert, one of the most prominent hunters on the Pacific coast, left by steamer last Saturday for Panama. He is going after big game and has mapped out several expeditions in quest of alligators. Col. Cuthbert has hunted extensively in Mexico and knows a thing or two about alligators so that his friends need not worry about him falling into a pair of iron jaws. Col. Cuthbert is also going after other game for Panama has been reported as a country where wild game of all description can be found in abundance.

* * * *

Captain A. W. duBray is worried because his single barrel will not arrive in time for the opening of the trapshooting season.

* * * *

J. Walter Scott is going to show us what a Purdy can do to the rocks when the right time comes.

* * * *

Joel S. French is more interested in securing new members for the gun clubs than smashing records. Mr. French goes in for all lines of sporting competitions. He is an enthusiast on field trials.

* * * *

Otto Feudner says he will show us some of his new stunts this coming season. If he succeeds the boys had better watch him, for he ranks away up on past performances.

* * * *

Guy Clark is already in strict training to get in tip-top shape to hit her up properly at the traps.

* * * *

Our friend Tony Prior is working some long distance shots at ducks during the open season. Practicing for the 22-yard mark, I guess.

* * * *

I have heard that our favorite, Tom Wilkes, has quit Salt Lake. The answer must be that Tom doesn't wish to miss the opening Golden Gate Club shoot.

* * * *

George Thomas is expecting to make things hum with his 34-inch shooting iron. George figures to be right there, too.

* * * *

Willard Terrel promises to be a regular visitor every week this season. Willard don't talk much but he certainly can make the smoke fly.

* * * *

Colonel Dorsey would never miss a trap shoot if the fishing season was closed for good. At that, the Colonel gets out pretty often for he likes outdoor sports of all descriptions.

* * * *

Ed Hoag says Sobrante is the place to have a blue rock shoot. The background looks easy to Ed.

* * * *

Some of the rocks that got away last year we will have a chance to get again—Dr. Mac.

* * * *

A. G. Wilkes, president of the Pacific Coast Field Trials, is in communication with C. H. Babcock relative to sending back a pair of dogs to the big circuit. Babcock will be remembered as the former handler of the late W. W. Van Orsdall's Del Rey Kennels. He has been quite successful with setters and pointers since invading the East five or six years ago. The dogs Mr. Wilkes has in mind to try their fortune against the best in the country are Kenwood Sam, winner of the derby this year at Bakersfield, and Melrose Rod. S. Christenson is thinking of sending back Orange Blossom, the bitch that was second in the All-Age stake.

* * * *

Attention of lovers of a good gun is called to the advertisement in our business section of the Parker Gun. The Parker Gun has won the Great American Handicap nine out of twenty-five offerings—once with a perfect score of 100 straight. It has other great feats to its credit to recommend its use.

* * * *

Pete Walsh declares that anyone can shoot dead birds but it takes some expert to win a medal for the live ones. Show it to the boys, Pete.

* * * *

Hughie Wobber don't need to have his gun loaded. He can simply stretch his arms and legs a bit and poke the barrel of his gun into the center as the rocks leave the bulkhead.

* * * *

It is to be hoped that Barney Worthin has not blown out his long run with the night-sight gun he won.

* * * *

Bill Price says the fellow that wrote "O, why should the spirit of mortal be proud," never won a challenge cup in the Golden Gate Club.

* * * *

Eugene Forester could make a better score if the turn-up in the discard was a jack. Fifteen two, fifteen four, etc.

* * * *

We would see more of Bill Sanborn if Uncle Sam would issue a recall for all the automobiles.

* * * *

We hope to see more of our genial friend, Fred Burnham, this year at Alameda. He keeps the boys in good spirits.

If J. Henry Jones could make the smoke fly from the rocks like he does from that old pipe of his he would be the Smokum Kid.

* * * *

John Connolly and Rube Harris can be seen every week with a nice string of ducks. No wonder they can always run up a good score on the rocks.

* * * *

Bill Higgins thinks the Sacramento Club will take up all of his time and attention. So long, Bill.

* * * *

Our genial friend, Pop Merrill, is getting the Moraja Valley club ready for the boys. It will be right up to the minute.

* * * *

Larry Middleton can be seen any day at his office pointing his trusty at an imaginary bird. Not much longer to wait, arry.

* * * *

One of the old guard, Bill Simonton, is visiting San Francisco. Bill says he wishes he could stay for the grand opening but Du Pont is Du Pont.

* * * *

Al Cook is back from the north. Al predicts that he is going to show us how records are made with his brand new Western.

* * * *

Ted Riley has ordered about 50,000 new shells. Every blue rock will be a duck that Ted didn't shoot this year.

* * * *

It is very noticeable around the Copper Kettle Club that the boys are polishing up their shooting irons for some purpose. Bill says it's signs of blue rocks.

* * * *

Bill Stadfeld is going to order a black sweater so that those who shoot can read his shells. Bill will be right there when the season opens.

* * * *

Walter Burlingame, the genial treasurer of the San Francisco Chronicle, has an ark on the San Antonio Creek and every week-in finds him hiking for the sausalito ferry. Mr. Burlingame is an ardent devotee of the rod.

* * * *

Al Wilson and Bob Sangster get a deal of sport out of their gasoline launch. Both are experts with the rod and reel as well as with the gun and get a deal of sport on the water.

FISHING AND SHOOTING AT A STANDSTILL.

Fishing and shooting around local points has come to a standstill. Comparatively few of the regulars are even venturing out in the bad weather conditions and those that have braved the rain and wind bring back discouraging reports of lack of fish and game. For the past three weeks there has been little or nothing doing.

Predictions are further made that there is little promise of an improvement before the open season closes. The duck season concludes on the last day of this month and the birds will hardly be available while the rain continues. Whole flocks of ducks have been sighted on the bay but sighted only, for they stay far out of gun range.

The near-by streams and creeks are in such condition that the anglers have given up attempts to land any good baskets.

* * * *

The California Anglers' Association is going to hold its eleventh annual meeting and smoker on Monday night next at the club rooms, 935 Market street. Members have cordially been invited to attend and join in the fun.

* * * *

Ducks have been so scarce in the Suisun marshes that the members of the Cordella Club have closed up for the season. They figured that it was hardly worth while staying open until the bars go up the last day of the month. The storm and rains have played havoc with the sport around the bay points.

H. E. Foster reports that he noticed the first Wilson snipe (Gallinago delicata) on Winters Island, Contra Costa county, on September 27, 1915. Eighteen birds were in the flock but when seen again on October 3rd they were in fewer numbers.

* * * *

The San Francisco Striped Bass Club held the annual election of officers on Monday night. Alvin W. Thornton was re-elected president, W. Von Dohlen, vice-president; J. S. Turner, secretary; Charles H. Kewell, treasurer, and N. Rothman, captain. The ladies' night and distribution of prizes was staged Thursday night at a downtown restaurant.

* * * *

"In a certain quarter it is recommended that California adopt the game preserve system of Great Britain and Ireland, but that system allows only persons of fortune to hunt, while California follows the theory that fish and game belong to the people of the state unless the legislature permits private rights," said Carl Westerfeld, State Fish and Game Commissioner, in his talk at the weekly luncheon of the League for Home Rule in Taxation.

"One out of every 665 persons hunt in Great Britain while in California the ratio is one to 15.

"Seventy men in Scotland own all the deer shooting privileges. In California 19,000,000 acres are set aside for game preserve, which is equal to the total area of Scotland.

"There are about 5,000,000 hunters in the United States, who, in case of war, would form a large army."

ELK GIVEN TO ALABAMA.

Hon. John H. Wallace, game and fish commissioner of Alabama, received a telegram recently from the keeper of Yellowstone Park informing him that he had caught fifty elk and was ready to ship them to him. They are a gife from the United States to the State of Alabama, and the keeper of Yellowstone Park was busy for some time catching the fifty elk to be presented by Uncle Sam to this State. A bill was passed by the last Legislature authorizing Mr Wallace to bring the elk to Alabama and turn them loose on land suitable for their propagation, on a line north of Calera, which is the natural habitat of the elk. The bill was passed all right protecting the elk in Alabama for a period of ten years, but at the last moment Senator Lusq had an amendment attached to the bill saying that Alabama should not pay any of the freight for bringing the elk to this State. Commissioner Wallace, however, has a scheme on foot to get the railroads to bring the elk through without cost to the State, as he is very much interested in getting this number of elk on Alabama soil. He is of the opinion that with a fair chance they would multiply rapidly, and at the end of ten years would be plentiful enough to make good shooting for those who like to hunt big game.—Big Game Hunter, in American Field.

MOVE MADE TO PROTECT TUNA FISHING.

Plans have been completed for the purchase of a power boat to control the Coast from San Luis Obispo to the Mexican line. In the past the deputies have been forced to depend upon hiring craft to fulfill their duties and they have been at a big disadvantage. The move is in a direction to protect the tuna fishing industry, which is making itself prominent as each year goes by.

A sort of international question presents itself in looking after these fish that have jumped into popularity . The California Fish and Game in commenting on the subject says:

"It is reported that representatives from the Pacific Coast will ask our government to seek the purchase of Lower California from Mexico. Lower California, besides the harbor of Magdalena Bay, possesses valuable fishing resources. Many of the sea fishes taken in California waters spend their spawning season off Lower California. In fact, that is their principal residence and they follow their food into California waters during the summer time. To properly conserve these fish, the most important of which is the long-finned tuna, it will be necessary to protect the young and the spawning fish in Lower California waters. The value of the long-finned tuna pack in California exceeds $1,500,000 a year and the stability of this great industry will depend on the protection the fish get in Lower California. This protection could best be given if the United States government had control, for Mexico has not protected her west coast fisheries in the past and is not likely to do so for some time in the future.

RARE BIRD KILLED BY DUCK HUNTER.

While in Minneapolis recently, Edward Banks of Wilmington, Del., came across a rare bird that had just been killed by a duck hunter on a lake not far from Minneapolis, the bird being shot while flying with a flock of mallards.

This hybrid is a curiosity, the indications being that it is a cross between a mallard drake and a Canada goose, having a glossy or metallic green head and upper neck with the white ring dividing the dark chestnut coloring of the breast and down on the body; the bill is orange yellow; the short wings are mottled; legs and web feet orange yellow; body ashy gray and in size and conformation that of a goose; it weighed when killed ten pounds.

It is certainly a rare avis, and we do not recall another specimen of the kind.

In speaking of the bird Frank G. Simpson of Winnipeg, Man., says: "I have never seen one of the kind, though I have heard of it, and my idea is that it is a mallard drake cross on a Canada goose; if it had weighed less than ten pounds the cross might possibly have been on a Hutchins goose or white front albifrons. I do not think that a full green head and neck would be so likely of production from a gander and mallard duck; moreover, a mallard drake would more easily accomplish the act on a goose on account of his size and activity, whereas a Canada gander would have difficulty in treading so small a bird as a mallard duck. The fact of its having been found amongst mallards might mean that life with them was more congenial than with geese, which are of a very clannish nature and not at all tolerant of other birds associating with them."—American Field.

TELLING THE AGE OF A FISH.

The age of a fish can be determined with accuracy by inspection of the otoliths, or bony concretions, which are found in the auditory apparatus. These otoliths increase in size during the entire life of the fish, each year adding two layers, a light colored layer formed in summer and a dark layer formed in autumn and winter. The alternate layers are sharply contrasted and very distinct, so that there is not difficulty in counting them. The number of pairs of layers is equal to the number of years the fish has lived.—Scientific American.

McCLOUD RIVER SITUATION.

The Fish and Game Commission has learned that at a recent joint meeting of the boards of supervisors of Shasta and Siskiyou counties at Redding, the advisability of condemning, purchasing and throwing open to the public to fish of thirty miles of the McCloud river was considered. The land and water is owned by a number of wealthy people, who have placed barb wires and prohibited anglers from enjoying their favorite sport. In this they are said to be within their rights to control privately-owned property but under political code 4085½, declaring innavigable streams may be declared public highways by action of the county supervisors, there is ground to secure the fishing stream for the benefit of the public at large.

The thirty miles of the McCloud river is said to be one of the finest trout streams anywhere in the country. It extends in Shasta and Siskiyou counties and the supervisors of these counties are being urged to take action. For years the stream has been stocked with trout at the expense of the state. The supervisors seem to be in favor of granting the appeal of the anglers throughout California but are hesitating for lack of available funds with which to purchase the property. In order to get around this difficulty it is said that anglers are willing to raise several thousands of dollars to help defray the expense.

The Fish and Game Commission is on record as approving the contemplated action of the supervisors. It sees no reason for tying up the great trout stream and preventing the anglers of the state from enjoying their favorite sport.

BRUNER WINS VERNON CLUB TROPHY.

Once more the Vernon Gun Club shooters played the great outdoor sport of "dodging the raindrops and getting the targets" Sunday morning and afternoon, when the eleventh fifty-bird contest for the Wilshire trophy was staged. Stanton A. Bruner copped the eleventh leg on this trophy, bringing true his predictions of last week. His score was forty-seven birds broken out of the fifty thrown. He was also winner in class A in the second competition on the four silver loving cups, showing himself to be some shooter when he gets down to business.

C. E. Groat, president of the Vernonites, tied with "Doc" Packard for second high score, each breaking forty-six out of the fifty.

Nineteen shooters in all showed, and all of them competed in the Wilshire competition. The gunners were rather surprised at seeing George Oliver of Hercules fame on the grounds. George broke forty-seven out of the fifty also, which is better shooting than he has displayed in some months. Tough luck for Oliver that he is a professional.

Du Pont Guy Holohan also came out in his new motorboat and broke forty-four.

Sheriff John C. Cline and son, Harry Cline, were also among the tarhawk squelchers to take a crack at the birds. The scores:

Name—	Hdp. Yds.	For cup. Trg.	Brk.	Practice. Trg.	Brk.
R. L. Hall	18	50	40	100	91

SEVEN YEAR OLD LAD A CRACK SHOT.

Seven and a half years—starting from the time when one first sees the light of day—wouldn't seem much time in which to get a start in life, would it?

However, Richard L. Beck, youngest son of Mr. and Mrs. F. G. Beck of Bridgeport, Ohio, hasn't even needed all of this short period to get his name before the people of the Buckeye State and finally, through the press, to the entire country.

Long before Richard was big enough to know for certain whether the big stream that runs near his home is the Atlantic Ocean or the Ohio River, his father began to school him in the use of firearms. A few weeks ago, Richard's parents took him to the local photographer and had his picture taken with a Remington .22 calibre rifle at his side. The picture shows that the rifle, which is only about thirty-nine inches long, reaches up well past the youthful marksman's chin, which is all the more evidence that this particular candidate for the Hall of Fame among shooters is not unusually tall for his age.

Although the people of Belmont county, in which Richard lives, of many of the surrounding counties and particularly of the nearby city of Wheeling, W. Va., had long known of the Bridgeport boy's prowess, Richard did not make his best record until the latter part of 1915 when, shooting at a ⅝-inch bull's-eye from standard distances, he scored 55 out of a possible 60 points with twelve shots, 28 out of a possible 30 with six shots and 23 out of a possible 25 with five shots. This phenomenal shooting attracted so much attention that the story was printed in Wheeling papers and has since found its way into many other publications.

MISSOURI QUAIL FOR WASHINGTON.

A shipment o fone hundred and fifty-six quail has been received in Spokane, Wash., from Kansas City, Mo., completing the consignment of six hundred birds purchased by the Spokane County game and fish commissioners to be distributed in Spokane county this winter. Out of a total of six hundred and one birds shipped to Spokane, five hundred and ninety-nine of the feathered stock arrived in excellent condition. The total cost to the sportsmen of Spokane county for the birds was $1,192.56, of which $1,100 was for the birds and $92.56 for express from Kansas City to Spokane. The cost of the birds is taken from the general game fund, which results from the payment of license fees to the county each year and is turned over to the county commission to improve the bird and fish situation in Spokane county. The birds will be taken out into the country and liberated only on ground where shooting is allowed by the farmers. Where "no shooting" signs are posted, no birds will be distributed. Arrangements have also been completed with the Spokane & Inland and the Washington Water Power Company whereby freight crews of trains running out of Spokane will carry a supply of grain hay to be distributed along the right-of-way as a food supply for the quail and pheasants. The game warden of Spokane will also make trips into the country daily and distribute food for the birds in places not reached by the train crews.

GRAIN DONATED TO FEED STARVING BIRDS OF THE NORTHWEST.

Seattle millers have set an example for aiding the King county game commission to keep the game birds of that section from starving. Recently one firm presented five tons of screenings to the commission, while another sent in two tons. Both contributions were packed in small 10-pound cartons or sacks. The King county game commission mailed the parcels to the children of the rural schools throughout the county for distribution.

Members of the Tacoma game commission have started a campaign in the hope that some of the Tacoma millers will follow the example set in Seattle. They say that help is needed badly or the pheasants and quail are liable to die of starvation.

DEATH OF MR. GEO. L. LYON.

The following press announcement from Albuquerque, New Mexico, will be read with deep regret by every trapshooter in America:

George L. Lyon, 34, of Durham, N. C., amateur champion trapshooter, died here today of tuberculosis. He had been a resident of the city five weeks and was but recently elevated to the thirty-third degree in Masonry.

George L. Lyon has held the undisputed championship as the world's most expert trap shooter since 1911. He won the title in the closing day's shoot of the Westy Hogan tourney, held on Young Ocean Pier, Atlantic City. Lester German, the Maryland professional, was the closest contestant for the inanimate target championship and the "E. C." cup. The two led the field of fifteen best amateurs and professionals in the country, when they tied with 179 out of a possible 200.

German challenged the victor to defend the cup and a meet was arranged for the succeeding month on the grounds of the DuPont Gun Club in Wilmington. "Chief Bull Durham" Lyon, the title he earned athletically, retained the championship of the world, winning from German by a score of 174 to 170, each man shooting at 200 targets. The contestants then shot at 50 targets each under the expert rules, Lyon breaking 40 and German 42.

Because of his expert marksmanship he was selected as a representative from the United States in July, 1912, to the Olympic games in Stockholm, Sweden. He was made coach and captain of twenty good marksmen that made the tour.

He added further laurels to his brilliant career as a trapshooter when in May, 1915, he made a clean sweep of the New York Athletic Club's tenth annual amateur championship at clay targets. He made two new records. The highest score in the history of the sport was made—191 out of 200—beating 143 contestants. In the preliminary championship during the previous April he won with a new record of 191 out of 200.

George Lyon was born in Durham, North Carolina, February 3, 1881. His marriage to Miss Snowden Carr was solemnized on November 6, 1900. Mr. Lyon's mother was Miss Mary Duke, sister of Jas. B. and Benjamin Duke, of New York City, tobacco manufacturers.

His inheritances and accumulations contributed to net him a wealthy income. His personal wealth was estimated at a half million dollars.

CALIFORNIA TROUT SEASON IS BOOSTED.

J. Buchanan Siders of Los Angeles is of the opinion that 1915 was the most successful trout season ever experienced in California. In the following article to an Eastern publication, Mr. Siders has the following to say of the sport:

The trout season in California, which has recently closed, has been the most successful of any ever experienced in the history of the state. This was made doubly sure on account of the great number of visitors here this year, who came to see the expositions. Their California friends would take them to the mountains and the lakes to "lure the speckled beauties."

And it may truthfully be said that more pounds of trout were caught in California this year than in any other state in the Union.

In the early part of the season trout fishing was good in all of the streams which flowed directly into the sea or into some large river. But during the latter part of the season the largest catches were made in the mountain lakes.

Lake Tahoe seemed to be a favorite for the big fellows. Some fine specimens were caught there which weighed over twenty pounds.

One caught in Lake Tahoe by Mr. Gus Hagermann weighed 18 pounds.

Mr. Hagermann made another very successful trip from his home at Rubicon Springs, Lake Tahoe, to Barker Springs, where he found the trout very anxious to take the artificial bait, and he soon landed ten beauties.

Big Bear and Little Bear lakes in San Bernardino county proved to be meccas for the fishermen this season. The trout in these lakes were very lively and seemed to be hungry. They pounced upon every grasshopper and cricket which was so unlucky as to fall into the lakes, and then, when the fishermen cast the lures into the greenish blue waters, there was a rush and a swish and a big fight was on. None of these trout will come out without a terrific battle.

The trout fishing laws in this state seem to be very satisfactory to the fishermen now. The Game and Fish Commission will keep on restocking lakes and streams as they have done and will try to increase the supply of this splendid game fish.

A string of of twenty-five was caught in Little Bear lake by Mr. J. Lenthensee, of Los Angeles, in three hours.

As the trout cannot be taken with pump-guns or caught from a seat in an automobile with any great success, they have a fair chance to escape extermination.

NOTES GATHERED HERE AND THERE.

The members of the Injunction Gun Club of Colusa have each been served with a summons requiring them to appear before the superior court and show cause why they should not be restrained from trespassing on the hunting lands of Ellis & Myers, who have leased the lands of the Moulton Irrigated Lands company for hunting purposes.

The plaintiffs ask that defendants be restrained and enjoined from entering and trespassing upon said leased land, or shooting, killing or driving away ducks, geese and other wild game birds thereon.

That an injunction pendente life be issued.

That plaintiffs have such other, further and different relief as the court may deem just and equitable and for costs of suit.

The defendants were also notified that an action had been brought against them in the superior court by the plaintiffs, Ellis & Myers, and that the complaints in the action had been filed in the office of the county clerk.

They were also directed and required to appear and answer the complaint within ten days after the service of the summons; that if they failed to appear and answer said complaints, judgment will be taken for any money or damages demanded in the said complaint.

* * * *

Tom Hunt, keeper of the Glide Gun Club grounds on the Yolo side below Sacramento, was drowned and Pat Bolan, his companion, was rescued from the water after his cries had attracted the attention of a dredger crew.

Hunt and Bolan were returning to the club grounds in a duck boat, which was laden with provisions. When they were within a short distance of the dredge Lisbon, which is at work in the Yolo basin, the boat capsized. Hunt was unable to save himself, and Bolan, who clung to the side of the boat as it whirled over and over, attracted the attention of dredged employes, who rescued him from the water and also recovered the body of hunt.

Hunt had been to Sacramento to see his mother off to San Francisco and was returning to his duties at the club grounds when the accident occurred.

* * * *

A man who resides in Arnold, Wis., was recently arrested for shipping one hundred and thirty-seven grouse to a commission man in Chicago. He pleaded guilty to the charge and was fined $640 and costs. The birds were confiscated by the deputy wardens making the arrest. This is said to be the largest fine ever imposed in Wisconsin for violation of the state game law.

* * * *

The home of Ty Cobb, the great baseball player, is in Georgia, and each winter after the ball-playing season ends, he spends most of his time game shooting. He has recently become financially interested in a large game preserve in his native state, and every winter henceforth he will indulge his love for hunting to a greater extent than ever before. Ty is said to be a very good game shot, as well as a good ball player. One day recently, with three companions, the quartet bagged sixty-five quail and one wild turkey, and it is said that one of the party exceeded the bag limit.

Drink Jackson's Napa Soda.

THE FARM

THE FERTILIZER SITUATION IN THE UNITED STATES.

Washington, D. C., January 3.—The Secretary of Agriculture today made the following statement regarding the fertilizer situation:

American farmers are confronted by a serious situation in reference to fertilizer materials. As a result of the embargo placed by the German government on the exportation of potash, the supply of this substance has been entirely cut off. Under normal conditions sulphuric acid, which is required for making super-phosphates, is sold for $5.00 or $6.00 a ton. The increased demand for it since the breaking out of the European war has caused the price to rise to about $25.00 a ton. It is impossible therefore for farmers to secure super-phosphates at prices which they have been accustomed to pay. The nitrogen supply is not materially less than usual.

In 1913, when conditions were normal, about $125,280,000 worth of commercial fertilizers was used in the United States. Of this amount, the farmers paid $48,830,000 for nitrogenous substances, $56,000,000 for phosphates, and $20,450,000 for potash salts. Practically all the potash salts were imported from Germany and the entire quantity of nitrate of soda came from Chile. Ammonium sulphate to the value of $3,720,000 was received from abroad, mainly from England. The remainder of the fertilizer materials was derived from domestic sources.

THE POTASH SITUATION.

There is practically no potash in this country at the present time for fertilizer use. The small quantities which were held over from former years are now priced at from eight to twelve times their normal value. The investigations of the Department and the Geological Survey have shown the possibility of producing from American sources an ample supply of potash salts for domestic consumption. These sources are: The giant kelp of the Pacific Coast from Lower California to Alaska; the alunite deposits, mainly in the mountains of Utah; the feldspathic rocks of the eastern part of the United States; and the mud of Searles Lake, in California.

Feldspar and Searles Lake: The production of potash from feldspar is commercially feasible if a salable by-product can be secured at the same time. The suggestion has been made by the Bureau of Soils that cement is a possible product from the feldspar treated to render the potash soluble. But the difficulty of marketing this cement in competition with thoroughly standardized products would be a great deterring factor.

The development of Searles Lake as a source of potash presents a number of unsolved technical problems. In addition, the question of title to the property is so involved that considerable time will elapse before it can be settled. In the meantime nothing can be done.

Alunite.—Alunite, a mineral which evists in considerable quantities in Utah and neighboring States, contains about 11 per cent of potash. It is decomposed by roasting at a temperature of about 700 degrees, with the evolution of oxids of sulphur, and a residue consisting of alumina and potassium sulphate remains. From this residue the potash salt can be obtained readily by leaching and evaporation. The process is simple. The fumes liberated can be used to manufacture sulphuric acid. Alumina resulting as a by-product will be suitable for the manufacture of metallic aluminum. One large company has begun the manufacture of potash from alunite and is reported to have made some preliminary shipments. It is understood that another large concern is about to begin the erection of the necessary plant for the production of potash from this mineral.

Giant Kelp Beds.—An ample supply of potash for the needs of farmers can be obtained from the giant kelp beds. These beds have been surveyed by the Bureau of Soils and a report, accompanied by maps showing in detail their extent and location, recently has been issued. Harvesting is accomplished easily, as the kelp grows in open water and barges fitted with mowing attachments can be used.

For utilizing the kelp several methods are feasible. It may be dried and ground. In this condition it contains all the salts originally present, which are mainly potassium chlorid and sodium chlorid. This material has ideal mechanical properties for use in mixed fertilizers. When the pure potassium chlorid is desired it is necessary to separate the juice from the organic material and then remove the sodium chlorid. The latter can be done readily by recrystallization; but the separation of the juice from the organic material is more difficult, for the reason that the kelp is nonfibrous and in attempts to effect separation by filtration the filters became clogged and unworkable. The problems yet to be worked out commercially are the best methods of drying the wet kelp and of effecting the ready and efficient separation of the plant juices from the organic material. Investigation of these questions has proceeded far enough to indicate that their solution should not be very difficult.

Three large concerns have begun operations for the manufacture of potash from kelp. While potash is indispensable in the preparation of fertilizers, it is also used for many other purposes, including the manufacture of matches, glass, liquid soap, and munitions. The prices offered under existing conditions by the manufacturers of such articles undoubtedly will cause practically the entire output of these concerns to be diverted from the fertilizer industry. It seems unlikely that normal conditions will be restored in the immediate future and that potash can be secured from foreign countries as heretofore in time for the next crop planting season. It also seems improbable that private enterprise will provide potash from domestic sources for agricultural purposes in time. It would require ninety or more plants, costing approximately $50,000 and having an operating capital of about $25,000 each, to produce the quantity needed for agriculture. This would involve the assumption that the commercial phases of the problem were satisfactorily solved. Even if the requisite funds were available, it is a question whether operations could begin in time to provide an adequate supply for the coming year. The Department is investigating all aspects of the question and is planning to send experts to California to study the situation and especially to consider the possibilities of production on a commercial scale.

One fact has operated in a measure to enhance private enterprise in this field. There is no legislation in any of the Pacific Coast States, along whose shores the kelp lies, providing for the leasing of kelp beds. Without leases private investors would have no assurance that plants erected by them would have the necessary control over the kelp within their vicinity. The Department's officers will discuss this matter with the proper authorities in the Pacific Coast States and will urge the necessity of legislation regulating the use of the beds.

THE PHOSPHATE SITUATION.

Acid phosphate is the basis of nearly all commercial mixed fertilizers. It is made by the action of sulphuric acid upon phosphate rock. Our available sources of phosphate rock are greater than those of any other nation. The main supply for domestic consumption and for exportation comes from Tennessee, South Carolina, and Florida. The United States Government, however, owns vast deposits of phosphate rock in Utah, Wyoming, Montana, and neighboring States. These deposits have been withdrawn from private use pending legislation for their utilization and no supply has yet been developed from this source.

In 1914, 2,734,000 tons of phosphate rock were produced in this country. Up to that year about one-half the quantity mined was exported from Europe. The rock in its natural state is not readily absorbed as a plant food. It is made available for this purpose by treatment with sulphuric acid, about 1 ton of the acid being used to a ton of phosphate rock. When thus treated, a super-phosphate containing 14 to 18 per cent of water-soluble phosphoric acid is made. The bulk of the sulphuric acid which enters into the manufacture of acid phosphate is made by fertilizer companies. Practically every fertilizer establishment excepting the cottonseed meal factories) having an annual capacity of 15,000 tons or more operates also a sulphuric acid plant. The demand for the acid is so strong at present that every effort is being made to utilize old and abandoned establishments and to erect new plants. The latter operation is slow and costly on account of the large amount of lead necessary for the construction of acid chambers. Difficulty is also being experienced in securing an adequate supply of pyrites, which is the principal source of sulphur.

The potential sources of sulphuric acid in the United States are ample to produce more than double the present annual output. Few of the lead, zinc, or copper smelting companies using sulphide ores have sulphuric acid plants in connection with their smelters. The fumes discharged into the atmosphere by these smelters are sufficient to produce many thousands of tons of sulphuric acid daily. Under normal conditions, the limited market for the acid and the long haul necessary to reach the market have made it commercially impracticable to convert the fumes into sulphuric acid. It is entirely feasible to erect sulphuric acid plants in connection with the copper, zinc, and lead smelters using sulphide ores. The concentrates of the ores may be roasted in furnaces independent of the smelting plants or the fumes may be delivered direct to the acid chambers.

The erection of acid plants of sufficient capacity to convert the smelter gases would involve an outlay of at least several million dollars. Under normal conditions it would take four months to complete the plants. In the present situation, at least six months would be required. The Bureau of Soils estimates that sulphuric acid could be made by some of the western smelting plants at approximately one-half the normal cost of producing

HIGH-CLASS TROTTING BRED COLTS FOR SALE.

No. 1. Three-year-old filly sired by All Style, dam Dr. Hicks. This filly is registered.

No. 2. Two-year-old colt, full brother to the above.

No. 3. Two-year-old filly sired by Dan Logan, dam a Wilkes mare who was a great natural pacer but unfortunately was crippled by a barbed wire accident as a yearling and was never worked.

The All Styles are large, strong built, with all the style of their sire, perfect in action, and all three of the above colts should make race horses second to none. The Dan Logan filly is perfectly gentle to handle and drive and is a high-class filly in every respect. Apply to or address,

I. F. EATON, Chico, Cal.

BEAUTIFUL BELVEDERE

LOTS FOR SALE

CORINTHIAN ISLAND Subdivision to Belvedere is the most beautiful spot on the shores of San Francisco Bay for a suburban home. It commands an extensive view of the City of San Francisco, Alcatraz and Angel Islands, Raccoon Straits, San Francisco Bay, Richardson's Bay, the Berkeley shore, beautiful Belvedere and Mt. Tamalpais. It is in Marin County, directly opposite San Francisco, and forms the eastern shore of Belvedere cove. It has a naturally terraced, sunny, western slope that is well adapted for many choice residence sites, every one affording most picturesque views of the bay and mountain. It is protected from the prevailing western trade winds in summer by Belvedere Island, and from the southerly storms in winter by Angel Island. The soil is fertile and part of the island is well wooded.

It is less subject to fog than any other place near San Francisco. The summer fog, as it rolls in from the ocean, splits on the western slope of Sausalito, part of it flowing in a line with Angel Island towards the Berkeley shore, and part of it along the southern slope of Mt. Tamalpais, leaving Belvedere, Corinthian Island and Raccoon Straits in the bright sunlight, while the fog banks can be seen as a white wall both to the north and the south.

There is very little available land about the shores of San Francisco Bay that is desirable for homes, especially for those who love boating and kindred sports. The Alameda and Contra Costa shores of the bay are the lee shores and receive the full brunt of the boisterous trade winds which lash the shoal waters near the land into muddy waves, making boating both unpleasant and dangerous. To the north of the city and in Marin County the land from Sausalito to the entrance of the bay is a Government reservation and will never be placed on the market. The shores of Richardson's Bay are not at present convenient to boat service and, aside from Belvedere and Corinthian Island, there is little or no land near any ferry landing that possesses the natural advantages, improvements and possibilities that are offered on Corinthian Island. Concrete roads, pure water, telephone service and electric light wires are already installed. It is only ten minutes' walk from any point on the property to Tiburon boats, and but forty-three minutes' ride to the foot of Market Street.

On the point of Corinthian Island the Corinthian Yacht Club has had its home for many years, and on any summer day the white sails of its numerous fleet add to the charming scene, as the trim yachts glide about the cove. Excellent fishing of all kinds for bay fish, including salmon, the gamey striped bass, rock fish and the toothsome silver smelt, is to be had in the cove. There is probably no spot so accessible and in such close proximity to any large city in the world that offers the attractions of climate, magnificent scenery, fishing and boating as will here be found.

THE FERTILIZER SITUATION

[Continued from Page 12]

the acid in the East where pyrites is used. The saving in cost of manufacture in the west, however, would be partly offset by the long haul necessary to bring the acid to the eastern market.

In view of the difficulties in the way of the production and utilization of sulphuric acid for fertilizer purposes, the Bureau of Soils has endeavored to develop a commercial method, involving the use of the electric furnace, for manufacturing phosphoric acid, which can be used as a substitute. Through this method double super-phospate, which will contain 40 to 50 per cent of water-soluble phosphoric acid, or the still more concentrated form of ammonium phosphate, could be secured. But the use of the electric furnace for the purpose is commercially feasible only where phosphate rock, coal, and cheap water power are readily available. The Department is investigating this matter to ascertain whether there are localities where these conditions exist and where, therefore, double super-phosphate may be made.

THE NITROGEN SITUATION.

The nitrogen situation is of less pressing concern. Cottonseed meal forms the bulk of the nitrogenous substances entering into commercial fertilizers. The amount available for fertilizer use is dependent upon the annual production of cotton and the demand for the meal for feeding stuffs. The supply of dried blood and tankage, also sources of nitrogenous material, is dependent upon the number of animals slaughtered. Only a few large packing concerns conserve these products, which are now used to a considerable extent as cattle feed as well as for fertilizer purposes. Investigations of the Bureau of Soils have shown that there is a large amount of waste from the fisheries and fish canneries, especially on the Pacific Coast and in Alaska. This material could and should be made into fish scrap, which would have a value of about $1,200,000 for fertilizer purposes.

Owing to the demand for nitric acid for munition purposes, the price of nitrate of soda advanced approximately $1.10 per hundred pounds during the year prior to November, 1915. Only a very small percentage of the nitrates imported from the Chilean beds goes into fertilizers, being mainly incorporated in special brands for greenhouse and trucking purposes. This item alone, therefore, will not cause much embarrassment to American farmers.

One of the most important sources of nitrogen for commercial fertilizer purposes is ammonium sulphate. This is produced as a by-product in the destructive distillation of coal for the preparation of coke. The nitrogen contained in the coal is evolved as ammonia and is caught and neutralized with sulphuric acid. Formerly all coke was made in the beehive oven which did not provide for the confinement of the combustible gases produced. These were burned as evolved and the ammonia carried by them was likewise lost. The domestic production of ammonium sulphate from the coke oven is only one-fifth of what it could be were the beehive oven entirely displaced by more modern types. During the past few years there has been a slow transition from the use of the beehive oven. It is not imperative, therefore, to resort to extreme measures to increase the production of ammonia.

[Concluded Next Week.]

THE HISTORY OF AXLE GREASE

By

The Whittier-Coburn Company,
Makers of C & S AXLE GREASE and C & S GRAPHITE AXLE GREASE.

While lubricants have been used on axles ever since the first pair of wheels was corved out of wood, the axle grease of the present day is of comparatively recent manufacture.

Probably the first lubricant of any kind to be used on axles was pure animal fat—quite similar in every respect to the grease the housewife of today uses in greasing her pans. This met the requirements of that day and generation . . . and indeed, it is still used in some parts of the world.

We need go no farther than Cuba, or Central America, where the big clumsy wooden wheeled, ox-drawn carts are still in vogue. Each carrets, as they are called, carries a bottle of grease tied to the axle, so it will be handy when needed. Owing to the poor lubricating qualities of this tallow, the axles must be greased frequently.

What a contrast between this and our present day methods!

Various kinds of oils have been used for axle lubricants, but for the reasons, that they were too expensive, not heavy enough, etc., they have been discarded, notably Castor Oil, which is now prohibitive in price.

The ideal axle grease must embody these points—a good lubricant—must not contain acids that will injure the axle—must be durable—of sufficient consistency to withstand the summer heat—and in wet and stormy weather during the winter, Axle Greace must be sufficiently adhesive (without being gummy) so that the water will not wash it from the axles. Flake Graphite added in the manufacture to regular Amber Colored Axle Grease makes a combination which is particularly fitted to overcome moisture, and that is why A GRAPHITE AXLE GREASE is recommended during the winter months.

The labor-saving American public is willing to pay for anything that will, in the end, save them time or money. Although there are many cheap grades of axle grease on the market, the best brands which cost a trifle more are the only kind that have given satisfaction. Sensible purchasers throughout the world realize that quality means more than price, and that cheap greases cost more in the end.—For that reason, sales of high-grade axle greases are increasing every year.

NO RADICAL CHANGES

The new Model 80 Masterpiece jogging cart has no radical changes over the Model 8 Faultless cart, our biggest seller for many years. The mechanical design is the same but various details here and there have been improved on the suggestion of our President, W. H. Houghton (the premier constructive genius of the turf vehicle world) and other thoughtful horsemen. The first Masterpiece stood a rigorous seven months test before the new model was placed on the market. Send for booklet 206, which tells an interesting story of these details. A postal will do. Thank you!

Harpers Weekly and The Breeder and Sportsman

$5.50 WORTH FOR $3.25

Breeder and Sportsman

One Year, 52 Copies, Regular Price $3

THE BREEDER AND SPORTSMAN is the oldest weekly journal devoted to the Horse west of Chicago, having been established in 1882. This interest, together with the Kennel, Gun, Fishing, Coursing and kindred sports receiving the most attention in its columns; together with Agricultural and Dairying Departments, under whose headings especial attention is paid to the breeding, etc., of Cattle, Sheep, Hogs, Poultry, and all other animals connected with stock raising.

As an advertising medium to Racing Associations, Horsemen, Stock Breeders, Manufacturers of Sulkies, Carriages, Wagons, Agricultural and Dairying Implements and Machinery, Sporting Goods, Fanciers, Stock Foods, and all others desiring to bring their wares to the attention of the classes to whose interests the paper is devoted within the field mentioned above, the BREEDER AND SPORTSMAN will be found indispensable.

Harpers Weekly

Six Months, 26 Copies, Regular Price $2.50

At no time has it been so evident to Americans as now, that the most important thing in the lives of all of us is the progress of the European War.

Next to your daily bread the war interests you most vitally. It may even come to be the most important part of your problem of living.

The periodical of greatest fundamental interest to you today is the one that can best report those phases of the war that come closest to your country and you.

Because of connections abroad and at home, HARPER'S WEEKLY is that publication.

As a critical commentary that presents inside facts, it is the necessary bridge for intelligent readers between the daily newspaper and the monthly review.

You want HARPER'S WEEKLY now. You can get it now on trial at a remarkable reduction.

Send $3.25 Now and Get Them Both

THIS OFFER is made to all who will send us $3.25 before January 31st, 1916, whether for extension of subscription, renewal of subscription or a new subscription. Address:

GUNCRAFT

By W. A. Bruette

A modern treatise on guns, gun fitting, ammunition, wing and trap shooting.

The theoretical side of the subject has been covered with a scientific accuracy which makes it an up-to-date book of reference, and the practical side of wing shooting, gun fitting, the master eye, defects in vision and other important questions have been treated in a way that will enable either the expert or the amateur to determine if he is shooting with a gun that fits him and how to decide upon one that does. It will enable him to ascertain why he misses some shots and is successful with others. The secrets of success in trap shooting, as well as the peculiarities in flight of the quail, the jacksnipe, the woodcock, the ruffed grouse, and the duck family, are illustrated by drawings and described in a way that will facilitate the amateur in mastering the art of wing shooting.

Cartridge board cover, $1.00; Cloth, $1.50

Third Edition Within One Year of Publication.

CARE AND TRAINING OF TROTTERS AND PACERS

NEVER before in the history of the publishing world has a horse book gone into a third edition within one year of publication. Yet the explanation is simple—the book fills a long-felt want.

Never before has this subject been treated in a distinct manner. It has been handled in connection with autobiographies of trainers, but such works are out of print or out of date, for they were published 20 years or more ago. Conditions and methods have changed since then, and former treatises are just as much out of date as the high-wheel sulkies then in vogue.

"Care and Training of Trotters and Pacers" is as modern as a 42-centimeter gun. It does not contain the ideas of one man, but of 100 of the leading horsemen of the day, including Thomas W. Murphy, Walter R. Cox, and Edward F. Geers. These ideas were converted into book form by two prominent American turf journalists.

This book enables anyone to do his own caretaking and training until it is time to send the colt to a professional trainer, or the owner can train and race the colt himself. The treatise covers the details of a colt's life from the moment it is foaled until after its first year's campaign. The facts are clearly presented. Nothing is left to guess work. The language is lucid. Both theoretical and practical views are outlined and compared. The instructions are concise and easily understood. The work contains no advertisements—it is not a catch-penny publication that looks big in the advertisement but proves disappointing when received.

Many professional trainers have purchased the book and have found it interesting. Despite the war, over 300 copies have been sold in Europe and Australia.

Price $1.00 postpaid. Cloth, illustrated, 176 pages, 5x7 inches.

THE OFFICIAL HIGH AMATEUR AVERAGE

FOR THE YEAR 1915

WAS WON BY MR. WOOLFOLK HENDERSON, OF LEXINGTON, KY., USING

Peters SHELLS

Woolfolk Henderson

He Shot at 2800 Registered Targets, Broke 2731; Percentage .9753

THE HIGHEST YEARLY AMATEUR AVERAGE ON RECORD.

The wonderful record of Mr. Henderson in 1914, when he won the Four great amateur honors, is still fresh in the minds of the shooting fraternity. In that year he captured the Grand American Handicap, the Single Target and Double Target Championships of the United States and the High Amateur Average. His performance in 1915 is therefore but the continuation of a marvelous and thoroughly consistent record, made possible by ammunition of superlative quality.

PETERS SHELLS have been used by the winner of the United States Hight Amateur Average (official) FIVE OUT OF THE PAST SIX YEARS

THE PETERS CARTRIDGE CO., Pacific Coast Branch, 585-587 Howard Street, San Francisco, Cal.

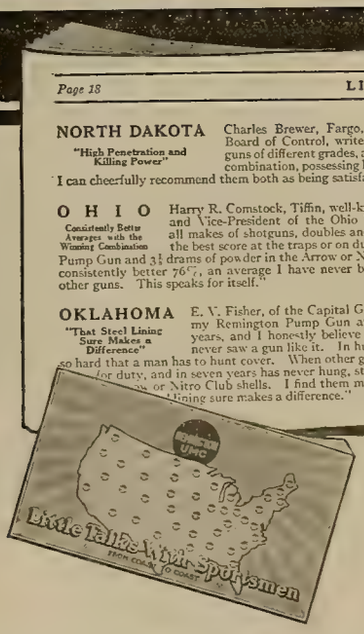
C. G. Spencer

The Big Winner In 1915

The Interstate Association's Official High Professional Average for the season of 1915 was won by Charles G. Spencer, of St. Louis, Mo., with the marvelous record of 97.5% for 5620 targets. Such an average for such a large number of targets not only shows Mr. Spencer's great skill, but also proves the uniform and unequalled quality of

WINCHESTER

LOADED SHELLS AND SHOTGUNS



which Mr. Spencer used exclusively. It was this same combination that he used when he made his marvelous straight run of 565 targets — the World's Record.

Contests for the Season's Trapshooting Averages have been held 16 times and 12 of them have been won by **W** shells or guns, or both, which is undeniable evidence of their superiority.

Lester German, of Aberdeen, Md., who was second high for the season, and who also made the greatest score of the year for a single tournament—499 x 500—used Winchester shells in performing this great feat.

J. Mownell Hawkins, of Baltimore, Md., shot 7,265 targets in competition during 1915, and made the splendid average of 95.56%, using Winchester shells and shotguns exclusively—more proof of their uniform shooting qualities. These performances show the reason why Winchester shells and guns are

PREFERRED AND USED BY MEN OF ACHIEVEMENT

Page 18 LITTLE TALKS WITH SPORTSMEN

NORTH DAKOTA "High Penetration and Killing Power"

Charles Brewer, Fargo, Secretary of the North Dakota Game and Fish Board of Control, writes: "For a number of years I have used Remington guns of different grades, and Remington-UMC shells. I find them an excellent combination, possessing high penetration and killing power. I can cheerfully recommend them both as being satisfactory in every respect." Chas Brewer

O H I O Consistently Better Averages with the Winning Combination

Harry R. Comstock, Tiffin, well-known Ohio sportsman, President of his local gun club and Vice-President of the Ohio Trap Shooters' League, writes: "Have used nearly all makes of shotguns, doubles and repeaters, but maintain that when I want to make the best score at the traps or on ducks, I always pin my faith to the good old Remington Pump Gun and 3¼ drams of powder in the Arrow or Nitro Club shells. With this combination my gun will consistently better 76%, an average I have never been able to make with my other guns. This speaks for itself." Harry R Comstock

OKLAHOMA "That Steel Lining Sure Makes a Difference"

E. V. Fisher, of the Capital Gun Club, Oklahoma City, writes: "I have been using my Remington Pump Gun at every tournament and locally, for the past seven years, and I honestly believe it is better to-day than when it left the factory. I never saw a gun like it. In hunting along the Canadian River, sand at times blows so hard that a man has to hunt cover. When other guns hang and clog with sand my Remington is always for duty, and in seven years has never hung, stuck, or failed to fire a shell. I never shoot any other ... or Nitro Club shells. I find them more uniform, and I think a harder shooting shell than ... Lining sure makes a difference." E V Fisher

Page 19 FROM COAST TO COAST

O R E G O N Attributes Success To Winning Combination

Henry F. Wihlon, champion trapshooter, Gresham, writes: "I have used a Remington Pump and Nitro Club shells for the past two years, and find them very satisfactory. I won the State Shoot in May, the Interstate Championship, the Honeyman State Championship, and Chingren trophy. I attribute my success to the Remington-UMC combination." Henry F Wihlon

PENNSYLVANIA "100 Per Cent. Perfect"

C. A. Jobson, of the Lock Haven Gun Club, Lock Haven, writes: "The first and most important step along the route to success in shooting is the selection of the gun and ammunition, whether it be for big game hunting, trapshooting, or target practice—all that is, or can be desired, is found in the Remington-UMC Red Ball combination. Your creation of the hammerless, solid breech, bottom ejection Pump Gun puts into the hands of sportsmen the best Pump Gun ever made, either for trap- or field-shooting, while the uniformity and effectiveness of the Arrow and Nitro Club shells make them the standard shotgun ammunition of the age. To try this combination means that the consistent user will always stick to it, and the better he becomes acquainted with your goods, the more he will be pleased with his choice. I consider Remington arms and ammunition as nearly 100% perfect as it is possible to manufacture, and it gives me great pleasure to recommend them." C A Jobson

RHODE ISLAND Handles All Makes of Shells

Arthur S. Lippack, of Providence, writes: "I have been using one of your Pump Guns for the last two years, and think it is the finest duck and trap gun I have ever owned. During this time I have used all kinds of loads and makes of shells, and have never found one that your Pump would not handle. I have owned three other makes of pumps, and have never had one besides the Remington that would do this." Arthur S Lippack

PAGES 18 AND 19, FOR INSTANCE — DO YOU WANT THEM All?

Here is a booklet of shooting and hunting talks by one representative sportsman in each State from Maine to California. A complete story in forty-nine chapters—some of the chapters by men you know—all by nationally or internationally known sportsmen..

If you are a beginner at the shooting sport, here is Experience ready-made for you, without cost. If you're a veteran, you'll want to compare notes with these "Been There" Brother Sportsmen—good fellows all.

A postal card will bring your free copy of "Little Talks With Sportsmen From Coast to Coast."

THE WORLD'S RECORD!!!

At Atlantic City Sept. 15 to 17 Mr. Lester German broke all Tournament Records by scoring 647 OUT OF 650 TARGETS, with one run of 372 straight, which is longest for the year.

PARKER GUNS have won the Grand American Handicap 9 times out of 25 offers, once with 100 straight, only time made. Also 7 out of 9 Interstate Championship Events with highest scores ever made, twice with 198 x 200 at 18 yards rise.

Remember

PARKER PACIFIC COAST RECORDS

In California Mr. Henry Pfirrmann won the Pacific Coast Handicap and Mr. J. Foster Couts won the Championship of California.

In Portland, Oregon, Mr. P. H. O'Brien by scoring 241 straight made the record for the Pacific Coast.

If interested in small bore guns write for instructive booklet which will be sent free on request. For further particulars regarding guns from 8 to 28 gauge, address

TRAINING THE HOUND

A PRACTICAL TREATISE ON THE TRAINING OF FOX HOUNDS, BEAGLES AND COON HOUNDS.

The system of training advocated is simple and effective, so that anyone who carries out instructions can easily develop a foxhound, a beagle or a coon dog to the highest state of usefulness or organize a pack in which each hound will work independently and at the same time harmoniously with the others. The subjects are: The Hound's Ancestry, History, Instinctive Tendencies, English and Native Hounds, Developing the Intelligence, Training the Foxhound, Voices and Pace of the Hound, Qualities of Scent, Manners, Training the Coon Dog, Coon Hunting, Training the Beagle Forming a Pack, Field Trial Handling, Faults and Vices, Conditioning, Selecting and Rearing Puppies. Kennels and Yards, Diseases of Hounds and Their Treatment. The chapters on field trial training and handling are alone worth the price of the book which is one that every man who loves the voice of a hound should read.

The book contains 224 pages, is clearly printed, nicely bound, and handsomely illustrated with bloodhounds, various types of English and American foxhounds, beagles and cross-bred dogs for 'possum and coon hunting.

Price, in heavy paper cover, $1; $1.50, postpaid.

BREEDER AND SPORTSMAN

BREEDER AND SPORTSMAN

VOLUME LXVIII. No. 5. SAN FRANCISCO, SATURDAY, JANUARY 29, 1916. Subscription—$3.00 Per Year

A good young trotter at Hemet Stock Farm

DON DE LOPEZ (2) 2:25

By Kinney de Lopez 2:23—Eradiate by Geo. W. McKinney 2:14½.—Driven in the Pleasanton Futurity by A. L. Blackwell and separately timed in 2:15½.

$3,000 GUARANTEED ONLY $2.00 TO NOMINATE MARE GUARANTEED $3,000

Pacific Breeders Futurity Stakes No. 16

TO BE GIVEN BY THE

Pacific Coast Trotting Horse Breeders Association

For Foals of Mares Covered in 1915 to Trot and Pace at Two and Three Years Old

Entries Close February 1, 1916

$1600 for Trotting Foals. **$1100 for Pacing Foals**

$150 to Nominators of Dams of Winners **$100 to Owners of Stallions**

$1000 for Three-Year-Old Trotters.
50 to the Nominator of the Dam on whose Original Entry is named the Winner of Three-Year-Old Trot.
600 for Two-Year-Old Trotters.
25 to the Nominator of the Dam on whose Original Entry is named the Winner of Two-Year-Old Trot.
50 to Owner of Stallion, Sire of Winner of Three-Year-Old Trot when Mare was bred.

$700 for Three-Year-Old Pacers.
50 to the Nominator of the Dam on whose Original Entry is named the Winner of Three-Year-Old Pace.
400 for Two-Year-Old Pacers.
25 to the Nominator of the Dam on whose Original Entry is named the Winner of Two-Year-Old Pace.
50 to Owner of Stallion, Sire of Winner of Three-Year-Old Pace when Mare was bred.

SPECIAL CASH PRIZES FOR STALLION OWNERS.

Given to Owners of Stallions standing highest in number of Mares nominated in this Stake that were bred to their respective horses, divided as follows:

FIRST PRIZE, $35; SECOND PRIZE, $15.

The Above Prizes will be Paid on February 20th, 1916

ENTRANCE AND PAYMENTS—$2 to nominate mare on February 1, 1916; when name, color, description of mare and stallion bred to must be given; $5 August 1, 1916; $10 on Yearlings January 1, 1917; $10 on Two-Year-Olds January 1, 1918; $10 on Three-Year-Olds January 1, 1919.

STARTING PAYMENTS.—$25 to start in the Two-Year-Old Pace; $35 to start in the Two-Year-Old Trot; $35 to start in the Three-Year-Old Pace; $50 to start in the Three-Year-Old Trot. All Starting Payments to be made ten days before the first day of the meeting at which the race is to take place.

Nominators must designate when making payments to start whether the horse entered is a Trotter or Pacer.

Colts that start at Two Years Old are not barred from starting again in the Three-Year-Old Divisions.

CONDITIONS:

The races for Two-Year-Olds will be mile heats, 2 in 3, not to exceed three heats, and if not decided in two heats, will be finished at the end of the third heat and money divided according to rank in the summary; and for Three-Year-Olds—three heats, money divided 25 per cent to the first heat, 25 per cent to the second heat, 25 per cent to the third heat, and 25 per cent to the race according to rank in the summary. Money in each division 50, 25, 15 and 10 per cent. Should two or more horses be tied for first place at the completion of the third heat, such horses only shall contest in a fourth heat and money divided according to rank in the summary at the termination of that heat. A horse having won the first two heats and drawn or distanced in the third heat shall not lose position in the summary. Distance for Two-Year-Olds, 150 yards; for Three-Year-Olds, 100 yards.

If a mare proves barren or slips or has a dead foal or twins; or if either the mare or foal dies before January 1, 1917, her nominator may sell or transfer his nomination or substitute another mare or foal, regardless of ownership; but there will be no return of a payment, nor will any entry be liable for more than amount paid in or contracted for. In entries, the name, color and pedigree of mare must be given; also the name of the horse to which she was bred in 1915.

Entries must be accompanied by entrance fee.

Nominators liable only for amounts paid in. Failure to make any payment forfeits all previous payments. This Association is liable for $3000, the amount of the guarantee, only.

Hopples will be barred in trotting and pacing divisions.

Right reserved to declare off or reopen these Stakes in case the number of entries received is not satisfactory to the Board of Directors.

Money divided in each division of the Stake 50, 25, 15 and 10 per cent. There will be no more moneys in each division or heat than there are starters.

Entries open to the world. Membership not required to enter; but no horses, wherever owned, will be allowed to start until the owner has become a member.

THE MUTUALS AND MR. SPLAN.

At various times in the last year or so we have presented ideas of our own or better men favoring the adoption of the pari-mutual machine as the sole medium for wagering on horse races, either in harness or under saddle, and now take pleasure in submitting an excellent view of the same system from one of the most widely known horsemen in the world, John Splan of Patchen Wilkes Farm. "The Only" was the storm center of many a spirited discussion of matters relating to the welfare of the trotting turf at the recent meeting of the stewards of the Grand Circuit in Cleveland, and when the subject of betting rolled around for consideration, he arose and expressed himself as follows:

"Since mutuals were made the sole system of betting at Kentucky runnig tracks, even some ministers are known to play their favorite horses. Now let me tell how I and some of my old cronies do when we feel like taking an afternoon off from daily cares of work and business to spend it at a running meeting. I take out a ten-dollar bill and divide it in five twos. One I set aside for expenses and hold the four bills to bet on four races.

"When I get to the track and buy a score card, I pick up my four choices, as do my friends. We plunge as the races come. If we land one winner we are about even on the day, as any winning bet, especially for place or show, gives fair returns, but if all is lost, we have had a whole afternoon's outing, recreation, amusement and excitement, for you see, we practically owned four horses in four of the races, while the entire cost was only $10.

"Now, for my day's vacation I paid a little something to the train man who took me to the races, handed a dollar or so at the gate to help along the man who offered me the chance to amuse myself. The good people will say, 'Well, how about the $8 you lost?'

"I will tell you what became of it. Another good, honorable and law-abiding citizen who was there for the same recreation and enjoyment I was after made a better selection and took away $7.50 of my money, while the 40 cents went to cover the expenses of the man who handled the mutuals, so I could have some excitement and think myself as owner of four horses that I told you before.

"But the dear, good man—the reformer—on the other hand, puts me down and the fellow who earned my $7.60 as a criminal for betting on horses, and let me tell you that he considers himself perfectly justified by placing me outside of the pale of decent citizenship even in this age of common sense and liberal ideas. Is he justified? Surely not, and I can tell him why.

"The man who won or earned my money was as much entitled to it as my tailor is to what he earns by making me a suit of clothes, the butcher and grocer who furnish my daily food, and the landlord who gives me a comfortable bed to sleep on in a warm room. As I said, the man who handled my $8 kept 40 cents. I knew this, and he did it as honestly and openly as the profit my tailor made in a straight, honest and businesslike manner. The man at the gate to whom I paid my dollar or so furnished just what I wanted and more, and later when I met him and his associates it did not take me long to be convinced that they were as fine a group of gentlemen as I had met among any other business and profession.

"They tell us that mutual betting is as much gambling as bookmaking, yet such statements indicate ignorance, as under this system you know just what you get in return for your investment and are no more dealing with a professional gambler than when treating your friends to a meal or some refreshment. You are simply paying men just what they are entitled to for serving you and waiting on you.

"You also have the satisfaction of knowing that your fellow citizen who earned your money—mind you, I don't say 'won,' because he took no advantage of me—was wise enough to choose a butcher who could supply better steaks for his meals than the one I had—he picked the better horse, and therefore enjoyed our mutually favorite amusement more than I to some extent. He neither cheated me nor took the least advantage of me.

"No man with any knowledge of or experience with racing can fail to admit that almost 100 per cent. of the knocks the sport has received in this country—it has never been damaged by other civilized peoples—has been due solely to the system of bookmaking, a feature against which much can be said, but which has absolutely not one redeeming aspect or excuse to have ever become an adjunct to the greatest and most enjoyable outdoor sport, pastime and recreation for humanity from time immemorial—the speed contest among the choicest and swiftest horses man has bred for ages.

"The sportsmen in charge of big line harness racing have done much for its present and future advancement and there are sure indications for more in the future, yet in my judgment none will benefit the turf and breeding industry more than the total elimination of bookmaking and adoption of the mutual system, the same as is the custom all over the civilized world."

TALKING IT OVER WITH VERNON.

If there is anything in this world for which I have less use than a hair brush it is a rainy day around a race track, so when I landed at Pleasanton Driving Park last Saturday in the rain I was up against it. Making a very extensive round of the stables was clearly out of the question, so I decided that about as good a thing as I could do to pass away the time would be to drop around and have a little talk with my old friend Vernon McKinney, whom I really hadn't seen to speak to since 'way along in the summer. I had been reading in a number of eastern exchanges that he was going to emigrate to Canada, or had already done so, and I wanted to see what he had to say about the matter. I found him very comfortably fixed up for a rainy day in the old familiar quarters in the first row of stalls at the MacKenzie plant, just picking his teeth after having had a very enjoyable sort of a lunch.

"Well, well, well," he chuckled as I stepped into the stall and shut the lower part of the door to keep out a raw wind, "look what the high water brought down! Say, you are quite a stranger, ain't you? If you wasn't looking for a stud ad you wouldn't be here now, I don't suppose, but sit down and stay awhile, anyway. A horse likes to have green things come in the spring, and God knows there's a whole lot of 'em that ain't grass." I let that sink in for a minute and then I told him about what the eastern papers said about him and Canada. He was peeved something awful.

"Where do them guys get that noise, anyway?" he snorted, after I had explained the situation to him. "Canada? Why should I go to Canada? Of course, if Rod needed me up there I'd just as soon go as not, but he already sent for Joe and Quintell, and they ought to be enough. I ought to stay here in California for awhile yet, anyway. You see, now that grandpaw has been gone down east for such a long time and is beginning to get old, California sort of seems more than ever like the place where I ought to live always. You see, I am the fastest member of our whole family, Uncle Coney and Aunt Sweet Marie being the only ones of paw's folks to go anywhere near my clip, while none of my cousins has ever got down to it yet either, and this, as well as having a few kids of my own growing up, has give me a feeling of responsibility that I didn't have at all in them happy days back up at Stockton when I was going to school to Willis Parker. I used to get out and hell around and go down the Grand Circuit and all them sort of things that a feller in my line does before he knows any different, but now I don't ask anything better than to stay here at home and watch my kids grow up.

"Take into consideration the number of our family that used to live here in California and there ain't such a lot of us left now, at that. Of course there are several uncles of mine still sticking around out here and all giving good accounts of themselves, and I've got a few cousins here that are making a name in the world, like that boy Wilbur down there at Hemet, and him and me both are going to be led a dog's life by them flyaway kids of ours, I'm afraid. One of his boys is here on this track now, and they say he is the hot-dog speed burner of all these California two-year-old trotters, and while my boys ain't bothering me so much I've got a girl or so that are plumb pests. That Verna thing that lives down there back of the Rose Hotel, now, they tell me is the fastest skirt of her age and gait in this whole country, but you got to give her some allowances. Her half-brother, Del Rey, used to be a wolf on wheels when the price was right, and then around a hotel is a mighty poor place to raise a girl if you want to keep her one of these sedate slow pokes that never gets out of a Sunday School jog. Believe me, Bill, I didn't race all over the country without learning some things, not me.

"So I reckon you just better break it easy to them folks down east that writes about me being in Canada to forget it, as California looks pretty good to me right now and always has. Now that I've been back home here regular for the last two or three years I'm getting a pretty wide circle of friends, especially among the ladies, and all of these things add to the comforts of home. Christmas and New Years I got a lot of cards from girls that I've met that said they would drop in and see me along during the spring, and I'd hate to have any of them disappointed. I get my mail here regular and am going to continue to do so if anybody asks you, and if nobody asks you you can tell 'em anyway. You fix me up in that paper and send the bill to Rod. Going? Well, that's the way with you guys. I allowed you would as soon as you got the ad order.

"Well, drop around any time, and remember me to any of my friends that you run across, and say, when you go past the end room up there stop in and tell that big stiff DeRyder to have the boys dig me up some better hay now that I'm going to have my name in print again regularly; this last bale is stemmy as hell!" and he shut the door and I was out in the rain again.

THE MORGAN REGISTER.

We have recently received through the courtesy of the American Publishing Company, Middlebury, Vermont, of which concern the late Joseph Battell was the guiding spirit, Volume Number Three of the American Morgan Register, the accepted official publication which performs for the Morgan horse the same service that is rendered the trotter by the American Trotting Register and the thoroughbred by the American Stud Book. Many Morgan horses are also standard trotters, and the needs of breeders in the main are served by the trotting register, but for the man who specializes in producing the horse of the family founded generations ago by Justin Morgan in the Vermont hills, the American Morgan Register will be found indispensable. The same care is given to its preparation that characterizes the compilation of its kindred works, so that full dependence may be placed in all statements made and pedigrees presented, and the work is further enhanced by the numerous photographic likenesses of famous Morgan horses which appear at frequent intervals throughout its pages. The price of Volume Three is five dollars, and the publication may be ordered direct or through this office by breeders who desire to add it to their library.

NEW AUSTRALASIAN RECORD.

The Australasian record of 2:08 3-5 held jointly by King Cole and Emmeline was lowered materially some days since over the Metropolitan course at Addington, New Zealand, by the seven-year-old mare Country Belle, who established new figures of 2:07 1-5. She was driven in the great performance by her breeder and owner, J. W. Moreland, and was accompanied by the pacemaker Kingsway, ridden by Freeman Holmes, who has many friends on this side the water. Later she was sent for the two-mile record and annexed this as well, going the double distance strongly in 4:22 4-5, a reduction of Denver Huon's mark by nearly six seconds. The new champion is a daughter of Wild Moor and Bonnie Belle by Lincoln Yet, a son of Irvington.

Looking Over *the* Horses *of* W. G. Durfee

BEING THE LAST OF THE LOS ANGELES VISITS

For about two weeks now I have been dragging you folks around in the mud at Exposition Park, Los Angeles, trying to give you an idea of the trotters and pacers that are being wintered there, and to the best of my knowledge and belief we have seen about all of them except a few carloads in the stable of William G. Durfee. Since these Los Angeles stories began the colony there has been visited by one or two amateur floods, and I doubt if they have made much speed as yet, though some of the boys may have had a little practice in building skiffs or rafts. The drainage in the immediate vicinity of Exposition Park is not the best in the world when taxed beyond a certain limit, and I imagine that when that four and some odd fractions inches of water landed all at once a few days ago things became fairly damp both inside and outside the barns. However, no word of serious inconvenience to trainers or sickness to horses as a result of the visit of the storm king has been received here, and while the rain has persisted pretty steadily things down there have about gotten around to normal once more. The track gets in shape pretty rapidly when the sun once gets a fair shot at it, and while training operations have been considerably retarded ever since late in December the boys will soon make up for lost time when they once get to work in earnest.

Last week we saw the horses of all the smaller strings, with the exception of those looked over the previous week, and the half dozen head that Durfee included in his first plans for a campaign down the big line this year. Will's horses are scattered through three stables and several paddocks, so if you will borrow a pair of rubber boots from Little Henry or Big Kelley (according to the size of your underpinning) we will toddle around in tow of the deputy sheriff for a few moments and endeavor to get a line on the horses that he will probably leave here to race over the California circuit, as well as the band of young things from among which he will also make a strenuous endeavor to produce the winners of the local futurities in 1916, and the draft of babies whose active careers will not begin for another year or so but who are getting their first lessons in trotting and pacing now while their notions are yet in the formative period.

Of the record horses which we have not seen there are an even half a score, mostly trotters and mostly four-year-olds or over, though four of the record holders yet have futurity engagements to fill as three-year-olds. Rags heads the trotting brigade both in point of age and performance, he being the only one of the delegation of this gait which we are inspecting this morning to possess a record faster than the 2:10 mark. Always an overgrown sort of a colt, this fellow has developed into a veritable whale of a horse, big enough and husky enough to do the work of an ordinary drafter, from all appearances. He has been turned out all summer and came in for his winter work in excellent shape, sound and hearty and full of life. He has been a useful horse previously and Will has him set down for a lowered record this season. His brother in blood, Nicola B. (3) 2:18½, winner of the Oregon Futurity as a two-year-old and contending trotter in the Panama-Pacific stake for three-year-olds at the June meeting, has also had a rest of several months and is growing into a nice sized horse, though not of such gargantuan proportions. They are bred quite similarly, one being by Del Coronado and the other by Carlokin, while their dam is the famous matron Atherine, dam also of Copa de Oro 2:01, etc. Bred as they are, it will be a matter of considerable interest to watch their future development along speed making lines, as a basis for comparison of the speed siring capacities of Carlokin and Del Coronado. At that, however, the test will not be an absolutely equable one, as both lads have had a bit of bad luck at one time or another, though neither shows signs of the same at present.

Carl (3) 2:14¼, who made his record just before the close of the year and after he had practically been let down for the winter, would in all probability have trotted in 2:10 as a three-year-old with any sort of luck at all, but he was an unfortunate little scamp, running foul of minor troubles at different times through the season, none of them more than temporary in nature but sufficiently annoying at the time to set him back quite a little. In his first races he was inclined to leave his feet for Durfee Senior, who had the mount behind him in his engagements, but later on he settled to his work like a real trotter and went some very nice races, being the most consistent of the fields that went down steadily before the prowess of Allie Lou. He was consigned to the Chicago sale along with the several others that went to that auction from the Durfee stable, but he was such an honest little fellow that his owner and trainer decided to give him another chance. At that he may be sold before the racing season rolls around, as various parties have made overtures for his purchase at private sale, and anything in the Durfee stable is let go when a price is agreeable to all concerned. While Carl is the last of the produce of My Irene S. to be seen at the races, there is yet another member of the line in the stable at present with a record, the now three-year-old chestnut colt Manuelito (2) 2:24½, that broke into the list for the first time on the same day that witnessed Carl's last performance. Clarence Berry, who has not yet let any of the My Irene S. youngsters get away from him since he purchased Esperanza, paid Durfee a long price for this fellow when he was only a few days old and apparently has no grounds for regrets for the action. As a yearling, with the little education he received, Manuelito showed quite a turn of natural and early speed, but he began growing at such a rate that not much was done with him and he was put in the list last month more for the benefit of his dam than for the purpose of giving the public any line on his real quality. He is a nice color, smoothly turned, and to my way of thinking the making of a most attractive type of a trotting stallion. He is an upstanding fellow, with a nice crest, and a good head and eye—one that looks to have a lot of the things that combine to make the one word "quality." Whether he has that look about the head and eye that is the "birthright of eagles" and great horses, according to some critics, I am not prepared to say, but for a youth of his years he has a "presence" that gives you the idea that you are looking at a great colt.

Byron (3) 2:15½, who annexed most of the three-year-old money that got away from Allie Lou and Carl last season, has not yet begun to put on as much winter flesh as he might carry but he is rounding into nice shape gradually. He was the surprise of the stable as a two-year-old but did not do quite so well last season as was expected of him early in the season, but Will inclines to the idea that he will make an excellent trotter with a little maturity. Whether or not it is the intention of Mr. Erkenbrecher to have him raced over the California tracks this season I am not aware, but he looks to me like a colt that would not only appreciate a year's let-up but one that would be considerably benefitted thereby. Miss Rico (2) 2:21¼, the Manrico—Subito filly that obtained her record in the race with Anvilite at the spring meeting at the exposition, has not made very much growth during the summer, but is a hardy looking thing and in excellent shape. She is the very first performer for her sire and I would not be surprised to see her break into the 2:10 list this season, as she has a lot of whizz. Last spring over the hard track at the big fair she was a little inclined to pace once or twice, but I don't hold that against her for a minute, and she has demonstrated her real class as a baby speed marvel by trotting an eighth in fourteen and a half seconds. Hermes (2) 2:16½, who represented for the stable in the fall stakes for the junior trotters, is another juvenile racer of much promise. He is a very late colt, having been foaled well along in the summer, and has made an excellent showing under all circumstances, being separately timed at Pleasanton in 2:15¼. He is a nicely put together lad, sound and smooth, and if he goes ahead and lives up to his early showing and his pedigree he will make quite a trot horse some of these days. He is by Carlokin and out of Miss Quealey, full sister to Manrico, a colt whom Messrs. Chandler, Geers, Cox, McMahon, Dickerson, Murphy, Andrews, Shank and some others may possibly recall as winner of the Kentucky futurity in 1912.

Last but not least of the record trotters in the stable is the gray gelding John Warwick (2) 2:17, whom Willie Durfee may possibly recall as the winner of the junior division of the Breeders' futurity here in California the following year, though the "recommembrance" is perhaps more pleasing to one Charles A. Durfee, that being one of the most recent occasions upon which that gentleman had the pleasure of administering a decisive trimming to "that kid of mine." Warwick bears the distinction of being one of the two horses that ever put it over Esperanza during her career as a futurity trotter, Bon Courage being the other one, but he had a couple of seasons of idleness, owing to a bit of an injury to one of his rear propellers. He could have been trained and raced last season, but there was no especial call for his services and he was allowed to run on, coming up this winter with all traces of his former mishaps entirely removed. He is a real horse by all natural inclinations and early indications, and Will has him tagged as the coming gray ghost trotter of this generation. His pedigree is a sturdy one that brings up memories of days gone by, being by Carlokin and out of Alameda Maid by Eros (sire of Dione 2:07¼ and the dams of Bernice R. 2:07¼ and The Roman 2:09½), grandam Oakland Maid 2:22 by Speculation, great grandam Lady Vernon 2:29½, whom Chester credits with winning a number of races in the fifties and from whom comes the color carried by the present representative of the line, its descent through the dams mentioned having been unbroken.

The record sidewheelers, aside from those previously visited, are but two in number, and are rather "chestnutty" from the color standpoint, but they are of championship caliber, either world or season. Rayo de Oro (3) 2:07¼, who broke the jinx that dogged the footsteps of the Copa de Oros whenever they set sail for a world's record over the Phoenix track, is putting on flesh in a very pleasing manner and has all the appearance of a gelding that will do to race either east or west, though he is hardly so rugged as his brother Pat, whom we visited some days ago in the Stewart stable and whose picture adorned our cover page last week. Rico (2) 2:12¼, whose performances last season stamped him as the country's fastest pacing colt for the age for the moment, looks like a coming champion and is evidently so regarded by his new owner, Mr. Clarence J. Berry, as I refuse to tell you the price that Clarence put on him in answer to my query as to the same, I being of the opinion that he might prove a good horse for a certain friend of mine to own. Suffice it to say that the figures were of a proportion that augur well for the present and future market value of really good young things, and if I were Berry I would probably want about as much for him myself. He is husky as a stall fed steer of a like age, is sound as a piece of well seasoned oak, and has as much right to become a world beater as the next one. He is Manrico's second performer (the pair in the Durfee stable constituting that rising young sire's total representation to date) and his dam is a high strung daughter of Petigru and Subito, known as Pavlowa B. This mare is the first standard trotter bred by Mr. Berry, unless my ideas have slipped a cog some place, and while possessed of considerable trotting speed she had too much vinegar to make it of value, running away and cutting herself badly while being broken and never raced thereafter, though trialing close to 2:20. Rico has some notions that are not the most pleasing in the world and in his early work was inclined to be the boss of the tan yard in his own right, but he is getting over these little faults as he grows older and he races as well as any man's colt, being well behaved in company and game. There is a mighty warm bunch of three-year-old pacers to contest in this year's stakes, and this boy ought to be one of the warmest. There is one other pacer in the bunch that has a well developed turn of speed, a six or seven-year-old bay gelding by Del Coronado and out of Little Agnes (dam of Jupiter B. 2:12) by Gossiper. This fellow carries the Spanish appellation of Del Oeste (The Westerner) and has had a let-up of considerable duration, being now at a point at which William G. believes he will stand training and racing. As a three-year-old he trialed in 2:09, and if he "comes back" and stands the gaff he will have been well worth carrying along.

This tells the tale for the Durfee string insofar as record or developed horses are concerned, and the easiest way to get over the younger ones is to do it systematically, by ages, so we will start in with the

THREE-YEAR-OLDS:

Carina, bay filly by Carlokin—Atherine (dam of Copa de Oro, etc.); trotter, quarter last spring in 37 seconds.

Black gelding by Walter Barker 2:19¼, dam by Constantine 2:12½, trotter, owned in Pasadena.

TWO-YEAR-OLDS:

Bay filly by Copa de Oro—Subito, pacer; Will remarked to me some months ago, shortly after the June meeting at the exposition, that this was the only poor foal that Subito ever had given birth to, but William's opinion at that time merely bears out the old time theory that it is impossible to tell merely by looking at a baby boy whether he is going to be a preacher, a prize fighter, a horse trainer or a lawyer. At any rate, that decision has been reversed and there is no bargain price tag hanging on the door of the stall occupied by this young lady. As a weanling and as a yearling she was a poor doer, but some weeks ago she began coming alive and is doing famously. She knows nothing but pace.

Bay filly by Copa de Oro—Rita H. 2:12½ (dam of Byron (3) 2:15½) by McKinney, double gaited but apparently a promising prospect when squared away for either gait; owned by Byron Erkenbrecher.

Bay colt by Carlokin—Zephyr (dam of Virginia Barnette (3) 2:08¼), not the biggest boy of his age in the world but horse all over. Will be a little more substantial than Virginia, and will trot. A late foal.

Brown colt by Crescendo B. trial 2:12¾ (brother to Copa de Oro 2:01), dam by Zombro 2:11, a trotter; owned by E. E. Sherwood, Strathmore, Cal.

Bay filly by Crescendo B., dam a sister to White Sox 2:05¼, a pacer; owned by Mr. Sherwood, who also owns her sire and her dam, the latter being at present in foal to Carlokin.

Chestnut filly by Copa de Oro—Pavlowa B. (dam of Rico (2) 2:12¼) by Petigru 2:10½; contrary to what might be expected at first thought, this lass is a very nice trotter, rather than a pacer.

Bay colt (full brother to Chango (3) 2:12¼) by Copa de Oro—Lady H. by Del Coronado; a pacer that will probably represent for the stable in this year's juvenile events, as he is at present considered the real goods.

Troubadour, bay colt (full brother to Esperanza (3) 2:09), by Carlokin—My Irene S. by Petigru; a substantial fellow from whom the Durfee-Berry combination expects a good deal in the future. He is a nice smooth colt, of fair size, and has not yet made up his mind exactly what he is going to do. Most of the work that he has had has been on the trot, but he has shown some slight pacing inclinations and his future is still in doubt.

Bay colt by Copa de Oro—Lilly Mac 2:24¼ (dam of Gold Lily (2) 2:24½) by McKinney; a nice gaited pacer.

Bay colt by Carlokin—Salonika, Copa de Oro's first foal, grandam Vela McKinney 2:23¾ by McKinney, great grandam Black Swan (dam of two) by Alta Vela, etc.; a trotter and a very nice one at that.

THE YEARLINGS:

There are a dozen of these little scamps up in the Durfee stalls at present, stabled for the most part in pairs. They are a bunch that are going to require a lot of space from turf writers in years to come,

judging from the way they are bred and their general appearance at this time, so they won't be sore or feel slighted if details are not gone into concerning them just now, as the typewriter tells me, for the third time since I started these long-winded visits with the Angelenos, that the space laid out for this particular story is rapidly being filled to overflowing. For the time being suffice it to say that they are all sons or daughters of Carlokin or Copa de Oro, and out of the mares enumerated in other pedigrees in the preceding paragraphs. They are bays and chestnuts, mostly bays, and show that they are well bred and well fed, both items of vital importance in considering yearlings. Just now they are taking life very easily indeed, but before long their actual education will be well under way, and before many months have passed we will be hearing of this fellow Durfee winning a futurity with one of them. Don't you reckon so?

* * * *

With the conclusion of this third and last of my epistles of the Angelenos, I believe that I have given readers of the Breeder and Sportsman a pretty fair idea of what is going on at the track there among the harness horse folks, and if I have overlooked anybody or anybody's horse I extend assurance right now that it was through accident and not by design. I believe there are a few people who are jogging horses at the track who are not stabled there at this time, and these got by me simply because I did not know where to catch them. Anyone in that locality who has a horse in training that escaped attention in these stories will confer a favor upon the writer by sending news of the same to this office, that we may make a proper mention of it. Moreover, it's a long ways from this office to Los Angeles, the writer doesn't make the trip very often, and we will appreciate the co-operation of every horseman in keeping us and our readers advised as to what goes on there during the winter and spring. Nobody is barred, and communications are welcome at all times. Don't forget the number.—[N.]

GOVERNMENT LIVE STOCK REPORT.

Washington, D. C., Jan. 18.—A summary of estimates of numbers and values of live stock on farms and ranges on January 1 for California and for the United States, compiled by the Bureau of Crop Estimates (and transmitted through the Weather Bureau), U. S. Department of Agriculture, is as follows:

HORSES.

State: Number, 493,000, compared with 503,000 a year ago and 483,000 five years ago. Value per head, $96, compared with $100 a year ago and $117 five years ago.

United States: Number, 21,200,000, compared with 21,195,000 a year ago and 20,277,000 five years ago. Value per head $101.60, compared with $103.33 a year ago and $111.46 five years ago.

MULES.

State: Number, 70,000, compared with 74,000 a year ago and 71,000 five years ago. Value per head, $110, compared with $120 a year ago and $133 five years ago.

United States: Number, 4,560,000, compared with 4,479,000 a year ago and 4,323,000 five years ago. Value per head, $113.87, compared with $112.36 a year ago and $125.92 five years ago.

MILCH COWS.

State: Number, 568,000, compared with 541,000 a year ago and 495,000 five years ago. Value per head, $69, compared with $72 a year ago and $48 five years ago.

United States: Number, 22,000,000, compared with 21,262,000 a year ago and 20,823,000 five years ago. Value per head, $53.90, compared with $55.33 a year ago and $39.97 five years ago.

OTHER CATTLE.

State: Number, 1,550,000, compared with 1,480,000 a year ago and 1,546,000 five years ago. Value per head, $36.30, compared with $39.30 a year ago and $23.50 five years ago.

United States: Number, 39,500,000, compared with 37,067,000 a year ago and 39,679,000 five years ago. Value per head, $33.49, compared with $33.38 a year ago and $20.54 five years ago.

SHEEP.

State: Number, 2,450,000, compared with 2,500,000 a year ago and 2,683,000 five years ago. Value per head, $5.00, compared with $4.50 a year ago and $3.59 five years ago.

United States: Number, 49,200,000, compared with 49,956,000 a year ago and 53,633,000 five years ago. Value per head, $5.17, compared with $4.50 a year ago and $3.91 five years ago.

SWINE.

State: Number, 947,000, compared with 877,000 a year ago and 790,000 five years ago. Value per head, $8.40, compared with $10.50 a year ago and $9.50 five years ago.

United States: Number, 68,000,000, compared with 64,618,000 a year ago and 65,620,000 five years ago. Value per head, $8.40, compared with $9.87 a year ago and $9.37 five years ago.

Minor Heir 1:58½, one of the great array of pacing champions owned at M. W. Savage's International 1:55 Horse Farm, Savage, Minn., has been leased for the breeding season of 1916 to the Tennessee horseman, J. W. Alexander, and will be in service at Murfreesboro. He should be both popular and successful in that locality.

Proposed Changes in A. T. A. Rules

TO BE CONSIDERED FEBRUARY FIFTEENTH

To Members of the American Trotting Association:

Pursuant to the provisions of Section 2, Chapter 12, of the By-Laws, I herewith submit report and recommendations of the Committee on Revision of By-Laws and Rules, adopted by said Committee at a meeting held in the office of the Association, Tuesday, January 11, 1916.

The American Trotting Association's Committee on Revision of By-Laws and Rules at its meeting on January 11 recommended the adoption of the following amendments to the rules by the Congress of the A. T. A. to be held in Chicago, Tuesday, February 15, 1916:

Rule 13.—Add to this rule the following: A member may elect to have but one judge, who shall be appointed by the American Trotting Association; in such case the member shall apply to this Association thirty (30) days before its meeting and shall deposit with the secretary of the Association the amount fixed for such service. Such judge shall not act as starter at the same meeting.

Rule 13.—As amended, will read: "In every exhibition, race or performance against time over the track of a member, the Presiding Officer, or Manager of the member, shall appoint or authorize the appointment of three men, who are familiar with the rules, to act as judges. He shall also appoint three persons who are competent to act as timers. He shall employ a licensed starter to start the horses, and appoint some competent person to act as clerk of the course. A member may elect to have but one judge, who shall be appointed by the American Trotting Association; in such case the member shall apply to this Association thirty (30) days before its meeting and shall deposit with the secretary of this Association the amount fixed for such service. Such judge shall not act as starter at the same meeting."

Rule 23.—Add after the word "race" in the second line "or matinee," and after the words "public race" in the sixth line add "or matinee."

Rule 23.—As amended, will read: "If a horse has ever performed in a public race or matinee, the last name under which it performed shall be given in the entry; and if the name has been changed within one year, each name it has borne during that time must be given; and if any horse without a name has ever performed in a public race or matinee, mention must be made in the entry of a sufficient number of its most recent performances to enable interested persons to identify the horse."

Rule 39.—After the word "conditions" in the fourth line add "the judges' book"; and also at the end of the rule add the following: "All entries must be made to the individual members. Circuit entries shall not be accepted to sustain suspensions."

Rule 39.—As amended, will read: "No suspensions for non-payment of entrance fee shall be lawful unless ordered within fourteen days (omitting Sunday) of the close of the meeting, and accompanied by the published conditions, the judges' book, the original entry and envelope bearing the postmark, if transmitted through the mails. No suspension shall be imposed for non-payment of such fee contracted in a class wherein the horse was permitted to start, except where credit is extended and in any case when the member has applied for membership subsequent to the closing of its entries, such suspensions shall be unlawful unless notice of intended membership has been given prior to the closing of the entries. All entries must be made to the individual members. Circuit entries shall not be accepted to sustain suspensions."

Rule 51.—After the word "race" in the third line cut out: "If the same is claimed by the nominator when making the entry." Also add to the rule the following: "All time allowances, under the rules or published conditions must be claimed at the time of making the entry and appear thereon."

Rule 51.—As amended, will read: "A horse with a record shall be allowed one second for each year, if raced, in which he fails to equal or reduce his record or win a race. Other allowances may be granted if so stated in the published conditions. All time allowances under the rules or published conditions must be claimed at the time of making the entry and appear thereon."

Rule 61.—Change so as to read: "Hopples of any kind or form shall not be used in races or in performances against time on three-year olds and under."

"Any person or member of this Association violating or permitting the violation of this rule shall be fined not less than one hundred dollars ($100), to which may be added suspension or expulsion."

New rule, after Rule 72.—"The starter must not solicit entries, distribute entry blanks or act as agent for any meeting at which he is employed to act, or do anything that is likely to divert entries from one member to another."

Rule 75.—Add after the word "score-cards" 'in the last line the following: "He must also preserve the timers' certificates and place them in the envelope in the front part of the judges' book."

Rule 75.—As amended, will read: "The clerk of the course may at the request of the judges assist in drawing the positions of horses before the race, or other similar duties, and shall keep a book in which shall be recorded the name of each driver or rider, and colors worn. He shall not the time when a heat is finished, and shall notify the judges, or ring the bell, at the expiration of the time allowed between heats; he may assist the judges in placing the horses at the finish of the heat. He shall record in the judges' book an account of every race, in the following form, to-wit:

"First, the system or plan under which the races are held; next, all horses entered and their pedigrees, and the names of the drivers, or riders; next, the starting horses and the positions assigned them; next, a record of each heat, giving the position of each horse at the finish; then, the official time of each heat, and, at the end an official summary of the race, giving the drawn, distanced and ruled out horses, if any there be. He shall record all protests, fines, penalties and appeals and shall check and see that the colors and numbers worn by the drivers agree with the score-cards. He must also preserve the timers' certificates and place them in the envelope in the front part of the judges' book."

Rule 89.—After the word "last" in the twenty-first line add the word "advertised," to conform with the balance of the rule. Also in the same line scratch out the words, "of the week."

Rule 89.—As amended, will read: "In case of unfavorable weather or other unavoidable cause, members shall postpone to a definite hour the next fair day and good track (omitting Sunday), all stakes upon giving notice thereof; they may exercise this power before or after the race has commenced. Any purse race, or installment plan purse, that closed the same year in which it is to be contested, that has not been started by five o'clock p. m. on the last advertised day of the week to which the member has limited its meeting during the months of May, June, July and August, and four o'clock p. m. during the balance of the year, shall be declared off. When a purse, or class race, is declared off, under this rule, the entrance money shall be returned to the nominator. When an installment plan purse is declared off, under this rule, the entrance money and forfeits shall be divided equally among the nominators eligible to start. Any purse race, or installment plan purse, that closed the same year in which it is to be contested, that has been started or remains unfinished on the last advertised day to which the member has limited its meeting, shall be declared ended and the money divided according to the summary."

Rule 92.—Scratch out the words "after starting in a public race" in the third line and after the word "and" and at the end of the second line add "if the horse has been registered by the American Trotting Register Association or has started in a public race or matinee." Also cut out the amount of the fine; and after the word "requirement" in the eighth line, "the winnings become illegal and."

Rule 92.—As amended, will read: "Every horse shall be named and the name correctly and plainly written in the entry, and if the horse has been registered by the American Trotting Register Association or has started in a public race or matinee, such name shall not be changed, without procuring a record thereof, to be made in the office of the secretary of this Association. For each violation of this requirement the winnings become illegal and a fine may be imposed, together with the suspension of the horse until paid, and no horse shall be thus recorded by a name that has been recorded for another horse.

"Provided, that when a recording fee has been paid to The National Trotting Association or the change of name has been required by the American Trotting Register Association for the purpose of registration, no recording fee shall be charged by this Association. Certificates from the aforesaid associations to be furnished that the recording fee has been paid or the name was required to be changed, as the case may be."

Rule 117.—Add after the word "collected" in the first line the words, "from drivers."

Rule 117.—As amended, will read: "All fines collected from drivers, by The American Trotting Association, shall be deposited in a special Trust Fund for the benefit of disabled or needy drivers, disbursements to be made by a board consisting of one driver, one owner and three directors of The American Trotting Association, to be appointed prior to each meeting by the president, they to meet at the same time as the Board of Appeals. In an emergency the president may act."

New rule, after Rule 140.—"Nothing in Rules 138, 139 or 140 shall prohibit the judges from setting a horse back one or more places if, in their judgment, that is sufficient punishment."

The following preamble and resolution was unanimously passed and recommended to the members for adoption at the Congress:

"Whereas, the American trotter and pacer, by registration and improvement thus made feasible, has become the recognized highest type and best established family in the animal kingdom, and

"Whereas, In racing horses for the greatest improvement of the type, many cases of ringing and false pedigree have and will, until checked, cause trouble and large loss to honest horsemen devoted to the breeding and racing industry, and

"Whereas, the most positive and available check upon such fraud is shown by long experience to be

classification and certain identification.

"Now, therefore, be it Resolved, That the board of directors be and is hereby instructed and directed in association and concurrence with The National Trotting Association, or its board of directors, to devise and promulgate a system of rules and regulations requiring all horses now or hereafter engaged in trotting or pacing races, to be registered with the American Trotting Register Association, as a pre-requisite to the eligibility of such horses to participate in any trotting or pacing races, under the rules of either of the two associations."

W. P. IJAMS,
THOS. H. GILL,
W. H. SMOLLINGER,
C. E. CAMERON,
Committee.

Section 2, Chapter 12, of the By-Laws also provides: "That nothing herein shall be construed prevent the Congress in regular session amending any of these rules, if deemed necessary."

W. H. KNIGHT, Secretary.

A CHRISTMAS TREE FOR HORSES.

"A Christmas tree for horses? Nonsense; you're joking," I protested.

"Not at all," was the reply. "It is a regular Christmas tree, with carrots and apples for decorations and great bags of oats and shocks of cornfodder standing about the foot of it just like candy, oranges and nuts are stacked about the Sunday-school trees every Christmas eve."

So I set out to find this newest form of Christmas celebration and to see for myself just what a horse's Christmas tree looked like.

Sure enough, at the grounds of the National Capitol Horse Show Association within 3 blocks of the White House, I found the tree decked out with carrots and apples presumed to be as dear to the equine palate as candy and oranges are to the children's. There also I found a bevy of women; they were supervising the affair with apparently as much pleasure and enjoyment as if every old, wornout plug that entered these grounds, hitherto sacred to the bluest of blue-blooded horseflesh, was indeed a Thoroughbred of long pedigree.

Postmaster General Burleson and his wife, both lovers of horses, were present at the opening of the affair and watched with interest the arrivals, Mrs. Burleson holding out apples and carrots to eager, hungry animals or else bearing down some of the higher branches, that the delicacies might be the more easily reached by those horses that were led to the tree to nibble a few bites direct.

And how busy those good ladies were! Into the grounds came an aged Negro, one of the old time, leading behind him about as decrepit and ancient a specimen of horseflesh as ever straightened a trace. One of the ladies met him, directed him first to the watering trough and then to a vacant stall, of which there were over 150. One of the men employed for the purpose followed with a paper bag holding a big feed of oats; the manger already was filled with the best of hay. Over the old veteran the men threw a heavy horse blanket and one tried to imagine what thoughts must be running through his mind as he found himself in such luxurious quarters and feeding on the best in the land, from an equine point of view.

Through the gate came a constant procession of horses of all grades, types and conditions. Small darky boys rode on bareback, having left the vehicle in the street as scarcely fit for taking into such an arena. Several on foot were questioned, and admitted that their parents had sent them in to spy out the land, the older people having in some way conceived the idea that it was some scheme to get hold of their dear old nags and either arrest the owners for cruelty to animals or else condemn the horses as useless. Reassured, they ran off to return later with horse and wagon, which had apparently been hidden away on some side street while the pickaninny was scouting for information as to the nature of this unheard-of offer of free horse feed.

And what an array of horses came to the feast! Not all were starvelings or decrepit, but certainly most of them seemed to realize they were somewhat out of their regular orbit. There were old stagers unhitched from night-prowling, sea-going hacks, of which the capitol has many, driven by old colored men with ancient plug hats. I saw a flea-bitten gray mule, perhaps once the pride of some army teamster, his knees bowed and stiff, his long ears flapping like the sails of a deserted ship, stumbling along through the gates drawing the market wagon of an old man who had come to town with a load of Christmas greens. One of those heavy wagons used by Greek vegetable peddlers pulled up outside the grounds. The animal hitched to the rig was a great, gaunt gray, his hide hanging in loose folds over his ugly frame like a gray blanket hung on a stake-and-rider fence. The long fetlocks, each bunch of hair now decorated with tiny balls of Virginia mud picked up on the country roads, betokened the possibility of Shire or Clydesdale ancestry. His coat, once a dapple-gray, was now rough and so manure-stained as almost to lose its original color. His hoofs were so cracked and split, and there was so little sound material in which to drive a nail that one wondered what held the shoes on. Perhaps one day he was the wheel horse in some splendid brewery six, with his mane and tail all plaited and decorated with red and blue ribbons.

An old lady who had brought to market few dozen eggs drove up in a wreck of a buggy, certainly a reproduction of the "one hoss shay," perhaps older, drawn by an ancient chestnut with a bald face that even in his old age showed signs of the bluest blood of Virginia. "Who knows," remarked one of the ladies, herself a Virginian and by that same token a keen judge of horse values, "who knows but what that old fellow once went down the line before the grandstand wearing the winning colors?"

They gathered around the old lady, watched the men unhitch the horse—both traces tied to the singletree with baling wire—and then, as if she were the first dame in the land, they showed her to a little room in which she found a seat; in her hands was placed a tincup full of steaming hot coffee and before her plates piled high with fresh-baked doughnuts, of which she was bidden to eat as many as she possibly could. And what those kids, both white and black, did to the doughnut piles was a caution. "Worth all it cost," was the remark of one man who put up some of the money that paid for the feast, "just to see those kids eat, to say nothing of the animals."

And so it went from 10 a. m. to 4 p. m. for two days.

Certainly into this haven of Christmas tide drifted much of the flotsam and jetsam of the near-by horse world, the equine derelicts of the Capitol City. It was as great a study as the breadline in a large city, and equally pathetic. The animal "breadliners," however, had no tales of woe to relate, no stories of ruined lives, of blasted hopes and hard-luck experiences.

The ladies were not only providers of Christmas cheer but gatherers of statistics as well, as the name, color, sex, and residence of each owner was carefully taken down, also the name and other statistical information concerning the animal. Looking the list over, the only thing like it that I could recall was the 1890 list of 125 cow ponies we used on my old Arizona cow ranch, which I ran across in an old note book not long ago. The old-time cowpunchers vied with one another in naming their mounts, running from Alexander the Great, hung to a diminutive Navajo Indian pony, to Dolly Dimple, applied to a huge, overgrown, ungainly square-headed affair used only for a pack animal. Likewise these later names ran the gamut of animal nomenclature, but regardless of sex every mule in the District of Columbia seems to be named Maud.

Nor did these good women stop at the feed offered, as each man was urged to carry off with him one or more of the huge bundles of what in this southland they call "long feed"—cornstalks. Those who came with vehicles took advantage of the offer and thus the Christmas cheer was prolonged to another feeding time.

Later in the afternoon when there were no more arrivals at the grounds the ladies loaded their autos down with heavy paper bags, each holding several pounds of oats, and having divided up the city into districts they went into the highways and byways and sought out those that had not come to the feast, finding them at the city markets, on the hack, carriage and express stands, and elsewhere; to every owner who would accept it they gave a sack for each animal.

As a seeker after information I asked the charming lady who piloted me about the place as to the object of the peculiar charity.

"Just a love for the horse," was her reply. "Many of us interested in the annual horse show felt that by this means we could arouse a certain amount of interest and sympathy among the class of people who own the kind of horses you have seen here today, that would lead them to take better care of their animals. They say that the way to a man's heart is through his stomach," she smiled knowingly, "and perhaps we may reach some of these men through the stomachs of their horses. Certainly it is bound to set some of them to thinking."

She further explained that all the money was raised by subscription among men and women interested in the horse. No appeal was made publicly and there was more money offered than they could use. Naturally the question comes as to the merit of such a charity when perhaps thousands of men, women and children are starving to death in foreign countries. But it seems quite certain that people who would give willingly for such a cause would give far more readily to the cause of humanity and without doubt not one of the givers to this horse feeding fund reduced his or her charities by a penny. Nor could I discover the names of a single giver to this fund. No names were signed to the posters which were distributed all over the city where they would reach the right people inviting the horses to the feast; at the bottom the simple words, "Lovers of the horse," hid the donors' names.

It is a safe bet that a lot of those old plugs marked it down as a red letter day in their brains, lest they should forget the date in 1916, at which time it is proposed to repeat what is, so far as I can learn, the very first Christmas tree ever given to horses. That it should originate here in the capital of the nation seems peculiarly fitting; that it will spread to other cities goes without saying, for the idea appeals to every horse lover.—Will C. Barnes, Breeders' Gazette.

The sooner you begin your stallion advertising, the better the returns from it will be.

NOTES and NEWS

The first foal reported from any of the larger eastern farms is the brown fellow foaled January 5 at Curles Neck by The Harvester 2:01, dam Roberta Bingen (3) 2:13¼ by Bingen 2:06¼.

◈◈◈

The dopesters have figured up that Alonzo McDonald has marked an even thirty trotters in 2:10 or better. Billie Burk 2:03¼ heads the delegation, followed by Bob Douglas 2:04½ and Star Winter 2:05.

◈◈◈

W. L. Snow, the Grand Circuit teamster who has been at Detroit with the horses of his various Michigan patrons since the close of the last racing season, ships to Memphis the first of February and will get ready for the frays of 1916 over the early track at Billings Park.

Old Folks 2:11¾ and Raisin Girl, with a trotting trial better than 2:10, both sold by California consignors to the recent Chicago sale, will be seen on the tracks of the Hoosier state this summer. We have a sneaking little notion that they will be found heading the summaries, or ranking second, pretty regularly.

◈◈◈

Have you sent us an order for stallion cards or a season announcement? You never heard of Peter the Great until someone told you about him or you read of him in a turf paper, so don't expect people to know all about your horse unless you boom him along. This watchful waiting policy will not bring in business for a stallion.

◈◈◈

The many friends of David Cahill of Lexington will learn with regret that Mrs. Cahill died recently at the age of seventy-three years, after an illness of but a very few days. Five children, three daughters and two sons, remain to help make things pleasant for their father in his old age, but Uncle Davy will sadly miss the one who was his steadfast partner for so many years, whether the going was good or bad.

◈◈◈

That the progression of human affairs takes the course of a circle is once more attested down in New York state. Stony Ford has been placed back on the map by Louis Titus, and the old Jesse Bull farm near Monroe, the birthplace of Blue Grass, Hamblehawk, Menelaus and other sons of the immortal Hambletonian 10, will again become the home of trotters, Herman R. Crossman having recently purchased it for use as a breeding farm.

◈◈◈

The track at Readville, Mass., idle for the last several seasons, was sold for taxes on January fourteenth and was bid in by the town of Dedham, the future fate of the famous course being as yet unknown. Many and many are the great contests that have been staged at Readville in the days gone by when the harness horse was in his full glory, and it will live forever in turf history as the strip of dirt over which the first mile in two minutes was trotted by Lou Dillon.

◈◈◈

Alonzo McDonald recently purchased one of the most promising two-year-old trotters in the Blue Grass in the shape of the chestnut colt by Axworthy (3) 2:15½ and out of the great matron Nervolo Belle (dam of Peter Volo 2:02 and Volga (2) 2:07¾) by Nervolo 2:04¼. The check that Lon wrote for George L. Knight was a rather healthy one and a portion of the money represented by the neat little slip of paper has already found its way to the Pacific coast and San Francisco, J. N. Colomb of this city having been Mr. Knight's partner in the youngster.

◈◈◈

The heavy rains of January put a temporary quietus upon the meeting of the Lower California Jockey Club at Tia Juana, rail connections with the cities on the American side being put out of service and a certain amount of damage being inflicted to the racing plant itself. This, however, was announced to be of a minor nature, easily repaired after the water receded, and as rail service was expected to be resumed in a short time the racing will begin where it left off and go merrily on. Reports by both correspondence and visitors to the Mexican town have good accounts to make of the manner in which the racing is conducted and of the brand of sport furnished under handicaps of considerable moment.

◈◈◈

The Utah national guard's artillery corps located at Salt Lake City is fully prepared to cope with any invader that threatens that city—if the enemy army is mounted on on wooden horses. For Utah has gone ancient Greece one better. The Greeks enlisted a huge wooden horse which aided them to victory at Troy. Utah's amateur artillerymen have, not one, but four wooden horses, which have aided them to victory over all opponents—in several competitive drills. Battery I hitches four regulation size hobby horses to a modern breech-loading gun, and at their weekly drill the soldiers harness and unharness, mount and dismount, load and fire. Recently the squad ran the horses and gun from the armory, harnessed up and were in the saddle in two minutes and 37 seconds. It's a whole lot cheaper to drill on wooden horses; they don't eat and the soldiers can make them themselves.—Horse World.

According to some of our eastern exchanges, there is a probability that the fast trotting mares Margaret Druien 2:03¼ and Lettie Lee 2:06¾, acquired at the recent Old Glory sale by C. K. G. Billings and now at his Curles Neck Farm in Virginia, may be prepared for a trip against the amateur record for trotting teams.

◈◈◈

Vermont horsemen are waxing enthusiastic just at present over the yearling colt American Harvester, by The Harvester out of Adioo Dillon 2:24¼, acquired by one of their number at the last Old Glory sale. Adioo Dillon is the dam of that good futurity trotter Dillon Axworthy (2) 2:11¼, and like many others of the famous family to which she owns allegiance was bred here in California, at the old Santa Rosa Stock Farm.

◈◈◈

Rodney MacKenzie and his thoroughbred trainer, Jack Atkin, are on a trip to eastern and southern points, paying a visit to the races at New Orleans and to the thoroughbred farms in the Blue Grass. Buckhorn, the good son of Broomstick—Thirty-Third that won the Brooklyn, Empire City, Douglas Park Inaugural and other stakes in Atkin's hands, is doing stud duty at the farm of Hal Price Headley in company with Uncle, Ivan the Terrible, Jack Atkin and San Vega. He will be allowed but twenty mares, as this is his first year in the stud, and his limited book is rapidly filling.

◈◈◈

James Erwin, one of the best known horsemen of the Pacific northwest and who for a long time made his headquarters at North Yakima, lies in a critical condition in a San Francisco hospital. About two years ago he came to California as assistant trainer to H. S. Dowling, then superintendent of Woodland Stock Farm, but for the past year has been unable to perform any duties in cart or sulky and has been confined for the greater part of that time at his home at 1214 Polk street, this city. Ervin brought out, among many other excellent horses, the chestnut gelding Mack Fitzsimmons 2:07¾, now a member of the stable of H. H. Helman.

◈◈◈

C. A. Harrison came into civilization from the wilds of the Puget Sound country a few days ago and after putting the finishing touches upon the deal which transferred the ownership of the property known as Woodland Stock Farm to Charles F. Silva spent several days in the vicinity of San Francisco bay. Early in the week he was a visitor at Pleasanton in company with A. B. Coxe, John W. Considine and Sven Christenson, most of the quartet taking a mount and doing a little jogging as a stimulant to their appetites. The Pleasanton track has had a pretty steady soaking for weeks, but was in nice shape for winter work at the time the above party was there.

◈ ◈ ◈

That White Sox—Hal Boy race is now merely a matter of arranging conditions suitable to both parties. Clarence Berry has turned this end of the negotiations over to his trainer and racing manager, Will Durfee, and correspondence relative to the affair is being exchanged between that gentleman and Greeley Winings, manager for Stoughton Fletcher. No serious difficulties are anticipated in the way of getting together on a basis suitable to all concerned and a definite announcement concerning the same will probably be made within the next several days. Interest in the proposition is steadily increasing and it should prove one of the attractions of the big line this summer.

◈◈◈

A. K. Macomber of Paicines Rancho has been a recent visitor in the Blue Grass, inspecting Walnut Hall Farm and other varied interests of the estate of the late L. V. Harkness. Mr. Macomber is one of the foremost breeders of purebred livestock in California and a great lover of the horse, his active entry into the racing game being foreshadowed by his recent importation of English thoroughbreds, selected for him by Walter B. Jennings and now being trained by that capable gentleman at Charleston, S. C. While the future of Walnut Hall was problematic following the death of Mr. Harkness, no steps have been taken so far by the heirs that in any way portend a change in the old policies or the dispersal of the trotting stock, which are matters of much gratification to lovers of the horse and of the famous old farm.

◈ ◈ ◈

George A. Ryan, whose connection with the trotters in an editorial way dates back many years to the time when he was "hoss" editor of one of the Boston dailies, is now the proprietor of a book store in Covington, Louisiana. Coming west some years ago Ryan took over the editorship of the now defunct Horseman and Spirit of the Times, his excellent work there causing him to be sought to fill a similar position on the Western Horseman, where his ability was properly appreciated and where in the course of a few years he became a substantial stockholder in that concern. Ill health caused him to give up his interests in Indianapolis some two or three years ago and seek a home in the south, where his health has improved in a most gratifying manner. He is one of the able turf writers of the country, and his recovery to a point at which he might again engage in the old line would be welcome to countless personal friends and a very large following among the readers of trotting journals.

In answer to an inquiry from a correspondent at Oroville, the following information is given concerning the pacer Little Thorne 2:07¼: He was bred at Stockton by L. U. Shippee, was foaled in 1893, a son of Hawthorne 10935 and Grace Hale by Director 1989, second dam Nettie Nutwood by Nutwood 600. He was driven to his record on August 30, 1900, at Woodland by James Thompson.

◈◈◈

Fred Johnston of Calgary, one time owner of the fast pacer Yedno 2:02½ that threw such a surprise into the Grand Circuiters at Montreal, is now pinning his hopes to a five-year-old pacer by the California bred speed marvel, Ray o' Light (3) 2:08¼, whose mile in that notch at Portland still stands as the record for the age and gait in the Pacific northwest, the dam of the Johnston prospect being Almota by Vice Regent, brother to Heir-at-Law 2:05¾. The bird has not been strung for the route as yet, but last season paced the final fractions of moderate miles over a poor halfmile track in :14¼.

◈◈◈

We have a call from a gentleman in the central portion of the state for a few standard bred fillies by The Bondsman, from yearlings up, providing the prices are in keeping with the times. They are wanted for the purpose of putting in the breeding ranks only, so parties with well developed Bondsman trotting prospects would probably not find the prices to their liking. However, it is probable that there are a few fillies of this family scattered through California that will not do to race, or will not be trained owing to the scarcity of local racing, and the owners of these might dispose of them to advantage at this time. We will be pleased to put such owners into communication with the prospective buyer, but please do not write letters trying to dispose of young mares by any other stallion, as the same will represent merely wasted time. Fillies by The Bondsman are the only kind wanted by this party.

◈◈◈

J. E. Montgomery of Davis, whose three specialties are raising champion pacers, high priced beef cattle and getting more day in and day out service out of an automobile than any other farmer in his neighborhood, is probably back at the old familiar quarters at the track at Woodland by this time, as he announced his intention of making the move some days ago, taking along the coast's champion pacer, Jim Logan 2:01¾, and a considerable stable of younger horses. Jim will be in service at Woodland during the breeding season, and Elmo has his neck bowed to get away from the jonah that followed his trail last year, when practically the whole stable that he depended on starting was put on the shelf by accident or sickness. Loren Daniels with the big string belonging to Charley Silva was also expected to make the change from the state fair grounds to the Woodland plant, so that place will be the scene of considerable speed making this season.

In 1914 Alonzo McDonald's brown trotter McCloskey won in excess of ten thousand dollars without getting out of the 2:30 class, which was some performance until Worthy Prince came along in 1915 and annexed nearly thirteen thousand dollars without winning a heat. Both of them must be world's records of their kind.

◈◈◈

Peter Stevens 2:02¼ has been sent to the stable of Tommy Murphy at Poughkeepsie and will be raced this year by the lengthy New Yorker. Last year he twice showed his ability to beat 2:04 over halfmile tracks, so he must be given consideration as a horse liable to figure well up in the hottest kind of company in Murphy's hands.

◈ ◈ ◈

Cleo Dillon (3) 2:13¾, one of the most highly prized trotting mares on the Pacific coast, died last Sunday night at Bonnie Brae, the establishment of her owner, E. A. Gammon, in Sacramento county, as the result of a fatal illness following the consumption of a moderate ration of beet pulp, while her yearling stud colt, The Meteor, by Peter McKlyo (3) 2:12½, came very nearly dying from a similar ailment. Cleo Dillon, who was a daughter of Sidney Dillon and the double producing matron Cleo G. (dam also of Easter Direct 2:09½) by Yosemite 4906, was bred by Mr. Gammon and as a three-year-old in the hands of Schuyler Walton won both the Occident stake and the Breeder futurity, taking her record in the second heat of the latter event, raced that year over the old Speedway track at Chico. Some time afterward, Charley DeRyder, considerably impressed with the quality which the mare should show as a producer, persuaded Mr. Gammon to allow him to send her to Kentucky to be mated with Axworthy, the resultant foal to become their common property. This plan was followed out and proved most gratifying in its success, the foal being the bay filly Miss Axworthy Dillon, who apparently had a prior right to third money in all of her futurity engagements here on the coast last year as a two-year-old, though once out of her three starts she divided third and fourth moneys with Hermes. At Pleasanton, where she was a hot contender throughout the fastest race for the age ever trotted in California, she was separately timed the first heat in 2:14½ and came back for the second in 2:15, a performance all the more creditable when it is considered that she had been off pasture but about four months at this time. She is a nice headed thing, sound, and Mr. DeRyder regards her as a three-year-old that may do to take over east, as she is entered in every stake in the country and he considers her capable of trotting in 2:08 this season with any sort of luck. Cleo Dillon was to have been bred to The Anvil 2:02¾ next month, and great expectations were entertained by the owner as a result of this union. The loss to him is a severe one, and he cautions horsemen everywhere to keep their animals away from beet pulp.

Last Call for Breeders' Futurity Entries

As the Pacific Breeders' Futurity Stakes Number Sixteen for foals of mares bred in 1915 close on Tuesday, February first—next Tuesday—we take advantage of this last opportunity to call the attention of western breeders to the importance of making nominations in this event. Colt stakes are not only becoming fewer in number on this coast but the decline of patronage to the same, enforced through the decline in harness horse breeding, has caused them to be made for more modest figures, but unless proper support is extended they cannot continue to be given even on the new basis.

Nothing adds so much to the value of the trotting bred colt as a liberal number of futurity engagements, and nothing contributes more to making a youngster of this kind a drug on the market than a lack of early opportunities. The demand nowadays is for horses that can race, and the earlier one can race the better the buyers like him. Engagements in colt stakes may be secured at such a moderate cost, when compared with the opportunity for profit, that every breeder of trotters and pacers can well afford to nominate every mare bred by him in some or all of the local classics—better all of them than only some. No longer ago than last season certain owners right here in California saw good money won by colts not so good as their own, merely because their breeders had the foresight to provide them with early engagements, while training a colt for one race is merely an aggravation. You would not open a store until you had stocked its shelves, and you cannot market speed save through the medium of paid up entrance fees.

The Breeders' Futurities have for so long been annual fixtures in the racing calendar of the Pacific coast that it seems scarcely necessary to go into detail concerning the conditions under which they are staged, but anyone not familiar with the same will find them in full on page two of this issue of the Breeder and Sportsman. The money is so apportioned that the stallion owner, the original nominator of the winner and the owners of the four horses heading the summary of each of the four divisions of the stake are well rewarded, and the initial cost of making entries is but two dollars a mare. The date of closing is now set so far along in the season that it should be possible for almost every experienced breeder to determine whether his mares are safe with foal, and the substitution clause affords him further safeguard against loss in case he does draw a blank from his breeding operations or the mare or foal dies, as there are always a certain number of people who do not make original entries but depend upon buying substitutions, so that these are generally in demand to the limit of the number available. The cost of keeping the entry in good standing is distributed over a considerable period and is not a hardship, as the payments are moderate and none are in excess of the sum of ten dollars with the exception of the starting fees. In this manner a colt may safely and economically be carried in the stake until the time when it is definitely proven whether he has the quality to justify the owner in starting him, and in case he is tried and found wanting the sum previously paid out in entrance and installments will not be seriously missed.

The Pacific Coast Trotting Horse Breeders' Association, which sponsors this event, has for many, many years been recognized as the foremost factor in keeping trotting horse breeding and racing alive in this part of the world. They have staged an annual meeting that has been one of the principal features of each racing season, and the present number of their series of futurities is the sixteenth, nearly one hundred thousand dollars having been paid to western breeders through the medium of these stakes alone, while the amount paid out by them in stakes and purses since their annual meetings were first inaugurated totals a much greater and more impressive sum. The debt of horsemen in general to the association is a generous one, and you owe it first to yourself, then to them, to see that this stake fills and fills well.

Also consider the fact that the decrease in number of entries means so much greater percentage in favor of your colt developing into a money earner in the stake. Entries postmarked prior to noon of Wednesday are legal under the rules, but we would suggest that you take no chances of ineligibility and make your nominations in ample time. The future of colt stakes in California is hanging in the balance, and it is the breeder who has the say as to whether they will be continued or abandoned.

ROD, GUN AND KENNEL

CONDUCTED BY FISHER HUNT

ANGLERS' ASSOCIATION ELECTS OFFICERS.

Members of the California Anglers' Association got together Monday night at the club rooms at 935 Market street for their eleventh annual meeting. All the boys were in good cheer and a large gathering of the devotees of the rod was present.

The reports of the secretary and treasurer showed the association to be in a prosperous condition.

The officers elected and who will serve for the ensuing year are Floyde Spence, president; Charles F. Breidenstein and J. J. Gorman, vice-presidents; George A. Wentworth, secretary; Herman Cohn, treasurer; Dr. L. T. Cranz, M. Uri and Wilson Ballantine, directors.

Following the annual meeting was an enjoyable game of whist, participated in by members and friends present.

The association during its existence has accomplished much good work along the lines of conservation of the game fish of California and in keeping the fishing waters of the State open to the people without hindrance of trespass laws. Through its efforts the State constitution was amended several years ago, preserving to the people the right to fish upon all present State public lands, whether they be sold and conveyed to private parties or not.

It has been the policy of the association to lend its every assistance in the enforcement of the laws so needful for a proper conservation of the fish life of the State.

BIG TRAP SHOOTING SEASON FOR COAST.

The trap shooting season on the Pacific Coast will soon be ushered in for what appears to be the most prosperous one in its history. Already preliminary details are being settled to line up the clubs and map out the programme of attractions that will be an inducement for the boys to make the smoke fly. Present plans are to start the club events the last of February and then the fun will continue until well into the winter.

C. A. Haight, secretary-treasurer of the California-Nevada Trap Shooters' Association, and E. Reed Shaner, secretary of the Interstate Association, are out with important announcements for Pacific Coast experts, who are polishing up their shooting irons. Mr. Haight is calling on the members of the California-Nevada Association to come forward with their dues and applications to hold the annual tournament of the organization and Mr. Shaner tells the good news that there will be a Pacific Coast Championship tournament this season. Mr. Haight writes as follows:

"Breeder and Sportsman:

"We are enclosing a copy of letter that has been forwarded to each club, a member of the California-Nevada Trap Shooters' Association, and booklet of the Interstate Association, constitution and by-laws of our association, with the desire that after reading same you will join with us as a member of our organization, and thereby boost California and Nevada in bluerock shooting, ond in this way continue the reputation that we have already acquired as a Class "A" organization.

"Awaiting your reply and thanking you in advance for your membership, beg to remain

"Yours very truly,

"CAL.-NEVADA TRAP SHOOTERS' ASSN.,

"C. A. HAIGHT, Sec.-Treas."

The letter is as follows:—

"The annual dues of your club to the California-Nevada Trap Shooters' Ass'n are now due and payable in the sum of $5 for the year 1916. It is particularly desirable that you forward the amount to the undersigned at as early a date as possible which will enable the secretary to make his report of clubs affiliating with our association to the Interstate Association, this request being made to conform to the rules of that association.

"The outlook for a successful trap shooting season is very good indeed and the continuance of the membership of your club is earnestly requested. We enclose herewith a pamphlet issued by the Interstate Association which thoroughly covers all the benefits to be derived by your club and our association, in addition to which the California-Nevada Trap Shooters offer special trophies to be competed for by our members only, at our annual tournament.

"You will please note from the Interstate Association pamphlet that we are enclosing that the California-Nevada Trap Shooters' Association ranks as Class 'A' as regards to the benefits to be derived, and it is our endeavor to keep our association in this class, which can only be accomplished by the affiliation of as many clubs of the states of California and Nevada as is possible to have as members.

"In view of the coming trapshooting season and anticipating the desire of many clubs to hold the tournament in the spring months we, therefore, suggest that all clubs desiring to bid for the annual tournament make their application for same by March 31, 1916.

"This will enable the secretary to place the matter before the board of directors and also give time to the secretary to take up any minor details that may have to be discussed with each club, it being our desire to make the award of the tournament by March 5th.

"Yours very truly,

"CAL.-NEVADA TRAP SHOOTERS' ASSN.,

"C. A. HAIGHT, Sec.-Treas."

The officers of the California-Nevada Trap Shooters' Association for this year are: President, Colonel J. W. Dorsey; vice-president, G. H. Anderson; secretary-treasurer, Clarence A. Haight; directors, H. Pfirrmann, Los Angeles, C. A. Julian, San Diego, A. J. Flickinger, Vallejo, W. S. Pease, Elko, Nev., Henry Garrison, Modesto, F. K. Burnham, Martinez, and Thomas Wilkes, San Francisco.

San Jose is the first in the field to secure the event. At a meeting of the Chamber of Commerce of that thriving city last week, O. N. Ford brought to attention the advisability of securing the California-Nevada shoot. Mr. Ford told the San Jose Chamber of Commerce that the Garden City had an excellent chance of securing the event and that 100 people would be on hand for four or five days early in June. The city would be advertised extensively by the reports of the contests that would appear in the daily papers and the sporting publications.

Mr. Ford told the directors of the Chamber of Commerce that the members of the Blue Rock Club of San Jose had raised $850 of the necessary sum of $1,000 to successfully promote the shoot. Within five minutes the directors had subscribed $50 and no trouble is anticipated in securing the remaining $100.

Secretary Haight expects there will be quite a friendly controversy to secure the Pacific Coast fixture. New clubs are entering the trap shooting field and the holding of the California-Nevada shoot will be a feather in the cap of the lucky club that wins out.

E. Reed Shaner's announcement of the decision of the Interstate Association to reconsider its action so as to give a Pacific Coast tournament this year is as follows:

"Editor Breeder and Sportsman:

"Please be kind enough to state in the trap department of Breeder and Sportsman that the directors of The Interstate Association have reconsidered the action taken by them at their annual meeting and have ruled to give a Pacific Coast Trapshooting Tournament this year. We will, therefore, be pleased to receive applications from clubs in Pacific Coast territory that desire this event to be held under their auspices. All applications should be sent to The Interstate Association, 219 Coltart Avenue, Pittsburgh, Pa., on or before February 10th.

"Yours very truly,

"THE INTERSTATE ASSOCIATION,

"E. REED SHANER,

"Secretary .The Interstate Association."

It is understood that the Portland Club will make an application for the classic. Last year the event was held in San Diego and it is considered only fair that the Pacific Coast championship should be contested in the north this year. The tentative date has been fixed at some time in August, although it is possible it may be changed later on.

The trap shooting tournaments arranged up to date by the Interstate Association are as follows:

Southern Tournament at Memphis, Tenn., May 9, 10, 11; $1,000 added money.

Western Tournament at Omaha, Neb., June 13, 14, 15; $1,000 added money.

Eastern Tournament at Philadelphia, Penn., July 18, 19, 20; $1,000 added money.

Grand American Tournament at, St. Louis, Mo. August 21, 22, 23, 24 and 25; $3,500 added money.

The Pacific Coast Tournament will be listed with these events as fixtures of the Interstate Association's programme.

E. Reed Shaner makes further announcement for the benefit of trap shooters that the association's booklet containing the 1915 trapshooting averages will be put in the mails about March 1st. The booklet will be widely distributed at that time.

CLOSED DEER SEASON IN CONTRA COSTA.

The supervisors of Contra Costa county recently adopted an ordinance prohibiting the killing of deer and antelope within that county. The ordinance reads:

"Every person who pursues, hunts, takes, kills or destroys any deer or any antelope within the county of Contra Costa is guilty of a misdemeanor and upon conviction thereof, shall be punished by a fine not to exceed five hundred dollars ($500) or by imprisonment in the county jail for a term not to exceed six months or by both such fine and imprisonment."

No limit as to the length of this closed season was set. The increase of deer and antelope will alone decide when the season will again be opened.

LAST CALL FOR THE DUCK HUNTERS!

On Monday next one-half hour after sunset the open season in California will come to a close. It will mark the finish of one of the most disastrous waterfowl seasons the hunters have experienced in years. Adverse weather has been almost a chronic complaint since the law permitted firing on October 15th. The terrific storm which swept all sections of the state had a tendency to scatter the birds far and wide and then the rain came to bring about flood conditions so that the gunners could not get within range of the game.

TAKING A LAST SHOT AT THE DUCKS

Pete Ashcroft is pictured on the Suisun Marsh with his trusty gun, faithful dog and agreeable companion enjoying the sport just before the bars go up.

An army of hunters continued to go out every Sunday during the bad weather but they were rewarded with such small bags that lately many of the regulars have given up in disgust and have stuck close to home. Records kept by the Fish and Game Commission show that less ducks were killed this past season than in years before. Fact is, it may turn out to be the poorest season on record when the commission tallies up its figures.

With but such a short space of time to get in some shots the outlook is not any brighter for ducks. The rains during the week brought more water to the flooded conditions and the regulars are going to have trouble getting at their birds. Parties that were out last Sunday and during the week reported poor sport as a rule and the season promises to go out with but little bombardment.

Frederick J. Taylor, Ira Flint and Deforrest Rio, a trio of rabbit hunters, of Fulton, N. Y., recently captured a pink hare, the first that has been seen in the vicinity of Fulton for years. The hare was about the size of the ordinary large white, or snowshoe rabbit, except that its ears were much longer and the general shape of the animal more on the pattern of the western jackrabbit. The hound owned by Mr. Rio brought the hare around for Mr. Taylor's gun. It took the dog nearly two hours to put the rabbit in a circle. The hare is thought to be a cross between the western packrabbit and the snowshoe rabbit.

* * * *

It is said that five hundred and twenty thousand new shotguns were sold in this country during 1915, which statement, if true, shows that hundreds upon hundreds of novices are yearly taking up field shooting or trapshooting as a means of healthful recreation. To be certain that the number is not overstated, suppose we drop the extra twenty thousand, leaving the number at five hundred thousand, and the number still is immense and proves that few other lines of sport during the year had more converts.

* * * *

More than 1,000,000 silver trout eggs from Lake Whatcom were delivered at the Washington state hatchery at Walla Walla a few days ago. They completely filled the hatchery. Superintendent S. D. Goodell announced that they will be hatched within a month and can be distributed next summer.

* * * *

Every county in the state of Utah is to have bird and game sanctuaries, where it will be unlawful to hunt and kill, even during the "open season," according to an announcement made recently by Fred W. Chambers, state fish and game commissioner.

Under the commissioner's plan, which will be put into effect as rapidly as possible, between 250,000 and 350,000 acres will be provided as permanent retreats for feathered songsters, game birds of all kinds and animals—all wild things except predatory animals.

In carrying out this state-wide scheme for the preservation and propagation of birds and animals, Commissioner Chambers is merely enlarging upon the movement he began in 1913.

* * * *

At the annual Christmas shoot of the Spokane (Wash.) Gun Club A. W. Woodworth broke 109 targets out of 110 shot at, with an unfinished run of 106. He missed his fourth target in the first 10-target event and then finished the 106 with a perfect score.

HEARD IN KENNEL CIRCLES.

Mayor Rolph will show along with his famous string of cocker spaniels at the coming Golden Gate Show a pair of English fox hounds. Being the only representatives of the breed on the Pacific Coast, they are bound to attract considerable attention.

‡ ‡ ‡

Horace P. Beddeau, a well known local bulldog fancier, has purchased the crack Scottish terrier champion "El Sur the Laird" from A. J. Molera. The latter has the largest kennel of the breed on the Coast.

‡ ‡ ‡

Mrs. Norwood B. Smith of the Cragwood kennels has sold a promising Scottish deerhound puppy to Fred B. McCay, of Cathay, California.

‡ ‡ ‡

Mrs. E. F. Brown of the Browndale collie kennels is getting several blue-merle puppies in condition for the coming Golden Gate show.

‡ ‡ ‡

Charles Lange, a member of the Empire Gun Club, has bred his pointer bitch and a litter is expected shortly.

‡ ‡ ‡

H. M. Robertson of Pasadena is importing several Scottish terriers. They are big winners and are booked to arrive next week. Robertson, who is the owner of the largest boarding kennel in the South, has on hand nearly a hundred dogs. The best in the kennel will be sent up to the Golden Gate Show.

‡ ‡ ‡

Mr. Vredenburgh, secretary of the American Kennel Club, with headquarters in New York, has been swamped with applications for registration since the new law went into effect. Ordinarily only about 9000 dogs are registered in a year, but in the month of December alone there were 2,000 applications. The secretary is working all hours to catch up, but it will be some time before he gets order out of the chaos that exists.

‡ ‡ ‡

Mrs. E. Green, who at one time exhibited some of the finest Scottish terriers ever seen on the bench, has just secured a splendid Maltese colored "Pom," weighing only three and one-half pounds.

‡ ‡ ‡

W. Ballytine of Goldfield, Nev., one of the largest breeders of English bulldogs in America, has just added another to his kennels. The name of the new dog is not available at present, but we understand it is one of the best to be had in England.

‡ ‡ ‡

Colonel J. W. Dorsey had the misfortune to have his setter dow jump out of a window recently and both front legs were broken. He is being treated and the prospects are bright that he will be ready to work again next season.

‡ ‡ ‡

Mrs. Tim Callopy is a recent convert to the toy fancy. She has purchased Dulce, a very fine bitch, from Mrs. Sinclair. Dulce is by Ch. Nemo Boy ex-Miss Dimples, and that Mrs. Callopy intends to start right is shown by the fact that already she has arranged to breed Dulce to Brother Boy.

‡ ‡ ‡

Mrs. C. H. Patterson's English setter Chiquita whelped eleven puppies. The sire is Ch. Manzanita. Mrs. Harry Witts recently bred her Lady Montez to Manzanita.

‡ ‡ ‡

Mr. Chas. Hefferman, Stockton, Cal., reports a litter of seven, four dogs, whelped December 7, by Champion Baughfell Briar ex Rhoma of Mirasol, and a litter of seven, four dogs, whelped November 19, by Cyprus Cadet ex Crewe So Bonheur.

‡ ‡ ‡

J. Nonnemacher of North Yakima, Wash., reports ten young Airedales by Cermer Dr. Cook. The Cermer Airedale Kennels have sold this fine young dog to S. D. Chestnut of Ft. Worth, Tex. The Cermer Kennels have also ten young ones by this dog.

‡ ‡ ‡

Mrs. Maud Dickerson of Los Angeles has sold her Poodle, Little Fix-It II, and has added Maltese Terriers and Japanese Spaniels to her kennels. She bought a pair of Maltese from Mrs. Freerkser of Seattle. They are little dreams. Little Snowman went through from puppy to winners at Los Angeles last November.

———o———

A. D. Ferguson has accepted the position of special agent of the Fish and Game Commission. The Fresno division will be abolished on March 1st and Ferguson will make his headquarters in San Francisco. On February first Kern county, formerly in the Fresno division, will come under the jurisdiction of the Los Angeles officials and the rest of the territory will be included in the San Francisco division.

* * * *

The Fish and Game Commission, according to an announcement by executive officer Ernest Schaeffle, is going to put a stricter watch on the bay to see that oil and acids are not dumped into the waters from the factories. It has been found that much of the oil which can be seen flooding the bay waters these days comes from the rain washing it off the streets, through the sewers to the bay. At the same time the authorities want to see that the factories obey he law.

Drink Jackson's Napa Soda.

Severe Winter Kills Quail by Hundreds

The severe winter being experienced in California this season is proving a hardship on wild fowl, quail especially. Reports from the Sierra-Nevadas are that quail are dying by the thousands because of the rigors of the cold weather and their inability to secure food. The Fish and Game Commission is working industriously to relieve the situation. Work has been progressing in distributing grain to the birds and looking after deer so as to conservate the game, and in order to handle the task on a large scale the commission has asked the State Board of Control for $500 to expend in that direction.

George Neale, in charge of the Sacramento division, gives some data on the subject that will be of interest to sportsmen. His letter follows:

Fisher Hunt, Breeder and Sportsman:

While in San Francisco at the office yesterday I promised to send you the names of the localities and about the approximate number of quail it has been necessary to feed at this time owing to the severe snow storms all over Northern California. Wherever possible, we are having our deputies attend to the feeding personally, both as to the purchasing and distribution of grain. Many sportsmen and other interested persons are contributing large quantities of wheat, many of them going to a great deal of trouble in carrying the feed on skis and snow shoes. Owing to the wide distribution of these birds it will be impossible to reach them all, but we are attempting to save as large a percentage as possible. Owing to the last few mild winters the mountain quail have not shown a disposition to come down as low as they formerly did and many thousands which have remained above their natural elevation too long have become caught in the snow.

Deputy R. C. O'Connor of Grass Valley reports large numbers of mountain quail near Grass Valley and Nevada City and is making his regular rounds on skis, feeding these birds.

Deputy J. S. White of Redding states that large numbers of mountain quail are coming into the towns of Dunsmuir, Delta and to places north to Antler, also at the Mammoth Mine and north of Kennett. Large numbers are also hanging along the upper Sacramento river adjacent to the Southern Pacific railroad. Deputy White is feeding these birds from a hand car, making daily trips down the road and feeding them wherever necessary. He states that large numbers of deer can be seen swimming down the river to the snow line. Two of our men are very active in this vicinity, to protect the deer from being killed. He also states that the last rain on the snow had the effect of freezing the surface so that the deer will be able to walk over the snow.

Deputy Warren of Taylorsville reports the loss of large numbers of quail from exposure. Within the vicinity or neighborhood of Greenville there are approximately 2500 in one bunch and about 500 near the town of Quincy. These are all being cared for, both by voluntary contributions and grain is also being purchased by Warren.

Deputy Cady of Susanville is feeding 500 mountain quail near that town. Several ranchers nearby are feeding about 1000 and report great loss from exposure and inability of the birds to secure gravel and grit.

Deputy Streuber reports large numbers near Weed that need attention at once. They are being fed by Mr. Streuber.

Mr. Albey is feeding 400 mountain quail in the vicinity of Weed, donating the grain himself.

Deputy Harris says that large numbers are coming into Hornbrook and feeding in the barn yards and gardens of the residents.

Dr. Tinsman of Adin reports that between 2500 and 3000 quail are on the Sherer place on Pit river, Modoc county. Owing to the inability of our deputy to reach the locality we have instructed Mr. Sherer to take care of these birds.

J. S. Strinnett of Keddie reports many mountain quail dying from exposure. He is sending two men on skis with feed.

Deputy Chester Scroggs of Loomis reports large numbers near Dutch Flat and is now carrying feed to them.

We have other reports of the same character, all of which are being attended to wherever it is possible to reach the birds.

Reports on the deer are more favorable. The deer were in a very fine condition and consequently can withstand exposure and loss of feed until they are able to get to the lower altitudes, where they can secure browse and other feed.

All our mountain deputies state that this is the most severe winter on birds and animals in their long experience, many of them having been born in the mountains where they are located. Fortunately, all are practical and experienced mountaineers.

In connection with this we would say that the heavy fall of snow insures fine fishing for next summer, although it may make the season rather late for first class fishing.

Very truly yours,

GEORGE NEALE,
Assistant, Sacramento Division.

WINNER OF NATIONAL FIELD TRIALS.

Press reports of the National Field trials held in the south last week are as follows:

Grand Junction, Tenn., Jan. 21.—The pointer John Proctor, owned by A. L. Curtis of Belton, Tex., and the setter Medford Eugene entered by Dr. E. J. Haines of Medford, N. J., were rated by the judges tonight as the best of the ten dogs which competed in first series heats of the National Championship Association and will meet in a final race tomorrow for the title of national field trial champion.

Grand Junction, Tenn., Jan. 22.—The pointer John Proctor, owned by A. L. Curtis of Belton, Tex., won the title of national champion in the final heat of the field trials of the national championship here today.

Field trial events scheduled for the near future are:—

Texas Field Trial Association, Cypress, Tex., February 4, 1916. X. A. Denny, secretary, 502½ Main street, Houston, Tex.

Southwestern Field Trial Association, Vinita, Oklahoma, February 14, 1916. A. A. McKellop, secretary, 1801 East Broadway, Muskogee, Okla.

Washington Field Trial Club, Tacoma, Wash., February 21. F. E. King, secretary.

Twelfth American Field Futurity, southern Illinois, November 2, 1916.

———o———

Calhoun, Ala., January 25.—John Proctor, handled by C. H. Babcock, won the honors of the free-for-all stake of the National Field Trial club today. Last Saturday John Proctor won the national champion ship stake run at Grand Junction, Tenn.

Gibraltar Ollie, owned by G. S. Parsons of Kenneth, Maine; D. Solo Frank, owned by A. G. C. Sage of New York, and Lewis C. Morris, owned by B. J. Rowe of Birmingham, Alabama, all ran from the traces in the second series of the free-for-all stake. John Proctor's superiority in his footwork won for him.

FOX HUNTING NEAR LOS ANGELES.

Fox hunting, heralded as the king of all outdoor sports, within thirty minutes' distance of the center of Los Angeles and almost at the edge of the city limits, is receiving the attention of sportsmen visitors from the East.

One day last week Attorney Andrew Park, aided by his pack of foxhounds, captured one of the most handsomely-marked foxes ever taken in this State and brought his tally for fox hunting up to forty foxes. In speaking of the facilities for fox hunting in Southern California, Mr. Park said:

"I am 60 years of age and have hunted foxes for more than forty years, from the coast of Georgia to the Pacific, and nowhere in America is there better sport than right at our door. The hills are literally alive with foxes.

"Early yesterday morning, with a party of friends, we started a fox within fifty feet of my lodge, where my kennels are located, in the Benedict Canyon north of the Beverly Hills Hotel. The pack chased the fox a distance of probably fifty miles, up and down the canyon, the death occurring within 100 yards of the starting point.

"I have been repeatedly asked to trap foxes for eastern estates, where the animal is almost extinct, and have had letters from all parts of the country asking about the fox-hunting conditions here. Eastern men are taking up land in the canyons north of the city for the purpose of having a place to follow the hounds. Los Angeles is the only place in the world that I know of where one can step off a trolley car and find a multitude of foxes."

Mr. Park has a kennel of sixteen hounds, five old dogs and the remainder yearlings, all excellent hunters. With this pack the hunters go out and when a fox is found the dogs are unleashed and the hunt is on. The California fox is one of the most artful in the world and it generally requires from two to three hours to run him down. While not so large as the eastern red fox, the marking is similar and the animal has more evasive tricks than his eastern brother. He has one point in common with all other foxes, however, and that is he always returns to his lair when capture seems certain, and the death generally occurs within a short distance of the starting point.

The fox pack owned by Mr. Park is also well adapted to hunt coyotes, and when more strenuous sport than fox hunting is desired the party goes farther afield, knowing that an entire day will be consumed in the chase.

———o———

The Spokane (Wash.) Gun Club has begun a series of handicap shoots, for which diamond medals will be given. Thirteen contests will be conducted, running through the months of January, February and March. It is necessary for a contestant to participate in nine of the events in order to be eligible for a prize.

* * * *

The Widgeon Club, which has one or two members in Tulare, has refused to buy back the land in the Tulare lake region formerly used for hunting grounds and decided to procure new grounds. The original ground was bought from his brother club members by Kenneth Sworder of Hanford and he offered to sell it back at an advanced price.

Sportsmen's Row

All the old guard are wondering if Henry Stelling is still on the Reno Boat. No one has seen him since last season. Maybe he fell overboard.

* * * *

As John Potter has killed his limit of ducks so many times this winter the club handicapper is considering the 23 yard mark for John.

* * * *

Frank Webster is going to be as busy as a bird dog again this year between the Golden Gate, San Leandro and the Bay View clubs. No wonder Frank won the Golden Gate consecutive trap trophy.

* * * *

Bud Vallejo will try to pin another Challenge Cup to his collection this year. He has the best wishes of all the boys.

* * * *

Ben Baum has been working with a Try Gun. Wonder what the old vet is doing?

* * * *

Our friend Pete Ashcroft, who is manager of the Golden Gate Club, is more than anxious to get back in harness again.

* * * *

Clarence Haight can be sighted almost any morning out in the Richmond District pointing his shooting iron at the little birdies from his bedroom window.

* * * *

Big Fred Willet is going to show the boys what a good 20-gauge will do to the blue rocks when the season opens.

* * * *

Edgar Forester has so many shells left at his duck shack that if the blue rock season don't open soon he will have to visit a warehouse.

* * * *

Sam Bernard says he wishes the gang would shoot more and talk less. Sam likes to see the game.

* * * *

Henry and Emil Kleversahl ought to break records this season, judging from the number of ducks they brought down.

* * * *

If A. G. Wilkes improves on his last season's records the club will enter him in the American Handicap.

* * * *

Bud Havens says that Friend Howard will have to go some this season or he will find himself in Bud's game bag.

* * * *

With his wonderful advantage of gun reach and pointing ability, Mr. Peet should be in the championship class.

* * * *

The boys will miss Col. E. R. Cuthbert but Lieut. Townsend Whelen will gain some shooting partner if they meet in Panama.

* * * *

A new illustrated publication, The American Shooter, made its initial appearance on January 15. It is published on the first and fifteenth of each month and will be devoted to shooting. The American Shooter is to be complimented on its first issue as it is well illustrated, written and edited. Stoney McLinn, a former sporting writer of Philadelphia, is the editor. The American Shooter is published in Baltimore.

* * * *

L. D. Hawxhurst, a scatter gun artist, showed the crack rifle men last season that if Uncle Sam needs marksmen the Golden Gate Club will furnish Len.

* * * *

Bill Varien, the little phenom of Pacific Grove, has the shooters guessing as to his intentions. Why he fills his gunstock with five pounds of lead is to hold the gun to his shoulder—or is it to keep Bill's feet on the platform?

* * * *

Jim Brickell will make the boys in the Family Club sit up when he lays his face on that Monte Carlo stock of his.

* * * *

Andy Flickinger of Vallejo showed the crack shots back East what could be done with a doughnut on his pump muzzle when he shot in the Grand American.

* * * *

Our own D. W. King, known to the Coast as the "Fudge King," has found a cure for flinching, judging from his wonderful scores of late. What's the prescription, D. W.?

* * * *

Harry Ricklefson, the well known old time Bay View booster, now located in British Columbia for the Red W., called on the shooters last week. It was good for the eyes to see him around looking so well.

* * * *

Charles Hollywood, Bob Valleau, Homer Craig and Al Durney were up to the Mud Hen Club at Alvarado last Sunday and got some birds, but not many.

* * * *

Henry Toft, marshal at South City, Dr. Dolly and Mr. Russie made a trip to Gustine during the week but found every place flooded. They were rewarded with only eighteen ducks among them for the long automobile ride.

Rube Haas has been getting his share of the ducks this season and it augurs well for some high scores at the traps.

* * * *

Officers George Wallenschlager and MacDonald shot a limit each at Mt. Eden one day during the week. They report ducks plentiful but hard to decoy. Mac says they are wise to the stools.

* * * *

F. D. Putzard, Roy Taber, John Rewin and Pete Retell secured limit bags at Dorris. The birds were mostly mallards and honkers.

* * * *

George Boehm, Leo Cuneo, Dolph Sorrila, Silna Lagamarcino and E. Klensahl had a successful shoot last Saturday at Hog Island.

* * * *

E. Reed Shaner, secretary of the Interstate Association, has announced that gun clubs intending to apply for registered tournaments in the course of the fiscal year will receive literature explaining the 1916 policy of the organization, and application blanks, this month.

Charles Jedeau went hunting last week and killed a robin. It proved a costly bird. He was haled before a magistrate at Cloverdale and was fined fifty dollars, as the robin is a protected bird. So is a yellow hammer, under the name of "flicker." Ernest Curein did not know it, and when he shot one of the birds he was arrested and fined twenty-five dollars. Peter Uicoletti also went hunting, and without a license. For this he was fined forty dollars. When the magistrate also learned that Peter had killed robins, too, he added forty-five dollars to the fine. The trio were arrested near the Italian-Swiss Colony by Deputy Game Commissioners A. L. Lea and Paul Smith. They paid up.

The deputies are to be commended for making the arrests. All song birds are protected and no true sportsman wants to see them butchered for the table.

BRUNER WINS IN SHOOT-OFF.

The inevitable happened Sunday morning at the Vernon Gun Club, when the twelfth fifty-bird handicap was staged for the W. H. Wilshire trophy and a second leg was annexed by one of the eleven contenders who have already won a leg on the prize.

The strain was getting too great and had to be broken. Stanton A. Bruner, shooting from the twenty-yard mark, not only broke the strain, but broke forty-eight targets and tied with Dr. Fred Fitzgerald, who also fired from the twenty-yard range. In the shoot-off Fitzgerald dropped five birds and had to be contented with a 20x25 score, but Bruner broke twenty-three out of the frame and won his second leg.

The shoot-off was quite exciting, both shooting even until the tenth bird was thrown. Both missed this. However, Fitzgerald missed the next one, which was shattered by Bruner. Two more were missed by Bruner in the last ten, and three got away from Fitzgerald.

Manderville, L. C. Forest, Bill Dougherty, W. C. Poor and "Pop" Bruner constituted the first squad that went to the traps, and they went to the traps in the rain. About twenty shooters were on hand at the start, but as soon as the sun came out around noon there was an even thirty shooters entered in the trophy competition.

Many good scores were made in both the trophy shoot and practice competition. Fred Grewell was high gun on the first hundred, with ninety-five targets squelched. His run without a miss was forty-eight. Grewell was second high gun in the Wilshire shoot, breaking forty-seven from eighteen yards.

A sweepstake shoot among the club's cracks followed the day's program and in a squad of seven competitors five of them broke twenty-four out of the frame of twenty-five. In a squad composed of Dr. Fitzgerald, Stanton Bruner, Frank Mellus, Dr. Packard and R. L. Hall, 121 birds met their fate at the hands of the quintet out of 125 thrown.

Ed Hedderly was easily the small-bore champion of the day, breaking forty-seven out of fifty with a 20-gauge gun, and he used No. 8 shot at that.

Several high runs were recorded, Selby and Ed Mitchell scored a 47 straight; Harry Cline, 25; Moody, 24; Fitzgerald, 25, and Mellus, 38.

The scores follow:

Wilshire handicap of fifty targets:

Manderville, 16 yards, broke 39; L. C. Forrest, 17—45; W. T. Dougherty, 17—40; A. W. Bruner, 16—43; Fullerton, 17—40; W. Robinson, 17—37; Kees, 16—36; F. Grewell, 18—42; F. Mellus, 20—45; Tuckett, 18—41; W. Pugh, 18—44; White, 18—41; S. A. Bruner, 20—48; W. H. Wilshire, 17—44; R. L. Hall, 20—45; Dr. Fitzgerald, 20—48; P. Peterson, 18—38; H. Cline, 17—41; Lou Mellus, 18—43; C. W. Clement, 16—39; C. E. Groat, 16—36; Dr. Packard, 20—44; T. P. Smith, 17—41; G. Persinger, 16—42; J. W. Meeks, 16—40.

Practice shooting: Clement 45x50, C. E. Groat 36x50, Dr. Packard ——, C. Moody 24x25, F. M. Bockway 10x25, Hedderly 23x25, George Cline 20x25, Ed. Mitchell 25x25, Manderville 37x50, L. C. Forest 42x50, W. T. Dougherty 63x75, W. E. Poor 51x75, A. W. Bruner 40x50, Fullerton 66x75, W. Robinson 38x50, Kees 22x50, Fred Grewell 48x50, F. R. Mellus 73x75, Tuckett 59x75, Pugh 44x50, White 24x25, S. A. Bruner 44x50, Wilshire 42x50, R. L. Hall 73x75, Fitzgerald 25x25, Peterson 45x50, Harry Cline 43x50, L. Mellus 59x75,

INTERCLUB GALLERY RIFLE COMPETITION

Quite a few Pacific Coast teams are competing in the National Interclub Gallery competition. The week ending January 8th, Bucyrus team of Ohio led in class A, with a score of 991. No Coasters are entered in this class. In class B. Watertown, South Dakota, is in front with 988. Ogden, Utah, ranks seventh with a tally of 981 and Tacoma, Wash., is twelfth with 946. In class C. the returns of the Olympic Club of San Francisco had not been received and St. Paul, Minn., led by a score of 982. No local aggregations are in the class D. competition.

MANY MARKSMEN AT SHELL MOUND.

William F. Blase, world-champion rifle shot and king of the Panama-Pacific International Exposition shooting tournament, beat all competitors with a phenomenal score of 236 in the Golden Gate Rifle and Pistol Club monthly medal shoot.

The leading shooting societies of the bay district were fully represented by their best talent on the Shell Mound range Sunday. Conditions favored accurate aim, and the results of the day's practice proved very satisfactory. Following were the principal scores:

Golden Gate Rifle and Pistol Club, monthly rifle scores—W. F. Blasse, 233, 236; Ben Jonas, 215, 212, 214; E. Schierbaum, 213, 220, 222, 221, 214, 227; M. W. Housner, 215, 218, 219, 212, 228; A. H. Millett, 174, 183, 175, 154; M. F. Blasse, 216. Pistol scores: C. T. Sisson, 84, 80, 87; J. J. Currier, 87, 86; C. W. Whaley, 85, 87; W. C. Prichard, 94, 95, 94, 90, 96, 92, 91; R. Mills, 91, 94, 94, 94.

* * * *

San Francisco Schuetzen Verein, monthly medal shoot—First expert class, George A. Pattberg, 230; Otto A. Bremer, 222. Expert class, A. Hubner, 207; champion class, H. Luneburg, 220; first class, P. F. Rathjens, 206 Lieutenant A. Westphal, 194; second class, John de Wit, 180, 176; third class, J. F. Mues, 206, W. H. Schuldte, 135; fourth class, P. F. Rulffs, 172, 172.

* * * *

Germania Schuetzen Club monthly bullseye shoot—John de Wit 204, M. F. Blasse 209, Herman Huber 249, N. Ahrens 533, B. P. Jonas 817, George A. Pattberg 939, W. F. Blasse 1036, E. Hoffmann 1066, Otto A. Bremer 1257, G. C. Post 1461, G. C. Gunther 1598.

* * * *

San Francisco Schuetzen Verein monthly bullseye shoot: Otto A. Bremer 355, Otto Lemeke 412, George A. Pattberg 762, J. F. Mues 744, H. Luneburg 853, Lieutenant A. Westphal 1130, John de Wit 1257, Henry Bernholdt 1278, E. Hoffmann 1305, William Dressler 1234, Captain John D. Heise 1342, P. H. Rulffs 1345, A. Bertelsen 1400, P. F. Rathjens 1548, A. Huber 1753, F. Brandt 1900, Charles Oldag 2460, F. Atzeroth 2540, W. H. Schulte 2796.

* * * *

Veterans National Guard of California monthly rifle shoot: F. P. Poulter 46, C. Meyer 45, Captain John E. Klein 44, E. H. Slitor 43, H. C. Mayer 36.

* * * *

Redmen Schuetzen Company, monthly medal shoot: Champion class—W. Dressler 204, O. E. Rosberg 200, C. G. Strippel 190; first class—J. Schmidt 186, M. Fuetscher 180; second class, A. Root 170; third class, A. Hugh 169; fourth class, R. Schnelle 150, F. Hoffman 148, John Archut 125.

First best shot, A. Hughli 20; last best shot, J. Schmidt 24.

Bullseye scores—J. Schmidt 600, A. Hugli 700, W. Dressler 741, C. G. Strippel 760, O. E. Rosberg 763, M. Fuetscher 769, J. Hoffman 800, R. Schnelle 810, A. Avot 850, J. Prackel 860, John Arschut 920.

* * * *

San Francisco Turner Schuetzen monthly ring shoot—H. Schulz 214, 206; C. Tidball 156, 144; Carl Abraham 194, 198; H. KKiffel 188, 197; Herman Enge 195, 185; E. Fleischer 171, 149.

AIREDALE SAVES SOLDIERS ON BORDER.

Sergeant R. H. Fowler, U. S .A., who is on duty down along the Texas border, writes that he has six of his Airedales with him, and has had great sport hunting cat, both bob and leopard, and coon. Sergeant Fowler writes us about a fight on the border, in which a handful of United States soldiers stood off over a hundred Mexican bandits for several hours, the American boys being armed with nothing but revolvers. One of the participants in this fight later wrote the following letter to Sergeant Fowler, which will prove interesting to Airedale fanciers: "Friend Fowler: I am in the hospital at San Antonio; got plugged in three places in the fight at Ojo del Agua, one of them through the arm, hence this bum looking letter. Bonnie, the Airedale bitch you sent me, woke me up just before the firing, or they would have riddled me. She comes in use shortly and I want to send her up to you to breed to Rex. St. Mayo was interviewing me about Airedales for the army and I have referred him to you. Adios.—Smith." The writer, Sergeant H. R. Smith of the Signal Corps, was in charge of the wireless station at Ojo del Agua, the night of the attack, in which four American soldiers were killed and several wounded. Had it not been for the timely alarm given by the Airedale, the chances are that the small number guarding the wireless would have been wiped out.—Kennel Review.

TRAPSHOOTING FROM AN AEROPLANE.

There was a time when one had to be a member of a gun club in order to enjoy the benefits of trapshooting. That was in the days before the hand trap came into use. Now "the sport alluring" is enjoyed on the water and in the air, as well as on Mother Earth.

A. B. Thaw, the aviator, has had a hand trap attached to his aeroplane, and, with a companion and his scattergun, he takes even more delight in shooting at the blue rocks as the airship whizzes a mile a minute through the air than he did when the pleasure was his on terra firma.

It is no easy matter to smash the targets with a gun from a fast-flying airship. It requires a good eye and steady nerves to pulverize the clay boys when standing before the traps, but it requires better aim and even steadier nerves to hit the targets from a fast-moving airship.

Mrs. Frank E. Butler (Annie Oakley) became cognizant of this fact while on a recent visit to one of the aviation stations of Uncle Samuel near Atlantic City, N. J. After inspecting the aeroplanes Mrs. Butler was induced to demonstrate the possibilities of trapshooting from an airship. A hand trap was fastened to the flier to throw the targets straight ahead. Mrs. Butler found that it was necessary to shoot very quickly, as the airship, going so fast in the same direction as the target, would sometimes pass it before she had time to get perfect aim.

The hand trap has revolutionized trapshooting. It makes it possible to shoot nearly anywhere. When the U. S. S. Solace went through the Panama Canal to the Panama-Pacific Exposition it carried a number of hand traps, so that the officers and men could enjoy the sport while on the water.

Incidentally, many hundreds of private yachts, and even some ocean greyhounds, have been equipped with hand traps. Seldom does a steamship put out from any port these days without a supply of hand traps and targets. The clear background and the absence of anything that would tend to direct the attention of the shooter and the wide scope of space permitted offer ideal conditions for the sport. Conditions are just as good in the air, but the task of breaking the target is much more difficult.

A trapshooting tournament that was novel, to say the least, was recently conducted by the Edgewater Gun Club of Toledo, O. It was an international aqair, in which 15 nations were represented, or in other words, 15 overseas countries.

Any organization that can get Germans and English together these days with guns in their hands without shooting each other undertakes a big task, but that is what the Toledo club did, and got away with it in fine shape. Squads of five men represented each of these countries: England, Germany, France, Ireland, Hungary, Austria, Italy, Sweden, Denmark, Poland, Russia, Greece, Scotland and China, and there was one delegation that didn't have a flag, a Hebrew team.

Don't overlook the mention of China having a team in the cosmopolitan competition. Very few can reconcile a Chinaman with a gun, but they were right there. It was no doubt the first time a Chinese team ever appeared before the traps. The Celestials, all young men, were quick to learn the ways of the greatest American sport. So if you pick up a newspaper one of these days and see these five names in the summary do not feel alarmed, for they are O. K. in every respect. Here are the names: Henry Yee, Louie Quong, Henry Get, John Sew and Edward Keota.

As far as we could ascertain, all the shooting was confined to the regulation attacks upon the "blue rocks," but the spectators, if not the contestants, must now and then have had in mind the possibilities of an interchange of hostilities in imitation of the all-comers' grapple on the other side of the pond—but the influence of trapshooting is always toward peace and good-fellowship.

The Edgewater club in this many nationalities' shoot provided an attraction such as Americans never before witnessed, and drew an immense audience, but the greatest thing they did was to demonstrate the fundamental democracy of America, and it may be that trapshooting will act always as a rallying point around which this democracy may continually be exemplified.

Trapshooting is steadily growing in popularity as a feature in country club life. Organizations perfected for the development of other sports are turning to trapshooting for an all-year-round pastime. This is but natural, as "the sport alluring" attracts all those fond of outdoor pleasures.

The Baltsurol Golf Club of Newark, N. J., is the latest country club to promote trapshooting among its members. The Baltsurol Club is staging weekly and monthly handicap tournaments, and from a modest beginning in point of entries the list is being lengthened each week.

Some years ago the New York Athletic Club went into trapshooting on an extensive scale at its country home in Travers Island, and now quite a lot of the yacht and country clubs in and around New York have all the modern trapshooting appliances.

One of the largest country clubs interested in trapshooting is the Pinehurst Country Club, at Pinehurst, N. C. From the 17th to the 21st of January this organization conducted a handicap tournament, its ninth annual affair, and behind the traps on those days enough wealth will be represented to make Croesus poor in comparison. This is a national shoot and attracts men in every walk of life.—Peter P. Carney, Phil. Public Ledger.

Troubles of Pat and His Cub Bear

There is a saying about the bear family which is very, very true. You may have heard it before! it is "that there is never any telling what a bear will, or will not do." You may have heard this saying, and yet do not believe it—well, Patrick O'Leary was that way—once.

Pat first met the cup one evening in the early summer, over on the edge of his clearing. Strangely enough, the cub and Patrick both made the same mistake. They each underestimated the other. The cub, then about as large as a fox terrier, had strayed away from its mother, and, on seeing Patrick, it came to the conclusion that all it had to do to escape was to climb a small tamarack sapling. The old she bear could not have been far distant anyway, but this world wise infant did not for one instant bother about calling to her. Self-confident, self-reliant, up the sapling went the cub.

Patrick's mistake may have been more pardonable, but personally he did not see how one small cub up a shaky sapling could injure a big strong man with a rope over his arm. Ten minutes later, the cub safely trussed up on the ground, Pat might have modified this last statement, or might even have admitted that for its size there was a great deal of sharp claws and sharper teeth about the cub.

However he did neither—instead, he carried the cub across to his cabin; which really brings me to the beginning of my story.

After a few minutes' work, the cub, whimpering softly, was chained up to a box in one corner of the shack, and was left to its own devices and a saucer of milk. I am not going to tell you that it instantly upset the milk, because you will have already guessed that. After watching the cub's struggles for a few minutes in order to make certain that the captive was securely chained, Patrick took down his rifle and went out into the gathering dusk to try and find the old bear.

The finding itself was not dramatic. Pat went sneaking round one corner of his stable, and the bereaved mother went sneaking round the other. The two met on the corner. Pat stiffened in his tracks. The bear rose up in hers, and looking very big and black in the waning light, started to advance on her hind legs.

There was a sound very much like that made by a rifle dropping to the ground—an expression very like "Well!"—(only it wasn't!), and the next instant the man was sprinting for his cabin.

It was a magnificent race. Indeed, it was such a close finish that as soon as he had the door slammed to and locked, Pat turned round to be sure that the old bear wasn't in the room with him.

He heard her stamping about outside, and felt a bit easier; then he felt himself, and found that he still had a whole skin, though for the life of him he could not remember what he had done with his rifle.

"By Gosh," he said, after a few minutes spent in deep thought, "madder'n a whole nestful of hornets." And he swore, and repeated "By Gosh" several times.

Presently the old bear came back to the cabin, and put her nose down to the crack in the doorway, and went "snoof, snoof, snoof, snoof, sniff!" for several minutes. Pat says she did it for several hours, but then——!

On hearing her the cub started whining and wailing, and the old she-bear grew madder than before. She tried to push the door in, but Pat put the table up against it; it was a solidly made door else she would have ripped it to pieces. Next she tried the windows, but they proved to be too high from the ground; nor could she get on to the roof, else this story might have been a tragedy.

Finally, hearing no sound, Pat opened the door, and very gingerly stuck his head outside. The old bear saw him and came for the cabin at the gallop. Pat was pretty badly scared as he barricaded the door up again, wondering vaguely even as he did so, what the bear had been doing over at the barn.

As a matter of fact the old bear had been amusing herself tearing up some sacks of pig feed she had found there. She was so absolutely and thoroughly mad that destruction in its worst form was the only thing that appealed to her. For awhile she tried to get into the cabin by digging away the earth from underneath it, but the soil was too full of big boulders and she did not accomplish much, beyond ruining Pat's flower garden. All the time, too, she could hear the cub, mourning and grieving inside the cabin, and this, you may be sure, did not put her in any the better temper. And so the siege went on.

Pat's only firearm was the rifle; and the old bear had already made that look more like a railway accident than a Winchester. Once he lit the lamp, but Pat swears with his hand on his heart that the old bear came back and started throwing rocks at the windows; and so he sat in darkness.

Why didn't he let the cub go, and so end it all. The only reasons I can give are, firstly, a streak of obstinacy in his nature, and secondly, an advertisement in a paper. Pat had discovered this advertisement a week or two before; the paper itself had come into his life on the outside of a cheese. Briefly the advertisement stated that, for quick delivery, a Mr. William Migley would pay $50 for a live uninjured black bear cub. It had surprised Pat.

"By Gosh," he had said. "Fifty dollars for a b'ar cub. I ain't never got more'n ten dollars before." This partly explains why Pat had taken the rope across to the edge of the clearing with him; and I think it entirely explains why he didn't let the cub go. It wants a very strong heart to release fifty of the best after having them tied up in a corner of your cabin.

The night wore on. Pat could still hear the old bear occasionally—once she knocked against an empty coal oil can over by the barn, and once she came and "snoof-snoofed" at the door again.

The cub, too, had quieted down, and no longer strained and tugged at its tether. It seemed to be asleep, though Pat fancied that it was sobbing softly to itself.

Pat himself must have dozed, for of a sudden he was on his feet, the sweat breaking out on his forehead. Then came another awful squealing scream . . . and then, after what seemed an eternity, another, and by that Pat knew that his pig pen was demolished, and that his pigs were beyond all earthly aid. With black rage in his heart he awaited the dawn.

It came at long last. There was no comfort in the thought that the cub whining in his corner was worth half a hundred dollars; nor was there, I fear, very much profit in it now.

By and by, when it was fully light, Pat looked out of the window, and saw the old bear rooting up his garden. The madness in her had not yet gone down, and even as he watched, the bear left the garden, and started pulling the shacks off the side of his hay barn.

There was no rage left in Pat's heart now, only a dull wonder as to what the end could be. Fascinated, he still watched; he saw the she-bear come back to the ruined pig sty, and drag away one of the carcasses into the brush. This she repeated until she had disposed of all three bodies. Personally I think she buried them, for Patrick never found them.

The end came with great suddenness. Lying on the floor was the cheese scented paper containing the advertisement that was the cause of all the trouble. Pat picked it up, read Mr. Migly's offer over again, then idly glanced over the rest of the paper.

Suddenly, with an exclamation he was on his feet. He strode across the cabin, and seizing the protesting cub by the back of its neck, so that it could neither bite nor scratch, Pat most soundly boxed its ears. Followed a wild wailing and squealing; and back came the outraged mother.

Pat's mind was made up. He unchained the squealing cub, and sent it flying through the window just as the old bear came charging at the door. Her cub restored to her, the old bear quieted down at once. She made a bee line for the brush, the cub following at her heels. Pat, standing at the open doorway, watched them go.

"Take your cub, durn you," he said, "though you ain't left me much but ruin,' 'and as the bears reached the protecting brush he raised his voice, and shouted his last farewell: "And that advertisement was three years old, anyway!" He says the old bear looked back at him and grinned!

Now these are simple facts of the case. Personally I believe them. You may not. This is a free country.

But whether you do believe them, or whether you don't, for the love of little fishes don't ever try to josh Patrick O'Leary about bears. He's got a new rifle, and if you were to try and buy a bear cub of him—well, my gracious—he'll fill you so full of holes, your skin could be used for a sieve.—H. C. Haddon, in Rod and Gun.

NOTES GATHERED HERE AND THERE.

George W. Courtwright, deputy fish and game commissioner at Canby, Modoc county, is receiving treatment at the State hygienic laboratory in Berkeley as a result of being biten by a rabid dog in the streets of Alturas.

The dog attacked Courtwright and bit him on one leg. The head of the animal was sent to the laboratory for examination. It was determined the animal was rabid.

With ten minutes to spare, Courtwright caught a train out of Alturas. The train was stalled in the snow and Courtwright was three days in reaching Berkeley. He will take treatment for twenty-five days.

* * * *

The preliminary examination of Robert Locke, Stanton Wiliams, William Chaney and Elgin Donaldson, charged with killing deer out of season and having the meat in their possession, is up before Justice Mulroy. The arrests were made by Game Warden O'Connor near Nevada City who was accompanied to the scene by Deputy Sheriff Young.

The young men have been living at the old Houseman place, about three miles beyond that city. They denied any knowledge of the killing of deer at first, but when 100 pounds of deer meat was found in the cellar they said that one member of the party had killed a buck, showing the antlers to prove their story. Game Warden O'Connor however, maintained that the meat was a doe, and that the animal was killed within a week. This story the young men deny. All are charged with the crime, as it was shown that all had partaken of the meat.

THE FARM

THE CONTROL OF SOIL WASHING

Soil washing is the greatest single source of loss on many rolling lands. It is greater than the loss of plant food through cropping. The washing off of the surface soil during a single season may remove as much organic matter as will be replaced by the turning under of two or three clover crops. A single rain may form gullies which it will require years to repair. And the injury to the land itself is only a part of the story. The filling of our smaller streams with silt and the great injury that is done navigation by the clogging of our large water courses with this eroded material is another very important phase of the subject, when the country as a whole is considered. The present season has certainly emphasized, in the minds of all observing farmers, the great havoc which is caused by soil washing.

There would be little need of calling attention to these matters if it were not for the fact that a large share of such damage is preventable. The great need of soil conservation is more strongly emphasized each year and in no way is greater care needed than in the prevention of soil erosion. While it is a very serious national problem, it is a matter over which the government or the state has little control. It is a problem for the individual land owner. Public sentiment should be awakened to the seriousness of the problem and the land owner brought to realize the importance of persistent efforts of control.

KINDS OF WASHING.

There are two kinds of soil washing—sheet washing and gullying. Sheet washing is the washing of the immediate surface soil without the formation of appreciable gullies. This is less noticeable than gullying, but almost as injurious, since it removes almost as large amounts of soil of the best surface layers, including large quantities of organic matter. Gullying has the disadvantage of leaving the field rough and a gully once started continues to enlarge unless remedial measures are adopted. Sheet washing is most common in freshly tilled land, such as corn land, where on sharp slopes as much as an inch of the best surface soil may be removed during a single heavy rain. The gullying usually starts in tilled land but unless stopped continues indefinitely.

CAUSES OF SOIL WASHING.

As long as land is kept in timber or in thick growing vegetation, as in its virgin state, the rate of surface loss from the average soil by erosion, is less than the rate of accumulation by rock weathering. When the land is put in cultivation, erosion is greatly increased and the rate of loss is then far greater than the rate of soil formation. It is, however, when the land is in tilled crops that the greatest loss occurs. Every farmer realizes the washing which accompanies corn-growing.

Careless Culture.—Careless culture is undoubtedly productive of the greatest losses. Where washes once start they invariably become worse rather than better if the land is kept in cultivation.

Shallow Plowing.—Shallow plowing is one of the causes of washing which usually accompanies careless farming. Where land is plowed shallow the water quickly penetrates to the depth of this loose soil and if the rain continues to fall more rapidly than it can be absorbed by the compact soil beneath, the run-off will carry with it sofe of this loose surface soil. If the rainfall is very heavy the shallow surface soil may be entirely removed on the steeper slopes. If the plowing is deep, most, if not all, of the water will be absorbed and washing greatly decreased.

Insufficient Organic Matter.—One of the important causes contributing to washing is a low supply of organic matter in the soil. Soils with much organic matter absorb the water more rapidly and the organic matter also tends to bind the particles together and prevent washing. For this reason old lands, low in organic matter, wash worse than new lands. Likewise corn land prepared from stubble ground washes worse than corn land prepared from sod.

Clay Soil Absorbs Water Slowly.—The texture of the soil is also an important factor in determining the amount of washing. A sandy soil absorbs water rapidly and washes very little. A clay soil, on the other hand, absorbs water slowly and is particularly subject to gullying. The intermediate soils such as fine sandy loams and silts are most affected by sheet washing but they will also gully badly.

Frequent Heavy Rains.—Probably the most important single cause of soil washing is the occurrence of frequent torrential rains, particularly when the land is being cultivated. A continental climate, such as that found in Missouri, must invariably have a rainfall of unequal distribution, with many torrential rains, and therefore a greater amount of serious soil erosion than occurs in those regions more favorably situated in this respect.

CONTROLLING WASHING.

In controlling washing, as in controlling disease, preventive measures are more important than remedies. Where washing has already taken place, of course remedial measures alone are left. If the washing has been long continued, however, the remedies are costly and it is rare that the land can be put into as good condition as it was in originally, even with great expense. There are few cases where the old saying that "a stitch in time saves nine" is more applicable than in the handling of land to prevent washing.

PREVENTIVE MEASURES.

A crop rotation which leaves the land bare as short a time as possible is the most fundamental preventive measure. Naturally corn must be grown on most farms but there are very few where corn must be grown over one-third of the time on the individual fields and where all the stalk land must lie bare during the fall, winter, and spring.

Winter Cover Crops.—The use of winter cover crops such as rye will go a long way in preventing the washing of the fall, winter and spring rains. The man who has never tried a crop like rye will be surprised at the effect of the fibrous roots of this crop in holding the soil. Other crops which may be used to advantage are wheat, barley, and—in the southern half of

The New Champion Butter Cow

Herewith is presented the picture of the Holstein-Friesian cow, Duchess Skylark Ormsby, the new world's champion butter producer, bred by R. B. Young, Buffalo Center, Iowa. The results of her 365-consecutive-days' test, conducted by the Minnesota Agricultural College, show that she milked 27,761.07 pounds, nearly fourteen tons, or over twenty-three times her own weight. The butterfat contained in this year's milk yield weighed 1,205.09 pounds, this being a fat percentage of about 4.32.

Figured at cash value, and the dollars and cents' estimate is one of the prime reasons for the popularity of the Holstein-Friesian cow, and allowing 35 cents a pound, she produced about $500 worth of commercial butter. Think of it! More than thirty-five 40-pound tubs! The best previous record for the 365-consecutive days' butter test was held by Finderne Pride Johanna Rue 121083. She produced 642 pounds more milk, but it contained 28.62 pounds less butter than the amount accredited to the new champion.

SCIENTIFIC FACTS AND HORSE SHOEING.

Rock Valley, Iowa, Jan. 14, 1916.

Mr. Louis Peterson,
Santa Ana, Cal.

Dear Sir:—

Your book on scientific facts, how to shoe speedy horses, is very interesting to one who has been in the game.

I think every man who follows the fast horse business would profit by reading your book, and following the suggestion outlined in same. From past experience in the business I know the shoeing is very essential in order to get the speed that's in the horse. I never had a man who did this line of work for me that I had the confidence in, or got results like the shoeing you did. If I were going back in the game again I would want the man who did my work to read up and study the many good points suggested in your book, the title of which is Facts and Scientific Way of How to Shoe Fast Horses. Yours truly,

D. J. SCANLAN.

The booklet is put together in plain, forceful, understandable language. Price, $1.50. For sale by the author,

LOUIS PETERSON,
Santa Ana, Cal.

PERCHERON STALLION WANTED.

Will buy, lease or trade. Must be blocky and registered.

J. H. NELSON,
Box 361, Selma, Cal.

FOR SALE—Black McKinney stallion and mare—brother and sister—7 and 8 years old. Standard and Registered. Both converted to high class gaited saddle horses—single foot, running walk, etc. Lady can ride; perfectly sound. Make excellent cross with any highly bred stock. They are both ribbon winners in show ring. Can be seen at San Francisco Riding School, 701 Seventh Ave. Phone Pacific 1655. OSCAR ROMANDER.

FOR SALE.

BEST POLICY 42378, one of the best bred horses in the world. Handsome bay horse, small star in forehead, left hind pastern and left fore heel white. Has size, heavy boned, stylish, pure gaited trotter, sound, and a splendid individual in every respect. Best Policy is by Allerton 5128, dam Exine 2:18¼ by Expedition, next dam Euxine by Axtell, next dam Russia by Harold 413, next dam Miss Russell, dam of Maud S., etc. Best Policy has trotted a mile on the Hanford half mile track in 2:12. He is ten years old and with little training would make a good game race horse, and ninety percent of his colts are trotters. He will be sold at a great sacrifice. For price and further particulars address

BREEDER & SPORTSMAN,
P. O. Box 447, San Francisco, Cal.

FOR SALE.

New "Ideal McMurray" light track cart for matinees, workouts, speeding and jogging. First-class, down to date cart, weight 45 to 50 pounds. Great strength and carrying power, absolute freedom of any horse motion. Constructed from the best second growth white hickory. Best guaranteed grade of pneumatic tires, handsomely finished in rich carmine or royal blue, with brass screen dash, detachable, and accessories consisting of serviceable foot pump, complete tool and repair kit, wrenches, oil can, etc., etc. Weight crated 90 pounds. Brand new and will be shipped to any address. For price address:

F. W. KELLEY,
BREEDER AND SPORTSMAN.

HIGH-CLASS TROTTING BRED COLTS FOR SALE.

No. 1. Three-year-old filly sired by All Style, dam Dr. Hicks. This filly is registered.

No. 2. Two-year-old colt, full brother to the above.

No. 3. Two-year-old filly sired by Dan Logan, dam a Wilkes mare who was a great natural pacer but unfortunately was crippled by a barbed wire accident as a yearling and was never worked.

The All Styles are large, strong built, with all the style of their sire, perfect in action, and all three of the above colts should make race horses second to none. The Dan Logan filly is perfectly gentle to handle and drive and is a high-class filly in every respect. Apply to or address,

I. F. EATON, Chico, Cal.

BEAUTIFUL BELVEDERE

LOTS FOR SALE

CORINTHIAN ISLAND Subdivision to Belvedere is the most beautiful spot on the shores of San Francisco Bay for a suburban home. It commands an extensive view of the City of San Francisco, Alcatraz and Angel Islands, Raccoon Straits, San Francisco Bay, Richardson's Bay, the Berkeley shore, beautiful Belvedere and Mt. Tamalpais. It is in Marin County, directly opposite San Francisco, and forms the eastern shore of Belvedere cove. It has a naturally terraced, sunny, western slope that is well adapted for many choice residence sites, every one affording most picturesque views of the bay and mountain. It is protected from the prevailing western trade winds in summer by Belvedere Island, and from the southerly storms in winter by Angel Island. The soil is fertile and part of the island is well wooded.

It is less subject to fog than any other place near San Francisco. The summer fog, as it rolls in from the ocean, splits on the western slope of Sausalito, part of it flowing in a line with Angel Island towards the Berkeley shore, and part of it along the southern slope of Mt. Tamalpais, leaving Belvedere, Corinthian Island and Raccoon Straits in the bright sunlight, while the fog banks can be seen as a white wall both to the north and the south.

There is very little available land about the shores of San Francisco Bay that is desirable for homes, especially for those who love boating and kindred sports. The Alameda and Contra Costa shores of the bay are the lee shores and receive the full brunt of the boisterous trade winds which lash the shoal waters near the land into muddy waves, making boating both unpleasant and dangerous. To the north of the city and in Marin County the land from Sausalito to the entrance of the bay is a Government reservation and will never be placed on the market. The shores of Richardson's Bay are not at present convenient to boat service and, aside from Belvedere and Corinthian Island, there is little or no land near any ferry landing that possesses the natural advantages, improvements and possibilities that are offered on Corinthian Island. Concrete roads, pure water, telephone service and electric light wires are already installed. It is only ten minutes' walk from any point on the property to Tiburon boats, and but forty-three minutes' ride to the foot of Market Street.

On the point of Corinthian Island the Corinthian Yacht Club has had its home for many years, and on any summer day the white sails of its numerous fleet add to the charming scene, as the trim yachts glide about the cove. Excellent fishing of all kinds for bay fish, including salmon, the gamey striped bass, rock fish and the toothsome silver smelt, is to be had in the cove. There is probably no spot so accessible and in such close proximity to any large city in the world that offers the attractions of climate, magnificent scenery, fishing and boating as will here be found.

THE CONTROL OF SOIL WASHING

[Continued from Page 12]

the state—crimson clover. The use of such crops not only means a saving of soil but also the addition of organic matter or humus—a substance badly needed in most lands which are inclined ta wash.

Deep Plowing.—The second general principle of prevention is that of deep plowing, the object being to provide a deeper reservoir to hold the heavy rains and to cause a rapid absorption of the water. Fortunately, in Missouri, plowing is generally deeper than in the southern states where washing is most destructive. There is, however, still much room for improvement in many cases. Rolling land should rarely be plowed less than five inches deep and from seven to nine inches is usually better. Land plowed eight inches deep can be expected to absorb practically twice as much water as that plowed four inches deep, at least for the first few weeks after plowing, and the rains which will be heavy and torrential enough to cause washing with the deeper plowing will be much less frequent.

Contour Farming.—A preventive measure which the Missouri farmer on rolling land must sooner or later learn to apply is that of contour farming, that is, farming the land arounr or across the slope, rather than with the slope. Where furrows run up and down the slope washing is greatly increased. In the southern states this princle is almost universally practised in the rolling sections. Where land washes badly, it is more important to cultivate corn across the slope only, than it is to check the corn and plow both ways. The man who drills his corn with the slope because the field is somewhat longer in that direction and therefore increases very materially washing of the land is certainly not doing all he can to maintain soil productiveness. Of course, on many rolling fields, of considerable size, the land may slope in different directions in different parts of the field and under extensive systems of farming it is difficult to divide such fields so that this so-called "contour farming" may be practised. As agriculture becomes more intensive, however, more and more attention should be given to this practise. It is unlikely that the terracing of lands which is so common in the southern states will have a very important place in Missouri agriculture, but there are many farms in the rolling sections where such a system would be economical under more intensive systems of farming.

Organic Matter in Soil.—A fourth general preventive measure in controlling washing is that of maintaining organic matter in the soil. Soils low in organic matter wash much more than those high in organic matter. This is due to the fact that soils high in organic matter absorb water more rapidly than those which are low in this material, while the presence of organic matter also aids in binding the soil particles together, thus preventing washing. The farmer who maintains organic matter by crop rotation, manuring, and the growing of cover crops will suffer little from soil-washing.

STOPPING WASHES.

The remedies for soil washing are mostly included under the various methods of filling gullies. Many means are employed, different methods being applicable under different conditions. Whatever method is adopted, however, constant care is necessary if the best results are to be secured.

Straw for Small Gullies.—In the case of certain soils where small gullies persist in starting in corn fields, wheat fields, and even in pastures and meadows during the fall and winter, the immediate use of straw or similar material is necessary to stop them. In such cases constant attention is required and these small gullies should never be allowed to reach any considerable size. This is particularly true in pastures or meadows, where it is often considered that the land is protected by the grass and no attention need be given it. Gullies starting in drainage ways or in cattle paths on such fields often develop to tremendous size.

Drag Dirt and Sow Sorghum.—In cultivated fields where gullies start in the spring or early summer, a very good plan is to drag in some dirt and sow sorghum. If the sorghum gets started before a heavy rain comes it will hold the soil and make it possible to harrow and cultivate across these gullies during the season, thus dragging in dirt which will entirely fill them. Gullies a foot deep and two or three feet wide may be quite effectively filled in this way.

Fill, Plow, Harrow, Seed.—Gullies a foot or two in depth and from two to four feet wide can well be stopped with straw or debris, and dirt plowed on top of this during the late winter or spring months so as to fill them as nearly as possible. They should then be harrowed over and top dressed with manure containing timothy hay or barn floor sweepings, or if these are not available sow timothy seed with the manure. Some alfalfa, bluegrass, and red top seed may often be added with the timothy to advantage. Where straw or debris is not available such gullies may be merely plowed in, harrowed, manured, and seeded to grass, as mentioned above, with good results. Sorghum may also be seeded on this filled-in soil to hold the land during the summer and fall and the grass seeded the following spring.

Brush, Logs, Stumps for Large Gullies.—Gullies which are too large to plow in easily, offer a very serious and expensive problem in filling. Brush, logs and stumps may be used in filling them and where properly handled these prove very effective. Stones are also sometimes used but they are of little value. Brush should always be piled with the tops up stream. In the case of fine brush, particularly, it is best to stake it down at intervals. Where available, osage orange and cedar furnish the best of brush to use. If brush is mixed with straw it is usually more satisfactory than where used alone and the more compact it can be made the better. Loose brush is of little value.

Brush Dam.—The use of various sorts of dams in the stopping of gullies is becoming common. For small gullies a row of stakes driven across and straw piled above answers in some cases, but these must be continually watched. For larger gullies a dam of brush gives fair results when properly built. It is best to build it of green brush with leaves on it, if cedar is not available, laying the longer pieces on the bottom with the tops up stream, then piling the shorter pieces on top. For best results the brush should be mixed with straw and staked down. It should be tightly packed and left lowest in the middle to prevent cutting around the edges.

Concrete Dams.—Reinforced concrete dams are quite satisfactory for particular locations, especially for those large gullies which are deep and narrow. Such dams should be from six to twelve inches thick, depending on the size and depth of the gully. The proper reinforcing of such a dam is very important, iron rods of good weight being essential in the larger dams and heavy wires in the smaller ones. The middle should be left lower than the edges and a spillway provided with a concrete, stone, or brick apron placed in the bottom of the gully to prevent cutting by the falling water. The ends of a concrete dam should extend well back into the ditch banks on either side to prevent the water cutting around. Any such dam will gradually allow the gully above to fill with sediment.

Dickey System.—The use of earth dams for filling large gullies is very common in some parts of the state. A system known as the Dickey system has recently come into some prominence. It consists of a dam, usually of earth, at the bottom of which is placed a large sewer tile with the upper end turned upward by means of an elbow toint. The water must rise behind the dam to the height of the upturned tile before it can pass on. The sediment is largely deposited in this standing water. Extra joints are then placed on the upturned tile as the dirt accumulates until the gully is

Harpers Weekly and The Breeder and Sportsman

$5.50 WORTH FOR $3.25

Breeder and Sportsman

One Year, 52 Copies, Regular Price $3

THE BREEDER AND SPORTSMAN is the oldest weekly journal devoted to the Horse west of Chicago, having been established in 1882. This interest, together with the Kennel, Gun, Fishing, Coursing and kindred sports receiving the most attention in its columns; together with Agricultural and Dairying Departments, under whose headings especial attention is paid to the breeding, etc., of Cattle, Sheep, Hogs, Poultry, and all other animals connected with stock raising.

As an advertising medium to Racing Associations, Horsemen, Stock Breeders, Manufacturers of Sulkies, Carriages, Wagons, Agricultural and Dairying Implements and Machinery, Sporting Goods, Fanciers, Stock Foods, and all others desiring to bring their wares to the attention of the classes to whose interests the paper is devoted within the field mentioned above, the BREEDER AND SPORTSMAN will be found indispensable.

Harpers Weekly

Six Months, 26 Copies, Regular Price $2.50

At no time has it been so evident to Americans as now, that the most important thing in the lives of all of us is the progress of the European War.

Next to your daily bread the war interests you most vitally. It may even come to be the most important part of your problem of living.

The periodical of greatest fundamental interest to you today is the one that can best report those phases of the war that come closest to your country and you.

Because of connections abroad and at home, HARPER'S WEEKLY is that publication.

As a critical commentary that presents inside facts, it is the necessary bridge for intelligent readers between the daily newspaper and the monthly review.

You want HARPER'S WEEKLY now. You can get it now on trial at a remarkable reduction.

entirely filled. In order to remove the standing water above the dam a tile is often laid in a shallow ditch made in the bottom of the gully for a short distance, covered well to prevent washing out, and this is then either run into the sewer pipe or through the dam.

Sewer of Good Size.—The most important point in handling this system of filling gullies is to have the sewer large enough to carry the water of the heaviest rains, thus preventing an overflow which will cut out the dam. Of course the large reservoir for water above the dam allows considerable storage, until the gully is nearly filled, which decreases the danger of the dam overflowing. Such a sysetem is especially applicable to wide and rather shallow gullies such as commonly occur near the lower side of a slope but it may be used on any large gully. Of course where the slope is steep and the gully long, a number of such dams must be installed.

Fill Hillside Gully With Debris.—For large hillside gullies it is usually much better to fill with debris of various kinds and plow or scrape in. Repeated backfurrowing over the gully will gradually fill it. After it is filled, cover heavily with manure and work thoroughly into the surface, seeding down to grass with rye, oats, or other quick-growing cereal which will help to hold the soil until the grass gets started. Such filling of large gullies is expensive, but it can be done if proper efforts are put forth. Land so gullied is practically worthless and one can afford to put a large amount of work into filling them.

Plant Willow or Bushes.—The planting of willows or bushes along the edge of a gully is often done for the purpose of stopping further erosion. Where they get o good hold and a good growth in the ditch sides and bottom, they aid greatly in filling it. This planting is best done in late winter or early spring and those washing out should be replaced until a permanent stand is secured.—M. F. Miller, University of Missouri.

THE FERTILIZER SITUATION IN THE UNITED STATES.

[Concluded from last week.]

Another source of nitrogen is found in garbage. The investigations of the Bureau of Soils indicate that if the garbage of all cities having a population of 30,000 and over were converted into garbage tankage, the product would be worth for fertilizer purposes at least $3,500,000. In view of the present situation, immediate steps should be taken by all municipalities to conserve the garbage and to make it available for use in the fertilizer trade.

The Bureau of Soils is studying also the problem of the fixation of atmospheric nitrogen with a view to develop a method for the production of ammonium phosphate and other forms of concentrated fertilizers. No ammonium phosphate is being made in this country at the present time. If cheap water power, phosphate rock, coal, and limestone can be found in accessible localities, the possibility of making this material on a commercial scale is considered entirely feasible. The greatest difficulty here is to discover cheap water power at points where phosphate rock, coal, and limestones are really available. The Department is making every effort to locate available sources of developed water power which can be used in the manufacture of ammonium phosphate and other fertilizers.

It must not be understood that the suggestions which have been made, or the efforts which are now being put forth, will result in immediate relief for farmers. There are a number of technical problems which have to be solved if these fertilizers are to be produced on a commercial scale, and, even if the funds for the necessary plants were provided, either from private or public sources, considerable time necessarily would be required for the erection of the plants and for their full operation.

GUNCRAFT

By W. A. Bruette

A modern treatise on guns, gun fitting, ammunition, wing and trap shooting.

The theoretical side of the subject has been covered with a scientific accuracy which makes it an up-to-date book of reference, and the practical side of wing shooting, gun fitting, the master eye, defects in vision and other important questions have been treated in a way that will enable either the expert or the amateur to determine if he is shooting with a gun that fits him and how to decide upon one that does. It will enable him to ascertain why he misses some shots and is successful with others. The secrets of success in trap shooting, as well as the peculiarities in flight of the quail, the jacksnipe, the woodcock, the ruffed grouse, and the duck family, are illustrated by drawings and described in a way that will facilitate the amateur in mastering the art of wing shooting.

Cartridge board cover, $1.00; Cloth, $1.50

Third Edition Within One Year of Publication.

CARE AND TRAINING OF TROTTERS AND PACERS

NEVER before in the history of the publishing world has a horse book gone into a third edition within one year of publication. Yet the explanation is simple—the book fills a long-felt want.

Never before has this subject been treated in a distinct manner. It has been handled in connection with autobiographies of trainers, but such works are out of print or out of date, for they were published 20 years or more ago. Conditions and methods have changed since then, and former treatises are just as much out of date as the high-wheel sulkies then in vogue.

"Care and Training of Trotters and Pacers" is as modern as a 42-centimeter gun. It does not contain the ideas of one man, but of 100 of the leading horsemen of the day, including Thomas W. Murphy, Walter R. Cox, and Edward F. Geers. These ideas were converted into book form by two prominent American turf journalists.

This book enables anyone to do his own caretaking and training until it is time to send the colt to a professional trainer, or the owner can train and race the colt himself. The treatise covers the details of a colt's life from the moment it is foaled until after its first year's campaign. The facts are clearly presented. Nothing is left to guess work. The language is lucid. Both theoretical and practical views are outlined and compared. The instructions are concise and easily understood. The work contains no advertisements—it is not a catch-penny publication that looks big in the advertisement but proves disappointing when received.

Many professional trainers have purchased the book and have found it interesting. Despite the war, over 800 copies have been sold in Europe and Australia.

Price $1.00 postpaid. Cloth, illustrated, 176 pages, 5x7 inches.

THE OFFICIAL HIGH AMATEUR AVERAGE

FOR THE YEAR 1915

WAS WON BY MR. WOOLFOLK HENDERSON, OF LEXINGTON, KY., USING

Peters SHELLS

Woolfolk Henderson

He Shot at 2800 Registered Targets, Broke 2731; Percentage .9753

THE HIGHEST YEARLY AMATEUR AVERAGE ON RECORD.

The wonderful record of Mr. Henderson in 1914, when he won the Four great amateur honors, is still fresh in the minds of the shooting fraternity. In that year he captured the Grand American Handicap, the Single Target and Double Target Championships of the United States and the High Amateur Average. His performance in 1915 is therefore but the continuation of a marvelous and thoroughly consistent record, made possible by ammunition of superlative quality.

PETERS SHELLS have been used by the winner of the United States Hight Amateur Average (official) FIVE OUT OF THE PAST SIX YEARS

THE PETERS CARTRIDGE CO., Pacific Coast Branch, 585-587 Howard Street, San Francisco, Cal.

C. G. Spencer

The Big Winner In 1915

The Interstate Association's Official High Professional Average for the season of 1915 was won by Charles G. Spencer, of St. Louis, Mo., with the marvelous record of 97.5% for 5620 targets. Such an average for such a large number of targets not only shows Mr. Spencer's great skill, but also proves the uniform and unequalled quality of

WINCHESTER

LOADED SHELLS AND SHOTGUNS

which Mr. Spencer used exclusively. It was this same combination that he used when he made his marvelous straight run of 565 targets — the World's Record.

Contests for the Season's Trapshooting Averages have been held 16 times and 12 of them have been won by **W** shells or guns, or both, which is undeniable evidence of their superiority.

Lester German, of Aberdeen, Md., who was second high for the season, and who also made the greatest score of the year for a single tournament—499 x 500—used Winchester shells in performing this great feat.

J. Mownell Hawkins, of Baltimore, Md., shot 7,265 targets in competition during 1915, and made the splendid average of 95.56%, using Winchester shells and shotguns exclusively—more proof of their uniform shooting qualities. These performances show the reason why Winchester shells and guns are

TRAINING THE HOUND

A PRACTICAL TREATISE ON THE TRAINING OF FOX HOUNDS, BEAGLES, AND COON HOUNDS.

The system of training advocated is simple and effective, so that anyone who carries out instructions can easily develop a foxhound, a beagle or a coon dog to the highest state of usefulness or organize a pack in which each hound will work independently and at the same time harmoniously with the others. The subjects are: The Hound's Ancestry, History, Instinctive Tendencies, English and Native Hounds, Developing the Intelligence, Training the Foxhound, Voices and Pace of the Hound, Qualities of Scent, Manners, Training the Coon Dog, Coon Hunting, Training the Beagle, Forming a Pack, Field Trial Handling, Faults and Vices, Conditioning, Selecting and Rearing Puppies, Kennels and Yards, Diseases of Hounds and Their Treatment. The chapters on field trial training and handling are alone worth the price of the book, which is one that every man who loves the voice of a hound should read.

The book contains 224 pages, is clearly printed, nicely bound, and handsomely illustrated with bloodhounds, various types of English and American foxhounds, beagles and cross-bred dogs for 'possum and coon hunting.

Price, in heavy paper cover, $1; $1.50, postpaid.

on the big circuit.—To be handled by C. H. Babcock.

Pleasanton Driving Park

PLEASANTON, CALIFORNIA

offers for service for the season of 1916 the following stallions:

THE ANVIL 2:02 3-4

Fastest trotting stallion ever offered for service in California, and fourth fastest entire trotter in the world

Son of St. Valiant Vincent 2:11¾ (by St. Vincent 2:13½ out of the triple producer Grace Lee 2:29¼ by Electioneer 125); dam Amy Smith by Emperor Wilkes 2:20¾, sire of Princess Eulalia (4) 2:09¼, etc.; grandam by Hambletonian 539.

The Anvil is regarded by Edward F. Geers as one of the very greatest trotters that he has ever raced. For five years the pair of Tennesseeans went to the races together and in that time were but twice unplaced, while winning a total of fifteen races, including the historic M. and M.

As an individual he is most pleasing, not too large or coarse in any way but smoothly and compactly made and "all horse" in every line. He is a perfect headed, pure gaited trotter, with the very best of disposition, and is destined to become a very great sire of trotting speed. His opportunities in the stud have been very slight as he has been retired from racing only since the close of 1914, and has but three or four foals now three years old. He was selected to head the stud at Pleasanton Driving Park not only on account of his great qualities as a race trotter, but because one of his first foals, Anvilite (2) 2:22¼, with a trial of ten seconds or more faster, is in every way the greatest colt trotter ever handled by C. L. DeRyder. The services of The Anvil are recommended to you without reserve.

Fee for The Anvil 2:02¾, $100 with usual privilege

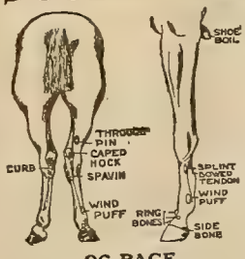
Vernon McKinney 2:01 1-2

Fastest member of the great family of McKinney 2:11¼

Sire of VERNA McKINNEY (2) 2:13 (his first foal raced), fastest two-year-old pacing filly of 1915.

Son of Guy McKinney 37625 (by McKinney 2:11¼ out of Flossie Drais by Guy Wilkes 2:15¼); dam Maud Vernon by Mount Vernon 2:15¼, sire of the dams of Leata J. 2:03, etc.; grandam Mag by General McClellan, sire of the dams of Mack Mack 2:08, etc.

Vernon McKinney's racing career was not an extensive one but will long be remembered for the excellence of his performances, as his winnings include a Chamber of Commerce stake in time very near the record for that event at the time, and he is the fastest of all the McKinneys.



He is a horse of rare qualities in the way of individual excellence, almost ideal in behavior and temperament in harness or out. Since his retirement he has been a popular horse in the stud and our claim that he would prove a very great sire of pacing speed has been fully substantiated, his first foal to be raced being the season champion for the age and gait in 1915, a most excellent testimonial to his potency. He is a very sure breeder, his get are uniformly endowed with natural speed and the physical and mental requirements of modern race horses and find ready sale at most gratifying prices.

Fee for Vernon McKinney 2:01½, $50 with usual privilege

The best of care taken of mares in any manner owners may desire, but no responsibility assumed for accidents or escapes. Address for particulars

CHAS. L. DeRYDER, Superintendent, PLEASANTON, CAL.

DOUBT AND FEAR NEVER EARNED

96 PAGE **BOOK FREE**

Every bottle sold with **Signed Contract** to return money if remedy fails on Ringbone—Thoropin—Spavin—or Any Shoulder, Knee, Ankle, Hoof or Tendon Disease.

or cured anything—and delay is costly. The Horse Cannot Cure Itself! Money Must be Spent! The Problem is, to—SPEND WISELY.

Here are the reasons why you should not fail to send for our FREE Save-The-Horse BOOK.

Chas. L. Laing, Hedgeville, W. Va., writes: "We had a horse four years ago with spavin. We lost his use for a year. I bought one bottle of Save-The-Horse and cured him sound.

"It's the Most Powerful Medicine I ever used," writes W. J. Stonesefer, Route 1, Keymar, Md.

"Save-The-Horse Cured Worst Thoroughpins I ever saw." Thos. Payne, Bowling Green, Ky., also writes, "and she has been all right for more than a year."

"After Using Save-The-Horse For Two Weeks on a Bone Spavin He Does Not Go Lame. It is a great remedy," writes Albert Stoll, 915 South 4th Ave., Ann Arbor, Mich.

"Cured by One Bottle of Save-The-Horse." E. C. Waite, West Lebanon, N. H., also says, "the hoof is grown out and the fistulous condition completely healed," etc.

"The Corns Are Gone and The Contracted Hoofs and Tendons Are All Cured," writes F. S. Reynolds, Fairplain, W. Va.

Henry F. C. Smith, Route 8, Fremont, Ohio, writes: "I am pleased to tell you that I bought Save-The-Horse for Sweeney and it did the work right and perfect. He worked every day. Refer anyone to me who wants to know."

Regardless of price or any other reason, Save-The-Horse is the cheapest remedy known. It goes through and through both bone and tissue—it works inside, not outside—and produces a cure that withstands every test. No blistering, scar or loss of hair. Horse can work as usual—winter or summer.

But write, describing your case and we will send our—**96-page illustrated Book**—Sample Contract and Advice—**All Free** (to Horse Owners and Managers).

THAT FAIR ASSOCIATION.

During the fall meeting at the Panama-Pacific Exposition a number of persons directly interested in the future of the district fair on this coast met in this city and formed a new organization known as the Pacific Coast Fair Association. Attendance at the two meetings was good, enthusiasm ran high, and the ball was started rolling in very good shape. From lack of action of any description on the part of the association or its officers, however, "the ball" would seem to be of the snow ball variety, as it has evidently melted or hit a post and gone to pieces. Our assumption in the matter may be entirely erroneous and we will be pleased to have it so proven, as there is a great need for concerted action on the part of trotting horse breeders and campaigners in behalf of the welfare of their industry. There are very many applicable axioms which could be quoted in the present instance such as "the Lord helps those who help themselves," etc., and if horsemen expect the sport of trotting to be popularized and perpetuated on this coast they themselves must take the initiative in the matter.

There was a need for the organization that was effected, and a most excellent field for its activities, as by a little real hard work done in their behalf the situation of the small fairs in California would be very greatly improved. The new body and its aims were given a good deal of favorable publicity by the daily papers and numbers of the country publications at the time its organization was effected, and the proposal to boost California fairs, with horse racing, was well received in many quarters. Certain localities expressed their intention of giving a fair and solicited the co-operation of the new concern, while breeders of the saddle horse and the thoroughbred signified not merely their willingness but their eagerness to join hands with the trotting horse breeders in an effort to set the fairs upon an enduring and profitable basis.

Business affairs engaged in prior to his selection as secretary caused the absence of Secretary Smith from California for some weeks, an absence prolonged through the sad and regrettable death of a member of his family, but he was expected to begin operations immediately upon his return to the state, which was effected some weeks ago. Mr. Smith is helpless without adequate funds, and at this writing we have had no word of any steps having been taken in any way by the association, and very respectfully suggest to all its members and prospective members that prompt action must be taken if the body is to accomplish anything of a beneficial nature this season—and this season is the proper one for making their start. The subscription and membership campaign must be renewed with vigor, and the canvass of the state that will enable horsemen to know exactly what fairs will be held, and when, must be made without further delay. There are a number of local associations that will give events of more or less pretensions, but these should be welded into a harmonious circuit, with consecutive dates, uniform conditions and an itinerary for economical shipping, for there are a good many miles between points in California and the purses will not be large enough to justify campaigners in covering the same route more than once.

We especially urge that subscriptions to the funds of the organization be made good, and suggest that the matter of subscriptions be taken up with present and prospective members on a new basis. The figures aimed at before were entirely too high, and, in our estimation, in excess of the amount required for the accomplishment of a great deal of good. It is not necessary that enough be raised to finance a number of meetings, for in the first place there are not the idle plants available for the giving of many independent affairs, or new events. The fairs that will be given will be sponsored by the old local associations in almost every instance, though perhaps a few new ones might be provided for were the horsemen to back them largely. These are practically negligible quantities, and the manner in which the greatest good may be accomplished lies through a close co-operation between the horsemen's organization and those already in existence at various points throughout the state.

The volumns of this paper are open to the discussion of all questions relating to this matter and we will be glad to hear the views of any of our readers concerning the same.

THE REVIEW RACING GUIDE.

Volume Four of the Horse Review Racing Guide arrived on the Pacific coast last week and has been eagerly welcomed by those who had subscribed for the same earlier in the season. The appearance of this number of the series was slightly delayed owing to sickness late last year in the ranks of the Review staff, but the matter contained within its covers is of the kind that will merely increase in value with the passing of time and the inconvenience of getting along without it for a few weeks has merely added warmth to the welcome it received when it did arrive.

The Guide, while not an official publication of either of the parent associations which govern the affairs of the trotting turf in America, is in certain respects far superior to any of the other statistical works of a similar nature insofar as filling the requirements of the casual delver into trotting lore. In reality the use of the words "of a similar nature" is largely in error, as there are no books like it save in a few respects. While of necessity failing to include within its covers a certain portion of the detailed information presented in the official works, it goes a great deal farther in other very interesting and important respects and presents a vast fund of authentic matter, condensed and easily accessible, that is not to be gleaned from the official statistics save by long research on the part of one highly conversant with the use of the Year Book and possessed of a complete issue of the same.

The popularity of the Guide since its inception has made the trotting horse public very familiar with its general makeup, and Volume Four possesses all the important features of its predecessors, to which new and welcome additions have been made. The statistical tables of an unusual nature that have proven so useful and popular previously have been enlarged and brought down to date, while the added matter is of a nature that greatly enhances the scope and value of the publication. Only by a thorough inspection can all its good points be realized, and we take pleasure in recommending it to the library or office of every horseman.

HANFORD IN LINE FOR 1916.

The directors of the Kings County Fair Association held a meeting at Hanford last Saturday and after a thorough discussion and review of conditions as they exist today in California, it was decided to hold the customary county fair along the same lines that made it popular and successful in the years prior to 1915. For sixteen years in a row the "Little Kingdom of Kings" had put on one of the very best small fairs in the west until the exposition came along and broke into the series, and now the work will be taken up where it was left off and the fair will be made bigger and better in every way.

Kings county, in the heart of a ready money section where prosperity is assured through a highly advanced and successful system of agriculture in which the adequate production of livestock plays a very important part, has every natural advantage for the upbuilding of a really great agricultural fair. It owns its own fair grounds, which are fairly well improved, and the country surrounding it is well settled and provided with good roads. The grounds are well provided with shade trees that make the old-fashioned system of going to the fair for the day and eating a picnic dinner on the grass an enjoyable one, and while most of the buildings have weathered the storms of several years they are in good repair and of a capacity adequate to the demands which have been imposed upon them in previous years. The track is of the two-lap variety but is a safe one to race over, and the association plans not only to improve their buildings considerably but also to increase their track to the regulation mile dimensions. A condemnation suit now pending will be settled in ample time for the construction of the mile course for use at this year's fair, if the decision is favorable to the county, but whether or not the new track is built, the directors promise the best fair in the history of the association.

Dates were not claimed at the meeting Saturday, but efforts will be made to have arrangements perfected that will enable Kings county to stage her exhibition during the last week of September.

Now that Hanford has set the pattern by declaring herself, we will be pleased to hear of similar action on the part of some eight or ten other associations. The time is ripe to get together and arrange dates for the entire season in such manner that there will be no conflicts.

Who will be next?

TO STALLION OWNERS.

With mares that were bred during the early portion of 1915 already beginning to drop foals, it behooves the stallion owner to get a hustle on himself and go out after the business. Breeding operations are not as heavy as in former years but there will be more mares mated to good horses this year than was the case last season, we are confident, and dull business in any line of mercantile activity is no sign for the easing up of the spirit of competition. Stallion owners are inclined to say "What's the use?" under the same circumstances that set the merchant to scratching gravel just a little bit deeper and going after what trade there is just so much harder. The man who gets the trade that keeps him going in dull times is the man that has the most to offer for the money and is most successful in keeping the public apprised of this fact. The sheriff's sign appears with the greatest frequency upon the doors of establishments that kept only mediocre goods and then made but a half-hearted effort to dispose of them.

The best mediums for setting the wares of the stallion owner before his customers, the owners of brood mares who do not support private stallions, are the announcements of service in the columns of the turf paper covering his particular section of the land, and the card or folder giving the pedigree of his horse and a summary of the performance of his get, if he be already a proven sire, or a synopsis of the grounds for the belief that he will become a sire should he be a youngster yet untried in this respect. The Breeder and Sportsman offers service of both kinds to its patrons, and recommends the use of its columns and its compiling and printing facilities, secure in the knowledge that money so invested by breeders and owners has been returned to them with interest and profit for a period of thirty-four years. Only a cursory glance through our files is needed to show that the most successful horsemen have been liberal users of printer's ink as exemplified by our advertising pages and reading columns.

There has never existed greater incentive to the production of trotting speed than afforded by the immediate future, for the shortage in aged performers, caused by the falling off in breeding operations for the past few years, is beginning to make itself manifest in no uncertain way. The great sales companies of the east are facing a shortage of aged consignments to their auctions, and the young things are coming largely from Kentucky and Virginia. There is in California a great array of well bred mares, capable of producing performers of the highest degree of excellence, that have not been bred for the last season or so owing to local conditions, and stallion owners should make every effort to secure the bookings of every one of these matrons this season. Most of them will be well bred, and the greater portion of them will be mated to the stallions that are best kept in the public eye.

The reasons for this are both numerous and patent. If your horse is not worth advertising there is a strong probability that he is not worthy of patronage. Have we your order for either cards or a season ad., or both?

The Horse for Modern Demands

THE LIMITATIONS OF THE TROTTER'S PRESENT FIELD OF SERVICE

Among the interesting communications that have found their way to the office of the Breeder and Sportsman during the early portion of the present year is one from a stallion owner in California who has found business fairly satisfactory in the face of the slump that has existed for the last several seasons. His horse has made three seasons in the same locality, his colts have found a ready market at fair figures, and a number of good mares have been booked to him for the present breeding season. After telling of the business as he finds it in his own case, he makes the following observations concerning the situation in general:

"In conclusion, it is my opinion that the owners of standard bred stallions are to blame more than anyone else actively associated with breeding for the slump in this class of horses, largely by keeping stallions entire and in service that have nothing to recommend them but a pedigree of speed inheritance. The pedigree is all right, but the farmer cannot race his horse or go to market or plow with him on that alone. He must have size, compact form and intelligence. A rattle headed horse is nearer nothing than anything a man can own, no matter what other good points he may have. Castrate more of these light boned, nervous stallions and offer the farmer breeder a horse of the 'Zomblack' type. Then, if he doesn't get a race horse, he will have a good serviceable animal to drive and work, one with a kind, tractable disposition, and one that the owner is proud of.

"I find the small breeder a good customer when you can show him you have a useful horse to breed to. I remember when the saddle horse was down at the bottom of the ladder, wasn't worth his oats. Result: A few sensible admirers got together and by judicious breeding have made the saddler the most profitable of all light horses.

"With the standardbred, speed will always be one of the most important considerations; combine this with compact form and intelligence and you have the most useful horse in the world. 'Size enough for the plow, style enough for the carriage and speed enough for the race track' form the requirements of the horse the breeder should endeavor to raise, not speed alone. When this becomes the universal practice, the standard bred will soon push his heavier rivals to the wall and occupy his rightful place, the peer of all horses.

"Give us the county fair, smaller purses, overnight entries, and every trainer in California will be busy and every man that owns a fairly good horse will have a chance to make money."

While we agree unreservedly with our correspondent that there are a great many stallions retained in service which should be subjected to the process of castration for the benefit of the breed in general, and while we admit that his views concerning the type of horse which breeders should endeavor to produce are applicable to the situation in many localities, the horse which he advances as the ideal type that will save the business and assure it of a long lived prosperity, possessing "size enough for the plow, style enough for the carriage and speed enough for the race track," is not one whose production will ease the burden upon the American breeder as a whole, for a number of reasons which are readily apparent to the man who has been trying to market his output of horseflesh for the last several years.

There was a time, of course, when the demand for carriage, road and general utility horses afforded a ready market for all trotting bred horses of a certain amount of substance, soundness and docility, whether or not they would do to race, and there are yet communities where the horse of this class is in demand and plays a very important part in the daily life of the resident of those sections. Through the advent of the inexpensive motor car and the gasoline driven tractor of many types, the field of endeavor of the general purpose horse and the roadster has been very greatly reduced and the market price of the same very materially affected, in spite of the fact that the breeding of the light harness horse family has constantly improved and its inherent qualities of general usefulness have been enhanced. The breeder who has produced, during the five years last passed, the trotter of a generally serviceable type has found himself "out of pocket" as the result of his operations at the end of the year, while the one who has made speed his prime consideration, and has succeeded in producing the same to a certain degree, has been able to find a fairly ready market at figures that enabled him to break even or a little better.

While California offers many wonderful natural advantages for the production of the horse in an advanced stage of perfection, the expense attached to the operation is such that the selling of the finished product of the farm of the breeder of the trotter at the average market price prevalent throughout the state leaves no margin of profit. In many localities the grazing season is not of long duration, though in certain sections horses may forage for themselves for by far the greater portion of the year. In other sections breeders depend largely upon alfalfa, which is plentiful and but moderately costly, but a continuous diet of alfalfa is not conducive to the production of a horse that will stand up under any sort of prolonged and extreme exertion, though intelligently fed as a balance for the daily ration it is most excellent and beneficial. A familiarity with conditions in widely scattered portions of the state leads the writer to the opinion that the man who produces trotting horses and "gets off" at an average cost of ten dollars a month per head for horses not in training is doing fairly well. These figures are excessive for some localities and are none too high for others, as will be attested upon application to breeders whose operations are conducted on a scale that necessitates the close keeping of costs and the employment of strict business methods.

On government estimates there are in the state of California at present approximately 493,000 horses of an average value of $96, as compared with 483,000 of an average value of $117 five years ago. Grazing and agricultural lands are increasing in value rather than decreasing, and in the face of these figures where does the trotting breeder who produces the average horse "get off"? As stated above there are localities where the all purpose horse is yet in strong demand and in these sections the breeder comes out with a profit even if his horses will not do to race save in occasional instances—and by the way these same localities are as a rule the ones in which the horse may be bred and brought to a serviceable age under the most economical conditions. On rare occasions a trotter or a team is bought for park use or show ring purposes at a fair price, but the demand is limited and the market over supplied. There remains this one alternative for the breeder of the trotter, taking the situation as a whole: "THE PRODUCTION OF HORSES THAT WILL RACE." These have earning capacity in excess of the average horse that justifies the public in paying an enhanced price for them to an extent that returns the breeder a living profit.

In spite of the hard game that horsemen have bucked here on the coast of late years, there are a few who have made breeding and racing their sole business and have made a living and something over for the "rainy day." The writer can do no better for the fraternity at large than to relate to them the ideas of one of the most successful of these gentlemen just alluded to, advanced at different times during the past several months when the future of the trotting industry was the foremost topic of conversation. For the sake of brevity and conciseness the gist of many such little talks may be presented as follows:

"I have been estimating my costs pretty carefully for the last few years and find that they have been constantly increasing until now, if I give brood mares or other pastured horses proper care and attention, they cost me not less than ten dollars per head a month, possibly a little more. This, of course, means the cost of labor, grass, hay and grain when needed, interest on the capital represented on a conservative valuation, and minor items that would be prime considerations of any man engaged in an ordinary business pursuit—and my business is breeding and racing horses. I have been at it a good many years, and while the demands for road and business horses formerly furnished a most welcome outlet for all of my products that would not stand the gaff or lacked the speed required to go to the races, my aim has always been to breed the race horse. Now that the market for the 'by-product' of my establishment has been curtailed the race horse is more than ever my aim—and not merely that, either; his production is a necessity, absolutely. This puts my operations entirely upon a race horse producing basis, and with speed I require the attributes of intelligence, soundness, and general individual excellence that play such important parts in the makeup of the campaigner that can be expected to be a success today. I want size enough to guarantee strength and stamina, but above that I am not particular.

"To get my affairs on this basis has required a good deal of culling and selecting. I own a number of mares and stallions, and breed both to my own horses and to the best sires owned in the west when I consider that I have a filly that would produce better, for reasons largely based upon pedigree and performance, to some horse other than my own. My stallions do public service, and the fact that I mate my own mares to them is their initial recommendation to the breeding fraternity, their second recommendation, and most conclusive one, being the record of the performance of their get as found in the summaries of the season's races. I do not use a horse myself or put him in service unless I have the best of grounds for the belief that he will sire horses that will race, for under present conditions those are the only kind that it pays me or my patrons to raise. If I am mistaken in a horse, I am the first person to acknowledge the error and retire him from service. My brood mares have been selected in the same way and additions to their ranks are made on probation only. I limit the band of mares I am to maintain to a very moderate number and the older ones are in every instance proven producers of race horses, most of them for two or three generations. The younger ones are selected from lines which have been productive in the past, but if they themselves do not prove prolific, or even if their produce are fast and game but of the unlucky variety, as sometimes happens, their term of life in my pastures is short. They go to market "as is," and whatever sum they bring is accepted without complaint on my part. My horses of both sexes must do more than merely promise results—they must accomplish them. In spite of my precautions I get a certain number of foals that do not mature into horses that will race (and sell them at a loss), and every other breeder finds himself in the same boat; but I do get a sufficiently large number that will race and that will win money or sell for many times the price of the average horse to make my operations both pleasant and profitable. I may add, incidentally, that it is a source of much gratification to know that I am steadily producing a larger percentage of horses that will and do race and fewer of the other kind.

"Without indulging in any egotistical comment or meaning to throw boquets at myself for applying common business principles to my operations and thereby avoiding some of the hardships that have befallen some of my brother breeders, I believe firmly that mine is the only system that will pay the trotting horse breeder a profit year in and year out, and I mean not only the stock farm proprietor but the man who owns one or two mares and patronizes public stallions. Unless your mares produce race horses after a fair trial, discard them; unless the get of your stallions or those you patronize stand the test of today on the race track, seek elsewhere for the proper mate for your matrons. The man who fails to conduct his operations upon such a basis has small grounds for complaint if the same are productive of loss in place of profit. Take a good long whiff of gasoline and make up your mind to breed trotters that will race. Then you can buy more gasoline. I use it myself and I like the results attained in the way of pleasure and quick transportation. The exact date on which I last drove a horse and buggy on the road save in a purely professional manner has slipped my mind. There are a lot of other good horse breeders and horse lovers who are in the same fix, and if we ourselves will not use our own best products for the conduct of our every-day affairs and the pursuit of pleasurable recreation, why rail against the general public for forsaking the leather line in favor of the steering wheel?

"Me for the trotter that will trot!"

These opinions are the result of a good many years of successful endeavor, and will be found most timely at this moment, when the breeding season is beginning.

THE "SWIPE"—FROM THE INSIDE.

It was well past four o'clock, one afternoon last week, when a bunch of tired, cold and hungry grooms, swipes or caretakers, were "stalling around" (after being "on the job" from 6:30 a. m.), waiting for the "head jock" to vacate the warm and cozy office, and beat it home to his steam-heated "shack," so that they could get a chance to warm up their shins; and thaw out their numb fingers and toes.

After shaking up the fire and getting up a good blaze, all huddled around the stove, and one of them grabbed up the Horse Review and started to read out loud some of the items that would interest an ordinary "swipe."

When he got to "Marque's" story, "Grooms as Factors in the Sport," a vote was taken, and it was decided to postpone the reading of it until after "bean time."

Well, after putting away under our belts the one-twenty-first part of a four-dollar-a-week meal ticket, we hustled back to the stable and finished up our chores, such as watering, bedding and taking care of a few suspicious "fingers." This being done, we next made up our "flops." "Now, get the Review and read that 'Groom Dope' to us," was the word, so it was done.

After the story was re-read several times, we decided that the first four paragraphs were O. K. But the fifth—"There are good and bad grooms," it read. Here an old-time groom who is "guideless" this winter, spoke up and asked the question, "What is the difference between a good and bad groom?" Some said one that could keep up a cripple or bad-legged horse; some said one that could and would only take care of one horse; still another said, "One that could take care of a 'livery stable string.'"

"You are all wrong," said the old-timer. "I know what I am talking about, too. Here is the difference in a nut-shell. A good, high-class groom gets one dollar a day and his feed. A second-class groom, or rather, one that is employed by a second-class trainer, receives eighty-three and one-third cents per day and his beans. So you see, the actual difference between them is, practically and financially speaking, sixteen and two-thirds cents per day, and his beans.

"Take that case of Johnnie Clark, receiving a check for a thousand dollars as a present for taking care of Peter Scott. This will, no doubt, drive a lot of 'Johnny Plows' into the ranks of the 'swipes.' They don't realize that this is a world's record tip for a groom. We occasionally hear of some 'big hearted' jock divorcing himself from a hundred-dollar bill after grabbing off a five or ten thousand-dollar stake, but these cases are rare, indeed; and I'll bet that I can count all the names of the grooms that were lucky enough to grab off a hundred or more during the past ten years, on the fingers of my two hands. So, let me impress the fact upon the future would-be groom that the above cases are generally classed with the 1-to-10,000 shots, and instead of receiving any tip at all, after rubbing a winner all season and living upon a 'six-bit' allowance in an endeavor to save the eighty-three and one-third cents that is dished out at the end of the month, so that he can buy a cheap suit, or pair of shoes to carry him over the winter, he generally has his shoes pulled off at the last meeting, be it a hundred or a thousand miles from home, to rustle or beat his way back there again.

"That there are no unions or regular hours of work we all know. We are on duty like a bunch of soldiers—sleep when you can and eat when get a chance. Of course, we will all have to admit that it would hardly be possible to have any regular hours. But it would be possible, if the boys would all stick together, to have a uniform scale of wages. Of course, all of the Grand Circuit stables pay their boys one dollar a day and allow them enough so that they can eat three square meals a day. But there are a great many so-called high-class stables shipped around the country that expect a groom to deliver the same class of goods as they do down the 'Big Ring,' and also keep on a respectable front, on the old-time scale of eighty-three and one-third cents, with a two-bit allowance for meals.

"Boys, it can't be done, if you ever expect to save a nickel. How would some of our top jocks feel if they had to load a car of horses and the pile of junk that every stable carries, and then, after you are red hot and covered with perspiration, go to some cheap eating place and try to get the wrinkles out of your bread basket on a two-bit lay-out, while the boss, who probably don't do a stroke outside of stand around and look wise, goes to some high-class dump, takes a bath, changes clothes, has some liquid refreshments, and then a feed that costs a couple of bones; then says, 'Now I feel pretty fair,' and jumps aboard a Pullman and beats it for the next town. He gets there in the morning and waits for the poor, tired-out swipes to blow in with the horses and junk. Probably the train is several hours late, and consequently we don't get a thing to eat or drink until we arrive at the track; this, oftentimes, after we have led our horses several miles from the railroad station to the track. Do we eat then? Oh, no! We have got to feed and water our horses first. By this time the van carrying the trunks, junk and sulkies arrives and this has got to be unloaded and placed in order. An awning has to be put up and the sulkies and carts put together. And all this time the top-jock is waiting for us to get one ready to jog. It may be getting along toward noon, but he never asks us whether we have had any breakfast or not; and if we ask him for the price of a meal, he is mighty apt to ask us, 'What in the h—— did you do with that dollar I gave you yesterday morning?' By the time he comes across and you, tired, dry and hungry, head for the grand stand for a bite to eat, you will find it mighty hard to get by the 'thirst emporium' without having at least one drink. You have got to be quite a financier to make your six-bits last all day, but you figure like this: I missed my breakfast, so I will spend one-half of it for a drink, and add the other half to my dinner money; eat a good feed and then wear the 'muzzle' the balance of the day; or get a sandwich and a beer for supper. Yea, bo—it's some life!"

"What 'Marque' says about 50 per cent. of us being laid off in the fall should read, 80 per cent. And where he says that a boy is often handed three head to take care of during the winter, is the worst 'pipe dream' I ever heard him spring. Ten, twelve and fifteen head is a closer and safer estimate, and at that the poor groom is often forced to put in the winter at reduced wages, and also help carry along a few of his less fortunate 'Knights of the Rag.'"

There is no sentiment lost between the average owner, trainer and groom. It matters not how faithful they have been, when they are laid off they are thrown upon their own resources.

I know of one old-time groom that had charge of a now retired champion, and after spending the better part of his life doing so (during which time the owner realized close on to a hundred thousand dollars, going exhibition miles), and then this poor old groom was handed six or seven colts to take care of. This was quite a task for a man who was in the habit of rubbing only one, even if he was a champion. Consequently when he was offered another position to rub a champion in a distant part of the country, he decided to take it, and notified the owner that he would leave the day before the first of the following month. This gave the owner ten days' notice to get some one in his place, and it would give the groom a chance to go to work on his new job on the first of the month. Now he had worked for this man faithfully for eight or ten years and had never missed a day, but still when he received his final check he was "docked" for that one day.

Still, some of us say that sentiment plays an important part in the game!—Libertyville, in the Horse Review.

The Story of J. T. 2:12 1-4

SIRE OF THE DAM OF PETER MAC 2:03½

Away back in 1890 there arrived in Tacoma, from what part of the world I do not now recall, a young man named Jinson James. The boy had a great love for horses and procured for himself a job at the Stony Oak Stock Farm, owned by Dr. Wintermute, where James Hickey was at that time the trainer. Like many another young man, Jinson James had hopes that he would some day own a great race horse, and after a season at Stony Oak Farm he decided that he would go to California, which was at that time the world's greatest breeding center for the light harness horse. A few members of the family of Dexter Prince had been racing around Tacoma and had impressed young James by the excellence of their general qualities, so he picked out Lodi as his objective point and hied himself for that little city, in due time procuring a job at L. M. Morse's Live Oak Farm, at that time the home of Dexter Prince.

For about a year the youngster stuck to his job as farm hand at Live Oaks, feasting his eyes meanwhile upon the horses owned by his employer, but one day he decided to quit and called for his time. Morse at the moment was evidently a bit short on coin of the realm (something that has happened at various times both before and since to a good many folks in the trotting horse business) and asked James if he could and would take a colt as part pay. Jinson found this proposition acceptable, and as he had a pretty good line on the horseflesh then on the farm he lost little time in making his selection—a very elegant three-year-old bay stallion of good breeding, with black points and a beautiful flowing tail. Taking this colt at a valuation of three hundred dollars and getting the balance of his wages in cash, James said goodby to Lodi and started back to the northwest, eventually, by means of boat and road, arriving at Tacoma with the horse in excellent condition.

Many is the time that Jinson James sat and told me of the good points of his bay stallion, and that his name was J. J., sired by Live Oak Hero, a crippled son of Director and Nelly Grant by Santa Claus; that his dam was a mare named Ada by Dexter Prince, his grandam Ida W. by Abbottsford, his third dam by Winthrop, and his fourth dam a daughter of Chieftain. We who were friends and admirers of Jinson James and his three-year-old colt were sure that J. J. would be a great horse, as he looked the part in every particular and was a grand, bold-going trotter.

Before leaving California with his most prized possession, James had started the colt in a three-year-old race at Napa which he had won in straight heats, defeating a field of five and taking a record of 2:26. After arriving at Tacoma he effected a combination with a trainer from Kansas named Wickersham and who was at that time training horses over the mile track at Tacoma, the basis of the agreement being that Wick would train J. J. in return for poor James' services as caretaker to the other steeds in the stable, and by this sacrifice on the part of his owner J. J. was enabled to have his education at the trot continued.

Well, in due time Wickersham started east via Montana and Colorado points, taking with him Jinson James and his bay stud. As J. J. he acquired a record of 2:18¼ but met with no great amount of success as a race horse, and I notice that before he took his fastest record his name had been changed to J. T., probably for registration purposes. James sold him to some folks in Michigan, and I think it was after this sale that he took his record—anyway it was after he had gotten out of Wickersham's hands, for a man named Hall gave him his mark of 2:12¼ as J. T. at Terre Haute in the fall of 1900. The day is one that a good many folks remember well to the present time, as on the same day that the one-time pride of Jinson James' heart trotted in 2:12¼, The Abbott and Ed Geers set the world's trotting record at 2:03¼, and the California bred pacer Coney, driven by Ed Gaylord of Denver, set the amateur pacing record at 2:03¾.

For a season or so prior to this time (as well as for some years subsequent thereto) J. T. did stud duty in the neighborhoods of Vassar and Bay City, Michigan, and it was during the year preceding the one in which he took his record that John Rhyland sent to his court the bay mare Letitia 2:18¾, the result of this service being the great race trotter Lillian R. 2:04½, now the dam of Captain David Shaw's sensational stallion Peter Mac 2:03½, regarded by almost every horseman who knows him well as the most logical candidate for two-minute honors in training today—and in looking at the pictures of Peter Mac it seems to me that I have cheated old Pappy Time out of about a score of years and am again out at the old stables at Tacoma, gazing with admiration at the beautiful bay colt J. J., brought here by the poor boy Jinson James.

Many and many is the time I wonder what has become of Jinson James. He was a nice boy and a real horse lover, and it is through his love of a good horse and his excellent judgment of one that the horse world of today is singing the praises of Peter Mac. I hope he is alive and prosperous and able to enjoy reading of what his first horse produced by siring Lillian R., for the satisfaction of knowing that his judgment as a selector of a stallion was sound is, I think, about all that Jinson James ever got out of his ownership of a grand trotter and a beautiful horse.

C. A. HARRISON.

AN "IMPORTED" HORSE STORY.

One incident of many is worthy to relate. In the 2:15 pace at Salem in 1913 Yedno was in a race with Hal Gray, Red Rock, Hal Chief, J. C. B. and Uncle H., Mac N. and Lady Verton. Hay Gray, then owned in Calgary, won two heats in 2:09 and 2:10½, when his owner, Fred Johnston, who was passing through the paddock, noticed a few fellows drinking in Yedno's stall from a bottle. Strange as it may seem, after her owner, trainer, driver and friends took a drink, they immediately proceeded to pour the balance of the bottle into Yedno's throat, an operation she made no resistance against and in fact acted as if she liked it. The owner of Hal Gray then proceeded over to his own horse's stall and informed his trainer of the circumstances and warned that driver to be careful to keep away as far as possible from what he expected would be a drunken horse and driver. The next and concluding heat was called immediately afterwards and, hard to believe, Yedno finished second practically guideless, as she really got no assistance from her driver in his condition, and the final quarter of that mile she stepped in 29¾ seconds, and was only beaten a neck in 2:11:—Calgary Herald.

BIG PERCENTAGE OF NOMINATIONS KEPT GOOD IN KENTUCKY FUTURITY.

A total of 763 colts and fillies have been kept good in the Kentucky Futurity for foals of 1915. While not the highest figure yet attained in the futurity, this number represents the highest percentage of the original entry list ever recorded in any colt stake for trotters, as only 842 mares were nominated in April. Two hundred and sixty-four nominators are represented and 33 have named five or more each, or a total of 433. Walnut Hall Farm, Donerail, Ky., continues to hold first place with 71, sired by the farm's coterie of great stallions, Manrico, Walnut Hall, Moko and San Francisco. Patchen Wilkes Stock Farm, Lexington, Ky., is second with 41, the most of them by Peter Donna and the balance by Peter the Great and the farm's other stallions. J. R. Magowan of Mt. Sterling, Ky., is third with 23, all but two being sired by his popular young sire, J. Malcolm Forbes; Allen Farm, of Pittsfield, Mass., is fourth with 21, the majority of which are by Bingara. The following is a list of nominators with five or more entries:

Walnut Hall Farm, 71; Patchen Wilkes Farm, 41 J. R. Magowan, 23; Allen Farm, 21; Curles Neck Farm, 21; C. C. Watts, 16; J. E. Madden, 16; Hillanddale Farm, 15; D. M. Look, 14; John R. Thompson, 14; A. B. Coxe, 13; Empire City Farms, 12; H. J. Schlesinger, 12; L. E. Brown, 10; U. G. Saunders, 10; J. O. Winston, 10; W. F. McAllister, 9; Midway Stock Farm, 9; Dromore Farm, 9; Mike Bowerman, 9; Beau Ideal Farm, 8; Hudson River Stock Farm, 8; R. L. Nash, 8; John L. Snyder, 8; Paul C. Wilson, 6; C. B. Shaffer, 6; Charles E. Dean, 6; Forest Park Farm, 6; F. E. Masland, 5; Empire Farms, 5; Cruickston Farm, 5; H. N. Bain, 5, and Comsewogue Farm, 5.

One hundred and fifty-four stallions have sired the list of eligibles and 22 sires are represented by 10 or more weanlings, or 476 altogether. The list is again headed by Peter the Great, with 52. One of the features deserving of special mention is the remarkable showing by the young stallion, J. Malcolm Forbes 2:08, half-brother of Peter the Great, and Manrico 2:07¼, which was one of the greatest three-year-old colt trotters that ever lived, which hold second and third positions, with 46 and 35 respectively. Peter Donna is fourth and he is followed by the two Walnut Hall stallions, San Francisco and Moko. Twelve of the select list have records of better than 2:10, sixteen better than 2:15, nineteen better than 2:20, and two are without records, namely Moko and Bingara; but this is not because they failed to possess speed. The following table is the select stallion list:

Peter the Great 2:07¼, 52; J. Malcolm Forbes 2:08, 46; Manrico 2:07¼, 35; Peter Donna 2:08, 32; San Francisco 2:07¾, 31; Moko, 25; General Watts 2:06¾, 24; Axworthy 2:15½, 24; The Harvester 2:01, 22; Walnut Hall, 2:08¼, 21; Bingara, 21; Northern Man 2:06½, 17; Azoff 2:14¾, 17; Justice Brooke 2:09½, 15; Morgan Axworthy 2:17, 14; Siliko 2:11¼, 13; The Exponent 2:11¾, 13; Guy Axworthy 2:08¾, 12; Binjolla 2:17¾, 11; Dillon Axworthy 2:11¼, 11; Beirne Holt 2:11¼, 10, and Peter Wood 2:19½, 10.

It is always interesting to know where the entries come from—which sections continue to maintain their breeding interests. Thirty-three states and Canada have furnished the entries. Kentucky leads with 274, an increase of 50 over last year; New York is again second with 109; Ohio takes third place with 57, Illinois fourth with 54, and Massachusetts fifth with 45. In 1914, 698 weanlings were kept in the futurity as against 763 in the futurity just closed. These figures ought to be encouraging to trotting interests for they indicated marked confidence in the future among breeders. The following table gives the entries by states:

Kentucky, 274; New York, 109; Ohio, 57; Illinois, 54; Massachusetts, 45; Pennsylvania, 38; Indiana, 28; Michigan, 21; West Virginia, 18; Wisconsin, 18; Nebraska, 17; Virginia, 14; Tennessee, 11; California, 8; Canada, 7; Alabama, 6; Maryland, 4; Connecticut, 4; Iowa, 4; New Jersey, 4; Louisiana, 3; New Hampshire, 3; Missouri, 2; Georgia, 2; Minnesota, 2; Oklahoma, 2; Utah, 1; Rhode Island, 1; Florida, 1; District of Columbia, 1; Kansas, 1; South Carolina, 1, and Vermont, 1.

Prominent among the foals are those of Uhleen, Nervolo Belle, Harvest Girl, Notelet, dam of The Harvester, and Markala, dam of Walnut Tree. The stake book will be published following closing of entries to the futurity for foals of 1916, April 1.—Western Horseman.

My Irene S. (2) 2:28¾ is maintaining her record as one of the most prolific young matrons in the land, having recently given birth to a bay colt by Carlokin 2:07½, hence a full brother to that good futurity trotter Esperanza (3) 2:09. Iran Belle (dam of Old Folks 2:11¾) by Iran Alto 2:12¼, dam the triple producer Anna Belle 2:27½ (dam of Robert I. 2:08¾, etc.) by Dawn 2:18¾ has also foaled a bay colt to the cover of Carlokin, while Reta H. 2:12½ (dam of Byron (3) 2:15½) by McKinney 2:11¼ and Subito (dam of White Sox 2:05¼, The Lark (4) 2:09½, etc.) by Steinway (3) 2:25¾ are both suckling new born foals by Copa de Oro 2:01, the former a bay filly and the latter a chestnut colt. Each of the four mares will be bred back to the sire of her present foal, and the indications are that both Carlokin and Copa de Oro will be kept busier this season than ever before.

NOTES and NEWS

Good-by to racing at Tia Juana for the present.

◈ ◈ ◈

The meeting deserved a better fate, as from all we can learn at this distance it was very well conducted.

◈ ◈ ◈

Have you ordered a season announcement for your stallion yet? The man who does the best stallion business will be found advertising both early and often.

◈ ◈ ◈

Send us a memorandum of the foals as they are born. Start them off in life with the benefit of a little publicity that costs you nothing and interests your friends.

◈ ◈ ◈

Directum I. 1:56¾ and Etawah 2:03, both of whom have in all probability raced their last competitive affair, will be prepared for exhibitions and possible new records this season.

◈ ◈ ◈

The stewards of the Great Western Circuit have been summoned to meet February 15 at the Auditorium Hotel in Chicago, Secretary Smollinger having issued the call.

◈ ◈ ◈

That "Clean and Slippery" axle grease manufactured by the Whittier-Coburn Company of this city will add life to the bearings of all kinds of vehicles and farming implements. Try it once and find out its good qualities for yourself.

◈ ◈ ◈

Zona B. 2:25½ by Zolock 2:05¼, dam the double producer Hytu by Happy Prince 10546, has been sent to Los Angeles from Globe, Arizona, by A. W. Sydnor and will be bred this season to W. G. Durfee's great sire of pacers, Copa de Oro 2:01.

◈ ◈ ◈

The Moko family annexed another nice record a few days ago when Dayspring won the 2:30 pace over the Mount Royal track at Montreal in 2:11, 2:10¾ and 2:13½, the three fastest heats ever witnessed on the frozen footing. His dirt track record is only 2:14¾.

◈ ◈ ◈

The Canadian Sportsman is the latest of our exchanges to print the picture of Vernon McKinney as the fastest horse that ever stood for service in the dominion, giving Winnipeg as the scene of his activities for the present season. Our advertising columns may enlighten them on the matter.

◈ ◈ ◈

The brood mares Yolanda 2:14¼ by McKinney 2:11¼ and Mary Gordon 2:09¾ (dam of Onward McGregor (3) 2:23¼) by Gordon, recently purchased from J. N. Colomb of this city by Bert Baker, the San Diego county horseman, are at Pleasanton and will probably be mated with The Anvil 2:02¾.

◈ ◈ ◈

The Fasig-Tipton company is complaining of a shortage of aged horses for the forthcoming mid-winter auction, though there is a fair supply of yearlings, mostly from Kentucky. It is not improbable, from present indications, that the event will be confined to two or three days instead of the customary four.

◈ ◈ ◈

The Sacramento folks have been indulging in a bit of bartering in trotters of late, S. H. Cowell securing fromJohnny Quinn the good gelding Albaloma 2:08¼, while the Silva stable has received an addition in the shape of the former Fresno trotter Con Brino 2:14½, who is reported as being one of the oily kind for the coming season.

◈ ◈ ◈

Tuesday, February fifteenth, will be a busy day in Chicago for the trotting horse fraternity, the day's events including the meeting of the stewards of the Great Western Circuit, the assembly of the representatives of state fairs and expositions, the biennial congress of the members of the American Trotting Association and, at night, the convention of the Turf Journals Association.

◈ ◈ ◈

The rains have deterred training operations all over the state, but California horses will be ready as usual when the bell taps. It looks like a big year for the stock grazers and the grain men who had their land seeded before the long wet spell set in. Consequently there will be that much more incentive to excellent and numerous exhibits of all kinds at the fairs this fall.

◈ ◈ ◈

Charley DeRyder was one of those "fleeting visitors" in our midst one day this week, having brought the ladies of the household to the city for the day, and dropped in at this office long enough to notify us that the bookings to The Anvil 2:02¾ began to loom up, and that he believed the great trotter would serve fifty or more mares this season, which will be a most excellent patronage in the light of existing conditions. If the MacKenzie youngster, Anvilite (2) 2:22¼, may be taken as a fair specimen of his get he is going to prove a wonderful sire of speed and individuality.

The twenty-seventh annual renewal of the Kentucky futurity is announced under the same conditions that governed number twenty-six of the same series and will close on April first, for mares bred in 1915 and due to foal this season. California breeders desiring to patronize the stake may obtain all particulars by addressing Secretary J. W. Williams of Lexington.

◈ ◈ ◈

Locust Jack 2:06½, now fifteen years of age, made a reappearance in harness in the final event of the ice meeting at Montreal a few days ago. The old gray hero won the first heat in 2:25½, the fastest time of the race, but gradually faded and was distanced in the fourth and final heat. He was one good trot horse eight or nine years ago and it is remarkable that he should be in shape to make even as good a showing as he did at this late date.

◈ ◈ ◈

At the recent meeting of the Kentucky Trotting Horse Breeders' Association the former officers were elected as follows: Ed A. Tipton president, R. C. Estill and J. R. Hagyard vice-presidents, J. W. Williams secretary, and Miss Gertrude Matlock assistant secretary, while the board of directors is composed of Ed A. Tipton, R. C. Estill, J. R. Hagyard, J. D. Grover, A. B. Coxe, R. C. Estill, J. R. Allen and David M. Look.

◈ ◈ ◈

The Review Racing Guide made port some days ago, considerably behind her customary schedule, but that other famous landgoing liner, the Year Book, has not yet been reported outside the heads and grave fears are entertained for her safety. However, there has been a strong play on her on the overdue boards at Lloyds' at the Marine Exchange so there must be some foundation for the belief that she will eventually cast anchor in Horselibrary Cove.

◈ ◈ ◈

F. B. Dupree of San Diego has sent the double-gaited mare Axnola to be bred to Carlokin 2:07½ and the cross is one that should be productive of speed to a gratifying extent. Axnola was bred by A. J. Molera of this city and is by Excel (a son of Axtell (3) 2:12 and Lady Simmons by Simmons) and out of Nola (dam of three) by Nutwood. She was raced originally as a pacer and took a mark of 2:15 at that way of going and was then shifted to the trot and won in 2:19¼ at Seattle in 1913.

◈ ◈ ◈

Five horses named Peter Pan, four of them wigglers, were racing in 1915. This makes things easy for the compilers of statistics, especially when the owner or trainer fails to give the sire when making entries or the clerk of the course leaves out this information in his hurry to wind up the afternoon's duties and make the run to the beer stand. A summer afternoon's thirst has caused more than one well bred horse to go into the books minus either sire or dam or both.

◈ ◈ ◈

Magnus Flaws, who in addition to being a first-class presiding judge, starter of runners, authoritative turf correspondent, teller of Scotch stories and christener of babes, is a horse salesman of considerable resource in season, has recently sold to President E. J. Curtin of the Great Western Circuit the diminutive pacer Major Ong 2:03½, raced for the last couple of seasons by Tommy Murphy. Mr. Curtin has his eye on those free-for-all paces on the two-lap tracks in the west and will have the little fellow pointed for them by Joe McLaughlin. They are liable to be hard to beat.

◈ ◈ ◈

Ed Best of Minneapolis, who purchased Madam Mac 2:07¼ from Charley DeRyder last season, declares her to be one of the best and most satisfactory pacers he has ever owned for use on the ice, free legged, good headed, nice to drive in every way and fast enough for any company he meets. Several days ago he staked his friend Bundy to the Madam while he himself piloted Kid Riley, and although the Kid proved the winner, with Jerry H. second, the former California mare won the fourth heat of the five in the fastest time of the event, one minute and four seconds.

◈ ◈ ◈

America's foremost patron of the trotting turf, C. K. G. Billings, accompanied by Mrs. Billings and a party of friends including Mr. and Mrs. Fred Stevenson and Mr. and Mrs. Fred Johnston, has been a guest at the St. Francis hotel in this city several days of late, the party arriving the latter part of last week. Mr. Stevenson, president of the United States Friel Trials Club, and Mr. Johnston, Mr. Billings' partner in his thoroughbred operations, have been the guests of local sportsmen at various little events during the week, but Mr. Billings himself has been confined to his apartments the greater portion of the time owing to the after effects of the injury he received some weeks ago when his saddle horse fell with him. The party proposed going south as soon as conditions were improved along the line of weather and transportation, and will probably again visit San Francisco before departing on their journey east. Mr. Billings is much pleased with the condition of affairs at Curls Neck Farm and is confident that the get of The Harvester will sell for higher prices every year for some seasons, as he can see nothing ahead but success for that family and also anticipates a strong upward trend in the general run of prices for well bred trotters that can go to the races and bring home their fair share of the purse and stake money.

The Buffalo County (Neb.) Agricultural Association held a meeting at Kearney, Neb., Jan. 10, at which time all the old directors and board of managers were re-elected, as follows: F. F. Roby, president; G. E. Haase, secretary; H. A. Webbert, treasurer; J. A. Boyd, general superintendent of agriculture, and E. D. Gould, superintendent of speed. The matter of a summer and fall meeting resulted in dates being announced for July 3-5 and Sept. 19-23. The speed program has not been agreed on in full yet, but it will be similar to or better than last year.—Western Horseman.

◈◈◈

L. L. Pope of Cleveland, who as manager of the Lawrence-Williams Company supervises the distribution of that sterling veterinary remedy, Gombault's Caustic Balsam, arrived in San Francisco Monday morning, some days behind his original schedule owing to the storms that have so thoroughly disrupted rail service on the coast since the first of the year. His car was derailed between this city and Los Angeles, without serious damage or injury to passengers, and it was with considerable relief that he arrived at the end of his land journey. Mr. Pope makes occasional trips of considerable duration on pleasure bent, and sailed from this port today, accompanied by Mrs. Pope and a niece, for Hawaii, Japan and other lands on the far side of the globe.

◈◈◈

William Sinnock of Santa Ana reports the death on January 27, from impaction of the bowels, of the black mare Santa 2:25½ by Ellerslie Wilkes 2:22½, dam the double producer Santa Marie Second by Hylas 831, the rugged old lady being twenty-seven years of age at the time and yet a splendid specimen of the standard bred mare. At the Santa Ana fair last season Mr. Sinnock exhibited her in two events, one for standard bred mares only and the other for mare and two of her produce, also standard, and in good company in both rings she was awarded first premium. The members of her family shown with her were her last foal, a mare called Athelo, and an older black gelding known as California Chief, the latter a green trotter of considerable capacity. On July fifth at the driving club matinee at his home town he was a winner over three pacers, trotting his best mile in 2:23¼, while the following week he worked the same track in 2:20¼, performances the more creditable owing to the fact that he had been about three weeks off the ranch at the time.

◈ ◈ ◈

Horsemen who race on the ever popular Michigan Short-Ship Circuit will have a longer season than ever before if the tentative plans adopted by the Stewards of the line in a recent meeting at Detroit are made permanent. The Ohio points formerly holding dates with the organization have been dropped from the schedule and South Bend, Indiana, has been added, the dates as at present arranged being as follows: Monroe, June 19-23; Port Huron, June 26-30; Saginaw, July 3-7; Bay City, July 10-14; Jackson, July 17-21; South Bend, Ind., July 24-28; Port Huron, July 31-Aug. 4; Monroe, Aug. 7-11; Mt. Clemens, Aug. 14-18; Owosso, Aug. 21-25; Ithaca (fair), Aug. 28-Sept. 1; Detroit (Michigan state fair), Sept. 4-8; Jackson county fair, Sept. 11-25; Charlotte fair, Sept. 18-22; Marshall fair, Sept. 25-29; Saginaw fair, Oct. 1-5; Detroit Driving Club, Oct. 8-12; Kalamazoo, Oct. 15-18; Monroe, Oct, 22-26. The executive committee composed of President H. C. Knill, Jr., of Port Huron, Vice-President Frank W. McQueeney of Detroit and Secretary Thomas F. Morris of Saginaw will meet shortly and arrange the dates permanently as well as make provision for the classes for the stakes and purses. Colt races will be a feature of every program.

◈◈◈

Great is the power of the beef and dairy cow in this broad land of ours! Twenty-odd years ago Palo Alto was the greatest speed nursery in the world, and now there is scarcely a vestige of its old glory remaining and a large acreage of the famous old place has been leased by a coterie of local capitalists and will be operated as a dairy farm. In the early nineties William O'B. Macdonough paid well over a hundred thousand dollars for the great thoroughbred stallion Ormonde and brought the son of Bend Or to San Mateo county and established near Redwood City the farm which was to become known around the world as Ormondale. Here were assembled many matrons of high degree, and their produce to the cover of Ormonde and his sons went forth and did battle right royally and successfully with the best the land had to offer. Came at last the death of the master, the falling of racing into the slough of disrepute, and year by year the number of horses at the one-time home of the "sire of the century" was reduced, until a few months ago the last of them went to find new homes on other western farms. Some weeks ago the Ormondale Company began stocking the place with the best of Shorthorn beef cattle obtainable in the west, and now in Ormonde's old stall in the stud barn there stands a sire of another type—the bull Golden Goods Junior, purchased at the stock show at Portland for the sum of twelve hundred dollars. In other stalls are found ten cows and calves of high degree from the herds of A. D. Dunn of Wapato, Washington, and a couple of prize winning calves purchased here in California at the auction of the holdings of the Gibson Estate Company, and from this nucleus it is the purpose of the present owners to establish the grandest herd of Shorthorns in the whole length and breadth of the Golden State. Thus passeth the old order.

Theodore Sterneman of Milwaukee, who raced Hal S. 2:04¾ for two seasons before selling him to Tommy Murphy without ever finishing behind the money, has repurchased the roan son of Hal Chaffin and will race him this season over the halfmile tracks. Unless Theodore has a key to this bird that he failed to include with the bill of sale to Murphy the writer does not envy him his job as pilot. From the way he raced for Murphy here last fall he should be a valuable acquisition for any man with land to clear, as he could pull stumps by the bit, without any assistance of a mechanical nature. Magnus Flaws engineered the deal.

◈◈◈

One of the most attractive stallion folders which we have seen in a long time has just come to hand from Cranwood Park Farm, Cleveland, of which Guy H. Heasley is manager. It is a beautifully printed, nicely illustrated little booklet of sixteen pages exclusive of cover and sets forth in a concise and convincing manner the excellent qualities of that good son of McKinney, Prince Ingomar 2:12¼, whose record was made in the third heat of a winning race over the two-lap course at Rockport. Were the Prince able to talk he would undoubtedly express considerable gratification over the course taken by his owners in putting him before the public, and their method is one that can be followed with profit by the owners of really good stallions wherever they be found.

◈ ◈ ◈

Charley DeRyder's crew of assistants are handling among others about a dozen mighty pleasing yearlings, belonging to various owners but mostly the property of R. J. MacKenzie. They are a fine husky lot, largely the get of Joe Patchen II. 2:03¼ and Vernon McKinney 2:01½, and in every case they are out of mares of very high quality. With one exception they are California bred, the odd one being the black fellow by The Northern Man, dam by General Forrest, brought from the Blue Grass by Mr. DeRyder when he shipped home after the meeting at Lexington last fall, and the Californians compare more than merely favorably with this son of Kentucky. One of the huskiest scamps of the bunch is the bay colt by Zomblack 2:10¼ out of Martha Spy, the dam of the good MacKenzie colt trotter Anvilite (2) 2:22¼.

◈◈◈

While the Arkansas legislature stepped on the pari-mutual bill and squashed it last winter, the residents of Hot Springs have not given up their efforts to bring back thoroughbred racing to their midst, and there is a strong probability that a meeting will be staged there for the thirty days beginning March 10, backed by the Business Men's League and conducted after the fashion prevalent and successful in New Orleans. Out of a total of nearly four hundred votes cast by members of the league on the proposition some days ago the sentiment was unexpectedly strong in favor of holding the meeting, only thirteen votes being recorded as opposed to the project. President Strauss of the league is the man actively behind the gun and arrangements have been made with Louis A. Cella for the use of Oaklawn track if plans for the event are perfected. The manner in which the racing at New Orleans is being conducted is doing much to rehabilitate the thoroughbred in public esteem.

◈ ◈ ◈

After the Lower California Jockey Club had overcome all sorts of obstacles in their efforts to establish thoroughbred racing at the town on the border near San Diego, Tia Juana, and had things running in tiptop shape and a meeting in progress which was steadily increasing in popularity and success, the weather man stepped in and called a halt in a manner totally unforeseen. The location of the plant was chosen on account of the prevalence of good racing weather and the absence of rains of any extent, and then comes a flood that washes away a portion of the track. With the damage done by the waters at the time of their first visitation practically completed, rail connections resumed and the meeting on the eve of being again put under way, a second flood more destructive than the first one manifests itself, with the result that the buildings on the flat, with the exception of the grand stand, and practically all of the course itself, were obliterated. Rail connections with the towns on the American side from which the plant drew its greatest patronage will in all probability not be in operation for a period of sixty days, while it will be even longer before the county roads will be repaired to the point where autos may travel them in safety. Thus cut off from the world, the discontinuance of the present meeting was inevitable, and no attempt will be made to resume operations within the time originally selected for the club's inaugural event. It is now planned to commence the rebuilding of the course and the necessary structures as soon as the flood waters recede and materials can be secured, and have everything in readiness for a midsummer meeting, to follow those of Denver and Reno, the regular winter session being scheduled to commence on Thanksgiving day. The stables, most fortunately, were erected on high land and were not reached by the water, so no damage was inflicted upon the horses in attendance. The patronage accorded the club during the few weeks of its active operations has convinced its members that they are on a paying proposition under normal conditions, and when their plant is reopened it will be more adequate and comfortable in every way than was the case when the first meeting was commenced.

DEATH CLAIMS NOTED HORSEMAN.

Herman B. Duryea, who won the Epsom Derby of 1914 in England with Durbar II., died on January 25 at Saranac Lake, N. Y. Mr. Duryea had a violent attack of grippe in London in the early autumn of 1914, which left him in a thoroughly weak and run-down condition and from which he never fully recovered. Mr. Duryea was a member of the Jockey Club and frequently acted as deputy steward for that organization. He was also a member of the Union Club, the Meadow Brook Club, the Turf and Field Club, the Brook, Racquet, Tennis and other clubs, and various racing asociations. He was one of the foremost all around sportsmen of America, his successes in yachting, shooting and other sports being pronounced.

Mr. Duryea became identified with the turf shortly before the death of the late William C. Whitney, when his first horses of reputation were Acefull, Whorler and Irish Lad. On the death of Mr. Whitney all his horses were leased to Mr. Duryea and raced in his name and colors during the year 1904 (Artful's Futurity year). After this Mr. Duryea raced his own horses on the American turf with marked success. He owned and raced such horses as Irish Lad, Ben Ban, McKittridge, Dreamer, Mediant and many others.

After the passage of legislation adverse to the interests of racing in America, Mr. Duryea shipped his stable to France and located a breeding and racing establishment there. He was one of the most successful American sportsmen who ever raced in foreign countries. He raced horses largely of his own breeding, including Sweeper II., winner of the Two Thousand Guineas and favorite for that year's Derby Later on he won the Derby of 1914 with Durbar II., another of his own breeding. Besides these the famous horses raced in England and France included Mediant, winner of the Stewards' Cup at Goodwood; Banshee, winner of the French Thousand Guineas; Blarney, Frizzle, Hickory, Boyne, Shannon and many others.

MISSOURI SADDLE HORSE BREEDERS MEET.

The Saddle Horse Breeders' Association met Wednesday afternoon of Farmers' Week at the Missouri College of Agriculture. A number of the speakers dwelt upon the judging problems of interest to exhibitors of light horses. E. E. Holman divided judges into three classes, (1) honest but incompetent, (2) competent men who undertake to distribute premiums on some basis other than superiority of horses, and (3) men who are both honest and thoroughly competent.

Porter Taylor, a prominent Missouri judge of light horses presented the judge's point of view by emphasizing the seriousness of the judge's work. There are few men, he believes, that do not appreciate the honor and responsibility of the task of judging live stock and the judge is entitled to the same courtesy and respect from the exhibitor which the exhibitor demands for himself, particularly in the matter of care in the comments made upon the work. The discussion of these two papers unquestionably brought an exchange of different points of view which will be very helpful in eliminating the unpleasant differences of opinion that sometimes arise at horse shows. The Saddle Horse Breeders' Association should actively promote the riding of horses in both city and country, in the opinion of Rufus Jackson, who calls attention to the men who want riding horses for business or pleasure, and the office man who must have some such exercise as riding affords in order to retain his health.

The old officers were re-elected as follows: James Houchin, Jefferson City, president; E. A. Trowbridge, Columbia, vice-president, and Curtis P. Cauthorne, Mexico, secretary.

YEARLINGS PLENTIFUL AT LEXINGTON.

Visitors to Kentucky can see at this time more than one coming prospective stake winner among the yearlings being prepared for the sales to be held next month. The colts and fillies at the track, by J. Malcolm Forbes 2:08, General Watts 2:06¾, Morgan Axworthy 2:17, Peter the Great 2:07¼, and Axworthy 2:15½, furnish a degree of excellence rarely seen in trotters of this age, while at Walnut Hall Farm the most remarkable collection of young speed marvels ever produced at that nursery for futurity winners is on exhibition. A shrewd observer, capable of selecting the best, would reap a rich harvest by purchasing a few from among the many really high-class yearlings now taking their daily lessons over the roads at the Lexington track and in the long stable at Walnut Hall Farm, and by giving the youngsters a chance to develop before asking of them the supreme effort. These yearlings have received no injury from their schooling and are invariably sound, well made and full of quality. Among the one hundred or so yearlings are several capable of speeding a 2:30 shot, while at least a dozen can brush considerably faster. A great opportunity, truly, for a discriminating buyer to select racing material, colt trotters with extreme speed and perfect manners. When the practice of forcing yearlings to supreme effort has been abandoned, just such colts and fillies as can now be seen in Kentucky will furnish the winners of a majority of the futurities and purses offered during a season's campaign.—American Horse Breeder.

ROD, GUN AND KENNEL

CONDUCTED BY FISHER HUNT

STATE GAME FARM TO BE DISCONTINUED.

Sacramento, February 1.—The State Board of Control announced today that it would discontinue immediately the wild game farm established over two seasons ago at Hayward, Alameda county, where a large tract of land was leased to be used exclusively in the further development of the game resources of the State.

It is announced that the expense is too great. The farm has devoted much of its time to the study and care of the mountain valley quail. It was sought to instruct people how pheasants and all game birds could be raised artificially.

The Fish and Game Commission outlined the work done last season and was looking forward to success in liberating game this coming season.

Although no attempt was made to rear large numbers of pheasants at the State Game Farm in 1915, yet a number of birds have been planted in different parts of the State. Over one hundred ring-necked pheasants were liberated near Sacramento and a like number in the river bottoms near Edgewood, Siskiyou county. Very favorable conditions exist in the latter locality and ranchers of the vicinity have promised to give the birds careful protection. Especially good results are therefore expected from this plant. The Santa Clara Valley was restocked in several places and seventy-five birds were sent to Calistoga, Napa county. Fifty pheasants were planted near Lake Chabot. In all 581 ring-necked pheasants were liberated.

As an experiment twelve golden pheasants, ten silver pheasants and forty-four valley quail were liberated on Goat Island, in San Francisco Bay. The pheasants placed on the island several years ago have increased and there is every reason to believe that these new birds also will thrive. The very best protection is afforded them on the island and at seasons when food and water are scarce, these are supplied. About three hundred valley quail reared at the State Game Farm were liberated near the farm in Hayward.

THE DUPONT TRAPSHOOTING SCHOOL.

The mere mention of a trapshooting school will cause sportsmen to sit up and take notice, as the saying goes, for while there have been and still are places where tennis, golf, and other sports are taught novices, this country has never boasted anything in the form of a shooting school. Anticipating the many queries which will follow the announcement of the starting of the trapshooting school, E. I. duPont de Nemours &Company send out the following information concerning same:

The school will be operated at Atlantic City, N. J.—the greatest year round pleasure resort in the world—and a place annually visted by more sportsmen than any other city. The convenience of the sportsmen has been considered in determining the location of the school, which will be right in the center of activities, on Young's Million Dollar Pier, at the end.

The purpose of this new shooting school is threefold, viz.: to teach the proper care and use of firearms, to instruct men and women in the art of trapshooting, and to provide a place where the thousands and thousands of "gun bugs" who yearly visit Atlantic City may enjoy their favorite sport, engage in trophy contests, team races, etc., in a place easily accessible and at a moderate cost.

The school will be in operation about March 15th, or by April 1st at the outside. The equipment will consist of one Ideal Leggett, and one Western McCrea, automatic trap, standard targets being used, twenty gauge guns of practically every make, and competent men in charge. The targets will be thrown against a background of water, targets and shot falling into the Atlantic ocean. Standard trap loads will be on sale, but only twenty gauges may be used. The targets will be thrown about 40 yards. A person desiring to use his own gun may do so, but only factory loaded ammunition can be shot on the range.

The services of Henry Hewgill Stevens, famous professional and known to every one in the trapshooting game as "Hank," have been secured and he will be in charge of the school as manager, and will act as personal instructor at no cost whatever to any one desiring his services. Mr. Stevens has been shooting since 1888, and nearly 30 years ago competed on the trapshooting team of Rutgers College, of which he is a graduate, against the Princeton, Yale, and other college teams. In the year 1903 Mr. Stevens turned professional, going first with the DuPont Powder Co. and later representing one of the leading Eastern gun and ammunition manufacturers, traveling for them in practically every section of the country. He is now back with his first employers.

In inaugurating this new school, the DuPont Company believes that it will prove a boon to every sportsman who visits Atlantic City, and will also fill a long-felt want on the part of those who have desired to learn to shoot under the tutelage of a competent instructor, such as Mr. Stevens. From time to time events will be arranged for groups of shooters who may be at the seaside resort, and team races and trophy events staged. Local shooters will also have events arranged for them, or may arrange their own events, and shoot them over the school traps. In fact Mr. Stevens will see to it personally that everything possible is done to make the visit of sportsmen to Atlantic City as pleasant as possible, and sportsmen and sportswomen everywhere are extended a cordial invitation to call and see him at Young's Million Dollar Pier after March 15th.

COAST FIELD TRIAL EXPERTS EXPECT BIG THINGS OF KENWOOD SAM IN THE EAST.

On our cover page this week we take pleasure in presenting the likeness of the California setter Kenwood sam that will shortly be sent to C. H. Babcock, the well-known handler, to be entered in practically all of the elite Eastern trials next season. Kenwood Sam is a small white, black and tan setter that has performed in very promising style in limited competition.

Experts who witnessed his impressive victory in the derby stakes of the Pacific Coast Club's trials at Bakersfield last December are enthusiastic over the prospects of Kenwood Sam making a name for himself on the big circuit. He is only a twenty-months old puppy by Old Forester out of Caesar Keepsake, and his sterling performance in the Derby was his his first and only field trial competition.

Kenwood Sam is owned by Mrs. A. G. Wilkes, of San Francisco, who is an ardent devotee of outdoor sports. Besides knowing the qualities and fine points of dogs, Mrs. Wilkes has earned a reputation as a crack shot. During the past open season she frequently accompanied her popular husband, A. G. Wilkes, who is president of the Pacific Coast Field Trials Club, on hunting trips and has many limit bags to her credit. Mrs. Wilkes also makes a beautiful figure before the traps and finished up 1915 with a creditable record of 86 per cent.

Followers of Pacific Coast field trials will watch the performances of Kenwood Sam in the East with a deal of interest. Mrs. Wilkes also intends to send another of her crack dogs, Melrose Rod, to Mr. Babcock. It is the first time in recent years that California will be represented on the big circuit.

SCHUETZEN CLUB AWARDS PRIZES.

The Germania Schuetzen Club, at its annual meeting, awarded medals and prizes won during 1915. Following are the winners in the most important contests: Five best centers during the year, first prize, George A. Pattberg, Huber diamond medal, 801 points; Ben J. Jonas 1188, William F. Blasse 1564, Otto A. Bremer 1679, Martin Blasse 2015, G. C. Gunther 3916, George C. Post 4218, C. M. Henderson 4709, John de Wit 4807, Eugene Hoffman 5509, Captain John E. Klein 6847.

Medal winners—First expert class, William F. Blasse, 2306 rings; second expert class, George A. Pattberg, 2294; first champion class, G. C. Gunther, 2042; second champion class, John de Wit, 2004; first class, George C. Post, 1859; second class, Saul Heino, 1856.

The following officers were elected for the current year: President, Herman Huber; vice-president, J. William Goetze; secretary, G. C. Gunther; treasurer, T. P. Shuster; trustees, Captain Ludwig Siebe, Captain J. D. Heise and E. H. Goetze; shooting masters, Ben J. Jonas and Martin F. Blasse.

MOUNTAIN LION KILLED NEAR MANZANITA.

The first mountain lion in years was seen and killed in Marin county last week, according to Deputy D. H. Hoen. It was a small one, measuring only five feet four inches, and was brought down near Manzanita.

* * * *

H. L. Priscott, a game deputy, made an extended trip to Del Norte and found a herd of elk estimated all the way from 45 to 90 head, on a narrow strip of the Coast country. He reports that the elk are prospering.

* * * *

Deputy Oyer of Pacific Grove makes a unique report. He says that on December 28th near Jack's Ranch he saw a doe with two spotted fawns, apparently two weeks old. This is causing the game experts to wonder how the doe caught out of season.

FISH AND GAME IN NATIONAL FORESTS.

Rangers are submitting their reports of fish and game in the National Forests in California with their customary thoroughness. Statistics on the past hunting season and suggestions for remedying some present conditions are set forth to the Fish and Game Commission. On the whole, fewer deer were killed in 1915 than in previous years but the prospects are considered bright for a banner trout fishing season.

In the Sierra forests beavers were seen in a deep canyon in Mariposa county in September. Grouse and sage hens were also in evidence. Observations of the spawning of trout in Chiquito creek, elevation 4,000 feet, is that they spawn in the small creeks in May, June and July. At Whiskey Creek, 5,500 elevation, the spawning period is in July and extends into August.

Not many fish were lost by receding water or washouts of beds. The fish were hindered, however, by natural obstructions, from reaching the headwaters. Leeches in the gills of fish has been a complaint in the San Joaquin river. They killed off fish by the hundreds, continues the report. About the falls at the junction of Fish Creek and the main river the stream is alive with trout for four miles.

In the Santa Barbara forest 404 deer were killed, which is smaller by 32 than in 1914 and 21 less than in 1913. The reason advanced for this is that there was less camping, due to the people taking in the expositions. The law prohibiting the killing of spiked deer also held down the record. Mountain lions are numerous and destructive to deer. Eagles are also plentiful and play havoc with wild birds. Fish are reported plentiful in the streams. The limit and the season are considered about right by the forest authorities of this district, as they set forth that April 1st was a bit too early and May 1s will fit in nicely for the opening of trout activities.

In the Stanislaus forest, 191 deer were killed as against 247 in 1914. Quail, doves, wild pigeons and cottontail rabbits are reported as scarce. Many mountain lions were killed last season. No beavers and only a small number of grouse are in this district. A recommendation is made that many of the streams be restocked with fish. No fish are said to be in Emigrant Lake, which was once a favorite angling spot.

Plumas forest officials state that no beavers, sage hens, pheasants or wild turkeys are in evidence. Grouse are plentiful but are prevented from increasing more rapidly by the work of hawks and varmints. Deer are almost extinct. They complain that at Balsam Valley country 75 were killed in their winter refuge.

Rainbow trout in the west branch of the Feather River spawn in June, July and August in the streams and from Februarly to April in the lakes. Obstructions are hindering the fish in some sections.

TWO THOUSAND FOUR HUNDRED AND THIRTY-TWO RABBITS KILLED IN HUNT.

In the annual rabbit hunt at Corder, Mo., which was participated in by more than 186 hunters, and which began on Christmas Day and lasted until the evening of January 6, the men being divided into two teams, one captained by John Smith and the other by A. F. Noltensmeyer, 2,432 rabbits were killed, one jackrabbit being among the number, and yet it is said that rabbits are not as plentiful in Lafayette county this year as they were a year ago, when only 1,640 were killed. The team scoring the greater number was given an oyster supper and rabbit fry by the losing team.

* * * *

At a recent hearing conducted by A. S. Houghton, secretary of the New York forest, fish and game commission, in the city hall at Saratoga, it was decided to ban night fishing in Saratoga Lake for pike. The number of lines allowed will be limited in an effort to stop the slaughtering of pike by "game hogs." The hearing followed the request of the Saratoga Lake Association asking protection for pike and other fish. The commission will take the matter up at once and upon favorable action the new ruling will go into effect after thirty days.

* * * *

At the present time, according to Deputy Game Warden P. W. Nelson of Livingston, Mont., who recently returned from Gardiner, there are thousands of elk, deer, antelope and mountain sheep in the immediate vicinity of that town. He estimates that there are 1,000 elk, an equal number of deer, 100 head of mountain sheep and 200 head of antelope being fed by government scouts just opposite the town of Gardiner and on the road from that town to Fort Yellowstone in the national park. All this game, which is in the finest shape, has been driven down from the high points in the park due to the deep snow. The animals are unusually docile, even not resenting the intrusion of automobiles. Speaking of the immense herd congregated in that section, Mr. Nelson said: "A prettier sight man never beheld. To anyone who has not had the pleasure of seeing such vast quanaities of game, it is a real treat and well worth traveling miles to see. The animals are unusually tame and elegant pictures can easily be secured." At the present time, it is said, there are several parties there capturing elk for shipment to eastern and southern states.

Drink Jackson's Napa Soda.

NEWS OF KENNEL DOINGS.

When the Westminster Kennel Club show opens in New York on Washington's birthday, over three thousand dogs of every known breed will be on exhibition. Over twenty judges will officiate. The following are the names of the local fanciers who intend to leave here to attend the show: John M. Williams, Walter W. Stetteheimer and O. F. Vedder.

‡ ‡ ‡

Candover Lady, a bull bitch recently imported by Mrs. Anita M. Baldwin of Santa Anita, California, had a litter of seven puppies by the famous English winner, Irish Peace Maker. Three of the puppies died at birth. Mrs. Baldwin has named the four living ones as follows: Candover Irish of Anoakia, Lady Peacemaker of Anoakia, Candover Lass of Anoakia and Irish Peacemaker of Anoakia.

‡ ‡ ‡

Two of the four Airedale terriers that were purchased in England by Mrs. Baldwin several weeks ago arrived at the kennel last week. They are ch. Stockfield Nina and Ebbo Princess. The former has a large number of wins to her credit.

‡ ‡ ‡

An important bit of news which has happened in the dog game hereabouts, is that Jack Bradshaw—one of the best known dog men in the business—whose kennels in San Francisco have been an objective point for fanciers, is moving to San Mateo, to reside permanently. Mr. Bradshaw has a tract of about five acres, and has constructed kennels, and otherwise fitted the place as an ideal spot for his famous dogs. Mr. Bradshaw has left for the east to remain away several months, and, while gone, expects to buy about thirty of the best dogs the east has to offer.

‡ ‡ ‡

Mrs. M. Colverd, of San Francisco, is feeling mighty fine these days, for her lovely Skepton Lassie, an old English sheep dog, has whelped seven big husky babies to her English sheep dog, Rags. Skepton Lassie was best, opp. sex, in the exposition show. Five of the children are males, two, females. Mrs. Colverd states that this litter is the first to be born on the Pacific Coast.

‡ ‡ ‡

Two thousand seven hundred dogs have just been shipped by train from Paris to various parts of the front, says the London Chronicle, for the purpose of combatting the plague of rats that has recently troubled the French trenches. Soldiers have been noticed about with useful-looking terriers—small Welsh ones, chiefly—and these were supposed to be mascots. The mystery is now explained. We hear that numbers of ferrets are also being sent to the trenches.

‡ ‡ ‡

Anoakia Kennels has the following matings to its credit: J. W. Castanien's Airedale bitch to King Oorang; H. C. Redwell of Whittier sent his bitch Letty Heart, also, and Bilmer Sunbeam, owned by Ray Taylor of San Francisco, Crewe Bonheur, owned by Chas. Heerman of Stockton, have all been bred to Cypress Cadet.

‡ ‡ ‡

Mr. Albright is on his way to the sunny clime of California, so it is quite likely that he will accept one of the big offers made for Wycollar Boy, that arrived safely at his kennels the other day and with whom the Baughfell owner is very much impressed, considering him the best fox terrier he ever saw, and probably the best terrier he ever laid eyes on, so that it is a pleasure to have him around. He will be, of course, shown at New York, but Mr. Albright will not attend the big show. He also hints that the greatest Airedale pup of the year, Polam Maxim, may shortly find a new home on this side, and several good judges have sent word he is a hummer. Well!

‡ ‡ ‡

Since the first of the year all English dogs must be licensed or rather every person who keeps a dog must be licensed as many times as he or she has a dog. The license there is personal and not on the dog, nor is there any "lumping" it, each individual dog being taxed $1.85—no kennel license or breeder's license as with us, allowing any number of dogs to be kept. Furthermore if one keeps a dog for a friend who has already licensed the dog, one must take out a license to keep that dog. Hounds unentered (under 18 months old), sheep and cattle dogs, and blind men's dogs, are exempt. The Inland Revenue office has no compunctions over making the most of the national love of sport and dogs and even the man who is doing his bit in the trenches must pay for the dog he left behind him, which is a bit tough and the fund "Our Dogs" is getting up to pay these very hard cases, now amounts to over $200.

‡ ‡ ‡

Salt Lake's first dog show in seven years will be held March 2, 3 and 4 at 17 East First South street. The show is being promoted by the Utah State Kennel Club, recently organized with W. Mont Ferry as president. George A. Cranfield, a bench show judge, will handle the details of the show. Cranfield states that the proceeds will be devoted to some charity, such as the Red Cross society or a similar organization.

‡ ‡ ‡

Mrs. Kitty Carlin of London, who arrived in this country recently, bringing a number of high class dogs, states that owing to the war, which has caused a falling off of shows in London, breeding is not being carried on extensively on the other side, and that the dog game in general has been very much curtailed.

‡ ‡ ‡

Mrs. Noble Lovering of Watsonville, has lost by death her English setter, Noble Jack. The dog, which was a blue-ribbon winner at the Panama-Pacific exposition, developed distemper, which ultimately caused its death. Troubles for Mrs. Lovering are coming in bunches. Not only did she lose Noble Jack, but a litter of ten puppies, sired by him, all died but one—victim of distemper.

‡ ‡ ‡

Among passengers on the White Star liner which arrived at New York last week were Mr. and Mrs. Alfred Benjamin and Miss Benjamin. Mr. Benjamin is the president of the Bulldog Club of England, the oldest organization in the dog world. In the early eighties his kennel, at the head of which were the famous champions, Smasher and Britomartis, held an unbeaten record, Britomartis eventually finding her way to America, where she was shown by Colonel Thayer of Boston.

REPORTS OF NORTHERN COUNTIES.

H. D. Stout, Oregon deputy located at Klamath Falls, reported to Deputy Courtright that six or seven years ago he saw seven white-tailed deer in the Warner mountains near the Oregon line. These have not been heard of since. There are a few mule deer in that section.

Most of the Indians in Modoc county are in the southwest quarter. So far as the game laws are concerned, they are very good. Courtright had a little difficulty with them in the early part of his appointment, but since then has had very little difficulty.

Sage hens are very numerous in the vicinity of Straw and to the north of Straw between Clear Lake and Tule Lake. They were particularly abundant in the fall of 1915.

Clear Lake is now so high that there are no tules, the water being backed up into the sage brush country. As a result there is very little satisfactory breeding ground for ducks and geese and breeding birds are scarce. More waterfowl are breeding on Goose Lake than any other of the lakes of Modoc county. Cinnamon teal, green-winged teal, mallards and a few spoonbills are the common varieties nesting.

Black bear have been reported fairly abundant in the western part of the country and there have been 10 or 12 killed, one near Spaulding's Ranch south of Straw. In ordinary years bear make their migration to the Pitt river slopes where acorns can be found.

September 28, 1910, Courtright killed a mule deer, which dressed 332 pounds. It was particularly fat but did not have very large horns, four points on each side.

There are a number of beaver in Williams Creek, emptying into Clear Lake, on the east side; another colony in Bottle Creek and in the streams between Goose Lake and Clear Lake on the north side of the county.

Klamath Falls hunters have not been to the lava beds to the east of Tule Lake for several years.

There are two species of rabbits common in Modoc county, one a large rabbit found out in the open, which turns white during winter months when snow is on the ground. These are particularly abundant in the region between Clear Lake and Tule Lake. There is a smaller rabbit commonly found in the timber, which also turns white during the winter months. It is slightly larger than the cottontail.

NEW GAME LAWS FOR WASHINGTON.

All the county game commissioners and county game wardens of Washington will meet in Spokane February 9 and 10 to organize the Association of County Game Commissioners and Wardens of Washington. The organization will be an amalgamation of the present associations of eastern and western Washington, following the suggestion of the western Washington association which met recently in Seattle.

The west siders decided that more and better results could be obtained with the two sections of the state working in unison on all issues than by the separate association and suggested the matter to A. G. Gray, president of the eastern Washington association. Mr. Gray immediately took the matter up with Secretary Al J. Buzard and he in turn notified members of the east side association.

"One of the matters that will be taken up by the association will be to secure support for the bill that will be introduced in the national house of representatives to set aside forest reserves throughout the country as game preserves," said Mr. Gray. "The plan was first suggested by W. T. Hornaday of the American Game Protective Association. It is a worthy plan and will mean much toward the propogation of game.

"New game laws and amendments to the existing code will be proposed and voted upon so that when bills are presented at the next session of the State Legislature they will have a much better chance to being passed. We aim to keep the visitors entertained every minute of the time they are in Spokane and will be glad to get suggestions from local sportsmen."

State Fish Commissioner L. H. Darwin and State Game Warden R. B. Wales will be present and an invitation has been extended to Governor Lister.

THEY'RE AFTER MR. POSSUM.

When a former resident of the old South several years ago had shipped to him at San Jose seven of the best specimens of the Southern possum he little realized that he was laying the foundation of one of California's most prolific crops.

But this is what happened, according to Ernest Schaeffle of the Fish and Game Commission, for five of the seven possums escaped and have thrived wonderfully in this new possum Eden. Numerous traces of the possum have been found in the vicinity of Alvarado, San Jose, Milpitas and up the peninsula from San Jose as far as San Mateo.

The marvelous crops of possums which California has developed are believed to be partly due to climatic advantages and to the lack of popularity of a possum appetite. The Fish and Game Commission, however, expects to correct this. It hopes to promote the popularity of hunts and revive the fashion of possum dinners among Southerners at their clubs here.

The possum is considered a real menace to the wild animal life of the State, especially to birds. Professor H. C. Bryant of the University of California has been in consultation with the Commission on the best method of extermination to pursue.

'Tis said that society folks down on the peninsular are going to organize hunting parties to get right in the fun. This would naturally help, but the proper way to go about the work would be to interest some of the colored population over in West Oakland. Donate a few sweet potatoes and Mr. Possum would have to look to his laurels to remain in the free and open ways.

HERE ARE THE ALL-STAR TEAMS FOR WEST vs. EAST TRAP SHOOT.

The mythical all-star trap shooting teams, representing the East vs. the West, as carried by the daily newspapers, has aroused a deal of interest and may possibly lead to a match at the Grand American Handicap in St. Louis. In years gone by, experts in the various lines of sporting competitions have dealt at length with all-star combinations. In baseball and football, it has been difficult for the critics to decide on the same players. The same holds good in trap shooting. Fairly representative teams could be selected, however, by taking the Interstate Association averages as a basis of selecting the shooters.

On the high average basis, the papers have not selected the shots standing the highest and it might be of interest for the Breeder and Sportsman to present two teams. The West is represented by the high guns west of the Mississippi and the East all on the other side. If the two following teams could be gathered for a 1000-bird team match, each shooter to take a 100, it would likely result in some lively competition:

EAST			WEST	
Shooter	State	No.	Shooter	State
W. Henderson, Ky.		1	S. A. Huntley,	Nebraska
F. S. Wright, N. Y.		2	F. M. Troeh,	Wash.
A. B. Richardson, Del.		3	Wm. Ridley,	Iowa
W. S. Behm, Penn.		4	D. J. Holland,	Missouri
F. A. Graper, Ills.		5	J. R. Jahn,	Iowa
W. M. Foord, Del.		6	O. N. Ford,	California
C. H. Newcomb, Penn.		7	J. P. White,	So. Dak.
A. Heil, Penn.		8	C. Hummel,	Iowa
G. E. Painter, Penn.		9	W. H. Tolen,	Iowa
J. H. Noel, Tenn.		10	J. W. Bell,	Missouri

FAMOUS FIELD TRIALS EXPERT A VISITOR.

On Monday President A. G. Wilkes, secretary-treasurer S. Christenson, Phil Wand, John W. Considine, J. Walter Scott, Joel S. French, and other members of the Pacific Coast Field Trials' Club had the pleasure of entertaining Fred N. Stephenson of Chicago, President of the United States Field Trials' Club, and his friend, Frederick Johnson, at luncheon. Mr. Stephenson expressed himself as pleased to find so much interest and enthusiasm over bird dogs out here on the Coast and thoroughly enjoyed the field trials gathering.

The California enthusiasts were just as pleased to have so famous a field trials expert in their midst. "I consider Mr. Stephenson one of the greatest field trials men in the country," said Mr. Wilkes. "He has done much to further the best interests of the sport. For years he has been interesting himself in field trials and has a fund of knowledge on the sport."

During the course of the luncheon an invitation was extended to Mr. Stephenson to be honorary judge at the occasion of the next Pacific Coast Field Trials at Bakersfield. The distinguished visitor replied that nothing would please him more than to take in the event in California but he could not give a definite promise because he could not tell at this time if he could leave his business in Chicago along next December when it is planned to hold the trials.

Mr. Stephenson had the high honor of winning the National Championship in 1915 with La Besita. He was disappointed in not being able to start his great Llewellin setter bitch in the National Championship and Free-For-All Championship stakes this season but stated that she is heavy in whelp. La Besita had been going great guns and prospects were bright for duplicating the great record of that other famous Llewellin bitch, Champion Sioux, in annexing the National Championship the second time.

Sportsmen's Row

The members of the San Jose Blue Rock Club are bemoaning the fact that on February 2nd, Mrs. Ada Schilling, the world's amateur lady trap shooter, moved to Portland, Ore., to make her permanent home. Mrs. Schilling has made many friends while a member of the San Jose organization who regret seeing her leave their midst. Last year Mrs. Schilling broke 8707 rocks out of 2430 shots, the highest score ever made any place in the world by a lady expert.

* * * *

Dr. A. M. Barker and George Anderson both have their second sight and expect to make the biggest average in 1916. Both are veterans at the traps with thirty years experience at their backs and they are still able to hold their own with the youngsters.

* * * *

The Breeder and Sportsman invites subscribers and their friends to send in items that might be of interest to the rod, gun and kennel fraternity.

* * * *

Wonder if Harry Ogilvie's buying a Dodge car has anything to do with the fact that blue rocks do not dodge him nowadays?

* * * *

Judging from the number of ducks that Charles Huber sent from Newman to his friends in San Francisco this season he will need little practice for the rocks.

* * * *

Messrs. Baumgartner, Arques and Mackagneu, the new shooters who have joined the San Jose Blue Rock Club, will bear watching. They have been making the smoke fly for fair.

* * * *

Don't overlook C. H. Nash this season. He don't weigh much but predictions are made that very few goose eggs will be seen in his string in 1916.

* * * *

D. B. McDonald had some good sport at Alameda on the north end of the bay early in the season. He shot seven limits in nine shoots, which argues well for marksmanship as well as plenty of birds. After the storm came, however, Mr. McDonald did not enjoy such good sport.

* * * *

The Raisin City Gun Club in the San Joaquin finished the season with much pleasure to the members. The club shot every Wednesday and Sunday during the season and the limits of ducks bagged made up a long list.

* * * *

A. W. Bruner has announced that Frank Gotch, retired heavyweight wrestling title holder of the world, who is visiting Los Angeles, will do a little shooting at the Vernon Gun Club.

* * * *

Heine Pfirmann, Jr., the Pacific Coast champion trap shooter, reports that Jim Clark, last year's winner in the Grand American Handicap trapshooting tournament, is visiting Los Angeles. He also promises to be on hand for the shooting at the Vernon Gun Club.

* * * *

Southern California trout fishermen have had a scare through the heavy rains of the last two weeks, as the storms will play havoc with the young fish in most of the streams and ruin some of the trout planting.

* * * *

Sportsmen of Folsom and persons connected with the Natomas enterprises in that county have incorporated a club to be known as the Folsom-Natomas Rod and Gun Club, with a principal place of business in Folsom. The directors are John Curle, Frank Gomes, Pulius Jacobs, William McKean and Frank Fritz all of Folsom, and Daniel McHugh and James Phelan of Natomas. Fishing and hunting for sport in the waters of the state are the only purposes of the club, which is a non-profit institution.

* * * *

Plans have been completed by the State Fish and Game Commission for a new hatchery on Fort Seward Creek, about four miles south of Fort Seward, in Humboldt county. The new hatchery will replace the one now in operation on Price Creek, near Fortuna. The Commission has purchased outright forty acres for the hatchery, and will devote it entirely to steelhead trout and salmon.

* * * *

Allan T. Baum, president of the Pacific Coast Baseball League, is proudly showing a 410 gauge shotgun, a present from Phil Beckeart. The gun is certainly a beauty and Prexy Baum is anxiously awaiting the opportunity to put it to use.

* * * *

Harry B. Smith, sporting editor of the San Francisco Chronicle, is riding around town in a new Buick roadster. Harry is going to make use of the machine in the fall to carry him to Tehama county, where he owns a hunting camp along with a number of friends.

* * * *

Jack Fanning, remembered by the old guard as a member of the Olympic Club trapshooting squad back in the nineties, is doing nicely in the East. He is located at New Jersey and officiates as a coach. He recently assisted the professional baseball team in its tour.

Charlie Shaw, an old-time marksman, dropped in for a visit with the shooters and greeted old acquaintances at the Copper Kettle Club. Charlie is at Newark and had a number of his friends down this season for some good duck shooting.

* * * *

Louis Gotthelf got a couple of big striped bass on Sunday. One weighed 18 pounds and another fifteen. There were several other big catches on the San Antonio. Looks like the striped bass brigade will get in some sport now that the weather has cleared.

NEW BLUE ROCK SHOOTING CLUBS.

A couple of new blue rock clubs have appeared on the horizon to get in the sport when the trapshooting season opens this month. The members of the Alameda Lodge of Elks have taken a fancy to the "Sport Alluring" and have taken the first steps to put a club in the field. Among the organizers are Harold Durney, Henry Meinecke, R. B. Valleau, Henry Martine and F. J. Croll. All of them are experienced hunters and they have heard so much about the recreation and sport secured in busting blue rocks that they anticipate a deal of pleasure. It is planned to secure a grounds in Alameda and hold monthly tournaments.

The Biggs Blue Rock Club of Biggs, California, has been organized with L. W. Doty president, Leon Brink vice-president, Alvin Harry secretary, and J. Hanlon treasurer. Enthusiasm has been aroused and the organization expects to boast of a big membership.

The Golden Gate Club, which has been prospering on a favorable location in West Alameda for the past couple of years, will have to look for a new site. President Bill Price and Pete Ashcroft visited the grounds on Tuesday and found that a dredger is at work to cut a canal right through the club's grounds. It means finding a new grounds but it is thought that a location can be secured right across the railroad tracks. A meeting of the members has been called for the coming week and ways and means will be discussed to get everything in shape to start the season at an early date. It was hoped that the big opening event could be pulled off on Washington's Birthday.

The Bay View Club in East Alameda is polishing up to get busy soon. The members are anxious to get to the traps once more and the club is looking for a banner season.

Applications for the Nevada-California Association shoot continue to reach secretary-treasurer Clarence A. Haight. So far the San Jose Blue Rock Club and the Vernon Gun Club have filed applications to hold the shooting classic. It is understood that Fresno Club is also considering bidding for the tourney. Clubs contemplating holding this big event should file their applications not later than February 25 for the association intends to make the award on March 5th. The clubs belonging to the association are sending in their dues and prospects are that the Nevada-California body will continue as a class A trapshooting organization.

Nothing new has been learned on the Pacific Coast Handicap, which is one of the five subsidiary shoots of the Interstate Association. Announcement has been made that the event will be held probably in August but no award will be made until all the clubs have had a chance of filing their applications. The Portland Club has been reported as in the field to secure the Pacific Coast Handicap.

With the duck season a thing of the past the boys are polishing up their shooting irons in anticipation of the opening of the trap season. The gunsmiths are doing a big business in getting the trusty irons in shape for some sharp shooting.

WAR ON AGAINST CARP.

Carp may be all right in their place, but general sporting opinion is growing that the war zone is that place, states the Los Angeles Times.

Among recent contributors to the literature of "Carp in California" is the popular and enthusiastic Santa Barbara sportsman, Reginald G. Fernald, who, in explaining the reasons for asking permission of Fish and Game Commissioner Connell to liberate six seals in Guadelupe Lake, south of Santa Maria, on the Coast Line, goes pretty fully into the case of People of the State of California vs. Carp.

Mr. Feranld appears for the plaintiffs and complains as follows:

"Years ago Guadelupe Lake was covered with duck-weed. It was one of the very best canvasback lakes in California. One of the owners planted some carp, and they, of course, increased rapidly. So rapidly, in fact, that they ate up everything. All the natural food for the ducks has disappeared. We tried repeatedly to plant weed and other feed, but to no effect, as the carp would destroy it before it got started.

"About eight years ago we induced the Fish and Game Commission to plant some bass in the lake, thinking the bass would destroy the carp. They were put in the sugar company's lake, and there has never been a bass caught or seen in our lake. So I thought if the carp were destroyed the duck feed could be planted again, and some bass put in with some assurance of increase. Hence the application for permit."

Abas le carp! The man who first imported these German water hogs did about as good a job as George Peabody when he wished—aye, inflicted—the English sparrow upon the nation!

Such things are legally impossible nowadays. The Fish and Game Comission has drastic laws drafted not only to prevent importing dangerous or experimental species, but even to prevent diseased fish or game being brought in to spread infection among our native birds.

GAME PROTECTIVE ASSOCIATION TO MEET.

The Department of Game Breeding and Preserving of the American Game Protective Association announces the second national conference on game breeding and preserving.

This will be held in New York City Monday and Tuesday, March 6 and 7, at the Waldorf-Astoria Hotel, and there will be a dinner with interesting moving pictures on the evening of March 6.

The sessions will be presided over by Mr. Frederic C. Walcott, chairman of the Department, and among the well-known men who have been asked to take part in the program are: Senator George P. McLean, Connecticut; the Hon. Henry S. Graves, United States Forester; E. C. Hinshaw, Chief Game Warden, Iowa; George D. Pratt, Conservation Commissioner, New York; Samuel Evans of St. Charles, Illinois; John M. Phillips of Pittsburg, Dr. Arthur A. Allen of Cornell University and Norman McClintock, the well known naturalist.

There will be an especially notable attendance of the men who are making the United States worth while as a game breeding country. Among these will be Messrs. Duncan Dunn, Harry T. Rogers, Neil Clark, Adam Scott, A. G. MacVicar, Arthur M. Barnes and Amos E. George.

There will be a dinner on Monday night, March 6, and moving pictures of wild life will be a conspicuous feature of the evening entertainment.

The first national conference on game breeding and preserving, held during March of last year, under the auspices of the American Game Protective Association, was an unqualified success. This year promises to mark the largest gathering of those interested in this very important branch of wild life conservation work that has ever taken place in the history of the country.

Every one interested in game breeding and in conservation generally is invited to attend without further notice. Tickets for the dinner on Monday night can be secured by addressing William B. Boulton, Treasurer, 2273 Woolworth Building, New York City, and enclosing a check at the rate of $5 for each reservation wanted.

At the various sessions of the conference, the latest methods of breeding such well-known species as ruffed grouse, quail, ring-neck pheasants, ducks, deer, wild turkeys and other species will be discussed by the leading experts.

HOW ABOUT THIS, BILL ELLIS?

Bill Ellis of E. C. fame, who is making Hugh Poston hustle, has one more obstacle in his road. Bill says that when shooting in a fifty-bird match it was always easy going up to the 49th bird. Then he had to take a long breath and choke the lump down—the rest was a cinch, fifty straight. Now, Bill has read Lester German's account of how he missed one in five hundred. Lester states it was caused by a mental hazard. Bill is worried as to whether he should use a spoon or a knife to eat it and if it will stay down when put.

WILD GEESE USED AS DECOYS.

S. C. Churchman of Rio Vista claims the most novel collection of geese decoys in the state, and according to J. L. Emight and H. E. Meyers of Sacramento, who were hunting with him on his private grounds at the end of the season, it is the most effective. Both the Sacramento sportsmen secured limit bags through the performance of the decoys.

The decoys are none other than wild geese, which have been so tamed by Churchman that they will not leave his grounds. At the camp they are kept in a large wire corral, and when wanted for decoys are transported to the hunting rounds on a cart. There part of them are retained in the corral and the others turned loose on the feeding grounds.

As soon as the wild brethren appear the decoys send out shrill cries of welcome, and when the flock draws sufficiently close grow silent. Then it only remains for the sportsmen to let fly.

Churchman has been collecting the flock for the last three years. Slightly wounded birds have been captured and cared for until they recovered. Then they are kept in the wire corral until thoroughly tamed. When the shooting is over for the day the birds which have been released are herded back into the corral, put on the cart and taken home.

The flock was increased the day of the hunt, two slightly wounded birds being captured.—Sacramento Union.

So abundant are elk becoming in several parts of California that it will be proper to allow some hunting within the next few years, according to Director Barton W. Evermann of the California Academy of Sciences, which is aiding in the distribution of the animals from the Miller & Lux ranch at Buttonwillow. Reports received show that all of the shipments during 1914 were successful and that the herds show every indication of a rapid increase in numbers.—Chico Record.

DR. PACKARD WINS AT VERNON.

Stanton A. Bruner is "off" No. 13 for life. Bruner won two consecutive legs on Billy Wilshire's trophy, the eleventh and twelfth, and when it comes time for the thirteenth event "Old John Grippe" stares him in the face and accompanies him to the traps and he falls down something awful, breaking only forty-five out of fifty.

This all happened Sunday when the thirteenth fifty-bird distance handicap competition for the W. H. Wilshire trophy and four silver loving cups of the Vernon Gun Club was held at the Vernon traps.

The thirteenth win was won in reality by Bill Wilshire himself, but Wilshire announced himself out of the competition, and the next highest gun won the trophy. The winner was no other than Dr. Packard, shooting from twenty yards. He broke forty-seven birds out of the half century. His win Sunday made his second leg on the trophy. He and Bruner are the only two so far to possess two wins on the prize. Wilshire's score was a forty-eight.

For the first time in about six weeks the club's program was blessed with sunshine, although a cold north wind blew across the traps, making shooting rather difficult at that. However, remarkable scores were made by a number of shooters, showing the stellar worth of the targets.

Several visiting shooters were out to see the fun on Sunday. They declared they came out purposely to see Bruner fall down on his third attempt at the prize. They went home satisfied. Bruner didn't. The visitors were Jack Coombs and J. C. Fanashon, the latter being a gunner of quite a reputation back in Minneapolis. He broke forty-one in the prize shoot and 164 out of 175 at practice.

One Frank Mellus, who recently dropped out of the trapshooting game and turned over the family reputation to his brother Lou, who shouldered it with marvelous success, found the sport too alluring and was out and actually broke another ninety-nine.

Three small-bore champs were out Sunday to see how many birds they could shatter with their 20 and 28-gauge guns. Ed Hedderly turned out the best gunner of the squad, breaking ninety-one out of the century thrown with a 20-gauge gun. Dr. Fitzgerald used a 28-gauge and shattered eighteen out of twenty-five. Pete Peterson also used a 28-gauge, but broke only twelve birds out of twenty-five.

Class shooting governed the score on the silver cup event. Packard, with his score of forty-seven out of fifty in the Wilshire event, naturally copped a win on the cup in the A aggregation. Bill Pugh won in Class B, Wilshire in C, and Manderville in D.

The scores are as follows:

Names—	Yds. Hdp.	Cup scores. Thr.	Bke.	Practice. Thr.	Bke.
R. L. Hall	20	50	44	200	185
J. C. Fanashon	19	50	41	175	164

SIBERIAN DOGS SAVE MOVING PICTURE ACTORS.

Sixteen champion Siberian sledge dogs, taken into Bear Valley to give Alaskan color to a Vitagraph picture, have saved the lives of three women and twelve men who were snowbound in the San Bernardino mountains.

Nell Shipman, authoress, scenario writer and leading woman of the "God's Country and the Woman" story which was being enacted in the snowdrifts of Bear Valley, arrived in Los Angeles with other members of the company. They had undergone an unusually trying experience. She said:

"If it had not been for the dogs we never would have escaped death in the snows. We had been in the camp, 70 miles from Victorville, two weeks, this last trip. We had just gone through a terrific snowstorm. One pass out was entirely closed. The closing of the other pass would have meant that we would have been snowed in until next spring. We had provisions for just a little over a week. Then the hurricane came up and we had to make the rushing 'mush' out or be lost. The dogs brought us out."

Rolin Sturgeon, producing manager of the Western Vitagraph; William Duncan, leading man; George Holt, heavy man; George Kunkland, character man; William Bainridge, character man, Philo Goodfriend, assistant director; Harry Harris, camera man, and William Babbie, Chris Enriquez and Edgar Keller also were with the party.

Producer Sturgeon, minimizing as much as possible the danger he and his companions went through, said:

"The menace lay in the necessity of the company delaying an hour or two to start out. That would have meant nobody could get to us and we could not get out. The proposition we faced then was to get from the cabins to the snowline, where we were to meet a rescuing party from Victorville.

"We loaded the girls on the log sledges, using skis and snowshoes ourselves. It was 70 miles to Victorville. We left camp early Friday morning. Some time that day we met the rescue party, who were coming in with a great snow shovel improvised out of three giant motor trucks. We loaded our baggage and extra trappings on them and by Friday night we had arrived at Victorville."

John Johnson, owner of the dog team that carried the company to safety, had earlier in the week driven his dogs and the sledge from the camp to the snow line to carry news of the photoplayers' plight to the world. He had arranged for the rescuers to meet the company Saturday.

SOME FIGURES ON DUCK SEASON.

The open season for ducks closed down Monday, as per schedule, and the hunters will talk it over for many a day to come. Fact is, it was the poorest season for limit bags on record. Figures kept at the local office of the Fish and Game Commission indicate that less than fifty percent wild fowl was killed this season than last. As reviewed before,, weather conditions interfered materially with the sport and the failure of the northern flight of birds to arrive is still the source of much speculation. The regulars cannot understand why the northern birds did not arrive per custom of years back.

The commission keeps a record on the number of ducks shipped with the express companies and the figures fell off at an alarming rate. The birds reported by this means were:

5,289 for last 15 days, October
7,582 for November.
7,212 for December.
4,000 (estimate) for January.

24,083 total estimate.

In comparison with these figures the record in previous years runs:

85,000 for 1913-14 season.
125,000 for 1912-13 season.
225,000 for 1911-12 season.

Of course, the records do not include the birds that were carried in, which total many more than those shipped, but it gives an idea of how the shooting fell off. January was especially a disastrous month for bagging game. The storms and rain scattered the birds far and wide and the local hunters who usually have their good sport about that time had practically no shooting.

Game experts take an optimistic view of the decrease in the number of birds bagged. They say that it means more game for next season. It may be true but it is also a matter of record that less ducks have been killed as each year passed and it may indicate that ducks are rapidly decreasing in numbers.

MARKET HUNTERS WILL SOON BE GONE.

J. S. Hunter, assistant executive officer of the Fish and Game Commission, gives out the cheering news that the presence of market hunters in the field to slaughter wild game will soon be a thing of the past. Records kept last season showed that there were only about twenty-five engaged in the business of killing game for the market and they were hampered so by law regulations and the watch placed on them by deputies that they found it very poor pay. Many of them dropped out before the season closed and the indications are that not half of them will be in the field when the season opens again.

"Three things have worked against the market hunter," explains Mr. Hunter. "In the first place, they have to contend with the game deputies who see that they do not bag more than the limit of twenty-five in a day; then, a record is made of their shipments and this enables us to keep a pretty close check on them, and thirdly and most important, they are up against the problem of getting their money from the parties to whom they ship.

"Fortunately, the Commission has suitable laws at its back to stamp out the evil of slaughtering game. The right to search was the biggest thing permitting us to carry out the law. The abolishing of animal blinds was another big help. In the days gone by the market hunters used to work a system that gave the birds little or no chance. A trained horse or cow was employed as a blind. The professionals worked in threes usually and as one acted as a lookout for deputies and game wardens with a field glass, the other two would sneak up on a flock of ducks behind their blind and when within range they would blaze away.

"The market hunters used a four-barrel gun or a nine-shot automatic and they gave the ducks the full benefit of these weapons. It is a matter of record that the slaughter was terrible. Frequently as high as 150 to 200 ducks were killed on the one raid. It is very pleasing that we are stopping this wholesale slaughter. We kept just as sharp a lookout as before but if the market hunters do evade us they are perplexed to do the shipping and then to receive their money. In the course of time I do not believe there will be any market hunters."

All of which is good news. It means more game for the boys who love the sport of hunting for sport's sake alone.

SEATTLE TRAP SHOOTERS MEET.

Large attendance and great enthusiasm was manifested at the annual meeting of the Seattle Trapshooters' Association last week. Through the courtesy of C. E. McKelvey, spacious rooms in the Washington Annex were placed at the service of the association.

After hearing reports of last year's business, election of officers for the ensuing year was declared in order, which resulted in the selection of C. E. McKelvey as president; Ralph Kinzer, treasurer, and W. B. Taft, secretary. Plans for next season were then discussed, the club deciding to start the actual season on Sunday, February 13, and hold weekly contests throughout the year. As the club was awarded the state shoot for the year 1916, it was decided to hold same during the month of May.

The secretary was instructed to wire the Interstate Association the club's bid for the Pacific Coast Handicap, if same has not yet been awarded. It is understood that both Portland and Spokane are also bidding for this event.

Starting a membership campaign, twelve new shooters were enrolled at this meeting, and to further this work it was decided to remit all initiation fees until May 1. From the interest shown it is confidently expected to add over one hundred new members within the next sixty days.

A committee was appointed and instructed to make extensive improvements in the club grounds at Harbor Island.

FINED FOR SHOOTING QUAIL.

The minimum fine of $25 was inflicted on Frederick A. Bass by Justice of the Peace Clarke Howard of Placerville, after he had pleaded guilty to a complaint sworn out by Deputy Game Warden Euell Gray, charging him with killing mountain quail out of season.

It was also brought out at the trial that the defendant was hunting without a license. He said that he had not purchased a hunting license because he rarely hunted. The game warden was above town for the purpose of feeding the starving quail in that vicinity. As he approached Whiterock canyon, near where Bass resides, he found tracks in the snow, and shortly afterwards heard the firing of a shotgun. He found that quail had been killed in the several places where the snow had melted and they had sought refuge. He followed the tracks to the Bass home. Bass admitted killing the birds and by way of explanation stated that he did not know the season was closed.

* * * *

The beginning of a series of bird days declared by Governor Boyle's proclamation asking residents of Nevada to feed their feathered friends a little grain while the snow is deep on the ground, started last week. The governor said the storm had thrown the birds on the mercy and bounty of man, as it buried their natural food.

SNAKE EXPERT ANGLER.

That some snakes can catch fish as well as old anglers was demonstrated recently on the ranch of E. D. Osborne, near here, says the Seattle Post-Intelligencer.

A small spring creek runs through the pasture on the Osborne ranch, large enough for fish to play in. Here a large water snake was seen to grab a rainbow trout by the head and make for tall grass.

Osborne killed the snake and threw the live fish back into the pool. The fish was about twelve inches in length.

HERE'S CHAMPION SKUNK HUNTER.

A. J. Smith of San Jacinto is the champion skunk hunter of Glenn county. Others may claim that title, but they cannot present figures that compare with those of Smith of San Jacinto. This week he dispatched 15 of the fur-bearing animals and for the full week his score was 27. The recent high water has made skunk killing an easy matter. Forced out of their holes by the floods, the skunks sit defenseless on dry patches of ground. Smith, armed with a long pole with an iron head, approaches a skunk and when near enough bowls him over with one blow. Skunk furs are bringing high prices this year.

* * * *

Thousandsof robins in large flocks have made their appearance at Los Banos since the heavy snows. It is believed they came from the valleys on the other side of the coast mountains. They are unusually large and beautiful, and appear delighted with the fresh green carpet of their new home. A number of small boys have been killing the birds, contrary to the provisions of the game laws.

* * * *

Raymond Benjamin of San Francisco, deputy attorney general, is now a full-fledged member of the Last Chance Gun Club. He has also been added to the legal staff of the club, which means that the millionaires' club has more legal talent opposing its litigation with the Last Chance sports. Benjamin won a similar case for some friend in Napa, his former home.

THE FARM

HOW TO KILL HOGS.

A well selected butchering outfit and a convenient place for working are important considerations at hog killing time. To aid in this work demonstration experts of the department of agriculture suggest as a handy and complete kit the following: Two butcher knives, two bell or candlestick scrapers, a meat saw and a sharpening steel. The meat saw is for sawing down the backbone and cutting up the carcass. The candlestick scrapers have detachable handles and are used to remove the hair and scurf from the hogs. A long waterproof apron which will protect the clothing can be had at a small cost.

A 24- to 36-hour fast, plenty of water, careful handling and rest before slaughter are all important in securing meat in the best condition for use, either fresh or for curing purposes. Food in the stomach decomposes very rapidly after slaughter, and where the dressing is slow the gases generated often affect the flavor of the meat. Water should be given freely up to the time of slaughter, as it keeps the temperature normal. It is highly important that the animals be not excited in any way sufficiently to raise the temperature of the body. If the animal becomes heated it is better to allow it to rest over night before killing than to risk spoiling the meat. It is also essential that the bog be carefully handled so as not to bruise the body.

It is customary on the farm to stun hogs before sticking them, although in some localities this is not done. Another method is by shooting the hog through the head with a rifle, although extraordinary care should be exercised in using a rifle around farm buildings. After stunning by a heavy blow on the center of the forehead immediately above the eyes with a poleax the eight inch straight bladed knife is inserted into the hog's throat in the under portion of the neck, to a point just in front of the chest cavity, but not into this cavity. The knife is given a twist and sideward motion to sever the blood vessels and allow the blood to flow. By laying the hog on one side and elevating the ham end the blood will gravitate freely.

A barrel is the receptacle commonly used for scalding. If it is set at the proper slant, with the open end against a table or platform of the proper height and the bottom securely fastened there is little danger of accident. A strong table built for the purpose would be a very desirable thing on which to work, although it is not absolutely necessary. A box often serves very well. The water for scalding should be heated to the boiling point. This will allow for a reduction of temperature when the water is put into a cold barrel, the best temperature for scalding the hogs being from 145 to 150 degrees. Be careful not to have the water so hot as to cook the skin of the hog. If the water is too hot the hair is likely to set. A small shovelful of hard wood ashes added to the water aids materially in removing the scurf from the body, though it has no effect in loosening the hair. A lump of lime, a handful of soap, a little pine tar or a tablespoonful of concentrated lye has the same effect.

The hog should not be scalded before life is extinct or the blood vessels near the surface of the skin will be cooked, giving a reddish tinge to the carcass. While being scalded the hog should be moved constantly to avoid cooking the skin. Occasionally it should be drawn out of the water to air, when the hair may be tried. As soon as the hair and scurf slip easily from the surface, scalding is complete. If it is suspected that the water is too hot, scald the hind end of the hog first. If the water is too hot and you overscald the head, you will be adding to the trouble of scraping the part most difficult to clean. When the water is about right begin by scalding the head. The scraping and cleaning of the hog's skin should be done as soon as possible after removal of the animal from the scalding vat. Scraping a cold hog is a difficult if not an impossible task. Where it is necessary to reverse the position of the hog in the barrel to complete scalding the portion scalded should be cleaned before attempting to scald the other end of the hog.

When the hair starts readily remove the animal from the water and begin scraping. The bell scraper should be used with a long sweeping movement over the sides and ends while the hog is still hot. The head and feet should be cleaned first, as they cool quickly. Pull the ears through the hands to remove the bulk of the hair. Grasp with the hands the lower portions of the legs and twist to assist in cleaning them. Use the candlestick scraper for removing the skin and scurf from the flat surfaces and as much as possible from the other parts and finish the cleaning of the entire carcass, removing all hair, scurf, and dirt by rinsing with hot water and shaving with the large knife.

Cut the skin at the side of the tendons below the hock to expose the tendons so that a gambrel stick may be inserted. The next step is to hang the hog by his hind legs by means of the gambrel stick high enough so that his head clears the ground. Wash down with hot water, shave over any unfinished patches and wash the entire carcass again to remove all loose hair and scurf. Occasionally a hog is killed that is too large to scald in a barrel. If it is covered thickly with blankets or with sacks containing a little bran and hot water poured over it the hair will be loosened readily.

In removing the entrails first split the hog between the hind legs, separating the bones with the knife. This can easily be done if the cut is made directly through the union of bones between the hams. Run the knift down the center of the belly, shielding the point with the fingers of the left hand and guiding it with the right. There is little danger of cutting the intestines in this way. Split the breastbone with the knife or an ax and cut down through the sticking place to the chin. Cut around the rectum and pull it down until the kidneys are reached, using the knife when necessary to sever the cords attaching it to the bed. Remove the sexuar organ, then cut across the artery running down the backbone, cut around the diaphragm (skirt(and remove the intestines, stomach and pluck, that is, heart, liver and lungs, grasping the mass of organs near the union to the backbone and diaphragm, sever attachments with a knife where necessary. In this operation the windpipe down to the head should be removed with the pluck.

Do not disturb the kidneys or the leaf fat in carcasses to be shipped, except in warm weather, when the leaf may be removed to allow quicker and more thorough cooling. If the hog is to be cut up on the farm and not intended for shipment in carcass form, it is advisable to loosen the leaf fat from the abdominal wall, allowing it to remain attached to the carcass at the ham end. Open the jaw and insert a small block to allow free drainage, then wash out all blood with cold water and sponge out with a coarse cloth.

SCIENTIFIC FACTS AND HORSE SHOEING.

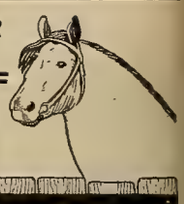
Rock Valley, Iowa, Jan. 14, 1916.

Mr. Louis Peterson,
Santa Ana, Cal.

Dear Sir:—

Your book on scientific facts, how to shoe speedy horses, is very interesting to one who has been in the game.

I think every man who follows the fast horse business would profit by reading your book, and following the suggestion outlined in same. From past experience in the business I know the shoeing is very essential in order to get the speed that's in the horse. I never had a man who did this line of work for me that I had the confidence in, or got results like the shoeing you did. If I were going back in the game again I would want the man who did my work to read up and study the many good points suggested in your book, the title of which is Facts and Scientific Way of How to Shoe Fast Horses. Yours truly,



D. J. SCANLAN.

The booklet is put together in plain, forceful, understandable language. Price, $1.50. For sale by the author,

LOUIS PETERSON,
Santa Ana, Cal.

DATE OF PUBLIC HEARING CHANGED.

The hearing on the question whether single hams and single sides of bacon which are wrapped or covered with paper, cloth, or gelatin, are "in package form," which is to be held in the Bureau of Chemistry, 216 Thirteenth street S.W., Washington, D. C., and which was tentatively set for February 2, 1916, at 2 p. m., has been postponed. It is now proposed to hold this hearing on Wednesday, March 8, 1916, at the same place and at the same hour.

PERCHERON STALLION WANTED.

Will buy, lease or trade. Must be blocky and registered.

J. H. NELSON,
Box 361, Selma, Cal.

FOR SALE—Black McKinney stallion and mare—brother and sister—7 and 8 years old. Standard and Registered. Both converted to high class gaited saddle horses—single foot, running walk, etc. Lady can ride; perfectly sound. Make excellent cross with any highly bred stock. They are both ribbon winners in show ring. Can be seen at San Francisco Riding School, 701 Seventh Ave. Phone Pacific 1655. OSCAR ROMANDER.

FOR SALE.

BEST POLICY 42378, one of the best bred horses in the world. Handsome bay horse, small star in forehead, left hind pastern and left fore heel white. Has size, heavy boned, stylish, pure gaited trotter, sound, and a splendid individual in every respect. Best Policy is by Allerton 5128, dam Exine 2:18¼ by Expedition, next dam Euxine by Axtell, next dam Russia by Harold 413, next dam Miss Russell, dam of Maud S., etc. Best Policy has trotted a mile on the Hanford half mile track in 2:12. He is ten years old and with little training would make a good game race horse, and ninety percent of his colts are trotters. He will be sold at a great sacrifice. For price and further particulars address

BREEDER & SPORTSMAN,
P. O. Box 447, San Francisco, Cal.

FOR SALE.

New "Ideal McMurray" light track cart for matinees, workouts, speeding and jogging. First-class, down to date cart, weight 45 to 50 pounds. Great strength and carrying power, absolute freedom of any horse motion. Constructed from the best second growth white hickory. Best guaranteed grade of pneumatic tires, handsomely finished in rich carmine or royal blue, with brass screen dash, detachable, and accessories consisting of serviceable foot pump, complete tool and repair kit, wrenches, oil can, etc., etc. Weight crated 90 pounds. Brand new and will be shipped to any address. For price address:

F. W. KELLEY,
BREEDER AND SPORTSMAN.

HIGH-CLASS TROTTING BRED COLTS FOR SALE.

No. 1. Three-year-old filly sired by All Style, dam Dr. Hicks. This filly is registered.

No. 2. Two-year-old colt, full brother to the above.

No. 3. Two-year-old filly sired by Dan Logan, dam a Wilkes mare who was a great natural pacer but unfortunately was crippled by a barbed wire accident as a yearling and was never worked.

The All Styles are large, strong built, with all the style of their sire, perfect in action, and all three of the above colts should make race horses second to none. The Dan Logan filly is perfectly gentle to handle and drive and is a high-class filly in every respect. Apply to or address.

BEAUTIFUL BELVEDERE

LOTS FOR SALE

CORINTHIAN ISLAND Subdivision to Belvedere is the most beautiful spot on the shores of San Francisco Bay for a suburban home. It commands an extensive view of the City of San Francisco, Alcatraz and Angel Islands, Raccoon Straits, San Francisco Bay, Richardson's Bay, the Berkeley shore, beautiful Belvedere and Mt. Tamalpais. It is in Marin County, directly opposite San Francisco, and forms the eastern shore of Belvedere cove. It has a naturally terraced, sunny, western slope that is well adapted for many choice residence sites, every one affording most picturesque views of the bay and mountain. It is protected from the prevailing western trade winds in summer by Belvedere Island, and from the southerly storms in winter by Angel Island. The soil is fertile and part of the island is well wooded.

It is less subject to fog than any other place near San Francisco. The summer fog, as it rolls in from the ocean, splits on the western slope of Sausalito, part of it flowing in a line with Angel Island towards the Berkeley shore, and part of it along the southern slope of Mt. Tamalpais, leaving Belvedere, Corinthian Island and Raccoon Straits in the bright sunlight, while the fog banks can be seen as a white wall both to the north and the south.

There is very little available land about the shores of San Francisco Bay that is desirable for homes, especially for those who love boating and kindred sports. The Alameda and Contra Costa shores of the bay are the lee shores and receive the full brunt of the boisterous trade winds which lash the shoal waters near the land into muddy waves, making boating both unpleasant and dangerous. To the north of the city and in Marin County the land from Sausalito to the entrance of the bay is a Government reservation and will never be placed on the market. The shores of Richardson's Bay are not at present convenient to boat service and, aside from Belvedere and Corinthian Island, there is little or no land near any ferry landing that possesses the natural advantages, improvements and possibilities that are offered on Corinthian Island. Concrete roads, pure water, telephone service and electric light wires are already installed. It is only ten minutes' walk from any point on the property to Tiburon boats, and but forty-three minutes' ride to the foot of Market Street.

On the point of Corinthian Island the Corinthian Yacht Club has had its home for many years, and on any summer day the white sails of its numerous fleet add to the charming scene, as the trim yachts glide about the cove. Excellent fishing of all kinds for bay fish, including salmon, the gamey striped bass, rock fish and the toothsome silver smelt, is to be had in the cove. There is probably no spot so accessible and in such close proximity to any large city in the world that offers the attractions of climate, magnificent scenery, fishing and boating as will here be found.

MANAGEMENT OF THE BREEDING HERD.

We have now come to the point in this series of articles where it is necessary to consider the general management of the breeding herd. In the first place, the nearer we can follow natural conditions the better. Plenty of feed and plenty of exercise are essentials.

Nothing beats good grass in its season, and the more the grass season can be proolnged the better off the cattle will be. Cattle are simply machines with which to manufacture the products of the farm into marketable material, so we want them to consume what we grow on the farm and give us in return a product from which we can realize the most profit. In the case of the purebred herd the profit comes in the form of the calves produced, and the herd must be handled with this end in view; if the calves are not of such quality as to be in demand for breeders or are not produced in sufficient numbers to be remunerative in the grand summing up, then our whole venture is a financial failure. And these very things may be easily thwarted if we defy the laws of nature.

Our plans should be so laid that an abundant supply of grass may be constantly on hand. To be sure there will be times when we cannot ge it, but it should be there just the same. Pastures should never be overlooked. All purebred cattle farms should have some permanent pasture. In most sections of the United States bluegrass is the foundation of all permanent pastures and is available at most times of the year. A liberal growth in the fall means something for the cattle to pick at during the frozen days of winter; it also insures a much earlier spring crop. Grass for the cows means milk for the calves; both are nature's feed and nothing can beat either of them.

But we must have something more than grass, as there will be winter weather to reckon with. Good corn silage is as nearly a perfect substitute for nature's feed as we can have. And there is also a time during the hot summer months when silage is sorely needed. An August silo is a good thing to have. Do not have it too large, but have it well filled, and if you do not need it this year it will keep until next. But bluegrass pastures well manured and with plenty of shade make the ideal summer feeding ground for purebred cattle.

Shelter must be provided for winter, yet cattle in good flesh will stand a lot of cold when the weather is clear or not stormy and are really the better for doing so. But of course they should be protected from rain and snow, as hte chill occasioned by wet and cold combined is to be avoided at all times. They usually should be stabled at night, but unless the weather is extremely cold or stormy they are much better turned out on the bluegrass during the day. This of course does not apply to young calves nor to very thin cows, if there are such, but to breeding herds under average conditions. Exercise and fresh air are essential to the best health and the best breeding condition of the herd. Close confinement in poorly ventilated, overheated stables is a most fruitful source of disease and is really more dangerous than exposure to all kinds of weather.

In most sections of the cornbelt the cattle can stay on the pastures until the holidays, and if the grass is short a little corn fodder or shock corn may be hauled out to supplement this ration. When in the barn at night corn silage with a liberal supply of hay should be given. The hay should be timothy mixed with some one of the various clovers which can be grown most successfully on the farm, and some cottonseed meal, cornmeal or linseed meal may be added to the silage, the amount to be governed by the condition of the animal. Milking cows should be fed liberally because a good flow of milk is desired to push along the sucking calf from which we must get our profit, a point always to be kept in view.

These suggestions are general and will have to be modified to suit different sections of the country. The man who is breeding cattle in the far north will have more time in the barn and a warmer one, while the one in the south will need very little shelter and possibly none at all. But the general health of the cattle is the all-important thing to be borne in mind at all times, and proper judgment must be exercised by the breeder.

Purebred cattle breeding is a business worthy of the best efforts of our most intelligent men. In it is found an inspiration for original creative work and one's best judgment will often be taxed to its utmost capacity to know what to do in order that the best results may be obtained and the desired end accomplished. Indulgence in a life o fease free from cares or exertion is not best for either man or beast. It is only one step from this to disease. Coddling should be most strenuously avoided, for through it a herd of purebred cattle may be made to grow continually weaker in each succeeding generation, while with sufficient sunlight, air and exercise each generation should be stronger than its ancestors.

All practical breeders find that the little things which keep constantly coming up in the every-day management of the herd demand their most serious thoughtfulness; and they are far more troublesome because they can only be learned by real practical experience. We read all our books and study the conditions laid down in them, but soon along comes something we have never read about and it seems peculiarly adapted to our own herd. Under such conditions there is no help for us. We must work it out by using good horse-sense.

When the herd has increased to the extent that it contains females of the various ages, they should be divided into lots of the same size and age. They will then make a better appearance before the visitor or intending purchaser. By taking him to a pasture where there are only the matrons of the herd he is impressed more than if there were a lot of yearling and two-year-old heifers mixed in among them. A pasture in which there are a lot of well-grown, thick two-year-olds looks better without the thinner cows being with them. And the yearling heifers may need a little extra feed which can only be given them when in a pasture with no others. In many ways we find it advantageous to have each kind separate.

When the cows are near to calving the yshould be turned into a small pasture located near the barns, so that they can be carefully watched. If everything is all right they may not need any assistance. But if a cow is too long in labor she should be taken into the stable and an examination made, because an undue length of time in labor has a tendency to weaken both the mother and the calf. After the delivery is made see that the cow dries the calf. This in most cases she will be impelled by maternal instinct to do, but some cows, especially heifers with their first calves, sometimes need a little help. If she will not lick the calf her attention should be called to the calf by turning it over. Sometimes a little bran or meal or salt sprinkled on the calf will cause her to do her duty, but in some cases she will do nothing except butt the calf over whenever it attempt to get up. In this case the cow must be tied up in the stable, the calf dried by vigorous rubbing with coarse cloths, and then suckled.

Once it is filled with milk the cow will have learned her maternal duties It will usually be in condition to take care of itself. For two weeks it should not be taken away from its dam more than a couple of hours at a time, as it needs a little milk at a time and needs it often. If allowed to get too hungry the calf will take an overdose when the opportunity offers and indigestion will result from it. But after six weeks it will probably begin to eat a little mixed meal and bran, then the

Harpers Weekly and The Breeder and Sportsman

$5.50 WORTH FOR $3.25

Breeder and Sportsman

One Year, 52 Copies, Regular Price $3

THE BREEDER AND SPORTSMAN is the oldest weekly journal devoted to the Horse west of Chicago, having been established in 1882. This interest, together with the Kennel, Gun, Fishing, Coursing and kindred sports receiving the most attention in its columns; together with Agricultural and Dairying Departments, under whose headings especial attention is paid to the breeding, etc., of Cattle, Sheep, Hogs, Poultry, and all other animals connected with stock raising.

As an advertising medium to Racing Associations, Horsemen, Stock Breeders, Manufacturers of Sulkies, Carriages, Wagons, Agricultural and Dairying Implements and Machinery, Sporting Goods, Fanciers, Stock Foods, and all others desiring to bring their wares to the attention of the classes to whose interests the paper is devoted within the field mentioned above, the BREEDER AND SPORTSMAN will be found indispensable.

Harpers Weekly

Six Months, 26 Copies, Regular Price $2.50

At no time has it been so evident to Americans as now, that the most important thing in the lives of all of us is the progress of the European War.

Next to your daily bread the war interests you most vitally. It may even come to be the most important part of your problem of living.

The periodical of greatest fundamental interest to you today is the one that can best report those phases of the war that come closest to your country and you.

Because of connections abroad and at home, HARPER'S WEEKLY is that publication.

As a critical commentary that presents inside facts, it is the necessary bridge for intelligent readers between the daily newspaper and the monthly review.

You want HARPER'S WEEKLY now. You can get it now on trial at a remarkable reduction.

Send $3.25 Now and Get Them Both

THIS OFFER is made to all who will send us $3.25 before March 31st, 1916, whether for extension of subscription, renewal of subscription or a new subscription. Address:

BREEDER AND SPORTSMAN

P. O. Drawer 447 :: San Francisco, Cal.

calf may be kept away from its dam. A little of this mixture should be kept in a box which is conveniently located for the calf to find, allowing it to suck twice a day. Given mother's milk twice a day and what grain it will eat, the calf will make a good growth and do it without being very much bother to anyone. To be sure if its early life comes in the winter it will need a good warm place to stay at night, but be sure to give enough exercise to keep the calf good on its legs. If it is summer time when the calf is born, keep it way from the flies during the day, always remembering the feed.

Plenty of feed and plenty of exercise always prove the making of the calf. The calf makes your profit if you get any. Keep up this feeding until the calf is six or eight months old. It will be a good eater by this time and may be put on feed alone. The change will come so gradually that it will not be noticed.—Breeders' Gazette.

———o———

The application of lime to many soils is of undoubted benefit. Though the availability of the fertilizing elements in the soil may not be greatly increased by its use, the resulting improvement in physical and bacterial conditions may increase considerably the productiveness of the soil.

GUNCRAFT

By W. A. Bruette

A modern treatise on guns, gun fitting, ammunition, wing and trap shooting.

The theoretical side of the subject has been covered with a scientific accuracy which makes it an up-to-date book of reference, and the practical side of wing shooting, gun fitting, the master eye, defects in vision and other important questions have been treated in a way that will enable either the expert or the amateur to determine if he is shooting with a gun that fits him and how to decide upon one that does. It will enable him to ascertain why he misses some shots and is successful with others. The secrets of success in trap shooting, as well as the peculiarities in flight of the quail, the jacksnipe, the woodcock, the ruffed grouse, and the duck family, are illustrated by drawings and described in a way that will facilitate the amateur in mastering the art of wing shooting.

Cartridge board cover, $1.00; Cloth, $1.50

Third Edition Within One Year of Publication.

CARE AND TRAINING OF TROTTERS AND PACERS

NEVER before in the history of the publishing world has a horse book gone into a third edition within one year of publication. Yet the explanation is simple—the book fills a long-felt want.

Never before has this subject been treated in a distinct manner. It has been handled in connection with autobiographies of trainers, but such works are out of print or out of date, for they were published 20 years or more ago. Conditions and methods have changed since then, and former treatises are just as much out of date as the high-wheel sulkies then in vogue.

"Care and Training of Trotters and Pacers" is as modern as a 42-centimeter gun. It does not contain the ideas of one man, but of 100 of the leading horsemen of the day, including Thomas W. Murphy, Walter R. Cox, and Edward F. Geers. These ideas were converted into book form by two prominent American turf journalists.

This book enables anyone to do his own caretaking and training until it is time to send the colt to a professional trainer, or the owner can train and race the colt himself. The treatise covers the details of a colt's life from the moment it is foaled until after its first year's campaign. The facts are clearly presented. Nothing is left to guess work. The language is lucid. Both theoretical and practical views are outlined and compared. The instructions are concise and easily understood. The work contains no advertisements—it is not a catch-penny publication that looks big in the advertisement but proves disappointing when received.

Many professional trainers have purchased the book and have found it interesting. Despite the war, over 300 copies have been sold in Europe and Australia.

Price $1.00 postpaid. Cloth, illustrated, 176 pages, 5x7 inches.

THE HIGHEST YEARLY AMATEUR AVERAGE ON RECORD

THE OFFICIAL HIGH HONORS

FOR THE YEAR 1915

WAS WON BY MR. WOOLFOLK HENDERSON, OF LEXINGTON, KY., USING

Woolfolk Henderson

Peters SHELLS

He Shot at 2800 Registered Targets, Broke 2731; Percentage .9753

The wonderful record of Mr. Henderson in 1914, when he won the Four great amateur honors, is still fresh in the minds of the shooting fraternity. In that year he captured the Grand American Handicap, the Single Target and Double Target Championships of the United States and the High Amateur Average. His performance in 1915 is therefore but the continuation of a marvelous and thoroughly consistent record, made possible by ammunition of superlative quality.

PETERS SHELLS have been used by the winner of the United States High Amateur Average (official) FIVE OUT OF THE PAST SIX YEARS

THE PETERS CARTRIDGE CO., Pacific Coast Branch, 585-587 Howard Street, San Francisco, Cal.

C. G. Spencer

The Big Winner In 1915

The Interstate Association's Official High Professional Average for the season of 1915 was won by Charles G. Spencer, of St. Louis, Mo., with the marvelous record of 97.5% for 5620 targets. Such an average for such a large number of targets not only shows Mr. Spencer's great skill, but also proves the uniform and unequalled quality of

WINCHESTER

LOADED SHELLS AND SHOTGUNS

which Mr. Spencer used exclusively. It was this same combination that he used when he made his marvelous straight run of 565 targets—the World's Record.

Contests for the Season's Trapshooting Averages have been held 16 times and 12 of them have been won by **W** shells or guns, or both, which is undeniable evidence of their superiority.

Lester German, of Aberdeen, Md., who was second high for the season, and who also made the greatest score of the year for a single tournament—499 x 500—used Winchester shells in performing this great feat.

J. Mownell Hawkins, of Baltimore, Md., shot 7,265 targets in competition during 1915, and made the splendid average of 95.56%, using Winchester shells and shotguns exclusively—more proof of their uniform shooting qualities. These performances show the reason why Winchester shells and guns are

TRAINING THE HOUND

A PRACTICAL TREATISE ON THE TRAINING OF FOX HOUNDS, BEAGLES, AND COON HOUNDS.

The system of training advocated is simple and effective, so that anyone who carries out instructions can easily develop a foxhound, a beagle or a coon dog to the highest state of usefulness or organize a pack in which each hound will work independently and at the same time harmoniously with the others. The subjects are: The Hound's Ancestry, History, Instinctive Tendencies, English and Native Hounds, Developing the Intelligence, Training the Foxhound, Voices and Pace of the Hound, Qualities of Scent, Manners, Training the Coon Dog, Coon Hunting, Training the Beagle, Forming a Pack, Field Trial Handling, Faults and Vices, Conditioning, Selecting and Rearing Puppies, Kennels and Yards, Diseases of Hounds and Their Treatment. The chapters on field trial training and handling are alone worth the price of the book, which is one that every man who loves the voice of a hound should read.

The book contains 224 pages, is clearly printed, nicely bound, and handsomely illustrated with bloodhounds, various types of English and American foxhounds, beagles and cross-bred dogs for 'possum and coon hunting.

Price, in heavy paper cover, $1; $1.50, postpaid.

BREEDER AND SPORTSMAN

OLUME LXVIII. No. 7. SAN FRANCISCO, SATURDAY, FEBRUARY 12, 1916. Subscription—$3.00 Per Year

OVER THE JUMPS AT STANLEY PARK

Miss Mabel Penery French, British Columbia's pioneer young woman barrister and foremost equestrienne, riding her famous grey hunter, Schweitzer.

Pleasanton Driving Park

PLEASANTON, CALIFORNIA

offers for service for the season of 1916 the following stallions:

THE ANVIL 2:02 3-4

Fastest trotting stallion ever offered for service in California, and fourth fastest entire trotter in the world

Son of St. Valiant Vincent 2:11¾ (by St. Vincent 2:13½ out of the triple producer Grace Lee 2:29¼ by Electioneer 125); dam Amy Smith by Emperor Wilkes 2:20¾, sire of Princess Eulalia (4) 2:09¼, etc.; grandam by Hambletonian 539.

The Anvil is regarded by Edward F. Geers as one of the very greatest trotters that he has ever raced. For five years the pair of Tennesseeans went to the races together and in that time were but twice unplaced, while winning a total of fifteen races, including the historic M. and M.

As an individual he is most pleasing, not too large or coarse in any way but smoothly and compactly made and "all horse" in every line. He is a perfect headed, pure gaited trotter, with the very best of disposition, and is destined to become a very great sire of trotting speed. His opportunities in the stud have been very slight as he has been retired from racing only since the close of 1914, and has but three or four foals now three years old. He was selected to head the stud at Pleasanton Driving Park not only on account of his great qualities as a race trotter, but because one of his first foals, Anvilite (2) 2:22¾, with a trial of ten seconds or more faster, is in every way the greatest colt trotter ever handled by C. L. DeRyder. The services of The Anvil are recommended to you without reserve.

Fee for The Anvil 2:02¾, $100 with usual privilege

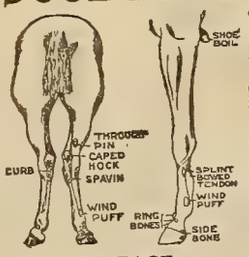
Vernon McKinney 2:01 1-2

Fastest member of the great family of McKinney 2:11¼

Sire of VERNA McKINNEY (2) 2:13 (his first foal raced), fastest two-year-old pacing filly of 1915.

Son of Guy McKinney 37625 (by McKinney 2:11¼ out of Flossie Drais by Guy Wilkes 2:15¼); dam Maud Vernon by Mount Vernon 2:15¼, sire of the dams of Leata J. 2:03, etc.; grandam Mag by General McClellan, sire of the dams of Mack Mack 2:05, etc.

Vernon McKinney's racing career was not an extensive one but will long be remembered for the excellence of his performances, as his winnings include a Chamber of Commerce stake in time very near the record for that event at the time, and he is the fastest of all the McKinneys.



He is a horse of rare qualities in the way of individual excellence, almost ideal in behavior and temperament in harness or out. Since his retirement he has been a popular horse in the stud and our claim that he would prove a very great sire of pacing speed has been fully substantiated, his first foal to be raced being the season champion for the age and gait in 1915, a most excellent testimonial to his potency. He is a very sure breeder, his get are uniformly endowed with natural speed and the physical and mental requirements of modern race horses and find ready sale at most gratifying prices.

Fee for Vernon McKinney 2:01½, $50 with usual privilege

The best of care taken of mares in any manner owners may desire, but no responsibility assumed for accidents or escapes. Address for particulars

WHAT DO YOU SEE WHEN YOU LOOK AT A HORSE?

[By Harry L. Simonds, Late Corporal Troop "K" Second Cavalry.]

The great body of men who are the bone and sinew of a mighty nation, those who are upright, God loving men, those who love their neighbor, their country, peace, justice and their fellow creatures, see, when they look at a horse, something to be cared for and cherished as a choice possession, a being of life that is next to man in the scale of life, and the horses of such men, while they cannot speak, unmistakably proclaim what sort of man their keeper is. More can be told of a man's true character, after looking at his horse five minutes, than he can say himself in a week.

The "sports" and gamblers see nothing but a gambling machine, a means for gratifying their mania for betting. The old cavalryman who has served in the desert places of the west sees one of God's noblest creatures, a fellow and companion to be cared for at all times. The new cavalry recruit, who was born and has always lived in a city sees, in an experienced cavalry horse, a monster untamable that is capable of doing numberless things to injure and terrify a young man; later, he learns that this supposedly diabolical fiend is really his best friend and companion and he learns to resent an insult to his horse quicker than one to himself, he learns to "speak to his horse as he would to his sweetheart."

The conscienceless dealer, or trader, sees only profit, he sees only an article of merchandise such as a keg of nails or a pile of pig-iron, something out of which he can make money. The gilded city youth sees, or has seen, only a "red hot time"; he now sees these times by machinery and goes to outer darkness via the "turned turtle," "jumped off a bridge" and "collided with a telegraph pole" routes, greatly to the relief of the horses who formerly suffered great misery from such sources. The average farmer, who should be more intelligent, sees only a source of power to be neglected, poorly fed, half taken care of and worked to the limit. The good M. D. V., who is himself disabled, sees in a horse needing attention a way to alleviate suffering, and promptly does his best. He sees a great deal when he looks at a horse, so much more than I that I will not attempt to tell anything that passes in his view.

When I look at a horse I see ages of time and their happenings pass in review before me. At first they march by in stately array rendering honor to whom honor is due; soon the gait quickens and they pass at the trot; then as thoughts multiply, the gallop is taken up and the charm of many ages is seen in a moment. I see, away back when man was not on earth, a small five toed animal, the original horse, who, while small, had to contend with or escape from the mighty reptiles that held sway in those days. This small horse gives way to the larger three toed one, and he, in turn, to his still larger single toed or hoofed descendant and now the real, interesting things begin to be seen. Man is on earth, and horses, who are wild, have to contend with savage man in addition to their other troubles in contending with ferocious beasts that prey on them. Man finally brings the horses into semi-subjection and they become useful to him though even the savage is more than half afraid of his wild steeds. What fierce things horses must have been in those days! To the pagan he was a monster breathing fire and smoke, and to the Hebrews he was terror personified; they fled from the "cohorts all gleaming with purple and gold." The Egyptian armies that were swallowed up in the Red Sea received just retribution but I have always wished that their horses could have escaped. It was then as now—horses and men were so inseparably connected that disaster to one spelled death to the other. I seem to hear, as it was spoken from the whirlwind, by God's own voice, that remarkable tribute:

"Hast thou given the horse strength?
Hast thou clothed his neck with thunder?
Canst thou make him afraid as a grasshopper?
The glory of his nostrils is terrible.
He paweth in the valley and rejoiceth in his strength.
He goeth on to meet the armed men.
He mocketh at fear and is not affrighted;
Neither turneth he back from the sword.
The quiver rattleth against him,
The glittering spear and the shield.
He swalloweth the ground with fierceness and rage,
Neither believeth he that is the sound of the trumpet.
He sayeth among the trumpets Ha! Ha!
And he smelleth the battle afar off,
The thunder of the captains and the shouting."

Ages have since passed but no finer tribute to the horse has been written or spoken than is found in the Book of Job 39:19-25.

As thoughts multiply Roman cohorts, with their plumed centurions, Mohammedan fanatics, Saracen bands, the hosts of Attila, "the scourge of God," Charlemagne's armies, all depending on their horses, are seen. The winged Pegasus flits fancifully about and calls forth a wish that he were real, now on earth and in my keeping. Whether in peace or war, raid or battle, song or story, the history of horse and man are so interwoven that they cannot be separated and the love of horses is so ingrained in the nature of most men that centuries of time cannot eradicate it. Spaniards battling for eight hundred years to expel the Moors from their country appreciated horses but were cruel to them, not as cruel, however, in many ways, as another nation that is popularly believed to be lovers of horses.

I see the condition of the world, when to own a horse was equivalent to being a gentleman, as witness the Spanish word for gentleman, "caballero," literally, "horseman." In those days the possession of a horse so distinguished its owner that he was a gentleman and the distinction survives in the word. I see "Knights of Plantagenet, horsemen of Saladin," haughty Crusaders, Emperors, Kings, Potentates, Princes, armored and followed by retainers, all riding horses and dependent on them. No king so powerful that much of his power did not depend on horses. Fierce hand to hand battles where "horse and man together fall" are seen.

Then a pious band leave all that is near and dear to them, strike out across an almost unknown ocean to find peace for their consciences in the wilderness of a new world, and they take their horses with them. Who can get along without horses? Those hardy pioneers builded better than they knew and soon it became necessary for them to free themselves from the oppression that followed them across thousands of miles of the ocean they crossed to escape. Almost the first thing it was a horse and his patriot rider that "gave the alarm through every Middlesex village and farm," with the result that a new nation arose, destined to be the first to be founded on the rights of man. This originally small nation grows very fast, it becomes a young and hardy giant in a few years. Soon it becomes necessary to put sin away from among them and a great war commences. Now I see great misery among the horses; they are maimed on every battlefield; one becomes immortal by carrying his rider a long way and bringing him up in season to win victory from defeat.

Horses aid numberless ways in winning victory for the right. Is food scarce in camp, soldiers go out on horses to search for more. Is a sudden move against the enemy necessary, it is the cavalry that does it. Is it necessary to lay waste a fruitful valley so a crow flying over it must carry his provisions with him, it is a fiery cavalry leader that does it and he is followed by his fiery troopers and their faithful horses. Is there a message of life or death to be carried, a mounted man rides furiously and arrives in season to save a man about to be executed, but the horse falls dead, he gave his life that a man might live as thousands of other horses have done throughout the world. All this and much more was done by the horses, still there are those that say, "it is only a horse"!

After the sin has been put out from among them, the young giant nation grows by leaps and bounds. It is said to be necessary to subdue the rightful possessor of the land, and it is done in a ruthless manner, but the rightful possessor also has horses and inflicts much damage on the robbers before they overcome him. After wiping out years of wrong and insult in one carnival of slaughter a horse only is found alive where the paleface corpses lay very thick.

Instead of wild horses and savage man I now see a mighty nation at peace, men, their savagery covered by a thin veneer of civilization which slowly, oh! so slowly, thickens, and horses, their fierce wild nature subdued by generations of captivity have become gentle but are still courageous, and with the men, are working out the destiny that God has set for them. Of the horse of all ages, who has seen better than the gentle giants who do the work of the nation? Who has seen a more handsome sight than a well cared for troop of cavalry horses? Their necks are still clothed with thunder, they still rejoice in their strength; the glory of their nostrils is still terrible and they still have the courage to go on to meet the armed men, neither turn they back from the sword. No greater disaster could overtake man than for all the horses to be suddenly taken from among them. All this and much more I see when I look at a horse. "He that hath eyes to see let him see."—Cavalry Journal.

OUR FRONTISPIECE.

It is with a great deal of pleasure that we introduce to our readers this week the engaging pair whose photographic likeness graces our cover page. The young lady whose skill as an equestrienne is so strikingly attested by the grace and perfection of her seat is Miss Mabel Penery French of Vancouver, who enjoys the distinction of being the first young woman admitted to the practice of law in the western province of the dominion as a full-fledged barrister, while the horse, whose command of himself and the situation in general is rivaled only by the similar qualities displayed by his mistress, is the Irish hunter Schweitzer, heralded without contradiction as the finest representative of his kind in the west. Several times a steeplechase winner at Minoru, he has, since coming into the possession of Miss French some four years ago, proven a consistent winner of blue ribbons and trophies in the show rings at various northwestern cities, his honors including the hunter championship at the Vancouver horse show in April, 1913. He is held in such high esteem both by his owner and his countless knowing admirers in the dominion—and our Canadian cousins are most excellent judges of the quality of hunters — that Miss French has expressed the intention of taking him east some time to try conclusions with the cracks of "the Garden," and if our likeness of them may be taken as a criterion the judges at Madison Square will be hard put to find reasons for placing others above them. Aside from its general attractiveness, the picture is recommended to the consideration of the most critical as a specimen of proper equitation, being almost flawless from the seat and hands standpoint. Miss French also plans an overland trip to California with her favorite, and her visit would be the source of much pleasure to the local coterie of riders who frequent the bridle paths of the parks and the long stretches of inviting beach.

The photograph from which our reproduction is made was taken at Brockton Point in Stanley Park, Vancouver's famous playground where the greatest of attractions is the equestrian path, which winds in and out among the giant trees and zoological gardens and from different points of which one garners fleeting glimpses of the towers and turrets of an ultra modern city, the sheen of the salt water, the snow clad peaks of the Cascades, the shadowy aisles of the forest primeval, and the depths of a wilderness whose fastnesses are little known save to the wild things God put there in the beginning.

And to think that in the place of Miss French and Schweitzer we might have printed for you the picture of some much-bedecked damosel at the steering wheel of a steen hundred horse power car!

The Status of the Fair Association

A BRIEF STATEMENT OF CONDITIONS FACED BY THE CALIFORNIA HORSEMAN

In last week's number of this publication, comment was made in brief concerning the necessity for prompt action of some description on the part of the recently organized Pacific Coast Fair Association if any results of a beneficial nature were to be accomplished this season. An additional necessity, the selection of a secretary, now confronts the members, as prior to the appearance of last week's paper but after the time at which the last forms had closed and been sent to the press room, the advice was received from Robert A. Smith of Los Angeles that his resignation had been tendered President I. L. Borden, to take effect immediately, a visit to Mr. Borden's confirming the unwelcome and unexpected news. The letter effecting Mr. Smith's retirement from active participation in the work of re-establishing the district and county fair throughout California on a new and permanent basis was addressed to Mr. Borden as president of the Pacific Coast Fair Association and was couched in the following terms:

"I sincerely regret that I find it necessary to resign at Secretary and Treasurer of the Pacific Coast Fair Association owing to the fact that I have recently and unexpectedly acquired new business interests that will demand all my time and may also necessitate the spending of a portion of the coming season in the east. I had formulated plans for a series of fairs in California which I had hoped would meet with the approval of the directors and members of the association in that they might renew the old-time successful and prosperous county fair in an up-to-date fashion. Enclosed you will please find check to your order for three hundred and twenty dollars, total amount collected from members and which is the total amount in the treasury. I also enclose minutes of meetings and list of members. I am confident that with a broad, generous policy the purpose for which the association was organized can be brought to a successful issue. I wish the association every possible success and will gladly communicate any plans I have made regarding the matter."

While the action taken by Mr. Smith is a matter of regret to every member of the association, as he seemed the one man whose services were available who might succeed in bringing success to the fair movement, the resignation left no course for Mr. Borden to pursue save to accept the same on behalf of the organization, though the acceptance was made with a great deal of reluctance. Mr. Borden assumed the presidency on the assurance that the secretary would do all the work, and now finds the entire responsibility of the matter devolved upon him at a time when his own widely varied affairs require his closest attention for practically all daylight hours and many of those between sunset and sunrise. The membership of the association being so widely scattered that a meeting at an early date is out of the question, and Mr. Borden having no time at his disposal for taking the matter up personally with every one of the thirty-two persons composing the body, it was decided to present the state of affairs as they exist at this moment through the columns of the Breeder and Sportsman, with the respectful request that every member or prospective member of the association, as well as the representatives of the local organizations throughout the state, give the same their consideration and make an immediate expression of their views to Mr. Borden or to this paper, preferably the former. The Breeder and Sportsman has no ax to grind on the association's stone, but its columns are open at all times and the services of its staff gratuitously tendered to the support of every movement which has for its object the furtherance of the welfare of the Pacific coast horseman and stock-breeder. Accept as "gospel," before going any further, that our interests in the matters up for consideration are vital, that our opinions are absolutely devoid of prejudice, and that any ideas advanced or suggestions tendered are offered solely in the hope of inviting discussion, criticism or approval of a scope and nature that will result in the adoption of a definite plan of action most acceptable to the greatest number, for in this manner alone can the restoration and perpetuation of the fair be accomplished.

The Pacific Coast Fair Association, truly a "child of necessity," was formed as a result of the decline in horse breeding and racing in California and of the unsuccessful attempts to secure legislation from the assembly and governor of a nature that would provide for state appropriations for district fairs. Its aims were, and are, the promotion of a series of fairs with racing for the present season, and the popularizing of the same to an extent where they can be continued without state aid if the same is steadfastly denied, though the idea is always uppermost of making these fairs so successful and popular with the people of the state at large that there will be an irresistible general request for their perpetuation on broader lines and the consequent enactment, by concerted demand on the part of press and people, of legislation in their behalf.

At the time the body was organized, there was no plan of action submitted. Most of the time of the two meetings was taken up in reviewing what has happened to the horse and fair business in the past, what might be done for them in the future, and the raising of a subscription of a large amount, presumably to be expended as the directors saw fit. Some forty people signified their intentions of becoming members of the body; when it came to a showdown, thirty-two paid an initial fee of ten dollars, and this is the only cash ever in the treasury. A provisional subscription was started with the idea of obtaining the sum of five hundred dollars each from fifty men, and while a considerable proportion of this gross sum was subscribed, every subscription was provisional upon the total amount being raised. As there seems no chance whatever of this being accomplished, those five hundred dollar "testimonials" are eloquent answers to the question "When is a subscription not a subscription?" A few parties whose names are included in that list have signified their willingness to make their subscription unconditional and gave Mr. Smith authority to draw upon them for that amount at any time when needed; others joined the five hundred dollar list confident that the provision would not be eliminated through the subscription of the complete amount and with no intention of ever paying in that sum, while at least one instance is known where the subscription was repudiated. These things augur ill for the success of the attempt to raise a really large sum, and put the association on a three hundred and twenty dollar basis — about enough to pay office expenses of a hard-working, "go-getting" secretary for one month.

Personally, the editor of this publication has never believed that the raising of such a sum was practicable under present conditions, at least in five hundred dollar wads, and while there is a very comfortable feeling about having plenty of money on hand to carry through any kind of a proposition, a wonderful amount of good can be accomplished with an initial fund considerably less than the one originally designated as the primary requisite for the association's activities. When the matter was first broached to the writer, some time in advance of the first of the two meetings that were held and even before the horsemen had assembled in this city for the exposition race meeting, about half this sum was the largest sum mentioned, and subscriptions were rated at from twenty to a hundred dollars, or more in rare instances where a larger subscription would work no greater hardship upon the donor than would the twenty-dollar ones upon the less fortunate members of the fraternity of trotting horse lovers. By the time the last meeting rolled around the thing had

Proposed Circuit for California Fairs

SEASON OF 1916

Only the California State Fair has claimed dates definitely at this writing; the following schedule of events is submitted merely as a guide to what might be definitely arranged, the notation after each meeting listed being a brief review of what may be expected at that particular point; the circuit as herewith planned is based upon a number of considerations, chief among them the avoidance of conflict in dates, the continuity of racing, and the economical transportation of racing stables, exhibits and amusement features.

SANTA ANA — Orange County Fair . . . July 31—Aug. 5
Held an experimental fair in 1915 for the first time in several years; the purses were not large but the racing was entertaining and popular and the event paid for itself; its promoters declared themselves well pleased with the result, and that a better meeting would be forthcoming this season.

VENTURA — Ventura County Fair . . . . . Aug. 7—12
Held fairs in 1914 and 1915, increasingly successful, with only a few events for harness horses; this year's fair will be more pretentious and members of the association have stated that the purses for harness races will be larger and more numerous.

SALINAS — Monterey County Fair . . . . . Aug. 14—19
County provides moderate appropriation for fair to be held every two years, and as none was staged last season the appropriation is available for 1916.

SANTA ROSA—Sonoma County Fair . . . . Aug. 21—26
Has given the most successful fairs in Northern California during recent years and various members of the association have stated that an excellent fair in every way is planned for this season.

SACRAMENTO — California State Fair . . . . Sept. 2—9
Always the best speed program on the coast; appropriation already made for this year's exhibition.

WOODLAND — Yolo County Fair . . . . . Sept. 11—16
No definite information; sentiment throughout the county favors a fair, as does the local Chamber of Commerce, and Mr. Silva, now owner of the track and grounds there, is one of the prime movers of the fair project; can probably be depended upon for a meeting of some kind.

PLEASANTON — Alameda County Fair . . . Sept. 18—23
Not probable that a pretentious meeting will be staged, but directors of fair association announced some months ago their intention to give an event annually and are in line for this year.

FRESNO — Fresno District Fair . . . . . Sept. 25—30
Made money and laid up a surplus with horse racing as the principal feature for some seasons; last year specialized on novel features and lost money; horse will probably occupy former place on this year's program, according to statement of certain directors and members.

HANFORD — Kings County Fair . . . . . Oct. 2—7
Best small fair in state until exposition broke into the series; directors have met and announced that this year the fair will be better than ever; a modest but substantial speed program is always the attraction at this point.

BAKERSFIELD — Kern County Fair . . . . . Oct. 9—14
No fair of late but a prominent member of the association has stated that the plant is in good shape and that a fair with horse racing is planned for this fall.

RIVERSIDE — Riverside County Fair . . . . Oct. 16—21
The healthiest young fair in the west; has made money since its inception three years ago and has a surplus on hand that augurs well for the meeting this season, which will include more harness horse events for larger purses than before.

PHOENIX — Arizona State Fair . . . . . Oct. 30—Nov. 4
Long very successful and largely patronized by Californians; appropriation for 1915 was smallest in years but racing was good, proved very popular, and secretary and directors are confident of presenting a more pretentious program this time.

"run away with itself" until it came to a point of five hundred dollars or nothing, which froze out the support of the average horseman save in the way of good will and a ten dollar membership fee. I recall one of the early movers of the project, a man ready and able to put up a hundred dollars, who renigged entirely when it came to a show down, stating to me afterwards that he did not believe the twenty-five thousand dollar movement had the slightest chance of achieving success and that under those conditions he considered the payment of the ten dollar membership fee to be a pure and simple waste of that much money. He also stated further that he was still in line for the hundred dollar bit whenever the matter got down to a really sound, businesslike basis. Quite probably there are many more like him.

It is impracticable for any body of horsemen to figure on giving a circuit of meetings independently, for in almost every California town where there is a plant at which a meeting could be given with the slightest hope of attaining a fair degree of success, is already a local association of some sort that plans to give a meeting of some description. It is also impracticable to plan the giving of straight race meetings without general fair features at a time when there is no legal system of speculation. This eliminates a few points where there are tracks without facilities for giving a fair, and there are also places well equipped in every way where any sort of a fair or race meeting is, from all recent past indications, predestined to suffer a financial loss. The object for this season should be the giving of a moderate number of fairs in localities where the movement already has friends and supporters, and give them under such pleasing conditions that the record established by them in the way of success and popularity will be the very strongest evidence that can be submitted to the legislature this winter in support of a district fair bill, the Pacific Coast Fair Association taking direct charge of the campaign for an appropriation. If favorable legislation is to be secured the movement must have a direct and substantial sponsor, whose business it shall be to keep everlastingly at it, by personal persuasion, mail and press. Back of this sponsor must be the influence and moral support of every local fair association, every horseman, every stock breeder, and every progressive agriculturist, and this support is not "visionary" or unattainable. It is not to be attained, however, unless horsemen themselves take the initiative, get together, stay together, drop all personal or neighborhood differences, and "go at it" in their shirt sleeves. It is not attainable through provisional subscriptions or without the services of some one man who shall make the securing of success for every fair in the state his sole and only business for the time being.

After a good many conversations with horsemen and breeders from different parts of the state, and a review of conditions existing in certain localities, the writer drew up the tentative plans for the season's fairs which appears herewith, there seeming to be no one else to start the ball rolling again. The proposed circuit as it is shown is not as originally planned, owing to the fact that the state fair has announced its dates a week or so earlier than was expected. Arrangements should have been made simultaneously by all the associations that would have given meetings this season so that there would have been no doubling of railroad travel, but the state organization probably grew tired of waiting for concerted action and went ahead independently. The most economical arrangement would have been Santa Ana, Ventura, Salinas, Pleasanton, Santa Rosa, Woodland, Sacramento, Fresno, Hanford, Bakersfield, Riverside and Phoenix, as thereby would have been entailed the least amount of shipping, but the circuit, if adopted as presented herewith, might be much worse. It is also possible that there are a few points other than those listed at which meetings might be given with a fair degree of success, but the towns above are the most reliable ones. San Jose, where there is an excellent track, is a poor horse town and there are no facilities for giving a fair. Stockton has a complete plant but the last meeting in 1912 was not a success and the town did not make good its proposed bonus to the sponsors of the event. At every one of the places mentioned it should prove a comparatively simple matter to give a fair that should prove practically self-sustaining, and if the merchants of the towns are alive to the benefits accruing to them from the holding of the fair, a bonus of sufficient size to guarantee the association against loss should be raised if properly gone about.

There are, of course, certain objections to be raised against the circuit as outlined, but people and places must make up their minds that not every one can have exactly what is most desired, and that in a matter of this kind the convenience of others must be considered. Santa Ana and Ventura, both small events, would attract only horses from the approximate vicinity, the main body of horses not joining in the fray until Salinas or Santa Rosa was reached. Should those cities not care to stage their meetings early, but prefer to take potluck at any time during the season or to follow Riverside and depend upon such horses as were not bound for the Arizona State Fair (and this might be arranged for a week later than given in our proposed schedule) the town of Pleasanton might hold forth sufficient inducements to the P. C. T. H. B. A. for that organization to stage the opening meeting of the year on the dates now accorded Ventura. Pleasanton is the smallest town in the schedule, but there is a good population in the valley, the patronage accorded racing is good, and the town very probably would offer a substantial bonus for the coming of the campaigners and the attendant crowds for that extra week, for Pleasanton is fully aware of the amount of money that the race track puts in circulation even in a lively training season. Woodland might raise some objection to following the state fair on the grounds that the larger event would "kill" the smaller one immediately following it in the same vicinity, but on the other hand it can be advanced that with the same horses coming to Woodland that had just made history at the state fair, the interest stimulated in their performances at that event would cause many people to "strain a point" order to see the contests continued at Woodland the following week. Hanford expressed a preference for the last week in September, but the first week in October would probably be fully as welcome. As a whole the arrangement should be fairly acceptable to all concerned. Anyway, until something is submitted and talked over it is a cinch that no one will ever get what they want, and conflicts may ensue that will prove costly both to horsemen and fair associations.

In the event of raising the sum of twenty-five thousand dollars, the intention, so far as known to the writer, was to use the major portion of this amount in providing purse and stake money. Not many of the places included in this schedule need the total amount of purse and stake money provided for them, if any. There are a few points where assistance would be most welcome to the local association and go far toward providing a program of sufficient value to make it worth while for the horsemen to ship to that point. In such instances why would it not be practicable to have the local association go its limit on a program for three days of the week, leaving the fourth (either Thursday, Friday or Saturday) to be sponsored by the horsemen's association, the latter to receive all the entrance money paid in for that day and a mutually acceptable percentage of the gate and grandstand receipts? For this assistance the local organization should be willing to pay in the neighborhood of sixty-five per cent of the day's business, and by such an agreement a much better program could be arranged than if the home folks were to go it alone. It would mean more horses in attendance, a better fair in every way, greater interest in the racing, as there would be sufficient on each of the four days to furnish an afternoon of rare pleasure, and the cost to the horsemen's body would be slight. Properly gone about, there is no reason why an equitable co-operative understanding between all parties concerned should not become an actuality—and a very profitable one at that.

At every one of the points listed, there is an association ready to do its share toward giving a circuit. Twelve weeks of racing is a fairly extensive season and will mean the putting into circulation of a considerable sum of money. Given a few thousand dollars in its treasury, the Pacific Coast Fair Association could send its secretary to each of these towns to assist in the raising of a bonus; he could exercise supervision over the circuit as a whole, laying special stress upon the publicity work and the educating of the public to the fact that district fairs are very popular, are necessary, and can be obtained on a permanent basis with a state subsidy, if the campaign for them is properly waged. With the press and public fully awake to the possibilities offered by the perpetuation of the subsidized fair, the movement for legislation to that end will carry much more weight and meet with much more consideration at the hands of the assembly and the governor than has ever been the case before.

At many places there is a need for an experienced publicity man, speed superintendent or other executive of wide experience, the same not being supplied in the offering of "local talent," and the home associations could go far toward providing the salary of the general secretary by engaging his services for their meeting in some capacity of this nature, the benefits accruing to them being considerably in excess of the extra cost. Further funds for the prosecution of the work in behalf of the state appropriation could be raised by the payment to the main organization of a certain small percentage of the gross receipts of every local association, as the horsemen themselves should not be expected to shoulder the entire burden. It must be borne in mind that even if the state does come to the aid of the district fairs, none of the money appropriated is in any way available for stakes and purses. Once the movement is actually under way in the hands of a competent secretary whose every effort is devoted to that project, it will really not be a hard task to raise sufficient money and create enough interest in the movement to push it to a successful conclusion. The absolute needs for the immediate future are a secretary, funds, and a united effort on the part of fair associations, horsemen, stockmen and farmers, and all other persons in any way to be benefitted by the permanent establishment of fairs in California.

Mr. Borden explains his position over his own signature in a communication appearing herewith, and it is the earnest hope that this plain statement of the existing condition of affairs will be the means of producing the action needed — and that without delay. The ideas and suggestions of all persons concerned will be welcomed.

A Statement from Mr. Borden

417 Montgomery Street,
San Francisco, Feb. 9, 1916.

To Members of the Pacific Coast Fair Ass'n:

The resignation of Robert A. Smith of Los Angeles as secretary and treasurer of this association having been tendered some days ago and accepted with much regret by me on behalf of the association, and the failure of the subscription list to attain the sum necessary to make the subscriptions binding rather than merely conditional, make the immediate accomplishment of the following matters vital to the success of the association's plans: The election of a secretary and treasurer and the raising of an adequate fund for carrying on the work originally planned.

The impracticability of holding a meeting of the members at this time and the fact that I myself have not the time to take matters up in person with the various parties concerned cause this means to be taken for placing the aspect of the situation before horsemen in general, whether members of this association or not. I was made president over my personal protest, and on the assurance that the secretary would "do all the work." My affairs prohibit me from giving these matters any adequate amount of my own time and attention, and I request that immediate steps be taken for the election of a secretary and treasurer, for the raising of funds, and for the adoption of a definite plan of action for the season.

Unless such action can be—and is—taken at once I will consider the disbanding of the organization as it at present exists to be advisable, and will return to each of the thirty-two men who are actually members the ten dollars originally paid in by them, accompanied by my resignation and the suggestion that an entire reorganization be effected. I would thank members to advise me immediately whether they wish to go ahead on the original proposition, or wish their money returned and a new start made. In any event my personal support in a financial way is assured and, given a definite plan of action and a secretary to assume the burden of carrying the same to a successful conclusion, my own subscription to the association's funds will be made without reserve or "strings" of any kind.

Assuring every breeder, every owner, every trainer, and every fair association, be it large or small, of my constant interest in their welfare and my willingness to aid in any and every way possible, and requesting from all quarters an immediate expression of ideas concerning the matters referred to herein, I beg to remain,

Most respectfully yours,
I. L. BORDEN.

Entries to Pacific Breeders' Futurity No. 16 for Foals of 1916

The Pacific Breeders' Futurity Stakes Number Sixteen, for foals of mares bred in 1915, closed on February first and attracted a total of seventy-one nominations, the smallest number that has ever been recorded for a Breeders' Futurity. Like the directors of the California State Agricultural Society, the persons in control of the Breeders' Association believe that every effort should be made to tide the industry of breeding and racing through the present hard times, and the stake has been declared closed and will be raced according to the conditions advertised.

While the nominations are not as numerous as was hoped, they are well distributed throughout the state, thirty-seven stallions being represented. Copa de Oro heads the list with eight of the mares bred to him in 1915 nominated in the stake, wih his stable mate Carlokin second with seven, William G. Durfee thereby being awarded both special premiums for stallion owners, fifty dollars in all, payable on February twentieth. Peter McKlyo stands third in the list with five representatives; Expressive Mac, Jim Logan, Mahomet Watts and Vernon McKinney have four each; Guy Dillon has three, while Bond Wilk, Joe Patchen II. and McDillon have two each. The complete list of nominations is as follows:

OWNER	MARE	STALLION BRED TO
J. N. Anderson	Della Derby by Chas. Derby	McDillon
Louis Armbrust	Madge by Mechanic	Richard Alto
E. L. Bartlett	Lady Steinmore by Bonnie Steinway	Exponent C.
J. P. Berry	Thelma I. by Dictatus	Logan Pointer
I. L. Borden	Gold Lilly by Copa de Oro	Expressive Mac
I. L. Borden	Cleopatra by Zolock	Barney Barnato
W. C. Brown	Princess Bessum by Egyptian Prince	Robert Bingen
T. L. Carey	Quinie Direct by Quintell	Hallie's Star
S. Christenson	Ella J. T. by Bob Mason	True Kinney
I. J. Cornett	Salinas Princess by Eugeneer	McDillon
I. J. Cornett	Malvina by Oh So	Vernon McKinney
Hazen Cowan	Nettie W. by Dixie B.	Guy Dillon
S. H. Cowell	Dione II. by Cupid	Peter McKlyo
S. H. Cowell	Hulda C. by Dexter Prince	Panama
S. H. Cowell	Eleanor Sears by Searchlight	Peter McKlyo
C. L. DeRyder	Gracie Pointer by Star Pointer	Vernon McKinney
C. L. DeRyder	Arawanna B. by Sidney Dillon	Vernon McKinney
J. F. Dunne	Letter B. Jr. by Benton Boy	Mahomet Watts
W. G. Durfee	My Irene S. by Petigru	Carlokin
W. G. Durfee	Atherine by Patron	Carlokin
W. G. Durfee	Honey Healey by Zombro	Carlokin
W. G. Durfee	De Ora by Copa de Oro	Carlokin
W. G. Durfee	Subito II. by Del Coronado	Carlokin
W. G. Durfee	Ezelda by Del Coronado	Carlokin
W. G. Durfee	Nonie Girl by Petigru	Carlokin
W. G. Durfee	Pavlowa B. by Petigru	Copa de Oro
W. G. Durfee	Subito by Steinway	Copa de Oro
W. G. Durfee	Ida Sours (thoroughbred)	Copa de Oro
W. G. Durfee	Leonor McKay by McKinney	Copa de Oro
W. G. Durfee	Truly II. by Prince Ansel	Copa de Oro
W. G. Durfee	Rosebud by Directo	Alton
Wm. M. Ferguson	Roan Mare by Jay Bird	Paolus
L. L. Gilpin	Maud Jay C. by Nearest	Copa de Oro
Alex. Grant	Sona by McKinney	Al de Baron
Geo. L. Hamer	Nustina by Nushagak	The Proof
Con Harkins	Belle Bow by The Bow	Wilbur Lou
Hemet Stock Farm	Zeta W. by Nutwood Wilkes	Bond Wilk
A. W. Longley	Brown Mare by Ben Benton	Bond Wilk
A. W. Longley	Black Mare by Sidney	Mahomet Watts
R. J. MacKenzie	Martha Spy by The Spy	Joe Patchen II
R. J. MacKenzie	Merry Widow by Red Pac	Rapallo
R. J. MacKenzie	Eugenia B. by Zombro	Quintell
R. J. MacKenzie	Baroness Psyche by Baron Review	Mahomet Watts
R. J. MacKenzie	Mildred Togo by Togo	Mahomet Watts
R. J. MacKenzie	Zombro Belle by Zombro	Joe Patchen II.
R. J. MacKenzie	Bay Mare by Carlokin	Jim Logan
J. W. Marshall	Ramona by Demonio	Jim Logan
J. W. Marshall	Bally Pointer by Star Pointer	William Harold
Robert D. Mason	Bessie by McKinney	Jim Logan
Roy D. Mayes	Bernice Marshall by Demonio	Jim Logan
J. E. Montgomery	Margaret M. by Chestnut Tom	Expressive Mac
J. H. Nelson	Zyphrus by Zombro	Peter McKlyo
Chas. W. Paine	Sweet Edina by Zombro	Guy Dillon
J. H. Rosseter	Girlie by Stanford McKinney	Vernon McKinney
Geo. F. Ryan	Miss Harris by Sidney Dillon	Otis Jr.
W. L. Selman	Miss Delta by J. J. M. Jr.	Derbertha Bells
C. W. Shaw	Baby by Tanglewood	Skidoo Wilkes
J. E. Short	Honda Girl by Rubino	Wild Nutling
J. E. Short	Rubber Girl by Skidoo Wilkes	Teddy Bear
Chas. F. Silva	Normono by Demonio	Morris A.
A. B. Spooner	San Luis Bell by McGinnis	Copa de Oro
Mrs. Jas. Stewart	Easter D. by Diablo	Peter McKlyo
L. H. Todhunter	Leavinettie by Zombro	Guy Dillon
F. S. Turner	Miss Lyon by Lyon	Pegasus
Valencia Stock Farm	Rose Girl by Amado	Bondholder
D. W. Wallis	Mary W. by Dictatus	Peter McKlyo
G. Wempe	Plumado by Advertiser	Zomblack
G. Wempe	Belle Alwin by Lord Alwin	Stanford McKinney
M. L. Woy	Loma B. by Stam B.	Expressive Mac
M. L. Woy	Florence B. by Bon Voyage	Expressive Mac
M. L. Woy	Strathalie by Strathway	Expressive Mac

THE EXCUSE TRAINER.

A wise man told us that the majority of people who proved failures could well be excused because they had taken up vocations unsuited to them; that in the particular vocation to which they were adapted they would have won success, etc., etc.

This brings to mind the thought that there are a whole lot of men in the horse business who have missed their calling, and, as a consequence, have to be put down in the failure list. But the great trouble is that these incompetent horsemen never get wise to the fact that they are "in bad"—never "get onto themselves."

It's too bad, but too true, as all of us recognize. The thing that keeps these failures in the business and makes it possible for them to "get by" is the fine line of excuses which they have evolved through years of practice. "Self-preservation is the first law of nature," and following this law the trainer-failures make up by means of excuses for what they lack in ability. It becomes an art with them and the longer they live the more proficient they become.

No contingency arises which they cannot readily meet, and while some years ago Murray Howe published his famous "Excuse Book," he frankly admitted that so far as covering the field was concerned, he hadn't even scratched it.

These "excuse trainers" make more trouble for starters, judges and secretaries than all the good trainers put together; also they are the most constant "kickers" and "knockers," and from first to last do the sport a deal of harm. But, like death and taxes, they are inevitable—always with us, and "here to stay."

Excuses and "alibis," however, are not confined to the incompetents. The top-notchers have to pull them nearly every day, but, of course, they do not lean on them, do not depend on them for their strongest support, as do the regular "excusers" of whom I am writing.

In the front ranks of "excusers" are those trainers who have become race-shy. They "stall-walk" the day before they have to get up to drive a race, and not infrequently before post time they have an attack of "Jim Ramey's." Naturally they are too nervous to drive a good race, but no matter how badly they mess things up, they come up standing, and with truly marvelous facility explain to the owner the various causes that were responsible for their steed's bad showing. Of course, the starter had it infor 'em, always had, the blankety blank—— ——. Sent them away when they were ten lengths back, and the horse not flat. They would have won the second heat had not So-and-So run into them on the turn. "Didn't you see it? Why, it was as plain as day; but them judges are not only blind, but crooked as well. What chance has a fellow got on this circuit, anyhow, with starter, judges and the Sec. playing a few favorites an' lettin' their pet drivers get away with all kinds of rough stuff?"

* * * *

Passing through the paddock one afternoon I almost collided with an excited, perspiring gentleman of my acquaintance, who was holding in his hand a bottle of wine. He was hurrying like a fire engine answering a 4-11 call, elbowing bystanders out of his way and giving the general impression of a man whose nut was occupied by a diseased K. "Why the wine?" someone asked him, and he responded, "Going to give it to my horse; got a bet down."

A veteran swipe was what on the horse, his face wearing a disgusted expression, butted in with "better give it to the driver."

And it did seem as if the driver needed the stimulant, for he was pale and shaking like a wet dog on a pair of steelyards. No—the horse didn't win the heat; but he seemed to enjoy the bubble-water.

* * * *

I can't recall what Murray's excuse No. 1 was, but the distinction rightly belongs to the trainers who "get away" down at the draw-gate and then roar on the starter. That's where they have been getting off all their lives, and the only way that you could get them to score down with a field would be to tow-rope 'em. Always they are beaten before they get the word, even with steeds that outclass their fields. With this sort you couldn't fix a race and make them win it, for something would surely "happen" before its termination.

Being "run into" is, of course, the one stereotyped, standard, blown-in-the-bottle excuse. Most of the trainers that use it, however, use the overland route and never drive near enough to the field to be run into with a sulky thirty feet wide.

There is, though, another type of "run into" excusers, viz., the drivers that get so excited in a race that they shut their eyes and drive guideless, running into every one unfortunate enough to get close to them, and occasionally taking a slam at the hub board. I have in mind an especial case that came under my observation several years ago. This driver used to be all over the track, with the result that he caused a series of wrecks wherever he appeared. The other drivers gave him a wide berth, but he was into them just the same. I saw him, on one occasion, pull across the track from fourth horse place and hook into an inoffensive driver who was at the pole. Seeing him coming, the victim began to shout, "for the love of Mike, don't grab me!" but the next instant the two of them were struggling amid the wreck of scrambled horses and sulkies. The victim was naturally irate, but I intervened before hostilities had gone very far, telling him that the wrecker didn't do it on purpose. The language that that man used when he turned on me was something fearful to hear. I haven't the figures on how many sulkies this guideless driver tore up in one season, but I do know that there was a constant relay of rigs going and coming to and from the factory.

One day the owner, who was a mighty fine man, came to me and said: "I can't understand why it is that all the drivers are bent on running into Bill! Every week they have cut him down and the expense for sulkies is something fierce."

I "felt for him," but didn't think it my office to "wise him up."

* * * *

When Ben Walker was driving on the Grand Circuit he was constantly used as an "alibi" for drivers who were accustomed to pulling the "run into" excuse—Ben did occasionally "take care" of a fellow driver when the money was down. I think it was at Windsor, Ont., that the incident I am about to relate occurred. A driver whose name I will not mention ran his horse into the fence on the first turn. The steed broke and he was distanced, whereupon the jehu mounted the judges' stand and put up the plea that Ben had cut him down. The judges examined the score-card and informed him that they could not see how that was possible in view of the fact that Ben had no mount in the race.

He was, however, driving in another race, and it so happened that I was standing with him beneath the judges' stand when the driver went into the stand. Ben was hot upon hearing the driver's explanation, but when the climax came his hawk-like features opened in the widest of smiles and he remarked, "I suppose that if some fellow got distanced up in Maine and I was out in California, he would blame it on me."

* * * *

While not quite pertinent to the subject, I may relate an incident happening on an occasion when everyone expected Tommy Murphy to make a kick—but he fooled them. It was at Fort Erie that it happened, and Tommy's mount was View Elder. Billy M. was first choice, and he was scoring for the first heat at a terrific rate, pulling Bill Sweeney and fighting for his head. Meantime Tommy was starting down, but taking back, letting Billy M. tear away. Finally the starter gave the word with View Elder facing the outside fence and standing flat-footed. Tommy proceeded to jog around the track, the big gang crowding around the judges' stand in order to hear him protest, but after dismounting, the New Yorker walked up the stretch without even glancing at the judges. He had "got what was coming to him," and accepted it gracefully.

* * * *

Being distanced by a short margin often brings up the excuse that the driver was in by a couple of lengths at least, and could have beaten the banner away off if he wanted to. I always thought the consolation given by Walter Cox to a fellow reinsman who vociferously proclaimed he wasn't distanced was about the best in its line I ever heard—it's an old one, and I have told it before, but it's worth repeating.

"You were right near me, Walter," proclaimed the angry one, "and you know that I was in all right."

"Sure you were," replied the complacent New Englander, "but that mare of yours was stopping so fast that she backed out again."

* * * *

"Got me in a pocket. Couldn't get out or would have won, sure!"—that's one that was sprung when they were racing dinosaurs in the prehistoric age. I heard it sprung on an owner once, who had put a good bet down on his horse, and was pretty sore at the outcome.

"Yes," he exclaimed with fervor, "and while they were putting you into a pocket the bookmakers were putting their hands into my pockets."

* * * *

The "excusers" were afforded the very best possible ground for handing out that time-worn and somewhat decrepit one, "short of work," last season, for it rained a great deal in the spring. It was good throughout the entire summer, and I heard it circulated late in the fall, even. And this reminds me of the companion that goes with "short of work": "He never was any 'count till he had a couple of races under his belt." I heard an old-time successful trainer pull it once after a race at Milwaukee, Wis. Dick McMahon and myself landed in the beer city one Monday morning for the state fair, and about the first man we met at the track was the "old timer." He was seated on a trunk, and after greetings had been exchanged, turned to Dick, remarking: "Dick,

do you want to see a little bit the best trotter that ever wore hair? Well, there he is—that brown fellow with his head out of the stall."

"Can he step some?" inquired Dick.

"Step? Why, he can trot holes in the air. Just keep your eyes on him when he parades this afternoon."

I neglected to state that the old-timer had wintered at Memphis, and it was now fall, and we were wearing overcoats. We did watch him, and saw him decisively beaten by a little bush mare that none of the mile track campaigners had ever heard of before.

"Come," said Dick, "let's hear what the excuse is," and, sure enough, we heard it. "Old-timer," with his face covered with the dust that the "busher" had put there, was ready for us.

"I'm not a bit surprised," he said. "You see, this fellow never was any 'count 'till he had a couple of races under his belt."

"And when," inquired Dick, who was somewhat nonplussed by being brought face to face with the antediluvian alibi, "do you expect to get him ready? You started in training about Jan. 1, and now it's getting ready to snow?"

* * * *

Now, here's one that has cheered the hearts of many owners, and kept many trainers in position to put their feet under tables three times a day and partake of viands other than hog and hominy.

He comes home in the fall, re-establishes himself at the fair grounds, and prepares to enjoy a pleasant winter. The owner is not quite satisfied with the manner in which the horse has raced, but when he comes out to visit the trainer, finds everything nice and snug and when given this one, he chuckles with delight.

The trainer greets him cordially, leads him out to view the steed who is contentedly munching his hay, then he says: "Well, boss, the steed didn't do quite as well as I expected, but I've brought him home sound, and there he is, just look at him, and (with a knowing nod of the head directed to the adjacent quarters of a hustling brother trainer, who has been out getting the money all season), we ain't got a cripple to nurse all winter like some fellers I could mention."

Does it get by? Well, rather—same as it did before Messenger was imported.

Does the owner think about the shipping, feed and entry bills? He does not—instead he goes down town and tells his friends, "We didn't do so very well, but we haven't a cripple on our hands like some people I could mention. That's what I like about Bill's training," he adds, "he don't put them in the hospital like ——," etc., etc.

* * * *

Some of the "excusers" seem to have the toughest sort of luck with tires blowing up and boots getting loose, and many lost races may be attributed to these misfortunes. The very day that the horse is ready to race for his life, the track just to his liking, and almost a certainty that he can tramp on his field, what happens?

"Why, just another of them continental d— pieces of bad luck! Suspenders busted, and let the knee boots down; didn't you see them dangling around his legs?"

"I had that tire fixed only last week, but, blankety blank, down it goes and first thing I know it's wedged solid in the fork. Win? Of course I would have won."

* * * *

"Hitting the arch with his hocks" may have worm holes in it, and be weak in the knees, but after leading his ace it's the "excuser's" next best card. That excuse is usually saddled on the swipe who hitched the horse too close. Last summer I saw it pulled three times in one afternoon by a hard-pressed "excuser," who had induced the owner and his family to come and see the horse win. The race really looked safe for the horse, for the "excuser" had dropped him into a spot where he didn't have a chance to lose if he behaved. Well, to make a long story short, the horse broke in the first heat and was charged with hitting the arch; but, despite a new rig after each heat, he continued to spill the beans. The unfortunate "excuser" kept pulling the same excuse all the while, being for the first time in his life unable to think of anything better. He had my sympathy, for that night he and the owner parted company. The "excuser" was broke and discouraged, but by this time I will wager he has a nice bunch of horses, for he is a shifty fellow and very plausible.

* * * *

But there are many little tragedies back of the mass of excuses handed out—poor, helpless trainers, with families to support, insisting upon sticking to the horse business despite the fact that they are incompetent. Year after year they struggle along, always hoping for a change in what they regard as their ill luck, but never improving their condition. Naturally they become sour upon the world, and eventually arrive at that stage where they think that every man's hand is turned against them. I suppose every business or profession has in its ranks a multitude of this same type of vocational misfits and failures, men who cannot make good, but those in our business appeal to us more for the reason that we are in closer touch with them.

The training profession at best is one that requires brains and skill in order to help its followers to climb even to the middle of the ladder; so how can the weaklings hope to get their feet off the ground?—Marque, in Horse Review.

NOTES and NEWS

Samuel Gamble, one of the most widely known horsemen of the old school and who for very many years played a most important part in the successful establishment of the family of the trotter on this coast, died Wednesday, February ninth, in this city after an illness of short duration. Funeral services, attended by a large number of friends, were held Friday afternoon at the parlors of Bunker & Lunt, 2666 Mission street, interment being private. Mr. Gamble was well along in his sixty-seventh year and until a short time ago had enjoyed very good health, the news of his death coming as a surprise to all save a few of his most intimate friends. A more fitting notice of his work in behalf of the one living thing which he placed above all others, the trotter, will be made in an early issue.

Professor E. P. Heald of this city was re-elected second vice-president of the National Trotting Association at the biennial meeting of that body Wednesday in New York. B. F. Rush remains a member of the Pacific Board for another six years, and the election of Thomas S. Griffith to the same body was confirmed, Mr. Griffith filling the vacancy caused through the death of Colonel J. C. Kirkpatrick of this city.

◈ ◈ ◈

Not content with being by far the largest winning driver on the coast in 1915, William G. Durfee now steps to the front in mid-winter form and grabs both moneys in the special awards to stallion owners in the recently closed Breeders' Futurity. There are moments when the wild desire to suppress this man Durfee must course hotly through the veins of more than one "good man and true" here in our western country.

◈ ◈ ◈

Harry Nelson of Selma has the trotting mare Nellie Mac at home for a little midwinter layoff, but she will be put in active training again as soon as that time of year rolls around—and the weather man permits—with the intention of fitting her to race in the green trotting classes this season. She trialed for Charley Clark last fall in 2:09½ before her letup, and looks to be a sure 2:10 trotter for Expressive Mac 2:25½, whose present trio of representatives in the charmed circle are all pacers.

◈ ◈ ◈

President C. W. Clark of the Golden Gate Thoroughbred Breeders' Association arrived back in California some days ago after a lengthy visit at eastern points, the race track at New Orleans being one of the chief centers of attraction for him during his absence. There has been considerable speculation as to whether the association of which he is the head would give a running meet this summer or fall, either at the exposition course or at Tanforan, and an announcement concerning the same will probably be made within the course of the next few weeks.

◈ ◈ ◈

Sutherland & Chadbourne, the Pleasanton trainers, are wintering a nice lot of young things that will be keyed up for the season's futurities, and have already issued a warning that all the money is not going to Los Angeles—and if our memory is not at fault there was a little that failed to go that way last season as well. Verna McKinney (2) 2:13, the fastest filly of her age and gait in 1915, is the best known of the younger set, which also includes a two-year-old trotter by The Proof 2:10¾ out of Deviletta 2:10½ by Diablo 2:09¼, owned by W. S. Harkey of Gridley; a two-year-old trotter by Prince Ansel (2) 2:20½ owned by W. C. Brown of Vancouver, B. C.; a three-year-old pacer by Joe Patchen II. 2:03¼ out of the great brood mare Jessie M. by Del Norte; a three-year-old trotter by The Bondsman out of the producing matron Kate Kopje by Cresceus 2:02¼, and a yearling by True Kinney 2:12¼ out of Serpolo by Mendocino, sire of the dam of Mary Putney (3) 2:05½, etc. The record horses Bon Cres 2:10¼ and A. B. C. 2:10¼ and a four-year-old green pacer by Joe Patchen out of a daughter of McAdrian are on the jogging list and all are wintering in fine shape.

◈ ◈ ◈

Millard Sanders, who is wintering a bit larger string than has been the case for the last winter or so, is taking especial pride in the off-season condition of those two good young trotters Natalday (2) 2:13½ and Future Tramp (4) 2:09¼, both of them fit to the highest degree and ready for the harder work that will come their way when the weather moderates. The Wilbur Lou colt will be a hard nut to crack in this year's stakes and the Trampfast fellow showed last fall that he is the making of a real trot horse. Owner Tim Sexton is now bewailing the fact that he overlooked the four-year-old gelding record of 2:07¼ made by Uhlan some seasons back, as he is confident that Future Tramp could have scaled that figure appreciably had he been pointed for it and taken to a fast track for the trial.

The annual meeting of the stockholders of the Lower California Jockey Club was held a few days ago at Carson City, Nevada, the organization being incorporated under the laws of that state, the keynotes of the meeting being harmony and the fixed idea that they are on the right track in their endeavor to establish thoroughbred racing on the border. The Tia Juana meeting was progressing very nicely until the floods put the plant out of commission, and the work of rebuilding will be pushed just as rapidly as possible. The Tia Juana river is now meandering placidly through the center field, after wiping out about every vestige of the track and cutting two or three channels for itself, and the future plans of the club include an increase in the capital stock for the raising of sufficient funds to put the stream back where it belongs and guarantee its staying there through the construction of an extensive system of levees, while the expenditure of a considerable sum in missionary work on the public highways is also under consideration.

◈ ◈ ◈

Secretary Charles W. Paine has recently announced that the California State Fair for the season of 1916 will be held on September second to ninth, inclusive, thus giving the big event two Saturdays, as is the usual custom here. While no fair was held last year owing to the exposition the secretary and his staff were far from idle and their own time, and that of numerous workmen, was devoted to making extensive and pleasing improvements in and about the grounds in the way of lawns and fills, while buildings have been fixed up and put in the very best of shape for the staging of this year's fair. Many pleasing features are being planned for the big event and the publicity bureau is already at work letting the public know what to look out for. The speed program, as always, will be a main attraction, and quite a string of trotters and papers are being prepped over the track there for the battles to be waged in September. The way the weather has been this winter the Sacramento track has been in working shape for a greater portion of the time than some of those that are generally considered as being by long odds the best in the west, so that the training colony has been pretty well pleased.

◈ ◈ ◈

When the Shinyo Maru cleared for the Orient last Saturday she carried in a specially constructed "cabin de luxe" a pair of aristocratic gentlemen whose names failed to appear on the purser's list of passengers. They were not members of some war-stricken royal family, fleeing in disguise or seeking the shelter of an incognito; they made their reservations in their own proper persons and are scions of royal families that are popular in every part of the globe, in peace or war, the American saddle horse. Some weeks ago the Japanese-American Association, wishing to present their emperor with a coronation gift and recalling his fondness for horses, decided upon this course of presenting their respects and commissioned Dr. J. C. Quinlan, the veterinarian of this city, and Dr. F. Morioka of Los Angeles and a retired Japanese cavalryman, Major A. Asano, to secure the best pair of five gaited geldings available. Many saddlers of high degree were subjected to the most rigid tests and inspections, with the result that Montgomery Rex, from the stable of Charles R. Hadley of Los Angeles, and Don Pedro, from the farm of Judge E. A. Bridgford of this city, were selected as most fit to occupy quarters in the imperial stables, the sum of five thousand dollars being paid for the two. Montgomery Rex, bred in the Blue Grass, is an eight-year-old bay gelding by Montgomery Gay out of Lady Rex McDonald, but Don Pedro is a native son of the golden west, bred and schooled by Judge Bridgford, California's pioneer breeder of the gaited horse, and at the time of his selection by the Japanese commission the Judge's personal favorite mount. In breeding he is a representative of the cross that his former owner always contended was the very best one for the production of the highest type of excellence in the animal destined for riding use, that of the strictly saddle horse stallion upon the trotting bred mare of high quality. His sire is the famous Artist Junior, the premier at the Bridgford establishment for some years, while his dam is the bay mare Azmoori 2:20¾ by Nutwood Wilkes 2:16½, grandam Azrose by Azmoor 2:20½, great grandam Arodi by Piedmont 2:17¼. These blood lines are representative of the most famous American families of race winners on the trotting turf, and trace in various ways to the great thoroughbred strains upon which the trotting family is founded, the degree of individual perfection attained by the gelding under consideration being most eloquent testimony to the soundness of Judge Bridgford's theory. Both Don Pedro and Montgomery Rex are perfectly schooled five gaited saddlers, and were pronounced by the gentlemen making the selection to be sound in all particulars and in every way the most desirable pair obtainable on the coast. They were accompanied on the journey to their new home by Dr. G. Sakuma, a Japanese veterinary, and Y. Suzki, of the Agricultural College at Tokio. Shortly after their arrival in the Flowery Kingdom they will be presented to the mikado by Y. Numano, consul general from his country at San Francisco, now on a visit to his native home. The imperial stables contain at present some one hundred and twenty horses, largely recruited from Europe and Australia, and the exportation of Don Pedro and Montgomery Rex may mark a new epoch in American trade relations with the Orient.

ROD, GUN AND KENNEL

CONDUCTED BY FISHER HUNT

STRICT PATROL TO PROTECT TROUT.

Although the shooting season is past, Fish and Game Commission patrol deputies have been active throughout the southern part of the state. The southern division commissioner, M. J. Connell, has been laying plans for paying particular attention to the trout this spring.

Men will be put on the streams during April to see that no one interferes with the spawning steelheads on their run up from the sea to the head waters, wherein they deposit their eggs, and naturally restock the waters. This is considered the most valuable stocking possible, as the young fish are set free under the most favorable conditions in a state of nature.

Experts have figured the mortality of naturally-spawned eggs to be 97 per cent in salmon, and by scientific artificial cultural methods the proportion can be exactly reversed, 97 per cent being reared to distribution size.

It is not thought the mortality among wild-propagated trout runs near so high. They have many natural enemies, more in some streams than in others. Of all these enemies, the various snakes are among the very worst. Most fishermen make it a point to eliminate unfair competition by killing all snakes found on the streams. They are there for fish. They take the small ones mostly, but get some of the takeable size.

* * * *

The great volume attained by some of the San Diego streams is apt to encourage a considerable run of steelheads up into them, in the opinion of quite a few trout anglers, who avail themselves of what chances that county offers in their line. The Fish and Game Commission has planted every possible stream in San Diego county with the hope of giving the angling lincensees some such return as they had from the black bass plantings in the reservoir lakes above San Diego and Escondido. Of course the terrible catastrophes visited upon Otay have changed all this.

SHOOTING AT SHELL MOUND RANGE.

Lieutenant John F. Mues of the San Francisco Schuetzen Verein, shooting with the Shell Mound Pistol and Rifle Club as the guest of that club, made 220 points in a ten-shot score Sunday, one of the highest of the day.

R. S. Wixson shot with the Shell Mound Club after an absence from the range of two years and made excellent scores.

Many members of the Shell Mound Pistol and Rifle Club made high scores above the 200 mark. Alfred Thompson made an exceptional high score in class A, making a ten-shot total of 223, and the following members scored 200 or better: L. S. Hawxhurst, K. O. Kindgren, R. S. Wixson, A. M. Poulsen, C. H. Otten and L. Erickson.

A 100-shot rifle match between Herman Enge and E. Schierbaum on one side and K. O. Kindgren and W. A. Siebe on the other side will be held on the Shell Mound range on Sunday, February 20th.

Following are the principal scores of the day:

Shell Mound Pistol and Rifle Club monthly shoot: Class A—L. S. Hawxhurst, 214, 209; A. T. Thompson, 223, 208; K. O. Kindgren, 207; R. S. Wixson, 203, 200. Class B—A. M. Poulsen, 206, 183; O. P. Petersen, 163, 168; C. M. Kraul, 174, 162; H. Purrmann, 178; C. Otten, 214, 190. Class C—G. R. Hauser, 188, 185; L. Erickson, 202, 192. Class D—B. Brunje, 155, 148; P. Kulik, 148, 177; B. Heinemann, 174, 160; E. A. Johnson, 167, 121; John Bender, 182, 193.

Shell Mound Pistol and Rifle Club monthly pistol scores: Class A—Captain C. W. Seely 93; R. S. Wixson 86, 87. Class B—L. Erickson 78, 88; Captain George Larson 76, 73; C. N. Kraul 80, 86. Class C—L. S. Hawxhurst 80, 81; W. Guild 84, 85; E. Schierbaum 67. 73; T. Bridge 79, 84; A. T. Thompson 82, 86; Captain Harry Goetjen 80, 62. Class D—O. P. Peterson 78, 85.

Danish-American Rifle Club, monthly medal competition: C. Peterson 54, G. Riis 37, P. S. Miller 54, C. L. Nielsen 46, T. Andersen 59, H. Frank 25, F. Nielsen 54, S. Mathisen 53, G. C. Kallerup 35, M. C. Hansen 50, T. Christensen 52, P. Westergaard 28, C. Iversen 44.

Deutscher Krieger Verein, monthly medal shoot: Champion class—C. Hartmann, 335; first champion class, Charles Metzger, 420; first class, Charles Meyer, 352; first best shot, Carl Weggenmann; last best shot, John Bender; most centers, John Bender; most red flags, Charles Metzger.

Bullseye shoot, prize winners: John Bender, Chas. Meyer, C. Metzger, Chris Hartmann.

Independent Rifles, monthly medal shoot: Captain Harry W. Gaetjen 57, P. Schonig 63, M. Andresen 48, J. Steiger 48, E. Hoffendorf 11, Corporal J. Birkman 11, C. Iversen 34, H. Schlichtmann Jr. 21, P. S. Miller 45, J. Westergaard 35.

JOHN PROCTOR IS NATIONAL CHAMPION.

John Proctor, winner of the National Championship for 1916, is a big white and lemon colored pointer dog and is so well known to the public that he needs no long panegyric in order to introduce him to the public. He is probably the best known dog in field trials, for he has been before the public five years, during which period he has won between six and seven thousand dollars in money, and his string of wins consists of many firsts, seconds and thirds, and two chicken championships on the prairies. His record is probably better than that of any dog that ever lived. Four times this pointer has competed in this greatest of all events in field trials, and at last, with the fourth attempt, he was successful and may now be retired on his laurels, for John Proctor deserves that, after all that he has done for his owner, A. L. Curtis of Belton, Texas, and his handler, Charles H. Babcock, the lad who piloted a pointer on to victory the first time a National Championship was ever won by a short hair. It has always been Babcock's ambition to make a National Champion of John Proctor. He felt that this pointer was a dob of real National Championship calibre and it was because of this faith in the dog and his own perseverance that he has succeeded.

John Proctor has had many good things said about him and many bad ones, but those who saw his race which took place on the Ames preserve at Grand Junction, Tenn., during the week of January 17th, will go away with the memory of a great event, for John Proctor really ran two magnificent heats and he deserved his win beyond all question of a doubt. In fact, the consensus of opinion was that he won the stake in the first series, but these judges make all dogs show everything that is in them. They will never confer a championship unless a dog shows them from every angle that he is worthy of the title. They are certainly satisfied in their own minds that they have crowned a champion.—American Field.

VIEWS OF A WESTERN TRAP SHOOTER.

Editor Breeder and Sportsman:

As a trap shooter for sixteen years who has witnessed the sport in every form from A to Z, I would like to give my opinion in the Breeder and Sportsman as to how I would like to see a program for the Grand American Handicap.

Firstly, I am not finding fault with how the Interstate Association is running the trap shooting classic, but I have an opinion of my own which differs from theirs. All of us do not want to think alike. Secondly, once we were satisfied with flint-lock guns and black powder; once we were thankful to walk or ride a horse; once they cut the grain with a sickle, but it is all changed now. Twenty years ago they started to shoot handicaps and sixteen years ago the Grand American Handicaps commenced. We still stick to the handicaps. Don't you think we are a little behind the time, and have not kept up with the procession? Thirdly, I would like to see it called the World's Championship or American Championship. It is our king-pin event and who ever heard of any championship event of any kind being a handicap affair?

Now, what was wrong in Chicago in 1915, when 275 men did not finish the G. A. H. and 125 who did finish did not break 80 per cent? Something must have been wrong with that Perfect Handicap Committee. Here were 400 shooters who were undoubtedly peeved, and the handicap committee did as well as any other ever did. The time never was nor ever will be when any handicap committee will handicap 500 or more shooters justly. Eight hundred and thirty-four amateurs went to the G. A. H. in 1915. Knowing that only one could win the Big Race, how many do you think would go to St. Louis in August if they could see a programme like this: Shoot five 100-target events, each called by a special name, one of them to be the Grand Championship of America. Entrance fee, $22 each, all at 16 yards. The five high guns to receive $800 to first, $700 to second, $600 to third, $500 to fourth and $400 to fifth, making $3,000. This is reckoning, we will say, on 500 entries. It would make a purse of $10,000, and would leave $7,000 to be divided among the next hundred high guns, of equal shares of $70 each. The money added by the club and the Interstate Association could be used to buy five trophies for the five high guns. As there will be twenty-five high guns, they can afford to buy twenty-five trophies, and trophies that any one of the twenty-five lucky winners will be proud of during the rest of their lives.

As each day's program is over the five high guns who won from $400 to $800 will be spectators and they will be proud to be on hand. They will not likely quit at sixty shots or shoot through at 21 to 23 yards and feel put out at breaking only 70 to 85. They will be boosters for the game. Now, what happens if we have a 1,000 shooters? The high men get the same, as that is enough under any condition. The 100 high guns, however, would get $140 each, enough in money to pay a shooter's entrance for the whole week and railroad fare from nearly any state in this country.

With twenty-five Grand winners, one King-Pin, and 500 chances to win $140 each, how many shooters do you think would be at St. Louis? If they advertised such a program as I outlined there would be 1200 shooters in St. Louis.

Under the handicap system, some shooters have gained advantages. As I said before, it is almost impossible for the handicap committee to properly allot the handicaps. This has naturally created criticism and bad feeling and has done the game harm. Let us have the Grand Championship of America held with every man at 16 yards and the five high guns will be pleased to step aside and let others have a chance. It will not be a case of 400 out of 800 kicking and knocking about the handicaps handed out to them.

Now, a word about the State Champions, or runners-ups. It must be a grand sight to see champions of each state line up in a 100-target championship. The $50 given to each of them is a nice gift, but it does not cover the bill in every case. It is well for the shooters who live near where the Grand American Handicap is held but those far away lack about $20 for buying the railroad ticket alone. I think the champions of Oregon, Washington, Idaho, California, Arizona, Maine or Florida are just as good sportsmen as the men who live near where the G. A. H. is always held, but they are put to three or four times the expense. I suggest that some of these champions should receive $75, others $60, and grade down to $50 and $30. They should receive equal in proportion to the distance they have to travel. All the far-away champions have to give up a week more in traveling back and forth.

Another thing—by all means have a Ladies Grand Championship in 1916. They are a loyal bunch and great boosters for the target game. Several hundred are at present taking part in the "sport alluring" in different parts of the United States.

Yours,

A WESTERN TRAP SHOOTER.

MARKET HUNTERS ARRESTED.

Deputy A. J. Stout had some stirring experiences with the market hunters on the west side of the San Joaquin, where an idea seems to have become spread that game laws "don't go."

The Fish and Game Commission's special patrol to break up the illicit duck traffic resulted in eight cases being made by Deputies Newsome, Kimball and Stout, who worked together, and handled the situation to so good an end that two convictions already have been secured, and it is thought likely others will follow in cases pending as the evidence is equally positive.

These cases were mostly for violating the prohibiting the use of animals as "stalking horses" or "blinds" with which to sneak up within a big gun's range of sitting ducks.

* * * *

Several states have lengthened the season for hunting game, while other states have shortened the seasons for various reasons. Montana has lengthened the hunting season on elk and deer two weeks; Florida has added 20 days to the quail season, and Nevada four and one-half months on sage hens, one month on grouse and two weeks on quail. On the other hand, Arkansas has curtailed the deer season three months, and Oregon and Washington shortened the deer season two weeks. Minnesota trimmed 20 days from the dove season, and Oklahoma has taken six weeks from the season on quail.

* * * *

Providing it doesn't rain on Sunday, February 20, the postponed telegraphic rifle match between the Los Angeles Rifle and Revolver Club and the Nogales, Ariz., club will be held. The riflemen will shoot over the M. R. A. course, 200 and 300 yards time fire, and 300, 500 and 600 yards slow. The 10 high scores will count in the winning.

BALL PLAYERS LOVERS OF OUTDOOR SPORT.

Among those who ran dogs at the North Carolina Field Trials was Jack Dunn, the Baltimore baseball man who gained considerable prominence in field trial circles a few years ago with Ben Stone, one of the best dogs seen at that time. Dunn also is the breeder of that great bitch Kitty Gaines, one of the leaders of the present day field trial dogs. Another well known figure in baseballdom who is a familiar figure at the big trials is Roger Bresnahan, manager of last year's Chicago Cubs.

‡ ‡ ‡

Fred Clarke, former manager of the Pittsburgh National League Baseball Club, found his stocking full to overflowing last Christmas morning. The crowded condition of the stocking was due to a very beautiful and costly trap gun, the present of Mrs. Clarke, being forced into it.

The gun is a work of art. It is a single-barrel, 12-gauge gun for clay target shooting and is engraved extensively, the chief adornment being a figure of Mr. Clarke in a Pittsburgh uniform, with bat in hand. This is done in platinum and gold inlaid in the grip.

Clarke is an ardent devotee of the Sport Alluring, as is Mrs. Clarke, and he is now living a retired life on his ranch near Winfield, Kansas.

BIG SHOW FOR GOLDEN GATE CLUB.

Judging from the inquiries that have been received by the officers of the Golden Gate Kennel Club from dog fanciers all over the Pacific Coast regarding their coming show, it is evident that this year's exhibition will be the largest ever held by the club.

Irving C. Ackerman, president of the club, has invited Walter H. Reeves, kennel manager of the Vickery Terrier Kennels, of Barrington, Illinois, to judge all breeds. Reeves is considered to be one of the foremost judges of terriers and bulldogs in the world.

The following are a few of the California fanciers who have made known their intentions to exhibit their dogs: H. M. Robertson of Pasadena, owner of the largest boarding kennel in the South, who will bring a large string up to the show; A. J. Molera, of Monterey will send Dan Shuttleworth, his kennel manager, up with the entire kennel; Dr. T. Martin Smith will show Art Smith, his crack Boston terrier; Miss Lydia K. Hopkins of the Sherwood Hall kennels will show Pekingese and Japanese spaniels; Captain of Detectives Tennant of Seattle will send down his best Irish terriers to compete against the local fliers; Miss Vera Lindgren of Burlingame will show her famous toy poodle, Babbe; Mrs. Anita Baldwin, California's famous dog fancier, is expected with her kennel of noted prize-winners.

‡ ‡ ‡

Mrs. Norwood B. Smith, of the Cragwood kennels, is negotiating with St. Bernard breeders in England for two bitches. Mrs. Smith last summer imported Oakworth's O'Siris, at a large figure.

‡ ‡ ‡

The past week has been one of rush and bustle about the new offices of the Westminster Kennel Club, for the entries have been piling up in every mail for the fortieth annual dog show of the time-honored organization, which will be held in Madison Square Garden during the week of Washington's Borthday. Judging by the early entry William Rauch, chairman of the dog show committee, is confident that the benching will be better even than last year. In view of themany complications regarding the importation of dogs due to the wars, this state of affairs is very pleasing to the projectors of America's oldest and greatest dog show.

Among new and old exhibitors who will be represented in strength are the Rockcliffe Kennel of bulldogs, the Valley Farms' Russian wolfhounds, the cocker spaniels of H. K. Bloodgood's Mepal Kennels and the German shepherd dogs of Mr. and Mrs. Benjamin H. Throop. The Vernon Castles and Thomas F. Ryan have also sent early entries of German shepherd dogs.

An unusually large entry of Airedale terriers is assured and those to come with great reputation from California and the Middle West, in conjunction with the eastern entries, are relied on by the fanciers of this large and active type of terrier to make the breed the most important in that section of the show.

‡ ‡ ‡

One of the sensations of the Philadelphia Boston Terrier Club's recent speciallty show was the nine-year-old Champion Chip Chase, owned by A. G. Rohr, the financial secretary of the club. This dog in his palmy days was one of the leading lights in the Boston terrier fancy in and around Philadelphia, and although at the ripe old age of nine years he was shown in remarkably good condition and seemingly as fit as ever. He won the blue in the class for champion dogs.

‡ ‡ ‡

Jay Gould has three German sheep dogs on his place at Saeger, Ulster County, N. Y., which he is using to hunt coon. They were obtained as an experiment and are proving that they can be adapted to this sport. One in particular is most proficient at trailing and finding ccon, and when sent in to finish the animal is a veritable terror.

‡ ‡ ‡

One of the first of the old guard of dog fanciers to be claimed by that grim reaper, death, during the new year is Dr. J. Lee Morrill of New York, who died at his New York home last Sunday. Dr. Morrill was the president of the French Bulldog Club of America for a number of years and was always active in the welfare of the little bat-eared bulldog for which he had such an attachment. He was well liked and respected by all who knew him and his passing will be regretted by all fanciers, and especially by those who knew him as a friend.

‡ ‡ ‡

Seattle announces early in March for a spring show. They hope in a few days to name their judge. Dr. Brydon, the collie fancier, was re-elected president for another year and they have added many new members.. It is to be hoped that this year they will have a spring circuit which will make it more interesting for southern exhibitors.

‡ ‡ ‡

Bob Armstrong of the Thistle, North Carolina, is now training dogs exclusively for John J. Graham, according to recent report. Bob contemplates bringing a great string on for the Westminster show, among them the famous trial pointers Sun Kist and Tom Platt. Every dog that he has run at this year's trials has been placed, and he has two setters, Armstrong's Daisy and Pocket Edition, with which he intends to take home some of the silverware offered at the New York show for dogs of this breed. For fear that Bob thinks he has a cinch on the merchandise Mr. Kirkover is preparing his great setter Fairy Beau, winner of five firsts at the field trials, to take some of the cups back to Buffalo.

GOVERNMENT ENCOURAGES RIFLE SHOOTING.

Washington, D. C.—Reports reaching here from all parts of the country show an awakened interest in rifle practice among civilians as a part of the program of national defense. Under a law passed by Congress two years ago ten or more civilians in any locality can organize a rifle club under War Department rules and on affiliation with the National Rifle Association of America, which co-operates with the government in promoting rifle training, receive a free issue of rifles and ammunition at the ratio of one rifle for each five club members and 120 rounds of ammunition per member per year. At present there are about 700 such rifle clubs organized in practically every State, and inquiries reach Washington by the dozens daily for information as to organizing new clubs.

The National Rifle Association is bending every effort to increase the number of clubs in the country and offers every encouragement for their formation. The organization of these clubs is regarded as a step in the direction of national defense.

It is to be hoped that quite a number of rifle clubs may be represented by teams at the national matches which have been recommended by the National Board for Promotion of Rifle Practice for Jacksonville, Fla., beginning October 20th next. Secretary of War Garrison has not yet acted on the matter but it is highly probable that he will approve holding matches this year. Riflemen throughout the country were pleased at the action of the Board in voting for annual matches instead of holding these competitions every other year. At the recent meeting of the National Rifle Association the following officers were elected for 1916:

President, Lieut. Col. Wm. Libbey, Princetown, N. J.; first vice-president, Brig. Gen. Fred B. Wood, St. Paul, Minn.; second vice-president, Brig. Gen. Chas. F. Macklin, Annapolis, Md.; third vice-president, Capt. Wm. C. Harllee, U. S. Marine Corps, Washington, D. C.; treasurer, Lieut. Col. David M. Flynn, Princeton, N. J.; secretary, Major Fred H. Phillips, Jr., Chattanooga, Tenn; additional members of executive committee, Col. S. W. Brookhart, Washington, Iowa; Lieut. Col. E. B. Bruch, New Yory City; Captain Thomas Holcomb, Jr., U. S. Marine Corps, Washington, D. C.; First Lieut. Edwar Z. Steever, 11th U. S. Infantry, representative of the Assistant Secretary of War.

Persons interested in the organization of rifle clubs may procure full information and descriptive literature by making application to Major Fred H. Phillips, Jr., Secretary of the National Rifle Association and Assistant Recorder of the National Board, at Washington, D. C.

DATA ON LONG RUN TROPHIES.

For years some coveted prizes in the trapshooting game have been the Du Pont Long Run Gold Trophies. The exceptional attractiveness of the trophies offered, which have been of a different design each year, has made them the most eagerly sought trophies in the sport of trapshooting.

A long run, it may be explained, now consists of a shooter breaking consecutively 50 or more clay targets in a registered shooting tournament. Whereas prior to 1913, the long run regulations were that an amateur must break 100 targets in as many shots, and a professional 125, to win the long run badge of expertness.

In every respect the year 1915 must be considered the greatest in the history of clay bird shooting, and the increasing number of long runs made is simply additional evidence of this fact.

The following figures are of interest in this connection (These records only cover runs made in registered tournaments and with Du Pont powders):—

In 1911—107 Long Runs of 100 straight or better were made; in 1912, 115; 1913—135 1914—128; 1915—135. In 1914 429 shooters made 1142 runs of 50 straight or better; in 1915 905 shooters made 2747 runs of 50 straight or better.

In 1914 the Du Pont Long Run Trophy regulations were amended so that shooters making runs of 50 straight or better in a registered tournament (every commendable performance by the way), were able to share in the long run trophy awards. The attractiveness of trapshooting was thus immeasurably increased for hundreds of contestants, as is indicated by the above figures, showing that in 1915 alone 905 shooters made 2747 runs of 50 straight or better.

The popularity of the new system having been so completely demonstrated, the Du Pont Company has announced that they will continue same during the year 1916. The manner of awarding the long run trophy is:

A gold watch fob for the first run of 50 or better. For succeeding runs gold bars which are attachable to the fobs are awarded on the following basis:

Run of 50 to 74—⅛-inch gold bar.
Run of 75 to 99—¼-inch gold bar.
Run of 100 and over—⅜-inch gold bar.

A Waltham 20-year gold watch is sent to an amateur shooter who makes 15 runs of 50 or more during 1915 and 1916. A professional shooter may wil a watch by making 25 runs of 50 or more during the same period. There is no limit to the number of watches which may be won during the two years.

The winners of Du Pont gold watches during 1915 were:

Eastern Amateurs—H. B. Shoop, Harrisburg, Pa.; W. S. Behm, Esterly, Pa.; Woolfolk Henderson, Louisville, Ky.; C. H. Newcomb, Philadelphia, Pa.; J. H. Noel, Nashville, Tenn.; A. B. Richardson, Dover, Del.; F. S. Wright, Buffalo, N. Y.

Western Amateurs—Jas. W. Bell, St. Louis, Mo.; J. S. Frink, Worthington, Minn.; Chas. Hummael, La Porte, Ia.; S. A. Huntley, Chicago, Ill.; W. H. Tolen, Ft. Dodge, Ia.; F. M. Troeh, Vancouver, Wash.; J. P. White, Watertown, S. D.

Professionals—Fred G. Bills, Chicago, Ill.; Lester S. German, Aberdeen, Md.; Fred Gilbert, Spirit Lake, Ia.; J. M. Hawkins, Baltimore, Md., and A. Killam, St. Iouis, Mo. (Messrs. Hawkins and Killam each won two watches during 1915, Hawkins making 50 runs of 50 or over and Killam making 56 runs during the season); C. G. Spencer St. Louis, Mo.; John R. Taylor, Newark, Ohio; C. A. Young, Springfield, Ohio.

By way of explanation: Under the conditions a shooter making 10 runs during 1915 may carry them over and by making 5 more during 1916, wins a watch, or an amateur shooter making 20 runs during 1915, wins a watch and has 5 runs to carry over to 1916 to apply on another watch.

REAPPEARANCE OF QUAIL DISEASE.

Washington, D. C.—Owing to the prevalence of quail disease among quail imported from Mexico at the ports of New York, N. Y., and Eagle Pass, Texas, during the past month, the Department of Agriculture has suspended issue of further permits for entry of these birds this season. Quail in shipments actually en route to the United States on January 20 will be admitted to quarantine, but no further entries will be authorized. Most of the States now have such stringent game laws that it is practically impossible to purchase quail even for propagating purposes in the United States and dealers have sought quail elsewhere, especially in northwestern Mexico where quail occur in abundance, but Mexican quail on arrival at destination are frequently found infected with quail disease.

So fatal is this disease that when it once appears most of the birds which are exposed to it die within a few days. In one shipment of 196 quail which recently reached New York only three birds survived the voyage, and in another of about 160 birds, more than two-thirds of the number died shortly after arrival. More than one-third of all the Mexican quail imported last year died within a few months. To guard against spread of quail disease live quail purchased for propagation should be kept under observation for two or three weeks and should not be liberated if infected with disease. The Department desires to ascertain the result of experiments which have been made in importing quail this year and will be glad to receive information as to the condition of the birds and as to how many have died in any locality where the quail have been introduced.

Before next season the Department will hold a public hearing in Washington, D. C., for the purpose of determining whether or not further permits for importation of quail from Mexico will be issued, at which various questions connected with the importation of quail will be carefully considered. Ample notice of this hearing will be given later in order that those who are interested may arrange to be present or to submit written statements.

MANILA HAS MODERN GUN CLUB.

The Manila Gun Club, known as "Sociedad de Tiro al Blanco de Manila," was organized in 1875 as a club for rifle shooting. In 1897, trapshooting was introduced, establishing two "Magau" magazine traps, and later another trap known as "Leggett" trap.

The society is cosmopolitan, with a membership of 195, which is daily increasing, composed of Filipinos in its majority and Americans, Spaniards, English, Germans, French, Swiss and other nationalities. The entrance fee is $20, and monthly dues of $2.50.

Three tournaments are held each year. In January, the Rifle Shoot, the range being 216 meters; in March the Trap Shoot, and in November the Championship of the Philippine Islands, and Grand Handicap Trap Shoot. Different prizes are awarded each year in gold medals, silver cups, etc. A new club house has just been completed.

SCHUETZEN CLUB SCORES.

J. H. Millett was high man on the honor target at the monthly shoot of the California Schuetzen Club, held on the club range Sunday at Schuetzen Park, San Rafael. Following are the principal scores of the day:

Honor target—J. H. Millett 68, John Frei 65, John S. Leutenegger 62, Captain Joseph Straub 60, Otto . Breuner 59, C. B. Morris 57, F. Muhlebach 59, Joseph Capelle 54.

Special bullseye competition—E. Helm 15, C. B. Morris 24, O. A. Bremer 24, A. Schohay 21, A. H. Pathe 24, J. Capelli 21, F. A. Pape 23, Captain Joseph Straub 22.

Medal shoot—F. F. Muhlebach 223, 221, 219, 215, 216; John Frei, 222, 212, 204; L. Wille, 218; J. H. Millett, 216, 189; O. A. Bremer, 215, 209; L. Schwarz, 213, 206, 204, 201, 207; F. Helm, 217, 215, 209; C. B. Morris, 203, 190; John S. Leutenegger, 190; Captain Joseph Straub, 169; Joseph Capelli, 167, 154, 150, 151, 145; L. Pape, 138; H. Pape, 116.

Sportsmen's Row

H. C. Golcher, who is some shooter, is anxious to try his golf club on blue rocks. He would have to do some fast putting and driving.

* * * *

Big Jack Mark wants the privilege of shooting into a barrel of blue rocks. Jack wants to break Frank Bond's record.

* * * *

Frank Newbert, president of the California Fish and Game Commission, is one of the few who can keep the lumps down even when shooting, cooking a goose stew, presenting cakes to lucky shots or when pleading the cause of preservation to legislators.

* * * *

R. E. McGill—our friend Bob—has a new scheme. Look out, you fellows in the shoot-off!

* * * *

The Golden Gate Gun Club has taken to O. N. Ford's idea for a ten-man interclub shoot for five clubs in Northern California. President Bill Price and the members will talk business with Bobbie shortly.

* * * *

Phil B. Bekeart—don't think that because you have a Junior who is some shot, we will stand for you visiting us only occasionally—Members of Golden Gate Gun Club.

* * * *

J. W. F. Moore—now that the exposition is over and the big Red W. exhibit is packed away, we hope to see your pleasant smile at the club this coming season.

* * * *

Pete Swenson, while not a record breaker, is some enthusiast at the traps. He has the pep and the winning spirit.

* * * *

Wonder what happened to all of those ducks which Don Hillman of Sacramento promised to send down to his friends in San Francisco? It is possible that they were lost in shipment? That is is the only explanation Hughie Wobber and others can account for, for they know Don is a crack shot and is a man of his word.

* * * *

The Fish and Game Commission will be enabled to keep a closer check on ducks killed this coming season. Some game hunters made a practice last season of shipping their game by parcel post and the authorities could not tell how many they were killing. It has been discovered that an act of Congress of March 4, 1909, prevents dead bodies from being accepted by the postal authorities and this will put a ban on that practice.

* * * *

O. N. Ford intends to go East after the Nevada-California shoot and take part in the Iowa state shoot, which he did not miss for ten years before coming to California. He will also participate in the Grand American Handicap in St. Louis. Ford is busting the rocks in his old-time 1906-07-08-09 form. He set the highest score ever made in California by an amateur with an average of .9505 last season.

* * * *

Dear T. W. Parson:—The club handicapper is considering the championship class for you. As a friendly tip, we would advise about four inches on the end of the barrels.

* * * *

P. H. Phinney has shown that he can pulverize the blue rocks when shooting for the first class trophy but he cannot captain a winning grub team.

* * * *

F. D. Putzar, the Babbit Metal expert, is getting to be a ninety per cent rock smasher. Concentration, eh, Putz?

* * * *

The San Francisco Flycasting Club will hold its annual mid-winter tournament at Stow Lake Washington's Birthday. The tourney will mark the opening of a season of activity on the part of the flycasters. The committee in charge of the tournament is composed of Charles Kewell, Harry Thompson and J. F. Berger.

With Frank Gotch, the world's heavyweight wrestling champion, the honored guest, several marksmen enjoyed themselves at the Vernon City Gun Club one day last week. Included in Gotch's party were Tom Marshall, F. Kester and L. B. Clarke.

Gotch made a fairly good mark as a result of his afternoon at the club. He broke 92 out of 100.

* * * *

In some sections quite a rumpus was stirred up over the report that Sacramento was going to stage another "Goose Stew." The objection was taken on the ground that the story detailed how 10,000 geese would be served for the purpose of advertising Sacramento. It was set forth in St. Louis that Californians were permitted to make this wholesale slaughter simply for advertising gain while the hunters in the East were not even permitted to kill one goose for pleasure. The stand was well taken but the drawback was that 10,000 geese were not killed and the stew was not held. The Easterners should remember that there is a closed season for geese out here, the same as for ducks, and the limit is twenty-five per day. Under those conditions it would hardly have been possible to secure 10,000 for the alleged slaughter stew."

Joe Welsh, the celebrated Pasadena Scot who taught the Scotchmen how to catch their own "throut" in Loch Leven with his light American rod and that other American institution, he automatic reel, looks for far less damage to the trout in the streams than has been feared because of the floods. He says the first thing the fish do when water rises is to run up out of harm's way.

This is undoubtedly true except of roiled, muddy floods, which gather in an hour, and half-stupefy the fish so they have not their normal wits about them, and fall easy victims. Fish cannot see in the mud any better than higher creatures.

HUGH POSTON WINS AT PORTLAND.

Hugh Poston, the San Francisco professional, showed the Portland gunners an exhibition of his skill on Sunday, January 30th, by breaking 95 out of a hundred birds. Hugh had the pleasure of seeing snow on the grounds of the Portland Gun Club but that did not affect his aim.

E. H. Keller led the amateurs with a record of 88 per cent. Miss Gladys Reid entered and made a total of 77 per cent, which was better than a number of the men could show. The scores:

						Totals
F. Templeton	15	12	16	11	12	19—85
E. H. Keller	12	12	17	13	15	19—88
P. Allen	11	14	15	..	..	..—40

George Bertz	7	9	9	6	11	16—58

*Professionals.

OLD BASS FISHERMAN TELLS EXPERIENCE.

Surf fishing, particularly along the Jersey coast, has gained abnormally in popularity during the last few years, and the indications are that the sport of casting from the sands for big striped bass will make comparatively bigger gains during the years to come, unless the pound net business just off the shore drives away the fish, says an Eastern daily.

Beaching a big bass is the acme of the angling art. It is interesting and instructive to watch the adept fisherman on the sands. After one has spent a day with him it is easy to absorb his enthusiasm.

To begin with, the expert surf angler is a hunter just as much as the man who chases the bunny, although he doesn't use a gun. In a word he doesn't wait for the fish to come to him; he goes after the fish. In doing this he may tramp one, two, three or any number of miles up and down the beach. But let's hear him tell it, how he lands "'em," why he lands "'em."

"Young fellow, I've been fishing these waters for years, and if there's a chance at all of hooking a bass I can come pretty near getting him every time. And it's all because I know the fish and I know his hang-out.

"Now see here"—we were standing on the beach at the time and the tide was low—"the hollows and the sloughs: those are the places where the bass feed when the tide is high. If you walk with me up and down the shore you will find many such places. You can't be expected to remember them all, but you'll have to remember some of them if you want to be a successful surf fisherman.

"For years when the tide is out, I've been coming down here and looking up such places. In various ways I've marked their locations. Then of course when the tide was in I'd know just about where the fish would likely be and I would be guided in my casting accordingly.

"Of course, I wouldn't get results with every cast. Maybe I wouldn't get a bite with every hundred casts; maybe not in a whole day. For after all the element of luck plays an important part.

"With the rising tide clams, crabs and other things that the fish like are washed over the sands near the shore or out where the breakers are. The fish watch for this food as it comes over the sands. When the tide is coming in they face south. For this reason I cast from the north toward the feeding ground, so that my bait is carried to and over the sand flats with the natural supply of food.

"When the tide begins to recede the fish will face north against the outgoing tide, and I reverse my casting. When the water is very high it is better to fish directly on the flat, casting so that the bait will fall there. About dusk is the best time for surf fishing.

"To be efficient at surf angling, of course, there are other things to learn. Principal among them is casting. This comes with practice. Your knowledge of the whereabouts of the fish is no good if you cannot get the bait to them.

"The rod for this kind of fishing should be from seven and a half to nine feet long if made with the plain, long butt and somewhat longer is made with the spring butt. It should be of split bamboo and should weight in the neighborhood of 20 ounces, the weight of course depending upon the length.

"The line should be from 150 to 200 yards long and made of twisted linen about 12 or 18 thread size. The reel should be a double multiplyer, made specially for this kind of fishing, with a throw-off to make it a free spool when casting, and it should have a handle drag or leather brake.

"To the end of the line a triangular swivel is fastened and to this a six-ounce pyramidical sinker and a short leader, a foot or little more in length, and made of six strands of braided gut. The hook is about 9-0 for striped bass.

"Shedder crab is used mainly for bait. The angler should be provided with a rod belt having a leather or rubber cup to hold the butt of the rod and a beach rod holder. It is stuck in the sand and used to hold the rod when baiting."

BEAR VALLEY IS FLOODED.

The first reliable word that has come out of Bear Valley in several weeks was brought by Caretaker R. C. Belt and H. R. Stowe to San Bernardino last week, they having "mushed" out on snowshoes over the seven to ten-foot drifts down past Clark's, and from the intake, through the Edison No. 1 power tunnel. No vestige of road or trail is left in the Santa Ana Canyon; the only thing still standing in the shape of a bridge is the concrete structure above the intake, where Bear Creek empties in.

Belt has lived in the valley for years, and says the big rain of Sunday a week ago raised Bear Lake three feet in twelve hours, when they had one foot of rain on the level. The lake is now eighteen feet over the old dam, and was then running almost to the top of the new spillways. The bottom gates had not been pulled, but there is no question but that they will have to be raised when the upper snows melt, as there is a vast depth of it above.

Fear is expressed for the Fish and Game Commission's fish trapping sets on North and Metcalf creeks, which may be found to have been carried away when egg-taking time comes next spring. This would be a pity, as the commissioners sent special parties of experts to see that everything was in readiness, so as not to lose a day of valuable time.

There are about twenty people living in Bear Valley this winter, the most in several years.

EAST TO WELCOME LOCAL FANCIERS.

H. W. Lacy, the well known editor of the American Fancier, extends a word of welcome to local dog fanciers who will make the trip East to attend the Westminster show. He was also kind enough to pay his respects to the memory of the late J. X. DeWitt and expressed pleasure in seeing the Breeder and Sportsman continue paying attention to kennel news. It was very nice of Mr. Lacy and we herewith extend our thanks. Commenting on the coming of Californians to New York, he writes:

"And the first news under the new regime is devoted to chronicling the prospect of seeing some of our old California friends at the New York show. Again we are told Mr. 'Tallac' Stettheimer will take us in and he is an ever welcome visitor and one of the very few that has had the pleasure of leading one of his own terriers out of the New York ring decorated with the Winners rosette.

"Quite a deed when one considers all that this entailed, for Mr. Stettheimer lives four thousand miles away. It would also be pleasing if Irving Ackerman could suspend his busy affairs for a jump across, if only to give us the pleasure of proving that a man's a man for a' that, though we may now and then tread on his Goo-Goos! Aweel! Another who is boosted to come is the new owner, Mr. John M. Williams, who got over Crofton Chum, a great winner on the other side and shown for exhibition only at the Panama. And now if Mrs. Baldwin will only send across her famous importations, what a time we could have in the Airedale ring when it comes to looking them Ober.

"But we would advise the Russians to stay at home, for if they were beaten on the Coast it is scarcely worth while exposing them in a New York ring, but White Knight and the Tip Tops would sure stir us up."

QUAIL AND DEER GETTING FOOD.

According to a dispatch from Nevada City, the flocks of quail that have been accustomed to gather for their daily feed at the hands of the game warden and other persons have not made their appearance during the past day or two and it is assumed by those who were caring for the birds that the rains had washed the ground sufficiently clear to permit them to forage for themselves.

The deer have apparently returned to their native haunts and those that have been seen are reported to be in sleek condition, indicating that they have not suffered for food during the snow period. They have found feeding grounds below the snow line.

AMATEUR WINS IN TEXAS TRIALS.

Houston, Tex., Feb. 8.—An amateur today won the all-age open stake of the Texas field trials over a classy field of circuit winners when Redwing, setter, owned by W. L. Sloan of Beaumont, toofi first honors. Second place went to Adam, owned by C. N. Gilbert, Nashville, Tenn., and third to another setter, Joe Muncie, owned by J. K. Smith of Muncie, Ind.

HAWAII GOES IN FOR LIGHT TACKLE.

Like the Tuna Club of California, so the Hawaii Tuna Club's object is "the highest development of the art of angling and the protection of game fish of the Hawaiian Island."

To win a club button one must comply with the following specifications:

For Swordfish and Tuna Class—Rod to be of wood, consisting of a butt and tip, and to be not shorter than 6 feet 9 inches over all. Tip not less than 5 feet in length, and to weigh not more than 24 ounces. Line not to exceed standard 24-thread.

Light Tackle Class—For dolphins, barracuda, ono, ulua, albacore, yellowtail, ocean bonito and skip-jack; rod to be of wood, consisting of butt and tip, and not to be shorter than 6 feet over all. Butt to be not over 14 inches in length. Tip not less than 5 feet in length, and to weight not more than 9 ounces. Line not to exceed standard 9-thread.

In the two foregoing specifications governing the game fish enumerated, lighter tackle can be used in each class and credit given for catches. The main object in the above specifications is to place a maximum weight on rods to be used in each particular class.

Buttons are awarded as follows:

Blue Button—Awarded to angler taking a tuna, dolphin, black sea bass, ono, ulua or other game fish of 75 pounds or over.

Red Button—Awarded to angler taking a tuna, dolphin, barracuda, ono, ulua, yellowtail, ocean bonito, skipjack, black sea bass or other game fish of 50 pounds or over.

Yellow Button—Awarded to angler taking any of the game fish mentioned in the red button class of 25 pounds or over, together with frigate mackerel of 25 pounds or over.

Gold Button—Awarded to angler taking a swordfish, tuna, ulua or other game fish of 100 pounds or over.

Rules governing fishing competitions follow:

First—Anglers must bring fish to gaff unaided. The fish must be reeled in. A broken rod, before gaffing, disqualifies the angler.

Second—An angler must fish with but one rod at a time.

Third—All catches must be officially weighed and measurements taken and recorded by the secretary. The weights officially recorded are final, unless protest in writing is made before the fish weighed is removed from the wharf or other landing place.

Fourth—Tackle must be exhibited with the fish at time of weighing.

Fifth—Fishing competitions open to members only.

The officers of the Hawaii Fishing Club follow: Gerrit P. Wilder, president; Richard Ivers, first vice-president; J. P. Cooke, second vice-president; H. Gooding Field, secretary; J. R. Galt, treasurer; J. A. Balch and J. L. Fleming, directors.

BLUE ROCK ACTIVITY IN SOUTH.

Capt. Tom Marshall, the grand old preacher of the "sport alluring," twice winner of the Grand American handicap and undoubtedly America's most popular trap shooter, was royally received by both the Los Angeles Gun Club of Venice and and the Vernon Gun Club, on Sunday.

The Los Angeles club was the first stopoff made by Marshall and L. B. Clark, who won the Grand American handicap tournament last year. They arrived at the traps at about 10:30 and found forty shooters were awaiting them.

The recent rains had left several marshes around the club grounds, and most of the shooters who came in automobiles were forced to walk. Marshall was among them. Not only was the ground around the club soggy, but all along the road it was noticed that the storm and flood had played havoc with MacAdam's street laying system.

Marshall is not only a shooter, but is a jolly good-natured fellow and an original story teller. He kept up a rapid-fire story telling between events that made Sam Smith lose his ninety-ninth bird, and that's going some.

The Marshall event held at the Venice club was a hundred bird event with silver trophies up for the high scores. Sam R. Smith astounded even himself by breaking ninety-eight out of the hundred, and was declared high gun of the day. This is quite a comeback for Smith, as he has been out of the trap shooting game for several months.

By late afternoon standing room was almost at a premiunm and the shooter was wading through discharged shells and shell cases ankle deep in front of the traps. During the day's contests 7550 targets were thrown. A supply of 4000 had been laid in, but these vanished like cookies before a hungry boy when the shooters began to drop in by dozens around noon, and a hasty trip was made to get another 1500 tarhawks. Even these lasted but a short time.

Shooting was going on from sunup to sunset. The Wilshire competition was started at 10 o'clock sharp. A second leg was won on this trophy by Lou Mellus, but only after he had a trying experience.

Mrs. C. E. Groat, wife of C. E. Groat, president of the Vernon Gun Club, broke forty-eight in the Wilshire event.

At noon the small-bore cracks, Ed Hedderly, Pete Peterson, Ed Crossman and Billy Wilshire, competed for a steel shell case. It was won by Pete, with a forty-five out of fifty score.

The scores:

100-bird event at Los Angeles Gun Club—

Sam R. Smith, shot at 100, broke 98; H. Pfirrmann 100—95, Frank Mellus 100—97, R. L. Hall 100—89, Charlie Knight 100—92, Harry Hoyt 100—90, Guy Holohan 100—76, Ed. Mitchell 100—97, L. B. Clark 100—91, Tom Marshall 100—93, C. D. Hagerman 50—45, E. D. Bond 50—40, E. O. Parker 100—77, Fred Teeple 50—42, Dr. Newton 25—22, Dr. J. S. Platt 20—10, Mrs. Heine Pfirrmann 50—29.

SHOOTING GROUNDS IN GOLDEN GATE PARK.

How about a trap shooting grounds in Golden Gate Park? They have fly-casting quarters located at Stow Lake, a three-quarter mile race track for the matinee trotters and pacers to perform, cycling track, big athletic stadium, baseball grounds, tennis courts, and why not provide for the "sport alluring," which has been gaining wonderfully in popularity in recent years?

At the present time the Golden Gate Gun Club is without a grounds. Their favorite spot in West Alameda has been dredged out of existence and the members have been hustling around to find a new place. Sites have proven hard to find. President W. H. Price called a meeting of the members in Secretary Ted Riley's office on Thursday night and a committee was appointed to take up the matter of finding new grounds. All the members appeared enthusiastic for prospects of a prosperous and enjoyable season once the traps are placed.

The idea of a trap shooting grounds in the Park has made a hit with the marksmen. Of course, it will be necessary to secure the permission of the Park Commissioners and some opposition may arise on the score of the noise that would be made and permitting guns in the park. Still, New York and Chicago have donated part of their parking system for the use of the blue rock shooters. The argument is set forth that shooting should be encouraged. The U. S. War Department is anxious to see as many gun clubs as possible in the field for it is a move in the direction of preparedness. In case of a war these shooters would not have to be drilled in the art and science of sighting a gun. They would be ready on a minute's notice to go in the trenches.

Plenty of places are available in Golden Gate Park. There is a stretch of land from Stow Lake out to the beach that could be used. There might be some objection because of the wind but the gunners could likely locate some sheltered spot. Shell Mound Park has offered to fit up a trap shooting grounds but there may be the same complaint there—too much wind. Sites down the peninsular have also been proposed but the Golden Gaters will have a tough time finding as suitable a place as they had in Alameda.

Owing to the troubles of the club in securing grounds, Howard Sales suggests that the name be changed from Golden Gate to Hard Luck Club.

Bill Price says that to the casual visitor, the spick and span appearance of the Golden Gate Club's grounds are well worth shooting—with a kodak.

Secretary T. D. Riley is still packing his usual smile—wonder if it will wear off when he sees the grounds in their present condition?

The newly organized Alameda Elks Club is figuring on shooting at the new grounds to be located by the G. G. G. C.

The Bay View Club, secretary Percy Fox, is planning to be active this season. Regular shoots will be held the first Sunday in every month.

The Family Club is getting its traps in tip-top shape to put on some events shortly.

Frank Webster is keeping up the interest in the San Leandro trap shooting organization.

Fred Burnham is getting the Martinez club grounds in condition and the fun will start pretty soon. Other clubs are lining up to bust the rocks.

* * * *

The Arden Gun Club is contemplating organizing a blue rock club, so it is reported. Tony Korbel has been nominated to be president of the new body.

* * * *

Editor, Breeder and Sportsman:

Will you kindly publish in your valuable paper the following: At the regular annual meeting of the Gustine Gun Club, the following officers were elected for the coming season:

President, C. E. Miles; vice-president, W. E. Netherton; secretary-treasurer, R. W. Nagle; executive committee, J. T. Hazelwood, A. Anderson and C. Van Horn.

Thanking you in advance for this favor, I am

R. W. NAGLE,
Secretary Gustine Gun Club,
Gustine, California.

SALT BEING FED TO DEER.

An experiment of feeding salt to deer in Trinity Forest has proven quite successful, according to a report submitted by forest rangers to the Fish and Game Commission. Salt bricks were generously donated by a San Francisco salt firm and placed at convenient deer crossings. At first the deer appeared afraid of the salt bricks and fought shy of them. A record kept by the rangers, however, showed that eventually the deer licked the bars.

Deer in other sections of the State have been reported salt hungry. It is probable that the Commission will take up the case of furnishing the game with salt now that the experiment has been so successful.

It is reported that 800 deer were killed in Trinity Forest last season. The rangers regret to complain and protest against the practice of some hunters in killing the game simply to say they brought down a deer or to take the horns for trophies. They think it would be a wise move to try and have the game laws of the State of Wyoming copied, which are to the effect that no deer or elk meat can be left in the woods.

Ranger C. O. Brenner of the Descanso District in the Cleveland Forest reports that he believes the scarcity of deer in his district is due to the fact that the forest is accessible to automobiles and the boundary line between Mexico and this country are fenced, which prevents deer from entering this country.

MACKEREL RUNNING AT REDONDO.

Redondo, Feb. 7.—Larke mackerel are running at pier No. 2. The best fishing time for mackerel is in the morning, about 7 o'clock, or at sundown. Halibut and bass are also biting well this week. The swarms of anchovies that were here recently have left.

* * * *

Fish and Game Commissioner M. J. Connell has recognized meritorious service in confirming the appointment of County Game Warden John J. J. Barnett to a deputy's berth on the State patrol force, dividing his salary with the county of Ventura, wherein Barnett has done good work. Barnett played second base for the St. Louis National League club up to 1912, and is a big, clear-eyed, straightforward fellow who can put 200 pounds behind the arm of the law should it be necessary. He has been a hunter and fisher all his life and is well versed in every way of the wild.

PIGEON SHOOT AT MARICOPA.

For the March entertainment of the members of the Maricopa Club the entertainment committee, composed of C. L. Hutchison, H. Peterson and L. L. Coleman, have made plans to hold a live pigeon shoot in the vicinity of Maricopa at a place and on a date to be selected later. The shoot will be the first one of its kind held in Kern county for many years and will be a big drawing card for workmen and shot gun experts from all over the central part of the state.

As a special feature, a grand prize will be offered for the best marksman and other attractive prizes will be given for various other events which are to be held. The shoot will be conducted by the entertainment committee and other members of the club and will be a public affair.

For the April entertainment of the members an automobile trip into the Carissa plains country will be featured with a barbecue at the Painted Rocks for the noonday meal. The trip to the Painted Rocks in the Carissa is one never to be forgotten as the wild beauty of the country and the picturesque rocks with the art of the old California Indians inscribed upon them are of interest to all who visit that part. The trip will be one of several interesting ones to be taken later by the members of the club and their families.

THE FARM

HOW A GREAT HOLSTEIN COW WAS FED.

For the benefit of those subscribers and readers who appreciate the information we give below some paragraphs concerning the care and feeding of Duchess Skylark Ormsby, the Holstein-Friesian cow belonging to John B. Irwin, of Minneapolis, Minn., who a few months ago established the record of producinf 27,761.07 pounds of milk and 1205.09 pounds of butterfat in twelve consecutive months, her caretaker and feeder being Axel Hansen, who wrote in part as follows, in Kimball's Dairy Farmer:

"The feeding of Duchess Skylark Ormsby began three months before her last calving. By this, I mean to say that she was dried off and gotten into condition. She was by means fat when she freshened; however, she was in the pink of physical condition, which I favor more than being so overly fat. She was fed a ration at this time that had the following favorable characteristics: It was bulky, light, cooling, and laxative, consisting chiefly of bran, ground oats, brewers' grains, and linseed meal. Corn silage, alfalfa hay and roots constituted her roughage. She was fed all the grain she would eat up clean. This was continued till 10 days before she freshened, then her ration consisted of bran, two parts; oats, two parts; oil meal, one part—and the quantity was cut down to 10 to 12 pounds per day and later to 6 to 8 pounds so as to cool out her system before calving.

"On November 4, 1914, she dropped a male calf. She was imediately given a pailful of lukewarm water, and about an hour later was fed a warm bran mash and a woolen blanket was put on her to protest her from cold air and any possible drafts. The calf was left with her for two days so as to get the colostrum milk, which is very beneficial to new-born calves. During the next two days her ration consisted of bran, oats, and oil meal, same proportion as prior to calving, and she was fed 10 to 12 pounds in four feeds and 20 pounds silage, 25 pounds roots, 10 pounds alfalfa hay. She was given lukewarm water to drink for several days. On the third day the calf was removed and a little hominy and gluten was added to her grain ration and about five pounds silage was added to her roughage, making a total of 25 pounds. A daily increase of her grain ration, at a rate of two pounds per day, soon indicated that Duchess was not going to consume 35 to 40 pounds grain per day for she objected to 25 pounds per day so we slacked up to 22 pounds and this seemed to be her limit.

"She was taking 25 pounds of silage, 30 pounds of roots, and 15 pounds of alfalfa hay in the way of roughage. At the end of the first month she was consuming 22 pounds of grain, consisting of bran, oats, hominy, brewers' grains, gluten, linseed meal, and distillers' grains, at a ration of 1-4-5. This seemed to be her favorite mixture with slight changes from time to time, according to her likes and dislikes.

"As soon as the fields would allow it in the spring, soling crops were put in to be fed during the hot summer months, and to take the place of silage and roots in the winter. Three parts of oats and Canadian field peas were sown at from 10 to 12-day intervals so that the second seeding would be ready to be fed when the first was gone and the third seeding to follow the second in the same manner.

"When spring and warmer weather approached, her ration was changed to a more bulky and cooling ration, and the oats and peas were cut and fed as soon as 10 inches high. During the months of June, July and August she consumed from 16 to 20 pounds of grain, about 150 pounds of soiling crops, and 15 pounds alfalfa hay per day. After the oats and peas were all fed, or too ripe to be of any value as green feed, sweet corn and later ordinary field corn were used for succulence and bulk in her ration. After the potato crop was harvester, a second crop of corn was planted which furnished an abundance of splendid green feed until the frost came this fall, then roots and silage were used to replace the green feed and to fill the need of succulent and palatable roughage, and her ration was changed back to feeds of a more heating nature than she was getting during the hot weather.

"Duchess was kept in the barn during the entire year. She was taken out for half an hour exercise when the weather would permit it during the winter and was taken out every day during the summer, usually in the evening between 6 and 8. Her stall (box stall) was kept dark and cool by means o felectric fans, and a flynet was kept on her to prevent flies from annoying her. She was groomed at least once a day during the entire year and milked four times a day."

DAIRIES SHOULD PASTEURIZE MILK TO SAVE PEOULE FROM TYPHOID.

"Pasteurize milk and prevent typhoid."

This is declared the lesson of a recent outbreak of typhoid fever at Richmond, now proved to have been caused by typhoid bacilli in milk. Milk from the same dairy, drunk in Berkeley by a dozen times as many people, caused not a single case of typhoid because it had been pasteurized, by heating it to 145 degrees for thirty minutes.

The story of this triumphant proof that raw milk ought to be pasteurized before itis sold, save when thorough medical examination of the dairy employes can be required at frequent intervals, is told in a paper just published by Dr. J. C. Geiger, Assistant Director, and Dr. F. S. Kelly, Bacteriologist of the Bureau of Communicable Diseases maintained at the University of California by the State oBard of Health.

When typhoid was reported at Richmond, Dr. Geiger and Dr. Kelly discovered that all twelve patients had used milk from a large dairy near Richmond. They found that just before the Richmond outbreak a milker had been sent from this dairy to a Berkeley hospital suffering from typhoid. Undoubtedly he was the source of infection in this milk, for the epidemic at once ceased.

But if Richmond had twelve cases, the scientists asked, why did not Berkeley, when more than six thousand people drank this same milk, show a similar outbreak? On investigation they found that pasteurization had saved the day. The dairy substation at Richmond had been distributing the milk without pasteurizing it, while this same milk when sent to Berkeley for distribution was there carefully pasteurized, by heating. Thus while the taste of the milk was not changed, any possible danger was prevented, that disease might be spread in a case where a milker was suffering from typhoid, diphtheria, sore throat, colds, intestinal troubles, or any other of a large number of diseases which can be carried in unpasteurized milk. Such germs are destroyed by pasteurization.

Next fall a state law is to go into effect which will require all milk sold in California to be pasteurized unless it comes from a certified dairy. This milk-borne epidemic in which cases of typhoid were caused in one town and not a single case in a community close by, which used a dozen times as much of the same milk, is pointed to by the scientists as convincing proof of the great wisdom of the new law requiring pasteurization of milk and the immense value it promises to the community in preventing the spread of typhoid, tuberculosis, intestinal troubles, and a host of other preventable ailments of mankind.

Everywhere farmers not only ought to attend to the proper and safe disposal of the bodies of their own animals which infortunately die, but they should insist on the proper disposal of the bodies of all animals which die anywhere in the regions in which their farms are located.

GOMBAULT'S
CAUSTIC BALSAM

A safe, speedy and positive cure for

Curb, Splint, Sweeny, Capped Hock, Strained Tendons, Founder, Wind Puffs, and all lameness from Spavin, Ringbone and other bony tumors. Cures all skin diseases or Parasites, Thrush, Diphtheria. Removes all Bunches from Horses or Cattle.

As a HUMAN REMEDY for Rheumatism, Sprains, Sore Throat, etc., it is invaluable.

Every bottle of Caustic Balsam sold is Warranted to give satisfaction. Price $1.50 per bottle. Sold by druggists, or sent by express, charges paid, with full directions for its use. Send for descriptive circulars, testimonials, etc. Address

The All Styles are large, strong built, with all the style of their sire, perfect in action, and all three of the above colts should make race horses second to none. The Dan Logan filly is perfectly gentle to handle and drive and is a high-class filly in every respect. Apply to or address,

I. F. EATON, Chico, Cal.

BEAUTIFUL BELVEDERE

LOTS FOR SALE

CORINTHIAN ISLAND Subdivision to Belvedere is the most beautiful spot on the shores of San Francisco Bay for a suburban home. It commands an extensive view of the City of San Francisco, Alcatraz and Angel Islands, Raccoon Straits, San Francisco Bay, Richardson's Bay, the Berkeley shore, beautiful Belvedere and Mt. Tamalpais. It is in Marin County, directly opposite San Francisco, and forms the eastern shore of Belvedere cove. It has a naturally terraced, sunny, western slope that is well adapted for many choice residence sites, every one affording most picturesque views of the bay and mountain. It is protected from the prevailing western trade winds in summer by Belvedere Island, and from the southerly storms in winter by Angel Island. The soil is fertile and part of the island is well wooded.

It is less subject to fog than any other place near San Francisco. The summer fog, as it rolls in from the ocean, splits on the western slope of Sausalito, part of it flowing in a line with Angel Island towards the Berkeley shore, and part of it along the southern slope of Mt. Tamalpais, leaving Belvedere, Corinthian Island and Raccoon Straits in the bright sunlight, while the fog banks can be seen as a white wall both to the north and the south.

There is very little available land about the shores of San Francisco Bay that is desirable for homes, especially for those who love boating and kindred sports. The Alameda and Contra Costa shores of the bay are the lee shores and receive the full brunt of the boisterous trade winds which lash the shoal waters near the land into muddy waves, making boating both unpleasant and dangerous. To the north of the city and in Marin County the land from Sausalito to the entrance of the bay is a Government reservation and will never be placed on the market. The shores of Richardson's Bay are not at present convenient to boat service and, aside from Belvedere and Corinthian Island, there is little or no land near any ferry landing that possesses the natural advantages, improvements and possibilities that are offered on Corinthian Island. Concrete roads, pure water, telephone service and electric light wires are already installed. It is only ten minutes' walk from any point on the property to Tiburon boats, and but forty-three minutes' ride to the foot of Market Street.

On the point of Corinthian Island the Corinthian Yacht Club has had its home for many years, and on any summer day the white sails of its numerous fleet add to the charming scene, as the trim yachts glide about the cove. Excellent fishing of all kinds for bay fish, including salmon, the gamey striped bass, rock fish and the toothsome silver smelt, is to be had in the cove. There is probably no spot so accessible and in such close proximity to any large city in the world that offers the attractions of climate, magnificent scenery, fishing and boating as will here be found.

DISPOSAL OF DEAD ANIMALS.

Often when animals die on the farm no disposal is made of their carcasses other than to drag them into a field or a nearby woods, where they are left on the surface of the ground to decompose or to be eaten by buzzards, crows, dogs, and other scavengers, or animals which feed on carrion.

This practice can not be too severely condemned, because it contributes seriously to the dissemination of disease germs and the perpetuation of infectious diseases.

The carcasses of animals which have succumbed to infectious diseases like anthrax, hog cholera. blackleg, tuberculosis, etc., are charged with myriads of virulent disease germs, and just as long as they remain where scavengers can reach them and portions of them can be carried away promiscuously, they are a dangerous menace over a large territory to all animals which are liable to be attacked by disease germs. Even carcasses of animals which have died from other causes than infectious diseases, unless they are disposed of in a proper way, are a source of danger. Left on the surface of the ground, their odor soon invites scavengers to congregate and to bring with them the infectious materials with which they may have become contaminated by eating carrion elsewhere.

Dead animals on the farm should be buried deep enough to prevent them from being dug up again, or they should be burned. To burn large carcasses like those of dead horses and cattle is difficult and laborious and requires a large quantity of fuel. In most instances it is more economical to bury them. All animals which have died of infectious diseases and are buried should be covered with a heavy layer of lime before the graves are closed.

In the winter, when the ground is grozen, it is more difficult to dig graves than at other seasons of the year, but it is just in cold weather that disease germs remain alive and virulent longest in dead organic matter and that scavengers travel the longest distances, have the best appetites, and are most likely to carry disease germs on and in their bodies. The extra trouble of digging graves in the winter is easily offset by the greater danger it counteracts. Low temperature prevents the multiplication of disease germs, but many kinds of disease germs are not killed or deprived of their pernicious possibilities by exposure to a lower temperature than the lowest reached during an icy, arctic winter.

In the unusual conditions existing in the fertilizer trade, it is important that all fertilizing materials on the farm, especially those containing potash, should be conserved. The fertilizer ingredients already existing in the soil should be utilized and developed to the fullest extent.

QUANTITY PRODUCTION

Model 702 Speed Cart **$46.50**

(ONE PRICE TO ALL)

Ours is the largest and best equipped factory in the world devoted to the manufacture of carts and sulkies. We make speed carts by the hundreds. We can afford to sell a $65 speed cart at $46.50 because we produce in large quantities and sell at a close margin of profit.

There is no loss on bad accounts in selling this cart because at this price we sell for cash only, or you can pay on delivery. Sold on credit for $51.50.

This is a very light cart suitable for training, workout, matinee or for racing on the half-mile tracks.

The driver's weight hangs on a sensitive high carbon steel spring attached to a substantial truss, distributing the weight to both sides of the axles and journals alike, an exclusive Houghton feature.

Although lighter than most speed carts, it is guaranteed to carry more weight. The shafts are constructed to give great clearance for hock action. A close hitch is possible, making the cart very fast. The stirrups are set to suit the driver.

On account of the narrow track it follows the horse easily on the turns. The underset axle produces perfect balance. Used and recommended by the best trainers.

In matinee racing if there is an opening large enough for the shafts to go through, the wheels will follow.

Stock color Brewster Green, but can furnish Carmine, Primrose, Yellow and other colors on short notice. Completely equipped with aluminum lined rims, cushion dirt protector, screen dash, pump, etc. All for $46.50, nearly as cheap as others sell second-hand carts for.

This cart is guaranteed to please or we refund your money. Order today, or send for booklet 209.

Harpers Weekly and The Breeder and Sportsman

$5.50 WORTH FOR $3.25

Breeder and Sportsman

One Year, 52 Copies, Regular Price $3

THE BREEDER AND SPORTSMAN is the oldest weekly journal devoted to the Horse west of Chicago, having been established in 1882. This interest, together with the Kennel, Gun, Fishing, Coursing and kindred sports receiving the most attention in its columns; together with Agricultural and Dairying Departments, under whose headings especial attention is paid to the breeding, etc., of Cattle, Sheep, Hogs, Poultry, and all other animals connected with stock raising.

As an advertising medium to Racing Associations, Horsemen, Stock Breeders, Manufacturers of Sulkies, Carriages, Wagons, Agricultural and Dairying Implements and Machinery, Sporting Goods, Fanciers, Stock Foods, and all others desiring to bring their wares to the attention of the classes to whose interests the paper is devoted within the field mentioned above, the BREEDER AND SPORTSMAN will be found indispensable.

Harpers Weekly

Six Months, 26 Copies, Regular Price $2.50

At no time has it been so evident to Americans as now, that the most important thing in the lives of all of us is the progress of the European War.

Next to your daily bread the war interests you most vitally. It may even come to be the most important part of your problem of living.

The periodical of greatest fundamental interest to you today is the one that can best report those phases of the war that come closest to your country and you.

Because of connections abroad and at home, HARPER'S WEEKLY is that publication.

As a critical commentary that presents inside facts, it is the necessary bridge for intelligent readers between the daily newspaper and the monthly review.

You want HARPER'S WEEKLY now. You can get it now on trial at a remarkable reduction.

Send $3.25 Now and Get Them Both

THIS OFFER is made to all who will send us $3.25 before March 31st, 1916, whether for extension of subscription, renewal of subscription or a new subscription. Address:

GUNCRAFT

By W. A. Bruette

A modern treatise on guns, gun fitting, ammunition, wing and trap shooting.

The theoretical side of the subject has been covered with a scientific accuracy which makes it an up-to-date book of reference, and the practical side of wing shooting, gun fitting, the master eye, defects in vision and other important questions have been treated in a way that will enable either the expert or the amateur to determine if he is shooting with a gun that fits him and how to decide upon one that does. It will enable him to ascertain why he misses some shots and is successful with others. The secrets of success in trap shooting, as well as the peculiarities in flight of the quail, the jacksnipe, the woodcock, the ruffed grouse, and the duck family, are illustrated by drawings and described in a way that will facilitate the amateur in mastering the art of wing shooting.

Cartridge board cover, $1.00; Cloth, $1.50

BREEDER & SPORTSMAN,

Third Edition Within One Year of Publication.

CARE AND TRAINING OF TROTTERS AND PACERS

NEVER before in the history of the publishing world has a horse book gone into a third edition within one year of publication. Yet the explanation is simple—the book fills a long-felt want.

Never before has this subject been treated in a distinct manner. It has been handled in connection with autobiographies of trainers, but such works are out of print or out of date, for they were published 20 years or more ago. Conditions and methods have changed since then, and former treatises are just as much out of date as the high-wheel sulkies then in vogue.

"Care and Training of Trotters and Pacers" is as modern as a 42-centimeter gun. It does not contain the ideas of one man, but of 100 of the leading horsemen of the day, including Thomas W. Murphy, Walter R. Cox, and Edward F. Geers. These ideas were converted into book form by two prominent American turf journalists.

This book enables anyone to do his own caretaking and training until it is time to send the colt to a professional trainer, or the owner can train and race the colt himself. The treatise covers the details of a colt's life from the moment it is foaled until after its first year's campaign. The facts are clearly presented. Nothing is left to guess work. The language is lucid. Both theoretical and practical views are outlined and compared. The instructions are concise and easily understood. The work contains no advertisements—it is not a catch-penny publication that looks big in the advertisement but proves disappointing when received.

Many professional trainers have purchased the book and have found it interesting. Despite the war, over 300 copies have been sold in Europe and Australia.

Price $1.00 postpaid. Cloth, illustrated, 176 pages, 5x7 inches.

C. G. Spencer

The Big Winner In 1915

The Interstate Association's Official High Professional Average for the season of 1915 was won by Charles G. Spencer, of St. Louis, Mo., with the marvelous record of 97.5% for 5620 targets. Such an average for such a large number of targets not only shows Mr. Spencer's great skill, but also proves the uniform and unequalled quality of

WINCHESTER

LOADED SHELLS AND SHOTGUNS

which Mr. Spencer used exclusively. It was this same combination that he used when he made his marvelous straight run of 565 targets—the World's Record.

Contests for the Season's Trapshooting Averages have been held 16 times and 12 of them have been won by **W** shells or guns, or both, which is undeniable evidence of their superiority.

Lester German, of Aberdeen, Md., who was second high for the season, and who also made the greatest score of the year for a single tournament—499 x 500—used Winchester shells in performing this great feat.

J. Mownell Hawkins, of Baltimore, Md., shot 7,265 targets in competition during 1915, and made the splendid average of 95.56%, using Winchester shells and shotguns exclusively—more proof of their uniform shooting qualities. These performances show the reason why Winchester shells and guns are

TRAINING THE HOUND

A PRACTICAL TREATISE ON THE TRAINING OF FOX HOUNDS, BEAGLES, AND COON HOUNDS.

The system of training advocated is simple and effective, so that anyone who carries out instructions can easily develop a foxhound, a beagle or a coon dog to the highest state of usefulness or organize a pack in which each hound will work independently and at the same time harmoniously with the others. The subjects are: The Hound's Ancestry, History, Instinctive Tendencies, English and Native Hounds, Developing the Intelligence, Training the Foxhound, Voices and Pace of the Hound, Qualities of Scent, Manners, Training the Coon Dog, Coon Hunting, Training the Beagle, Forming a Pack, Field Trial Handling, Faults and Vices, Conditioning, Selecting and Rearing Puppies, Kennels and Yards, Diseases of Hounds and Their Treatment. The chapters on field trial training and handling are alone worth the price of the book, which is one that every man who loves the voice of a hound should read.

The book contains 224 pages, is clearly printed, nicely bound, and handsomely illustrated with bloodhounds, various types of English and American foxhounds, beagles and cross-bred dogs for 'possum and coon hunting.

Price, in heavy paper cover, $1; $1.50, postpaid.

JUDGE BRIDGFORD AND DON PEDRO

This is the five-gaited gelding which went to Japan as a gift to the Emperor from the Japanese-American Association.

Pleasanton Driving Park

PLEASANTON, CALIFORNIA

offers for service for the season of 1916 the following stallions:

THE ANVIL 2:02 3-4

Fastest trotting stallion ever offered for service in California, and fourth fastest entire trotter in the world

Son of St. Valiant Vincent 2:11¾ (by St. Vincent 2:13½ out of the triple producer Grace Lee 2:29¼ by Electioneer 125); dam Amy Smith by Emperor Wilkes 2:20¾, sire of Princess Eulalia (4) 2:09¼, etc.; grandam by Hambletonian 539.

The Anvil is regarded by Edward F. Geers as one of the very greatest trotters that he has ever raced. For five years the pair of Tennesseeans went to the races together and in that time were but twice unplaced, while winning a total of fifteen races, including the historic M. and M.

As an individual he is most pleasing, not too large or coarse in any way but smoothly and compactly made and "all horse" in every line. He is a perfect headed, pure gaited trotter, with the very best of disposition, and is destined to become a very great sire of trotting speed. His opportunities in the stud have been very slight as he has been retired from racing only since the close of 1914, and has but three or four foals now three years old. He was selected to head the stud at Pleasanton Driving Park not only on account of his great qualities as a race trotter, but because one of his first foals, Anvilite (2) 2:22¼, with a trial of ten seconds or more faster, is in every way the greatest colt trotter ever handled by C. L. DeRyder. The services of The Anvil are recommended to you without reserve.

Fee for The Anvil 2:02¾, $100 with usual privilege

Vernon McKinney 2:01 1-2

Fastest member of the great family of McKinney 2:11¼

Sire of VERNA McKINNEY (2) 2:13 (his first foal raced), fastest two-year-old pacing filly of 1915.

Son of Guy McKinney 37625 (by McKinney 2:11¼ out of Flossie Drais by Guy Wilkes 2:15¼); dam Maud Vernon by Mount Vernon 2:15¾, sire of the dams of Leata J. 2:03, etc.; grandam Mag by General McClellan, sire of the dams of Mack Mack 2:05, etc.

Vernon McKinney's racing career was not an extensive one but will long be remembered for the excellence of his performances, as his winnings include a Chamber of Commerce stake in time very near the record for that event at the time, and he is the fastest of all the McKinneys.

He is a horse of rare qualities in the way of individual excellence, almost ideal in behavior and temperament in harness or out. Since his retirement he has been a popular horse in the stud and our claim that he would prove a very great sire of pacing speed has been fully substantiated, his first foal to be raced being the season champion for the age and gait in 1915, a most excellent testimonial to his potency. He is a very sure breeder, his get are uniformly endowed with natural speed and the physical and mental requirements of modern race horses and find ready sale at most gratifying prices.

Fee for Vernon McKinney 2:01½, $50 with usual privilege

The best of care taken of mares in any manner owners may desire, but no responsibility assumed for accidents or escapes. Address for particulars

HEMET STOCK FARM

INCORPORATED

W. F. WHITTIER Pres.

BUDD DOBLE V. P. and Mgr.

Colts and Fillies by **WILBUR LOU** Always on Sale

HEMET, CAL.

Offers for service the best grandson of McKinney 2:11¼

WILBUR LOU 2:10¼

Record made in third heat of winning race as 3-year-old.

A world's champion as a yearling, record (1) 2:19½; unbeaten as a two-year-old, a famous futurity winner at three, and at six years of age the "sire of the day" in California, his first crop of two-year-olds including

NATALDAY (2) 2:13½

Champion two-year-old race trotter of the Pacific Coast, winner of Pleasanton and State Fair Futurities, 1915

FIESTA LOU (1) 2:25, (2) 2:22½, pacer, half-mile track records, separately timed in a race in 2:14½.
GOLDSMITH LOU (2) 2:29, trotter, breeder's record on halfmile track.
BILLIE BOYD (2) 2:30, trotter, breeder's record on halfmile track.
SELMA PALEY (2) trial 2:26½, trotter, public trial on halfmile track.

Wilbur Lou is by the great race horse and sire Kinney Lou 2:07¾, out of the triple producer Louise Carter (3) 2:24, grandam the famous Ingar, dam of 6 including John A. McKerron 2:04½, etc.

Breed to him for "Horses that will race." Fee for 1916, seventy-five dollars with usual privilege or money refunded at our option. Write for detailed particulars, all information gladly furnished.—Licensed Pure Bred, Cert. 23.

SPOHN'S DISTEMPER COMPOUND TRADE MARK

TRAINING DISTEMPER.

Ever hear of this? Yes, of course you did, but under different name. You have seen it in cases where the horse was "overtrained," worked a little too fast and regular. The nervous system gets the shock, after the voluntary muscular system has been taxed too heavily. The trouble starts in the mucous surfaces and the digestive apparatus, too, must then be impaired. He begins to cough when the glands are materially affected.

"SPOHNS" is your true salvation. It restores the appetite and normal functions of the whole system. The action in such cases is remarkably rapid and sure for recovery when you use this remedy according to instructions with each bottle. Only 50c and $1 a bottle; $5 and $10 a dozen. Sold by all druggists, horse goods houses, or express prepaid by manufacturers.

SPOHN MEDICAL CO., Chemists and Bacteriologists, Goshen, Ind., U. S. A.

Makes Them Sound **SMITH'S WONDER WORKER** Keeps Them Sound

Allays fever and inflammation at once, this must be done to effect a cure. UNEXCELLED AS A REMEDY for bone and bog spavins, curbs, splints, ringbones, capped hocks, shoe boils, wind puffs, thoroughpins and bunches of all kinds, bowed, strained and ruptured tendons, shoulder, hip and stifle lameness, weak joints, sweeny, cording up, throat trouble and rheumatism. Relieves pains and soreness without loss of hair or a day's let up. As a leg and body wash it has no equal, invigorates and restores the distressed horse between heats and after hard workouts.

Price $2.00 per bottle, prepaid on receipt of price. $16.00 per doz.; $10.00 per gal.

MR. SMITH'S RACING MEASURE.

Some time ago word reached this office that the horsemen of Southern California were preparing an amendment to the present laws concerning horse racing, the purpose of the same being the establishment of a racing commission and the pari-mutual system of speculation, and last week we received from Ed. R. Smith of Ocean Park a letter reading as follows: "Enclosed please find copy of the proposed amendments to the California Racing Law that are now in the Attorney General's hands for him to write a title and summary to the bill before getting out the initiative petition to circulate and get the necessary 74,136 signatures in order to get the bill on the ballot. This bill has been prepared by myself and the breeders of horses in this section and we have endeavored to place a bill before the people which we think should meet with the hearty support of all classes of breeders of horses in this state. As soon as the Attorney General sends me the necessary title, etc., I will visit all sections of the state and try to interest horsemen and their friends in the same. I hope the bill will meet with your approval and that you will give it publicity as soon as possible."

As our columns are open at all times to the furtherance and discussion of every proposition that has as its object the welfare of the industry of breeding and racing horses, we take pleasure in according Mr. Smith's measure the publicity requested, the draft of the same furnished us being couched in the following terms:

Section 1. Any corporation or association formed for the purpose of raising, breeding, or improving the breed of horses, and conducting races, shall have the power and right, subject to the provision of this act, to hold one or more race meetings each year and conduct races at such meetings. Any corporation, or the owners of horses engaged in such races or others who are not participants in such races, may contribute purses, prizes, premiums, or stakes, to be contested for, but no person or persons other than the owners of a horse or horses contesting in such races shall have any pecuniary interests in a purse, prize, premium or stake, or to receive any portion thereof after such race has been finished.

Section 2. A State Racing Commission is hereby established to consist of five persons to be appointed by the governor, three of whom shall be breeders and raisers of registered horses and no two of whom shall be members of the same racing association. The members of such commission shall hold their offices for a term of four years and the first commission shall be appointed within twenty (20) days after this Act shall go into effect.

Section 3. Such Commission shall appoint a secretary who shall serve during its pleasure, whose duties it shall be to keep a full and faithful record of the proceedings and preserve at its general office all books, maps, documents, and papers entrusted to his care, and perform such other duties as the Commission shall prescribe. He shall be paid a salary to be fixed by the Commission at a rate not to exceed twelve hundred dollars per annum, which shall be paid from the moneys received from the several corporations or associations. The Commission shall biennially make a full report to the Governor of its proceedings for the two year period ending with the first of December, preceding the meeting of the Legislature, and shall embody such suggestions and recommendations as it shall deem desirable.

Section 5. No licenses shall be issued for more than fifteen day racing in any one county for calendar. No one association or corporation shall hold race meetings to exceed in the aggregate fifteen days, within the boundaries of this state during any calendar year.

Section 6. Any state, county, or agricultural fair and all corporations which obtain licenses to conduct race meetings will be permitted to use the pari-mutual system of wagering at their respective meetings under the direct control, suprvision and rules and regulations of the Racing Commission.

Section 7. The provisions of this Act relative to securing licenses, or to the payment to said Racing Commission of proportionate moneys to pay the expenses of conducting such Commission, shall not apply to race meetings conducted by any state, county, or agricultural fair.

Section 8. The Commission shall at all times use its best endeavor towards the building up of the horse interests of this state, and should there be any funds left in its hands, after paying all necessary expenses of such Commission, such funds shall be used by such Commission and the Governor as they see fit towards the giving of purses, prizes, premiums, or stakes for all classes of California bred registered horses, and to the further advancement of the horse interests of this state.

Section 9. Every race meeting at which racing shall be permitted for any stake, purse, or reward, except as allowed by this Act, is hereby declared to be a public nuisance and every person acting or aiding therein is punishable by imprisonment in the county jail or state prison for a period of not less than thirty days and not exceeding one year, and in addition thereto, in a suit brought for that purpose by the said Racing Commission in the superior court, when it may be proposed to conduct such unauthorized racing an injunction may be obtained against the same.

Section 10. (Present Racing Bill to follow.)

Mr. Smith stated in a postscript that the typewritten draft of the bill originally intended for us had been left at his home by mistake, so that the manuscript eventually furnished had been prepared by him hastily, so there is a probability that there may be some slight errors or omissions in the above text that are not manifest in the original. For example, it is very probable that Section Seven should close with the words "at which no form of speculation is permitted," or a phrase to that effect. The bill as drawn, while sound at the bottom and along the proper lines for the most part, is open to a good deal of discussion on certain points, one in particular being the limitation of racing in any one county or under the auspices of any one association to fifteen days. The fifteen day proposition will not meet with the support of the thoroughbred contingent and in instances would work a hardship upon either the harness horses or the runners. In case of the establishment of a legal system of speculation the city of Oakland would be in line for a race meeting, to run as long as possible under the law. At the same time the Pleasanton folks would wish to hold at least one harness meeting a year with betting. On a fifteen day limit Oakland would gobble the works for the runners, leaving the trotters in Alameda county out in the cold, while on an allowance of thirty days an equitable arrangement could be made for all parties. We are not advancing any argument for long meetings, but we do not wish to see the mistake made of going too far the other way.

The question also arises as to the wisdom of submitting this sort of a proposition to the voters at large. This was done some few years ago and the measure then up for consideration met with overwhelming defeat ,being turned down so decisively that the vote is still being used as an argument against the enactment of legislation establishing the mutuals as a legal system of speculation. While it is true that the feeling in favor of the mutuals is much more pronounced at this time than was the case when the last vote was taken, we doubt very much if the measure can carry at a general election—and a second defeat at the polls would sound the death knell of the pari-mutual for some time to come, such a course practically precluding any favorable legislation which the assembly might feel inclined to enact. A safer course lies in a concerted movement on the part of all classes of horse breeders through the assembly and governor, an idea that is advanced not merely as our own but that of numerous horsemen with whom we have talked the situation over in recent months.

Please do not get the idea that we are not for the pari-mutual, or that we are in any way endeavoring to belittle the conscientious work done by Mr. Smith and his friends. We are for the mutual first, last and all the time as an established means of speculative investment on the contests of both the thoroughbred and the trotter, and it is because we are so thoroughly in favor of them and so steadfastly in hope that California may have them that we wish to see the campaign waged on the lines that offer the best chances for success. We do not expect everyone to agree with us in our preference for an assembly measure in preference to an initiative bill, but we do know that our opinion is shared by a number of hardheaded horsemen who have been up against the proposition before.

THE CHAMPION STALLION CUP.

One year ago the American Trotting Register Association donated to the Panama-Pacific International Exposition a number of sterling silver cups, to be competed for by standard and registered trotting bred horses. The one for the Champion Stallion class, that cost $200, was not competed for and in consequence was returned. This cup stands twenty-four inches high, and on the face has a fac-simile etching of the great stallion Bingen 2:06¼.

At the annual meeting of the stockholders of the American Trotting Association, held at their office in Chicago, on February 2, 1916, the following resolution was adopted:

"Whereas, The Champion Stallion Cup, given by the American Trotting Register Association, to the Panama-Pacific International Exposition, to be by it awarded for Standard and Registered Trotting Bred Horses, was not competed for, and

"Whereas, It is the desire of the American Trotting Register Association that this Cup shall be competed for and awarded, it is hereby

"Resolved, That each State Fair Association in the United States of America be asked to make a class for Trotting Bred Stallions, each to be shown wih five (5) tof his Get, and that this Cup be given to the Association having the greatest number of exhibitors, in that class, to be by it awarded to that stallion which shall be decided to be the best in that class."

Each State Fair should add to its Prize List a class for this Cup, under the conditions of the resolution; the following conditions also to govern:

There must be two (2) or more Stallions, wih five (5) of his Get, four years old and under, entered. The following percentages to govern in Stallion and his Get:

General conformation and all around suitability of Sire as a Light Harness Horse, 30%. Style, action, manners and speed of Sire, 20%. General conformation and all around suitability of Get as Light Harness Horses, taken as a whole, 30%. Style, action, manners, speed and uniformity of type in Get, 20%.

It will be recalled that the standard bred classes at the exposition horse show were very slim affairs, owing largely to the fact that they were not advertised to any extent among horsebreeders, and partially on account of of the absence of a good many people at the races elsewhere who might have been exhibitors had such a course been a matter of more convenience. The California State Fair will undoubtedly follow the suggestion of Secretary Knight and his associates and incorporate such a class into their regular program, and with a bit of enterprise on the part of our breeders it could be made one of the principal attractions of the big eight day show. This cup got away from western horsemen once, and now that they are given another shot at it they should make an extraordinary effort to see that it comes west again, this time to stay.

Moody's Views on Training Yearlings

H. T. WHITE, IN THE AMERICAN HORSE BREEDER

A couple of weeks ago there appeared under my signature some facts about the stallions that had sired two or more 2:30 or better yearling trotters apiece, and incidentally there was an expression of my own views—based on a rather close study of yearling trotters and the men who have trained the most prominent ones.

The critic (or, possibly, reviewer is a better word) of any art, profession or trade is supposed to air his own views in addition to printing the news of the little world whose chronicler he is, and hence is subject to—and invariably receives—a considerable amount of caustic comment regarding his pronouncements concerning matters in which he is not a personal participant. I have had my share of the verbal and written hand grenades used in that sort of warfare, and have been called a parrot, a warmer-over of other men's ideas, and a person of almost unlimited ignorance concerning horses in general, and the light harness horse of America in particular.

I was interested, but not crushed or daunted, in the matter of training yearling trotters—the whole subject being one of vital interest to breeders and horsemen—I realized that, while my views might be to some extent entertaining, they were in no wise authoritative, nor did they pretend to be. Hence, I decided to ask the opinion of an authority on colt training as to their merit or otherwise.

It will hardly be questioned that Hunter C. Moody, of Lexington, Ky., is king of all the trainers of yearling trotters, for the records amply prove such to be the case. He has had champions at that age in greater numbers than any other man, and his showing, both as to champion yearlings and others of less calibre, is such that his position is secure. Therefore, Mr. Moody was the man I selected as the authority from whom, if possible, there should be secured, first, an opinion as to the merits of the Breeder article from the standpoint of a practical horseman, and, secondly, some further ideas from the same authority on the general subject of colt training.

It may be well to state that my acquaintance with Mr. Moody is of a merely casual character. I never have visited his stable, never have spoken to him more than to greet and salute, so I knew in advance that his opinion would not be a matter of friendship, and from his general makeup I was quite positive he would not hesitate to disagree with anybody should he consider that course to be the right one. I, therefore, wrote Mr. Moody, asked him to read the Breeder article, and to tell me just what he thought of it. Also I solicited any comments he might have to make, explaining that I wanted them for publication, and added that his words would be read with interest by every man interested in horses.

Here is Mr. Moody's answer, and I venture to say no such valuable document on the subject of colt training ever has been given to the public.

Lexington, Ky., January 27, 1915.

Mr. H. T. White.

Dear Sir: In reply to your favor of the 21st, I beg to say that I have read with a great deal of pleasure your article from the "American Horse Breeder" of January 19, and I want to congratulate you upon the fact that you are the first newspaper writer I have ever read that had the proper view of training yearlings to take standard records.

The most pertinent point in the entire article is the last paragraph, wherein you state that unquestionably a large number of yearlings are permanently injured by being trained at that age, and that you did not charge the same to what you term "expert colt handlers." I believe this is the key to the entire situation, and that there has more grief come to youngsters in the hands of men who have never made a study of this branch of the business than ever came to them through any effort that might have been made at the hands of men who have given the greater portion of their lives to the study of kindergarten work.

Every season I see any number of yearlings that are being trained "conservatively." This means that they are jogged along by the side of horses that possess 2:10 or 2:15 speed for some three or four miles while their drivers engage in pleasant conversation. The yearling in the meantime is struggling to keep up, as the horses possibly are jogging about as fast as the colt could trot.

They also believe it is necessary to give them as much training as they would an older horse. The real colt trainer gives little or no jog work, and tries to keep his pupils believing that every move is that of play and fun, instilling in them the idea always that they are out for a lark rather than that of drudgery. The old saying that any horse is well bred enough now to produce trotters might be also applied to the fact that any colt is well enough bred, no matter from what family it may come, to trot in 2:30 as a yearling, everything else being equal. "Speed is born with the foal," and this is the fundamental and necessary quality in order to have a good colt trotter. This does not necessarily mean that they show a lot of trot naturally, for some of the grandest yearlings I have ever trained absolutely had no fixed gait to begin with—in fact, I never trained a yearling to beat 2:30 that was not double-gaited to a greater or lesser extent, and some of the fastest ones I ever trained possessed no gait at all, and it was a considerable time before they ever struck a trot; but they had that undefined something that seems to tell us they possessed great speed.

On many occasions I have been asked as to what is the most necessary qualification in a 2:30 yearling, and I usually refer my questioners to the famous recipe: "First, get the rabbit." Aside from natural speed, I believe that the most essential thing is the ability of the driver to instill in the colt the proper trying qualities; to instill in him that nervous energy that is necessary to great flights of speed, and, at the same time, prevent him from becoming speed crazy. But what is equally important is the nicety of balance, both as to legs and mouth. To perfect the gait of the trotting yearling in order that he may go extremely fast over a distance of ground, his balance should be as perfect as that of a flywheel of a split-second watch. And I sometimes think that the difference between success and failure with a great number of men is the lack of one or both of these latter qualifications.

The pen pictures that a great many writers have drawn of a record yearling are far from the fact. They picture them as a lot of thin, miserable looking, over-trained colts with gouty legs and a haunted expression of the eye; that they have neither life nor ambition; that they are mistreated and are absolutely without friends. To people who have seen these colts and seen them play ten minutes after going a fast mile, see them in high flesh, with clean legs and bright eyes, better developed and larger in every way than those that have been allowed to run in pasture, it is laughable to know the average man's ideas of the looks and condition of a colt that has been taught to carry his speed at anything like a sensational clip.

I have never had any preference as to families so far as early speed is concerned, for, even if they come from sire lines that had no early speed representatives, it is usually found through their dams that there were colt trotting crosses close enough up to lend you encouragement in the enterprise. If nature has endowed a yearling with speed and has also given him the other qualifications necessary, which are good, flat, bony legs, a good appetite, and a brain that is subject to development, I care not from what families he comes—and, after all, it is a matter of brain. The majority of colts I have trained that became anything like famous in their yearling form required a considerable amount of weight to start them, but, as soon as their brain became sufficiently developed, you could lose weight as rapidly as you put it on, and, without exception, these colts have gone extremely light in their flights against Father Time.

Every year we train any number of colts that are not given records, but that show extreme speed—in fact, all of our colts are trained according to the views and ideas of their respective owners. These colts are brushed fast quarters or fast halves, as the owner may elect, and are never given miles under any conditions. In comparing these colts with others that are given records, I do not see that they stay any sounder, or in any better flesh, or have any better heads, or make any better horses than those that are given records, whether championship or not.

The great question is frequently asked: "What has become of the record yearlings?"

Up to the fall of 1914 there were seventy-seven yearling trotters with records from 2:15¾ to 2:30. Of course, those that made records in 1915 could not have had an opportunity to have reduced their yearling marks. Of this seventy-seven, fifty-six have reduced their records to 2:02 and up; thirteen of the same have beaten 2:10, while twenty-two have beaten 2:16; and among them you will find numerous stake winners and contenders in the various futurities, as well as world's champions.

The first yearling (Freedom 2:29¾) beat 2:30 in 1890, just twenty-five years ago. In that length of time the average number of yearlings paid up in the Kentucky Futurity is approximately 750, or about 18,750 colts have been nominated in this one stake alone. People who are continually asking what has become of our record yearlings want to compare the remaining 18,673 with our record yearlings, and yet it is conceded that this is not one-fifth of the total number of colts bred in this period, which would give us something like 93,750 trotting-bred foals that they want to compare with the small number of seventy-seven that have secured records of 2:30 or better up to the fall of 1914.

In physical development of any kind it all depends on what the natural capacity of the pupil may be; as to how much nature has done for him in endowing him with perfect physical construction; a good stomach, and a good brain that is subject to development. Also with a temperament that has just the right quantity of fire and vigor, and, at the same time, one that can be properly controlled when proper methods are used. It makes no difference how far you are trying to teach your pupil to go—whether quarters or halves—if you overdo it in any way you have the same disastrous results, and this applies to horses or colts of any age as well as to yearlings.

In looking back over the last score of years, I can recall many wonderful colts that were only taught to go quarters that were over-trained to their future detriment from the very fact that "it is the clip that kills." It is also a fact that a great many people do not believe it is necessary to have a colt conditioned in order to go a fast quarter after a let-up. In other words, their theory has been to have a colt in a paddock for ten days or two weeks, and, the first day he is up, just as near ready to go a sensational quarter as he would be if he had been given the proper work before he was allowed to extend himself. However, this has become an exploded theory to me, and I have given the business close attention.

To sum up the matter of training yearlings, whether for records or fast fractions of a mile, one of the main things is to employ the same kind of judgment and common sense that would be employed in attempting to go fast with a horse of any age. To be sure that he is normal; that his condition is equal to the task you are asking of him; that he is properly shod and balanced; that his mouth is absolutely flexible and true; and then give him a driver that is possessed of that nervous force that is necessary to instill the best efforts into his pupil, one that is absolutely light handed, with a good day and a good track, and, no matter from what family he may come, if he has been endowed with that speed germ and this has been properly developed, you may expect unusual things from this combination.

Another thing the public expects is that a yearling shall be immune from accidents of all kinds, from sickness, and also expects a guarantee that he will not fall into bad hands or have any bad luck of any kind as soon as he secures a record of 2:30 or better. They expect other horses and other colts in the natural run of things to have all kinds of trouble, but if a yearling has a record of 2:30 and goes wrong in his front legs as a five-year-old, the first thing they will say is: "I expected that, because he was worked to death as a yearling." The large number of aged horses that go wrong each year makes no impression upon the public, but, as soon as a horse that was trained as a yearling goes wrong, a howl goes up that he was knocked out at a tender age.

Yours truly,
HUNTER C. MOODY.

A NATIVE SON IN MISSOURI.

In a brief communication Otto Grigg, the trainer at the Carthage, Mo., track, states that he has purchased the trotting stallion R. Ambush 2:09¼, at that place and that the son of Zolock p. 2:05¼, and May Kinney, by Silkwood 2:07, would be placed in public service at the Carthage fair grounds the coming season.

It will be recalled that the firm of Tangner & Brosius, which conducted a large business at Carthage, purchased R. Ambush from the California owners about five years ago. This firm became heavily involved and just recently dissolved and closed out. The price was not mentioned, but it naturally would be expected that Ambush brought a great bargain, as it was not known likely outside of the county in which he was sold that he was to be sold. However, no matter how good a bargain the new owner secured it does not lessen the real value of Ambush as a sire. When Ambush was first brought to Carthage he was patronized in public service, despite the fact that his fee was $50, a fact that kept many an owner of a standard bred mare from breeding to him. But in more recent years he had not been advertised in public service very much, if any, and was being overlooked by the breeders of that section. Grigg expects to reduce his service fee and will do a good business, as he is a sire that is well worthy of consideration and gets a good class of colts. Few better halfmile track trotters ever campaigned through the southwest than R. Ambush.—Spirit of he West.

GREAT WESTERN CIRCUIT DATES.

At the meeting of the stewards of the Great Western Circuit early this week at Chicago the plans were laid for a season to extend from the middle of July to the first week in November, during which time a sum aggregating a quarter of a million dollars will be raced for by the patrons of the circuit, dates for the various meetings being allotted as follows:

North Randall, Ohio	Week of July 17
Detroit, Michigan	Week of July 24
Peoria, Illinois	Week of July 31
Galesburg, Illinois	Week of August 7
Burlington, Iowa	Week of August 14
Omaha, Nebraska	Week of August 21
Des Moines, Iowa	Week of August 28
Hamline, Minnesota	Week of September 4
Milwaukee, Wisconsin	Week of September 11
Springfield, Illinois	Week of September 18
Sedalia, Missouri	Week of September 25
Albuquerque, N. Mexico,	Week of October 23
Phoenix, Arizona	Week of October 30

Winter "Horse Talk" from Towns Where Trotter is Popular

NEIGHBORHOOD NEWS FROM SONOMA, PETALUMA, SACRAMENTO

Sonoma, Feb. 12, 1916.

On February eighth, the Sonoma Valley Driving Club, which is pleasantly remembered by all followers of the sport of light harness racing for the many successful meetings, large and small, held by it in the past, held its thirteenth annual meeting and elected the following officers for the ensuing year: President, S. B. Lewis; Secretary, E. Lindley; Treasurer, Joseph F. Ryan. The club faces the new season in excellent condition, and its active plans for the coming summer include the inauguration of a three-cornered circuit for the holding of race meetings at least every two weeks, the tracks included in this arrangement being the most excellent one here in Sonoma, Kenilworth Park at Petaluma, and the famous mile course at Santa Rosa, accepted as being at once one of the fastest and safest pieces of dirt in the entire state. Preparations are now under way among the local horsemen and those of neighboring towns for a celebration and race meeting here on July Fourth, with indications of good fields and some very enjoyable sport.

Horsemen are now jogging their horses on the roads surrounding this city but in a short time the track will be in perfect shape for spring training and then work will commence in earnest. Joe Ryan, as usual, has about the largest stable here, and between the hard work of Joe and myself we hope to have a few in shape to race not only around home on the "triangle circuit" but out on the California fair circuit as well. Among them is a big, well developed pacing gelding by Guy Dillon and out of the dam of Kate Dillon 2:12, being a full brother to Emaline Dillon that paced a mile in 2:08½ over the halfmile track at Ferndale. This fellow has an awful lot of natural lick, and while he has had only about forty days of real work he has gone the route in 2:28 with the last half of it in 1:10. Ryan has another young Guy Dillon that we like pretty well and that is out of a good producing dam, Silver Bud by Silver Bow that trotted the Petaluma track twenty years ago in 2:17 as a two-year-old. She is the dam of three that have gone right at the 2:10 mark, Lady Seymour, Buddie G. and Mountain Boy, and we have a good deal of faith in the one we are handling now, a three-year-old chestnut colt. She has another foal still younger that should also make a good trotter, being a handsome son of the Petaluma stallion, McMyrtle.

We also have the former San Francisco pacing mare Hamburg Belle 2:12¼ among the older horses. She is wintering very nicely and will be raced in the matinees here in the valley this summer.

JAMES STERLING.

Petaluma, Feb. 14, 1916.

The Petaluma Driving Club, greatly gratified by the success of the matinees held here last season, is contemplating staging races at the Kenilworth Park track three Sundays in the month during the coming spring and summer, and the course will soon be put in the best possible condition for training, most of the harness horses of this locality now getting plenty of road work on the good drives that we have in this neighborhood. There is no dearth of fast horses in this vicinity and some excellent races should result when local, Santa Rosa and Sonoma horses compete for honors. The local driving club will try to induce the San Francisco-California Driving Club members to hold a matinee here one Sunday in the month, as the program staged here last fall by the bay city organization attracted a generous attendance and aroused a considerable and pleasing amount of enthusiasm. It was a successful affair, both in a financial way and the quality of sport provided, and local adherents of the trotting turf are hoping that the San Francisco folks will favor us with more matinees of the same brand.

Jack Grimes, the well known trainer and driver who always has a plentiful amount of speed on tap in his stable, will soon put into training a string of about forty trotters and pacers, most of which he purchased at the Rush & Haile sales at Suisun. Most of them are the progeny of the great speed sire Demonio 2:11¼ and a good many are very fashionably bred, the brief pedigrees of some of the number being as follows: Colonel Demonio, green pacer, by Demonio, dam by Nutwood Wilkes 2:16½, whose daughters have produced so many great horses; Don Demonio, chestnut gelding by Demonio, dam by Dawn 2:18¾; Billy, pacer, by Kinney Lou 2:07¾, dam Mildred O. by Secretary; two-year-old bay colt, trotter, by Alconda Jay, dam by McKinney 2:11¼ and grandam by Guy Wilkes 2:15¼; two two-year-old colts, trotters, by Montbaine and out off Demonio mares (one of these is a strapping big fellow, standing sixteen hands and weighing eleven hundred pounds now); seven three- and four-year-olds by General J. B. Frisbie out of Demonio dams, and a yearling filly by Darby Mc., dam by Demonio. Two star performers with some previous education which Mr. Grimes will soon put back into training, are the pacers Nutwood Demonio, by Demonio and out of a Nutwood Wilkes mare, and Glenwood Mc., by By Mack (son of McKinney) and out of Lady Glenway. Nutwood Demonio has paced miles in 2:10 and Glenwood Mc. has reeled 'em off in 2:17 on a slow track with very little training. Mr. Grimes expects great things from this fellow.

Other horses that will soon be put in training are my pacer Billy T. by Demonio, dam Minerva by Guy Wilkes (Billy being a full brother to Denervo 2:06¼ and Ben Rush 2:10½ and a half-brother to Solano Boy 2:07, so I think he has a chance to make some pacer); Tony Hoppe's pacing gelding by By Mack; Charles Wyatt's trotter by San Francisco 2:07¾, dam by Nutwood; Dan McGovern's trotter by Bonnie McKinney; Richard Harris' trotter by McMyrtle, dam by Prince Almont, and K. V. McDonald's three-year-old trotting colt by General J. B. Frisbie, dam by Demonio. We will have plenty on hand to make pretty fair fields in our matinees, and not all the visitors will beat all of us.

RICHARD HEALEY.

Sacramento, February 15, 1916.

Will send you a list of horses in training at the best winter track on the coast, just to let folks know that we have plenty of them here, and when I say "best winter track" I mean just that, as there has been but a day or so at a time all during this rainy season when it was not fit to work on.

Jay Frank, who came here from Pleasanton some weeks ago, is working seven head owned by Mr. Lewis, a two-year-old by Best Policy, dam by Zombro; a five-year-old bay mare by Gerald G. (a good son of Zombro), dam by Clipper 2:06½; a five-year old brown gelding by Bonnie McKinney, dam by a son of Nutwood; a three-year-old bay mare by Red Cloak Jr., dam by Prince Nutwood; a seven-year-old chestnut mare by Zolock, dam by Clipper; a six-year-old brown gelding by Lijero and the seven-year-old horse Red Cloak Jr.

William Ivey has a four-year-old brown gelding by Montbaine, dam by Lockheart 2:08½; a five-year-old bay gelding by Palite, dam by Alexander Button; a two-year-old bay gelding by The Bondsman, dam Oniska (dam of San Francisco 2:07¾, etc.) by Nutwood Wilkes; a three-year-old brown gelding, brother to the good trotting mare Expedio 2:09¼, and a four-year-old brown mare by Lijero, dam by Wildnut.

Chris Jorgenson, who developed the good trotter Dean Swift 2:08 here on this track some three years ago, has a four-year-old bay mare by The Bondsman, dam by McKinney; a brown gelding of the same age by Lijero, dam Elevator by Don Marvin; also the brown gelding Pedro and the fast record pacer Booze 2:07¼, who has had a number of trainers in the course of the last year.

Walter Tryon has the S. H. Cowell horses, the older ones of the stable all being well known to western race goers, including George Woodard 2:07½, Panama 2:10¼, John Mac 2:12¼, Albaloma 2:08¼ and Rastus 2:05¼, this gentleman being something of a stranger in this particular neck of the woods, and recently of the McDonald stable on the Grand Circuit. As he won a couple of hot mains on the raging grand last season and was second in four others, beating Yedno 2:02½ a five-heat race in New York and at different times outfooting Hal Boy 2:01½, Russell Boy 2:02¼, Judge Ormonde 2:02½ and several lesser lights, it looks as though he might be pretty hard to get along with out here. Two Peter the Great two-year-olds in the Cowell string, one a stud colt out of a Bingen mare, grandam a sister to Nico 2:08¼, and the other a filly out of a daughter of Gambetta Wilkes, promise to make history in the future, and Walter has a good young pacer that is really up to something—the four-year-old gelding Dixon Boy by The Patchen Boy that worked this track last winter in 2:08.

John Quinn, who put himself temporarily "afoot" some weeks ago when he sold Albaloma to Harry Cowell, is back at the old stand again with two unmarked trotters owned by the Fresno horseman, M. L. Woy, one of them being a green mare that has worked close to the 2:10 mark at the trot. John has been away from the Sacramento track for two winters, but cannot see that his other wintering places had anything on this one in the way of off season advantages.

Tom Holmes has Golden West, a brother to All Style 2:10, and a five-year-old bay gelding by Stam B. 2:11¾, dam by McKinney.

James Thompson has Leavitt Todhunter's good Peter the Great trotter, Peter McKlyo (3) 2:12½; Sweet Bow (2) 2:17½ and her two-year-old bay colt by Peter McKlyo; a two-year-old bay colt by General Watts (3) 2:06¾, dams by Bon Voyage, Allie Wilkes, George Wilkes and Mambrino Patchen, as named; a two-year-old brown filly by Peter McKlyo, dam by Bon Voyage.

L. B. Daniels has the Silva horses and those that were raced last year just commenced daily jogging about the first of the month. This bunch includes the ever reliable Teddy Bear 2:05, who showed last season that he could pace right at his record; Bondalean (3) 2:06¼, the second fastes pacer of the age in the land last season; Potrero Boy 2:06¼, who will be hard to muss in the fast classes out here this season; John Malcolm 2:09¼, last year's fastest four-year-old pacing gelding; Oro Mo 2:09¼, and the trotters Kid Cupid 2:08¾, San Felipe 2:09¼, Columbia T. 2:13½ and Con Brino 2:14¼. The younger Silva candidates include four two-year-olds by Teddy Bear out of mares by Stam B., Zombro, Demonio and Mendocino; Jim Hardeman, three-year-old brown gelding by Directum Spier 2:11¼, dam Ila Moko, dam of the world's champion yearling trotting filly Anselila; a two-year-old brown gelding by Prince Ansel out of Silver Haw, the dam of Helen Stiles 2:06¼; a two-year-old brown filly by Palo King out of Ramona, the dam of Del Rey 2:03¾ and Verna McKinney (2) 2:13; a two-year-old bay gelding by Montbaine out of a producer of 2:10 speed; Stanley Quinn, three-year-old brown gelding by Dan Logan 2:07½, and Inspector by Lijero, out of Queen S., the dam of Teddy Bear. Daniels also has two four-year-olds owned by Dr. E. J. Weldon of this city, one a brown sister to Expedio and the other a bay gelding by Demonio out of a mare by Welcome. The Teddy Bear two-year-olds all can show quite well, and there are about ten young things of that age at this track that will be stepping quarters in thirty-five seconds by May if the blacksmith doesn't cut their toes off and if the track suits them and the water agrees with them and the snow goes out of the mountains gradually and as it should, instead of starting out on a rush wih a warm wind, etc., etc.

I have a couple of small bones to pick with a couple of members of the turf writers union before bringing this communication to a close. Last October Volunteer in the Horse Review used a column or so telling how Bingen Silk 2:08¾ was the greatest two-year-old trotting colt that he ever saw. Now I would have to call Volunteer the greatest turf writer that ever was, but at the same time I would have to look in the Year Book and see what happened to Peter Volo as a two-year-old. The only difference between Peter Volo and Bingen Silk is that Peter started when a two-year-old in the three biggest stakes for the age, didn't lost a heat, and trotted in 2:04½, while Bingen Silk also started in the three biggest two-year-old stakes, never won a heat, was beaten in from 2:07¾ (the fastest heat, and he was third in that one) to 2:12¾, and didn't get as good as second money in but one of these races. Wish I had one like Bingen Silk, but his trotting average doesn't come on the same page with that of Peter Volo nor does any other horse's, to my notion.

Another writer spoke of Margaret Druien being beaten by a cheap horse, Ross B. No, Ross B. isn't much of a trotter. He has raced for the last four years, won most of his races, and every time that they beat him they went in 2:02½ to 2:05. Find another record like it and it's my treat.

"PREPAREDNESS."

SUGGESTS MATINEE SYSTEM OF CLASSIFICATION.

We would like to present for the consideration of such of our readers as may be interested in the matter, the following letter recently received at this office from one of the very well known western trainers, whose name is withheld on his own request. The letter included a suggestion that the editor draw up a plan for racing along the lines submitted herewith and determine the feasibility of the same by asking the expression of horsemen concerning it, but right here is where the editor passes the buck. Admitting that the present system of racing is inadequate and that the system suggested, or rather hinted at, might be put into working order on a practicable basis by the grace of God and a few other miracles, the matter is entirely too deep for one man to tackle alone. The only systems of matinee classifications with which the editor is at all familiar have not only been far from satisfactory to the "classificationees" but have been productive of about every sort of trouble to which the flesh is heir, including plain and fancy assault and battery, mayhem, arson, personal recrimination, bankruptcy (voluntary and involuntary), chilblains, compound fractures of the disposition, disruption of lifelong friendships, cold feet and the frozen face, divorce and alimony, pellagra, the sleeping sickness and other minor ills too numerous to mention. The proper functions of the sergeant-at-arms of several present day matinee clubs which shall here be nameless are not the exclusion of nonmembers from the meeting on nights when the next Sunday's card is to be "classified," but the frisking of each member as he arrives to see that he does not smuggle into the place of worship some such pleasant plaything as a gat or a sanded sock or a pair of knucks or a black jack. Only by such means are the subsequent disturbances limited to the trifling matters above enumerated and sudden murder prevented. However, there are some sound theories in the matinee system at heart, and if the gentleman who first sponsored the idea or any of those with whom he has talked it over will start the ball rolling we will give their ideas air and elaborate on them if possible and practicable. Until then, however, in the matter of promulgating a system for professional racing on the matinee line, we are due to preserve a silence besides which the dumbness of the Sphinx would seem a raucous riot. Send along your definite ideas and perhaps something may be done for them. The letter is as follows, and as there is much good solid matter in it we respectfully commend it to your attention:

In your last issue I read your article on the Pacific Coast Fair Association, and I think all your suggestions good ones; I know that we are all working to the same point, that is, some way to try and put the game on a popular basis. You know as well as I that for a long time the business has been drifting from bad to worse, until at the present time we have about reached the crisis, and I have several letters of recent date from some of the best horsemen in the United States that will show that it is not confined alone to the Pacific Coast, but is practically the same all over the country. Among them is one from Mr. Geers and one from Mr. H. K. Devereux.

You know that you cannot make a business out of it and have colts and horses sell for the prices which they do now at most of the sales. When you can buy colts as well bred as you can nowadays for $150 or less there is not much inducement for stock farms or other breeders, and I believe it is wholly due to our system of racing. At the present time it is almost impossible for a poor man or one of moderate means to try and develop a green one, as if his prospect does not turn out to be high class he has no redress, no chance whatever, to get hardly any part of his investment back. The natural consequence is that that class of people will not breed, buy or train, and as a consequence the industry has not got, to any extent (and is losing fast), the support that it must have to exist, that is, the support of the little fellow. There is no business or sport that can exist without them, and under present conditions I cannot conscientiously advise or try to influence my friends to buy or train, as I have no way of giving any sort of guarantee that if his colt or prospect does not turn out to be high class he will not be much of a loser.

We are in the same position right now that a farmer was in Vermont that a friend of mine told me about. My friend was born in Vermont and came west, and after a good many years went back to visit the old folks, and inquiring about his boyhood friends, they told him that this particular one was on the farm where he had been born, which had belonged to his father and grandfather. He paid him a visit and after awhile when talking over the farm, asked him why he did not do things some different, that he believed it would pay him, and his boyhood friend replied: "Well, I farm the place like my father and grandfather did, and they were pretty good farmers." That is the same rut that the harness game has got into. See how long it took to get rid of the old three in five idea.

Why is it that horses sell for better prices in Europe, Australia, etc., than here? Simply because all classes of speed have a valuation, an earning capacity. You know that the spectator and pleasure seeker goes to the races to see contests of speed, but not necessarily extreme speed; the general public would go much farther and pay more to see a race that was a genuine contest even if the speed was not better than 2:20 than they would to see a so-called race where one horse won practically as he pleased and went in 2:04, and so would I. I believe the crying need of the business is a system of racing whereby all classes of speed, from say 2:20 down, will have an earning capacity, thereby a valuation, that would give the little fellow a chance and keep him in the game. There are four very good reasons why we have got to change the system, enumerated I would say about as follows: First, some way to utilize all classes of speed from 2:20 down; second, to get rid of suspension lists; third, to lower entrance fees; fourth, to provide a way or have a system whereby there would be no such thing as outclassed horses, allowing horses to race as long as serviceably sound. You will say, "How are we going to do this?" In my opinion it is an easy problem to solve, and right here I am going to ask you a question, that is, Why would it not be practical to race horses for money under the same system that we matinee them?

Another thing, what sport or business could have existed under the same conditions that the harness game has? You know that the matinee game is going to the bad, and why not? It is a wonder to me that it has lived as long as it has, as it is in the same condition as the professional game, that is, supported at a sacrifice most of the time by the little fellow, who does so through his love for the horse and enthusiasm in the sport, and I think that it has been one of the most detrimental things that could have happened to the professional sport for the simple reason that where it existed the public saw just as good and generally better racing than they would see when paying admission to do so. Give your outclassed matinee horse a chance to race for money and there will be no more matinees. If we would race under this system all horses that could go in 2:20 or better would have an earning capacity, thereby a valuation, and there would be no suspension list as you would make every matinee horse in California a race horse, and as a natural consequence there would be very few races that would be so in name only, as they are at the present time. It would not be as it is now, after three or four meetings, all the horses but the money winners shipped home, and not enough horses to fill the races and make a decent program and leave the associations with late meetings without any races, practically, and a lot of suspensions that they would never get, and a lot of good horsemen put out of the game.

My idea would be to not eliminate the class proposition as it is today altogether, but to give, say, four class races on each program, one for green trotters and one for green pacers, it being compulsory for them to start in these races before being eligible to classification in A, B, C, or whatever class they might qualify for afterward, and then give two fast classes, one for trotters and one for pacers. I have talked to a great many professional horsemen during the last year, and I have got the first one to hear say that it was not the right idea, in fact, most all of them would say, "You are right, and I would like to see that done. It looks to me as if it would give all classes of speed a standard value, and put the game somewhere near on a business basis and guarantee any association that they could give a successful harness meeting wherever there was a fit place to give one."

It would make it so that I could advise my friend or patron to buy a prospect and spend some money on him, as if he had any speed he would have a chance to earn something and if he wanted to sell there would be someone to buy, as the purchaser would have a chance to earn his purchase price.

I am going to say a little about the time to hold meetings in California and then quit. I don't think there should be a meeting held in California earlier than August 15th or even September 1st, and I will tell you why. In most of the places where there is a chance to hold a successful meeting most of the attendance must come from the rural districts; in order to get the benefit of that you have got to wait until the harvesting is over, and they have the time and means to spend for recreation. Aside from that, the fairs would be better in display, as about all crops are ripened and in condition for display. If we would follow that plan we could commence racing somewhere in the northern part of the state, say Eureka, which I think will be found one of the best places in the state for a meeting, and end at El Centro, and by commencing at that time I think there would be less trouble in arranging dates. Some one would probably have the rain bugaboo, but what if it did rain a little? Go right on just the same as they do in Washington and Oregon. See all the trainers there are around the country, and good ones too, that are not doing enough to make a living, and some that have quit the game. Think it over and I believe you will agree with me that it is the system of racing that is the whole trouble.

◈ ◈ ◈

Any person interested in northwestern farm ranch lands will find some excellent properties listed for sale elsewhere in this number.

◈ ◈ ◈

Alonzo McDonald, who spent last winter at Los Angeles, announced some time ago that Memphis would be the scene of his training operations this year, but finally compromised with himself and decided to keep his entire stable at the Indiana state fair plant at Indianapolis. Last season the best trotter he had at the races, Ames Albingen, was made over that course in the winter and spring and Alonzo evidently will be pretty well pleased if he can fix up a bunch like this bird for the frays of 1916.

◈ ◈ ◈

Dick McMahon took his flat wheel to Bonesetter Reese at Youngstown, O., but that wizard could do nothing for him, so Richard is once more thrown upon the tender mercies of the average practitioner. Not discouraged by the outlook, he merely spilled a few cans of grease on the spindles of the old wagon and started for the south with Mrs. McMahon, expecting to spend several weeks visiting with members of the fraternity at those two popular winter resorts, Memphis and Thomasville.

◈ ◈ ◈

The Winnipeg trainers, Will Fleming, Barney Barnes and George Spencer, are all comfortably stabled in winter quarters and are doing only light road work around the rotunda of the Leland Hotel, Mac Rochon's welcome home to all who speak the light harness language. Joe Carson is in charge of the training camp, takes all bets and settles all arguments.—Canadian Sportsman.

◈ ◈ ◈

Dr. Burns Jr. 2:04¼, who was fired and turned out after his arrival in the east last summer subsequent to his breakdown here at the exposition, has recently been sent back to his old pilot, Al Whitney, at the West Side track, Chicago, and will be trained for another whirl at the fast ones, provided he stands the gaff. The Doctor is not as great a source of uneasiness to as many folks at this writing as was the case last season.

◈ ◈ ◈

Harry Nelson, the Selma horseman and stallioneer, has recently purchased from Louis Merrill of Coalinga a pair of mammoth jacks that will be in service in the Selma neighborhood this year. Last season Harry's stallions and jacks served over three hundred mares and he is out to exceed that figure this time. Expressive Mac 2:25½ was one of the best patronized trotting stallions in the state and the class of mares sent to him last year were the best to which he has ever had access. Mr. Nelson is a frequent user of the advertising columns of the Breeder and Sportsman and never fails to get plenty of answers to his ads.

◈ ◈ ◈

Joe Patchen II. 2:03¼ is taking his winter road work on the streets of Winnipeg hooked to a speed wagon and the big train never fails to attract the attention of everyone on the street when he goes by. Quintell is being handled in a similar manner and the reports from across the border are to the effect that both horses are fit as can be.

◈ ◈ ◈

Andrew Albright, Jr., the New Jersey horse breeder who is spending the winter in California after his usual custom, concluded negotiations this week with I. L. Borden of this city for the purchase of the bay mare Baby Doll 2:10¼, who has been a familiar figure on western tracks since her three-year-old season. When here last spring Mr. Albright purchased from the estate of W. J. Miller the full sister to Baby Doll, Katalina 2:11¼, and it is his satisfaction with the latter matron that led to the purchase of the Borden mare. Katalina is the dam of the sensationally fast pacer Bondalean (3) 2:06¼, who ranks as the second fastest wiggler of that age for the season of 1915, and to the cover of The Proof 2:10¾ produced a filly that is pronounced one of the nicest trotting prospects in New Jersey, the little lady having been purchased with her dam and being now a two-year-old. Mr. Albright's latest acquisition will be shipped to Los Angeles early next week and before setting out on the long journey to Prospect Farm will be mated to one of the stallions of the W. G. Durfee etsablishment, while in the future it is the new owner's hope to produce some real racehorses from the California mares to the cover his halfmile track champion Nathan Axworthy 2:09¼ or his good son of Kentucky Todd, Toddling (3) 2:15¼.

J. W. Zibbell of Fresno, who gets his mail and his three-a-day at 103 Thesta street, that city, is in the market for some fillies by The Bondsman, for brood mare purposes only and at brood mare prices, and anyone having fillies of this sort, of any age, may find a buyer by addressing him.

◈ ◈ ◈

The grapevine telegraph is hot with dispatches from southern California to the effect that one of the greatest stallions in that section is soon to find a new home across the briny deep. While the horse mentioned in the rumorograms is one that we would like to see stay right where he is, the folks who buy him will make a ten strike of the cleanest kind.

◈ ◈ ◈

California stallion owners who have been recent customers of our service department are W. G. Durfee and the Hemet Stock Farm, Mr. Durfee getting out his usual cards setting forth the many good qualities of those great sires Carlokin and Copa de Oro, while the Hemet folks are telling over two thousand people the merits of Wilbur Lou and his youngsters, using for that purpose an attractive folding postal card, illustrated and printed in two colors. A good horse and a good ad mean better mares and more of 'em, consequently better colts and more money.

◈ ◈ ◈

Mrs. T. L. Johnson of North Spur, one of the most accomplished horsewomen of the Golden State and owner at various times of numerous saddle horses of high degree, has just acquired two of the most highly regarded members of that family to be found in the Blue Grass, the noted matron Lady McDonald A. and her yearling bay colt King of Air, at a price that is reported to have run well into four figures. Lady McDonald A. is a sister to that most noted of Kentucky saddle horse sires, Star McDonald, and is the dam of the noted show mare My Idol, owned by Paul Brown of Missouri and exhibited at theP.-P. I. E. by E. D. Moore of Columbia, winning many prizes and being adjudged senior and grand champion of that show. The selection was made for Mrs. Johnson by "Billy" Shropshire, which in itself is a pretty thorough guarantee that the new owner will be pretty proud of the mare and colt when she gets them to her California estate.

◈ ◈ ◈

The high water mark in draft horse prices for recent years was reached a few days ago in the central west when W. S. Corsa of Gregory Farm, Whitehall, Ill., sold a half interest in the great Percheron stallion Carnot for twenty thousand dollars, he new part owner of the international champion being Rudolph G. Leeds of Richmond, Indiana. Carnot was bought by Mr. Corsa for ten thousand dollars and at the prices paid for a number of his get sold during the last season or so by Gregory Farm he would have paid a six per cent dividend on a capitalization of nve times that amount, so twenty thousand dollars for a half interest in his is not so "far fetched" as might appear at first glance. He is eleven years old and his period of usefulness should extend for a considerable term of years. Western draft horse fanciers are well aware of the qualities of his get through the presence at the exposition horse show of a small but select representation from Gregory Farm, every one of which furnished hot competition whenever exhibited.

◈ ◈ ◈

Early in the present week Superintendent Charley DeRyder of Pleasanton Driving Park shipped a car containing nine head of equine aristocrats from that point, destined for the classic neighborhood of Lexington, six of the number being thoroughbreds and the other three trotters. The thoroughbreds are some high class matrons recently purchased by Jack Atkin for the account of Rodney MacKenzie from the Oakwood Stock Farm of Lawrence and Comstock, most of them destined to be bred to Buckhorn, who is making his first stud season at the Blue Grass establishment of Hal Price Headley. The trotters were Miss Perfection 2:08¼, Anvilite (2) 2:22¼, both owned by Mr. MacKenzie and sent east to get in shape for a campaign on the big line this season, and the yearling colt recently acquired by Jack Atkin from his employer and patron, the youngster being a husky son of Zomblack 2:10¼ and Martha Spy by The Spy, Martha being the dam of Anvilite. When in Lexington recently Jack arranged with James Snell to take this fellow and "put the preparation to him," though Jack threatens to drive him in his futurity engagements himself, as witness the line of conversation he handed out to Colonel Cromwell of the staff of our esteemed s. s. C. c.: "Talk about whiz, this bird has got all that it takes to make the stuff. He is going to be to the trotting turf what Buckhorn was to the running turf, and, believe me, that's a heap. Charley DeRyder hooked this fellow to a cart for me the day I left Pleasanton, and let him brush a piece up the track for me. Oh, he's there all right. Who knows, some of these days I may be teaming that fellow for the coon skins myself. Could I—say, get away with that stuff—could I drive a trotter? Of course, I could, and I will some day." All kidding aside, Jack has more than once demonstrated on visits to Pleasanton that he is a skinner of quality, so don't be surprised if he makes his threats good. Who will handle the great pair of trotters sent down by R. J. has not yet been announced, but it will be some good man and it will take some good man and some good horse to beat either one of them unless bad luck plays its part.

George Ramage of Santa Rosa, who went to the central west last summer and failed to return with the balance of the Californians who made similar excursions, is wintering at Manhattan, Kansas, and writes to local friends that jogging horses in zero weather is quite different from anything he has gone up against in recent years. The trotting mare Clara Mills which he took over with him won a couple of races in September, taking a mark of 2:24¼ over a halfmile track, and George thinks she will be right there this season. They do things a little different down in the short grass country from the systems in vogue in California, and George ranks as fortunate both horses and men that have the advantage of wintering out here.

◈ ◈ ◈

E. D. Gould of Kearney, Nebraska, who occupies the position of foremost horsebreeder of that section of the world and who has recently made extensive additions to the ranks of the matrons at his Midway Stock Farm, has purchased from Clinton A. Harrison of Seattle the grandly bred stallion Robert Bingen 2:11¼ and the three-year-old trotting filly Sadie Ansel (2) 2:23½. The negotiations had been under way for some time, but the deal was not definitely closed until this week, the horses being shipped on Wednesday. Robert Bingen is one of the very best bred sons of Bingen and should be one of the most successful members of his tribe as a progenitor of extreme speed, as he comes of breeding on lines on the maternal side and was himself possessed of 2:10 speed at either the trot or the pace. He has been handicapped in various ways since coming to California and had small opportunity for showing his true worth, either as sire or race horse. Mr. Gould, having owned his dam, the famous matron Episode 2:18 by Ambassador, and a number of her produce, is well aware of his excellent inherent qualities and will use his services as consort to the band of good mares that he has assembled at Midway Farm. Sadie Ansel, the trotting filly who accompanies Bingen on the journey to their new home in Nebraska, is a daughter of that sire of yearling champions, Prince Ansel, and is out of the double producer Lauress by Mendocino, sire of the dam of Mary Putney (3) 2:05½, etc. Lauress was one of the most attractive matrons at Woodland Stock Farm and Sadie Ansel, at the time she took her record of 2:23½ at the farm last spring, gave every indication of being one of the best two-year-old fillies of the year. Like practically everything else in training at that establishment last season she went wrong later, her condition being aggravated by a touch of blood poisoning contracted in some jack veterinary work. After being taken to Seattle she responded to the course prescribed for her by Mr. Harrison and has "come alive" in a manner that indicated that she may yet become a useful trotter, while as a brood mare she should be still more valuable.

THE OLD COWPONIES.

During the search for horses by the European buyers this year I was commissioned to go out as an advance scout and round up the stock to be inspected at various places on certain days. I have been in the horse game all my life and the one thing that strikes me most nowadays is the uniformly great improvement that has come to the equine race here in the Rocky mountain region. At the same time, while we have been building up size we have not enhanced the endurance or staying qualities of our horse stock and I have had a good deal of difficulty in convincing the foreign buyers on this point so patent to all the old cowmen, but so little understood by our friends from abroad. Twenty-five or thirty years ago most of the ranch horses in this country were Texas bronchos. The genuine caballo was not a thing of beauty, but it had points of excellence unrivaled by any other animal of the horse kind. It had more strength in proportion to size, could travel farther in a day and be ready to go again the next morning than any well-bred and high-priced American horse that ever traveled over the plains. It could be trained to take what was called a running walk, a sort of cross between a walk and a trot. I have known a pony weighing no more than 750 pounds to carry a 200-pound man with a saddle weighing from forty to fifty pounds, a gun, blankets, slicker, frying pan, coffee pot, a total weight of 260 or 265 pounds, or one-third its own weight on its back, and travel from seventy-five to ninety miles a day. Then with perhaps nothing to eat but a feed of buffalo grass the mustang would repeat the performance the next day. No American horse weighing twice as much as that pony could have stayed with it three days hand running.

The genuine mustang was not devoid of horse intellect. It could be trained to be a first-class cutting horse and this meant a large amount of horse sense, which no doubt was an inherited quality acquired from its Barb or Arabic ancestors brought to America by the Spanish conquistadores and who in turn acquired the stock from the Moors 600 or 700 years ago. I have seen ponies that without a rider would have gone into the middle of a herd of 5,000 cattle, picked out the animal that had been pointed out to them and brought it out of the band. Such a pony had brains, but was not an animal of trusting and loving nature. He evidently regarded life as a skin game of which he was the victim. He had made the discovery that man was too many for him and he submitted to human rule not because he liked it, but because he had to put up with it. There never seemed to be any bond of mutual trust and affection between him and his master. With the domestic American horse it is generally easy enough to go out to the pasture, call him up and slip a halter over his head. If the tenderfoot who had just purchased a well-broken mustang thought he could run that sort of a sandy on his Texas steed he had another think coming. It might be a quarter of a century old and have been ridden 10,000 times, but no man could walk up to him, catch him by the foretop and slip a bridle or halter over his head. You could put a hackamore on him when he was cornered and satisfied that he couldn't get away, or if you had skill enough to throw a rope over his head you could get him that way, but so long as he lived he acted on the theory that he would give up when he had to and not until then.

But with all his faults and sins of omission and commission, the broncho was adapted to the business of that time. He was as long winded as an antelope and sure footed as a coyote. He could go at full speed through a prairie dog town where disaster seemed to wait for every jump, and not tumble. And this ability to stay on his feet was mighty important. Often at night when a herd of cattle had been bedded down something would start a panic and stampede. It might be simply a slinking coyote running through the herd. It might be a sudden clap of thunder. It was in a case of this kind where the pure blooded mustang showed his usefulness. For mile after mile he would run without a stumble or fall until the rush of the maddened cattle was finally checked. The big draft horses and fine roadsters that are plentiful now are all right for this day and generation but the little wiry mustang of sure foot, untiring nerve and unconfiding nature was the best animal for his time.—Field and Farm.

OUR THORPE FOR AMERICA.

Mr. W. J. Fleming's wonderful pacer Our Thorpe, whose brilliancy has been quite a feature of this season's racing in New Zealand, may not much longer thrill Maoriland crowds, as his owner contemplates sending him to America to measure strides with some of the cracks there. Competent New Zealand judges who closely followed the champion pacer through his highly successful 1915 campaign have, on more than one occasion, expressed the belief that he is the greatest pacer ever seen in the Dominion. Facts that have lent considerable weight to this conclusion were his two decisive defeats of Country Belle in the Christchurch free-for-all and the New Brighton Cup. Country Belle's recent achievements in lowering the Australasian mile record of 2:8 3-5, held by Emmeline, to 2:7 1-5, and the Australasian two-mile record of 4:28 1-5, held by Denver Huon, to 4:22 4-5 have conclusively proved that she is a pacer of very high calibre, and the possession of a pacer which is admittedly this mare's superior must undoubtedly be a source of pride to Mr. Fleming, and incline the belief that his horse is capable of lowering the colors of some of the doyens of the American trotting turf. Our Thorpe followed up a remarkable run of success by winning the Champion Handicap, of 600 sovs., the chief event at the Canterbury Park meeting on New Year's day. He was opposed to a formidable field of 12, and though conceding 10 seconds to the limit horse, overcame the opposition with ease and left the two miles behind him in 4:32—a 2:15½ gait. A fortnight previously, at the New Brighton fixture, he competed in the New Brighton Cup, of 400 sovs., a free-for-all event. Though only two competitors were ranged against him, the fact of one of those opponents being Country Belle, at present in record-breaking mood, set the O.Y.M. horse a task, but he finished full of vim two lengths ahead of Mr. Morland's mare in 4:30—a 2:15 gait. After finishing second to Country Belle in the New Zealand Cup in 4:35 2-5 last November, Our Thorpe gained what was, from point of speed, his greatest triumph in the mile and a quarter free-for-all, of 500 sovs., at the big Cup meeting. In that event his opponents were Country Belle, Emmeline, Eccentric, Adelaide Direct, Tommy C., and Win Soon, all distinguished performers, but he quickly left them behind with the sole exception of Country Belle, who contested the finish with him, but was three lengths on the wrong side at the post. His time for the mile and a quarter on that occasion (2:41) is the Australasian record for the distance, and his mile rate averaged 2:09. That Our Thorpe is possessed of rare staying qualities was evidenced in the Victoria Handicap, a £350 event, at the Christchurch Spring Meeting in 1914. The distance was two and a quarter miles, and the opposition strong, but he outclassed his antagonists and got over the distance in 5:12, which represents a rate of 2:17¾, a most creditable performance over the distance. Last season Our Thorpe was started eight times and gained five wins and a third. His two principal successes were attained in the Champion Handicap at South Canterbury, in which he stepped 2:19 1-5, and in the King George Handicap at Christchurch, in which his rate was 2:21½. In his last four starts he has caught the judge's eye on three occasions, and also gained a second; has defeated the elite of New Zealand trotting stock, and has amassed 1550 sovs. in stake money. Being only five years old, Our Thorpe, all going well, can be relied upon to earn his owner a still greater sum, perhaps on American tracks and against some of the "speed marvels" of which we hear so much.—Australian Trotting Record.

ROD, GUN AND KENNEL

CONDUCTED BY FISHER HUNT

FLY-CASTING TOURNEY ON TUESDAY.

Washington's Birthday, which falls on Tuesday next, will mark the first fly-casting activities of the season. The San Francisco Flycasting Club will stage its mid-winter tournament at Stow Lake in Golden Gate Park, and a large gathering of experts is expected to be in attendance.

Eight events are on the program. They are:

1. Heavy tackle accuracy.
2. One-half ounce lure accuracy.
3. Dry fly accuracy.
4. Delicacy and accuracy.
5. Light tackle distance.
6. Salmon fly.
7. One-half ounce lure distance.
8. Obstacle fly.

The tournament will start at 10 a. m. and luncheon will be served at one. Ladies are cordially invited. Prizes will be presented to the winners and the next best score in each event.

Secretary P. W. Shattuck announces, "Presentation of the prizes will be made at the mid-winter banquet to be held March 2nd or 3rd. A fine program has been arranged—so be sure and keep the date open. Announcement will be made shortly of the time and place. If you don't cast—come and tell the other fellows how to do it."

* * * *

Honolulu, February 15.—Rod and line fishing records for the Hawaiian Islands were broken today by J. W. Jump of Los Angeles, Cal.; F. W. Burnham of Martinez, Cal., and H. L. Morris of Denver, when they hauled in from the waters on the lee of the island of Maui five yellow fin tuna weighing in all 327 pounds, and twenty-five other game fish.

* * * *

A casting club has been organized at Seattle, Wash., under the name of the Seattle Fly and Bait Casting Club. Following are the officers of the new organization: President, P. Pitt Shaw; vice-president, Dr. C. C. Ballou; secretary, L. T. Jacobsen; captain, E. A. Throckmorton; board of trustees, Dr. J. S. Thomas, L. F. Lane, W. J. Loomis, A. C. Bunker and C. E. Moline. There are now approximately 150 members in the club and new accessions are being made daily. One member brought in eighteen new applicants in one day. Casting grounds will be selected in the near future. The promoters of the club state that at the rate new members are being enrolled it will not be long before the club will be the largest in the West.

* * * *

Lovers of the rod and reel in Utah who desire to take advantage of the six weeks open season on trout, which began February 15, may have to get to the streams on snowshoes, but after they once get to them, the speckled beauties will be there in plenty, is the declaration of Fred W. Chambers, state fish and game commissioner. Hundreds of inquiries were made by sportsmen concerning the prospects for the early opening ,says the fish and game commissioner, so the outlook is for lots of fishermen to brave the snows of the canyon.

Further evidence that the early opening will bring forth a young army of rod wielders is the demand throughout the state for licenses to fish and hunt. While the State Commissioner's office could not make any check on the number sold, Commissioner Chambers said it was safe to say that between 4,000 and 5,000 licenses had been issued during January and the report is that a heavy demand is still being made for them in all cities.

NO DECISION ON MIGRATORY BIRD LAW.

No decision has been reached by the United States Supreme Court regarding the federal migratory bird law, although one was promised by outside parties a year ago. Now the supreme court is on vacation, and a decision is no nearer than before.

There is some hope of a determination by June. Friends argue the delay favorable, opponents think it indicates uncertainty and the efforts of advocates of the law to gain time so as to cement it into constitutionality by the enactment of a foreign reciprocal treaty with Canada, which is no easy task with war in mind. Nobody knows but the supreme bench, and they are not telling.

* * * *

Those planting duck food of any sort, or intending to do so by way of bringing up the shooting upon their club preserves, should operate in the spring.

Since grain-farming gave way to beet raising, the South has been deficient in food for ducks.

* * * *

Something must be done to artificially make the duck-ponds more attractive. There are many foods, many plants which grow in some places about the gun club ponds. The idea is spreading that pasturing too heavily is a mistake, as it forces cattle to eat weeds they would pass by for the ducks if lands were not over-crowded.

NEWS OF KENNEL DOINGS.

The officers of the Golden Gate Kennel Club will hold a meeting this week to decide on the judge and superintendent. It is very likely that Walter H. Reeves will be the club's selection to officiate as judge of all breeds.

‡ ‡ ‡

B. I. Bloch, a well-known local attorney and owner of the Vendome French bulldog kennels, will manage the Golden Gate show.

‡ ‡ ‡

Francis Carolan, of Burlingame, has imported a pack of Beagle hounds from the East. Carolan will show them at the Golden Gate show.

‡ ‡ ‡

It is rumored in local circles that Jester of Wearmouth, a famous English bulldog, is to be brought to the Pacific Coast. Jester is not only a famous winner, but is equally as famous as a sire, having sired such famous dogs as Country Model and champion Columbia Rose, the best bitch in England. Mrs. Anita M. Baldwin, of Santa Anita, offered two thousand dollars for her and the answer read "Not for sale." The former, Country Model, won at the Exposition show, defeating many noted dogs.

‡ ‡ ‡

John Bradshaw, the noted dog expert, is importing a string of terriers from Scotland and England. Many famous winners are among those purchased. The string includes Airedale, wire and smooth fox, Irish, Scottish, west Highland, and white and Sealyham terriers. Bradshaw is contemplating going to England to bring the dogs across. It will probably interest dog fanciers to know that Mr. Bradshaw has imported more noted dogs to the Pacific Coast than any other fancier or judge.

‡ ‡ ‡

Local fanciers will regret to learn of the death of Mrs. Walter H. Reeves, wife of the well-known judge. Mrs. Reeves was killed by an automobile several weeks ago in Chicago.

‡ ‡ ‡

Dr. W. C. Billings, a local Airedale terrier fancier, is getting his crack terrier, Bilmer Bingo, in trim for the coming circuit of shows.

‡ ‡ ‡

Anyone who has had an extended experience in raising toy dogs knows the value of a cat as a foster mother, and Mme. Rose Carreno of Brooklyn can thank her pet cat Tootsie for raising two very fine Pekingese puppies which became motherless at birth and were adopted by the cat. These puppies are now three months old and arestrong and healthy. This is no new experience for the cat in question, as a year ago she raised a litter of three puppies for Mrs. Stanley W. Mirick of Sheepshead Bay.

‡ ‡ ‡

Dr. W. A. Mills of Wausau, Wis., has sold a very good Airedale bitch puppy, by Ch. Soudan Swiveller, ex Soo Ooorang, to J. D. Tobias, Los Angeles.

‡ ‡ ‡

Mrs. Leslie W. Hall, a well known fancier, has an interesting experience to relate of how she brought a dead puppy to life with the aid of a lung motor. The puppy was of the bulldog species and, when found, life seemed extinct, due to the fact that it had been mauled by other dogs. Its heart had stopped and there was no sign of life. As an experiment, Mrs. Hall treated the puppy with a lung motor used to save the young babies. After artificial respiration for two hours the puppy breathed of its own accord and showed signs of reviving. It has completely recovered and today is alive and vigorous. Mrs. Hall is enthusiastic over her success and she plans to use this lung motor on young puppies which have become suffocated at birth, which is a common occurrence with high bred dogs. She thinks in this way many valuable puppies which have heretofore been lost will be saved.

RECORD ENTRY FOR WESTMINSTER SHOW.

There will be more dogs benched at the fortieth annual dog show of the Westminster Kennel Club, to be held at Madison Square Garden during Washington's Birthday week, on February 22 to 25, than were benched last year. This is a fact, although the British entries of which advance notification has been received are not yet on hand. The delay is due to the examination of the mail by the war censors. The tabulated list of entries by breeds will then be prepared.

Only two American foxhounds were entered last year, but this time there are thirty single entries, a tribute to the judge, Harry W. Smith of Worcester, Mass., and to the energy of the Masters of Foxhounds' Association. English foxhounds reveal nearly as great an increase and the pack stakes for the two varieties and for the beagles, the "little hounds," will add eclat to the judging of the hound classes on the last afternoon of the show, A. Henry Higginson of South Lincoln, Mass., through whose efforts the Peterborough plan of classification has been adopted by the Westminster Kennel Club, will judge the English foxhounds and packs.

To note other breeds which have filled in excess of last year's benching there is a fifty per cent increase in Old English sheepdogs and proportionate advances in wirehaired fox terriers, Irish terriers, West Highland white terriers, Dandie Dinmonts, Welsh terriers, Sealyhams, Pomeranians, Pekingese, German shepherd dogs, Airedale terriers (although Mrs. Anita Baldwin has canceled her expected entries) and beagles (which are twice as many as last year, as a compliment to Edward H. Carle of Millbrook, who is to judge), while dachshunds, in recognition of the selection of Prof. Herbert Manborn of Nashville, Tenn., as judge, have drawn a liberal entry for the first time from the South and middle West, both hotbeds for the "at length" little hounds.

Robert McEwen of Byron, Ont., Can., has attracted an international and large entry of collies, while both French bulldogs and Boston terriers, the latter breed to be judged by George H. Keyes of Boston, Mass., have filled exceedingly well. The Philadelphia judges are J. Sergeant Price, for Irish terriers, and W. H. Whittem for the Scottish, West Highland white and Welsh terriers, and both will have large and representative classes.

Bulldogs will be one of the breeds to gain entries from the censored letters and Vinton P. Breese, the judge, will have very large classes in this and his other breeds. In bulldogs John R. Horrack's Toll Bar Jack, which made a successful first appearance at the Boston show, will make a New York debut against Alex. H. Stewart's Champion Strathtay Prince Albert and the other western, New England, Philadelphia, Newark and New York bulldogs of fame.

There is a record entry in wirehaired fox terriers, in which Chicago will be strongly represented, as the Vickery Kennels of that city has the largest entry. Mrs. Roy A. Rainey's $5,000 purchase from the Duchess of Newcastle, Wy Collar Boy and the bitch, Amor Perfection, will also add distinction to the wires. Others to make a New York first appearance will be the new importation of Andrew Albright, Jr., Baughfell Bumblebee, Brockley Gimcrack and his brother, Chapel Folly, owned by William Reay of Chicago, and the dogs of established fame here to oppose the newcomers will include George W. Quintard's notable string, Champion Wireboy of Paignton, Champion Matford Vic, Holmsbury Reva, and several home-bred puppies of promise. A wirehaired puppy that is regarded as a "comer" is Mrs. R. F. Mayhew's Fox Hills Sparkles, a well-named daughter of Raby Dazzler, while the Lynns of Port Huron, Mich., will be prominent in the younger and older sets of both smooths and wires.

The Vickerys are expected to make strong running among the smooth fox terriers, which have also strong representation in the entries of the von Pfizenmeyers and other noted eastern and western exhibitors. Airedale terriers will be nearly as strong in number as the wires and two of phenomenal merit from England are the puppy, Polam Maxim, entered by Norman Mackenzie of Toronto, Can., said to be a marvel, and the Vickery Kennel's Aman Gem. The selection of Winthrop Rutherford and Harold Ober as the judges, respectively, has been a magnet to draw the best collections of fox terriers and Airedales that has ever been entered for an American dog show.

MOUNTAIN LIONS KILL DEER.

Reporting to the forest supervisor at Placerville, Ranger Marshall Hughes of Georgetown gives details of the killing of deer by mountain lions in that vicinity. In a talk with Mr. Zoover of Nevada Point, above Georgetown, the following facts were determined:

On January 26 Zoover found four dead deer on the point between the bridge across Long canyon and Wallace canyon. On January 23 Zoover made a trip to the head of his ditch to see about water, and was led by his dogs to a little cover in the head of the ravine. In Pit canyon were found five dead deer and the body of a heifer belonging to McCullohs. Two were bucks and the rest does. Coyotes killed these, according to Zoover, as they were all ham-strung. About a mile below this point, on the Grizzly side, he found four deer killed by lions, while a little south were found two dead does and one buck, still alive, but unable to stand.

* * * *

The family of George Clemo, living on Gold Flat, had a terrifying experience at night when three big mountain lions came right up to the back door of the Clemo home.

The heavy snow has driven the animals out of the mountains to the low lands in search of food. They came through the Clema back field. A rabbit hutch containing a couple of rabbits failed to satisfy their appetites and they came clear to the house in their search for additional food.

They were heard roaring in the back yard. When they heard steps in the house they beat a retreat. In the morning tracks of three different lions were seen in the soft snow.

* * * *

Important negotiations are now being made by the reclamation department, Water Users' Association, the Churchill company, deeded land owners and the Homestead Association in Siskiyou county, by which it is hoped to abolish the "bird preserve," to keep the gates in, reclaim and release the land and secure and protect the interests of the people who have made application to file on the lands.

MEMBERS OF THE GOLDEN GATE GUN CLUB MAKING MERRY AT THEIR OLD ALAMEDA GROUNDS. THEY ARE NOW READY TO START THE SEASON ON TUESDAY AT A NEW HOME IN ALAMEDA. PHOTO BY C. H. JURGENS OF OAKLAND.

Trapshooting Season Is Now On In Full Bloom

Well, the Golden Gate Gun Club is going to continue to make its home in Alameda. At a meeting of the members a week ago last Thursday night it was decided to accept the proposition of the Shell Mound Park people to erect a trap-shooting grounds there and hold forth for the next two years, but an investigation made by the board of directors during the week brought out many flaws in the proposed site. In the first place it was discovered that there was room only for two traps and on the big days the club expects to keep at least three busy. Then a bothersome wind was in evidence and furthermore the members figured that the summer picnickers might interfere with their sport.

It was necessary to move from the West Alameda marsh because a dredger is digging right through the grounds. The members were up in the air over securing a place to shoot. The opening event had already been scheduled for February 22nd, which falls on Tuesday next. So the bunch hustled around some more and finally staked out a very suitable grounds in Alameda. It is on the marsh near the Alaska Packers' building. Members can get off at the Stanton Station and it is only a short walk to the grounds.

Manager Pete Ashcroft has gone to work with a vengeance to get everything in readiness for the big opening shoot. All of the boys have been polishing up their shooting irons and a big attendance is looked for.

The annual election resulted in the unanimous choice of Thomas Wilkes to fulfill the role of president. Mr. Wilkes has been very prominent in the club's affairs for the past couple of years and is an enthusiastic trap shooter who has the confidence of the members to guide the season's affairs. Frank Webster was equally as popular for vice-president and Clarence A. Haight, known as the "Father of Trap Shooting on the Pacific Coast," will be secretary with T. D. Riley as treasurer. The board of directors consists of W. H. Price, J. Harvey Jones and N. A. Howard. Barney Worthin will be captain. It was decided that in the future officers will be elected at the time of the last shoot of the season so that everyone will have a chance to express a choice.

New members have been enrolling with regularity during the week and the club's membership will be swelled to close to a hundred before the month is out. Last season there were about eighty-five.

The program for the season has been placed in the hands of the directors. At the time we went to press the events had not been definitely decided upon, although it was said that they will be practically the same as in 1915 with the exception that a trophy will be added to go o the amateur with the highest score.

PORTLAND GUN CLUB HAS SWELL QUARTERS.

J. Al Cook, The Western Cartridge representative, speaks glowingly of the progress and enterprise of the Portland trapshooters in fitting themselves out with one of the swellest and most up-to-date quarters of any place in the country. Mr. Cook spent six months in the northwest last year and the Portland Gun Club's grounds was a source of much pleasure and comfort to him.

"The Portland Gun Club members went about in the right way in getting their new and modern grounds," explains Mr. Cook. "The money necessary to purchase 21 acres within easy access of the city was raised through permitting each member to buy stock for $100 a share. Merchants of Portland were also asked to and did subscribe liberally. It was not a charity affair for the stock pays annually seven per cent.

"A beautiful two-story clubhouse was constructed with a gallery upstairs so that visitors and spectators can view the trapshooting competition in comfort. There are four traps, a lake for fly-casting operations, a tennis court and land that has been placed in cultivation. Plans are on foot now to provide pistol and rifle ranges so that sports of all sorts can be enjoyed.

"A ground keeper lives right on the place and sells the ammunition, besides having a dining room where members can order anything that strikes their fancy. A woods is near by and benches are handy for picnic parties. There are lawns around and it is a beautiful place. A member is proud to take out visitors. There isn't a day in the year, I think, when some one is not shooting. Certainly the traps are available and the attendant is always there so that you can enjoy yourself any time you feel like it.

"The Portland trapshooters are doing much to elevate the sport alluring on a par with golf. It is really a pleasure simply to visit the trap shooting grounds and it adds tone to the sport."

The picture Mr. Cook draws of the Portland Gun Club surroundings is certainly impressive and it brings to mind the need of similar comfortable trapshooting headquarters around San Francisco. Many devotees of the game have expressed a desire and need for a really up-to-date and modern clubhouse and grounds within easy access of San Francisco. How pleasant and proud local trapshooters could be if they had such a place as Portland boasts of. Mr. Cook suggests, why not get together and talk over ways and means of getting such a place.

"It's really not outside of our reach," he says. "We can work the financing end the same as it was done in Portland. It is a safe and sound business investment. The Portland Gun Club members who took stock are drawing down seven per cent and are paying off their indebtedness. There's no reason why we cannot have a trapshooting grounds here that would be a credit to San Francisco, the largest city in the far west. Certainly we need such a place and the sooner we get busy and put our shoulders to the wheel the sooner we will be able to enjoy the results."

Well, what about trapshooters around the bay points? Don't you think it is a good idea? The Breeder and Sportsman stands for the best interests of the sport and will be pleased to publish the views of any shooter on the subject.

SAN JOSE BLUE ROCK CLUB HOLDS SHOOT.

Editor, Breeder and Sportsman:

Fifty of our members were out Sunday to participate in a little shoot—the first shoot of 1916. The San Jose Blue Rock Club will hold its opening club shoot on March 5th.

George H. Anderson was trying out a new 34-inch Ithaca trap gun. After George gets it harnessed right to suit his cheek, he will make them all go some. C. H. Nash had his agle eye—91 out of a 100. He hasn't fired a shot since Phoenix, Arizona. Ray Hogg was shooting fine and did not fudge one. Ninety is some starter. William McKagney broke 45 in his last 50 and soon will be right. Billie is going down the big line with O. N. as his trainer this season.

The old hammer gun seemed to be right for the first 100 in 1916. It was 96 with 45 straight. The scores:

Shooter	Broke.	Shot at.
O. N. Ford	96	100
C. H. Nash	91	100
R. C. Hogg	90	100
Wm. J. McKagney	85	100
Geo. H. Anderson	85	100
A. B. Smith	80	100

Yours respectfully,
O. N. FORD,
Secretary, San Jose Blue Rock Club.

TRAPSHOOTERS SHOULD ORGANIZE.

In every line of endeavor, be it business, sports or otherwise, success is dependent in a great measure upon the degree of organization employed.

There is at present a woeful lack of organization among trapshooting clubs in some of the states, which is working against the best interests of the gun clubs, the individual members thereof, and the game at large.

A recent inquiry directed to the State Associations in every State in the Union developed the fact that an average of a mere 16% of all gun clubs in the States from which returns were received were affiliated with their State Associations. The returns received from this inquiry are given below:

State	No. Clubs in State.	Affiliated with State Ass's.	Not Affiliated with State Ass'ns.
Arkansas	24	7	17
Delaware	17	10	7
Illinois	297	17	280
Kansas	94	36	58
Maryland	57	16	41
Mississippi	20	14	6
Michigan	133	10	123
Nebraska	113	30	82
New Hampshire	12	7	12
New Jersey	168	14	154
New York	344	12	332
Pennsylvania	492	121	371
Rhode Island	11	5	6
South Dakota	49	9	40
Tennessee	24	15	9
Utah	15	6	9
Virginia	61	12	49
Wisconsin	164	8	156
Total	2101	349	1752

Some of the advantages to shooters and clubs in belonging to a State Association are:

1. Gives the club a standing in the trapshooting world as an active and progressive organization.

2. Makes the clubs eligible to hold registered tournaments and receive the money and trophy donations of The Interstate Association, and have the scores made in such tournaments included in the official trapshooting averages.

3. Brings the club and the club members in active touch with everything of interest and importance in the State affecting the sport.

4. In matters affecting sportsmen, as game laws for example—the voice of a strong association carries much more weight than that of an individual club, and the interests of club members can therefore be guarded much better by a strong state association.

5. Possibly some of your club members attend your State Shoot held each year under the auspices of your State Association. Every additional club joining the State Association means that much better annual state shoot will be held.

6. Trapshooting is good sport, and trapshooters are good sportsmen and good fellows. The more closely they are associated, the greater the pleasure and enjoyment from the sport for all.

The year 1915 was a highly successful one in trapshooting annuals and great progress was made in the advancement of the sport. With new clubs being formed everywhere, and a multitude of new and enthusiastic shooters taking up the sport, the outlook for 1916 is even better.

Shooters! Have your gun club join in your State Association now. Help make your State a leader in trapshooting. The initial fee and annual dues for your club will be but nominal. No sacrifices are required, and no trouble will be experienced by you or your club in becoming affiliated with your State Association. Just plain co-operation is needed from which all will benefit. There never was a time when it was more important than at present for trapshooters to be welded together in strong state bodies and a great national organization.

A WORD TO THE WISE—BE CAREFUL.

Now that the trap-shooting season is getting under way it will not be amiss to look over a list of the precautions to take for "safety first." It is always well to be careful. The game has been run happily without many accidents and it is hoped that 1916 will see even fewer. So remember—

Never point a gun at anybody, whether you know the gun is empty or not. The didn't-know-it-was-loaded excuse is one which can never be accepted as a satisfactory one. Sometimes a friend will ask you to put his gun to your shoulder to see how well it handles, etc. Make it a rule never to do so until after you have opened it and ascertained for yourself that it is harmless. Even if your friend has told you that it was not loaded, he will appreciate and approve of your extra care to avoid any possible accident.

Never put a shell in your gun except when you are at the score and ready to shoot. If the trap breaks down, or there is a temporary delay in the shooting, open your gun and take out the shell.

Never on gun club grounds place a loaded gun on your shoulder, nor let it rest in the hollow of your arm, raking the spectators or your comrades at the score, even if the hammer is at half-cock or "the safety up." Setting aside the possible danger in the operation, consider the feelings of the parties apparently threatened by your action, who know nothing about how the hammer is nor whether the safety bolt is on or off; all they know and realize is that it is decidedly uncomfortable at the least to be looking down the muzzle of a loaded gun.

Sportsmen's Row

Ed Schultze would like to have the club put duck bait in the ditch. Ed says he has his dog and gun in readiness.

* * * *

Fred Willets is in town again. Within an hour of his arrival Fred had an appointment made to locate new grounds. Fortunately the Golden Gates have a permanent home now, but Fred showed the right spirit.

* * * *

"Shorty" Wobber is going to be busy this year at the traps. He will either have to do that or get married or buy an automobile, for he would have too much time and money on his hands.

* * * *

Pete Ashcroft won't need that Big Ben clock he bought to keep him from over-sleeping on the opening day.

* * * *

The Golden Gate champion scratch shot, Tony Prior, thought he would stand in with the dredger crew to put the trap bulkhead ten yards nearer the 23-yard mark—and then they moved.

* * * *

Roy Avery was around the Copper Kettle Club the other day in an optimistic mood relative to the coming season. Keep smiling, Roy.

* * * *

Clarence Nauman says: "Boys, forget the past, just look forward to the grand opening on the new grounds. And believe me, Clarence has seen many grounds come and go.

* * * *

Our friend, George B. Smith, says shooting in Los Banos has been a little off, so for goodness' sake start the blue rocks going or he will go to Mexico.

* * * *

The Exposition Gun Club has gone out of existence. The boys had a lot of fun during the life of the exposition.

* * * *

Roy H. Standish paid us a visit to see if we are still shooting the loads he cooks for us. We notice, too, that Roy hasn't lost his appetite, judging from the scores he sets up.

* * * *

Plans are on foot, so it is reported, for the organization of a new blue rock club in San Diego. T. N. Dunn, manager of the Barker Gilmore store, is a prime mover in getting the shooters together.

* * * *

The Vernon Gun Club is in a prosperous and healthy condition. With so many shooters turning out every Sunday it couldn't be otherwise.

* * * *

George Adleman reports that he has heard that the Oregon State tournament has been secured by Albany and that the Northwest tournament will go to Spokane. Spokane was in the field for the Pacific Coast Handicap and this may mean that the way has been cleared for the Portland Gun Club to get the attraction.

* * * *

Ed Morton of Reno is an active worker in keeping up the trapshooting interest in Nevada. He is a good man for the sport.

* * * *

George W. Wingfield is on a visit to New York but he is expected back within the next couple of weeks and he will likely be seen in the California-Nevada Interstate Shoot.

* * * *

The Vernon club has a fish net stretched out about fifty feet and it works remarkably well in saving the targets. It stands about ten feet high on an angle and catches the birds and then they roll to the ground to be gathered in by the boys. Saving scheme, that.

* * * *

Following the lead of Red Bluff and many other western towns, Los Molinos has organized a National Rifle Club with a membership of 30. The organization was perfected Sunday at a meeting when the following officers were elected:

President, W. B. Salisbury; vice-president, W. E. Underhill; secretary,, Charles Hertzog; treasurer, R. M. Salter; executive officer (training master), F. A. Russell. The club is to be known as the Los Molinos Tehama Rifle Club.

* * * *

H. D. Becker, deputy fish and game commissioner, arrested a Japanese by the name of Frank Rimi near Sawtelle and charged him with shooting deer out of season. A search of Rimi's house disclosed a green hide, supposedly that of a doe. Justice Webber of Santa Monica fined Rimi $100.

* * * *

"Pop" Bruner announces the winners of the sterling silver blackbird watch fobs which were up for competition at the Vernon Gun Club during October, November and December as follows: Dr. Packard, class A; R. L. Hall, class B; Dierdoff, class C, and Mrs. C. E. Groat, class D.

* * * *

E. F. King, the professional trapshooter, is now residing in Spokane, Wash., and has joined the Spokane Gun Club.

Jas. M. Barrett, champion of Georgia, is doing missionary work for "the sport alluring" in that State and he predicts a record-breaking entry list in the Georgia championship meet this spring. Barrett, by the way, has been doing a lot of hunting with "Ty" Cobb, the ball player, during the winter.

* * * *

The Big Time Gun Club of Sacramento, which has 150 members, the largest membership of any club on the Pacific Coast, plans an active season during the coming spring and summer. It expects to begin trap shooting towards the end of March or early in April.

The club has traps on the Schenk place, south of Sacramento, and this year it is planned to construct concrete traps along the most modern lines for the benefit of the sportsmen. Grass will be planted on the place and everything possible will be done to make the club's headquarters as attractive as possible.

The improvements will all have been completed by the time shooting begins next month.

* * * *

Bob Sangster added to his reputation last Sunday at the San Antonio near Mud Hen by landing a 37-pound striped bass. It is reported as the largest pulled in so far this season.

BIG BLUE JAY HUNT PLANNED.

Redding and Shasta county sportsmen are planning to hold a "blue jay" hunt in March or April. The object is to kill as many jays as possible, it being known that the California bluejay each year is responsible for the destruction of quail eggs and young quail by the thousands.

Ten years ago a "bluejay campaign" was held in Shasta county and thousands of the predatory birds were killed. A Happy Valley farmer, a Grand Army veteran, earned the title of the "Blue Jay King" as well as a valuable prize for killing several thousands of jays.

This year the Shasta sportsmen intend to divide into two teams. The team that displays the least number of scalps at the close of the campaign must furnish a dinner for the winning team.

* * * *

Reports from El Dorado, Placer, Calaveras, Amador and Nevada counties are that millions of wild pigeons can now be seen in that section, having been driven to lower altitudes by the snow in the higher peaks. Sportsmen say that there are almost as many birds as there were years ago in this State, and in some sections they are reported to be breaking down the smaller limbs of trees with their weight while roosting.

The wild pigeons have been protected by the State and Federal laws since 1913, when they had become almost extinct in California. They are now multiplying very fast and it is expected that their numbers will be sufficiently large to re-open the season with a small bag limit in 1918.

Unlike the quail and some other game birds, there is no danger of the pigeons starving because of the snow. They can fly great distances in a short time and have no difficulty in finding food.

RESULTS AT SHELL MOUND RANGE.

The result of the regular bullseye shoot, which was held at the Shell Mound range, have been tabulated. The record shows the name of William Guilds at the top of the list that measured .12 from a dead center. The records of this competition follow:

William Guild, .12; C. M. Krual, .17; R. S. Wixon, .21½; Capt. H. Gaetjen, .23½; K. O. Kindgren, .24; L. S. Hawxhurst, .25; O. A. Poulson, .25; Capt. C. W. Seeley, .29; Capt. Geo. Larsen, .41; H. Furrmann, .44; B. Brunje, .48; E. Scheirbaum, .51.

Standing of the members on the special bullseye 200-yard range.

C. W. Seeley 160, K. O. Kindgren 170, Al Thompson 195&, L. Ericksen 326½, G. R. Hauser 387, F. A. McLaughlin 450, E. Scheirbaum 252, C. Weggermann 255, C. Otten 199, P. Kulik 87, J. J. Bender 105.

Special bullseye 50-yard range:

A Thompson	21	11	3½—	41½
F. Poulter	15	21	26 —	62
F. A. McLaughlin	21	22	26 —	69
E. Scheirbaum	00½	36	44 —	79½
C. Otten	20	26	40 —	86
H. Kroeckel ..N	19½	32	37 —	88½
C. W. Seeley	27	29	37 —	93
L. S. Hawxhurst	3	45½	52 —	100½
G. R. Hauser	10	26½	77½—	114
K. O. Kindgren	29½	35	69 —	133½
K. Purrmann	39	42	50 —	141
C. M. Kraul	4	83½	99 —	186½
W. Guild	34	67	95 —	196
P. Kulik	53	60	110 —	223
L. Ericksen	63½	82½	145 —	291
R. S. Wilson	71	109	133 —	313
H. Gaetjen	85½	150	150 —	385½
T. H. Johnson	71	78	—	

G. E. Kimball, shooting for the first time in the champion class of the Golden Gate Club, made a score of 99 out of a possible 100, the highest score of the day.

Following are the principal scores of the day:

Golden Gate Rifle and Pistol Club, pistol scores—G. E. Kimball 93, 99, 96, 92; Dr. R. A. Summers 78, 80, 85, 87, 82, 85; J. J. Currier 83, 86, 86, 82; C. W. Whaley, 83, 86, 85; T. Lain 86, 85, 87; E. Helm 83; C. W. Randall 95; G. Armstrong 96, 95; W. C. Prichard 91, 92, 93, 94, 92; C. T. Sisson 83, 85, 83.

Golden Gate Rifle and Pistol Club, monthly rifle scores—B. P. Jonas 210, 221; George A. Pattberg 223; J. G. Day 203; J. H. Sutter 212; J. H. McNett 157, 192, 184; E. Scheirbaum 230, 218, 217, 213; E. Helm 212, 218, 215, 211; J. F. Bridges 210, 199; M. F. Blasse 223; M. M. Housner 219; H. Purrman 173; O. A. Bremer 220.

Germania Schuetzen Club, re-entry rifle scores—William F. Blasse 228, 227; George A. Pattberg 228, Clarence M. Henderson 225, 221, 220, 217; O. A. Bremer 224, 214; B. P. Jonas 218, John de Wit 195.

Nordeutscher Schuetzen Club, monthly ring shoot, best scores of the day—Henry Luneburg 203, 211; George W. Dieckmann 202, 204; Lieutenant J. F. Mues 177, 189.

Swiss Rifle Club, monthly medal shoot—Frank Muhlebach 227, 220; John Frei 222, 212; J. A. Sutter 212, 200; H. Perrin 211, 190; A. Schwarz 210, 209; U. Ihdorf 209, 208; E. Pohli 208, 199; L. Hauser 206, 193; J. R. Stalder 204, 200; C. Ott 204, 190; A. E. Hinterman Jr. 200, J. Baumann 196, 192; H. Tschopp 190, John S. Leutenegger 185, 180; F. Sutter 178, A. von Wyl 172.

Swiss Rifle Club, monthly bullseye shoot—J. R. Stalder 245, John Baughmann 323, A. E. Hintermann 538, Charles Bachmann 670, John Frei 800, J. A. Sutter 825, A. von Wyl 900, A. Schwarz 990, H. Tschopp 1005, F. Muhlebach 1075, A. Hintermann Sr. 1415, E. Pohli 1485, Frank Suter 1500, H. Perrin 1600.

Independent Rifles, monthly shoot—Sergeant P. Petersen 66, A. Williams 65, Sergeant H. Hilken 63, J. Donovan 45, George Steffen 46, Carl Martens 3, H. Pape 57, H. Marzolf 52, Lieutenant J. Siebe 34, H. Broderson 14, K. Edel 27, Lieutenant P. Volkmann 48, J. M. Hauser 39, F. Schohey 54, Sergeant J. Eichner 46, B. Hassler 57, J. Donovan 31, Corporal E. R. Golch 40, E. Abraham 48.

GREAT FISHING AMONG THE SIERRAS.

No country in the West affords the wonderful fishing and camping opportunities of the high Sierras, and the lakes on the eastern slopes of these mountains, according to Stanley Smith. Mr. Smith and his wife have just returned from a 2300-mile trip which carried them into the roughest and wildest sections of the State, says a Los Angeles reporter. Mr. Smith drove a white Premier roadster with trailer for camp equipment.

The first day's journey took them to Willow Springs, as they did not leave Los Angeles until noon. The second day's run was to Bishop, and there they found it necessary to buy a nentirely new equipment of flys and hooks for their trout fishing, as every one told them tens and twelves were not large enough for the eighteen and twenty-inch fish they could expect to hook.

Above Bishop, in the Diablo Canyon, they encountered their first really bad road. Narrow roads, dusty and rutty, made the going extremely bad. Thirty miles beyond the canyon they turned into a ranch and crossed ten miles of open country, climbing all the time until they reached the place which they had selected for their camp. It was a quarter of a mile below Convict Lake, high up on the eastern slope of the Sierras. The lake is at an altitude of 8,000 feet.

The shores of the lake were covered with snow. Pitching their big tent, which was part of the trailer equipment, they established a camp which was to be home for a week. It was in the heart of the mountains, and they could not see more than half a mile on any side. The mountains all around rose to a height of 12,000 feet.

The fishing was wonderful. In addition to the trout, they had plenty of meat and vegetables, which were obtained at a ranch and kept fresh in the snow.

During their entire stay, seven days, at the lake, they saw only two persons. The only animal life they encountered was deer. They saw many does and several bucks.

Convict lake is 350 miles from Los Angeles, and is one of a chain of lakes in this great mountain country which affords some of the finest fishing in the world. Very few anglers ever reach the lakes to molest them, and there is never any question about getting a limit catch in an hour or so.

The camp equipment which was carried in the trailer made "roughing it" almost as luxurious as staying at home. The equipment included a big tent with windows, and an awning in front, a refrigerator, a portable bathtub, a stove, a carpet for the tent and electric lights for illumination at night.

STRAWBERRY BASS TO BE PLANTED.

The Strawberry bass, introduced into California by the State Fish and Game Commission, is going to supplant the undesirable Sacramento perch, according to George Neale, in charge of the Sacramento district. The strawberry bass was planted in Sutterville Lake, south of Sacramento, and other waters of the State, and through the Paine and Edwards and Washington breaks of the Sacramento river levees on the west side, were scattered through the waters of theinterior valleys.

Other species of fish imported into California, such as the yellow perch, crappie and blue sunfish, are propagating in an encouraging manner in the State fishing streams.

DARK HORSE WINS AT VERNON.

Calculations went awry Sunday when the Vernon Gun Club staged the fifteenth fifty-bird handicap trap shoot for the W. H. Wilshire trophy. T. P. Smith, a little better than a novice at the game, annexed his first victory on the trophy by breaking forty-eight birds from sixteen yards. This is the first time known that Smith has ever figured in the winning, and he deserves great credit for coming to the front in rapid-fire style.

The ol' handicap committee held a hurried consultation last week, knowing well that either Stan Bruner, Louis Mellus or "Doc" Packard might win their third win on the trophy, and then the competition would be over, and naturally they shoved the three contestants back to twenty-one yards, which made it exceedingly tough for them. But nevertheless they rung up wonderful scores, Bruner a 45x50, Mellus a 44x50 and Packard a 43x50.

The crowd which turned out to compete put one in mind of big tournaments. Eighty shooters were there. It was the largest crowd on a Southern California gun club grounds in two years. All three traps were kept busy until late in the afternoon, and nearly 2000 targets were thrown.

The only shooter to come near Smith's score was Charles Knight ,a professional shooter of the Winchester Arms Company. He broke forty-seven from nineteen yards.

Both old-time cracks, Heine Pfirrmann and Frank Mellus, broke forty-six each from twenty yards. Mellus is now satisfied with life and his shooting of late, having smashed all previous high run records at Vernon by breaking eighy-five straight.

A squad of small-bore cracks busted a few of the Carhawks with their twentyties and twenty-eights. The 4.10 squad failed to put in an appearance.

Red Hedderly was high gun in the 20-gauge shoot, breaking forty-four of the clay birds out of fifty thrown. Peter "Pep" Peterson broke a "40."

There were ten of the 20-gauge "nuts," as Hedderly calls them.

Jim Matfield, a former favorite and crack shot of the days when the blue rock killers shot out beyond Westlake park, visited the club with Louis Breer. They shot off a match to test their skill in a sport which seemed new to them, as they haven't fired a gun for many years.

"Film shootin'" George Melford must have bought a new gun, as he broke a "43" in the Wilshire competition from seventeen yards. Bill Pugh broke a "44" in the Wilshire shoot, and he is now shooting from eighteen yards. Bill has been doing some good shooting of late, but does his boasting silently.

Ed Mitchell, a professional of the Selby Company, was shoved back by the fence along with Bruner, Mellus and Packard, and broke forty-five out of fifty.

One of thefeatures of the day was the two women shoots, Mrs. Heine Pfirrmann and Mrs. C. E. Groat. Mrs. Pfirrmann broke forty birds from sixteen yards and Mrs. Groat forty-three. This shooting was a great deal better than that of some of the men shooters.

Steve Fullerton attempted to outrival some of the Track's loud-colored sweaters with a gray one and some mysterious colored sleeves, but he was outclassed and dazzled by Mrs. Groat in a beautiful rose-colored one.

The scores in all three events follow:

Wilshire competition:

Shooter—	Hdcp. Yds.	Score. Bke.	Thr.
m R. Smith	19	43	50
ank Mellus	20	46	50

VICE-PRESIDENT ADVOCATES SHOOTING.

Washington, D. C.—In a recent public address here Vice-President Thomas R. Marshall advocated military training of students in the schools and colleges of the country. "I want some sort of education in the educational institutions of the land whereby our young men may be taught three things—how to take care of their health, how to take orders and how to fire a gun," said the Vice-President.

Just such work is being carried on by the National Rifle Association of America in co-operation with the National Board for Promotion of Rifle Practice, and as a result there are today in our public high and preparatory schools, our military schools and our colleges and universities, a large class of young men trained and being trained in the art of rifle firing.

This training really began several years ago in New York City where Gen. George W. Wingate, who is regarded by many as the "Father of Rifle Practice," organized the Public Schools Athletic League. Of late years the National Rifle Association has organized rifle clubs in the schools, colleges and universities and today there is hardly an institution of this kind without its rifle team.

The clubs are offered inducements to train in rifle shooting by the issuance to them of rifles and ammunition by the government, and by annual competitions for school and college championships which carry with them trophies and medals. This training is had with 22 calibre rifles and at a distance of 50 feet, and prizes are also given for making qualifying scores. At present rifle clubs are organized in about 80 public high and preparatory schools, in 35 military schools and in 60 colleges and universities.

These clubs are now participating in the annual indoor rifle competitions of the National Rifle Association, the shooting covering a period of ten or more weeks. Forty college, 34 high school and 20 military school rifle clubs are competing for rifle championship in their class. There are ten men on each team and each shoots 20 shots in each weekly match. The scores of the five highest for each match are counted for record. Major Fred H. Phillips Jr., Secretary of the National Rifle Association, Washington, is daily in receipt of applications for the formation of additional clubs. In January two college and four school clubs were organized.

Snipe are becoming more plentiful on the grassy overflows, but the season closed with that on ducks, and sportsmen must take comfort in the hope that "Long-Billed John" will wax fat and prosper so they can get more of him in the short open season henceforth.

When Trout Is Trout and Not Salmon

EXPERTS GIVE THEIR OPINIONS

Such a controversy has been going on recently over the question, "When is a trout a trout and not a salmon?" that we have secured some letters on the subject from experts of the Fish and Game Commission. These men, Professor H. C. Bryant and N. B. Scofield, have spent years in studying the subject up for discussion and are qualified to know whereof they speak. The letters are as follows:

"Editor, Breeder and Sportsman,—

"Dear Sir: Your letter is at hand in which you ask about salmon and steelhead and the law in relation thereto. While the steelhead is known in some places as a salmon or a salmon trout, it is in fact a trout and not a salmon. Steelhead and salmon differ from each other in structure and habits, although in general appearance they are much the same. The bones of salmon are much softer than in steelhead and other trout and the salmon skull is full of air spaces.

"The trout spawn more than once, the salmon but once and then die without returning to salt water. The young of the salmon nearly all leave the stream within one year after hatching while many of the young of steelhead remain two and three years before leaving the sea. The mature steelhead as it enters the fresh water from the sea is a more slender fish than the salmon and not so deep. The steelhead is spotted, the spots larger and more numerous on the posterior part of the body and on the tail. The only salmon with which it is likely to be confused in our state waters is the silver salmon or 'hook bill,' which has few or no spots.

"The steelhead's tail fin is square along its posterior edge—that of the salmon concave. It is impossible to pick a steelhead up by the tail, while with a salmon it is rather easy. If the difference can still not be told from the above character, the number of rays in the anal fin is a sure method of distinguishing them. The anal fin is the single, unpaired fin on the ventral side of the fish. The salmon have 12 or more developed rays in this fin while the steelhead, and also the other trout, have less than 12 developed rays. In counting the rays, the last or branched ray is counted as one. In the salmon the longest ray of the anal fin is shorter than the base of the fin and when the rays are dispersed or caused to lie down, the tips of the first and longest rays will not reach quite to the base of the last ray. In the trout the longest ray is longer than the base of the fin and when the fin is dispersed the first rays reach beyond the base of the last ray.

This all sounds rather complicated, but to those who are familiar with salmon and steelhead it is an easy matter to distinguish them by their general appearance even when they are swimming in the water.

"That there might be no more confusion, under the law, as to what is a salmon and what is a steelhead, the following paragraph was inserted in Sec. 634 of the Penal Code by the last legislature:

"'4. For the purpose of this act and all acts relating thereto, a salmon is any fish of the salmon family belonging to the genus Oncorhynchus, and a steelhead is the trout known as steelhead salmon, salmon trout, Salmo gairdneri or Salmo rivularis.'

"As to there being a limit on steelhead different from that on salmon, as to where 'Mr. Angler gets off' in case he mistakes a steelhead for a salmon and thus gets over his limit of steelhead unintentionally, we can only say that if he can not tell what he is going to get on his hook or with his spear he should stop fishing when he gets his two steelhead.

"Yours respectfully,

"FISH AND GAME COMMISSION,

(Signed) "N. B. SCOFIELD,

"Commercial Fisheries Dept."

"Museum of Vertebrate Zoology,

"Berkeley, Cal., Feb. 11, 1916.

"Fish and Game Commission,

"734 Mills Bldg., San Francisco.

"Gentlemen:

"I desire to make the following report on the hearing held at Santa Rosa February 9, 1916. Mr. Walter Nagle, Secretary of the Chamber of Commerce, very kindly arranged for the meeting and advertised it so well that more than fifty men were present. Mr. N. B. Scofield and myself arrived in Santa Rosa early in the afternoon and were met by Deputies Lencioni and Smith. The hearing was held in the Board of Supervisors' rooms in the Court House and was called to order by Mr. Nagle, who introduced me as chairman of the meeting. After a short address on the work of the Fish and Game Commission and the educational work recently instituted, Mr. Scofield was called upon to make clear the differences between a trout and a salmon. Specimens were on exhibition to illustrate the points mentioned.

"Following Mr. Scofield's talk the meeting was thrown open and numerous questions were asked regarding salmon and rout. Discussion then centered on the methods by which trout and salmon could be caught. By a vote of 17 to 1, it appeared to be the sense of the meeting that a gaff-hook should be included with a spear as a means of taking trout and salmon in District 2 during the winter open season. Thirty-four (unanimous) voted in favor of placing the limit at one fish instead of two during this season of the year. At the end of the meeting a unanimous vote of thanks was tendered the representatives of the Fish and Game Commission, and everyone seemed to be very much pleased with the way in which the hearing was carried out.

"One man reported that he had seen over thirty steelhead trout dead as a result of oil from the Pacific Gas and Electric Company's plant and tanneries near Santa Rosa. He also stated that it was doubtful whether a conviction could be obtained owing to the fact that Santa Rosa had no out-fall sewer. Another man suggested that the season on valley quail should be closed for a few years in order to allow the birds to recuperate. Hesaid that these birds were becoming very scarce in Sonoma county.

"I am convinced that hearings of this kind will develop a better understanding between those who fish and hunt and the Commission to which is delegated the function of conserving wild life.

"Very truly yours,

(Signed) "H. C. BRYANT,

"Game Expert, in Charge of Education, Publicity and Research."

THE FARM

THE NECESSARY DRAFT HORSE.

The draft horse industry, in common with other lines of animal husbandry, has been somewhat depressed during the yast year, but that it is a permanent and necessary industry admits of no argument. In my judgment the future offers great promise to the farmer who approaches draft horse production equipped with an understanding of his own needs and the market demands. It can be said to day, as perhaps it could never have been said before with such force, that the farmers' needs and the market demands are identical. Horses that will most efficiently and economically answer the farmer's purposes are in demand and will bring the highest prices in the draft horse markets. There are reasons for this situation that in former years did not exist, at least not to the same extent.

In the first place, farm labor is high and to economize it must be made more efficient. Man labor costs more; it must accomplish more. Instead of a man working in the field with a team of medium-sized horses operating a single plow, harrow or other farm implement, he must direct horse-power that will accomplish double or more than double the work. Therefore, more horsepower is necessary. In providing more horsepower for the farm prudence dictates that we consider its relation to conditions off the farm.

It would not be wise to add to our farm horsepower by providing more light horses. They do not hitch well; neither do they sell well. Modern machinery fits heavy horses. A 5-horse hitch of drafters to a double-gang plow or a 6- or 7-horse hitch to a triple-gang, will do two times as much work in the one case and three times as much in the other as a man can do with a single team. And the 5 draft horses do that which would require 7 or more light-weight horses to do; there are two less to care for and provide stabling and equipment for. The draft hitch is much more desirable and economical. And draft horses are salable.

There is another phase of farm conditions that forces the use of more horsepower in the cultivation of the soil. In the earlier days of agriculture when grain growing was the chief pursuit it required much less horsepower to plow and cultivate the fields. The soil was full of humus and free from noxious weeds; under present conditions, with a rotation system that includes meadows and pastures and where large herds and flocks trample over the fields day after day packing the earth which becomes thickly sodded—too often with tough quack grass and thistle roots in addition to timothy, clover and alfalfa roots—it takes power to pull the plow; it takes lots of power. Much more cultivation is necessary than formerly. The use of disk and spring-tooth harrows, drills and cultivators is imperative to eradicate weeds and to keep the soil in condition to permit the closest approach to the maximum of production. And all this demands horsepower. The demand is best met with the modern draft horse, which should be produced on the farm. Not only does the farmer thus supply himself with the horses best suited to his needs, but he may produce a surplus which he will be able to dispose of at prices that will be pleasing to him.

Modern conditions have forced many changes in methods of agriculture, and in no phase of farm economy has the change been more marked, nor the demand for change more insistent, than in the horse department. The automobile has forced the driving horse off the roads and has taken away every inducement to his production, at least from a practical, business standpoint. The driving horse is of little use on the farm, and there is no market for him off the farm. Nor is there a place for the go-between—he is hyphenated—either on the farm or from the standpoint of selling for a satisfactory profit.

Looking at the question from any standpoint it seems that draft horse production, both to serve the needs of the farm for motive power and to realize a profit in the sale of the surplus, is a branch of stock husbandry to which the farmer can well afford to give careful attention. The farmer must know the needs of those to whom he must sell, and then if they coincide with his own needs he can easily meet the market demand.

It seems to me that never before in the history of agriculture have the conditions been such that the farmer could eo easily direct his affairs in harmony with the movements in other great channels of industry. Intelligence and scientific adjustment of our affairs are bringing us into a more close relation as a great co-operative organization. This is especially true with respect to the draft horse business.

According to available information horses are produced upon a comparatively small percent of the farms of the country—about 25 in 100. This means that 75 percent of the farms of the country are supplied with horsepower through purchase. It looks like bad business for the farmers who buy. Farm work should be done largely with brood mares, supplemented with the work of colts approaching maturity and marketable age. The mares can produce foals while doing the ordinary farm work and if intelligently handled neither the mare nor the foal will suffer. In this way the supply of horsepower may be kept up and from a sale of the surplus substantial additions may be added to the farm income. The surplus will consist largely of the geldings, which, if big enough and good enough, will sell readily for the draying work of the cities. In fact, geldings are more desirable for city use, while mares are more profitable to keep upon the farm—another harmonious relationship between the farm and city, and a happy one.

The time may come, and probably the day is not so far distant when we may consider its possibilities, when cheaper motive power will be utilized, both on and off the farm, than is furnished either by horses, steam or gasoline. Some day all the great waterpowers of the world will be used to gather into usable form that wonderfully indestructible power we call electricity. The soil will be left to produce food for the millions with the minimum of waste. There is no doubt of this, but never will horses be entirely unnecessary. Any way, we need them today, and economically speaking, we need the best type of draft horses.—W. L. Houser, in Breeders' Gazette.

—o—

Of the organic substances, manure, both solid and liquid, is the most important and should be utilized wherever possible. All material of an organic nature, such as leaves and bedding of various sorts, should be composted and the compost applied to the soil.

RANGE HORSES AS WAR STEEDS.

The horse was in Wyoming, and others of the Western states, before the cow, for before the cattlemen drifted into the country the Indians had for years been engaged in the horse-raising.

But the early-day Indian horse was the rough, uncouth, but tough and efficient, half-wild mustang; these suited the Indians in their chase after the buffalo and other swifter game. When the white men came and saw they brought fine stallions from the East and bred to these half-wild mares of the Indians, and it is so that the good grade of horses that the West now has came to be.

To have hundreds and thousands of horses on the range getting ready for market at a cost of from practically nothing up to a rough estimate of but two dollars a head per year sounds like a get-rich-easy story, if not exactly quick, as the owners like a horse to be at least four years old when put on the market.

Horse raising in the west has been a bit overdone during the past few years. There were few horse raisers at the beginning of the industry, but

HIGH-CLASS TROTTING BRED COLTS FOR SALE.

No. 1. Three-year-old filly sired by All Style, dam Dr. Hicks. This filly is registered.

No. 2. Two-year-old colt, full brother to the above.

No. 3. Two-year-old filly sired by Dan Logan, dam a Wilkes mare who was a great natural pacer but unfortunately was crippled by a barbed wire accident as a yearling and was never worked.

The All Styles are large, strong built, with all the style of their sire, perfect in action, and all three of the above colts should make race horses second to none. The Dan Logan filly is perfectly gentle to handle and drive and is a high-class filly in every respect. Apply to or address,

I. F. EATON, Chico, Cal.

FARMS FOR SALE

Choice Land in Idaho

Lewiston, Idaho, is situated at the forks of Clearwater and Snake rivers and has transportation to the coast.

960 acres 7½ miles from Lewiston, Idaho, 4½ from Lapwai, Idaho, on main traveled road, all in cultivation except about 15 acres, all level land, just a little rolling, 320 acres of fall wheat in, 225 acres fall plowed for spring crop, about 30 acres in alfalfa. All fenced and cross fenced. Two good springs with big cement water troughs, well, windmill and cement reservoir, water piped to house, 7 room house, hot and cold water and electric lights. Large horse barn with hay mow in the center, electric lights in barn; cow barn with two box stalls; hog pens, shade trees, chicken houses, blacksmith shop, wagon shed, granary, outdoor cellar with bunk house overhead. $85 per acre; will take one-third down, time on balance to suit purchaser, at 7 per cent interest. One-third of crop goes with place if sold any time up close to harvest. Mild climate, can raise all kinds of fruit, grain and vegetables. Wheat in this country goes from 35 to 65 bushels per acre, barley 40 to 80 bushels per acre.

320 acres 4½ miles south of Vollmer, Idaho, 275 acres in cultivation, balance in pasture and timber, farm land lays practically level, one-third of crop goes with place if sold before harvest. Some fall wheat already sown. All fenced and cross fenced. Quarter section of it fenced hog tight; good four-room house, wood shed, and out of door cellar, nice grove around house, well at house, fair stabling and out buildings, spring and spring creek close to barn, three springs on place. Price $70 per acre, one-third cash, balance at 7 per cent. Time to suit purchaser.

238 acres 4½ miles from Lewiston, Idaho, 175 acres in cultivation, 25 more can be cultivated, balance good bunch grass pasture, fenced and cross-fenced, good spring creek runs across place, small house, station on place for Johnson R. R., two grain warehouses at station. Price $70 per acre, one-third cash, balance at 7 per cent. Time to suit purchaser.

160 acres of timber land, good farm land when timber is cleared off, all can be farmed except about 2 or 3 acres. Good timber, yellow pine and fir. Price $4000. 40 miles from Lewiston, Idaho. Well located to log off.

240 acres 6 miles from Asotin, 12 miles from Lewiston, Idaho, about 75 acres in fall wheat, about 75 acres more can be cultivated, balance in bunch grass pasture, two springs, small house, all fenced. Price $40 per acre, one-third cash, balance at 7 per cent. Time to suit purchaser.

BEAUTIFUL BELVEDERE

LOTS FOR SALE

CORINTHIAN ISLAND Subdivision to Belvedere is the most beautiful spot on the shores of San Francisco Bay for a suburban home. It commands an extensive view of the City of San Francisco, Alcatraz and Angel Islands, Raccoon Straits, San Francisco Bay, Richardson's Bay, the Berkeley shore, beautiful Belvedere and Mt. Tamalpais. It is in Marin County, directly opposite San Francisco, and forms the eastern shore of Belvedere cove. It has a naturally terraced, sunny, western slope that is well adapted for many choice residence sites, every one affording most picturesque views of the bay and mountain. It is protected from the prevailing western trade winds in summer by Belvedere Island, and from the southerly storms in winter by Angel Island. The soil is fertile and part of the island is well wooded.

It is less subject to fog than any other place near San Francisco. The summer fog, as it rolls in from the ocean, splits on the western slope of Sausalito, part of it flowing in a line with Angel Island towards the Berkeley shore, and part of it along the southern slope of Mt. Tamalpais, leaving Belvedere, Corinthian Island and Raccoon Straits in the bright sunlight, while the fog banks can be seen as a white wall both to the north and the south.

There is very little available land about the shores of San Francisco Bay that is desirable for homes, especially for those who love boating and kindred sports. The Alameda and Contra Costa shores of the bay are the lee shores and receive the full brunt of the boisterous trade winds which lash the shoal waters near the land into muddy waves, making boating both unpleasant and dangerous. To the north of the city and in Marin County the land from Sausalito to the entrance of the bay is a Government reservation and will never be placed on the market. The shores of Richardson's Bay are not at present convenient to boat service and, aside from Belvedere and Corinthian Island, there is little or no land near any ferry landing that possesses the natural advantages, improvements and possibilities that are offered on Corinthian Island. Concrete roads, pure water, telephone service and electric light wires are already installed. It is only ten minutes' walk from any point on the property to Tiburon boats, and but forty-three minutes' ride to the foot of Market Street.

On the point of Corinthian Island the Corinthian Yacht Club has had its home for many years, and on any summer day the white sails of its numerous fleet add to the charming scene, as the trim yachts glide about the cove. Excellent fishing of all kinds for bay fish, including salmon, the gamey striped bass, rock fish and the toothsome silver smelt, is to be had in the cove. There is probably no spot so accessible and in such close proximity to any large city in the world that offers the attractions of climate, magnificent scenery, fishing and boating as will here be found.

RANGE HORSES AS WAR STEEDS.

[Continued from Page 12]

these few had immense herds and they waxed rich, for markets were good and there was no crowding.

But newcomers drifted into the range country, took up choice bits of government land, noted the success of the old-timers with horses and went straightway and attempted to do likewise. This crowded the business and it is not at all strange that of the many fine herds offered at the annual horse sales held at Gillette, Wyoming, Miles City, Montana, and other towns many should be driven back to their ranges by the owners rather than sell atprices offered. This has been the case during the past few years and before the outbreak of the European war.

The Western range horse is a good horse for whatever purpose he may grade up to, most of the range stallions being of pedigree stock.

The colts are born like rabbits out on the range and learn early to rustle for themselves and to withstand the blizzards and the frosty nights. This makes them hardy and tough, and gives them an independent spirit not generally found in a horse that is born and raised in a barn lot. The range horses are not hard to break for any purpose desired, if they are handled by the right sort of a man. But occasionally a horse is found which refuses to be broken—these are outlaws—but they are not over numerous.

Even though the markets were made dull by too much crowding in the business, the old-timers did not worry at all; they had feathered their nests long ago and still had horses to sell to the small bunch of men and others regardless of whether the latter ever found a market for them before they died of old age or not.

The European war put a new face on things. Orders for American horses commenced to come over within a month after war was declared, and the demand has kept right on climbing.

As might be expected, when the first demand for American horses came over at the outbreak of the war, everything that was trotted out wasn't accepted by any means. The buyers were critical regarding age, condition of wind and build; a full body, solid color, with good heavy bones, 15 to 16 hands high, and five to eight years old, are the sort of horses accepted and taken over to live about eight days on Europe's battlefields. Some of the horses bought have to be broken to ride and all must be halter broke.

[Concluded Next Week.]

Don't Make a Mistake by not Breeding to the Great

KING LILLY POINTER

Registered No. 5223.

By the great Star Pointer 1:59¼, 3183, dam Lilly S. by Direct 2:05¼, 20113,—two world's champions for many years.

Second dam the great race and broodmare Lilly Stanley.

King Lilly Pointer is a green horse with remarkable speed. With very little work he has paced a mile on the Los Angeles track in 2:08¼ with ease. He goes without straps and has paced a half in 1:01¼ in third position all the way around, and has easily stepped quarters in 29 seconds. In another work out he went to the quarter in 30½ seconds, the second eighth in 14 seconds, finishing the last quarter in 30 seconds, going the seventh eighth in 14 seconds,—a 1:52 gait.

He is a seal brown in color, 15.2½ hands high, weighs 1100, and his get prove that he will be a sire of high-class race horses.

Fee $35 cash with return privilege, or right of substituting another mare. Best of care taken of mares, but no responsibility assumed for accidents of any kind.

Address for particulars, tabulated pedigree showing that he is the greatest bred pacing stallion in the United States,

W. H. NESMITH, 4218 S. Figueroa St., Los Angeles, Cal.

King Lilly Pointer can be seen at Los Angeles Exposition Park. Phone Home 28446.

MR BROODMARE OWNER, do you realize the importance of the simple facts that sixty of McKinney's sons and nearly fifty of his daughters are producers of standard performers? That the McKinneys won more money than any other family in 1915? That the McKinneys won the largest percentage of the futurities, both east and west, in 1915? That McKinney has more sons to sire 2:10 performers than any other stallion living? Keep these facts in mind, and remember that I offer you the services of

THE VERY BEST SON OF McKINNEY

CARLOKIN 2:07 1-2 EXHIBITION MILE 2:05 1-4

Champion Trotter and Champion Sire of Trotters in the West

Reg. No. 36548. Licensed Pure Bred, Cert. No. 41.

Mahogany bay. Height 15.1½. Weight 1060.

Sire of ESPERANZA (3) 2:09, only three-year-old to win every trotting stake for that age on the Pacific coast, and also the following colt performers:

The Lark (4).....2:09½	Carsto (2) 2:22½
Ethel D. (3).....2:11	Helen Belle (2).....2:22½
Carl (3) 2:14¼	Carlschen (2) 2:23
Doctor S. 2:14½	Santiago (3) 2:24¼
Johnny Dugan p (3)2:16	May Marian p (3)..2:24¼
Hermes (2) 2:16½	Carlrich p (2).....2:24½
John Warwick (2) 2:17	El Carbine (2).....2:27½
Nicola B. (3).....2:18½	Eileen C. (3).....2:29
Miss Carlokin p....2:20	Carlos (2) 2:29¼
Carleta (2) 2:20¾	Fulton G. (2).....2:30

Carlokin is the best son of McKinney not only by performance but by breeding as well, his dam being the famous producer Carlotta Wilkes, whose ten performers include four with records below 2:10, while his grandam and great grandam were also producers, by Alcantara and Clark Chief. He has demonstrated that he sires more early and extreme speed than any other stallion in California, and his get are courageous race horses, endowed with soundness and wonderful vitality.

Fee: $75 the season, usual privileges; details on request.

Harpers Weekly and The Breeder and Sportsman

$5.50 WORTH FOR $3.25

Breeder and Sportsman

One Year, 52 Copies, Regular Price $3

THE BREEDER AND SPORTSMAN is the oldest weekly journal devoted to the Horse west of Chicago, having been established in 1882. This interest, together with the Kennel, Gun, Fishing, Coursing and kindred sports receiving the most attention in its columns; together with Agricultural and Dairying Departments, under whose headings especial attention is paid to the breeding, etc., of Cattle, Sheep, Hogs, Poultry, and all other animals connected with stock raising.

As an advertising medium to Racing Associations, Horsemen, Stock Breeders, Manufacturers of Sulkies, Carriages, Wagons, Agricultural and Dairying Implements and Machinery, Sporting Goods, Fanciers, Stock Foods, and all others desiring to bring their wares to the attention of the classes to whose interests the paper is devoted within the field mentioned above, the BREEDER AND SPORTSMAN will be found indispensable.

Harpers Weekly

Six Months, 26 Copies, Regular Price $2.50

At no time has it been so evident to Americans as now, that the most important thing in the lives of all of us is the progress of the European War.

Next to your daily bread the war interests you most vitally. It may even come to be the most important part of your problem of living.

The periodical of greatest fundamental interest to you today is the one that can best report those phases of the war that come closest to your country and you.

Because of connections abroad and at home, HARPER'S WEEKLY is that publication.

As a critical commentary that presents inside facts, it is the necessary bridge for intelligent readers between the daily newspaper and the monthly review.

You want HARPER'S WEEKLY now. You can get it now on trial at a remarkable reduction.

Send $3.25 Now and Get Them Both

THIS OFFER is made to all who will send us $3.25 before March 31st, 1916, whether for extension of subscription, renewal of subscription or a new subscription. Address:

GUNCRAFT

By W. A. Bruette

A modern treatise on guns, gun fitting, ammunition, wing and trap shooting.

The theoretical side of the subject has been covered with a scientific accuracy which makes it an up-to-date book of reference, and the practical side of wing shooting, gun fitting, the master eye, defects in vision and other important questions have been treated in a way that will enable either the expert or the amateur to determine if he is shooting with a gun that fits him and how to decide upon one that does. It will enable him to ascertain why he misses some shots and is successful with others. The secrets of success in trap shooting, as well as the peculiarities in flight of the quail, the jacksnipe, the woodcock, the ruffed grouse, and the duck family, are illustrated by drawings and described in a way that will facilitate the amateur in mastering the art of wing shooting.

Cartridge board cover, $1.00; Cloth, $1.50

Third Edition Within One Year of Publication.

CARE AND TRAINING OF TROTTERS AND PACERS

NEVER before in the history of the publishing world has a horse book gone into a third edition within one year of publication. Yet the explanation is simple—the book fills a long-felt want.

Never before has this subject been treated in a distinct manner. It has been handled in connection with autobiographies of trainers, but such works are out of print or out of date, for they were published 20 years or more ago. Conditions and methods have changed since then, and former treatises are just as much out of date as the high-wheel sulkies then in vogue.

"Care and Training of Trotters and Pacers" is as modern as a 42-centimeter gun. It does not contain the ideas of one man, but of 100 of the leading horsemen of the day, including Thomas W. Murphy, Walter R. Cox, and Edward F. Geers. These ideas were converted into book form by two prominent American turf journalists.

This book enables anyone to do his own caretaking and training until it is time to send the colt to a professional trainer, or the owner can train and race the colt himself. The treatise covers the details of a colt's life from the moment it is foaled until after its first year's campaign. The facts are clearly presented. Nothing is left to guess work. The language is lucid. Both theoretical and practical views are outlined and compared. The instructions are concise and easily understood. The work contains no advertisements—it is not a catch-penny publication that looks big in the advertisement but proves disappointing when received.

Many professional trainers have purchased the book and have found it interesting. Despite the war, over 300 copies have been sold in Europe and Australia.

Price $1.00 postpaid. Cloth, illustrated, 176 pages, 5x7 inches.

Learn to Shoot

AN HOUR each week at the traps is an investment that pays big dividends in increased vim and efficiency.

Trapshooting

is a pleasant tonic for every tired-out, brain-fagged, business man. The whir of the clay birds — their subtle challenge to your gun skill — makes an alluring sport that eases and benefits both your mind and body. Costs less per year, club membership included, than any other popular sport.

REID'S REMARKABLE RECORD

Adds Further Evidence of the Superlative Quality of

Peters SHELLS

Shooting at Registered Tournaments during the past four years L. H. Reid of Seattle, has made a phenomenal Record of consistent High Scores

1912—	2115 ex	2200, 96.14%,	Pacific Coast High General Average.
1913—	3843 ex	4005, 95.95%,	Pacific Coast High General Average.
1914—	2146 ex	2225, 96.44%,	Professional Average for United States.
1915—	2482 ex	2550, 97.33%,	Pacific Coast High General Average.
Total,	10,586 ex	10,980, 96.46%	

During the above four years, Mr. Reid has shot at nearly 30,000 Registered and non-registered targets, breaking an average practically equal to the above. In accomplishing these results, he used about two-thirds TARGET (medium grade) and one-third IDEAL (high grade) shells, all with

"STEEL WHERE STEEL BELONGS"

THE PETERS CARTRIDGE CO., — Pacific Coast Branch, — 585-587 Howard St., SAN FRANCISCO, CAL.

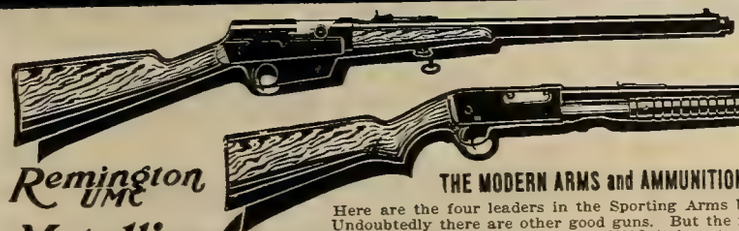
C. G. Spencer

The Big Winner In 1915

The Interstate Association's Official High Professional Average for the season of 1915 was won by Charles G. Spencer, of St. Louis, Mo., with the marvelous record of 97.5% for 5620 targets. Such an average for such a large number of targets not only shows Mr. Spencer's great skill, but also proves the uniform and unequalled quality of

WINCHESTER

LOADED SHELLS AND SHOTGUNS



which Mr. Spencer used exclusively. It was this same combination that he used when he made his marvelous straight run of 565 targets—the World's Record.

Contests for the Season's Trapshooting Averages have been held 16 times and 12 of them have been won by **W** shells or guns, or both, which is undeniable evidence of their superiority.

Lester German, of Aberdeen, Md., who was second high for the season, and who also made the greatest score of the year for a single tournament—499 x 500—used Winchester shells in performing this great feat.

J. Mownell Hawkins, of Baltimore, Md., shot 7,265 targets in competition during 1915, and made the splendid average of 95.56%, using Winchester shells and shotguns exclusively—more proof of their uniform shooting qualities. These performances show the reason why Winchester shells and guns are

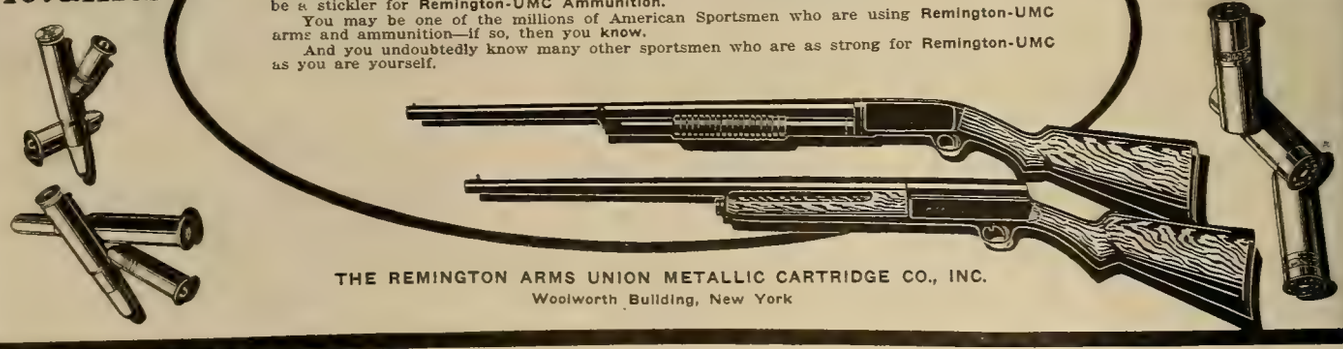
THE MODERN ARMS and AMMUNITION of AMERICAN SPORTSMEN



Here are the four leaders in the Sporting Arms business in this country today.

Undoubtedly there are other good guns. But the feeling among sportsmen seems to be that if a rifle or gun is not a **Remington-UMC** it is not a modern sporting arm.

And as to Ammunition, no matter what make of arm a sportsman may own he is likely to be a stickler for **Remington-UMC Ammunition.**

You may be one of the millions of American Sportsmen who are using **Remington-UMC** arms and ammunition—if so, then you **know.**

And you undoubtedly know many other sportsmen who are as strong for **Remington-UMC** as you are yourself.

TRAINING THE HOUND

A PRACTICAL TREATISE ON THE TRAINING OF FOX HOUNDS, BEAGLES, AND COON HOUNDS.

The system of training advocated is simple and effective, so that anyone who carries out instructions can easily develop a foxhound, a beagle or a coon dog to the highest state of usefulness or organize a pack in which each hound will work independently and at the same time harmoniously with the others. The subjects are: The Hound's Ancestry, History, Instinctive Tendencies, English and Native Hounds, Developing the Intelligence, Training the Foxhound, Voices and Pace of the Hound, Qualities of Scent, Manners, Training the Coon Dog, Coon Hunting, Training the Beagle, Forming a Pack, Field Trial Handling, Faults and Vices, Conditioning, Selecting and Rearing Puppies, Kennels and Yards, Diseases of Hounds and Their Treatment. The chapters on field trial training and handling are alone worth the price of the book, which is one that every man who loves the voice of a hound should read.

The book contains 224 pages, is clearly printed, nicely bound, and handsomely illustrated with bloodhounds, various types of English and American foxhounds, beagles and cross-bred dogs for 'possum and coon hunting.

Price, in heavy paper cover, $1; $1.50, postpaid.

BREEDER AND SPORTSMAN

OLUME LXVIII. No. 9. SAN FRANCISCO, SATURDAY, FEBRUARY 26, 1916. Subscription—$3.00 Per Year

Midway Stock Farm's Latest Acquisition
ROBERT BINGEN 2:11¼
Recently sold by C. A. Harrison of Seattle to become the premier stallion at E. D. Gould's famous Nebraska establishment.

Pleasanton Driving Park

PLEASANTON, CALIFORNIA

offers for service for the season of 1916 the following stallions:

THE ANVIL 2:02 3-4

Fastest trotting stallion ever offered for service in California, and fourth fastest entire trotter in the world

Son of St. Valiant Vincent 2:11¾ (by St. Vincent 2:13½ out of the triple producer Grace Lee 2:29¼ by Electioneer 125); dam Amy Smith by Emperor Wilkes 2:20¾, sire of Princess Eulalia (4) 2:09¼, etc.; grandam by Hambletonian 539.

The Anvil is regarded by Edward F. Geers as one of the very greatest trotters that he has ever raced. For five years the pair of Tennesseeans went to the races together and in that time were but twice unplaced, while winning a total of fifteen races, including the historic M. and M.

As an individual he is most pleasing, not too large or coarse in any way but smoothly and compactly made and "all horse" in every line. He is a perfect headed, pure gaited trotter, with the very best of disposition, and is destined to become a very great sire of trotting speed. His opportunities in the stud have been very slight as he has been retired from racing only since the close of 1914, and has but three or four foals now three years old. He was selected to head the stud at Pleasanton Driving Park not only on account of his great qualities as a race trotter, but because one of his first foals, Anvilite (2) 2:22¼, with a trial of ten seconds or more faster, is in every way the greatest colt trotter ever handled by C. L. DeRyder. The services of The Anvil are recommended to you without reserve.

Fee for The Anvil 2:02¾, $100 with usual privilege

Vernon McKinney 2:01 1-2

Fastest member of the great family of McKinney 2:11¼

Sire of VERNA McKINNEY (2) 2:13 (his first foal raced), fastest two-year-old pacing filly of 1915.

Son of Guy McKinney 37625 (by McKinney 2:11¼ out of Flossie Drais by Guy Wilkes 2:15¼); dam Maud Vernon by Mount Vernon 2:15¼, sire of the dams of Leata J. 2:03, etc.; grandam Mag by General McClellan, sire of the dams of Mack Mack 2:08, etc.

Vernon McKinney's racing career was not an extensive one but will long be remembered for the excellence of his performances, as his winnings include a Chamber of Commerce stake in time very near the record for that event at the time, and he is the fastest of all the McKinneys.

He is a horse of rare qualities in the way of individual excellence, almost ideal in behavior and temperament in harness or out. Since his retirement he has been a popular horse in the stud and our claim that he would prove a very great sire of pacing speed has been fully substantiated, his first foal to be raced being the season champion for the age and gait in 1915, a most excellent testimonial to his potency. He is a very sure breeder, his get are uniformly endowed with natural speed and the physical and mental requirements of modern race horses and find ready sale at most gratifying prices.

Fee for Vernon McKinney 2:01½, $50 with usual privilege

The best of care taken of mares in any manner owners may desire, but no responsibility assumed for accidents or escapes. Address for particulars

CHAS. L. DeRYDER, Superintendent, PLEASANTON, CAL.

MR BROODMARE OWNER, do you realize the importance of the simple facts that sixty of McKinney's sons and nearly fifty of his daughters are producers of standard performers? That the McKinneys won more money than any other family in 1915? That the McKinneys won the largest percentage of the futurities, both east and west, in 1915? Wilbur Lou is by the great race horse and sire Kinney Lou 2:07¾, out of the triple producer Louise Carter (3) 2:24, grandam the famous Ingar, dam of 6 including John A. McKerron 2:04½, etc.

Breed to him for "Horses that will race." Fee for 1916, seventy-five dollars with usual privilege or money refunded at our option. Write for detailed particulars, all information gladly furnished.—Licensed Pure Bred, Cert. 23.

Don't Make a Mistake by not Breeding to the Great

KING LILLY POINTER

Registered No. 5223.

By the great Star Pointer 1:59¼, 3183, dam Lilly S. by Direct 2:05¼, 20113,—two world's champions for many years.

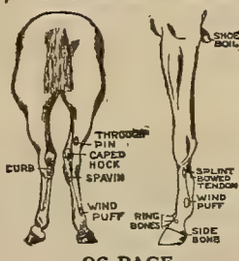
Second dam the great race and broodmare Lilly Stanley.

King Lilly Pointer is a green horse with remarkable speed. With very little work he has paced a mile on the Los Angeles track in 2:08¾ with ease. He goes without straps and has paced a half in 1:01¾ in third position all the way around, and has easily stepped quarters in 29 seconds. In another work out he went to the quarter in 30½ seconds, the second eighth in 14 seconds, finishing the last quarter in 30 seconds, going the seventh eighth in 14 seconds,—a 1:52 gait.

He is a seal brown in color, 15.2½ hands high, weighs 1100, and his get prove that he will be a sire of high-class race horses.

Fee $35 cash with return privilege, or right of substituting another mare. Best of care taken of mares, but no responsibility assumed for accidents of any kind.

Address for particulars, tabulated pedigree showing that he is the greatest bred pacing stallion in the United States,



W. H. NESMITH, 4218 S. Figueroa St., Los Angeles, Cal.

King Lilly Pointer can be seen at Los Angeles Exposition Park. Phone Home 28446.

SAVE-The-HORSE
(Trade-Mark, Registered)

OVER 20 YEARS A SUCCESS

DOUBT AND FEAR NEVER EARNED

96 PAGE BOOK FREE

Every bottle sold with Signed Contract to return money if remedy fails on Ringbone—Thoropin—Spavin—or Any Shoulder, Knee, Ankle, Hoof or Tendon Disease.

or cured anything—and delay is costly. The Horse Cannot Cure Itself! Money Must be Spent! The Problem is, to—SPEND WISELY.

Here are the reasons why you should not fail to send for our FREE Save-The-Horse BOOK.

Chas. L. Laing, Hedgeville, W. Va., writes: "We had a horse four years ago with spavin. We lost his use for a year. I bought one bottle of Save-The-Horse and cured him sound.

"It's the Most Powerful Medicine I ever used," writes W. J. Stonesefer, Route 1, Keymar, Md.

"Save-The-Horse Cured Worst Thoroughpins I ever saw." Thos. Payne, Bowling Green, Ky., also writes, "and she has been all right for more than a year."

"After Using Save-The-Horse For Two Weeks on a Bone Spavin He Does Not Go Lame. It is a great remedy," writes Albert Stoll, 915 South 4th Ave., Ann Arbor, Mich.

"Cured by One Bottle of Save-The-Horse." E. C. Waite, West Lebanon, N. H., also says, "the hoof is grown out and the fistulous condition completely healed," etc.

"The Corns Are Gone and The Contracted Hoofs and Tendons Are All Cured," writes F. S. Reynolds, Fairplain, W. Va.

Henry F. C. Smith, Route 8, Fremont, Ohio, writes: "I am pleased to tell you that I bought Save-The-Horse for Sweeney and it did the work right and perfect. He worked every day. Refer anyone to me who wants to know."

Regardless of price or any other reason, Save-The-Horse is the cheapest remedy known. It goes through and through both bone and tissue—it works inside, not outside—and produces a cure that withstands every test. No blistering, scar or loss of hair. Horse can work as usual—winter or summer.

$5 a bottle with CONTRACT-BOND at all druggists or dealers, or sent postpaid

FAIR ASSOCIATION DISSOLVES.

We are informed by Mr. I. L. Borden of this city that his resignation as president of the Pacific Coast District Fair Association will be tendered each member of that organization by today's mail, and that all memberships paid in are being refunded at the same time, so that the affairs of that short-lived concern will be fully wound up by tonight and it will be up to the horsemen to take a fresh start. Some two weeks ago Mr. Borden made an appeal to members for suggestions as to their wishes under the conditions facing them, caused by the resignation of R. A. Smith as secretary and the failure of the subscription list to attain sufficient proportions to make the subscriptions binding. The response from members was very slight, no definite plans for the future were submitted, and under these conditions Mr. Borden thought the only thing for him to do was to refund every man's money and consider the organization dissolved, thus clearing the path for any other plan of action horsemen as a whole wish to adopt. Whether they will undertake any concerted action is a matter as yet undecided, but in view of the fate of their former effort it seems very doubtful.

However, from correspondence that finds its way into this office, it is evident that there is throughout the state a very favorable sentiment toward the holding of fairs with harness racing, and in spite of the flivver made by the horsemen the local associations and the P. C. T. H. B. A. will, between them, provide more racing than has been the case in this section since 1912. The secretaries at various points are now in communication with each other and with this office in an effort to arrange dates which will allow several weeks of continuous racing without conflict, and as soon as any arrangements are completed the same will be made public in these columns.

HORSE IS FEATURE OF EXHIBIT AT THE FERRY BUILDING.

At this time, when the nations at war are placing immense orders for horses in this country, and when only recently two of the finest saddle horses in America were shipped to Japan as gifts to the Emperor from the Japanese of California, it might be well for Californians to recognize the natural advantages our state offers to the horse breeder. One of the saddle horses above referred to was from the Bridgeford Stables on Sand Mound Island, located in the San Joaquin delta region.

The raising of pure bred stock has been sadly neglected in this state, and we have depended almost entirely upon other countries for our breeding stock.

There never was a time when the prospects for the horse breeder were more promising than they are at present, especially for the breeding of draft horses. With our immense tracts of land available for this purpose, coupled with an ideal climate, there is no reason why we cannot compete with the world in the production of draft horses, both in the matter of quality and price. This is the view taken by Mr. Henry Wheatley, President of the California Horse Breeders' Association, well known as an importer and breeder of horses and whose opinion can be relied upon.

The California Development Board has recently added an interesting feature to its fine permanent exhibit in the Ferry Building, San Francisco, which should be of special interest to breeders and lovers of horses. This is in the form of a collection of reproductions from original paintings of the horse from the brush of the celebrated Dutch artist, O. Eerelman. With faultless skill the artist has placed upon canvas thirty-six separate and distinct types of horses representing in all seventeen different nationalities. Our own American Standard Bred leads the cavalcade, and the types which follow vary from the fleet-footed Arabian to the massive and rugged Belgian Draft.

It is a collection well worth seeing and should not be missed. The public is cordially invited.

PAYMENT DUE ON TWO-YEAR-OLDS.

Owners of two-year-old trotters and pacers that are engaged in the Pacific Breeders' Futurity Stake No. 14 (for foals of 1914 to trot and pace as two- and three-year-olds) are reminded that a ten dollar payment is due on the same on Wednesday, March first—next Wednesday. This keeps the nomination good for another entire year, and unless colts are started this season in the junior division of the stake there is no further payment to be made until March first, nineteen seventeen. This number of the series promoted by the P. C. T. H. B. A. is for a gross sum of $7,250 and after the usual system of money division as many parties as possible are made beneficiaries of the stake. The futurities have been the mainstay of the trotting breeding and racing industry of this coast for many years, and colts eligible to the stakes have a very much greater value than those without engagements. At this moment there is a goodly percentage of the original entry list still eligible to this particular stake, and owners are urged to keep their colts in good standing to the end that they may derive full benefit from the money spent in their training and development. During the coming summer the two-year-old divisions will be raced, the purse for trotters being $1,300 and for pacers $1,000, while special awards of one hundred dollars will be paid to the nominators of the dams on whose original entries are named the winners of each event. Colts that start in the two-year-old division are in no way barred from the three-year-old classes if payments are kept up on them. Look up the engagements of your colts, and in case they are entered in this stake see to it that the payments are made next Wednesday, addressing your remittance to F. W. Kelley, Secretary, Drawer 447, San Francisco. Should you allow your nomination to become void you might face the unpleasant predicament of having to keep your colt in the barn while poorer ones won all the money.

GOVERNMENT OPENS A FREE EMPLOYMENT BUREAU IN SAN FRANCISCO.

The Government has opened a Free Employment and Labor Exchange in the U. S. Appraiser's Building, San Francisco, for the purpose of bringing the job and the jobless together without cost to employer or workman.

Every post office is supplied with blank forms of application for the benefit of farmers and others who seek help, and the man who wants employment. These blanks are transmitted through the mail to the office of the Bureau in San Francisco, without postage. This service is free to the employer and employee. Applications can be made with the blank forms, by telephone, letter or personal call.

Furthermore, it is the object of the Bureau to promote a beneficial distribution of the unemployed in the congested communities throughout the country and bring the landless man to the manless land. It is also a division of information for the benefit of the prospective settler, the farmer in need of help, and the person seeking work.

All applications are honored by registration, and an effort made to supply the demand.

A corps of efficient officers have been detailed by the Commissioner of Immigration at this port, to attend to this work exclusively.

The Division is a branch of the Bureau of Immigration, under the supervision of the U. S. Department of Labor, Washington, D. C.

ALAMEDA COUNTY IN LINE FOR FAIR.

At a recent meeting of the Alameda County Fair Association it was definitely decided to hold a fair this season along the lines of those given prior to the date of the Panama-Pacific International Exposition, Alameda county that year following the pattern set by other fairs in the northern portion of the state and allowing the usual event to go by the boards in deference to the wishes of the exposition officials. So auspicious is the general outlook for the prosperity of the county this season that it is confidently expected that a better fair than ever will be the result of the association's efforts. The Pleasanton business men have always donated liberally to any cause that puts money in circulation locally, and it is also understood that the county supervisors will appropriate a sum of several hundred dollars for the benefit of the fair from the county's advertising fund.

While the dates for this year's fair were not claimed, it is the intention to follow as closely after the state fair as is practicable, the officers of the association being at present in correspondence with those of other organizations of a similar nature throughout the state to the end that dates may be arranged without conflict, so that horsemen, stockgrowers and exhibitors of all kinds may take full advantage of all the meetings. The Alameda fair will be staged at Pleasanton Driving Park, where there are ample accommodations for exhibits of every nature, and where the facilities for the racing end of the program are unsurpassed.

The meeting of the stockholders was held in the pavilion at the driving park, and along with the other business transacted the following officers were elected for the ensuing year: President, E. E. Hall; Vice-President, N. S. Boone; Treasurer, H. P. Mohr; Secretary, W. J. Dakin, while these and the following gentlemen will compose the board of directors: A. W. Glass and E. C. Harland, Contra Costa county; Manuel Brown, Warm Springs; E. H. Stevenson, Centerville; Harold Meek and F. Winton, Hayward; William McDonald, Livermore; L. J. Gerloff, Dublin, and C. H. Schween, T. H. Silver and W. J. Martin, Pleasanton.

TRUE KINNEY 2:12¼.

When C. A. Harrison, the Seattle hotel expert, wound up the affairs of the late Woodland Stock Farm he fell heir to the stallions Robert Bingen and True Kinney, both of whom he took north and put into the very best of winter condition. While admitting his love for the horse to be of the "simon pure" variety that is unchanging, Mr. Harrison is not in the breeding business nor does he race an extensive stable. so he immediately began looking around for new homes for Robert and Kinney, with the result that the former has been sold to Midway Stock Farm, Kearney, Neb., as announced in last week's Breeder and Sportsman. Now he is anxious for the other member of the pair to go into equally good hands and offers him for sale through the business columns of this number.

True Kinney, whose record of 2:12¼ was made in a winning race as a four-year-old after he had been a good trotter as a two- and three-year-old, is now in his seventh year and is of the generation of the McKinney family whose get have proven so successful in the last season or so both here in the west and in the eastern states. The grandsons of McKinney are making great names for themselves as speed sires, and as True Kinney comes of most excellent families on the maternal side and has already proven that his colts possess by nature and inheritance all the attractive qualities of the best modern trotters, he will no doubt prove a sire of exceptional merit. His oldest foals are but two years of age and all those handled as yearlings have shown very well indeed, being practically all trotters of much individual excellence and purity of gait. They have been ready sellers and are highly regarded by their present owners.

True Kinney has not been raced for the two seasons last passed, having been doing stud duty at Woodland Stock Farm, but Mr. Harrison is confident that in the hands of any competent man he will train and race sound, as he is in the very best of shape at present and taking his winter jogging in a pleasing manner. Should he not stand up for racing purposes he is well worth the money asked for him as a sire only, and should you be in the market for an extra nice yound stud we suggest that you communicate with Mr. Harrison concerning this fellow.

An Interview with Anvil 2:02 3-4

A COURTEOUS SOUTHERN GENTLEMAN, NOT AVERSE TO TALKING FOR PUBLICATION

"My deah suh," exclaimed Anvil in tones of hearty welcome as I shut the paddock gate behind me and advanced to the sunny corner in which he was lazying away a genuine California spring day, "this is indeed a pleasure. Eveh since you passed me yoah promise to 'spend a day with me sometime soon' — and that was last Novembeh, suh — I have looked eagehly to the day when you would make yoah promise good. You wished to heah from my own lips a bit of the history of my life, did you not, suh, in ohdeh that you might give it a little publicity heah in this pohtion of the wohld wheah I am less known than in those sections which have been the scenes of my activities in fohmeh yeahs?" I assured him that such was indeed my desire, and after a few moments of general conversation and a slight libation to our better acquaintance, we settled ourselves comfortably and he took up the tale.

"Much of what I am about to relate to you, suh," my distinguished friend began, "is known to you and also to many of yoah readehs, but I will have to relate my story in my own way and I hope that you will beah patiently with me, suh, and that my story will not tiah you too greatly. Quite often since yoah otheh visit I have called up old memories in effohts to get togetheh the mattehs foh a narration that might be entehtaining to yoah subscribehs, and with yoah pehmission I will go ahead talking to you as though my fohmeh life was uttehly unknown to you. In that manneh we will have the tale in propeh sequence and will omit nothing of vital impohtance.

"Almost every section of this peaceful land of ouahs stamps its sons and daughtehs with some general characteristics of speech and manneh, and anyone at all familiah with these various pehsonal traits would at once set me down as having been bawn somewheah south of the Mason and Dixon line, a suhmise which would be a most propah one, for I, suh, belong to the uppeh families of the old south. My fatheh and motheh wehe both bond sehvants of Mistah Frank G. Jones of Memphis, suh, and I take pride in the fact that I was bawn to the same estate. In bondage we may have been, suh, but it was and is a bondage that rests lightly upon the soul, as we pahtake of the position of true friend and boon companions ratheh than one of sehvitude. My motheth, Amy Smith, was a daughteh of Empehroh Wilkes 2:20¾, while my fatheth, long one of ouah masteh's favorites, was known as Saint Valiant Vincent 2:11¾, owning allegiance to the great house of Wilkes Boy through one of that great siah's best sons, Saint Vincent 2:13½.

"It was at Memphis that I was bawn, suh, in the summeh of 1907, and it was within the confines of Billings Pahk that my eyes fihst saw the blessed light of day. To have been bawn in such surroundings, suh, was a source of great inspiration to a youngsteh of my inclinations and ambitions and I detehmined at an eahly age to become a great trotteh. Yeahs befoah my day racing had been discontinued at Memphis, but many and many is the fascinating tale related to me by my fond motheh of the famous times when the crack trottehs of the wohld came to Memphis afteh the races at Lexington. I heahd much from heh of yoah famous Califohnia trotteh, Lou Dillon, and of a most wohthy military gentleman named Majah Delmah. These two wehe, in the days of my youth, the only two minute trottehs, and both had made theih best time oveh the track wheah I was bawn, while each winteh and spring saw many famous hosses prepaihed theah foh great campaigns. My motheth used to tell me who they wehe and how fast each pahticulah mile was that I witnessed. It is hahdly to be wondehed at, suh, that in such surroundings I should grow strongeh and strongeh in my detehmination to become famous in my own right. I was not lahge, suh, but I was compact and smooth and sound and I had a good heaht and lungs. One day late in the fall of the yeah in which I was bawn theah was a good deal of excitement about ouah stables and motheh told me the campaignehs wehe coming home. Next mawning a big quiet looking man came into the paddock wheah my motheh and I wehe and spent some time with us, talking now to heh and then to me and looking me oveh with a most critical eye. He felt of my legs and looked at my feet and satisfied himself in otheh ways that I had no physical infihmities, and at last he stahted foh the gate. As he shut it and dropped the latch he stopped foh a moment and grinned at my motheh. 'Doggone it, Amy,' he told heh in a satisfied tone, 'he might be a lot biggeh, but he couldn't be any moah hoss,' and he walked away chuckling to himself. Afteh he was gone my heaht swelled moah than eveh with the detehmination to be a great trotteh, as my motheth told me that my visitoh was Edwin F. Geahs, and that he would be my teacheh and my best friend in afteh life.

"To make a long story shohteh, suh, I was given my kindehgahten lessons that winteh and befoh I was past a yeahling I could trot quite a clip foh a shoht distance. I was neveh allowed to extend myself to a point wheah I felt any strain, and as a two-yeah-old I trotted a full mile in 2:15½, quite handily I am suah. Up to the next spring I had neveh been away from Billings Pahk except for a bit of a jog on the road once in a great while, but in 1910 I went out into the wohld and had my introduction to this game of racing, and from the very fihst I liked it. In the middle of July oveh the famous 'foah-cohnehed' track at Terre Haute I made my bow to the public in a race for colts of my age, being second to a young lady named Lulu Arion in 2:15¼. Late in Septembeh at Columbus I was foath in the Hoss Review stake at Columbus to a wondehful trio of feminine trottehs—Native Belle 2:06½, Emily Ellen 2:09¼ and Grace 2:08, these recohds, if I am not mistaken, being the ones taken by these ladies that same season. So you see, suh, that though I was not winning I was being beaten in no disgraceful manneh. At Lexington I was pitted against what my friend Vehnon McKinney (whose command of graphic and expressive racing tehms is something simply mahvellous) would call 'that beah-cat, that ginuwine little ol' cuhly wolf' Colorado E., and it was in the second heat of this contest that Misteh Estabrook's colt set the then wohld's recohd foh the age and gait, 2:04¾. I was thihd in this heat and by being timed separately in 2:08¾ I became the subject of a great deal of highly complimentary notice on the paht of hossmen and turf writehs. Marse Ed seemed highly pleased, and I went into winteh quahtehs well satisfied that I had made a good staht on the highroad to success.

"So well satisfied wehe Marse Ed and Marse Frank oveh the way I raced as a three-yeah-old and the way I wintehed, that befohe the next season opened I was staked all through the Grand Circuit. If I do say it myself, suh, I became a really great trotteh as a foh-yeah-old and save foh a bit of untowahd misfohtune I might have set a new recohd foh that age. At Indianapolis wheah I stahted my campaign I was a straight heat winneh and achieved a recohd of 2:10, which I reduced a quahteh of a second at Kalamazoo. At Grand Rapids I met my fellow Tennesseean Ahgot Hal, and while I went down to defeat befoh his rushes I won one heat from him in 2:09½. I may say, en passant, as yoah friend Volunteah so neatly puts it, that Ahgot Hal was fohced to the limit of his capacity to beat me. He was oldeh than I, but he neveh lowehed the mahk of 2:07½ which he made in the fihst heat, while mine is much fasteh at this moment. Such, suh, is the diffehence between us.

"My next race, suh, was the one in which I achieved the great ambition of my life to that time—to win a great stake. It was the M. and M., suh, and I won it in straight heats in 2:08¼, 2:08¾ and 2:09¼ oveh a very heavy track. Five othehs stahted but I was neveh in trouble. I was the fifth winneh of the classic stake driven by Mistah Geahs and the second owned by Mistah Jones, so my success was the signal foh a great deal of jubilation. You may have an added insight into the satisfaction felt by Marse Frank when I tell you that I am the fihst hoss eveh bred by him that went to the races. Afteh this pehfohmance I was reckoned as the very best stake trotteh of the season and my winnings wehe expected to be very lahge, but at Cleveland I struck a stone while wohking out and so bruised one of my feet that it was weeks befohe I was again fit to face the stahteh—and by that time all my engagements had been raced without me. I was taken to Phoenix late in the yeah and theah I stahted once, defeating two very estimable westehn trottehs, Kingbrook and R. Ambush, in ratheh comfohtable fashion.

"I may digress foh a moment to say that in my foh-yeah-old fohm I heahd much of a cehtain hoss named Directum, who at the same age had trotted a mile in 2:05¼, which stood as the recohd at that moment. Mistah Geahs was quite suah that this championship was at my mehcy up to the time I bruised my foot, and had that misfohtune not oveh-taken me I would undoubtedly have been given a special try foh it, suh, if, indeed, I had not beaten it in my regulah racing. A few days ago I heahd some-one mention Directum's name and was agreeably

R. J. MacKenzie's grand young trotter
ANVILITE (2) 2:22¼
First of the get of Anvil 2:02¾ to be raced—An exceptional two-year old in every way and now at Lexington to be fitted for his three-year-old engagements.

suhprised to leahn that it was oveh this track heah at Pleasanton that he was 'made,' as the saying is. It means nothing to me in reality, of cohse, suh, but I heahd his name so often that I seemed to know him pehsonally, and the fact that this was his home at one time has added much to the feeling of "homeiness' that I feel heah myself, though the old bahns of Directum's day ah all disappeahed and even the track has been rebuilt. I would have been proud to have known him, suh, foh he was a great trotteh to do what he did at his age, and that so many, many yeahs ago.

"Having acquiahed a recohd of 2:08¼ in my foh-yeah-old fohm, my eahning capacity thencefohwahd was of necessity limited, as most of the great stakes in those days wehe foh classes several seconds sloweh than those to which I was eligible. Had the present system been in vogue in my day I might have won a great deal moah money, perhaps been a repeateh in the M. and M., but as it was I annexed neahly six thousand dollahs racing in class events from 2:09 down to the free-foh-all. I made ten stahts in 1912, winning an even half of them, being three times second, once thihd and once unplaced, the latteh occasion being at Hahtfohd wheah I became violently ill afteh having been foath in the fihst heat and winning the second and thihd. It was during this campaign that I made the acquaintance of and became endowed with a great respect foh a Califohnia couple who wehe doubtless great friends of yoahs and many of yoah readehs, a Mistah William G. Duhfee and a trotteh of the faiah sex named Helen Stiles. Seven times that summeh Miss Helen and I wehe pitted against each otheh in high class fields of trotteh, suh, and I wish to say that we generally wehe up wheah the competition was thickest. In the long run I had a bit the best of heh, if I am not mistaken, but I found heh at all times an opponent to be reckoned with until the last heat was oveh. On a numbeh of occasions she made me trot fasteh than 2:07 to beat heh, and she was second to me in the heat at Lexington in which I made my fastest recohd foh the season, 2:06. That, suh, was a hoss race. I won the fihst heat in a flat 2:06, which was the fastest I had eveh gone, and then along came a Mistah Thomas Muhphy, a gentleman of much wile and clevehness, suh, and beat us all with Brace Gihdle. The paiah had layed up the fihst heat, suh, and at that they wehe fit foh the race of theih lives, trotting the second heat in 2:06½ and the final one in 2:04¾.

"Befoah leaving this chapteh of my life I would like to say, suh, that one day not long afteh I came heah quite a little crowd assembled one aftehnoon to witness the racing of some of yoah westehn colt stakes, the Pleasanton futurities, I believe you call them, suh, and on this occasion I had numerous visitohs heah in my paddock, most welcome among them being the Mistah Duhfee I have just alluded to, and an eldehly gentleman of whom I have heahd much in my lifetime but whom I had neveh met befoah, a Mistah Budd Doble. Both commented upon me most wahmly, I am proud to say, suh, and Mistah Duhfee has done me the honoh of sending to my coht for the present season one of the choicest young fillies in his entiah stable, Helen Belle by name and a stake winneh in heh own right. Thus is proven once moah, suh, that a young man can nevah know the influence that his slightest actions may have upon his futuhe happiness.

"In 1913, being eligible to practically nothing but the free-foh-alls, I found myself able to race fasteh than eveh, and win less money doing it. It is a strange system, suh, undeh which you people race us, and I am suah that the day will come when a hoss that can fuhnish the most entehtainment will be given a greateh eahning capacity. The moah famous I became and the fasteh I could trot the less often I could staht and the less money I could win, which is manifestly unfaiah, suh, manifestly unfaiah. Howeveh, this is meahly a little tale of my own life, and we will not go into race track politics, foh politics it is, suh, that is responsible foh the existing state of things.

"I stahted off my foath season on the trotting tuhf by defeating Ross B., Grace and my stable mate, Dudie Ahchdale, in 2:04¼ and 2:04¾ at Nohth Randall, Dudie being driven on that occasion by a Mistah Benyon. At Kalamazoo, suh, I expehienced one of the most mohtifying episodes of my life by being distanced in the fihst heat of the free-foh-all trot, Dudie winning the race with ease with Marse Frank himself driving. I am not much of an excuse trotteh, suh, but I wish to say that on this occasion the stahteh was, to reveht to the homely but descriptive language of Mistah McKinney, my present stable mate, 'pounding his eah at the switch' and I was sent away on a break. Even Mistah Geahs was vexed, so you may know, suh, how annoying the matteh must have been to both of us. At Detroit I won one heat from Dudie and Cascade in 2:04¼, afteh which Dudie and Marse Frank just naturally outtrotted Marse Ed and myself in 2:04¼ and 2:04½. By this time the rivalry between the two camps of ouah stable was something intense, though friendly, and at Syracuse a special was arranged foh us, and us only, both heats finding me fihst at the wiah in 2:04¼ and 2:05. At Columbus in ouah fihst meeting Dudie was invincible and won in 2:04¾ and 2:03¼, but ouah last meeting foh the season was the otheh way about. I had made up my mind that I could and would beat heh if it took two heats in 2:04 or betteh, and that is just what was requiahed, the fihst being in 2:03¾ and the second in a flat 2:04. At Lexington we wehe not pitted against each otheh, but I won a race and lost one. In the Octobeh prize, afteh I had taken the fihst heat in fast time, an Irish teamsteh named Donahue came along with a trotteh called Ross B. and won the next two heats in spite of my best effohts, the time being 2:04¼ and 2:05¾. My next and last staht foh the season was in the Castleton Cup, and in this classic I was a winneh in easy fashion in 2:08 and 2:06¼. Winteh quahtehs now claimed me, and though I had won less money than eveh since my three-yeah-old fohm, something less than five thousand dollahs, I had trotted ten winning heats in time that averaged just fasteh than 2:05.

"This was my last great yeah in hahness, though I won a couple of free-foh-all trots in 1914 and reduced my own recohd at Nohth Randall to the present figuhes, 2:02¾, while I also cut a quahteh of a second from the Michigan trotting recohd foh stallions, placing it at 2:04. In my last race, which was at Syracuse, I beat my old rival Dudie and the redoubtable Peteh Scott who has just had such a wondehful season, trotting my last public mile in 2:04¾. I feel that it was a fitting faiahwell, and that I could retiah to stud sehvice well content with the way I had made good my youthful ambition to become a great trotteh and confident that I would, if I lived, found a family of good game trotteh in my own right. I am the fastest trotteh eveh foaled on Tennessee soil, and thehe have been many good trotteh from that state, and I am in foath position among all the trotting stallions of the wohld. Do you wondeh, suh, that under these cihcumstances thehe ah many of these lazy, sunshiny days in which I doze heah in my paddock or in my stall in utteh satisfaction in a wohk well done and at peace with all the wohld?

"I spoke of my confidence of becoming a great siah of trotting speed, and my belief in myself in that respect is as strong as was my childish conviction that I would some day become a great trotteh. I have been so busily engaged in racing that I have sehved but few mahes in my time, suh, and I am now but nine yeahs of age. I have but three oh foah children three yeahs of age, but all of them ah good trotteh, while I have heahd the remark credited to you, suh, that you considehed Anvilite, one of my oldest sons, to be the best colt of the age you have eveh seen. Suh, I thank you not only foh entehtaining that opinion but foh making it public, and I trust that you will have no cause to alteh it. The boy was much bothehed with sickness last season, but he left heah last week with my blessing to go to Lexington to be fitted foh his colt stake engagements and he is now in the prime of youthful vigoh. They may beat him, suh, but unless misfohtune ovehtakes him they will not disgrace him, and down in my old home in Tennessee thehe ah other youngsteh that you will leahn of befohe this season comes to a close.

"Last season I spent at Castleton, suh, in the Blue Grass, and thehe I was mated with a numbeh of most excellent matrons. Out heah quite a flatteh bevy of beauties ah being sent to do me homage, and I feel that my futuhe is assuahed. Mistah DeRydeh tells me that he has much correspondence from pahties who ah interested in me, and this is a great pleasuhe, suh, a great pleasuhe. I feel that I am going to be populah and successful heah in yoh sunny clime, suh, and believe me when I tell you that popularity and success ah deah not only to the human race but to true heahted hosses as well. Tell yoah readehs so foh me, and foh them all—and at all times foh yohself, suh—the latch string of my stall hangs on the outside at all houahs."

Peter the Great

SELLS FOR $50,000

Associated press dispatches of several days ago stated that the great speed sire Peter the Great had been sold by W. E. D. Stokes to Stoughton A. Fletcher of Indianapolis, and the news is confirmed by all the turf papers of the central west in their current issues. All in all it is the most important deal in horseflesh that has been made in a good long time, and the price paid proves beyond doubt that the trotting horse industry in the eastern and central western states is in a most thriving condition, for business men of Mr. Fletcher's canniness do not make outlays of this nature unless there is every evidence of a return of a profit. The rise of Peter the Great as a sire is one of the wonder tales of the American trotting turf, and owing to the far greater personal popularity of Mr. Fletcher over that enjoyed by the former owner, the change in masters will be hailed with a hearty welcome by horsemen throughout the country. It is announced that for the present season at least Peter the Great will remain in Kentucky and will be in service at R. S. Strader's Forkland. Farm, where he will doubtless have access to as many mares as his owners will allow. The following announcement of the transaction and brief history of the stallion involved is taken from the Western Horseman:

The most notable harness horse transaction of the present year, and for that matter, of recent years, was the sale last week by W. E. D. Stokes of Peter the Great 2:07¼, to Stoughton R. Fletcher, of Indianapolis, for $50,000. Announcement of the sale produced something of a sensation in the horse world through the celebrity of the horse and the amount involved, while the suddenness of the news also tended to intensify the surprise of horsemen, the negotiations that had been conducted between the contracting parties having been quietly and thoroughly attended to by E. J. Tranter, of the Fasig-Tipton Company.

It is not in any sense detrimental to any other sire of the day, or of the past, to refer to Peter the Great as the most sensational sire in the history of the American trotter. As a family builder he has much to accomplish to rank with others, but in the begetting of race horses he has proved a veritable phenomenon, in this respect concededly outranking all other stallions, contemporary or preceding. With a consistency truly amazing, the sons and daughters of Peter the Great are each year proving that in no other family of the American trotting species does speed and racing quality flow as uniformly.

His rise to a height as a progenitor was deterred by disappointing early years, when expatriation from Massachusetts followed what critics of the time considered a convincing proof of his inability to transmit the magnificent speed and quality that he himself possessed and received from the gray Pilot Medium and the magnificent daughter of Grand Sentinel, whose progeny are producing so much of the trotting horse history of the present era.

It was after he had proved himself to be an extraordinary juvenile performer that Peter the Great was retired to the stud at Forbes Farm. In his two-year-old form he was second to Janie T., in the division of the Kentucky futurity for his age, and in the following year he won the three-year-old division of the same great classic, taking a record of 2:12½. With his excellent schooling in the hands of the veteran Peter V. Johnson, and the high class he demonstrated in leading the other crack performers of 1898, he was sold for $25,000 to J. Malcolm Forbes, who, after allowing him to race the following season in the stable of that capable reinsman, Henry Titer, and acquiring a four-year-old record of 2:07¼, retired him to the stud at Forbes Farm. Four seasons in the stud is not a long period to prove the calibre of a young sire, but probably the failure of Peter the Great to sire anything of prominence in that time beyond the phenomenal filly, Sadie Mac (3) 2:11½, was emphasized by the rising star of Bingen. At the Old Glory sale in 1903, he was purchased by Mr. Stokes for $5,000, a small price, considering his turf record and the fact that he had the opportunity ahead for a great future in the stud. His rise at Patchen Wilkes Farm did not become instant. He was ten years old before he secured his second record performer in the stallion Blue Peter, that trotted to a record of 2:16, but that same season the ill-fated Sadie Mac proved a veritable sensation, racing to a record of 2:06½, and unfolding a career whose brilliancy was only cut short by death at Hartford. 1906 and 1907 followed without notable accessions to Peter the Great's list, but in 1908 he secured seventeen new performers, one of which—Nahma—trotted into the 2:10 list, making the third of his get into the select circle indicated by that record. Since that year, the march of the mighty son of Pilot Medium and Santos has been steady in its phenomenal progress. From the mere duo of performers which he claimed in 1905, he rose to a grand total approximating 230 in the

following decade. Of these, forty are in the 2:10 list, and exactly one-half of that number took their records at four years or less.

Through his phenomenal career as a two, three and four-year-old, Peter Volo (4) 2:02 has undoubtedly lent the greatest fame of any single performer sired by Peter the Great. As a speed phenomenon and racing colt he has had no equal. His two-year-old record of 2:04½ still stands unchallenged; his three-year-old record of 2:03½ is likewise pre-eminent; while the season just closed witnessed the establishment of a new record for four-year-olds by the remarkable scion of Peter the Great. These records, all made in races, shed the added glory that comes from acquirement in actual contests and mark the youngster as the mightiest juvenile of all time. Had the reputation of a sire to rest on the siring of a single performer, hardly could there be a better dependency than Peter Volo, but as the racing annals show, while Peter Volos were mighty scarce, racing machines by Peter the Great were constantly appearing and getting the lion's share of the money. Volga (2) 2:07¾, the sensational futurity trotter of 1915; Peter Scott 2:05¼, the greatest money winning trotter in history; Lady Wanetka (2) 2:10, a phenomenal filly, that at two years was eclipsed only by Peter Volo; Grace 2:04¾, a futurity winner and extraordinary race filly; the ill-fortuned Sadie Mac, first to call attention to a rising star, destined to dim all others; Peter Mac 2:03½, one of the really great phenomenons of 1915, and believed by many to become a king; Czarevna (3) 2:07¼, a futurity winner; Margaret Druien 2:03¼, and a host of others have so conclusively placed the name of their sire beyond the reach of those who would detract from his rightful glory, that were his performers to cease now, he would remain practically solitary in the richness of his achievements.

Mr. Fletcher is to be congratulated on the possession of this great sire, but more so are the breeders of the state, where in all probability Peter the Great will make his home after the present season is ended. Yet, states or localities may scarcely lay claim to any sire of his caliber, for, as our greatest statesmen belong to the Nation, so likewise do such phenomenons as Peter the Great benefit the entire breeding industry of the country. And it is inevitable that much of the eventual history of the Peter the Great family is yet unwritten, for still in the possession of the remarkable vigor that has characterized his career, phenomenal products will in succeeding years keep up the fame that has attached to him more enduringly and in a greater measure than any trotting sire we have yet seen.

HORSES AT HAINES.

While the idea that "the horse game is dead" is encountered in a great many places, no one will get that idea by visiting the little town of Haines, ten miles from Baker, Oregon. Haines always furnishes a good quota of the horses raced at the Baker fair and brings home a share of the money, and right now there are not less than a half dozen men directly interested in the standard bred horse, besides lots of the farm colts in this region being sired by standard bred stallions, right in the Powder River valley, famous for its big drafters. They go together.

It was here that F. H. Hurd bred and developed College Gent, that was sold to the Carson stables, in Alberta, and now has a mark of 2:06¼. Mr. Hurd secured Direct E. when he sold College Gent and the horse has served a few good mares each year since. Mr. Hurd has two colts by him that will be two years old in the spring, one out of the great mare Belle H., dam of College Gent, the other out of her daughter, Haines Maid, a full sister to College Gent, by Kentucky P., a son of Baron Wilkes. Mr. Hurd will train the colts and track them double. He considers both fine speed prospects. Belle H. is expected to drop another colt by Direct E. this spring. She lost her colt last year. Her progeny now owned by Mr. Hurd includes Oregon Girl, full sister to College Gent; Haines Gent,coming four, also by Kentucky P., that will be raced this season, and Belle Patterson, another full sister, coming three. Oregon Girl has a horse colt, coming a year, by Direct E. Frank Mullany has been with Mr. Hurd this winter and will take the horses out the coming season.

A. A. Fidler, owner of Delmas 2:09¼, has two other good horses, Amy McKinney and Ben T., a colt by McV., coming three. Mr. Fidler has had the horses jogged all winter and, while he is not ready to announce his plans for the year, it is pretty certain all three will be raced.

Elmer Hogoboom still has his good old stallion Allerdaw 2:09. The horse has served the few mares that came to him and can race as fast as he ever could—and he always gets inside the money. But Elmer says he is strictly a farmer and that the cows and hogs and chickens interest him most. When the bell calls the starters for position we shall see, for Elmer will watch them go, even if he does plow corn.

Thomas H. Christensen has a fine colt by Kentucky P. out of his mare Curucca, with a matinee record of 2:18, by Alfonso. The colt has been named Captain Patterson. It is a square trotter, a fine prospect and will be tracked.

A. W. Perkins has a daughter of Teddy A. that is reported to be a fine driver and a good race prospect. But as Mr. Perkins was not seen, information concerning his plans are meager.

Wallowa Maid, a daughter of Teddy A., dam Electrophone, by Caution, is owned by Mrs. Victor De Val. She was foaled in 1911, has individuality as well as breeding as good as the best of them and will probably be trained this season.

C. W. Willbourne, who drove Delmas to his mark and in most of his races, jogged Mr. Fidler's horses until Christmas. He is now at home in Baker, Ore., where he and Tom Brady will open a public training stable early in the spring.—Rural Spirit.

DATES FOR NORTHWESTERN FAIRS.

Owing to the severe storms which visited the mountain country of the northwest early this month the annual meeting of the members of the North Pacific Fair Association was not so largely attended as is generally the case, a number of delegates from the cities east of the Cascades being prevented from being present owing to railroad blockades. Representatives of most of the members of the association managed to be on hand, however, and the following schedule of meetings was drawn up:

Centralia-Chehalis, Wash.	August 28-Sept. 2
Vancouver, B. C.	August 12-17
Spokane, Wash.	September 4-9
Scio, Oregon	September 6-8
Gray's Harbor, Wash.	September 4-8
Walla Walla, Wash.	September 11-16
Baker, Oregon	September 11-16
Olympia, Wash.	September 12-15
North Yakima, Wash.	September 18-25
Boise, Idaho	September 18-22
New Westminster, B. C.	September 25-30
Salem, Oregon	September 25-30
Helena, Montana	September 25-30
Salt Lake City, Utah	October 2-7

It will be noticed that there are a number of conflicts in date, chief among them being the case of Walla Walla and Baker, and it is not unlikely that this particular matter may be remedied, as Secretary Joe Waddell of Baker, who got part way to Seattle and then went into winter quarters in a snow drift, is taking the burden of the battle for a change and will doubtless succeed in getting some sort of an arrangement that will allow horsemen to race at both points. There is so little racing in the northwest that it seems too bad that dates should not be so arranged to allow horsemen to get the full benefit of every program offered, and both Walla Walla and Baker attract the best stables in the northwest as a rule. Last year a conflict between Walla Walla and Spokane cost money not only to the horsemen but to the promoters as well, and we will hear with pleasure of a change that will permit of the racing of all stables at the more important points. There are a number of smaller meetings to be given for which dates have not yet been claimed, and Secretary J. W. Pace, who maintains a permanent office in Seattle, requests that managers and secretaries advise him of these at the earliest convenient time.

As usual, the circuit stake book will appear in March or early in April, the events for which entries will close not later than June first being the 2:12 and 2:25 trot and the 2:10 and 2:25 pace. Supplemental late closers will be arranged to close two weeks in advance of the opening of each meeting, if agreeable to all concerned, and these classes will include events for 2:15 and 2:20 trotters and 2:15 and 2:20 pacers, with such others as the individual associations may feel justified in giving. The size of the purses is discretionary with each association and it was the concensus of those present at the meeting that large purses were not so satisfactory to all concerned as five hundred dollar events and more of them. The three heat, every heat a race system was most favored and will probably be in use throughout the circuit, it having proved popular and successful last year with both horsemen and public.

Tom Gahagan Views the Stake Pacers

The announcement coming from Detroit a few days ago that the $5,000 Chamber of Commerce pacing classic would be changed to the 2:06 class for the 1916 meeting was especially interesting to two of the trainers at the Indianapolis track and the shift of classes assures at least one more entry to the sidewheel "Derby" from the local race colony than would have been made had the race remained for the 2:07 class. An Indiana pacer won the classic last year, the honors going to Single G. 2:02¾, and sidewheelers from the Hoosier State have on more than one occasion been prominent in the event.

The Indianapolis pacer made eligible to the Chamber of Commerce by the change in the class is the bay gelding Fred Russell 2:04, raced the past season by Harry Hersey. The 2:04 mark of the pacer was taken in a losing race and therefore does not affect his eligibility, his best winning race record being 2:05¼. A graduate from the half mile tracks, Hersey raced the gelding chiefly on the Great Western Circuit the past season with success, the wiggler pacing an especially good race at Hamline, where he took his winning record of 2:05¼ over a slow track. He cut into the Grand Circuit at Columbus, where he won and equaled his record of 2:05¼, and at Lexington he won a heat from Earl Jr. in 2:04. In another race against the gray warrior from the Cox stable he was close to the winner in 2:01½, being timed separately in better than 2:03.

Hersey enjoys the distinction of having ridden more miles in 2:00 or better than all of the other trainers combined. For several years he was head trainer of the M. W. Savage stable, piloting Dan Patch in all of his record-breaking miles after the champion passed from the charge of the late Myron McHenry. Later he marked Minor Heir in 1:58½ against time and set the race record at 1:59 with him in a match over the local track. He has also campaigned such fast pacers as Lady Maud C. 2:00½, Hedgewood Boy 2:01, Ess H. Kay 2:00¾, George Gano 2:02 and Walter Cochato 2:02¼. All of these pacers were free legged, but Fred Russell is of the genuine Indiana brand; wears the "submarine harharness," or hobbles, which are supposed to be a part of the armament of all pacers from the Hoosier state and Canada. Hersey is one of the smallest of the drivers now prominent on the turf. It is related of George Starr, who drove Planet to victory in the Chamber of Commerce stake two decades ago, that previous to the start he changed a $20 bill into silver in order to make the required weight of 150 pounds. Hersey would have to raid the treasury to make up his deficit in weight in that way as on race day he carries enough sheet lead in his sulky cushion to anchor a ferry boat.

The other local candidate for the Chamber of Commerce stake is the four-year-old filly Miss Harris M. 2:07½, in the stable of Lon McDonald. This youngster was a trotter up to late in the fall of 1914, when she went lame and shifted over to the lateral gait. McDonald wintered her in California and she was raced at the June meeting at San Francisco. In the pacing futurities she was stacked up against the champion colt General Todd on three different occasions and at the local meeting in the Western Horseman stake made him pace to a record of 2:04¼, being beaten only a half length. She looked so good for the 1915 stakes that Stoughton Fletcher, of this city, separated himself from a check for $7,000 or thereabouts in exchange for a bill of sale of the filly. She is a daughter of Peter the Great and looks to be about the fastest of the free legged pacers by that famous sire, with the possible exception of the high going Peter Farren, which Tom Murphy will point for the Chamber of Commerce stake the coming season.

Another fast pacer which the change in class makes eligible to the Detroit stake is the Los Angeles mare White Sox. She won the $20,000 pacing stake at the June meeting at San Francisco, and was second to Hal Boy in the like event there in November. She worked the fast Los Angeles track in 2:02, a mile which must command respect in any company outside the free for all class. She is a converted trotter, having taken a record at the diagonal gait. She is owned by Clarence Berry, brother of Henry Berry, owner of the San Francisco Coast League baseball team, and a close friend of Charles Comiskey, owner of the Chicago American League team, for which the mare was named. There has been considerable talk of a match race between the mare and the local gelding Hal Boy, but advices recently received a few days ago from Will Durfee, trainer of White Sox, convey the information that the Los Angeles man believes that the regular events on the Big Ring will be sufficient to keep the mare busy, without going out of her class to take on such a tough customer as the handsome little son of Hal B.

Another to become eligible to the Detroit stake by the change in class is the ill-starred Dr. Burns Jr. 2:04¼. In 1914 the big stallion was a bear and made William pace a heat in 2:00½ at Grand Rapids. He was then shipped to California for the $20,000 stake at the exposition meeting in June, but in the free for all pace a week before the race for the big money he broke down, "bowing" a front tendon so badly that he was barely able to walk for some time. Burns was shipped East and for several months has been running out and roughing it on a stock farm near Ypsilanti, Mich. His trainer, Al Whitney, took him up recently and the big horse is apparently sound again. The firing iron was used on the leg freely last summer and it is possible that he may stand training again.

The Dakota mare Sayde Densmore, which set the record for four-year-old fillies at 2:02 at Lexington last fall, is another which became eligible to the Chamber of Commerce stake, she having raced to a record of 2:05½ in the west last season. In the Earl Jr. race at Lexington, previously mentioned, she was separately timed in 2:03. Like Fred Russell and Dr. Burns Jr., she wears the hobbles.

The fastest heat raced by any of the Chamber of Commerce eligibles last season was that of Billy Dale, the angular bay gelding which Walter Cox depends upon to bring the bacon to New Hampshire next summer. Over the Dorval Park track at Montreal, a very slow course, he was beaten by a whisker by Yedno in 2:02½ and he also paced some sensational races over the Ohio halfmile tracks. On looks the gelding would bring about $62.50, but when he turns around for the coin his price advances by leaps and bounds.—American Sportsman.

NOTES and NEWS

Wichita, Kansas, which has been off the trotting map for some time, comes back in an encouraging manner this season, announcing two meetings to be held at a new plont. There are some excellent people behind the project and there has been a healthy public sentiment in favor of the revival of harness races.

◈ ◈ ◈

Anyone who is in the market for a really excellent young trotting sire is recommended to the advertisement of True Kinney 2:12¼ which appears elsewhere in this number of the Breeder and Sportsman. He is a true "McKinney" in almost every point and his colts in the Woodland country are among the best in the neighborhood.

◈ ◈ ◈

Dick Wilson has again forsaken the trotters for the simple life of an agriculturist, departing about two weeks ago for Jackson, Miss., with a full equipment of farm tools. This isn't Dick's first renouncement of the faith, so it is presumed he left the back gate open that he might return to the fold any time the Mississippi sun became too oppressive.—Horse Review.

◈ ◈ ◈

George Giannini, president of the local amateur driving club, is back home from a trip of some duration in the eastern part of the country. Fortunately for George he had enough meat on his bones to keep the cold from searching him out in a manner really uncomfortable, but the green grass and the sunshine of the California country looked pretty good to him at that.

◈ ◈ ◈

Officers of the Southwest Washington Fair Association (Centralia-Chehalis) were recently elected as follows: F. B. Hubbard, president; G. R. Walker, secretary; George H. Miller, treasurer, and these gentlemen with J. T. Bevins and T. L. Long constitute the board of directors. The dates for their annual exposition are August 28 to September 2 and a number of improvements over former events are promised. They have an excellent halfmile track, as evidenced by the time made there last season, Scarlet Trent setting the record at 2:09¼ while Teddy Bear paced it in 2:10 flat and two trotters won heats close to 2:15.

◈ ◈ ◈

Russell Boy 2:02¼, the crack stake pacer of the season of 1915, goes to the stable of Tommy Murphy and will be raced this year by the lanky gentleman from Poughkeepsie. The owner, Ellis Franks, turned this fellow over to Pop Geers in the middle of his first race on the big line last season and the veteran Tennesseean got along with him so nicely that it was rather expected the pair would work together again this time. Russell Boy is one of the fastest pacers that has shown up in a long time but is unsteady at times and is generally raced over the long route as a precautionary measure. Last year a good many of his miles were pretty long ones and it is generally figured that he will be a two-minute pacer this summer. Murphy has ridden a number of miles in even time or better, while the Grand Old Man has his first spin to take inside that limit.

◈ ◈ ◈

At a recent meeting of the stewards of the Kansas and Oklahoma circuit held at Winfield, Kansas, the following dates were claimed for the present season: Winfield, week of July 10; Wichita, week of July 17; Council Grove, week of July 24; Herrington, week of July 31; Anthony, week of August 7; Pratt, week of August 14; McPherson, week of August 21; Eureka, week of August 28; Iola, week of September 4; Wichita, week of September 11; Topeka, week of September 11; Hutchinson, week of September 18; Oklahoma City, week of September 25. A decidedly advanced step was taken when it was decided to eliminate the early closers of all kinds and to close entries at every meeting for all events on that program two weeks in advance of the opening day. The three heat system had a good many advocates but the stewards decided to stay by the three in five plan with the point system of placing.

◈ ◈ ◈

Harold Dillon, the son of Sidney Dillon and the great brood mare Guycara by Guy Wilkes who was exported to the antipodes some years ago, has made a high place for himself among contemporary sires in New Zealand. At the summer meeting of the New Brighton Trotting Club he had four winners to score, as follows: Dan Dillon, a trotter who showed the way to the wire over a two-mile route in 5:00; Sinoda, a winner at a mile and a half in 3:40¼; Antonio, whose winning mile and a half was negotiated over very heavy going in 3:33¾, and the three-year-old colt Author Dillon who carried a rider over the two-mile course in 4:57¼. This is an excellent showing and proves that the members of the great family of Sidney Dillon can and do make good in any part of the world they happen to hit. The holiday racing season in New Zealand was an exceptionally successful one, approximately sixty thousand dollars being raced for in the course of the six midsummer meetings that were staged during the holidays. The fields were large and both attendance and speculation were lively.

Floradora Z. 2:11½, the brown daughter of Zombro 2:11 who made such an excellent campaign in the northwest last season for Charley Guion, is being jogged daily at Seattle and will be prepped for a campaign down through the central west, in all probability, as her owners figure that she has a greater earning capacity there than around home. She was a slow comer, having been handled for some seasons by various trainers with little success, but she was a real good trotter when she did "arrive," as anyone starting against her last year can attest. She is owned at present by P. J. McCormack of the Broadway Stables, Seattle, and Ed Cudihee of the same city.

◈ ◈ ◈

The Minneapolis bunch have been pulling off some great little races on the ice this winter, but they hung up a real pattern along that line a few days ago in the free-for-all pace. Jerry H. and Jim Kerr copped the first heat in 1:02¼, whereupon Kid Riley and Dan Alleman lined out a couple for themselves in 1:02¼ and 1:02½. About this time Ed Best thought it a good idea to show some proof for the statement he has been making all winter that Madam Mac is the best ice pacer he ever owned, so he took the California mare to the front for a pair in 1:02¾ and 1:02½. Jerry took the stable for his at this point in the proceedings and in the final heat between Riley and the Madam the former won in 1:03¾, the mare making a bobble at the three-eighths and spoiling her chance. The figures stand as a world's record for a race of that duration on the ice.

◈ ◈ ◈

Fred Johnston of Calgary, former owner of the fast pacing mare Yedno 2:02½ and other performers of quality, paid a short visit to Helena Mont., a few days ago and purchased from the estate of Dr. Kellogg the pacing gelding Mussell Shell 2:15 by Bozeman 2:17, dam Silvershell (dam of four) by Nutshell, a speed siring son of Nutwood. This is the little wiggler that was second to Hal Boy so often in the season of 1914 over the tracks of western Canada, forcing the Childs pacer to break the track records at both Calgary and Swift Current to beat him. He has worked the sandy track at Calgary in 2:10¼ (which is the fastest mile ever negotiated over that course) and at Missoula in the fall of the same season he turned the halfmile track in 2:08, with the last half in 1:01. In 1915, owing to Dr. Kellogg's death, he was not raced and was trained merely enough to keep him fit for another year, his fastest work having been over the mile track at Helena in 2:13, with the last half in 1:01¼ and the last quarter in :28¼, which is considerable sizzle. He is a good deal on the Hal Boy order in that he wears no underwear and practically no boots, if any, and Mr. Johnston is confident that he has one of the best pacers in the northwest for the slow classes, as his mark of 2:15 is not a win-race. Two different parties have endeavored to buy him already, but there is "nothing stirring," as he is just the boy his new owner was looking for. Mr. Johnston is also "strong" for his Ray O'Light pacer out of Almota by Vice Regent and believes that with any sort of luck he will some day pace well along toward the two-minute mark. He describes racing prospects for western Canada for the season as being fairly good, as the fair associations have signified their intentions of putting up as much money this year as they did in 1914, and in some instances a little more. The Canadians are real sportsmen and we wish them all the very best of luck.

◈ ◈ ◈

At a recent meeting of the Chamber of Commerce of Dixon it was decided to make an effort to arrange for a race meeting at that place in conjunction with the California fair circuit and Harry McFadyen was delegated to take the matter up and see what could be accomplished along this line. Dixon is not a large place on the map as large places go, but it is the center of an extensive farming country, well settled by prosperous people who have a high regard for the horse, and a fairly pretentious and highly successful meeting could no doubt be arranged there. The annual May Day festival with its horse races is the one best bet of the year at Dixon, and it is the success of this event that has encouraged the Chamber of Commerce to consider the fair proposition. The original intention was to have a meeting about the same time as Woodland and the state fair, but in view of the fact that as the dates were originally suggested the latter end of the circuit comes out about right for the Arizona state fair (which next to the California state fair will be the main meeting of this section of the west) it might prove advisable for Dixon to stage her fair early, say on the dates submitted for Ventura. This would cause little if any inconvenience in the way of a conflict, and would also distribute the racing of the Sacramento valley towns over a greater period of time. At early meeting at Dixon would perhaps meet with better patronage than one following the state fair and Woodland, as very many people would attend all three events if they were arranged so as not to come in a row. Two of them close together is all right, but three is a little too many, perhaps. The track at Dixon is a halfmile course that is both fast and safe, and in case they give a meeting there horsemen in attendance will be furnished free straw and hay, with grain at the regular price, no "gouging." The folks there have the proper spirit, and the advent of that city to the regular fair circuit would be hailed with a great deal of pleasure.

R. H. ("Bob") Cosgrove, who was secretary of the Spokane Interstate Fair for a long term of years, has recently assumed the Montana state agency for the Vermont Loan and Trust Company, with headquarters at Billings. If Bob puts the same energy into this work that he did into boosting the interstate fair--and it's an odds on bet that he works even harder—his company will get their full share of business and some over.

◈ ◈ ◈

George A. Kelly, who has made his home in the northwest almost continually since 1882 and who in all that time has never been without a few horses of the standard bred family, is temporarily a resident of Oakland while resting up a bit and laying plans for the future. Mr. Kelly has wintered in California with his stable on various occasions, and two years ago, deciding that things in the trotting horse business locally were getting a little slow, acquired a ten-acre tract of walnut land in the old Baldwin ranch near Los Angeles. Two years of intelligent effort put this property in such condition that a few days ago he disposed of it at a profit of some four thousand dollars, acquiring in its stead some good town property in Davenport, Washington, which produces a steady income. Mr. Kelly still has his favorite trotting stallion Bonnie McK. 2:29½ and one of his daughters that has trotted close to 2:16 in a race for the owner, and these two he finds it hard to part with. Bonnie McK., whose list of performers is headed by the good four-year-old pacer Bonnie Antrim 2:12¼, has always been a well patronized horse in the Walla Walla neighborhood and it is not unlikely that Mr. Kelly will go on up into that country after the weather moderates and place the son of McKinney back in service there, while the mare ought to give a good account of herself over the tracks of the North Pacific Fair Circuit. In the years during which he has been identified with the trotter Mr. Kelly has had the pleasure of owning quite a number of good ones, perhaps the best of which was the great mare Anzella 2:06¾ whom he raced for three seasons, and who eventually went to a home across the seas in Russia.

WINTERING AT TOPEKA.

Al Ruthven, of Kansas City, Mo., who recently returned from California, is wintering his stable at Topeka, in charge of Joe Ryan and Vernon Brooks, and reports a very promising stable for 1916, headed by the handsome black stallion Walnut Grove p. 2:05¼, by Constantine 2:12½, dam Lindis, by Jackdaw. Walnut Grove will be raced on the trot this season, which appears to be his natural gait, and is reported very liable to trot to his pacing record. Ruthven surprised the boys at the breeders' meeting on October 29, at Topeka, when he trotted Walnut Grove to a record of 2:19 with less than two weeks' work at that gait. He could have trotted much faster, but was held well in hand, owing to his very limited work after a let-up of about ten weeks. It also appears that Walnut Grove is a fine speed sire, his first crop of colts being three-year-olds last season, the only two trained being Little Grove 2:18½ and G. C. W. p. 2:18¼. He also has several other youngsters that showed extreme speed, including the two-year-old colt Grover E., dam Rose Equity p. 2:07¾, who could have secured a trotting record as a yearling of better than 2:30, with very little work. The balance of Ruthven's stable at present for the coming season are Rose Equity; Miss Johnson 2:08¾, by Happy Treasure; G. C. W. p. (3) 2:18¼, by Walnut Grove, who won second money in the halfmile track division of the Horseman 1915 futurity; and Little Grove (3) 2:18½, by Walnut Grove. Little Grove is liable to make the green trotters sit up and take notice. Last, but not least, is the handsome two-year-old bay colt, Grover E., by Walnut Grove, dam Rose Equity. This colt, with but thirty days' training, jogging and all, was allowed to trot a mile in 2:41, last half in 1:15½, quarter in :36. He is eligible to $85,000 worth of futurities.

There will soon be added to this stable the three-year-old trotting colt R. E. C., by Walnut Grove, dam Maud Sprague, by Governor Sprague, owned by R. E. Cowdery of Topeka.

In all there are sixty-nine horses in winter quarters at Topeka, among them John Gray, with three, headed by Amorist 2:12¼; Charles Lacy and A. S. Goram, two; Herb Covell, six, in charge of Elax Parks, headed by Peter Silver 2:29¼, and Jim Sunday 2:30; G. C. Wegele & Sons with twelve, headed by Bingenaras 45088, by Bingen, dam Hatteras by Wilkes Boy. By all appearances they have been successful in getting Queen McGregor with foal, who is 26 years old, and is the dam of five.

George Thompson has five, including Topican 2:20¼, in charge of Harry Brooks. Jack Ransdell & Son have four, and are expecting Yours Truly 2:15¼ back soon. J. J. Gardner has one, Henry Dunn, six, R. H. Burr and George Snead, seven, headed by Mr. Pinkerton; Chas. Tanner and N. Newton have two, one a very promising three-year-old by Walnut Grove; John Bagley has one, and he, as well as others, will soon have several more added. O. D. Heart has four, headed by Walkover 2:12¼; William Bradbury has nine on hand, among them several very good-looking colts by Walnut Grove. Mr. Husted is also wintering a good one. Among the boys at Topeka they are expecting about twenty-five more as soon as the training season opens.—Horse Review.

ROD, GUN AND KENNEL

CONDUCTED BY FISHER HUNT

ANGLERS SLEEP ALL NIGHT ON PIERS TO GET GOOD FISHING PLACE.

Securing a rod and tackle at Redondo pier, which can be rented by the half day or day, the fisherman walks down the long wharf reaching out above the breakers and high above them, and takes his position. There is, I fancy, much prescience in this, but I had no idea of its importance until I met one of the most skillful of these fishermen.

"Yes," he said, "it makes a heap of difference. You see, this dock is the only one of the 'longshore docks that you can get big fish from—yellow-tail, sea bass, and sea trout. The reason is that a sort of deep-water trough sets in here and the big fish follow it in; and if you come here and don't know where to fish, you get left.

"In the summer if you fish on the end, out to sea, in deep water, you get deep-water fish and no surf fish. They live in the surf, near shore, and, to my mind, are the best fish. Some of the old-timers come down here Saturday night with their blankets and lie on the dock all night. Sometimes twenty men do this, sometimes many more when the fish are biting in summer, and when the crowd comes at 7 or 8 o'clock they always find some one ahead of them.

"I didn't get on to this," continued the old fisherman, "for a long time. One day I discovered a fine spot and the next morning had my breakfast and got here at 7:30, but a man had my place. The next holiday I was here at 6, but it was gone, and the following Sunday I'm blessed if that same chap wasn't here at 4. So I tackled him and asked if he lived here. He laughed and said no, but that he slept here all night when he wanted the place. As it never rains between June and November, he was as comfortable in his canvas-covered sleeping bag as though on the deck of a yacht."

I reached this Redondo pier one Sunday morning in June. The fog was going to sea in great golden masses, and the ocean was like a disk of steel, changing to blue, gold, yellow and vermillion as the sun came up and illuminated its surface. The dock, as long as it is, was lined with a fence of bristling poles and men, women and children, while down the center poured a continuous stream of fisher folk, each carrying a pole, a basket of lunch and tackle, and some a chair or stool.

It was a business-like crowd. All were bent on the object in hand—fishing—and an hour later the entire pier was lined with fishermen. At 10 o'clock a negro picnic arrived on two special canary-colored cars, and among them I saw an old ex-slave who worked for me. He had a thirteen-foot pole, my best salmon reel, lashed to the butt with a piece of cord, and a short, heavy line.

The black contingent found the best places occupied, but shortly adapted themselves to the center of the pier, where, between the railroad ties, they could point their poles directly down into the water, the pole, of course, becoming a part of the line. Sometimes for half an hour not a fish would be taken; then a shout would be raised and the unattached anglers would move in that direction, leaving their poles to a friend, child, husband or wife. If the fish showed signs of being large the excitement become intense, and advice was freely given.

CHARLES FREDERICK HOLDER.

Pasadena, Cal.

BUREAU OF FISHERIES DISTRIBUTIONS.

During the fiscal year of 1915 the Bureau of Fisheries distributed 536,000 eggs, 3,000,000,000 fry and 58,000,000 fingerling, yearling and adult fish. The species distributed included: Catfish, carp, yellow sucker, Buffalofish, fresh-water drum, shad, alewife, whitefish, lake herring, silver salmon, chinook salmon, blueback salmon, humpback salmon, dog salmon, steelhead trout, rainbow trout, Atlantic salmon, landlocked salmon, Scotch sea trout, black spotted trout, Loch Leven trout, lake trout, brook trout, smelt, grayling, crappies, rock bass, small-mouth black bass, sunfishes, pike and pickerel, pike perch, yellow perch, striped bass, white perch, white bass, yellow bass, cod, pollock, haddock, flounder, mackerel, tautog and lobster.

New York received lake trout and land-locked salmon, and New Jersey black bass, crappie, landlocked salmonfi rainbow trout, steelhead trout, sunfish, white perch and yellow perch.

* * * *

Protection and increase of the elk in the Adirondack Mountains by the members of the Benevolent and Protective Order of Elks has just been instituted by William E. Drislane of Albany, president of the New York State Association of Elks, through a letter sent to every lodge in the State, asking them to exert their influence for the preservation of these animals and to make contributions for the purchase and liberation of addition elk.

COURSING AT SACRAMENTO NEXT SUNDAY.

Sunday, March 5th, has been set by the Capital City Coursing Club as the date for its next coursing meet. The same grounds near Franklin that have been used in previous meets have been decided upon. This will be the first coursing meet this year. Last fall a coursing match was held near Franklin, and it was a successful affair, in spite of the heavy rain that tended to dampen the spirits of the sportsmen.

* * * *

That at least a hundred deer have been recently killed by coyotes, and that at least twice that number are imperiled, is the word brought to Klamath Falls (Ore.) by Harry and Wilber Telford, who have returned from a three days' trip to the upper Jenny Creek country on the Klamath-Jackson county line. Seven freshly killed carcasses were found by the Telfords, besides the remains of about 100 others killed more or less recently.

ELKS TO ROAM WASHINGTON HILLS.

Herds of elk will soon be roaming Kittitas county, in Washington, if a project started by the county game commissioner is successfully carried out. Twenty-five head of elk will be brought from Yellowstone National Park and liberated at Boylston between Ellensburg and the Columbia River. There is no open season for elk in this State and it is the belief of men interested in the movement that the animals will thrive here as well as in Montana. Application for the shipment of the elk from the government reservation was made to Col. Britt, commandant of the Yellowstone National Park, through R. B. Wales, State Game Warden for the eastern district of Washington. Wales at once wrote requesting the commandant to ascertain whether the elk could be trapped and to notify him if a carload could be obtained so that the necessary permit from Congress could be sought.

* * * *

Redondo Beach.—Beach fishing has sprung into sudden popularity these balmy, moonlight nights at the beach, and many different kinds of fish are biting at this place. A swarm of perch infests the harbor and will probably be here for several days. Besides the perch, surf fish are biting well, and many fishermen who are old hands at the game and pleasure seekers from the city can be found at various locations along the beach at night, with their lines strung out into the breakers.

The reason for the sudden influx of various kinds of fish is that millions of angleworms have drifted into this harbor and are attracting swarms of fish that come here to feed. From pier No. 3, J. K. Richardson of Los Angeles caught a halibut weighing thirty pounds, one of the largest of the season.

CHINOOK SALMON TAKEN FROM OREGON.

An attempt to raise chinook salmon taken from the Columbia River in Oregon is being made by the Massachusetts Fish and Game Commission. More than half a million chinook salmon eggs are now in process of hatching at the Palmer hatchery. The fish will be liberated in one of the tributaries of the Merrimack River below Lawrence. It is expected that the year 1919 will witness thousands of salmon, weighing from fifteen to thirty pounds each, coming up the Merrimack River to be taken by the fishermen. Four years is the allotted time for salmon to mature, at which time they return to spawn, most of them coming back to the stream in which they were raised. The commission will try this plan out thoroughly during the next few years and with this in view arrangements are being made for the construction of a rearing station on one of the streams that empty into the Merrimack where the young salmon can be fed until large enough to hold their own against all enemies.

Fishing conditions in southern California show a steady improvement so far as fresh waters are concerned. The feature of the season was the phenomenal fishing in Big and Little Bear lakes, which was brought about through the repeated plantings made by the Fish and Game Commission. The commission has this year been making efforts towards creating a salmon run in the Ventura and Santa Ynez rivers, the work connected therewith being paid for by the angling license money. The economic value of the fish taken by sportsmen in Big and Little Bear lakes will count up to thousands of dollars. A scheme to sell the great supply of fish raised in Sweetwater Lake from plantings originally made by the State was headed off by Fish and Game Commissioner Connell. Were it possible for this to be done, it would end all planting operations in waters to which there is any color of private title, as the Fish and Game Commission already has refused to stock any waters to which the public is denied free access.

HEARD IN KENNEL CIRCLES.

A string of terriers consisting of Sealyham, Irish, wire, smooth fox and Scottish, are on their way from England to Jack Bradshaw of Beresford, California. Bradshaw had been negotiating for the dogs for several weeks. Owing to the present conditions in England he was able to buy some of the world's best terriers at half their regular prices. The dogs are to be shipped at once and should arrive here within six weeks.

‡ ‡ ‡

Mrs. Anita M. Baldwin of Santa Anita, California, is offering several trophies at the Crufft's show, in England, the latter part of this month.

‡ ‡ ‡

The Eastern Airedale terrier fanciers were disappointed to learn that Mrs. Anita Baldwin, of California, has decided not to show her dogs at the Westminster show. The fancy were anxious to get a "peek" at the crack Tintern Tip Top.

‡ ‡ ‡

Mrs. Norwood B. Smith, of the Cragwood kennels, has several very promising St. Bernard puppies by her crack dog O'Siris which she intends to show at the Golden Gate show.

‡ ‡ ‡

The Golden Gate Kennel Club has practically decided to hold its show April 26, 27 and 28.

‡ ‡ ‡

The Utah State Kennel club's dog show, to be held in Salt Lake on March 2, 3 and 4, has received a few entries from the best kennels of the west and many more are expected before entries close on February 26. Fanciers should make up their entries as soon as possible, in order that the catalogue containing the list of exhibits can be compiled.

A few fanciers have already enered their dogs, including J. H. Davis' collie, Hector D.; J. F. White's bloodhound, Kentucky Pat, by G. Q. Smith's Boston Servier. Miss Marieta Fanchers of Boise, Idaho, has entered her kennel of old English sheep dogs, headed by Champion Lincoln Jap.

F. W. Allen's English bull, Briar Brittle, is also in the listed entries.

* * * *

Champion Wycollar Boy, a wire fox terrier, recently imported from England by Andrew Albright, Jr., of New Jersey, changed hands last week. The new owner of this crack little terrier is Mrs. Rainey, of the Conejo kennels in Los Angeles.

‡ ‡ ‡

It will probably interest local Irish terrier fanciers to know that one of the best in America is at present on the Pacific Coast. He is the property of Jack Bradshaw, of Beresford. The writer had the pleasure of seeing him last week. He has a head like an Airedale; a dark eye, and themuch desired stiff red coat.

‡ ‡ ‡

That the next bench show of the Portland Kennel Club will be held about the third week in April seems likely, from the present outlook, according to President Frank E. Watkins.

He has been going over the situation, and finds that there are at least two or three good locations, close in, where such a show can be held. It was this lack of such a place which prevented a show last year at any time.

Mr. Watkins has already written the Seattle Kennel Club officials asking them for the exact date of their show. He intends to hold one here the following week, and is under the impression that theirs will take place the second week in April. The San Francisco show will come two weeks later, it is believed, and there will undoubtedly be three or four others in California following this, at Oakland, Mill Valley, Los Angeles and other points.

J. J. McCarthy, secretary of the Portland organization, is in New York at present, but is expected home shortly. As soon as he returns, active preparation will be started on the selection of a site and other necessary arrangements which will have to be made, as soon as it is known that a suitable site has been located and secured.

Miss Jean Fourgens of Williams, Colusa county, owner of the S. V. Kennels, had the misfortune to lose by death her great young wolfhound Ylyo, which won best in class under 12 months and was one of the features of the Panama-Pacific Exposition show. Miss Fourgens, it is said, had practically arranged to send the dog East with Jack Bradshow.

J. W. Castenian has bred his Airedale bitch to King Ooorang.

H. C. Redwell of Whittier, Cal., has bred the Airedale bitch, Letty Hart, to Cyprus Cadet. Other bitches that have recently been bred to the Cadet are Yay Taylor's Sunbeam and Charley Heffernan's (of Stockton) Crewe Bonheur.

* * * *

Beginning February 23, and continuing for three days thereafter, there was held at the Auditorium at Saginaw, Mich., a Sportsman's Show under the auspices of the Saginaw County Sportsman's Association, of which H. A. Penney is the secretary and W. S. Linton chairman of the committee on the Sportsman's Show.

During this time also the Michigan Wild Life Conservation Association also held its annual meeting. The auditorium has a seating capacity of 4,500. Each of the three evenings addresses and moving pictures was given and shown by noted exponents of outdoor life.

Activity Among the Blue Rock Busters

SCHEDULED TRAP SHOOTING EVENTS.

Bay View figures on staging opening shoot at Alameda grounds on Sunday, March 5th.
Newly organized Alameda Elks Club, opening shoot at G. G. Club's Alameda grounds, Sunday, March 12.
San Jose Club's opening shoot at San Jose, Sunday, March 5.
Golden Gate Club's opening club shoot, Sunday, March 19.
Oregon State Shoot at Albany, Ore., on May 15, 16.

* * * *

At Golden Gate Club.—The Golden Gate Gun Club opened the season auspiciously on Washington's Birthday with a practice shoot at its new grounds in Alameda. A banner crowd, numbering over fifty, put in an appearance for the opening and thoroughly enjoyed the opportunity to sight once again at the tarhawks. Luncheon was served at noon and the gathering had one glorious good time. The attendance augurs well for thesuccess of the club's events this season.

The scores set up were creditable considering that the boys are somewhat out of practice. With the exception of one or two, all were at the traps for the first time in months and it will take a couple more shoots to put them in first class trim. O. N. Ford, the star from the San Jose Blue Rock Club, was a visitor and was high gun for 100 birds. He cracked 25 each in the first two frames and came through with 97 to his credit. Dr. McGettigan and Toney Prior were close behind with 94 each. R. Avery established a consistent 93 and C. A. Merrill got 89.

Some of the boys went in for heavy firing and shot over 100 birds. N. A. Howard started poorly with only 18 out of 25, but he struck his stride and landed 181 out of 200. Frank Webster went along fine for the first 100, getting 88, but he fell down in the next frame with an unlucky 13. Colonel J. W. Dorsey went for a 150 but grew tired in the last 25, which hurst his score. H. Stelling did not go under 20 once for a 135x150 mark.

Among the professionals, L. B. Hawxhurst was in fine fettle, as his score of 120x125 would indicate. He had a 96 for the first 100. Al Cook, C. Knight and J. Jones also showed to good advantage. To give an idea of how the individuals were shooting the following scores have been tabulated:

Shooter—	25	25	25	25	25	25	25	Bke.	Targ.
O. N. Ford	25	25	24	23	..	..	..	97	x 100

*Professionals.

* * * *

At Vernon Club.—A mysterious "dark horse" named Lee Williams, who shot out at Vernon a week ago and hung up a 90 per cent practice score, came out on top in the sixteenth fifty-bird handicap trap shoot staged Sunday morning at the Vernon Gun Club traps for the W. H. Wilshire trophy with a score of forty-nine broken birds out of the fifty thrown from eighteen yards.

Not only was the shooter mysterious, but the whole shoot was mystifying. L. D. Blanchard hung up a score early in the contest of a like number, and became so confident as the shoot progressed that he cleaned and packed his bird exterminator and started for home.

But in the meantime the scores kept rolling in from the forty some shooters entered in the competition, and when they had all been checked up Williams, who was one of the last to shoot, was found to have equaled the score of Blanchard.

No one had missed Blanchard, and when announcer Bill Pugh began calling his name in preparation for the shoot-off no answer came.

Inasmuch as trap shooting rules call for a shooter to stay on the grounds in a case of tie or forfeit, Blanchard incidentally forfeited his right to the Wilshire prize to Williams.

However, Williams said that beyond all probability he will be out on the grounds next Sunday, and if Blanchard is there he will offer to shoot off the match then, rules or no rules. Good luck to Williams—a regular sport, even though he is mysterious.

Three traps were put to work and 6100 targets were thrown. When three traps are working it means that fifteen shooters are firing almost at once.

Sixty-three shooters in all competed during the day, with a squad of small-bore cracks on the job. Captain DuBray, the small-bore king and a Parker gun representative, led the small-bore squad, which included Ed Hedderly, Connolly, McKee, Pete Peterson and Bill Dougherty of the Hoegee Company.

The fifty birds in the Wilshire competition also cover the scores on the four silver loving cups. Frank Mellus won in class A, Williams in class B, Peterson in C and Dunn in D.

Three women shooters were on the grounds Sunday and competed in the open event. Mrs. C. E. Groat hung up a score of forty-two "dead birds," while Mrs. Heine Pfirrmann broke fifty birds out of seventy-five thrown.

The complete scores follow:

Wilshire Handicap Competition of fifty targets—

Shooter—	Hdcp.	Targ.	Bke.
J. F. Dodds	20	50	37
Frank Mellus	21	50	48
Tuckett	18	50	41
Stanton Bruner	21	50	42

White	18	50	44
George Melford	18	50	39
Williams	18	50	49
Du Bray	16	50	21
Fullerton	17	50	39
Meek	16	50	46
Dunn	16	50	44
Dr. Packard	21	50	46
Mills	18	50	47
Donnelly	16	50	38

Open Event at sixteen yards—

Dodds shot at 50, broke 46; F. Mellus 200—173, Tuckett 100—88, S. Bruner 100—89, R. H. Smith 50—44, McKee 50—44, Bob Bole 50—28, D. Madeau 75—39, Lawrence 50—32, Voorhies 50—33, Famechon 100—83, Kunz 100—88, Foor 50—30, Manderville 75—58, Carpentier 25—76, Middleton 50—39, Van Nest 100—54, Connolly 75—48, Rapp 50—25, Adams 25—21, Pugh 50—39, Lou Mellus 75—61, Oliver 25—7, Mather 25—17, Evans 25—20, R. L. Hall 225—193, Guy Holohan 200—174, Hedderly 75—52, Blanchard 25—22, Brown 25—19, Council 25—14, Dougherty 50—44, C. E. Groat 75—62, Mrs. Groat 50—38, Harry Cline 25—15, Geo. Cline 50—35, J. Madeau 50—31, Shadwell 25—10, Grewell 50—41, Dehtre 50—41, Williams 100—91, Du Bray 25—19, Fullerton 100—78, Wilson 25—9, Braur 50—25, T. P. Smith 50—43, Kays 25—16, Meek 75—69, Dierdoff 25—19, P. E. Peterson 50—36, H. Groat 25—16, Dunn 50—40, Mrs. Heine Pfirrmann 75—50, J. C. Cline 25—18, Mrs. Olsen 25—15.

* * * *

Biggs Club Holds Shoot.—With a membership of 35 the Biggs Blue Rock Club has been organized and has already started the season's activities. Officers have been elected as follows: L. W. Doty, President; Vice-President, Leon Brink; Treasurer, J. D. Hanlon; Secretary, Alvin Harry; Executive Committee, W. B. Ellington, S. M. Arnold and W. E. Elder.

At a preliminary shoot held Sunday W. B. Ellington made the high score, breaking 19 out of 20 birds. L. W. Doty was second, hitting 18 out of 20 of the birds, while L. Albers was third with a score of 17 out of 20. L. Doty succeeded in making a score of 82 out of a possible hundred.

* * * *

At Portland Gun Club.—President A. W. Strowger of the Portland Gun Club has announced the conditions under which the Imperial Gold and Diamond medal will be shot for during the period beginning Sunday and ending June 5th. All members of the club are eligible to shoot for this prize, but it is necessary, however, that there be at least 10 entries every time it is shot for, and the second 25 targets are to count for this prize. It is also necessary that at least 10 shooters signify their intentions of shooting for the prize at any time.

Shooters are handicapped according to their own scores, that is, the added bird system is used and each shooter has a handicap of the difference between the number of targets he breaks and 23 birds. For example, if a shooter should break twenty out of 25 targets, the following Sunday he would have three targets added to the number which he actually broke. If he broke 22 it would give him a perfect score, and the next time he shot for the prize he would receive a handicap of one target. This gives all shooters an equal chance. L. Rayburn is the holder of the prize.

Eleven shooters faced the traps in the mid-week tournament of the Portland Gun Club, P. J. Holohan heading the trap men with 94 per cent, Dennis Holohan being second.

Two match races were held during the shoot, H. R. Everding beating Frank Templeton in the first event and Everding and Pete Holohan winning from Templeton and E. H. Keller.

The percentages: P. J. Holohan 86, D. Holohan 90, H. R. Everding 86, E. H. Keller 85, Jim Seavey 83, Frank Templeton 81, H. A. Derrick 81, J. G. Clemson 60, R. A. Fawcett 63, G. Bertz 38, and F. C. Moser 30.

* * * *

Eureka Club Shoot.—The opening shoot of the Eureka Blue Rock Club was held on the club grounds on Gunther's Island on Sunday, Feb. 20, and eighteen of the local trigger pullers faced the traps. Curtis O. Falk won first place on the regular club shoot of fifty birds with a score of 48x50. George Coleman was second with 47x50 and E. J. Robinson third with 46x50. Following are the scores that were made:—

Shooter—	25	25	25	25	Total
E. J. Robinson	21	25	..	..	...
Harry Kelly	17	23	17	23	80
Roy Poland	20	23	..	..	...
Al Shorkley	16	18	16	19	69
Ira Russ	20	21	23	23	87
Lou Everding	19	22	23	..	...
Paul Burns	21	22	14	17	74
Warren innes	23	22	24	25	94
George Coleman	24	23	23	..	...
Jas. Hutcheson	21	23	22	..	...
Myron Walsh	18	20	..	..	...
H. H. Rickelson	21	21	23	24	89
Henry Buhne	19	14	21	..	...
Harry Hinman	20	23	21	..	...
Curtis O. Falk	24	24	24	..	...
Charles E. Falk	22	15	..	..	...
H. W. Jackson	16	..	..	..	...
Charles C. Falk	22	22	..	..	...

Eureka, Cal. W. E. INNES, Secretary.

* * * *

Big Time Gun Club.—At a rousing annual meeting of the Big Time Gun Club, which boasts a membership of 157, held last week at Sacramento, Lee Gorman was again unanimously chosen president of the club. H. F. Stober was re-elected secretary and publicity agent. One of the liveliest years of the club's existence is promised. Monte Newbert was elected field captain and will have charge of the shoots and general activities of the club.

F. Biewener and J. Kestler were elected members of the board of directors of the club, a new feature of administration, which will be composed of the three officers and two other elective members. They will look after the general interests of the club.

John Schenk, who owns three acres of land on the Fruit Ridge road, again gave the club the use of his land for shooting purposes and declared that it would remain the property of the club for the rest of his life, so far as he knew. The property will be improved, fenced, alfalfa planted and a clubhouse erected before the next big meet, which will take place either in March or April, when it is expected the property will be fully improved. A number of new traps will be installed.

Following the annual meeting refreshments and a social time closed the session.

* * * *

New Grounds for Vallejo.—Judging from the enthusiasm displayed at the meeting of the Vallejo Gun Club last week, the trap shooters are in for the time of their lives this summer.

The committee on new grounds is not yet satisfied with its investigations and was given additional time to look over the field.

Plans for several inter club shoots were taken up. It is proposed to interest Napa and Cordelia in an early preliminary shoot and later on to have a Statewide competition here. Already quite a bit of interest has been manifested by the marksmen who would like to try out around the bay.

It was decided to install the standard legget traps on the new ground this year.

James V. O'Hara was re-elected president of the club. The other officers are, Vice-President, William Mann; Captain, J. W. Peckham; Lieutenant, Fred Leicke; Treasurer, C. L. Wisecarver; Secretary, Herbert Yocum.

* * * *

Alameda Elks' Club—The Alameda Elks Gun Club has been thoroughly organized and is ready for the opening shoot of the season at the Golden Gate Club's grounds on Sunday, March 12th. The club's monthly shoot will be held the second Sunday of every month. Tom Haskins has been elected president and Fred Hiller secretary. Prospects are for an assured membership of fifty. Many well-known shots, among them Jack Walker, Lou Schroder, Judge Weinmann, "Little Jeff" Dodd, Bill Ellis, H. C. Peet and the like, have joined. They are a bunch of good fellows who are ging in strong for the sport. Bill Ellis mentions that inasmuch as a deal of friendly rivalry has existed between the Berkeley, Oakland and Alameda lodges for some time past in baseball and bowling, why should not the neighboring Elks get together a club and try to clean the Alameda boys? Looks like it is a challenge.

Sportsmen's Row

Capt. A. W. DuBray was given a royal reception by the Los Angeles shooters on Sunday. The Captain is appreciated as an enthusiastic advocate of the smaller bore shotguns. He is an all-around good sportsman and boasts of a host of friends up and down the Coast.

* * * *

The Southern California Rod and Reel Club has events scheduled at Eastlake Park on March 12th, April 9th and May 7th.

* * * *

Clarence A. Haight, known as the "Father of Trapshooting on the Pacific Coast," is in the East for a flying trip on business. He is expected home within a couple of weeks and will be a familiar figure at the traps. The veteran has been shooting since the early eighties.

* * * *

Deputy Fish and Game Commissioner Henry J. Ables of Santa Maria reported two accidental shootings of hunters in Santa Barbara county in 1915, both through carelessness. Injuries from bursting guns are much rarer than purely accidental shootings, and constantly suggests the need of care in handling arms which make such horribly deadly wounds as shotguns.

* * * *

W. L. Evers, a cousin of Johnny Evers, the famous second baseman for the Boston Braves, is a bug on trap-shooting. He is a member of the Golden Gate Club and attends many of the tournaments.

* * * *

Walter Nagle, the famous Los Angeles baseball pitcher who is secretary of the Santa Rosa Chamber of Commerce, is taking an interest in reviving the sport alluring in Santa Rosa. New life will be instilled in the Santa Rosa Blue Rock Club and it is likely that blue rocks will be flying next month.

* * * *

Vernon Chaney, secretary of the Healdsburg Gun Club, is taking an interest in getting the Healdsburg shooters started again. Plans have been mapped out to install new traps and start the ball a-rolling again.

* * * *

Bill Saunders of Santa Rosa is said to be close to 85 years of age but he is one of the youngest when it comes to making the smoke fly out of the tarhawks. He shows a lot of pep and spirit at the traps.

* * * *

The fifth mid-winter banquet of the San Francisco Fly-Casting Club will be held at Techau Tavern on Thursday evening, March 2nd. F. J. Cooper is president and P. W. Shattuck secretary of the club, and P. M. Nippert is chairman of the banquet committee.

* * * *

The members of the Golden Gate Gun Club are tickled with the new grounds. They say they are the best the club has ever had and everyone knows the club has had a few homes. Work will commence shortly in building a clubhouse on the new grounds so as to accommodate members and their friends.

* * * *

J. A. Cook paid a visit to Vallejo the other day and was impressed with the outlook for a banner trapshooting season. Billy King told him that the Vallejo Club will extend the club's hospitality to all visiting shooters.

* * * *

Talk about big bears—James McGuire, known affectionately by the boys of the San Francisco Press Club as "Government," declares that last year in Modoc county a couple of Indians killed one that weighed 783 pounds. Some bear, that, and "Gov" says it is an honest-to-goodness fact.

* * * *

Americans arriving from Scotland say that practically no hunting is being done in the Scottish game fields, the majority of hunters having gone to the war or being too busy to engage in their favorite sport. As a result of this the country is overrun with grouse, partridge and other game.

* * * *

Joseph Howell, a well known hunter of the mountain section near Dunlap, killed one of the largest grizzly bears seen in this vicinity for years, during the past week. The animal was shot near Camp Kanawyer, and is as tall as an ordinary man when standing upright. Grizzly bears are not numerous in the mountains here, and when a hunter secures one as a trophy of the hunt, it is considered quite a record of marksmanship, as they are not only wary of appearing in sight of men, but the cold weather has driven much larger game down from the high mountains in search of food.

* * * *

Plans are under way for a series of shoots throughout the country this summer for members of the Boy Scouts of America. The boys will be taught how to hold the gun and the little things to know about trapshooting, and some day the experience may come in useful.

* * * *

Albany, Oregon, has been selected as the place for holding the annual state shoot of the Oregon State Trapshooters' Association and May 15th and 16th have been fixed as the dates, the shoot to take place on the grounds of the Albany Gun Club.

William Cole is the latest victim of the vigilance of Game Warden Ray O'Connor. He was fined $25 by Justice Mulroy for having deer meat in his possession at a time of year when it is unlawful to be the possessor of such food.

Cole informed the game warden that deer meat made excellent bait for coyotes and that the only reason he killed a deer out of season was to secure the proper bait for the traps he has set all over the country in the vicinity of his home in an effort to ensnare the coyotes that have become a pest in his neighborhood. Considering the purpose for which Cole killed the deer, Justice Mulroy considered the circumstances extenuating and lessened the punishment.

* * * *

Jerry C. Horn of Humboldt county proved to be the State's champion huntsman during the month of January, according to the records of State Controller John S. Chambers, who paid $380 in bounties on mountain lions for the month. Horn killed seven of the nineteen mountain lions captured in the entire State and received therefor from the State $140, a respectable month's wages, to say nothing of the value of the pelts.

Tuolumne county furnished four of the total killed and Siskiyou two. The following counties are credited with one lion each during the month: Mendocino, Tulare, Kern, Nevada and Placer.

* * * *

The old system of using half blue rocks and half whiteflyers at the Grand American Trapshooting Handicap has been changed, and white flyers exclusively will be used at St. Louis in August. The western automatic traps also will be used. The shooting park is equipped with these traps and, therefore, the club will be at no expense in observing the rules.

* * * *

The heavy snow in the west and northwest sections of the United States has resulted in covering up the natural food of quail and other game birds. Game wardens have been reporting to their State Commissions that thousands of birds are starving. The National Association of Audubon Societies, co-operating with the Department of Agriculture, has been sending funds to various state societies for the purchose of grain to feed the birds.

Also the post office department, co-operating with the Biological Survey, has permitted mail carriers in certain sections of the country to distribute grain to the birds.

* * * *

At the shoot held by the Roseburg Gun Club at Winchester on February 12th, Roy Miller, a druggist of that place, won the grand prize medal. Mr. Miller and Steve Pearson tied on the first event with a score of 25 birds each. On the second trial they tied again with 23 birds each. On the shoot-off Miller broke 23 out of a possible 25 birds, while Pearson broke 23.

* * * *

Mr. C. E. Christely, the Mill Valley lumberman and a party of his friends had a good day's fishing off Mussel rock on Sunday. Mr. Alfred Nilson, who caught the first salmon this season on Saturday, knew just where to find the fish and every man in his launch came home with a big prize.

ALASKAN HUNTER AFTER VARMINTS.

Arthur Ruppel, an Alaskan big game hunter and sportsman's guide, has been in Los Angeles for surgical attention, and being one of those chaps who choke for air amidst the skyscrapers, has been "batching" it between whiles over toward Lee Avery mountain off the Ridge road, between Los Angeles and Antelope valley.

Ruppel knows the signs, and says there are more "varmints" up that way than any one seems to realize. He wonders why some of our big game hunters do not take advantage of the next tracking snow and turn a few Airedales and hounds loose with him in that country.

Ruppel says it is almost a certainty of getting a lion or two, and cats and coyotes in plenty, as no one seems to have been bothering the pests thereabouts. Any one wanting further information or to arrange for a hunt with him can reach him by general delivery for a few days. Ruppel has had much bear experience up North.

Casting at Los Angeles.—The Southern Rod and Reel Club held a highly successful casting contest at Eastlake Park, February 6, before a crowd of at least 500 interested spectators. Joseph Welch, a veteran caster from the Crown City, and E. M. McKeany of Medford, Oregon, participated in the fly events. E. J. Kennedy really made the best showing of the day, for though Charles Van Horn, who crowded him closely, had three firsts to Kennedy's two, the latter's showing in other events more than offset this seeming advantage. Following are the scores:

Dry fly accuracy, scores per cent: Charles Van Horn 98.3 E. J. Kennedy 96.8, Joseph Welch 94, J. J. Lowe 88.6, E. M. McKeany 84.

Heavy tackle accuracy, scores per cent: E. J. Kennedy 98.8, Charles Van Horn 98, E. M. McKeany 97.4, J. J. Lowe 94.

Heavy tackle distance fly, scores in feet: Charles Van Horn 83, E. J. Kennedy 81, J. J. Lowe 73, Joseph Welch 72.6, E. M. McKeany 72.

Roll fly, scores per cent: Van Horn 70.6, Kennedy 65.6, Welch 60.

Half-ounce accuracy bait, scores per cent: C. J. Lenarth 98, Oscar Lane 97.2, A. E. Perkins 96.8, Sherman Baker 96.7, H. A. Richey 96.2, Lowe 96, Kennedy 95.8, Eugene Herman 95.5, A. Greenbaum 90.3.

Half-ounce distance bait, scores in feet: Kennedy 178, Lane 171.2, Eugene Herman 132.2, Lowe 98.7, Sherman Baker 86, C. J. Lenarth 43.2.

Longest single cast, Oscar Lane, 225.6 feet.

Two and one-half ounce distance bait, scores in feet: A. E. Perkins 191.09, Sherman Baker 188.01, C. King 127.01, C. F. Stancliff 117.10.

Longest single cast, A. E. Perkins, 268 feet.

REGISTERED TRAP SHOOTS.

Editor, Breeder & Sportsman:

Following is an advance list of Tournaments that have been registered to be held up to and including April 5th.

No more bulletins will be issued until the complete list of applications have been passed upon:—

Ogden, Utah.—March 17. Utah State Sportsmen's Association, A. R. Bain, Secretary.

Chapman, Kans.—March 17. Chapman Gun Club, Henry Wadick, Secretary. ("Old Policy.")

Coatesville, Pa.—March 22. Coatesville Gun Club, G. E. Dietrich, M. D., Secretary.

Guantanamo, Cuba.—March 25. Red Cross Gun Club, of U. S. S. Solace, F. P. Williams, P. A. Paymaster, U. S. Navy, Secretary.

Hartford, Conn.—April 1. Housatonic Rod & Gun Club, L. W. Burgess, Secretary.

Lincoln, Nebr.—April 5. Lincoln Gun Club, O. D. Beemer, Secretary.

Concordia, Kans.—April 5. Blue Ribbon Gun Club, J. F. Caldwell, Secretary. ("Old Policy.")

THE INTERSTATE ASSOCIATION,
E. REED SHANER, Secretary.

Pittsburgh, Feb. 19.

Telegraph Trap Shoot.—Mrs. C. O. O'Connor, Mrs. Fred Dryden and Mrs. B. LeMar of Spokane defeated a team of Portland women Sunday, Feb. 20, in a special telegraph trap shoot. The Spokane women shot over the Moran traps and scored 51, while the best the Portland women could do was 35.

The scores follow:

The Portland women's scores—

Mrs. Ada Schilling 16, Miss Gladys Reed 11, Mrs. E. H. Kellar 9; total, 36.

Spokane women—

Mrs. C. O. O'Connor 23, Mrs. F. A. Dryden, Mrs. B. LeMar, 16; total, 51.

BLACK BASS SEASON TO OPEN.

The open season for black bass will open in Districts three and four on March1st. Districts one, two and twelve do not open until May first. The open counties include Contra Costa, Alameda, San Francisco, San Mateo, Santa Cruz, Santa Clara, San Benito, San Luis Obispo, and that portion of San Joaquin, Stanislaus, Merced and Fresno lying west of the San Joaquin river and the open fishing waters for bass in District four are San Bernardino, Riverside, Imperial, San Diego, Los Angeles, Orange, Ventura and Santa Barbara.

WILSON SNIPE BREED IN CANADA.

Fortunately the breeding grounds of most of the Wilson snipe are in Canada, where the birds are protected by both law and custom throughout the nesting season. Moreover, their nesting sites are on land that will not for many years, possibly not for several generations, be used for agricultural purposes.

Hence there is provided in Canada an enormous and favorable breeding area for these game birds, a region which formerly supported a snipe population many times more numerous than at present and which will continue to return to us in the United States each fall a liberal increase on whatever numbers we may allow to cross our northern border in spring.

The snipe has suffered in numbers probably more severely from spring shooting than any other shore bird. In spring migration it is not confined to any special district, as the coast or large bodies of inland water or the plains, but it occurs over nearly every square mile of its range, and in the past has run the gauntlet of gunners throughout the whole course of its northward flight.

Snipe shooting is at its height early in March in the central part of the South and early in April in the region just south of the breeding range; but pursuit ceases and security comes at the northern boundary of the United States.

Our Canadian cousins have set us a most praiseworthy example in absolutely abolishing spring shooting; once the snipe has escaped beyond the fire of Uncle Sam's gunners it is safe from human molestation throughout the nesting season and until it begins the fall migration.

It is uneconomical, to say the least, to kill birds in March and April while on their way to the breeding grounds, for if left undisturbed they will certainly return six months later with 50 to 100 per cent increase in number.

WELLS W. COOKE,
Assistant Biologist, Bureau of Biological Survey.
Washington, D. C.

FRED BURNHAM'S HAWAIIAN FISHING TRIP.

In the early morning of January 15, Fred K. Burnham of Martinez, California, a member of the Catalina Tuna Club, big game hunter, speed boat enthusiast and all-round sportsman, and the writer, started in a Japanese motor sampan for the fishing grounds off Molokini—a volcanic rock distant eight miles from the quaint Hawaiian fishing village of Maalaca Bay, on the Island of Maui.

As soon as the boat got under way, trolling was commenced with two regulation sixteen-ounce rods and twenty-four thread cuttyhunk lines. Nine minutes after leaving the wharf we had two strikes. Nothing but the heads of the tempting bait—a fat opelu (the native mackerel) were left on the No. 9 tarpon hooks. Two finny monsters had played with fate for two tasty morsels. As the deeper waters off Molokini were approached, and with the engines slowed down almost to a crawl, Burnham got a strike which took 400 feet of his line.

He succeeded in stopping his fish, and by vigorous "pumping" he reeled in a couple of hundred feet of line; the fish—a magnificent specimen of ono—then broke water.

The fierce rushes and downward plunges of the monster taxed all the skill of Burnham for thirty minutes. The fish measured five feet four inches in length.

The writer got the next strike—a forty-five pound dolphin, four feet, six inches in length. These fish are exceedingly fast swimmers, keeping to the surface after striking, and making a succession of leaps high in the air in a vain attempt to shake off the hook.

The sampan was stopped and anchored in 150 fathoms of still water, within 200 yards of the northeast point of Molokini Island.

After ten minutes of wily tactics, a leaping tuna struck at Burnham's bait with a straightaway rush which made the reel fairly screech. Five hundred feet of line went over the side of the boat quicker than it takes to relate it, and then the fish sounded. For twenty-one minutes it was a test of endurance between an experienced game fisherman and the bull dog of the ocean making a gallant fight for liberty. The fisherman won, and he was rewarded with a sixty-pound bluefin tuna, for which sportsmen have traveled half way around the world to capture.

With the engine speeded up to five knots an hour trolling was tried around the island. I landed a seventeen pound ulua of the pompano family, a very gamey fish; this was followed by a well hooked long fin tuna. Before this fish could be reeled up to the side of the boat for gaffing, four sharks attacked it, and only the head was gaffed. From the size of the head, however, the fish would have weighed from forty to fifty pounds.

Then it was Burnham's turn to add to his laurels. He struck another ono. He had hooked a tartar. With six hundred feet trailing over the stern of the sampan there came a sudden check, then a furious jerk of the line and the fight seemed to have ended. Carefully reeling in his line to avoid surprises, Burnham brought to the side of the boat what would have been a perfect specimen of this Hawaiian game fish had not the sharks done their work. Four chunks had been bitten from the sides and upper portion of the tail as if carved by a butcher's knife.

The fish measured six feet and took two men to pull it aboard after gaffing.—H. Gooding Field, in S. F. Examiner.

FISH TRAPPING APPARATUS DISCOVERED.

In the discovery of a complete fish trapping apparatus including twelve traps and 700 feet of lines in the San Joaquin river and sloughs, State Fish and Game Deputies Sam Ellis and A. H. Brown believe that they have found the equipment of the gang of game violators who operate the so-called "underground" marketing system.

Following the arrest and conviction of E. J. Otley in Judge Smith's court last week, and the charges brought against W. V. Davis, for having black bass in their possession, the game officers made a diligent search of their stamping grounds with the reward in the discovery of the equipment.

Otley was fined $50 and given 100 days in the county jail. Davis, his companion, pleaded not guilty.

STEELHEAD ANGLING IN OREGON.

Steelhead trout are occupying the center of the piscatorial stage in Oregon just now and are billed to continue until March 20. The other varieties of trout will not be much in evidence until April 1. Steelhead fishing is good on the Sandy River from Troutdale to the point where the Bull Run River empties into it, notwithstanding the snow. The Bull Run River also affords good fishing. On the Columbia River, going east from the Interstate bridge, many fishermen can be seen casting for steelheads. Some of the best fishing in the state is to be had on the lower Nehalem River, near Battersea. Reports of good fishing come in from Big Creek, and Seaside anglers are enjoying some good sport with the gamy trout in the Necanicum River, which runs through the town. Many local anglers are waiting for the Spring chinook salmon fishing at Oregon City, which is best throughout April and May, but starts on March 20. The salmon Club of Oregon is encouraging fishing with a six-ounce rod, not shorter than five feet, and a line to test not over eighteen pounds. On this point they are taking after other large clubs. Fishing in this way makes the sport harder and creates better sportsmanship. A bronze button is given to every member of the club catching a twenty-pound salmon; a silver button for a thirty-pounder, and a gold button to every member catching a forty-pounder.—O. C. R., in American Field.

184 Species of Fish in California

GREATEST VARIETY OF ANY STATE IN THE UNION

There are 184 different species of edible fish in the waters of California, according to the report made this week by George Neale, assistant fish and game commissioner for Sacramento. Of this number 52 different kinds inhabit the fresh waters of the State, while the remaining 132 may be found in the bay of San Francisco and in the waters of the Pacific along the coast.

"California has more different kinds of fish than any other State in the Union," said Neale, "principally because the waters are adaptable to the fish of any other climate, and because of the excellent system of protecting the water game of the State. California is now the angler's heaven, and it will not be long before the State will have a reputation for fish second to no country in the world."

The Eastern States have done much toward increasing the number of kinds of fish to be found in California waters. In fact, there is no State, according to Neale, which boasts any important fish which has not contributed to California. The introduction of foreign fish to California commenced as early as 1871, when Seth Green brought 100,000 shad, which were planted in the Sacramento river at Tehama the day they arrived. Now the State has more shad than it can dispose of on the markets. In 1872 carp was introduced from Germany, and later a large shipment from Japan, from which the waters of the State became well supplied with what is now one of the standard market species.

In 1877 eighty-eight adult trout were planted in Sutterville Lake at Sutterville and about Alameda. The first eastern brook trout came in 1872 from the United States fisheries in Michigan and were planted in various parts of the State. In the same year the first consignment of white fish came from Washington, D. C., and were distributed throughout the state. They are different from the native white fish. Eels were planted in the Sacramento river in the 80's, but were never a success. Catfish were introduced from the Mississippi valley and New Jersey along about the same time and have developed into one of the most numerous fish of the Sacramento and San Joaquin rivers. They were planted first near Stockton. Later, 305 Atlantic salmon from the coast of Maine were introduced into California waters, being planted near Redding.

Black bass first came from Lake Champlain in 1891, 620 being planted in the Feather river near Gridley. Striped bass were introduced into the State in 1879 and were planted in the straits of Carquinez. Landlock salmon came from the United States fisheries in 1878, while yellow perch were introduced in 1891 and were first planted in the Feather river. The crappie or blue gill sunfish came to the State in 1908 and has thrived in all waters of the State. The United States sent to California 100,000 Mackinaw trout from Michigan only a few years ago and these now inhabit Lake Tahoe and other mountain waters.

The fact that the waters of the State are adaptable to practically every fish of any other climate leads members of the commission to believe that at the present rate of increase in the number of species of fish it will not be long before fish of every water in the world will be found in the streams and along the coast of this State.

NEW YORK RECOGNIZES TRAP SHOOTING.

The recognition by the park commissioners of trap shooting as a sport by the setting aside of two acres of ground in the northeastern section of Van Cortlandt Park for the devotees of the sport is another indication of the marvelous growth of the pastime. New York is the first city to realize the importance of trap shooting, and the necessity of having public traps. Many cities have municipal tennis courts, gridiron and baseball fields, and some few have established golf links, but the trap shooter has no place in the public parks where he can bang away at the clay birds. Now he is coming into his own. No sooner had the New York commissioners granted the shooters permission to go ahead with their plans for the erection of a $10,000 clubhouse than Chicago launched a boom for public traps in Grant Park.

This New York proposition was engineered by C. T. Summerson, secretary of the White Plains Gun Club. He formed the Greater New York Gun Club, which now has 500 members. The organization should be the largest in the country within a year. The largest at present is the Chicago Trap Shooting Club, with 600 members. The park commissioners have given the club a 10-year permit for the use of the park, but also stipulate that the shooting will come under the supervision of the commissioners. Any citizen may join the club, and the dues will be small. Three days of the week will be set aside when only the members of the club will be permitted to use the traps. The other three days will give the general public a chance to try their accuracy and skill in hitting the blue rocks.

Schuetzen Club Scores.—The California Schuetzen Club held its monthly shoot Sunday on the club range, California Schuetzen Park, San Rafael. Charles Ott, veteran marksman of the club, won first prize with a score of 69. The best scores:

Re-entry target—C. Meyer 219, 211, 206; F. Muhlebach, 217, 214; L. Wille 214, 213, 202; J. Frei, 210, 200; J. Utschig, 209, A. L. Ott 208, 184; J. R. Stalder 204, 190, 186; Charles Ott 200, 200, 194; J. H. Millett 195, 180; O. Burmeister 194, 189; M. Flynn 194, 182; Joseph Straub 183, 172; A. von Wyle 169, 163; Hilmer Pape 161, Joseph Capelli 160, 146.

Monthly bullseye—C. B. Morris 32, J. Utschig 74, O. Burmeister 230, V. von Hartwig 643, A. von Wyle 655, H. Schroder 692, J. Stalder 760, L. Wille 773, A. Strecher 880, C. Meyer 891, A. H. Pape 905, O. A. Bremer 981, Charles Ott 1020, H. Pape 1073, A. L. Ott 1125, John Frei 1325, J. Capelli 1412, J. S. Leutenegger 1415.

* * * *

The Lake Park Trapshooting club of Milwaukee, Wis., following the lead of the Greater New York Gun Club, has asked permission of the Milwaukee Park Commission to erect quarters and traps along the lake front. The shooters offer to bear the expenses of the improvements and will allow the park commissioners to supervise the sport.

* * * *

The Nebraska State Sportsmen's Association will conduct its annual tournament on May 23, 24 and 25, at Grand Island, Neb., the State Championship shoot being held on the final day.

SCORES OF SPOKANE SHOOT.

George K. March was high man in the Spokane Gun Club shoot for the Hy R. Everding trophy Sunday, Feb. 12th, over the Moran prairie traps. The scores follow:

Twenty yards—March 23, Schriver 22, T. Ware 21, McElroy 17, Little 14, Cochran 21, Dryden* 19, Perret* 19, Matthews 19, O'Connor 13.

Nineteen yards—Brown 21, Wieseman 21, C d'A. Tiffany 16, Mrs. Dryden 19.

Eighteen yards—Fleming 17, De Long 16, Blosser 22, Miles 18, F. C. Ward 18.

Seventeen yards—Clarke 19, A. C. Ware 14, Miss Lamar 17, Grant Ware 16, Hurley 14.

Sixteen yards—Grimmer 13, Gilbert 17, Allen 13, Mann 18, Buchanan 16.

AVERAGES OF OREGON SHOOTERS.

Peter H. O'Brien of Portland was the leading amateur trapshooter in Oregon during 1915, according to the official averages issued by the Interstate Association. O'Brien's average was .9593. Lucian Rayburn, winner of the state championship and also of the Imperial Diamond medal, was second to O'Brien, with the percentage of .9472. Frank Van Atta and E. P. Troeh were tied for third place.

The veteran Pete Holohan topped the "shooting salesmen" with the percentage of .9403 and Jim Bull was next with the mark of .9211.

Miss Gladys Reid heads the women shooters, her average being .6644.

Indications are that the Last Chance Gun Club of Oroville citizens has won a final victory in its fight with the Wild Goose Country Club composed of Sacramento and San Franciscans, for the duck preserve on Butte Creek, near Gridley.

Monday was the last day on which the Wild Goose Country Club could register a protest against the granting of a patent to the Last Chance Gun Club to the 15-acre tract in question.

W. T. Baldwin, President of the Last Chance Gun Club, has received a certificate of approval from the Surveyor General's office. This certificate says the Last Chance Club will be granted a patent to the preserve in a few days.

It is considered likely the granting of the patent will throw out the injunction case now pending in the local Superior Court.

THE FARM

TO PICKLE PORK.

The side pork, cut in strips about six inches wide, should be packed closely in a large crock, with the pieces standing on edge, and salt sprinkled between the layers. Let it settle for two or three days, and then pour over it the pickle made as follows:

For each 100 pounds of pork take five ounces of saltpeter, eight pounds of rock salt, 3 gallons of boiling water. Cool before pouring over the meat.

Pork salted in this way, and then smoked, makes excellent bacon. If the brine should show signs of spoiling, pour it off, boil, cool, and pour over the meat again.—Farmer's Wife.

RANGE HORSES AS WAR STEEDS.

[Concluded from last week.]

As the demand has increased the requirements are a little less rigid than at first; horses that the inspectors turned down at a glance, when the buying first began, are now often accepted gladly. This will continue to be the case as the demand increases and the choice stock is cleaned up.

Just before the war was started the value of American horses exported to Europe for the year is given at three million dollars. With one year of fighting the value of exported horses leaped up to $63,816,500. The value of mules exported the year before war began was $580,000. A year's fighting shows an increased value of the long-eared beasts exported to be $12,700,000. The English government pays the best prices, and France is next and recently placed an order of $1,000,000 for American horses. Five thousand head of this order was to be delivered within 60 days.

Prices paid for Western army horses are: For heavy artillery, $186 light artillery, $165, and for saddlers, $135 per head, passing inspection as above.

The W. E. Morse, J. C. Gupton, E. L. Fitch and T. W. Matthews herds, and Senator Chassell at Gillette, have supplied large numbers of horses for the allied armies at from 1,000 to 1,500 pounds weight, and none of these had ever eaten anything other than range grass.—Farm and Ranch.

GOMBAULT'S
CAUSTIC BALSAM

A safe, speedy and positive cure for

Curb, Splint, Sweeny, Capped Hock, Strained Tendons, Founder, Wind Puffs, and all lameness from Spavin, Ringbone and other bony tumors. Cures all skin diseases or Parasites, Thrush, Diphtheria. Removes all Bunches from Horses or Cattle.

HIGH-CLASS TROTTING BRED COLTS FOR SALE.

No. 1. Three-year-old filly sired by All Style, dam Dr. Hicks. This filly is registered.

No. 2. Two-year-old colt, full brother to the above.

No. 3. Two-year-old filly sired by Dan Logan, dam a Wilkes mare who was a great natural pacer but unfortunately was crippled by a barbed wire accident as a yearling and was never worked.

The All Styles are large, strong built, with all the style of their sire, perfect in action, and all three of the above colts should make race horses second to none. The Dan Logan filly is perfectly gentle to handle and drive and is a high-class filly in every respect. Apply to or address,

I. F. EATON, Chico, Cal.

FARMS FOR SALE

Choice Land in Idaho

Lewiston, Idaho, is situated at the forks of Clearwater and Snake rivers and has transportation to the coast.

960 acres 7½ miles from Lewiston, Idaho, 4½ from Lapwai, Idaho, on main traveled road, all in cultivation except about 15 acres, all level land, just a little rolling, 320 acres of fall wheat in, 225 acres fall plowed for spring crop, about 30 acres in alfalfa. All fenced and cross fenced. Two good springs with big cement water troughs, well, windmill and cement reservoir, water piped to house, 7 room house, hot and cold water and electric lights. Large horse barn with hay mow in the center, electric lights in barn; cow barn with two box stalls; hog pens, shade trees, chicken houses, blacksmith shop, wagon shed, granary, outdoor cellar with bunk house overhead. $85 per acre; will take one-third down, time on balance to suit purchaser, at 7 per cent interest. One-third of crop goes with place if sold any time up close to harvest. Mild climate, can raise all kinds of fruit, grain and vegetables. Wheat in this country goes from 35 to 65 bushels per acre, barley 40 to 80 bushels per acre.

320 acres 4½ miles south of Vollmer, Idaho, 275 acres in cultivation, balance in pasture and timber, farm land lays practically level, one-third of crop goes with place if sold before harvest. Some fall wheat already sown. All fenced and cross fenced. Quarter section of it fenced hog tight; good four-room house, wood shed, and out of door cellar, nice grove around house, well at house, fair stabling and out buildings, spring and spring creek close to barn, three springs on place. Price $70 per acre, one-third cash, balance at 7 per cent. Time to suit purchaser.

238 acres 4½ miles from Lewiston, Idaho, 175 acres in cultivation, 25 more can be cultivated, balance good bunch grass pasture, fenced and cross-fenced, good spring creek runs across place, small house, station on place for Johnson R. R., two grain warehouses at station. Price $70 per acre, one-third cash, balance at 7 per cent. Time to suit purchaser.

160 acres of timber land, good farm land when timber is cleared off, all can be farmed except about 2 or 3 acres. Good timber, yellow pine and fir. Price $4000. 40 miles from Lewiston, Idaho. Well located to log off.

240 acres 6 miles from Asotin, 12 miles from Lewiston, Idaho, about 75 acres in fall wheat, about 75 acres more can be cultivated, balance in bunch grass pasture, two springs, small house, all fenced. Price $40 per acre, one-third cash, balance at 7 per cent. Time to suit purchaser.

BEAUTIFUL BELVEDERE

LOTS FOR SALE

CORINTHIAN ISLAND Subdivision to Belvedere is the most beautiful spot on the shores of San Francisco Bay for a suburban home. It commands an extensive view of the City of San Francisco, Alcatraz and Angel Islands, Raccoon Straits, San Francisco Bay, Richardson's Bay, the Berkeley shore, beautiful Belvedere and Mt. Tamalpais. It is in Marin County, directly opposite San Francisco, and forms the eastern shore of Belvedere cove. It has a naturally terraced, sunny, western slope that is well adapted for many choice residence sites, every one affording most picturesque views of the bay and mountain. It is protected from the prevailing western trade winds in summer by Belvedere Island, and from the southerly storms in winter by Angel Island. The soil is fertile and part of the island is well wooded.

It is less subject to fog than any other place near San Francisco. The summer fog, as it rolls in from the ocean, splits on the western slope of Sausalito, part of it flowing in a line with Angel Island towards the Berkeley shore, and part of it along the southern slope of Mt. Tamalpais, leaving Belvedere, Corinthian Island and Raccoon Straits in the bright sunlight, while the fog banks can be seen as a white wall both to the north and the south.

There is very little available land about the shores of San Francisco Bay that is desirable for homes, especially for those who love boating and kindred sports. The Alameda and Contra Costa shores of the bay are the lee shores and receive the full brunt of the boisterous trade winds which lash the shoal waters near the land into muddy waves, making boating both unpleasant and dangerous. To the north of the city and in Marin County the land from Sausalito to the entrance of the bay is a Government reservation and will never be placed on the market. The shores of Richardson's Bay are not at present convenient to boat service and, aside from Belvedere and Corinthian Island, there is little or no land near any ferry landing that possesses the natural advantages, improvements and possibilities that are offered on Corinthian Island. Concrete roads, pure water, telephone service and electric light wires are already installed. It is only ten minutes' walk from any point on the property to Tiburon boats, and but forty-three minutes' ride to the foot of Market Street.

On the point of Corinthian Island the Corinthian Yacht Club has had its home for many years, and on any summer day the white sails of its numerous fleet add to the charming scene, as the trim yachts glide about the cove. Excellent fishing of all kinds for bay fish, including salmon, the gamey striped bass, rock fish and the toothsome silver smelt, is to be had in the cove. There is probably no spot so accessible and in such close proximity to any large city in the world that offers the attractions of climate, magnificent scenery, fishing and boating as will here be found.

TRUE KINNEY 2:12¼ AND WALTER MABEN

True Kinney 2:12¼

- Kinney Lou 2:07¾
  - McKinney 2:11¼
    - Alcyone 2:27 (by Geo. Wilkes 2:22)
    - Rosa Sprague (by Gov. Sprague 2:20½)
  - Mary Lou 2:17
    - Tom Benton 15705 (by Gen. Benton 1755)
    - Brown Jenny (by David Hill Jr.)
- My Trueheart 2:19¾
  - Nearest 2:22¼
    - Nutwood Wilkes 2:16¼ (by Guy Wilkes 2:15¼)
    - Ingar (by Director 2:17)
  - Camma
    - Norway 5325 (by General Benton 1755)
    - Camilla (by Ky. Prince 2470)

To the man in any way familiar with pedigrees, only a glance at the above tabulation is required for ample proof of my claim that True Kinney is one of the best bred young horses in the land. The man who has a leaning for "production and performance" along with the "pedigree" will find both here in ample profusion. Every dam appearing above is a producer in her own right or through her daughters, while the sires represented are the greatest that have been known. The families here intermingled are of the "breeding on" variety, and no grandson of McKinney has a better right to greatness as a sire.

Mr. Horsebreeder, Let Me Talk To You Just A Few Moments

I am offering for sale, priced to go quick,

The Superb, Standard Bred Trotting Stallion

True Kinney

Winning Race Record (4) 2:12 1-4

of the same generation of the McKinneys who have sired

MARY PUTNEY (3) 2:05½

World's Champion Three-year-old Trotting Filly

ROBERT FRISCO (4) 2:05¾ — **SAINT FRISCO (4) 2:07¼**

NORTHSPUR (3) 2:09¾ — **LITTLE LUCILLE (3) 2:09**

VERNA McKINNEY (2) 2:13 — **NATALDAY (2) 2:13½**

Fastest two-year-old pacing filly 1915 — California's Champion Colt Trotter

and many other famous performers

I am not in the stallion business and do very little racing and so have no real use for this horse, but I want him to go into good hands and I am pricing him so that he will more than pay for himself this season.

TRUE KINNEY is a son of that great race horse and successful sire Kinney Lou 2:07¾ and is a "True McKinney" all over, a broadly built horse of deep body, squarely set on short legs, a pure gaited trotter and a horse of perfect disposition in harness or out. He is almost an exact likeness of his illustrious sire save that he has more size, more bone and more substance as a race horse. He was a first class two-year-old trotter, winning two events including the Canfield Stake and taking a winrace record of 2:19, also being second in the State Fair Futurity and third in the Breeders' Stake. As a two-year-old he made a money winning campaign and as a four-year-old engaged in a series of ten hot battles against first class trotters from start to finish, taking a winning record of 2:12¼ and being second in faster time. Every man who saw him race can attest that at all times he was a game race horse.

His first crop of colts, now two-year-olds, sold for high prices and every one broken as a yearling showed natural and extreme speed, coupled with almost every other desirable quality such as size and individuality, soundness and intelligence. Johnny Ray has three at Cleveland, all fast youngsters; A. W. Longley and Sutherland & Chadbourne have others at Pleasanton that are showing famously, and R. D. Mayes of Dixon has one he paid $300 for at auction a year ago and which is one of the best prospects in California.

TRUE KINNEY has been fired and has had a long, beneficial rest. I am confident that he will train and race sound in the hands of any competent man. His legs are cool and hard, his feet are perfect, and he is in the pink of condition in every way — being jogged daily and ready for training or stud duty. He will be shipped to any man that buys him fully equipped for the journey and accompanied by a first class man. He is a credit to any horse breeding community either in this country or Australia or New Zealand and the price is $700.00. He can be seen here in Seattle and I will be glad to give any man any other information concerning him not contained herein. Address for all particulars

Harpers Weekly and The Breeder and Sportsman

$5.50 WORTH FOR $3.25

Breeder and Sportsman

One Year, 52 Copies, Regular Price $3

THE BREEDER AND SPORTSMAN is the oldest weekly journal devoted to the Horse west of Chicago, having been established in 1882. This interest, together with the Kennel, Gun, Fishing, Coursing and kindred sports receiving the most attention in its columns; together with Agricultural and Dairying Departments, under whose headings especial attention is paid to the breeding, etc., of Cattle, Sheep, Hogs, Poultry, and all other animals connected with stock raising.

As an advertising medium to Racing Associations, Horsemen, Stock Breeders, Manufacturers of Sulkies, Carriages, Wagons, Agricultural and Dairying Implements and Machinery, Sporting Goods, Fanciers, Stock Foods, and all others desiring to bring their wares to the attention of the classes to whose interests the paper is devoted within the field mentioned above, the BREEDER AND SPORTSMAN will be found indispensable.

Harpers Weekly

Six Months, 26 Copies, Regular Price $2.50

At no time has it been so evident to Americans as now, that the most important thing in the lives of all of us is the progress of the European War.

Next to your daily bread the war interests you most vitally. It may even come to be the most important part of your problem of living.

The periodical of greatest fundamental interest to you today is the one that can best report those phases of the war that come closest to your country and you.

Because of connections abroad and at home, HARPER'S WEEKLY is that publication.

As a critical commentary that presents inside facts, it is the necessary bridge for intelligent readers between the daily newspaper and the monthly review.

You want HARPER'S WEEKLY now. You can get it now on trial at a remarkable reduction.

Send $3.25 Now and Get Them Both

THIS OFFER is made to all who will send us $3.25 before March 31st, 1916, whether for extension of subscription, renewal of subscription or a new subscription. Address:

THE HIGHEST YEARLY AMATEUR AVERAGE ON RECORD

THE OFFICIAL HIGH HONORS

FOR THE YEAR 1915

WAS WON BY MR. WOOLFOLK HENDERSON, OF LEXINGTON, KY., USING

Peters SHELLS

Woolfolk Henderson

He Shot at 2800 Registered Targets, Broke 2731; Percentage .9753

The wonderful record of Mr. Henderson in 1914, when he won the Four great amateur honors, is still fresh in the minds of the shooting fraternity. In that year he captured the Grand American Handicap, the Single Target and Double Target Championships of the United States and the High Amateur Average. His performance in 1915 is therefore but the continuation of a marvelous and thoroughly consistent record, made possible by ammunition of superlative quality.

PETERS SHELLS have been used by the winner of the United States High Amateur Average (official) FIVE OUT OF THE PAST SIX YEARS

THE PETERS CARTRIDGE CO., PACIFIC COAST BRANCH . . . . **585-587 Howard Street, SAN FRANCISCO, CAL.**

C. G. Spenc er

The Big Winnner In 1915

The Interstate Association's Official High Professional Average for the season of 1915 was won by Charles G. Spencer, of St. Louis, Mo., with the marvelous record of 97.5% for 5620 targets. Such an average for such a large number of targets not only shows Mr. Spencer's great skill, but also proves the uniform and unequalled quality of

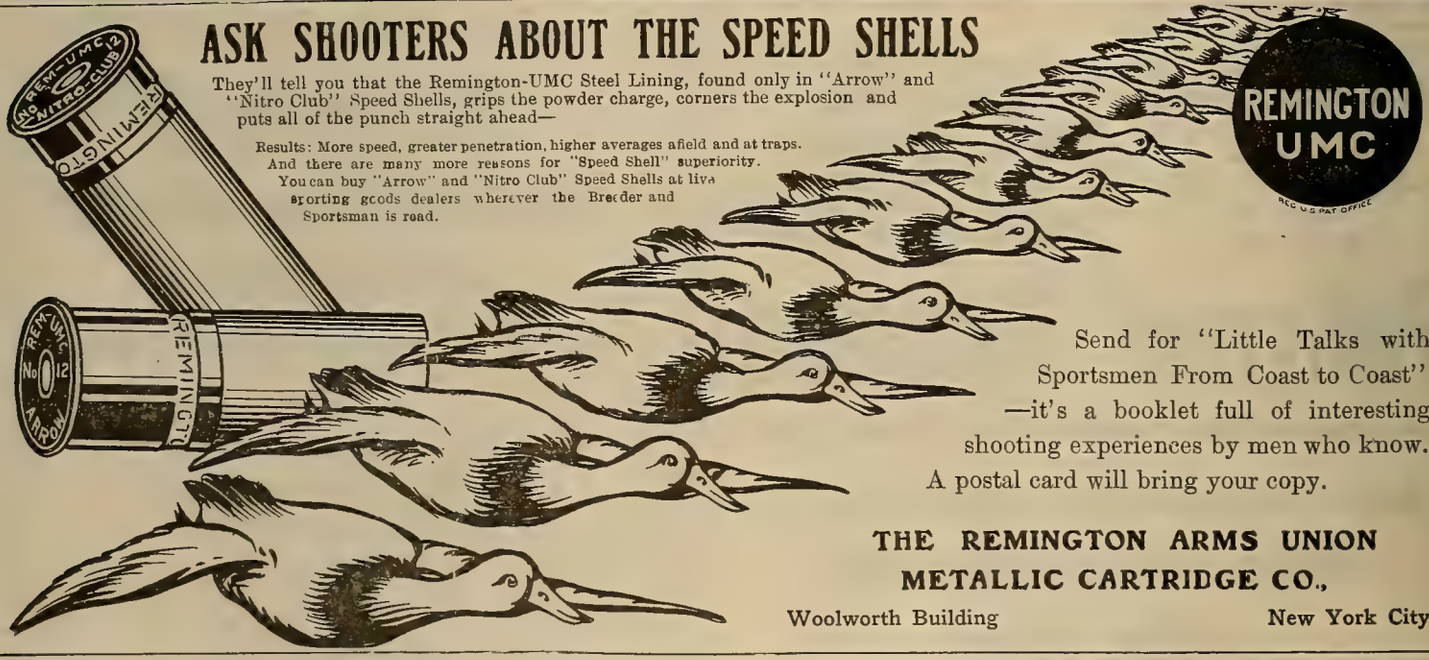
WINCHESTER

LOADED SHELLS AND SHOTGUNS

which Mr. Spencer used exclusively. It was this same combination that he used when he made his marvelous straight run of 565 targets—the World's Record.

Contests for the Season's Trapshooting Averages have been held 16 times and 12 of them have been won by **W** shells or guns, or both, which is undeniable evidence of their superiority.

Lester German, of Aberdeen, Md., who was second high for the season, and who also made the greatest score of the year for a single tournament—499 x 500—used Winchester shells in performing this great feat.



J. Mownell Hawkins, of Baltimore, Md., shot 7,265 targets in competition during 1915, and made the splendid average of 95.56%, using Winchester shells and shotguns exclusively—more proof of their uniform shooting qualities. These performances show the reason why Winchester shells and guns are

PREFERRED AND USED BY MEN OF ACHIEVEMENT

ASK SHOOTERS ABOUT THE SPEED SHELLS

They'll tell you that the Remington-UMC Steel Lining, found only in "Arrow" and "Nitro Club" Speed Shells, grips the powder charge, corners the explosion and puts all of the punch straight ahead—

Results: More speed, greater penetration, higher averages afield and at traps. And there are many more reasons for "Speed Shell" superiority. You can buy "Arrow" and "Nitro Club" Speed Shells at live sporting goods dealers wherever the Breeder and Sportsman is read.

Send for "Little Talks with Sportsmen From Coast to Coast"—it's a booklet full of interesting shooting experiences by men who know. A postal card will bring your copy.

TRAINING THE HOUND

A PRACTICAL TREATISE ON THE TRAINING OF FOX HOUNDS, BEAGLES, AND COON HOUNDS.

The system of training advocated is simple and effective, so that anyone who carries out instructions can easily develop a foxhound, a beagle or a coon dog to the highest state of usefulness or organize a pack in which each hound will work independently and at the same time harmoniously with the others. The subjects are: The Hound's Ancestry, History, Instinctive Tendencies, English and Native Hounds, Developing the Intelligence, Training the Foxhound, Voices and Pace of the Hound, Qualities of Scent, Manners, Training the Coon Dog, Coon Hunting, Training the Beagle, Forming a Pack, Field Trial Handling, Faults and Vices, Conditioning, Selecting and Rearing Puppies. Kennels and Yards, Diseases of Hounds and Their Treatment. The chapters on field trial training and handling are alone worth the price of the book, which is one that every man who loves the voice of a hound should read.

The book contains 224 pages, is clearly printed, nicely bound, and handsomely illustrated with bloodhounds, various types of English and American foxhounds, beagles and cross-bred dogs for 'possum and coon hunting.

Price, in heavy paper cover, $1; $1.50, postpaid.

Tom Benton 15705, by Gen. Benton 1755
Brown Jenny, by David Hill Jr.
Ingar, by Director 2:17
Camilla, by Ky. Prince 2470

To the man in any way familiar with pedigrees, only a glance at the above tabulation is required for ample proof of my claim that True Kinney is one of the best bred young horses in the land. The man who has a leaning for "production and performance" along with the "pedigree" will find both here in ample profusion. Every dam appearing above is a producer in her own right or through her daughters, while the sires represented are the greatest that have been known. The families here intermingled are of the "breeding on" variety, and no grandson of McKinney has a better right to greatness as a sire.

Mr. Horsebreeder, Let Me Talk To You Just A Few Moments

I am offering for sale, priced to go quick,

The Superb, Standard Bred Trotting Stallion

True Kinney

Winning Race Record (4) **2:12 1-4**

of the same generation of the McKinneys who have sired

MARY PUTNEY (3) 2:05½
World's Champion Three-year-old Trotting Filly

ROBERT FRISCO (4) 2:05¾ — **SAINT FRISCO (4) 2:07¼**

VERNA McKINNEY (2) 2:13 — **NATALDAY (2) 2:13½**
Fastest two-year-old pacing filly 1915 — California's Champion Colt Trotter

and many other famous performers

I am not in the stallion business and do very little racing and so have no real use for this horse, but I want him to go into good hands and I am pricing him so that he will more than pay for himself this season.

TRUE KINNEY is a son of that great race horse and successful sire Kinney Lou 2:07¾ and is a "True McKinney" all over, a broadly built horse of deep body, squarely set on short legs, a pure gaited trotter and a horse of perfect disposition in harness or out. He is almost an exact likeness of his illustrious sire save that he has more size, more bone and more substance as a race horse. He was a first class two-year-old trotter, winning two events including the Canfield Stake and taking a winrace record of 2:19, also being second in the State Fair Futurity and third in the Breeders' Stake. As a two-year-old he made a money winning campaign and as a four-year-old engaged in a series of ten hot battles against first class trotters from start to finish, taking a winning record of 2:12¼ and being second in faster time. Every man who saw him race can attest that at all times he was a game race horse.

His first crop of colts, now two-year-olds, sold for high prices and every one broken as a yearling showed natural and extreme speed, coupled with almost every other desirable quality such as size and individuality, soundness and intelligence. Johnny Ray has three at Cleveland, all fast youngsters; A. W. Longley and Sutherland & Chadbourne have others at Pleasanton that are showing famously, and R. D. Mayes of Dixon has one he paid $300 for at auction a year ago and which is one of the best prospects in California.

TRUE KINNEY has been fired and has had a long, beneficial rest. I am confident that he will train and race sound in the hands of any competent man. His legs are cool and hard, his feet are perfect, and he is in the pink of condition in every way — being jogged daily and ready for training or stud duty. He will be shipped to any man that buys him fully equipped for the journey and accompanied by a first class man. He is a credit to any horse breeding community either in this country or Australia or New Zealand and the price is $700.00. He can be seen here in Seattle and I will be glad to give any man any other information concerning him not contained herein. Address for all particulars

Harpers Weekly and The Breeder and Sportsman

$5.50 WORTH FOR $3.25

Breeder and Sportsman

One Year, 52 Copies, Regular Price $3

THE BREEDER AND SPORTSMAN is the oldest weekly journal devoted to the Horse west of Chicago, having been established in 1882. This interest, together with the Kennel, Gun, Fishing, Coursing and kindred sports receiving the most attention in its columns; together with Agricultural and Dairying Departments, under whose headings especial attention is paid to the breeding, etc., of Cattle, Sheep, Hogs, Poultry, and all other animals connected with stock raising.

As an advertising medium to Racing Associations, Horsemen, Stock Breeders, Manufacturers of Sulkies, Carriages, Wagons, Agricultural and Dairying Implements and Machinery, Sporting Goods, Fanciers, Stock Foods, and all others desiring to bring their wares to the attention of the classes to whose interests the paper is devoted within the field mentioned above, the BREEDER AND SPORTSMAN will be found indispensable.

Harpers Weekly

Six Months, 26 Copies, Regular Price $2.50

At no time has it been so evident to Americans as now, that the most important thing in the lives of all of us is the progress of the European War.

Next to your daily bread the war interests you most vitally. It may even come to be the most important part of your problem of living.

The periodical of greatest fundamental interest to you today is the one that can best report those phases of the war that come closest to your country and you.

Because of connections abroad and at home, HARPER'S WEEKLY is that publication.

As a critical commentary that presents inside facts, it is the necessary bridge for intelligent readers between the daily newspaper and the monthly review.

You want HARPER'S WEEKLY now. You can get it now on trial at a remarkable reduction.

Send $3.25 Now and Get Them Both

THIS OFFER is made to all who will send us $3.25 before March 31st, 1916, whether for extension of subscription, renewal of subscription or a new subscription. Address:

YOLO COUNTY FAIR ASSOCIATION.

Plans for a county fair of a permanent nature, beginning with this season, were definitely put under way Saturday at Woodland when a goodly number of representative citizens from various parts of the county gathered in the rooms of the board of trade and organized the Yolo County Fair Association, with the following officers: President, A. C. Stevens; Vice-president, A. H. Brinton; Secretary, H. S. Maddox; Assistant Secretary, I. H. Gregg; Treasurer, J. D. Harling, and Board of Directors, E. A. Bullard, H. E. VanNorman, T. G. Russell, Thomas Roth, F. W. Blanchard, W. M Gould, F. W. Wilson, F. B. Edson, F. S. Stitt, William Leinberger, Emil Kraft, Frank Morris, G. H. Fish and Byron Archer. Every section of the big and prosperous county has pledged enthusiastic support to the county fair movement, and with this sort of feeling in evidence the success of the venture is assured.

Owing to the fact that the old plant of Woodland Stock Farm, while offering every facility for the staging of a race meeting, has no buildings of a nature suitable for the housing of the various classes of exhibits that will be made, it is the present proposal of the fair association to follow the course of other seasons and give their event in two sections, the race meeting and livestock display at the track and all other classes of exhibits down town, utilizing the armory and two large tents. If recourse must in any event be made to canvas for the sheltering of exhibits it would seem more advisable to erect all tents at the track and have the entire fair staged in the same enclosure, but the Woodland folks have probably figured it from all angles and think their plan the best. At all events it is far superior to no fair at all, and is the forerunner of an annual event which within the course of a year or so will undoubtedly find a commodious home, with all buildings and appurtenances, on the site of the old Woodland Stock Farm.

As the harness racing and livestock exhibits will be the leading features of the fair it is the wish of the directors to arrange a date that will not conflict with that of any other similar event in this section of the state, though a preference is expressed for the last week of August. "The last week of August," under existing conditions, would mean in reality the week of August 21-26, as Woodland would scarcely care to have her fair cut short in the middle of the week in order to get her exhibits in shape at the state fair, which begins on Saturday, September second. Horsemen also would have to make the move, and as Saturday in this country, and especially in a community like Woodland, is usually the one best bet of the week for attendance, their fair, if preceding that of the State Agricultural Association, would have to come on the dates suggested herein. This would necessitate advancing Santa Rosa to the week of August 14-19, and would permit the Dixon people to take over the dates originally planned in our proposed circuit for Woodland. Such a plan would also provide a more economical ship of horses, exhibits and amusement features. The sentiment at Dixon is highly favorable to the fair proposition and an arrangement of this sort would in all probability be quite welcome to the fair promoters at that point.

Some time ago we stated that the best of feeling undoubtedly existed between the Yolo county fair people and Mr. C. F. Silva, present owner of the old Woodland Stock Farm, and that the latter gentleman would gladly co-operate in every way with the association for the good of the cause. Our statement was amply verified Saturday when Mr. Silva appeared in person at the meeting in Woodland and tendered the use of his plant gratis for the purpose of putting on the races and the livestock exhibits. The action is most commendable and fully in keeping with the spirit of sportsmanship displayed by Mr. Silva ever since he became affiliated with the trotting horse business. The display of a similar spirit on the part of many other persons who can well afford to "stretch a point" in furthering a good cause would do much to relieve the present situation and to help re-establish the county fair, with harness racing, on a healthy and permanent basis.

"WESTERN IDEA" FAVORED AT PHOENIX.

Horsemen of the Pacific coast and adjoining states of the section lying west of the continental divide will read with pleasure the following extracts from a letter recently received at this office from Secretary T. D. Shaughnessy of the Arizona State Fair:

"We are planning on affiliating ourselves with the California Circuit instead of the Great Western, as it is very difficult for us to induce the horsemen from the Grand and Great Western Circuits to come this far west, except the ones which are homeward bound to California. I feel that it is advisable for us to fix our speed program to conform to the majority of western and southwestern horses, and think that a program arranged for their convenience, offering two starts for each horse which they may bring, will induce most of the California horsemen to ship from Riverside to Phoenix. As you remember we had great difficulty last year in filling our classes.

"I was very much interested in your article on the proposed circuit for California fairs in a recent issue of the Breeder and Sportsman, and trust that the tentative dates for the various meetings outlined may be adopted and made permanent, as they would about suit our convenience. We would really like to hold our meeting this year October 23-28, as the general election comes Nov. 7th and we think it advisable to be ten days ahead of this event. With best wishes for the success of the California Circuit, etc., etc."

The action proposed by Secretary Shaughnessy will not only meet with the warmest approbation from every horseman in this western country but it should also result in a much better speed program in every way for the Arizona State Fair—better entry lists and larger fields, with better sport and hotter contests. Phoenix, located some hundreds of miles from any other racing center, placed herself on the map some years ago by giving a speed program of such proportions as to draw horses from the eastern circuits, but conditions in a number of important ways have changed since that time. The Grand Circuit formerly closed at Lexington, from which point a number of good stables usually made the ship to Dallas and then to Phoenix, but with the Grand Circuit contingent jumping from Lexington to Atlanta this year, no harness racing at Dallas, and a smaller appropriation for the speed program than was the case a few years ago, it is hardly probable that Phoenix would be able to attract a very great number of the most pretentious eastern or central western stables. Last year the program was arranged with the hope of attracting the horses that participated in the P.-P. I. E. meeting and were eastward bound, but our visitors passed up Phoenix on the way home and the western stables had things all to themselves. Much of the original program failed to fill but Mr. Shaughnessy arranged special events to the limit of his appropriation, gave the California folks a run for their money that they still remember with thanks, and provided some most excellent "emergency sport" for the good crowds in attendance.

As arranged in our original experimental schedule and also in the Great Western plans, Phoenix was allotted the dates of October 30 to Nov. 4, but from this end of the line there can be but small objection, if any, to the advancement of one week favored in Mr. Shaughnessy's letter. It is quite evident from such information as we have been able to gather here that Riverside will hold her meeting not later than the week of Oct. 16-21, and most of the California stables will undoubtedly be at that point, from which it is but a little more than an overnight ship into Phoenix, by express. This advancement of one week would interfere with the Albuquerque fair, but this conflict can no doubt be smoothed over. Last year the far western contingent furnished most of the fun at the New Mexico exposition, and with the proper arrangement of dates coast horsemen who stayed in this section and the members of the fraternity who had made campaigns on the major circuits or in the short grass country or in the eastern Rocky mountain states could take advantage of both events, to the benefit of all parties concerned.

With a well balanced program for horses of moderate speed, from 2:06 or 2:07 to 2:15 or 2:18, and a couple of free-for-alls to care for the wid-splitters, supplemented by the usual events for Arizona horses only, with entries to close well along in the season, Phoenix should have one of the best meetings that has come her way for a long time.

THE PROGRAM AT SALEM.

The speed committee of the Oregon State Fair Board completed their work late last week and have announced the following program of events for this year's number of the State Fair series, both the trotters and pacers and the thoroughbreds being cared for very nicely in a schedule whose total offering is in excess of fifteen thousand dollars:

Monday, Sept. 25—Two-year-old trot, two in three, $200; 2:10 pace, $750; 2:25 trot, $600; five-eighths run, handicap, $200.

Tuesday, Sept. 26—2:15 trot, $700; 2:18 pace, $750; three-year-old trot, $400; five-eighths run, two-year-olds, $250; seven-eighths run, $250.

Wednesday, Sept. 27—Three-year-old pace, $400; 2:30 trot, $600; 2:08 pace, three-in-five, $2,000; mile run, $350; three-eighths run, $100.

Thursday, Sept. 28—3:00 trot, two in three, $200; 2:12 trot, three in five, $2,000; 2:20 pace, $750; Portland Derby, mile and a quarter, $500.

Friday, Sept. 29—2:18 trot, $700; free-for-all pace, $750; two-year-old pace, two in three, $200; five-eighths run, $250; halfmile run, $200.

Saturday, Sept. 30—Consolation trot, $500; consolation pace, $500; 2:25 pace, $750; mile run, handicap, $350.

With the exceptions above noted the harness events will be on the three heat, every heat a race plan which proved popular and successful throughout the northwest last season, and the fair will, as usual, attract the principal stables of this part of the world. Wednesday and Thursday, on which the more pretentious programs are staged, are Salem and Portland day, respectively, and the big delegations in the way of attendance are expected on those days. The addition of more running races than usual to the program will meet with the approval of the many friends of the thoroughbred in that section and will also add variety to the daily show. The dates of closing have not yet reached us but will be announced shortly. The speed committee is composed of Secretary A. H. Lea, E. B. Tongue of Hillsboro, H. W. Hatch and Dr. A G. Smith of Salem.

WHO HAS THE BEST COWS? UNIVERSITY WILL FIND OUT.

Who has the best cows in California?

The University of California wants to find that out, and to demonstrate how much better good cows are than poor ones. So the College of Agriculture is considering the inauguration on the first of next November of a "State Dairy Cow Competition." It is planned to continue the competition for sixteen months. It will be open not only to pure-bred but also to grade and to common cows, and a number of different prizes will be awarded, for butter-fat production during any ten continuous months of this period. Prizes aggregating several thousand dollars have been offered. The prize list, however, will be held open until July 1, so that any other persons or firms who wish to offer such contributions to the list of prizes may have opportunity to subscribe.

A circular in which the University will officially announce this competition and for the first time make public the list of premiums offered will be issued by the College of Agriculture of the University of California about August 1, 1916.

Mr. Smith's Bill Again

THE QUESTION OF FAIRS AND THE MUTUALS

Two weeks ago today we presented to our readers a draft of the racing measure which E. R. Smith and a number of Southern California horsemen wish to have submitted to the vote of the people at the November election, making a number of comments upon the bill at that time. Our ideas concerning the same, formed from numerous conversations upon this subject with horsemen of both schools, were expressed plainly but absolutely without prejudice or animus, and were accepted by Mr. Smith and his friends in the same spirit in which they were uttered, as evidenced by the following letter from him which reached this office shortly after our last week's paper had gone to press:

Ocean Park, Cal., Feb. 23, 1916.

Editor Breeder and Sportsman:

Thank you for giving publicity to the Registered Horse Breeder's bill which is now in the attorney general's hands pending title to same. I notice in your comments on the bill that you misconstrue the meaning of Section No. 7 of same. Section No. 6 provides that any State, County or Agricultural Fair and all corporations which obtain licenses to conduct race meetings will be permitted to use the Pari-mutual System of Wagering at their respective meetings, under the direct control, supervision and rules and regulations of the Racing Commission. Section No. 7 provides that the provision of this Act relative to securing licenses, or to the payment to said Racing Commission of proportionate moneys to pay the expenses of conducting such commission, shall not apply to race meetings conducted by any State, County or Agricultural Fair. You will plainly see that State, County and Agricultural Fairs do not have to apply for licenses nor pay any part of the expenses of said Racing Commission nor are they limited to the number of days of racing at any State, County or Agricultural Fair; they are entirely independent of the Racing Commission, except should they wish to use the Pari-mutual, which according to this Act is placed in the hands and control of the Racing Commission.

In regard to the fifteen day proposition, it is the intention of this bill not to have meetings of a longer duration than the above by any corporation or association within the calendar year and no corporation or association shall hold more than that number of days within the State in a calendar year, and as the Commission under this Act will be composed of Breeders of Registered Horses to be appointed by the Governor we are of the opinion that all classes of horsemen will be treated with fairness by said Commission, and as each County or Agricultural Fair can hold a separate meeting or meetings other than the fifteen days, we thought that under the present condition, rather than antagonize certain parties, we would hold the limit down.

It is not the desire of myself or the parties interested in framing this bill to discriminate against any classes of horses in this State, and thinking that as this is a Presidential year and also that the people of this State feel more kindly to the Pari-mutual System of Wagering, also looking forward to a more liberal construction of affairs in this State, we were of the opinion that it would be an opportune time to put this measure before the people in the interests of the horse breeders of this State.

You will see by Section No. 8 that all moneys left in the Commission's hands after paying all necessary expenses is to be used for the purpose of giving purses, prizes, premiums or stakes for all classes of California Breed Registered Horses.

Again thanking you for this publicity, etc., as we were vary glad to read your comments on said bill,

Yours very truly,

ED. R. SMITH.

The first thing we wish to do is to thank Mr. Smith for writing us in this manner, also for having the progressive spirit to go ahead on his own accord with a proposition of this kind, and also to assure him that we have every confidence in his sincerity and in his personal belief that he on the proper track to secure the legislation required to establish a racing commission and pari-mutual speculation in the state of California. At the same time we are forced to continue the argument and to disagree with him as to the propriety of his bill in certain respects and also as to the advisability of his method of going after this legislation.

Sections six and seven, which he thinks we misconstrue, are worded to convey the meaning intimated in our remark to the effect that section seven was perhaps originally meant to close with the words "at which no form of speculation is permitted" or a phrase of similar meaning. Reference to the first paragraph of the above letter shows his interpretation to be to the effect that all state, county or agricultural fairs are in every way exempt from the workings of the bill and are independent of the racing commission EXCEPT SHOULD THEY WISH TO USE THE PARI-MUTUAL. As the pari-mutual is the only system of speculation which it is proposed to legalize our contention still holds good, that such meetings would have to be of a nature devoid of speculation of any kind. We still hold that in certain instances this would work a hardship upon one or the other of the branches of racing in counties where both would wish to take advantage of the bill. Given pari-mutual speculation fairs could be made self-supporting and be in no way dependent upon a state subsidy in the way of an appropriation for district fairs. Were legislation to be enacted establishing a generous subsidy the fairs would not suffer from the lack of speculation, and it is highly probable that any bill establishing an appropriation would carry a clause invalidating any particular appropriation the beneficiary of which permitted speculation of any sort whatever on its racing events. However it is highly improbable that both a district fair bill and a pari-mutual bill would be passed and put into effect simultaneously, and without state aid the fair associations will undoubtedly wish to use the pari-mutual, should the same be made lawful. In most instances the promoters of fairs with racing would probably prefer the "iron men" to the state assistance, as they would have a wider latitude for operation, would draw a greater gate, and the fairs and meetings which could be conducted with speculation would be much more numerous than could ever be expected under state appropriation, especially when we know beforehand that we are facing a limit of seven or eight fairs to start on on the subsidy basis under the present administration. As a consequence we are in favor of a wider range of dates in a given locality, either with a thirty day limit for racing of all kinds, or on a sliding scale in proportion to the population of the county, or on a fifteen day basis for runners and a seven to nine day basis for the harness horses, or even a six day limit for the latter. Harness meetings of a duration of more than one week in any given locality are not usual in this state, nor is the harness racing season as long as that for the thoroughbreds. Every horseman in California should feel that he was well cared for were it possible to hold fifteen to twenty-five days of running and five to eight days of trotting every year in every locality where the population was sufficient to support the same and the people desire it given.

Since the publication of Mr. Smith's bill we have talked the matter over at some length with horsemen from the ranks of both thoroughbred and standardbred adherents, and in every instance they have agreed with the idea advanced by us in opposition to Mr. Smith's project that the best way to secure the end desired lies through the legislature rather than through the vote of the people. The pari-mutual system of wagering is a stranger to the rank and file of California voters, and it must be borne in mind that to very many people the bare mention of the word "pools" brings before their fancy the picture of everything undesirable about a race track. Many persons would vote against the bill who would perhaps never make note of the fact that their representative or senator had given it his support in the assembly. Many more, with singed fingers from supporting other initiative measures, would turn it down on the principle of "safety first" or "when in doubt vote no," two slogans very popular in public esteem at this moment. Put directly before the people we are inclined to the view that the bill would not get a fair run for its money, not as good a run as would befall it were it to go through the regular channels of legislative procedure, backed solidly by every reputable man and interest in every and any way identified with the future of breeding and racing. The disreputable element, which like the poor we have always with us, will not support such a bill and this in itself is a most eloquent testimonial to its general desirability.

We will welcome further discussion of the matter from all parties interested in the same, and are open to conviction as to the "error of our way" if sufficiently strong evidence can be submitted against us.

THE "MITCHIGAN HORSE" AND OTHERS.

[H. T. White, Horse Breeder.]

"Hooray for the Mitchigan horse!" shouted a large Celtic gentleman who sat just back of me in the Lexington grandstand last October when Peter Mac trotted his wonderful mile in 2:03½, the first half in :59, the three-quarters in 1:29¾.

"He's all Mitchigan," continued the enthusiastic Wolverine. "His sire was bred in Mitchigan, and broke, trained and driven a winning race in the Kentucky Futurity by Peter Johnston, who was born, raised and died in Mitchigan. His grandsire was owned near his whole life in Mitchigan—his name was Pilot Mejum—an' the sire of his dam tuck a record of 2:12¼, driven be a Mitchigan man—I dunno what his name was, but I mind him well—at Terry Hut the same day ould man Geers drove The Abbot in 2:02¾, and the judges only gave him 2:03¼, because that was a world's record annyhow. That horse's name was J. T., and leave me tell you right here he was one grand trotting horse. Why, he came right out of the stud up be Bay City—in the woods, ye might say—and went that 2:12¼ mile, and that very minute the mother of this fella that trotted in 2:03½ right here before our eyes was leppin' around be the side of her dam right there in Mitchigan. Yes, sir, she was so. Her name is Lillian R., an' that handsome divvil that drove the runner just now for the big show gave her a record of 2:04½. Yes, he's Irish, why not? An' his name is Mike McDevitt. The horse himself is partly named after him—Peter Mc.

"Yes, yes," continued the enthusiastic one, "I knew all of 'em way back, an' I saw J. T. get his mark. 'Twas a great day f'r him an' The Abbot, not to mintion the pacer, Coney—ah, there was a pacer for ye! He wint that day against the record for a pacer driven be an amachoor, whatever that is, and Ed Gaylord, of Dinver, was the amachoor. An' Coney beat that record, mostly because of the wise instructions Myron McHinnery handed to Gaylord just before the Dinver man got in the little buttherboat they called wagons in thim days—I seen Nick Hubinger, who weighed wan hundred pounds in the winter and ninety in the summer, push the dashboard off of one iv thim with his left fut, an' I've always had me suspicions that was what put Devereux of Cleveland onto his thrick iv lavin both his feet outside the box entirely, an' restin' thim on the front axle whin it kem to a hard finish.

"Gaylord was makin' his first Gran' Circuit drive that day at Terry Hut, an' naturally he had stage fright. So he says to McHinnery, afther Coney was all warmed up nice: 'How will I drive it, Mc?' 'The best way,' he says, 'f'r a gran' mile with a pacer is to get over to the half-mile pole as soon as you can, an' come home as quick as possible,' an' that wasn't the worst tip ever passed out, at that.

"Thim was the great days, but even so I mustn't forget that the grandmother of this Peter Mc, on his mother's side, was a Mitchigan horse. She was so. Letitia was her name. She had a high wheel record of 2:18¾, and her sire was the Mitchigan horse, Louis Napoleon, so ye see that, although Peter Mc is owned in Ohio an' his sire lives in Kentucky, he's a mitchigan horse just the same," and the man from Michigan settled back in his seat to watch the next performance on the race track.

About the only thing left unchronicled by the enthusiast was the story of J. T., and, fortunately, I ran across this the other day in the Breeder and Sportsman of San Francisco, which fact recalled the cheery monologist at Lexington and his fervid praise of Michigan trotters, past, present and to come.

And the story of J. T. is a good one. Back in 1890 there arrived in Tacoma, Wash., a youth of the unusual name of Jinson James. He was a horse lover, and at once attached himself to a stock farm. He wanted to own a Dexter Prince horse some day, so saved his money and finally secured the desired strain in a three-year-old stallion by Live Oak Hero, dam by Dexter Prince, grandam by Abbotsford 2:19¼, son of Woodford Mambrino 2:21½. Possibly the paternal side of the three-year-old's family chart did not appeal to the boy, but, right now, for race horse quality and speed it would be hard to beat, since Live Oak Hero was a son of Director 2:17, dam by Santa Claus 2:17½. Comb the records as carefully as you may, and no two stallions that were better race horse trotters than Director and Santa Claus will be found. The first named won the first Charter Oak purse (1883), and, as showing his class, it may be said that Phallas 2:13¾, champion stallion of those days, and at his best when Director was racing through the Grand Circuit, never could beat him in a race.

Santa Claus is a trotter overlooked by a good many people these days, but he was a whale of a race horse despite handicaps that would have kept most performers in the barn. He never had good legs, but was a colt trotter, and once held the record for five-year-old stallions. After that, he came east from California, and in the hands of Orrin Hickok was patched up sufficiently to race one season. And he could mix it with the best when he was anywhere near free from pain. That year (1881) the star trotting stallion was Piedmont 2:17¼, but Peter Johnston, who drove him, told me confidentially one day that the only stallion he was afraid of was Santa Claus. "He can beat 'em all when he's right," was Johnston's verdict, and at Beacon Park, Boston, that fall, his words came true, as Santa Claus took the first, third and fourth heats from Piedmont and Wedgewood in 2:17¾, 2:18, 2:19. Santa Claus gave us Sidney a

great sire, and Director, through Directum 2:05¼, trotting, and Direct 2:05½, pacing, a pair of sires whose influence has been strong and wide, and has done much to keep the Dictator blood to the fore.

So while we are all telling about what a great trotter Peter Mc is and predicting he will be the next two minute performer, and all the time giving the credit to the Peter the Great end of his pedigree, we by no means should overlook the fact that back of that strain is the blood of Director, of Santa Claus, and of Volunteer (sire of Louis Napoleon). Any way you figure it, that is a great combination, and as Santa Claus was by Strathmore, the dam of Peter Mc runs to Dictator, Volunteer and Strathmore, three of the leading sons of Hambletonian 10.

And at this stage of the proceedings the pedigree reader is impressed with the fact that Peter Mc—admittedly the peer of any trotter now in training—does not carry any Wilkes or Electioneer blood, although those two strains unquestionably are the leading ones of today. He is by a sire of the Happy Medium family, whose dam was of the Volunteer tribe. The dam of Peter Mc is from a son of Director and a Dexter Prince mare; grandam by a son of Volunteer; third dam by Garibaldi, son of Hambletonian; fourth dam "said to be by Hiram Drew."

Now, inasmuch as Peter the Great—a horse absolutely destitute of the blood of George Wilkes or Electioneer—is by odds the greatest sire of colt trotters and 2:10 trotters the world has ever seen, it is entirely within the limits of possibility that his best son (as a sire) may also be wholly devoid of those strains, especially since—in the case of Peter Mc—he gets the backing through his dam of such wonderful producing families as the Dictators and the Strathmores, not to mention the Volunteers (who were a one-generation tribe), of the Garibaldi strain, which never has been prominent. Still, all those four sires were sons of Hambletonian 10, and, when you get right down to basic facts, that is pretty much all you can say about George Wilkes and Electioneer (so far as their bloodlines are concerned), since the dam of Wilkes was of unknown breeding, and, aside from the fact that the dam of Electioneer was by Harry Clay 45, nothing is known of her ancestry.

In view of all these facts—which have been brought home to people by the success as a sire of a horse carrying no Wilkes or Electioneer blood—there is nothing improbable in the prediction that another front rank begetter of speed—at least, in the first generation—may appear any day and be minus the Wilkes and Electioneer strains. Most harness horse pundits who specialize in predictions and horoscopes have become so used to seeing all the great sires carry liberal doses of the Wilkes and Electioneer strains that they cannot imagine any other sort being allowed to exist, and what Peter the Great has done is regarded by them as a freak performance. In a sense it may be, for, until a first-class progenitor (not merely a sire of first generation speed) who does not carry Wilkes or Electioneer blood appears, their argument will carry weight to most people.

As a matter of fact, the Happy Medium strain was, right in the early days of its founder, in disrepute among horsemen and breeders because its members did not race gamely. And then, as no son of Happy Medium developed into a sire of the first class while the Wilkes and Electioneer strains were coming on with giant strides, it came to be accepted as a fact that the blood was not worth bothering with. But, despite indifference and neglect, which unquestionably was a tremendous handicap, it kept breeding on, and on three occasions has produced horses that today have a place among the ultra-distinguished ones.

Happy Medium was foaled in 1863, and in 1875 his son, Maxie Cobb, which later became champion trotting stallion, with a mile in 2:13¼, was foaled. But speed without other essential qualities never got any horse very far, and it soon transpired that Maxie Cobb was not a good race horse. Also he failed as a sire. But in the meantime (the record of 2:13¼ was made in 1884) another son of Happy Medium that was destined to occupy a big niche in trotting history was foaled. This was Pilot Medium, whose natal year was 1879. As soon as he was given even a modest chance in the stud he began siring trotting speed of a high order, and his son, Jack 2:12, was a real race horse. The other notable trotter of the Pilot Medium tribe was Peter the Great, best three-year-old of his day, up to a mile in 2:17 at two, and the one first-class colt trotter of the family. Now he is in some respects the world's greatest sire.

That horse represented period No. 2 in the history of the Happy Medium family. Nancy Hanks is the star of period No. 3. She was foaled in 1886, and, like Pilot Medium, had excellent bloodlines on the female side of her pedigree, the gray stallion being from Tackey 2:26¼, by Pilot Jr., while Nancy Hanks was from Nancy Lee, by Dictator. Nancy Hanks was a fast colt trotter for her day. She never was beaten a race, although extensively campaigned. She lowered the trotting record to 2:04 after trotting in 2:09 to the high wheel hitch. She today also holds the world's record for the fastest three consecutive heats to high wheel sulky—2:12, 2:12¾, 2:12—and the fastest first, second, and third heats, in a race to that hitch. She is the dam of two 2:10 or better trotters—Admiral Dewey 2:04¾ and Lord Roberts 2:07¼—while her daughter, Nancy McKerron 2:10½ at three, certainly should count as a 2:10 trotter at maturity.

Furthermore, these fast foals from Nancy Hanks

[Concluded on page 6.]

Two Sons of McKinney

PERMANENTLY IN SERVICE IN CALIFORNIA

After the family of McKinney 2:11¼ began to make such great strides into public favor a score of years ago it quickly became the fashion for the knowing easterners to purchase the best of them for their own use. McKinney's sale to H. B. Gentry stimulated the demand, and for some years the eastern drain upon the California branch of the family was a most insistent one. The better they were bred the better the eastern folks liked them and the readier they bought them. In view of the inroads made by them upon our stock it is pleasing to note that the male offspring of McKinney and the two greatest mares to whom he was ever stinted, Carlotta Wilkes and Expressive (3) 2:12½, both remain permanently in the stud in California. Both are in every way true representatives of their great family and are well proven sires in their own right, each occupying a unique position among contemporary stallions on the Pacific coast.

CARLOKIN 2:07½

was foaled in 1901 and was bred by the famous establishment, now passed out of existence, that figures as the breeder of so many great horses of both gaits and sexes, Santa Rosa Stock Farm. Beginning his career on the track as a three-year-old he raced for a number of seasons with distinction, achieving in the hands of Will Durfee a race record of 2:08¼ and a time record of 2:07½. That he is without doubt the fastest entire son of McKinney that was raced at the trot he demonstrated by working a public mile that same season in 2:05½. Carlotta Wilkes

CARLOKIN 2:07½

has ten standard performers to her credit and of these four have records faster than 2:08, achievements which are the more remarkable when it is recalled that each of this quartet is by a different sire and that two of the sires represented never begot 2:10 speed from any other cross.

Through his wide acquaintance with the family of McKinney Mr. Durfee selected Carlokin as the one member of the tribe most apt to sire race horses of the caliber demanded for the fulfillment of the owner's wants, and subsequent events have given ample proof of the soundness of Mr. Durfee's judgment of "prospective sires." In the summer of 1912 Carlokin secured his first representation in the great table of sires, and in the short time that has intervened his list of performers has grown until it now numbers over a score. He is the only stallion standing for service in the state who is the sire of two 2:10 trotters, both of whom are excellent race goers, Esperanza (3) 2:09, the only three-year-old ever to win every stake for the age and gait on the coast, and The Lark (4) 2:09½, who at the last Arizona State Fair showed that she could deliver the goods in company as well as trot fast for a breeder's record. Originally the McKinneys were not considered as the best of early comers and futurity trotters, but of late years this sentiment has been changed, of necessity, as the showing made by the youngsters of the clan has been of the very highest order. Here on the coast alone in the three years last passed the get of Carlokin have won more futurity money than those of any other one sire by a large margin, while in the season last passed the McKinneys both east and west won the largest portion of the money hung up for colt performers.

It is worthy of note that Carlokin has never had a representative in the pacing divisions of the stakes, and that very few of his standard list are addicted to that way of going, his get being very uniformly possessed of a highly developed instinct to trot, and trot only. By inheritance they are also possessed of soundness, courage, ruggedness and "racing vitality," coupled with individual excellence and the best of dispositions. Carlokin's services are offered to breeders throughout the season and full particulars concerning him and his get may be obtained by calling on Mr. Durfee at Exposition Park, Los Angeles, or addressing him by letter at 2019 South Figueroa street, that city.

EXPRESSIVE MAC 2:25½

is a year older than Carlokin and, like the son of McKinney and Carlotta Wilkes, was bred at a great establishment now only a memory, Palo Alto. Raced but little and with practically no opportunities for development as a sire he has nevertheless won high place for himself and today stands as the only horse now in service on this coast to sire two 2:05 performers, or three in 2:08. This means more when you consider that he has but four performers to his credit and that he has never had a colt or filly trained for speed, or at least raced or started for a record, whose dam was standard bred under either trotting or pacing requirements, or whose breeding was anything of a nature that could possibly be referred to as fashionable. Each one of his three extremely fast performers spring from lines on the maternal side which, in the immediate generation to which they belong, have produced little else of like calibre, as each of these three mares, Clara Mac 2:04½, Vera Hal 2:05 and Madam Mac 2:07¼ have demonstrated during the season last passed that their present records do not represent the true limit of their capacities. Clara Mac worked for Will Durfee last fall faster than her record; Vera Hal has a winrace record of 2:06¾ on a halfmile track, made in the second heat of the great race in which she defeated White Sox last summer at Riverside, while Madam Mac worked the Pleasanton track last spring in 2:05½ and in the last few days has been figuring in world's record performances at halfmile heats on the ice in Minnesota.

Nor is Expressive Mac limited to the sidewheelers for performers with sufficient speed to enter the 2:10 list, as his daughter Nellie Mac (also out of a mare of "plebian" blood) worked the Pleasanton track last fall for Charley Clark well inside the select limit at the trot. She will be raced this season and will no doubt establish her sire "in the books" as a 2:10 progenitor at both ways of going.

The value of the blood of Expressive Mac through his dam is inestimable. Expressive, a great race trotter as a three-year-old, may in point of performance and production combined be ranked as one of the very greatest of living mares, her long list of performers including two 2:10 trotters, while she has three speed-siring sons and two producing daughters. The great thoroughbred mare Esther, her dam, is accorded higher place in the esteem of breeders with every passing season, three of her daughters having become the dams of 2:10 trotters: Expressive, as noted; Monesta, the dam of Marta Bellini 2:05½, and Mendocita, the dam of the sensation of the futurities of 1915, Mary Putney (3) 2:05½. With such an inheritance it is small wonder that Expressive Mac has the inherent qualities of sirehood that enable him to beget extreme speed from mares of mediocre breeding. He is a different type in some ways from Carlokin, being considerably larger. He stretches the sixteen hand mark and the scale beam tips even when set well past the twelve hundred pound notch, but he is smoothly and attractively put together, with quality apparent in every line. He is permanently in service at the ranch of his owner, J. H. Nelson, Selma, California, and during the two years last past has been one of the best patronized trotting stallions in the state, attracting a much higher quality of mares than has been he case in former seasons, so that his list of performers should be considerably augmented when the resultant foals go to the races. Mr. Nelson has right at his home and "under his eye" at all times excellent facilities for the keep of outside mares at very moderate cost, a card addressed to him at Selma being sufficient to bring full particulars to all persons desiring the same.

FAIR GROOMS IN OLD ENGLAND.

Ever since a short time after the outbreak of the present conflict in Europe, which from its unprecedented scope and cost in life and treasure has by common consent come to be known as "The Great War," we have heard much in this country of the way women of the warring nations have stepped into the vacancies left behind by their sons or brothers or husbands who have answered the call to arms and gone away to the trenches, many of them never to return. Widely varied and in many instances weird are the situations into which members of the fair sex have found their way in the great emergency which they have been called upon to face, but in no way have they been found wanting. Most illuminating is the accompanying story of the personal experiences of the girls who are "manning" a remount station in England, written by one of their number and originally appearing in the London Daily Mail:

I am very sorry for the girl who tries to deceive our "boss" about her knowledge of horses.

On your first morning to arrive in the cold, gray dawn, after rising at the unusual hour of 6 o'clock—to pass through the door into the blackness of the riding school, where sixty horses are tethered in a double line—to look round for someone with authority in the few glaring spots of light that throw strange monster horse shadows onto the gaunt walls—and then to be told, "Start watering from that end." . . . It is disconcerting enough in any case, as you slip by a pair of possibly tactless heels to where you guess some horse may own a head and a headstall, and then to lead him to the trough, where other dim figures are holding their animals, trampling, snorting, biting, kicking. You are not nervous (absurd idea!), but the effect is weird, grotesque in the darkness, and, as I said before, I am sorry for the girl who comes as a pretender.

But, then, nobody could deceive our "boss" unless with pen and ink—never face to face. I would wager that, if losing meant eating our hundred horses one by one, with their shoes thrown in! A wonderful woman she is, with the keenest green eyes in the world, and straight brows, almost startlingly black, against her pale face and soft gray hair. She has a voice so deep and powerful and clear that you shut your eyes and almost say it is a man's voice, and then you realize a tender tone in it that no man could have, and you just say to yourself, as I say a hundred times a day, "What an absolute topper she is!"

It would be a pleasure to go on writing about her, but perhaps you have said all when you have said that she can do anything with any horse, and that there is not a girl in the place who does not enjoy obeying her. She is a born commander. And it is so rare an instinct in woman that I doubt if there be one in a thousand who could command such absolute, unwavering confidence.

And it is her personality backed up by her knowledge that has made our depot the successful concern it is. The more you know of horses, and especially of the raw, rough brutes, many of them thoroughly vicious, which are bound to be among any lot picked out at random from the army type of animal, the more wonderful it seems that we should run them without a man on the premises. Wonderful! Why, it comes near to being incredible!. And without her it would be incredible. Some of our girls are fine, fearless horsewomen, and before we have been here long we are all fairly competent grooms; but it is she who tackles the dangerous horse first, she who is always on the spot in every emergency, and she, too, who organizes everything from ordering the tons of hay, oats, bedding, etc., to noticing that our stray cats get a saucer of milk in the harness-room at teatime. Nothing escapes her vigilant eye nor ever seems to perturb the humor in her face.

With a savage horse she is a marvel, and so calm about it in the bargain. She tamed one who came to us with the cheerful reputation of having half-killed six men running till nobody dared go into his box. Only the other day I was absolutely defeated by a black fellow we call the Snorter or the Warhorse. He bit, he kicked, he struck at me with his forelegs. He seemed as supple as india rubber, and those wicked hoofs came crashing round within an inch of me time after time, till at last I went limping off on one foot and a half to say I couldn't get near him. Well, she came and talked to him and showed him (only showed him) a little short thick stick, and he stood like a lamb after the first five seconds.

For the remount depot is not a picnic. Now that we have roused the curiosity of a larger public than the small boys who came tumbling out of the cottages and the grinning motorists in passing cars, to whom our string of horses ridden at exercise by ladies on cross-saddles was an object of amusement, we are always seeing ourselves in illustrated papers labeled "Smiling Dianas" or something equally foolish.

If we are Dianas, we get far hotter, dirtier, and more tired than would be at all dignified in a goddess. Of course it looks very jolly to see us all going out for a pleasure ride in the country. "Those girls are having the time of their lives," people probably say when they see us. So we are. I cannot deny it. But I think some of our friends who last saw us, say, in a London ballroom, would realize the other side of the picture if they could look in one morning at a time when they are generally in bed and see the erstwhile fine lady in her riding breeches and shirt, with the sleeves rolled up over her elbows, busily engaged in cleaning a dirty old carthorse or a charger back from the front with a filthy coat, or raking refuse out of the stalls. Our "boss" has no room for the type of applicant who "loves riding, don't you know, but couldn't possibly do stable work."

We are doing men's work, as much of it as men could do and considerably more than men would have done in those dim, distant days before the war had taught most of us to put our backs into a job of work and keep them there. It seems a long, long while since one strolled out after breakfast in well-cut habit and shiny boots to where our well-mannered hunter awaited us in the yard with a stud groom and a helper or so in attendance.

But every time our back aches under a truss of hay or a sack of oats we are braced up by the thought that we (and we hail from New Zealand, Ireland, the North Country, as well as England proper) are taking our share in the work that they are doing across the sea—there where our hearts are. And in that thought we go on cheerfully as before.

For we are a very merry crew, mostly under twenty-five I should imagine, and we get to love the horses as if they were our own. There is beautiful Venus, the chestnut mare, for whom I always steal a few minutes from my other charges to make her coat glow in the sunlight. And old Pasha, who looks like a cross between a camel and a clothes-horse, and who knows at least seventeen methods of either nipping or kicking you. Even he has his genial moments—at the drinking trough, for instance. And Satan, who never goes out except with our roughrider; it takes several of us to hold him like a rising balloon till she jumps into the saddle, and then away they go in the maddest series of rushes across the paddock. And Baby, our young carthorse, who weighs 15 cwt. or so, and comes bounding down the riding school to her morning drink in charge of a wee wisp of a girl you could almost pick up in your hand.

Yes, when all is said and done, I suppose it is mainly our love of horses for their own sakes that brings us and keeps us here, although—"I shall be late for the evening feed if I write another word."

But it is the love of the horse.

STALLION LICENSE LAWS.

Some years ago the state of Wisconsin started the ball rolling for the elimination of the underbred, diseased and unsound stallion and jack, and so clearly was her course a proper one that a number of states, California among them, followed her pattern at an early date by enacting legislation of a similar nature. Some weeks ago we presented a short summary of the effects of the workings of the law in our own state, showing the same to have been highly beneficial, grade and mongrel stallions having been reduced in numbers to a very gratifying degree. The following brief statement of the "why and wherefore" of the stallion license law, taken from the current number of the Weekly News Letter of the U. S. Department of Agriculture is also of interest and value at this moment when the breeding season is just getting under way:

In the past 10 years 20 states have enacted laws regulating the public service of stallions and jacks. The principal objects of these laws are to improve the quality of horses and mules raised and to protect breeders against misrepresentation and fraud on the part of unscrupulous stallion owners and dealers.

In order to accomplish these results these laws require the owners of all stallions and jacks intended for public service to secure a license from the stallion registration board or commission. Licenses are issued for purebreds, grades, crossbreds, and mongrels or scrubs, according to the provisions of the law in the particular state.

Those stallions or jacks offered by their owners as purebreds must be recorded in the studbook published by a society recognized by the state as authentic and reliable. The certificate of registration and pedigree issued by one of these societies must be presented to the board with an application for license and an affidavit certifying to the condition of soundness.

In their general provisions all of these laws are similar, but in certain details vary in a greater or less degree. In some states certain diseases or unsoundness disqualify a stallion or jack for public service, while in others the stallion or jack is permitted to stand, but any unsoundness must be mentioned on the license certificate as well as on all posters, circulars, etc., used by the owner for advertising purposes.

The states having laws of this character are California, Colorado, Idaho, Illinois, Indiana, Iowa, Kansas, Michigan, Minnesota, Montana, Nebraska, New Jersey, North Dakota, Oklahoma, Oregon, Pennsylvania, South Dakota, Utah, Washington, and Wisconsin. The last-named state was the first to pass a law and Oklahoma the latest one. Under the law in the latter state stallion owners are not compelled to secure a state license, but it is safe to say that the holder of a state license has a great advantage over the one who does not.

It is a deplorable fact that hundreds of farmers and mare owners have patronized the inferior stallion with the cheap service fee. These men seemed to have failed to appreciate that in paying a higher fee for the service of the sound purebred sire the service fee will be more than offset by the higher price received when the resulting colt is sold. Nor have they appeared to consider the fact that it costs as much to raise a grade or mongrel as it does a purebred.

A lack of consideration in the matters of soundness, breeding and registration have been the cause for much of the patronage secured by the inferior stallion. However, these laws have now made it possible for every farmer and mare owner in these states to know exactly what a stallion or jack is before breeding their mares. They have also benefitted the owners of sound purebred sires because they discourage the use of the unsound, grade, and mongrel stallion.

The results thus far show a gradual increase in the percentage of purebred stallions in service and a decrease in the percentage of grades and mongrels. At the present time there are approximately 58,000 stallions in service in these states, of which more than 50 per cent are licensed as purebred. This indicates that breeders are becoming more particular in the matters of soundness and breeding, and that the owners of stallions who at first were, in some instances, inclined to oppose, are now aiding in the enforcement of the provisions of the laws.

The question may be asked as to what is becoming of the unsound, grade, and mongrel stallions. The reports from the various states show that as the patronage of inferior animals decreases they are either castrated or shipped out, undoubtedly into those states where there is no law to compel them to stand under their true condition of soundness and breeding, thus continuing their destructive work to the horse industry.

It is in these states that breeders should exercise the greatest caution before deciding to which stallion they will breed their mares. They should demand of the stallion owner that they be permitted to examine the certificate of registration and pedigree in order to learn if the animal is properly registered in a reliable studbook and if the age, color, and description agree with the stallion whose service is being considered. If the certificate does not agree with the stallion it is evident that something is wrong, and it will be much wiser to refuse the service of the stallion than to accept it, pay the fee, and run the risk of getting a nondescript foal, expensive to raise, and for which there will be a poor market.

If a breeder is not familiar with pedigrees and registration societies, he should consult his state agricultural college or experiment station, giving all facts regarding the stallion being considered for service. In this way much information may be secured that will be of value to him in the future when the question of breeding comes up.

THE "MITCHIGAN HORSE" AND OTHERS.

[Concluded from page 5.]

were by three different sires—a fact which makes the achievements of the mare all the more creditable—and finally her blood is breeding on, since her son, Admiral Dewey, has a 2:03¾ son in Lord Dewey, and daughters of Nancy Hanks are producing speed, one of them, Narion, being the dam of Vice Commodore 2:11, and he is the sire of Margaret Parrish 2:06¼. No other mare of the top speed class ever accomplished anything like what Nancy Hanks has done as a broodmare, nor has any other sire shown the ability to sire stake-winning colts and 2:10 trotters generally that has characterized the career of Peter the Great. Nancy is a daughter of Happy Medium, and Peter the Great is a grandson of the same horse. Add Pilot Medium and Maxie Cobb to the list, and you have a Happy Medium bouquet whose fragrance would not be extinguished in any company.

And still not all the tale has been told, for Milton Medium, son of Happy Medium, sired the dam of Lou Dillon 1:58½, the first two-minute trotter. Under the prevailing system of giving all the credit for a great performer to the sire of such animal, the name of Lou Dillon always is associated in the public mind with that of her sire, Sidney Dillon, and not one man in ten who professes to know about trotting horses can tell you offhand what stallion sired the dam of Lou Dillon and what his sire was. So the whole sums up to this—that the Happy Medium strain in the male line is responsible for a world's champion trotter, a champion trotting stallion, and a surpassingly great sire of speed. Also for a truly great broodmare. It likewise had a hand in the production of another champion trotter, Lou Dillon, who already has proven her class as a matron by producing a foal which took a three-year-old record of 2:08¾, while, from the matings of the old mare and the champion stallion, The Harvester 2:01, much in the way of speed may confidently be looked for.

The Happy Medium strain deserves a whole lot more credit than it ever has received.

The Riverside folks have announced definitely that they are in line for a fair this fall as usual, as has been expected all the time. They are in correspondence with other points and their definite dates will be announced as soon as the various associations have arranged matters between them. It will be the best fair and race meeting in Southern California.

Notes and News

The sophisticated broodmare owner is well aware of the fact that the best sires are almost always those that are the best advertised in the turf papers serving that community.

◈ ◈ ◈

Salem's program is out and appears elsewhere in this number of the Breeder and Sportsman. The total offerings for harness horses and runners is in excess of fifteen thousand dollars and the program altogether is a very well balanced one.

◈ ◈ ◈

The directors of the Ventura County Fair Association are meeting today in Ventura to select dates for their third annual fair. Their speed appropriation promises to be larger than before by a good margin and a full announcement of the same will be made in these columns at a later date.

◈ ◈ ◈

Payments on two-year-olds having engagements in the Breeder's Futurity came in numbers that are indicative of good sized fields in this year's junior divisions of the stake, and also fields of exceptional excellence. The full list will appear in an early number.

◈ ◈ ◈

N. D. Dutcher of Livermore had the misfortune to lose two excellent Shire stallions last week in a fire which destroyed the big barn at his place. The horses were valued at a thousand dollars each. The building was totally destroyed but Mr. Dutcher will be partially reimbursed through his insurance.

◈ ◈ ◈

W. A. Perley of Chico has sent to John Quinn at the state fair grounds at Sacramento the two-year-old colt by The Proof 2:10¾ out of Belle by Kinney Lou 2:07¾, grandam a daughter of Mambrino King. The youngster is staked in the local futurities and will be prepared by Johnny to fill his engagements.

◈ ◈ ◈

Are your mares foaling? Start the young ones off in life properly by seeing that the dam gets plenty of the right kind of feed and care and that the birth of the baby is reported in the Breeder and Sportsman. Your friends will be glad to know what foals you are getting.

◈ ◈ ◈

The following from the current issue of the Horse Review leads us to infer that our old time friend Magnus Flaws is again back at his old place as the authoritative correspondent of our esteemed sole surviving Chicago contemporary: "An Englishman was once dining with a Scotchman in a Scotch restaurant. Oatmeal was served, and the Englishman said: 'Why do you Scotch people eat oats? In England we serve oats only to horses.' 'I know it,' said the Scotchman. 'The English have the best horses, but the Scotch have the best men!'" How squarely Ma Pettingill hit the bull's eye when she promulgated those famous words: "Once a Scotchman always——."

◈ ◈ ◈

The action of the A. T. A. allowing horses to race until July 7th each season without acquiring a record is being generally commended in those sections where early racing is indulged in. Under the provisions of this rule horsemen will not be barred from participation in the minor early events and Fourth of July "one day stands" for fear of getting a tag that will make their horses ineligible to the larger stakes and purses which close about that time each year. However it behooves one to plan ahead whether he is to race on A. T. A. or N. T. A. tracks, so much more evidence to the effect that two associations are a direct detriment to trotting horse progress.

◈ ◈ ◈

Miss Perfection (4) 2:08¼, Anvilite (2) 2:22¼ and the yearling colt by Zomblack 2:10¼ out of Martha Spy arrived safely in Lexington and have been turned over to James Snell to prepare for their engagements. Miss Perfection and Anvilite will be raced, but by whom has not yet been announced by Mr. MacKenzie, while Snell will keep Jack Atkin's lad until next year, when the first of his engagements come along. Mr. MacKenzie was in Lexington recently and was well pleased with the condition of all the horses shipped from Pleasanton in Harry Allen's care. The brood mares purchased from Lawrence & Comstock were sent immediately to Beaumont Farm and for the most part will be mated to Mr. MacKenzie's good son of Sain—El Salado, Jack Atkin.

◈ ◈ ◈

"Now that the Board has penalized Hal McKinney, on the grounds that he won a record of 2:06¾ over our halfmile track in 1914," writes Chas. Winslow, of Oklahoma City, "I do not understand just why they did it. His mile at our state fair was simply an exhibition; he was not racing against another horse, or in a class race, but simply to give an exhibition. It could not be called a win-race record, and according to my way of reasoning was a tin cup, or time, record. I am not interested in the matter, but feel quite certain that a misunderstanding exists regarding this so-called record of 2:06¾. Mr. Sebastian was never very neighborly towards me, but I would not let even a personal matter prejudice me. I would like to learn that the matter had been gone into more fully by the Board."—Horse Review.

A letter from Acting Secretary Gravatt of the Kings County Fair Association states that the tentative dates assigned Hanford are satisfactory and that a full program of purses for their fair will be announced at no far distant date. Woodland and Dixon are getting squared away and a little bit of cooperation from other points will result in the formation of a very pleasing little circuit.

◈ ◈ ◈

Peter Volo (4) 2:02 will succeed his famous sire as premier stallion at Patchen Wilkes Farm. Peter the Great has been transferred to "Bob" Strader's Forkland Farm and is quartered in what was once the parlor of the old residence at that estate, according to romantic grapevine specials emanating from the Blue Grass. Service contracts made by the former owners will be carried out at the old figure, $400, but for newcomers the fee is one thousand dollars, and a number of mares are being booked at those figures.

◈ ◈ ◈

Ed Johnson, who stuck to the Woodland track all winter and who for a time was in solitary possession of that plant, has switched his three-year-old Palite—Paprika gelding over to the pace and he is coming along very handily in the way of speed, while having gained a great deal since last fall in the way of general attractiveness. Del Dudley's pacing filly by Palite out of Friskarina 2:13¼ has also wintered nicely, and Ed has the real article in the way of a young wiggler by Airlie Demonio 2:05½, dam by Star Pointer, grandam Effie Logan, dam of four in 2:10, etc. This lad is a two-year-old and is the property of Charley Johnson of Woodland, who will probably send Ed a few more at an early date, including the "old hoss" himself. Airlie was not raced last year but served quite a string of mares at a good price and is in excellent condition to be prepared for racing again.

◈ ◈ ◈

A brand new curtain raiser for the short grass country was arranged for recently by the formation of the Nebraska-Midway circuit, of which H. B. Smalley of Nebraska City is circuit secretary, the dates for the five meetings being as follows: Benson, June 8-10; Nebraska City, June 13-15; Auburn, June 20-22; Aurora, June 27-29; Kearney, July 3-5. Four hundred dollar purses, every heat a race with twenty-five dollars additional to the horse standing best in the summary, will be the rule, with classes uniform through the circuit for 2:27, 2:22, 2:18 and 2:14 trotters and 2:25, 2:20, 2:15, 2:11 and free-for-all pacers. At each meeting there will also be a three-year-old trot and a three-year-old pace as well as a two-year-old trot, entrance to close on April first at five per cent, with one hundred dollars added to each class by the local association. The circuit promises to be well patronized and will be welcomed by trainers who are ready to race early.

◈ ◈ ◈

W. L. Snow pulled stakes early last week and with fourteen horses left the State Fair grounds at Detroit, Mich., for Memphis, Tenn., where he will get ready for another trip down the big line. Here is a list of the lot: Bingen Pointer 2:06¼, by King Bingen 2:19¾; Lady Colbert 2:18¼, by Colbert 2:07½; La-Veese, bay filly, four, by The Abbe 2:04 out of Ruth Bond, by The Bondsman; Harold T., brown stallion, brother to Michigan Queen 2:03¾; bay stallion, six, by a son of Onward Silver 2:05¼; Ruth Stackhouse, three-year-old filly by Peter the Great 2:07¼, dam by Liberty Chimes 2:22½; Miss Ginger, two-year-old filly by Peter the Great; Peter Laurel, three-year-old gelding by Peter the Great, out of Laurel Leaf 2:13¼, by Stam B. 2:11¼; Great Many, three-year-old filly by Peter the Great; Peter G., bay stallion, by The Wolverine 2:09¾ out of Irene McGregor; Mr. Guy, four-year-old bay stallion by Guy Axworthy 2:08¾, dam by Baron Wilkes 2:18. Others that will be in the Snow stable will be shipped direct from the various owners to Memphis.—Horse Breeder.

◈ ◈ ◈

Hi Hogoboom of Woodland, who disposed of most of his aged horses at the DeRyder sale in this city last fall, is working a nice lot of young things that are well staked in the local futurities. The older members of the present stable are The Bulletin 2:28½ and Man o' War, the latter winner of second money in the trotting division of the Oregon Futurity as a youngster and now a nicely matured five-year-old. Lily of the Valley and Eva Dungan are a pair of two-year-old fillies by Palo King out of dams by Iran Alto and both have had a lot of lick at the trot ever since they were broken. A yearling sister to Eva Dungan has already trotted an eighth in nineteen seconds and another Palo King filly of like age and out of a daughter of Diablo 2:09¼ is equally promising. Hiram's special prize, however, is a ten months old stud colt by Robert Bingen 2:11¼ out of Beautiful Bird by Nutwood Wilkes, grandam Expressive (3) 2:12½ by Electioneer, great grandam Esther by Express, etc. The youngster is a big fellow for the age and has convinced Hi that he is the making of a very great trotter, so great in fact that the price on him at this moment (unless it has been raised since last Saturday) is five thousand dollars. Out of all the trotters raced last season on the Grand Circuit, seven aged performers of this way of going won in excess of this figure. Hi is also handling a two-year-old pacer by Jim Logan 2:01¾ out of a Palo King mare and will try conclusions with the boys at Dixon on May Day with this fellow. He is a sturdy scamp with quite a turn of speed and can step quarters at a twenty gait now, so he is liable to prove troublesome in those halfmile heats.

Now that the old reliable and ever resourceful John A. McKerron has retired from business and taken to peaceful pursuits in the Gilroy neighborhood, some of the "boys" at various training points are having a hard time to get exactly what they want in the way of boots and other gear, especially of the odd size or special pattern variety. Walter Tryon of Sacramento came into this city one day this week with good hard money to spend for some little "kinks" of this kind—and still had it when he started home. Though a trifle "put out" by the failure of his trip on this score he cheered up considerably whenever anyone happened to mention Dixon Boy, his four-year-old pacer that turned the Sacramento track this winter two even seconds better than 2:10. Walter is pretty well convinced that the Boy is of the kind that will really do in any company with a bit of age and experience as he is sound and unhurt in any way and is bred to go the route and come back in good style, being by The Patchen Boy (3) 2:10¾ and out of Leota 2:23 by Diablo 2:09¼, grandam Trix Marshall by Nutwood Wilkes 2:16½. The Peter the Great two-year-olds in Walter's stable also bring pleasant thoughts at all times, and all of his horses are wintering very nicely.

◈ ◈ ◈

H. G. Angevine of San Jose, nothing daunted by the general "class" shown last fall by the two-year-old trotters that contested in the junior divisions of the coast stakes, is figuring on being right up with the best of the three-year-olds this fall with the good trotting colt Jake Logan by Nearest McKinney 2:13¼, dam Berta Logan by Bert Logan 2:16¼, sire of the fast pacer Dwight Logan 2:03¼ that Charley Valentine sprung on the Grand Circuiters at Columbus, and other good ones. Jacob is a sturdy youngster and as a two-year-old was rated by William Cecil as being a much better colt than was Cecil's former championship pupil, John A. McKerron, at the same age, giving some slight evidence of his real quality by trotting the final quarter of a mile in 2:28 in thirty-two seconds. He has come along nicely and is in the best of shape for getting ready for his engagements. Mr. Angevine's two-year-old colt by Jim Logan 2:01¾ out of the same dam has grown into a big husky boy, as was the owner's plan when he turned him out early last year after he had shown that he possessed a world of natural whizz, lining out an eighth in sixteen seconds when barely more than well broken. He will be pointed especially for the pacing division of the State Fair futurity in 1917 and promises to be "there or thereabouts" if no bad luck comes his way.

◈ ◈ ◈

Elmo Montgomery, who moved his horses from the state fair grounds back to the old familiar plant at Woodland shortly after that establishment changed hands, has a string of seven head of the Effie Logan family quartered comfortably in the stalls formerly occupied by the Woodland Stock Farm horses that were in training. Jim Logan 2:01¾, the champion pacer of the coast states, looks better than ever if anything, in excellent flesh and with his legs as smooth and hard and cool as when he was a three-year-old. The curb thrown out at the exposition track last spring has entirely disappeared and Elmo will prepare him for the free-for-alls this season. Lock Logan 2:07½, who has shown more whizz than almost any green pacer in the west, was turned out last summer after the exposition, having no engagements, and looks like the real article and no mistake. He has the general makeup of the other fast ones of the bunch that have gone before him and his owner believes him capable of racing in 2:03 this season. Just what will be done with him is not fully decided as yet, but he will be gotten ready and then sent to some good eastern trainer or raced by Elmo in the principal western meetings. Maxine (3) 2:15, the first of the Jim Logans to be raced and who won the pacing division of the Breeders' futurity in 1914, has matured into one of the finest looking five-year-old mares in the west, with a lot of heart and lung room and quarters of exceptional power. She showed a good deal of quality when in training before and should make a most useful pacer. A five-year-old bay gelding, Hal Logan by Jim and out of Sweet Hallie (dam of two) by American Hal worked in 2:22 last fall before being let up on for the winter, and the three-year-old John E. Logan by Demonio and out of Effie Logan is taking his lessons and showing natural speed in the way one would expect from glancing over his breeding. Two two-year-olds by Jim complete the bunch, one a filly out of a Demonio dam and the other a gelding called Marshall Logan, out of Leota 2:23 by Diablo 2:09¼, grandam that famous producer of extreme speed Trix Marshall by Nutwood Wilkes. Marshall had one hock hurt when a colt in the barn at the Marshall ranch at Dixon but seems to suffer no ill effects from the mishap at present and Elmo regards him very highly, as Leota is the dam of the three-year-old (in 1915) gelding Dixon Boy that worked the Sacramento track last December in 2:08 and is regarded by Walter Tryon as the very best green pacer he has ever had anything to do with. All the Jim Logan colts bear a good deal of resemblance to each other and are all good individuals, sturdily built and with a good turn of speed. There are three two-year-olds by him in training at the Woodland track all of whom can shade a twenty gait for a quarter of a mile right now, and if breeding was brisk he would be one of the best patronized pacing stallions in the state. Barring accidents Elmo will develop some high class performers from the material now in hand.

Thoroughbred Matters

THE SIRE OF HONEYWOOD.

Ever since the English stallion Honeywood arrived in the Nevada Stock Farm stables at the Pleasanton Driving Park last fall he has been the object of much attention and admiration on the part of visitors to that historic course, be they followers of the harness horse or the thoroughbred. In poor condition on his arrival as the result of a very rough journey, the son of Polymelus has improved wonderfully in the months that have intervened since his landing on American soil, and the impression spreads from week to week that George Wingfield's agents were most fortunate in securing him for their patron. Some time ago Honeywood was the subject of a dissertation on the part of "Audax," the turf and stud authority of our esteemed English contemporary, Horse and Hound, which was reproduced in these columns, while at a more recent date there appeared from the pen of the same writer the following interesting story of Polymelus, Pommern, and other members of the family which have made history so sensationally on English tracks in recent years:

Compared with his brother Jack, Mr. Sol Joel cannot be described as a fortunate owner, but he had at least one stroke of good luck, and that was when, in the Park Paddocks, Newmarket, on Thursday morning, September 27, 1906, he purchased Polymelus for 4200 guineas. Having bid 4000 guineas, he had virtually retired when Frank Hartigan, acting for the horse's then owner, Mr. David Faber, bid a further hundred, and it was only strong persuasion from Mr. Tattersall which tempted Mr. Joel to one more century, this enabling him to secure the horse, as the Weyhill trainer had already exceeded his limit—the 4000 guineas that Mr. Joel had already offered for Cyllene's handsome son. How splendid a buy this was most people know. The following Saturday week Polymelus, 4 yrs, 8st 3lb (D. Maher), cantered home five lengths ahead of Roseate Dawn, 5yrs, 9st, for the ten-furlong Duke of York Stakes, starting at 7 to 4 in a field of twelve. The next Tuesday Polymelus, with 5 to 1 betted on him, beat his only opponent, Gold Riach, by fifteen lengths for the Champion Stakes over the same distance as the Kempton Park race, and a fortnight later, also at Newmarket, in the Houghton week, he won the nine-furlong Cambridgeshire Stakes, under 8st 10lb, in Maher's able hands, by three lengths from Kaffir Chief, 4yrs, 6st 10lb. The competitors numbered twenty, and Polymelus, the medium of a very big gamble on the part of Mr. Joel and his friends, was an 11 to 10 chance, being much the hottest favorite on record for this famous autumn handicap. In 1907 Polymelus ran a bad third to The White Knight and Troutbeck in the Coronation Cup at Epsom, the only other runner being Polar Star, who started at 5 to 4 on, and in this race suffered his first defeat. The only other time the bay son of Cyllene and Maid Marian (a half-sister to Le Fleche and Memoir, and dam also of Ercildoune and Grafton, the latter being a remarkably successful sire in Australia) appeared on a racecourse was for the mile-and-a-half Princess of Wales' Stake of 4840 sovs, at Newmarket, when, carrying 9st 7lb, he won by two lengths from Nulli Secundus, 4yrs, 8st 11b, with seven more behind them.

In the four races he secured for Mr. Joel, Polymelus earned £8765, and from the first time his stock ran the horse proved himself a splendid stallion, heading the list of winning sires for the past two years. His first winner was Polish, who on June 6, 1911, secured the May Plate at Wolverhampton, and the others to score by him up to date are Black Jester (winner of the St. Leger, worth £6450, besides other races), Carpentia, Chantemerle, Chiddingstone, Corcyra, Fifinella, Honeywood, Indian Mail, Maiden Erlegh, Melga, Phalaris, Polistena, Polkerris (whose only victory was in the rich Coronation Stakes of £3300), Polloia, Pollywin, Polycrates, Polydamna, Polydamus, Polygamist, Polygram, Polymela, Polyphonic, Polystone, Pommern, Port Carlisle, Prince Igor, Romagne, St. Alf, and Stapleton. These have between them won eighty-seven races, worth collectively £65,893. Pommern, whose only fault is his German name, is certainly the best horse so far begotten by Polymelus, and he is a racer of very high class indeed, although I must see him perform another year before I am able to endorse what is written about Mr. Joel's champion under a certain admirable portrait of the horse, jockey, and owner—"The best horse of modern times."

THE TRIUMPHS OF POMMERN.

Mr. Joel was greatly disappointed when Polkerris failed to win the One Thousand Guineas of 1912, for he thought her certain to do so; but the race went to Tagalie, who afterwards won the Derby. The first "classic" event secured by the "pink and green-striped jacket and pink cap" was when Pommern won the Two Thousand Guineas, and the following Saturday I wrote as follows: "Pommern, foaled at the Maiden Erlegh Stud on March 22, 1912, had some sort of blood-poisoning in the spring of 1914, which affected his off hind leg, and was in consequence backward when running without distinction behind Good and Gay and Desmond M. at Ascot and Newmarket respectively. When Goodwood was reached, however, he had come nicely to hand, and cantered away with the Richmond Stakes, in which odds of 2 to 1 were laid on Follow Up, giving him 8lb, in a field of ten. He also ran for the Imperial Produce Plate at Kempton, and carrying 8st 12lb won by four lengths from the much more fancied King Priam, 9st 6lb. The latter beat Follow Up, 9st 1lb, by a head, with the other runner, Snow Marten, 8st 2lb, a long way last. Recently, when failing by three-quarters of a length to concede 15lb to Rossendale in the Craven Stakes over the Rowley Mile, I remarked, in commenting upon this race, how greatly Pommern was distressed in the Birdcage afterwards, and that it would either bring him on a lot or else do much harm. Well, he evidently benefited by that race; no horse could have been much fitter than he was on Wednesday. He is a very truly balanced, good-looking bay colt, who looks like winning the Derby." Owing to the war the great Epsom race had to be abandoned for the first time in its history, but on June 16th last Pommern won the New Derby, instituted in its stead, with great ease at Newmarket, and would with equal certainty have secured the 138th Derby Stakes on the Surrey hills if racing had taken place there. On September 15th, also at Newmarket, but on another course, Pommern trotted in for the September Stakes, run in lieu of the St. Leger, and he also secured the Limekiln Stakes, the races he has so far won for his owner being worth £12,072. That he should be reckoned on merits a Triple Crown champion there is no sort of question, for if the races for the Derby and St. Leger had been brought off nothing short of an accident could have stopped Pommern, who is a remarkably sound horse, from winning them. The winners so far are West Australian (1853), Gladiateur (1865), Lord Lyon (1866), Ormonde (1886), Common (1891), Isinglass (1893), Galtee More (1897), Flying Fox (1899), Diamond Jubilee (1900), and Rock Sand (1903).

EASTERN DATES FOR THOROUGHBRED RACING

Bowie, April 1 to 14—12 days.
Havre de Grace, April 15 to 29—13 days.
Pimlico, May 1 to 17—15 days.
Jamaica, May 18 to 24—6 days.
Belmont Park, May 25 to June 14—18 days.
Jamaica, June 15 to 23—8 days.
Aqueduct, June 24 to July 11—15 days.
Empire City, July 12 to 29—16 days.
Saratoga, July 31 to August 26—24 days.
Belmont Park, August 28 to Sept. 9—12 days.

Racing is to begin in New York May 18 and the schedule that was approved by the stewards of The Jockey Club provides for continuous sport in the State until September 9. This means ninety-nine days of racing, and it is exactly the same term as that of last year.

The schedule of 1915 called for 101 days, but in its arrangement the Saratoga meeting was to come to a close August 31. That date fell on Tuesday, and the Saratoga Association surrendered two days to bring the closing Saturday. This action made the schedule, in the matter of racing days, identical with this year's allotment.

The stewards have respected the wishes of Maryland in fixing the racing dates, and there will be no conflict. Maryland has become an important part of the Eastern racing circuit ,and the four associations there reached an agreement on a division of the time that provides for forty days of entertainment for that state, beginning April 1, before the New York season is opened.

As spring and summer dates were issued last year the circuit, including Maryland, called for 143 racing days, as against 139 that have been framed for this season, but the fact that Pimlico gave up its last day, Saratoga two days and Bowie had to close down April 3 on account of a heavy snow fall, brings that season down to the same racing time that has just been decided upon.

This year Saratoga will surrender none of its racing time for the very good and sufficient reason that the schedule brings the season at the Spa to an end on a Saturday. That will make the racing season identical with that of last year. There does not seem to be any good reason to expect Pimlico to surrender its last day and it is not probable that Bowie will lose any racing time by reason of stress of weather.

An analysis of the dates reveals that the Westchester Association, that conducts meetings at Belmont Park, is given much the best of it, but that is easily understood when the track facilities are taken into consideration. Counting the twelve days in the fall there will be thirty-five days of racing at the big course and this term includes five Saturdays, Decoration Day and Labor Day.

Jamaica has two Saturdays in its fourteen days of sport, one in each of the short meetings. Empire City, in its sixteen days of sport, is awarded three Saturdays.

This is an identical distribution of the Saturdays and holidays with the dates of last season in the State of New York.

There are some minor changes in the Saturday line in Maryland. Bowie is the same, with its two Saturdays in its twelve days of racing, but Havre de Grace opening and closing on Saturday gives that track three of those desirable days in a thirteen-day session, as against two last year with a fourteen-day meeting. Pimlico loses one Saturday when there are only two in its fifteen-day session.

Making a comparison with 1915 there are only three changes in the racing time, and two of them are offset by surrenders in 1915. These changes are at Havre de Grace, where thirteen days have been allotted as against fourteen, but the adding of another Saturday more than makes up for the one day curtailment. Pimlico is awarded fifteen days, as against sixteen last year, but in 1915 the sixteenth day was not used. The other change is at Saratoga, where twenty-four days are allotted, as against twenty-six last year, but in 1915 only twenty-four days were utilized.

Saratoga with its twenty-four days of racing has four Saturdays and the fifteen days at the Aqueduct track of the Queens County Jockey Club include three Saturdays and the Fourth of July.

The division of the Saturdays and holidays is of vast importance in a racing year and it has always been a bone of contention among the associations when the turf is in a prospering condition. Belmont Park will have opposition on Decoration Day as well as one of its Saturdays, when the Piping Rock Association will conduct its racing.

No reason exists for the Piping Rock Association paying the slightest attention to the Belmont Park dates. Last year though Belmont Park had a full eighteen days in the spring no consideration was shown the Piping Rock club, and the races were conducted at the big track while sportsmen of Locust Valley filled their dates. No provision was made for Piping Rock in the present schedule—probably it was not even asked after the treatment of last season—and it was natural that the most desirable days should be chosen.

Another clash with the amateurs comes at the second Jamaica meeting when there will be two days at Brookline. This is a conflict that is of no moment for the reason that the sport offered at the two courses is of a widely different nature and Brookline is so far removed from Long Island.

The change of scene for the New York opening will doubtless meet the hearty approval of racegoers. With the Metropolitan Jockey Club starting the season at Jamaica there are six days in which to obtain some sort of a line on horses before the running of the Metropolitan Handicap at Belmont Park May 25. Belmont Park is the logical racing ground for the big holidays and Decoration Day has become the natural property of the big Queens County course. Jamaica is not equipped to take care of the big crowds that will be out on such days, but at its second meeting, from June 15 to 23, it is natural to expect good racing weather.

Old Aqueduct, the home of the Queens County Jockey Club, is well taken care of when it is remembered that the fifteen days include three Saturdays and July 4, which falls on Tuesday this year. The Yonkers track of the Empire City Racing Association is kindly treated, even though the opening day is an anniversary of the Battle of the Boyne, for there are three Saturdays in the session.—Thoroughbred Record.

The west may have a representative in the Kentucky Derby this year, as George Wingfield is so well pleased with the quality shown by Skeer Face at New Orleans that he has about decided to give the youngster a whirl at the classic. The son of Hippodrame—Fleeing Venus has done well at New Orleans in George State's hands, proving a winner in fast time in the best of company. He is a product of old Kentucky but spent most of his "growing days" in Nevada and California, so he is at least a "professional westerner" by this time. Six weeks usually suffices to "convert" these eastern folks.

From the best advice obtainable at this time it seems quite probable that racing will be resumed at the Tia Juana course not later than the second Saturday in April, while President Coffroth and his associates are working hard to get things under way a week earlier. Transportation facilities are being rapidly put to rights and the work on the track and grounds is being pushed as fast as possible. A few horses still remain at the track, but most of those in attendance at the meeting are now quartered at San Diego and Los Angeles and are being kept in tiptop shape pending the reopening of the Lower California track. As the meetings at Juarez and New Orleans will be over by the time activities are renewed here on the coast quite an influx of horses is expected from those points and even better sport than that originally provided is confidently expected.

ROD, GUN AND KENNEL

CONDUCTED BY FISHER HUNT

DOG TRAFFIC BY COLLEGE DISCOVERED.

The San Francisco Chronicle is to be commended for its campaign against the practice of the University of California Medical School of buying dogs for vivisection purposes without making proper inquiry into their ownership. Since attention has been called to the butchering of these dogs at the Affiliated Colleges in San Francisco, lovers of dogs have entered complaints by the wholesale.

It is not only cruelty but many times pets, cherished by men, women and children, have been purchased from anyone who offers them for $1, and they have been made to suffer. The discovery was made that the Affiliated Colleges maintains a big kennel and dogs by the hundreds are quartered there. One man who had lost a dog secured a search warrant and went through the kennels. The sights he saw were pitiful. There were dogs of all breeds and descriptions that had been butchered and all bundled up with bandages and plasters.

That this practice has been going on for years is surprising. It was not generally known, although those in the neighborhood of the colleges were aware that any dog would be received and $1 paid. It is probable that hundreds of lost pets found their way to the operating table to go under the surgeon's knife while their fond owners hunted frantically about. This was true in several cases that we know about.

Clarence Nauman, the well-known San Francisco sportsman, lost his valuable hunting pointer Coke a couple of weeks ago. A groceryman tipped him to the fact that his pet might be at the Affiliated Colleges, and sure enough, he was there. Jim Griffin, the referee of boxing matches, hunted a week for his fox terrier Budge until he received a letter from the Affiliated Colleges that his pet was there. Investigation has since shown dozens of other cases.

Why lovers of dogs should pay license fees and take the chance of some one stealing their pets for the money paid at the Affiliated Colleges is something that the city authorities are investigating.

Dr. George H. Whipple makes the lame explanation that it is difficult to ascertain the ownership of the dogs the colleges purchase and that the pets are returned if the owners call for them. That's a nice state of affairs. How many people knew that the colleges made a practice of buying up dogs from any Tom, Dick or Harry and then butchering them? The place where they should secure their dogs, if it is absolutely necessary to have them to carry on the research work, is from the public pound, and then the chances would not be so great in getting some pedigreed pets.

LAW AGAINST RAISING TROUT.

Some legal stumbling blocks are in the way of persons desiring to go into the business of rearing trout, and particularly those who think they can take "wild' 'trout in the streams and strip them, says a Los Angeles paper.

In a letter from State Superintendent of Hatcheries Shebley, who is moving his office from the big hatchery at Sisson to San Francisco, he outlines the law as follows:

"Under the general trout law no one but the California Fish and Game Commission or the Bureau of Fisheries can take trout except with hook and line, and then only during the open season. They must also comply with the law regarding the limit of ten pounds and one fish during open season.

"Those building hatcheries must build them to the satisfaction of the Fish and Game Commission also, and subject to inspection by the deputies. No one but those deputized can 'strip' wild trout at all.

"Anyone placing dams in creeks will have to install fishways at once to allow the fish to have free passageway of the creeks, as provided in the fishway law. If they desire to operate a private hatchery or a trout farm they will have to get their eggs outside the State."

Several propositions have been placed on foot of late looking toward making money out of raising trout artificially. Eggs bought outside the State must be inspected, owing to the danger of importing disease with them.

* * * *

Spotfin croakers have reappeared in San Pedro Bay following the cleaning of the water after the storms, and catches of from a dozen to twenty have been made quite regularly by rod and reel men.

Ten years ago this news would have sent a trainload of ardent sinker-shyers scurrying to the beach with a basket of clams and two pounds apiece of salted sardines. The insurance business would have about stopped, and some other lines looked lonesome. But those were the days of six to ten-pound croakers. The present run takes six to ten to weigh as many pounds in the aggregate.

Where the big "spotfins" have gone to is one of those questions that anglers discuss and never solve. Too much oil, too much commerce in the bay, have been advanced, but the little ones are there. Many think the "run" must develop anew, and that these small fry are the forerunners of old-time sport, given a few years' longer growth.

Small catches of corbina are being made, the new pier south of Long Beach and at Redondo being fished quite heavily for the "off season."

Barracuda are running outside in spots, and one of the best day's business reported in many a moon with yellowtail was pulled off last week off White's Point outside San Pedro; but the scrappers are rather hard to locate, and not everyone succeeded in getting into them.

* * * *

Snow has melted from the hatchery site on Oak Creek in the Owens Valley, and Fish and Game Commissioner Connell is ready to begin work thereupon as soon as the outside bureaus will permit.

In a telegram to the Commissioner recently, Carl J. Walter of Independence said a warm rain had finished the snow in the valley and at the site. It had been melting steadily for a week previous, and the transportation of materials can begin as soon as the roads dry out a little.

This means the game birds of the Owens Valley which have survived the unprecedented snow conditions thus far, thanks to the food scattered by the Fish and Game Commission deputies and public-spirited citizens, will probably be saved for breeding stock.

NEW FLY-CASTING SCORING SYSTEM.

The fifth mid-winter tournament of the San Francisco Fly-Casting Club was a pronounced success. In spite of the very threatening weather conditions, a large number of members, with guests, were present.

For the first time in the history of fly or lure casting, the figuring of scores was done on a Demerit basis instead of the Percentage method always used before. With the Demerit system the work is much simplified, as the number of points or demerits the caster makes from a perfect score gives him his standing. Thus in heavy tackle accuracy, if a contestant made a total of 14 demerits, under the Demerit Method, his score would be 14, but on a percentage basis his score would be 99-60ths.

This plan of scoring by demerits was proposed at the meeting of the National Association of Scientific Angling Clubs, held in San Francisco in August, 1915, was favorably passed on, and eventually will be adopted by the N. A. S. A. C.

The conditions were not the best for good scores. The wind was variable and the weather was cloudy. The summary:

	1	2	3	4	5	6	7
C. G. Young	18½	14	28	31½	...	38	.....
Stanley Forbes	25	25	63	27½	...	31	133 4-5
T. C. Kierulff	19½	23	31	15½	114	42	106 3-5
P. M. Nippert	46½	47	40	17½	...	94	104 2-5
J. Springer	86	20	74	15	100	73	.....
W. J. Davis, Jr.	55½	24	52	14	108	27	92 2-5
J. F. Burgin	56	12	16	14	...	17	.....
H. A. Thomsen, Jr.	57½	25	57	20	105	116	.....
F. J. Cooper	56	25	27	15½	120	19	52 2-5
C. H. Kewell	60	21	32	17½	105	33	101
C. H. Gardner	44½	75	74	19	...	15	124 2-5
F. A. Webster	37	28	68	13	...	20	.....
C. A. Kierulff	50	57	50	20	80	...	.....
Dr. O. Westerfeld	105	65	71	....	...	178	.....
P. W. Shattuck	63	12	53	20½	...	23	.....
F. H. Reed	27½	47	49	13½	...	...	.....
H. B. Sperry	32½	16	44	23	120	18	.....
H. H. Kirk	78½	52	42	....	...	...	.....
Dr. W. E. Brooks	59	26	61	30	...	90	.....
W. D. Mansfield	32	..	..	11	122	32	.....
A. Sperry	68	..	..	30½	...	17	.....
Geo. C. Edwards	40	..	..	11	80	75	.....

Events were: 1, delicacy and accuracy; 2, heavy tackle, accuracy; 3, obstacle fly; 4, dry fly, accuracy; 5, salmon fly for distance; 6, one-half ounce lure, accuracy; 7, one-half ounce lure, distance.

Delicacy and Accuracy—first prize, Col. C. G. Young; second prize, T. C. Kierulff; booby prize, Dr. Otto Westerfield.

Heavy Tackle Accuracy—P. W. Shattuck first, J. F. Burgin second, C. H. Gardner booby prize.

Dry Fly Accuracy—W. D. Mansfield first, F. J. Cooper second, C. G. Young booby prize.

Obstacle Fly—J. F. Burgin first, H. B. Sperry-F. J. Cooper second, C. P. Kierulff-G. Edwards booby prize.

One-half Ounce Lure, Accuracy—C. H. Gardner first, A. Sperry second, Dr. Otto Westerfeld booby prize.

One-half Ounce Lure, Distance—Stanley Forbes first, C. H. Gardner second, and F. J. Cooper, booby prize.

Judges—F. J. Cooper, Joseph Springer, P. W. Shattuck and C. A. Kierulff. Referee—W. J. Davis, Jr. Clerk, Chas E. Hills, Jr.

GAME LAWS IN TEXAS, A JOKE?

Game laws in Texas are pretty much of a joke, if all things said about them are true. No one apparently pays any attention to the laws; hunters kill game in or out of season, and very few trouble their conscience by paying the license fee to hunt. Although there were over 100,000 hunters in Texas last year but 4,426 took out hunting licenses and a portion of that number were non-residents. The $7,637 collected from licenses will not go far towards policing 270,000 square miles. The legislature doesn't appear to be interested in the game laws, for if the lawmakers were they would change the law to make every hunter pay a license instead of allowing him to hunt without a license in his own county. The hunters travel to other counties, knowing that there are no game warden to "flag" them.

GREYHOUNDS ENTERED FOR COURSING.

Interest is being manifested throughout Superior California in the coursing meet to be held on the John Elliot ranch near Franklin tomorrow, March 5. Edward Walsh, organizer of the Capital City Coursing Club, stated that from the way dog owners are making application for entry blanks, there will be more applications than it will be wise to admit.

Dog owners of San Francisco, Richmond, Oakland and in fact from all cities and points in Superior California are interested in the meet and are clamoring to have their pet dogs entered.

There will be twelve or more Sacramento hounds entered. Pepper Kid, the so far undefeated champion, owned by Tom Kennedy, is entered and is the favorite in the betting. He is declared to be a fitting successor to Walsh's Sacramento Boy, which was the world's champion up to his death a few years ago.

P. Riely of San Francisco has four dogs to enter; E. Donohoe of San Francisco has three, and Roy Avery of San Francisco has written that if his hound is not in condition he will send east for one and have it in the race. Dan Hogan, a coursing enthusiast of Richmond, has four dogs that he believes have a chance for the stakes.

The stake will be from $70 to $100 cash for the first money and $50 or more for the second. The Rossiter Cup has reverted to the Capital City Coursing Club and will be awarded to the winning dog at the next meet. It will be a challenge cup and the dog that wins it must be kept in condition by its owner if the cup is to be retained.

WASHINGTON FIELD TRIAL REPORT.

Tacoma, Wash.—Once more showing heels to the remainder of the field, Lometa, the star pointer owned by F. D. Dean of Tacoma, won the All Age stake in the annual field trials of the Washington Field Trial Club. This marked the conclusion of the field work and the session was brought to a close with a banquet.

Destiny Buck, owned by A. H. Nelson of this city, was second in the All Age trials, while Queen Lou, owned by Billett and Van Deener of Anacortes, was third. So close was the competition between the last two that they were in the field more than an hour before a decision could be reached. The victory of Lometa, however, was clear-cut, as it was last year, and experts in field dogs ventured the opinion yesterday that the Dean entry was worth sending to the Middle West to enter some of the All-American meetings.

Next to the All Age stake in importance was the Open Derby, and in this another Tacoma dog was returned the winner. Destiny Buck, that finished second only to Lometa in the All Age running, was the winner in the open event. A. H. Nelson has a fine field setter in this dog and, with additional grooming, he will be good enough to enter any field in competition for national honors.

Momo's Lady Lou, owned and entered by Billett and Van Deveer, was second in this event, while R. C. Brown's Llewellyn Danstone's Duke was third. That these events have attracted no little attention among the owners and admirers of high bred dogs there is little doubt. The meeting was attended by many besides those who had entries and it is predicted that the Tacoma meetings will grow in size until they are the classics for field trials in this section of the country.

JOCKEY CHARLEY THORPE, MIDGET SHOT, DIED IN POVERTY.

From Omaha, Neb., comes the following announcement of the death of one of the big-hearted trapshooters of the west—a man whose great generosity so far exceeded his cool judgment that a life of luxury in its meridian, closed in poverty:

Charley Thorpe, who rode horses for kings, died in Omaha, Neb., in his room at 106 South Twenty-fourth street. Thorpe in his time had earned a fortune of hundreds of thousands of dollars—and spent it. He was 52 years old. Thirty-five years ago, as a farmer boy in Whiting, Iowa, he started riding horses in county fair races. He grew in ability, and in 1888 was drawing a salary of $12,000 a year.

He rode for famous American stables, and in 1900 was riding for the Prince of Wales. In 1903 he won the Paris Grand Prix, with its $65,000 purse, for the Count re Harcourt.

But age brought him weight and he retired with a fortune in 1905, when he established a stable at Geneva, Neb. The bottom fell out of the racing game and Thorpe's fortune began to vanish.

He loved to shoot, and with Billy Townsend, now dead, made up the "midget pair" which shot at tournaments all over the west.

He spent his money easily. He did not dissipate, but veteran trapshooters tell how he would toss up a $100 bill and say, "Here, boys, shoot for it."

Bad investments, misplaced confidence and carelessness of cash got the rest of his fortune, and a year ago Thorpe, spending his last hundred with the same ease he had dropped hundreds of thousands, came to Omaha and started tending bar.

His wife survives him.

Sportsmen's Row

To Dr. Edward Topham went the honor of breaking the first rock at the new Golden Gate grounds. Twenty or thirty years hence the boys will be talking about that for they say they are located in Alameda to stay.

* * * *

San Francisco will yet pull off a big shoot—perhaps the Great American Handicap—if N. A. Howard has his say.

* * * *

Our friend Lodge almost had Shell Mound Park fenced in. Now figure on Alameda, you hustler.

* * * *

Bill Ellis and Fred Webster can certainly show Clarence Haight, Fred Willett and Bill Price some pointers when it comes to finding a shooting grounds. Goodbye, Shell Mound.

* * * *

Dr. Eaton cannot see how a blue rock can get away from his this season. Doc figures on installing a trap in Jordan Park.

* * * *

The Golden Gate Club has been well named the "Hard Luck Club," but it shows that red fighting blood and talent cannot be suppressed. Easton Club, take notice.

* * * *

The Golden Gaters have scheduled a big merchandise shoot for the near future. Talk to your friends, members, and bring in some prizes.

* * * *

W. Stressler of the Selby Co. was the right man in the right place on Washington's Birthday. When the trap broke he made a record run to San Francisco and back with a new part. The thanks of the club are yours, Mr. Stressler.

* * * *

In the Placerville justice court William Maynard was arraigned and his trial set for hearing before Justice of the Peace Clark Howard at 10 o'clock on March 7.

Maynard was arrested on the complaint of Game Wardens Euell Gray and Chester Scroggs for killing a female deer during closed season. The officers were working on the case previously but it was not until last week that an arrest was made.

Maynard has retained George Thompson to represent him at the trial. He entered a plea of not guilty and demanded a full jury trial, which demand was granted. He was released on $100 bail. It is alleged that he killed a female deer in the Cosumnes vicinity. District Attorney Abe Darlington is prosecuting the case and it is expected that he will be assisted by Attorney Duke of the Fish and Game Commission.

* * * *

A writer on the sport alluring states that one of the schemes of A. W. Stowger, the new president of the Portland, Ore., Gun Club, is to have special events for the banker, business and professional man, with the idea of interesting them in "the sport alluring." Some western clubs put on special events for newspapermen in order to interest the "scribes" in the progressive movement.

* * * *

At the annual meeting of the Tacoma Bait and Fly Casting Club held February 11th the following officers were elected to serve for the ensuing year: President, R. B. Nason; vice-president, B. B. Perrow; secretary and treasurer, H. J. Nason; captain, W. J. Bailey; trustee for three-year term, C. R. Werner. Plans for the establishment of a permanent fishing preserve in the near future were considered. The outlook for a successful season both in contest work and fishing is very encouraging.—H. J. Nason, Secretary, Tacoma, Wash.

* * * *

James Mahsente, who has resided in the mountains near Ornbaun for a quarter of a century, reports great fatality among the deer on Ornbaun Mountain, close to Signal Ridge. After the recent snow storm he went over his ranch and discovered ten dead deer in one day, of all sizes, big and little. Hunters report the same state of affairs, and it appears that some contagious disease is carrying off the animals.

* * * *

Karl M. Anderson had the good fortune to recover a valuable Irish terrier pup that was lost last week for several days. His name was Madrona Beau Brummel and he was a gift from Capt. Tennant, who has extensive kennels in Seattle.

* * * *

C. C. Ward, a recent new member, is an old Eastern trap man. Ward started the game out Green Lake way a few years ago, which now is formed into the Green Lake Gun Club.

* * * *

In a recent shoot in Indianapolis Dr. O. R. Britton, 74 years of age, broke 96 targets out of 100 tried for. Father Time doesn't dim his shooting eye in the least. He has been banging away at the clay birds for a good many years and has been a contestant in shooting matches for fifty years.

* * * *

Hugh Poston, of Hercules Powder fame, came out to the Seattle grounds rather crippled up with rheumatism, but from the scores this evidently made no difference to Hugh, inasmuch as he was high score for the day and shot like a house a-fire.

Among "old-timers" seen on the Seattle grounds Sunday were Bill Stewart, Dr. Steel, Fred Charles, Dr. Jordon and W. S. Moreton. It sure did seem like old times with all these fellows around.

* * * *

The United Sportsmen's Camp of Wilkes-Barre (Pa.) will introduce a number of measures at the next session of the Pennsylvania Legislature. One of them will ask for the protection of quail for three years by a closed season; another prohibiting the use of silencers on shotguns in hunting, and others to prohibit hunting before sunrise; prohibiting the killing of spike bucks, and to abolish the provisions of the law giving one-half of the fines to the informer. The Sportsmen's Camp are interested in the betterment of present conditions and think that the game laws on the whole are very good.

* * * *

With the closing of the duck hunting season in Florida, Georgia and South Carolina on February 15 wild waterfowl shooting ceased until next September. The Weeks-McLean bill prohibits gunning at migrants in their northward flights before they reach their breeding grounds, raise another generation of ducklings and start for the south again.

* * * *

There has been little doing in the fishing line lately. The rains of last Sunday spoiled the fun for the boys that were brave enough to venture out. It is hoped that the weather will clear and give the rodsters a chance.

* * * *

Clarence A. Haight, secretary of the California-Nevada Association and the Golden Gate Club, telegraphed his office that he left New York on Thursday. He is going to return to the Coast by way of Los Angeles and San Diego and will visit with the southern tarhawks. Clarence is certain of a royal reception for he is a popular fellow.

GEORGE NEALE DID NOT SAY IT.

Editor, Breeder and Sportsman:—

Referring to the article in your February 19th number with reference to the introduction of the strawberry bass into California waters, in which it is stated that George Neale stated that these fish will supplant the "undesirable" Sacramento Perch, won't you please say that George Neale, or any one else, would be an ass to make such a statement.

You never can compare the Sacramento Perch with any other species of fish. It is par excellence a fresh water table fish, not excepting any.

The error no doubt occurred when I stated to a Sacramento news gatherer that the Crappie family, of which the strawberry bass is a member, would, I believe, supplant in numbers the once plentiful Sacramento Perch, unfortunately, just now about exterminated. Some one owes the Archoplites Interruptus an apology.

Yours very truly,

GEORGE NEALE.

Sacramento, Feb. 28.

RANCHER KILLS COYOTE FROM BED.

H. M. Spencer, a rancher who lives about five miles northwest of Wasco, Ore., was awakened one day recently by the cries of his dog. Dressing hastily, he seized his shotgun and went outside to see what the commotion might be about. He found a coyote fighting his dog.

Spencer, who is a good shot, had to fire more or less at random, because the coyote mixed it up so much with the dog he feared he might kill his own animal. At the firing of the gun, however, the snarling coyote charged him and Spencer ran into the house. He leaped onto the bed and as the coyote jumped for him, he struck the animal with the butt end of the gun, stunning it, and then clubbed the coyote to death.

It is presumed the coyote became maddened by the bites of the dog and fought back in a way that is unusual with these animals. At the time when Spencer clubbed the animal to death his wife and child lay on the bed, terrorized. H. E.

Portland, Ore.

SCANDAL ABOUT SAM HUNTLEY.

Looking over the trap-shooting dope of Sandy Griswold, the Omaha expert, we run across some scandal about Sam Huntley. We do not like to spread the bad news around but inasmuch as Huntley has been out here and was charged with getting into a number of jams it may be well to print what Sandy says in answer to a query he received:—

"His longest run — Well, I have no record of that, but can assure you that he is now, at the present time, making the longest run of his varied career—he has vanished, as from the face of the footstool, and the minions of the law are after him on charges of bigamy. It turns out that this fellow has a wife in no less than four cities in the United States and he is wanted by the authorities in each. Bigamy is not the only charge against him ,either.

"But, be the facts as they may, Huntley never did catch on very extensively with the shooters in Omaha, which city he claimed as his 'regular' home. He was a mysterious, reticent sort of a duck, and the subject of unfavorable comment many times on shooting grounds and in club houses. But enough of this, which I wot you, will be startling information for many of the shooters throughout the land."

NOTES HERE AND THERE.

Lewiston, Idaho.—Sportsmen of Lewiston and Lapwai are considering holding a magpie shoot in the Lapwai valley at an early date. It is proposed for a team of shooters from this city to visit the valley and pit themselves against a like team from Lapwai, the losers in the shoot to provide the winners with a feast. It is alleged by sportsmen that the magpie is allied to the crow and very destructive toward other members of the bird family, whose nests it visits and destroys the eggs and young.

* * * *

Moscow, Idaho.—Frank B. Jones of Little Potlatch and Phil Schooler of Genesee arrived in Moscow last week from a mountain lion hunt on the north fork of the Clearwater river. They brought with them the pelts of five large lions, one kitten and one lynx. The hunters state that it required several weeks' work to kill the animals. Both hunters stated that in their judgment, based upon actual count of dead deer partially eaten since the deep snow, that each cougar inhabiting central Iraho will average killing 50 deer yearly.

* * * *

Walla Walla, Wash.—Word has been received by Chairman J. H. Pedigo of the county game commission that 15,000 eastern brook trout have been assigned to Walla Walla county in addition to the fish previously assigned. They will be forwarded from the Spokane hatchery.

Seattle Association.—A record crowd of shooters turned out Sunday, Feb. 20, at the opening shoot of the Seattle Trapshooters' Association, at its Harbor Island grounds. The lineup numbered over ten squads. The first part of the program started in a dense fog, which soon cleared, the sun bringing out many additional shooters.

The club surprised itself with a brand new clubhouse, this being one of the many improvements now under way.

New members and new shooters were much in evidence and scores made by them were far above the average. Those shooting for the first time as members of the club were Fred Call, K. S. Lapp, W. F. Zwick, H. J. Lochow, A. W. Mathis, Guy W. McPherson, of Renton; Van M. Woodaman and Dr. W. E. Sturgis.

The honor of being the first lady member of the club has gone to Mrs. Mary C. Ruppe, who was on the grounds but did not shoot. She is only one of many others of the fair sex who will take up the sport alluring this year with the Seattle club.

Out of town shooters were A. Reihl, of Tacoma, and Guy McPherson, of Renton.

H. Poston, professional, carried off high honors with a score of 97. Hugh Fleming and Deskin Reid tied with 94 for high amateur score, these being made in the 100 target shoot of ten events each.

Four squads lined up for the handicap event of twenty-five targets. P. Gardiner and H. Poston tied with 23. The scores:

Twenty-five Target Handicap—Dr. Sturgis 17, P. Gardiner 23, F. J. Sheehan 8, C. E. McKelvey 22, Fred Call 19, M. Grossman 19, A. Reihl 22, D. Reid 17, Fred Landwehr 18, L. S. Barnes 18, J. A. Conklin 19, W. B. Taft 16, G. McPherson 14, L. H. Reid* 20, I. Fisher* 20, D. Rhodes 18, George Garrison* 15, George Hambright* 18, H. Poston* 23, C. E. McKelvey 20.

Coast Shooters Keeping Busy at Traps

Pacific Coast trap-shooting fans are eagerly awaiting the awarding of the two important fixtures of the season. The California-Nevada shoot will be placed tomorrow, if the directors of the association follow their announcement of reaching a decision by March 5th. So far San Jose and Vernon have made bids for the big events. O. N. Ford of the Garden City has been working industriously to secure the trap-shooting attraction and the scatter gun enthusiasts in the south have not been idle. The California-Nevada shoot will likely be staged in May or June and a large attendance is assured.

The Interstate Association has made no announcement as yet on where the Pacific Coast Handicap will be held. It is understood that Portland, Seattle and Spokane are in the field to hold the Coast fixture. This event will not likely be promoted until fall so there is no hurry to make the award. It is certain that one of the northwest cities will be favored for the handicap tournament was held in Southern California last season and it is only fair to switch it around so that shooters from all sections of the Coast will have an opportunity to get in the competition. For 1917 the Golden Gate club is lining up its forces to get the Pacific Coast Handicap.

* * * *

Bay View Club—No word has been received whether the Bay View Gun Club will shoot or not tomorrow. Perry A. Fox, the secretary, wrote Bill Price a couple of weeks ago that a start would be made on March 5th, but since then little has been heard from the Alameda shooters.

The Alameda Elks are booming things along with their new trap-shooting organization. Members are being enrolled right and left and plans have been completed for the big opening on the Golden Gate grounds on March 12th. They make up a bunch of boosters and should meet with a deal of success.

* * * *

San Jose Club—Editor, Breeder and Sportsman:—It rained the greater part of last Sunday but we had five blue rock tarhawks out andhad a nice 100 bird shoot. Mr. H. N. Rickelson of San Francisco, representative of the Winchester company, was with us and made himself proud by breaking 85 out of a 100. You are always welcome, Mr. Rickelson.

We will hold our first club shoot of the season on next Sunday, March 5th. I am looking for quite a turnout as the members have been anxious for weeks past to get out to the traps again.

Mr. George Anderson finished 500 tarhawks on Sunday and probably won the first American amateur trap shooters' medal in the United States, and easily the first one on the Pacific coast. He broke 415 out of 500. Well, George should be good for he has been at the trap game for 35 years. He is one of the oldest shots in point of years at the traps on the coast. And he can still show many youngsters how it is done.

The scores last Sunday were: O. N. Ford 97x100, C. H. Nash 90x100, G. H. Henderson 87x100, H. N. Nickelson 85x100, and A. B. Smith 83x100.

Yours respectfully,

O. N. Ford,

Manager and Sec'y San Jose Blue Rock Club.

San Jose, Feb. 29.

Guess the old Hammer is working in pretty good shape. The San Jose enthusiast was up to the Golden Gate club on Washington's Birthday and he returns home to duplicate the performance.

Vernon Club Shoot.—Despite the cold and windy weather conditions, sixty followers of the clay pigeons breaking game turned out at the Vernon Gun Club Sunday to compete in the seventeenth fifty-bird handicap event for the W. H. Wilshire trophy. An initial leg was annexed by "Arizona" Barham, who recently arrived in the city from the wild and woolly state. He shot from eighteen yards, and squelched forty-eight birds with ease. His nearest competitors were many. Robinson, Voorhies, Dr. Packard, J. F. Dodds and Famechon each scored forty-seven out of fifty.

It certainly is remarkable the way some of the Vernon cracks are shooting lately. The easterners are bound to sit up and take notice when they hear that such shooters as Dr. Packard are breaking 94 per cent from twenty-one yards, and shooters like Frank Mellus, Heinie Pfirrmann and Stanton Bruner breaking 85 and 90 per cent from twenty-two yards, and last but not least, a shooter like Billy Wilshire, the Cline-Cline gun doctor, breaking eighty-six out of one hundred with a 20-gauge gun. Yes, the Vernonites are breaking the clays from all angles and from all distances.

Several of the shooters have come to the front with great rapidity. Bill Dougherty of the Hoegee company, L. D. Blanchard and Louis Mellus have become so accurate at shooting at the clay birds that the handicap committee held a hasty and secret meeting and have placed them back at the twenty-one-yard range, and still they continue to break birds.

The four silver loving cups were contested for on Sunday for the last time. Class shooting governed the scores in this competition. Stan Bruner won in class A, Fred Grewell of the Hoegee company in class B, C. E. Groat, president of the Vernon Gun Club, in Class C, and Mrs. Groat in Class D.

Mrs. Groat shoots nearly every Sunday and usually hangs up excellent scores . She broke "forty."

The scores:

Wilshire trophy event—

Shooter—	Hdcp.	Targ.	Bke.

Smith 75—62, Foor 50—35, Harry Cline 100—77, L. D. Blanchard 25—25, C. E. Groat 125—106, S. R. Smith 25—21.

* * * *

Pastime Club Shoot.—Fledgelings, simon pure amateurs, featured the "come-back" shoot of the Pastime Gun Club at Dirtbird Roost last Saturday afternoon.

Eddie Overland Davies led off for the tenderlings and tackled 100 tarhawks, smashing 72 in approved style.

Bryan O'Rourke of Tammany Town also received his first degree as a wingshot. Bryan's right shoulder had a tough time getting acquainted with fun on the firing line. But the Irish like a scrap and Bryan fought it out in true Shamrock style, winning a 50 per cent score.

Which brings this sermon to the place where Nick Walters of Denver is introduced. When Nick showed up he didn't think he'd shoot—but he did. He rambled out to the firing line and blazed and blazed, quaffing with delight the joy bestowed by the Great Matted Rib. Nick busted 71 — pretty good for a novice!

Bob Walsh was high gun with 93, pointing in fine form. Tom Parry slipped into the charmed circle with 91, Tom Parker broke 85 and issued a challenge to any "oldest' 'trapshot on earth. Tom is 72. "Hip" Justins, the old time Remington "pro," hung up 55x60, whereat Martines Chick, once champion wingshot of the world, scolded "Hip" for letting five get away.

The score:

Bob Walsh, shot at 100—broke 93; Tom Parry 100—91, Tom Parker 100—85, "Overland" Davies 100—82, Nick Walters 100—71, Bryan O'Rourke 100—50, F. Knever 100—50, S. Andrews 60—50, "Hip" Justins 60—55, Drummond 20—18.

* * * *

Santa Ana Club—The Santa Ana Blue Rock Club was organized Wednesday evening of last week. The meeting was held at Hawley's gun store beginning at 7:30, and a large number of sportsmen gathered to become members of the club and take part in the weekly shoots.

A. Slaback is the prime mover in the organization, and reports great interest manifested during the past two Sunday afternoons on West Fifth street, at the city limits, where the shoots are held.

There were twenty-three participants in the shoot last Sunday, and 1000 blue rocks were given the bye-bye. Slaback and F. D. Leonard were highest with 18 out of 25, Leonard having fallen off two from the previous shoot.

Considerable interest is being manifested in the club, and it will likely have a very successful season..

Portland Gun Club.—Frank Van Atta was high man at the traps Sunday, Feb. 20, with 91 per cent. He also made high score in the Imperial Hotel diamond trophy match.

Scores on the Imperial Hotel diamond medal:—Al Seguin 16, Abner Blair 17, H. R. Everding 21, H. A. Pollock 16, A. W. Strowger 19,W. C. Bristol, with 20-gauge gun, 11; E. H. Keller 19, A. L. Zachrisson 23, J. C. Morris 19, Frank Van Atta 23, R. A. Tyler 19, Mrs. Ada Schilling 16, Miss Gladys Reid 11, C. C. Kelly 17.

The team shoot results among members of the Portland Gun Club—Miss Gladys Reed (captain) 12, E. B. Morris 21, J. C. Morris 19, E. C. Feller 23, H. R. Everding 23, A. W. Strowger 23, R. A. Tyler 16, total, 137. Mrs. Ada Schilling (captain) 24, C. J. Schilling 21, P. J. Holohan 25, J. P. Bull 19, W. C. Bristol, with 20-gauge gun, 11; D. Reed 22, H. A. Pollock 20; total, 142.

Regular practice scores: Mrs. W. A. Shaver, 50 per cent; D. F. Allen 76, James Reid 74, Al Seguin 71, Abner Blair 81, W. C. Bristol (with 20-gauge gun) 47, H. R. Everding 64, H. A. Pollock 66, E. B. Morris 74, A. W. Strowger 75, J. C. Morris 73, E. B. Van Arnam 79, E. H. Keller 75, J. P. Bull 81, P. J. Holohan 88, A. L. Zachrisson 50, Frank Van Atta 91, C. E. Feller 72, F. O. Joy 48, C. J. Schilling 82, D. Reed 75, R. A. Tyler 78, H. W. Robare 31, Mrs. Ada Schilling 75, Miss Gladys Reed 54, Mrs. E. H. Keller 45, B. E. Leonard 55, and C. C. Kelly 80.

* * * *

Big Time Gun Club.—Members of the Big Time Gun Club started on the work of preparing the grounds at the Schenk ranch in Fruit Ridge for the opening of the season next March, last Sunday morning. Many of the members turned out in their old clothes and put in the day working on the grounds and traps. Later on the grounds will be plowed.

* * * *

Tacoma Gun Club.—Opening the season of 1916 with a large field, the Tacoma Gun Club on Feb. 19th staged its initial shoot upon its range at Manitou Park. Not only was there a good field of amateurs to take part in the competition, but the professionals were well represented in their class.

McKelvey of Seattle was the high gun among the amateurs, while Van Eisenbies and Ml. Riehl were tied for second. McKelvey broke 93 out of 100 clay birds, while Eisenbies and Riehl broke 92 each.

Frank Riehl, the Tacoma professional, was the high gun among the pros., breaking 98 out of a possible 100, Reid of Seattle being second. The next shoot of the club will be held March 5, when the rounds of handicap shooting for the Mellinger gold medal will be inaugurated. Scores:

Professionals—Riehl 98, Hambright 97, Reid 94, Poston 93, Holohan 92, Fisher 87, Rhodes 84.

Amateurs—McKelvey 93, Eisenbies 92, A. Riehl 92, J. Cooper 90, Fleming 89, Griffin 89, Berens 85, Jensen 85, Coon 84, Aubrey 84, Railinger 82, Turnbull 81, Taft 81, L. Riehl 80, Brady 80, Dague 79, Campbell 79, Smith 79, T. Cooper 78, McAleer 77, Bales 74, Young 74, Baker 73, Hopkins 72, Holmes 68, Edwards 68, Vanderkinter 64, Mellinger 57, Gilchrist 57, Hendricks 48.

* * * *

Salt Lake Club.—The weather man made a horrible mess of things for the State Association shoot, which was held under the auspices of the Salt Lake Gun Club, on Washington's Birthday. However, there were twenty marksmen present.

Many of the scores made would be very creditable on a day when the conditions for shooting were much more favorable, and the race for the places of honor was very keen in both the professional and amateur classes.

L. A. Cummings won the high general average by breaking 140x150; he had nothing to spare, however, as Hood and Morgan were both on the job, breaking 144 and 143, respectively.

A. R. Bain headed class B by registering 129 breaks and leading J. F. and Asher Cowan, who were tied for second place by two targets. Sam Parr of the Bingham club set the pace in Class C by scoring 124x150, and carried off the second honors in this class.

The Lewis class system of handicapping was used, with two moneys in each class. This system has been adopted by the association for all of the one-day tournamentes, as it gives all of the contestants an equal chance to participate in the prizes.

The next shoot of the association will be held in Ogden on March 17, and if favored with good weather a large attendance is expected as the interest in the sport of trapshooting has increased a great deal throughout the state in the last year.

The following are the complete scores for the day. At 150 targets(with scores and classification)—

Class P—Cummings 145, Hood 144, Morgan 143, Anderson 131.

Class A—Reilley 142, Becker 138, Cook 138, Riter 136, Siddoway 126.

Class B—Bain 129, J. F. Cowan 127, Asher Cowan 127, Nelson 126, Luff 126.

Class C—Parr 124, Williams 124, Hays 122, Weightmann 110, Evans 96.

SOCIETY IN CHASE AFTER HARES.

Society swung out with mighty stride on Sunday in its first hare hunt afoot and all the countryside heard the baying of its beagles.

"To hounds! To hunds!" The cry went over the rolling hills, in and out the oaks, up and down—and society, a hundred strong behind the keen, swift canines, bagged one lone hare, or jackrabbit, as the day's net result. A great day's sport was had, however, and the beagles, brought over from the East by Mrs. C. Frederick Kohl, have undoubtedly come to stay. By the same token, this ancient and honorable sport, old to Europe and to the smart hunt clubs of the Atlantic seaboard, won its place alongside polo in the aristocracy of sports on the San Mateo peninsula.

Mrs. Kohl, organizer of the club, was mistress of the beagles and superintended the start of the hunt from the oak-covered lawn of her beautiful home at Easton. She picturesquely dressed the part with a costume the striking outdoor note in which was a [illegible] corduroy skirt.

Following the pack of dogs, which were in charge of a professional huntsman, came the whips—J. Cheever Chowdin, Francis J. Carolan, Charles Templeton Crocker and Harry Hastings. They wore a special hunting garb, consisting of black velvet hunting caps and coats, white corduroy trousers and leggings.

With a "ta-te-ta" from the horns and a mighty shout from the hundred followers, the beagles swung out over the Burlingame foothills at 3 o'clock. In about twenty minutes they crossed the first scent of the hares. The beagles set up the cry. After them came Mrs. Kohl and the whips and, following them, all "the field" of 100 or more. For a quarter of a mile the chase was hot. It was then discovered that the dogs were too fast for the field, and the professional huntsman blew his horn, calling the baying beagles back.

The hunt continued, some of those to whom the pace was too swift turning back.

Several scents were struck, with the same result—the huntsman called the beagles back—until just before sundown blinked over the hills, they came in sight of Prince Poniatowski's home and got their first and only hare.

The chase was swifter than ever to the finish, but they got him.

Dark came on and the beagles became separated. A vigorous hunt then started, not for hares but for hounds, and before they gave up for the night, all but two of the fourteen beagles had been recovered.

WOODCOCK'S FUTURE RESTS WITH SPORTSMEN.

Of late years much interest has centered around the efforts of the friends of the woodcock to obtain better laws for its protection and to educate the public to understand what a crime against nature and sportsmanship has constantly been committed in the hunting of this, one of North America's finest game birds. The habits of the woodcock are such that if given reasonable protection it will thrive and continue to be common even in a thickly settled country.

It nests on waste ground unfit for agricultural purposes and requires, as an inducement to remain through the summer, only a few square rods of soft dirt which can easily be probed by its long, sharp bill. With a wide breeding range in the Eastern States and southern Canada, but almost entirely limited to the United States, its future rests almost altogether with the sportsmen of our own country.

Formerly the woodcock was abundant throughout this whole area of a million square miles, and large bags were expected each year by the army of sportsmen who looked forward to the woodcock season as the climax of the year. Now its thousands have become hundreds, and even the most ardent woodcock hunters are seriously considering the advisability of the prohibition of all woodcock shooting for a series of years until the bird shall have recuperated from its merciless persecution.

This near extinction has been brought about by three agencies—winter storms, spring shooting and summer shooting. The woodcock winters in the Gulf States, and as far north as it can find unfrozen ground. Hence a very large percentage of the birds remain each winter in a zone of hazard, where at any time they are liable to be caught by an unusually severe freeze and brought to the verge of starvation. Scant mercy has been shown them by man at such times. For instance, one report states:

"A cold wave, accompanied by a gale, struck the coast of South Carolina on the morning of December 27, 1882, * * * and thousands of woodcock were shot in the village of Mount Pleasant. They were everywhere—in the yards, stables, streets and even plazas. Every one was out after the birds and every one had a bag full to overflowing. On that day alone fully 2,000 were killed. On December 28 they were so abundant that every clump of bushes contained ten to fifteen birds. One man killed 58 without moving from his 'stand' except to pick up the birds he killed. The flight lasted six days."

A still worse calamity overtook the woodcock on the coast of South Carolina in 1899, when, on February 14, the temperature dropped to 26 degrees Fahrenheit below freezing—almost zero weather. The woodcock arrived in countless thousands.

They were everywhere and were completely bewildered. Tens of thousands were killed by would-be sportsmen and thousands were frozen to death. The great majority were so emaciated that they were practically all feathers, and of course were unable to withstand the cold. One man killed 200 pairs in a few hours.

Even with the best of protection, it would take many years for the woodcock of that district to recover from such a catastrophe.

The woodcock not only winters as far north as it can but is the earliest spring migrant of the whole shore bird group, arriving in the latitude of New York City by the middle of March and reaching southern Canada by the end of that month.

This is, of course, before the leaves appear, and the ease with which the birds can then be seen makes this the favorite woodcock season of the pothunter. But in the whole year no season more destructive to the woodcock could be chosen. It migrates early because it wishes to nest early; indeed, in Louisiana some of the birds are so anxious to start their housekeeping betimes that they lay their eggs in December.

Throughout that part of the range north of the winter home egg dates are so early as to make it certain that the birds are already mated when they arrive at the nesting grounds. Under such circumstances it is plain that spring shooting of woodcock is little less than barbarous.

But the pothunter is not willing to allow even the few young that may be raised a chance to grow to their full size and reach the condition in which they will afford real sport to a true sportsman. Hunters have been in the habit of beating the thicket for young birds only half to three-quarters grown, and the July massacre of these immature and easily taken fledglings was the final stroke in the series of disasters which has brought this fine game bird to the verge of extinction.

WELLS W. COOKE,

Dog, Costing $4, Wins Highest Honors

BIG SURPRISE IN WESTMINSTER SHOW

At the Westminster show that closed in New York on February 25th there were over eighteen hundred dogs benched. Practically every known breed of dogs in the world was on exhibition. Many famous English kennels were represented. Holland Buckley, the English terrier expert, and owner of the Clomel kennels, intended to bring a string across to exhibit, but owing to the present conditions in England was unable to attend.

Many famous champions and near champions went down to defeat. The most noted dog to go down was the recently imported wire-fox terrier, Wycollar Boy, brought over by Andrew Albright expressly for the Westminster show. He was defeated by his famous sire, Wire Boy, of Paington, probably the best wire fox terrier living.

The most sensational win in the show was when Vickery Amen Gem, an Airedale terrier, was declared to be the best of her breed. She was bought in a London dog pound for about $4. Her owner trimmed her shaggy coat and got her in show condition and she won for the first time in the show. Since then she has been shown many times and has as yet to meet defeat.

W. Ross Proctor's famous brace of Sealyham terriers, Ivo Carodoc and Jessima, won everything offered. La France Model, a French bulldog costing $500, defeated Ch. Dr. De Lux, a $2,500 dog. De Lux was considered at the Hotel Astor show two years ago to be as near perfect as possible.

‡ ‡ ‡

The California Airedale Club, at its annual meeting last week, decided to promote a Futurity or Produce Stake for Airedale puppies, to which the club will add $400 or $500. All the entry fees will also go into the stake and liberal prizes will be awarded to the puppies of each sex winning the first four places.

It is proposed to have the first specialty show in the fall, but the first big stake may be made a 1917 event so that the breeders may have a chance to arrange their matings. It is expected that the rich prizes will call out a large entry and the class of pups will undoubtedly be high.

The following officers were elected for the coming twelve months: President, J. A. Folger; vice-president, A. J. Molera; secretary-treasurer, Nat T. Messer.

‡ ‡ ‡

Arman Decoutieux is planning to send his prize winner, Gaylight, to the Seattle show, which is to be held during the last week of March. Gaylight is in trim now and his owner expects him to repeat his triumphs of 1915 in the coming show season.

‡ ‡ ‡

Bob Iowland is mourning the loss of his Scottish terrier, Dandreggan Dinna Ken, which was killed by an automobile a week ago. Nowland will shortly move to a country place where he expects to establish a kennel of dogs of his favorite breed.

‡ ‡ ‡

Alex Stewart of Chicago, owner of the great Airedale Champion Abbey King Nobbler, has a new importation. The dog is Judicious Censor, said to be the longest headed dog in the country and an all-around good one, purchased recently in England by the Chicago fancier.

Mr. G. S. Paseman, Portland, Oregon, has moved to Missoula, Mont. Mr. Paseman reports a splendid litter of nine puppies out of his imported and winning bitch, Barkerend Yvonne (Barkerend Ruler ex Worthington Vena) by Ch. His Highness, all richly colored.

‡ ‡ ‡

Sealyhams are going stronger than ever in England, and a number are predicting that they will pass all other breeds in the immediate future.

‡ ‡ ‡

Mr. R. M. Palmer, of Seattle, reports the loss of several of his litter by Tintern Desire, but has three left in which he is placing his hopes for future winners.

‡ ‡ ‡

Mr. Hassett, Arcadia, California, reports a litter of seven by El Collado Royalist ex El Collado Propper Girl.

‡ ‡ ‡

Mr. P. I. Osburn, Long Beach, California, reports a litter of nine out of his imported bitch, Colne Modesty, by Cr. His Highness.

‡ ‡ ‡

A new pack of Beagles is to be established in Pennsylvania, with Mr. Burrill Huff as master. Mr. Harry East, manager of polo at Piping Rock and Islip, Long Island, N. Y., is now in England, and has been cabled to purchase eight couple of first-class little hounds. Members of the Polo Club at Greensburg, Pa., will hunt with Mr. Huff's Beagles.

‡ ‡ ‡

It will surely be good news for all St. Bernardom to learn that Mr. William C. Reick, publisher of The Sun and Evening Sun, New York, contemplates having another fling at the beautiful, heroic and noble breed. He has just obtained two, if not three, bitches from the kennels of his friend, Col. Ruppert, and these have gone into the Reick kennels at Seabright, N. J. Mr. Reick was one of those Americans chiefly responsible for the well-to-be-remembered St. Bernard boom of the late '80's and early '90's.

‡ ‡ ‡

The biggest price paid in this country for a Cocker Spaniel for a long time was for the black Durbar, the Canadian champion. One thousand dollars was the figure. His new owner, is H. K. Bloodgood, of New York and New Marlboro', Mass. Durbar is a leggier Cocker than the great majority of the winning Spaniels of his kind on this continent. It therefore appears there is an inclination to approach the style of the English Cocker, which is altogether the more workmanlike in build.

‡ ‡ ‡

Kennel Editor, Breeder and Sportsman: Mr. F. W. Wilds, the well known breeder of American bull terriers, has been extending his business recently in quite a gratifying manner. He has just shipped a six months old dog, the progeny of Black Joe out of Nigger Topsy, to T. K. Harris of Canton, Ohio, and has received an order for a three months old bitch from W. H. D. Vose of Lawrence, Mass. Mr. Wilds is naturally much pleased with the widespread reputation his dogs are attaining. He reports that his sales locally have been very good indeed during the past winter. Very truly,

Calgary, Alberta. W. N. GIBSON, Secretary

MIGRATORY BIRD LAW CONTINUES IN FORCE.

Washington, D. C.—A misleading statement has recently become current in newspapers of the Mississippi Valley and elsewhere, to the effect that the Department of Agriculture has suspended the enforcement of the Federal regulations under the Migratory Bird Law and by this means has enabled sportsmen, under State laws, to shoot wild fowl the coming spring.

Under the Federal regulations as they now stand, the season on all migratory wild fowl is closed until next autumn throughout the United States. Federal inspectors and wardens are required, and others interested in the protection of wild fowl are requested, to report to the Department of Agriculture all cases of violations of the regulations, in order that proper action may be taken.

The Department of Agriculture has no power to suspend the law or to pardon violations of the regulations. Doubtless the erroneous impression, on which the newspaper statements are based, has grown out of the pendency of litigation involving the constitutionality of the Act of Congress approved March 4, 1914, under which the regulations were promulgated. The lower Federal courts disagreed as to the validity of the statute and the issue was carried to the Supreme Court of the United States. The case was argued in the Supreme Court in October, 1915, but has not been decided.

Following the lower court decision, Congress appropriated money for the purpose of continuing the enforcement of the law. The Department of Agriculture is bound to report to the Department of Justice violations of the regulations if the Supreme Court should declare the law constitutional. All persons should, therefore, be warned of the danger they incur from failure to abide by the regulations.

THE FARM

LECTURES ON THE CITY MAN'S CHANCE IN AGRICULTURE.

How many city-dwellers there are who want to go to farming is evidenced by the fact that more than 450 have enrolled for the free lectures which are to be given in San Francisco at 8 o'clock every Tuesday evening until May 2, by speakers from the College of Agriculture of the University of Agriculture of the University of California, on "The City Man's Chances in Agriculture." These lectures are given under the auspices of the University and of the San Francisco Y. M. C. A., at the Y. M. C. A. Auditorium, Golden Gate avenue and Leavenworth street, San Francisco. Four-fifths of those enrolled are men. The great majority are between the ages of twenty-five and thirty-five.

The lectures to be given Tuesday evenings in March, April and May, will be as follows:

March 7, "The Poultry Business: What Chance is there for the City Man in the Business of Poultry Raising?—Egg Production." Professor J. E. Dougherty of the Poultry Division.

March 14, "The Dairy Industry," by Mr. V. C. Bryant, Extension Division.

March 21, "The Swine Industry," Mr. V. C. Bryant, of the Extension Division.

March 28, "Alfalfa: Production and Handling of this Forage Crop for Profit." Professor W. T. Clarke, of the Extension Division.

April 4, "Almond and Walnut Production," Professor R. H. Taylor of the Pomology Division.

April 11, "Apple and Pear Production," Mr. A. H. Hendrickson, or Professor A. V. Stubenrauch, of the Pomology Division.

April 18, "Stone Fruit Production: What Chance is there for the City Man in the Production of Cherries, Peaches, Apricots, Plums, Prunes, etc.?" Mr. A. H. Hendrickson, or Professor A. V. Stubenrauch, of the Pomology Division.

April 25, "Orchard Protection: Some of the Battles the City Man Going in for Agriculture will have to Wage," Professor Thomas Francis Hunt, of the Extension Division.

May 2, "Social Relations: Relation of Permanent Agriculture to the Social Welfare." Dr. Thomas Forsyth Hunt, Dean of the College of Agriculture of the University of California, and Director of the Experiment Station.

THE LIFE OF THE COLLEGE TEACHER.

Sometimes the lot of a college teacher, especially the young assistant professor, is considered a sad one. He is represented as a poorly paid pedagogue with shiny clothes.

Over in the Sacramento Valley a Berkeley business man has a ranch. The tenant went on this ranch thirteen years ago, with $75. The other day he died, leaving his widow worth $50,000. This Berkeley business man was looking for a tenant. He estimates the tenant's income would be from $4,000 to ..6,000 a year, and he would guarantee him $2,500 a year besides his home.

This Berkeley business man is very much committed to scientific agriculture, and has a rather good knowledge of men. So he got in touch with four promising men among the younger element of the faculty of the College of Agriculture of the Uniersity of California. Each was approached with his proposition. Each declined.

Commenting on the fact, the Berkeley business man said the men were too loyal to their work.

Evidently the life of a college professor in the University of California has its compensations.

FEEDING EXPERIMENT WITH AMBS TESTS ALFLALFA MEAL, COCOANUT, BARLEY.

An experiment in feeding lambs recenly completed at the University Farm, in which barley, cottonseed meal, and cocoanut meal were fed by the University of California to three different lots, in combination with alfalfa hay, and cocoanut meal found cheapest of the three, while of the two other lots one had a commercial mixture of alfalfa meal and molasses and the other the same with barley in addition. Before going into the feed lots the 125 head of lambs ran for thirty-five days on 125 acres of barley stubble, gaining almost one-third of a pound a head per day, thus paying for the stubble at the rate of 81 cents per acre.

The results of the corral feeding show that for the character of the lambs fed (that is, half fat at the beginning of the experiment), the commercial feed did not give economical gains at the price paid of $18 a ton. Cocoanut meal at $24 per ton gave chaeper gain than cottonseed meal at $35 or barley at $22.

The lambs were sold for 8½ cents a pound at auction at the Panama-Pacific Live Stock Show.

WAYS OF FATTENING LAMBS.

Tested at University Farm.

The University of California has recently completed a six-weeks test at the University Farm in fattening 249 lambs for market. The results indicate that silage, whether made of Indian corn, dwarf milo, or sorghum, can be economically used in a ration which includes barley and alfalfa hay.

Fifty lambs fed on alfalfa hay alone made a daily gain of less than one-fifth of a pound each, yet these lambs ate twice as much alfalfa hay as lambs which were given also barley or silage. Both the latter methods resulted in a daily gain of a third of a pound. The silage-fed lambs ate about the same amount of hay as the barley-fed lambs, but considerably less grain.

The quality of carcass of the grain-fed lambs, whether fed on silage or not, was greatly superior to that of the lambs fed only on alfalfa hay. Even if buyers should refuse to make any distinction in price when buying lambs differently fed, although the grain-fed lambs provide much better meat, yet the gain in value over the cost of feed consumed, at the normal prices of barley, alfalfa, and silage, has been proved about the same in feeding silage or barley as in feeding alfalfa hay alone.

A "365" Day Liniment

YOU ARE SAYING TO YOURSELF—"If I only knew of something to stop that Backache—help my Rheumatism—cure my Neuralgia, I would send and get it at once."

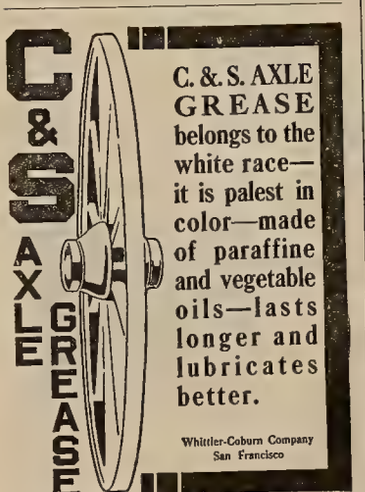
Get It. Gombault's Caustic Balsam will give you immediate *Relief.* A Marvelous Human Flesh Healer and a never failing remedy for every known pain that can be relieved or cured by external applications. Thousands testify to the wonderful healing and curing powers of this great French Remedy. A Liniment that will soothe, heal and cure your every day pains, wounds and bruises.

Gombault's Caustic Balsam
The Great French Remedy
Will Do It

It Helps Nature to Heal and Cure. Penetrates, acts quickly, yet is perfectly harmless. Kills all Germs and prevents Blood Poison. Nothing so good known as an application for Sores, Wounds, Felons, Exterior Cancers, Burns, Carbuncles and Swellings.

"I had a bad hand with four running sores on it. The more I doctored the worse it got. I used Caustic Balsam and never needed a doctor after that." —Ed. Rosenburg, St. Ansgat, Ia.

Mrs. James McKenzie, Edina, Mo., says: "Just ten applications of Caustic Balsam relieved me of goitre. My husband also cured eczema with it, and we use it for corns, bunions, colds, sore throat and pain in the chest."



A Safe, Reliable Remedy for Sore Throat, Chest Cold, Backache, Neuralgia, Sprains, Rheumatism and Stiff Joints. Whenever and wherever a Liniment is needed Caustic Balsam has no Equal.

Dr. Higley, Whitewater, Wis., writes: "I have been using Caustic Balsam for ten years for different ailments. It has never failed me yet."

A liniment that not only heals and cures Human Flesh, but for years the accepted Standard veterinary remedy of the world.

Price, $1.50 per bottle at all Druggists or sent by us express prepaid. Write for Free Booklet and read what others say.

Pleasanton Driving Park

PLEASANTON, CALIFORNIA

offers for service for the season of 1916 the following stallions:

THE ANVIL 2:02 3-4

Fastest trotting stallion ever offered for service in California, and fourth fastest entire trotter in the world

Son of St. Valiant Vincent 2:11¾ (by St. Vincent 2:13½ out of the triple producer Grace Lee 2:29¼ by Electioneer 125); dam Amy Smith by Emperor Wilkes 2:20¾, sire of Princess Eulalia (4) 2:09¼, etc.; grandam by Hambletonian 539.

The Anvil is regarded by Edward F. Geers as one of the very greatest trotters that he has ever raced. For five years the pair of Tennesseeans went to the races together and in that time were but twice unplaced, while winning a total of fifteen races, including the historic M. and M.

As an individual he is most pleasing, not too large or coarse in any way but smoothly and compactly made and "all horse" in every line. He is a perfect headed, pure gaited trotter, with the very best of disposition, and is destined to become a very great sire of trotting speed. His opportunities in the stud have been very slight as he has been retired from racing only since the close of 1914, and has but three or four foals now three years old. He was selected to head the stud at Pleasanton Driving Park not only on account of his great qualities as a race trotter, but because one of his first foals, Anvilite (2) 2:22¼, with a trial of ten seconds or more faster, is in every way the greatest colt trotter ever handled by C. L. DeRyder. The services of The Anvil are recommended to you without reserve.

Fee for The Anvil 2:02¾, $100 with usual privilege

Vernon McKinney 2:01 1-2

Fastest member of the great family of McKinney 2:11¼

Sire of VERNA McKINNEY (2) 2:13 (his first foal raced), fastest two-year-old pacing filly of 1915.

Son of Guy McKinney 37625 (by McKinney 2:11¼ out of Flossie Drais by Guy Wilkes 2:15½); dam Maud Vernon by Mount Vernon 2:15¼, sire of the dams of Leata J. 2:03, etc.; grandam Mag by General McClellan, sire of the dams of Mack Mack 2:08, etc.

Vernon McKinney's racing career was not an extensive one but will long be remembered for the excellence of his performances, as his winnings include a Chamber of Commerce stake in time very near the record for that event at the time, and he is the fastest of all the McKinneys.

He is a horse of rare qualities in the way of individual excellence, almost ideal in behavior and temperament in harness or out. Since his retirement he has been a popular horse in the stud and our claim that he would prove a very great sire of pacing speed has been fully substantiated, his first foal to be raced being the season champion for the age and gait in 1915, a most excellent testimonial to his potency. He is a very sure breeder, his get are uniformly endowed with natural speed and the physical and mental requirements of modern race horses and find ready sale at most gratifying prices.

Fee for Vernon McKinney 2:01½, $50 with usual privilege

The best of care taken of mares in any manner owners may desire, but no responsibility assumed for accidents or escapes. Address for particulars

CHAS. L. DeRYDER, Superintendent, PLEASANTON, CAL.

MR BROODMARE OWNER, do you realize the importance of the simple facts that sixty of McKinney's sons and nearly fifty of his daughters are producers of standard performers? That the McKinneys won more money than any other family in 1915? That the McKinneys won the largest percentage of the futurities, both east and west, in 1915? That McKinney has more sons to sire 2:10 performers than any other stallion living? Keep these facts in mind, and remember that I offer you the services of

THE VERY BEST SON OF McKINNEY

CARLOKIN 2:07 1-2 EXHIBITION MILE 2:05 1-4

Champion Trotter and Champion Sire of Trotters in the West

Reg. No. 36548. Licensed Pure Bred, Cert. No. 41.

Mahogany bay. Height 15.1½. Weight 1060.

Sire of ESPERANZA (3) 2:09, only three-year-old to win every trotting stake for that age on the Pacific coast, and also the following colt performers:

The Lark (4)	2:09½	Carsto (2)	2:22½
Ethel D. (3)	2:11	Helen Belle (2)	2:22½
Carl (3)	2:14¼	Carlschen (2)	2:23
Doctor S.	2:14½	Santiago (3)	2:24¼
Johnny Dugan p (3)	2:16	May Marian p (3)	2:24¼
Hermes (2)	2:16½	Carlrich p (2)	2:24½
John Warwick (2)	2:17	El Carbine (2)	2:27½
Nicola B. (3)	2:18½	Eileen C. (3)	2:29
Miss Carlokin p	2:20	Carlos (2)	2:29¼
Carleta (2)	2:20¾	Fulton G. (2)	2:30

Carlokin is the best son of McKinney not only by performance but by breeding as well, his dam being the famous producer Carlotta Wilkes, whose ten performers include four with records below 2:10, while his grandam and great grandam were also producers, by Alcantara and Clark Chief. He has demonstrated that he sires more early and extreme speed than any other stallion in California, and his get are courageous race horses, endowed with soundness and wonderful vitality.

Fee: $75 the season, usual privileges; details on request.

A world's champion as a yearling, record (1) 2:19½; unbeaten as a two-year-old, a famous futurity winner at three, and at six years of age the "sire of the day" in California, his first crop of two-year-olds including

NATALDAY (2) 2:13½

Champion two-year-old race trotter of the Pacific Coast, winner of Pleasanton and State Fair Futurities, 1915

FIESTA LOU (1) 2:25, (2) 2:22½, pacer, half-mile track records, separately timed in a race in 2:14½.

GOLDSMITH LOU (2) 2:29, trotter, breeder's record on halfmile track.

BILLIE BOYD (2) 2:30, trotter, breeder's record on halfmile track.

SELMA PALEY (2) trial 2:26½, trotter, public trial on halfmile track.

Colts and Fillies by WILBUR LOU Always on Sale

Wilbur Lou is by the great race horse and sire Kinney Lou 2:07¾, out of the triple producer Louise Carter (3) 2:24, grandam the famous Ingar, dam of 6 including John A. McKerron 2:04½, etc.

Breed to him for "Horses that will race." Fee for 1916, seventy-five dollars with usual privilege or money refunded at our option. Write for detailed particulars, all information gladly furnished.—Licensed Pure Bred, Cert. 23.

HEMET, CAL.

Derbertha Bells

Licensed Pure Bred, Cert. No. 226

NO. 60907 :: A. T. R. RULE 1.

Derbertha Bells, foaled 1911, stands 15.3, weighs 1200 pounds and is a solid dark bay or brown of magnificent conformation, style and trotting action. His breeding, too, is of the best, tracing 20 times to Hambletonian 10—5 through Electioneer, 5 through George Wilkes, 4 through Strathmore and 4 through Abdallah 15 (the big four of the sons of Hambletonian) and twice through his daughters; balanced by 18 crosses to Mambrino Chief 11—five of these through his greatest son Mambrino Patchen 58 (leading progenitor of the dams of trotting sires); 25 crosses to Imp. Bellfounder, 8 to Henry Clay, 8 to Imp. Trustee, 5 to Pilot Jr. 12, and sustained by such other famous broodmare sires as The Moor, A. W. Richmond, Black Hawk, St. Clair, Geo. M. Patchen, Grey Eagle, Imp. Glencoe, Williamson's Belmont, etc. His broodmare inheritance is incomparably great — 5 crosses to Green Mountain Maid (dam of 9 including a world's champion and 4 sires including Electioneer, the world's greatest trotting progenitor), 3 crosses to Alma Mater (dam of 8 and 7 sires, including Alcyone and Alcantara), and one each to Miss Russell (dam of 8 including Maud S. 2:08¾ and 6 sires including Nutwood, the world's greatest broodmare sire), Dolly (dam of 4 and 5 sires, including Director and Onward), Beautiful Bells (dam of 11 trotters including 4 world's champions and 9 sires) and Minnehaha (dam of 8 including a champion yearling and 6 sires). These are the greatest mares of history in number of descendants in the standard list, to which add two crosses to Bertha (the only mare with 2 in 2:04½, 5 in 2:10 and 13 in the list; with two 2:05 producing sons, five 2:10 producing sons and two other sons with produce only a fraction slower).

This pedigree contains the blood of 20 mares (counting duplicates) with an average of 9 performers each and presents an aggregation of family founding sires and dams unexcelled, if not unequaled. Neither is it necessary to confine ourselves to the standard or even to the 2:10 list, or go into the musty records of the distant past for examples of the prepotency of these blood lines in the production of speed, but we can easily and abundantly demonstrate their value in speed of the first flight in the present generation. He has 1 two-year-old and 2 yearlings that stamp him as a sire entirely worthy of his superlative antecedents, as they (like their sire) are uniformly large, handsome, intelligent, tractable and of great speed promise. Come and see them and the new crop and you will breed to him. Fee $25 the season with return privilege. Tabulated pedigree upon request.

J. W. PENDLETON,
1601 Seminary Avenue, Oakland, California

Don't Make a Mistake by not Breeding to the Great

KING LILLY POINTER

Registered No. 5223.

By the great Star Pointer 1:59¼, 3183, dam Lilly S. by Direct 2:05¼, 20113,—two world's champions for many years.

Second dam the great race and broodmare Lilly Stanley.

King Lilly Pointer is a green horse with remarkable speed. With very little work he has paced a mile on the Los Angeles track in 2:08¼ with ease. He goes without straps and has paced a half in 1:01¼ in third position all the way around, and has easily stepped quarters in 29 seconds. In another work out he went to the quarter in 30½ seconds, the second eighth in 14 seconds, finishing the last quarter in 30 seconds, going the seventh eighth in 14 seconds,—a 1:52 gait.

He is a seal brown in color, 15.2½ hands high, weighs 1100, and his get prove that he will be a sire of high-class race horses.

Fee $35 cash with return privilege, or right of substituting another mare. Best of care taken of mares, but no responsibility assumed for accidents of any kind.

Address for particulars, tabulated pedigree showing that he is the greatest bred pacing stallion in the United States,

W. H. NESMITH, 4218 S. Figueroa St., Los Angeles, Cal.

King Lilly Pointer can be seen at Los Angeles Exposition Park. Phone Home 28446.

THE HIGHEST YEARLY AMATEUR AVERAGE ON RECORD

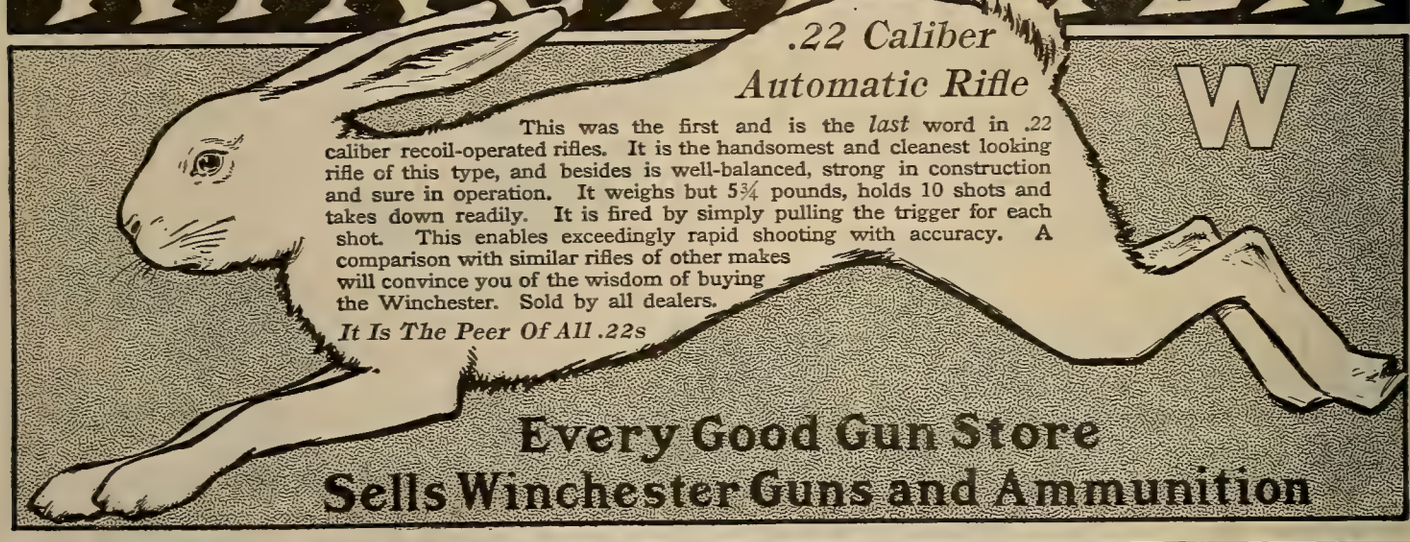
THE OFFICIAL HIGH HONORS

FOR THE YEAR 1915

WAS WON BY MR. WOOLFOLK HENDERSON, OF LEXINGTON, KY., USING

Peters SHELLS

Woolfolk Henderson



He Shot at 2800 Registered Targets, Broke 2731; Percentage .9753

The wonderful record of Mr. Henderson in 1914, when he won the Four great amateur honors, is still fresh in the minds of the shooting fraternity. In that year he captured the Grand American Handicap, the Single Target and Double Target Championships of the United States and the High Amateur Average. His performance in 1915 is therefore but the continuation of a marvelous and thoroughly consistent record, made possible by ammunition of superlative quality.

PETERS SHELLS have been used by the winner of the United States High Amateur Average (official) FIVE OUT OF THE PAST SIX YEARS

THE PETERS CARTRIDGE CO., PACIFIC COAST BRANCH . . . . **585-587 Howard Street, SAN FRANCISCO, CAL.**

WINCHESTER

.22 Caliber Automatic Rifle

W

This was the first and is the *last* word in .22 caliber recoil-operated rifles. It is the handsomest and cleanest looking rifle of this type, and besides is well-balanced, strong in construction and sure in operation. It weighs but 5¾ pounds, holds 10 shots and takes down readily. It is fired by simply pulling the trigger for each shot. This enables exceedingly rapid shooting with accuracy. A comparison with similar rifles of other makes will convince you of the wisdom of buying the Winchester. Sold by all dealers.

It Is The Peer Of All .22s

Every Good Gun Store Sells Winchester Guns and Ammunition

ASK SHOOTERS ABOUT THE SPEED SHELLS

They'll tell you that the Remington-UMC Steel Lining, found only in "Arrow" and "Nitro Club" Speed Shells, grips the powder charge, corners the explosion and puts all of the punch straight ahead—

Results: More speed, greater penetration, higher averages afield and at traps. And there are many more reasons for "Speed Shell" superiority. You can buy "Arrow" and "Nitro Club" Speed Shells at live sporting goods dealers wherever the Breeder and Sportsman is read.

Send for "Little Talks with Sportsmen From Coast to Coast" —it's a booklet full of interesting shooting experiences by men who know. A postal card will bring your copy.

TRAINING THE HOUND

A PRACTICAL TREATISE ON THE TRAINING OF FOX HOUNDS, BEAGLES, AND COON HOUNDS.

The system of training advocated is simple and effective, so that anyone who carries out instructions can easily develop a foxhound, a beagle or a coon dog to the highest state of usefulness or organize a pack in which each hound will work independently and at the same time harmoniously with the others. The subjects are: The Hound's Ancestry, History, Instinctive Tendencies, English and Native Hounds, Developing the Intelligence, Training the Foxhound, Voices and Pace of the Hound, Qualities of Scent, Manners, Training the Coon Dog, Coon Hunting, Training the Beagle, Forming a Pack, Field Trial Handling, Faults and Vices, Conditioning, Selecting and Rearing Puppies, Kennels and Yards, Diseases of Hounds and Their Treatment. The chapters on field trial training and handling are alone worth the price of the book, which is one that every man who loves the voice of a hound should read.

The book contains 224 pages, is clearly printed, nicely bound, and handsomely illustrated with bloodhounds, various types of English and American foxhounds, beagles and cross-bred dogs for 'possum and coon hunting.

Price, in heavy paper cover, $1; $1.50, postpaid.

BREEDER AND SPORTSMAN

LUME LXVIII. No. 11. SAN FRANCISCO, SATURDAY, MARCH 11, 1916. Subscription—$3.00 Per Year

A candidate for the three-year-old trots this season
JAKE LOGAN
by Nearest McKinney 2:13¼ and out of Berta Logan by Bert Logan 2:16¼—Owned by A. G. Angevine of San Jose and trained there by William Cecil.

Pleasanton Driving Park

PLEASANTON, CALIFORNIA

offers for service for the season of 1916 the following stallions:

THE ANVIL 2:02 3-4

Fastest trotting stallion ever offered for service in California, and fourth fastest entire trotter in the world

Son of St. Valiant Vincent 2:11¾ (by St. Vincent 2:13½ out of the triple producer Grace Lee 2:29¼ by Electioneer 125); dam Amy Smith by Emperor Wilkes 2:20¾, sire of Princess Eulalia (4) 2:09¼, etc.; grandam by Hambletonian 539.

The Anvil is regarded by Edward F. Geers as one of the very greatest trotters that he has ever raced. For five years the pair of Tennesseans went to the races together and in that time were but twice unplaced, while winning a total of fifteen races, including the historic M. and M.

As an individual he is most pleasing, not too large or coarse in any way but smoothly and compactly made and "all horse" in every line. He is a perfect headed, pure gaited trotter, with the very best of disposition, and is destined to become a very great sire of trotting speed. His opportunities in the stud have been very slight as he has been retired from racing only since the close of 1914, and has but three or four foals now three years old. He was selected to head the stud at Pleasanton Driving Park not only on account of his great qualities as a race trotter, but because one of his first foals, Anvilite (2) 2:22¼, with a trial of ten seconds or more faster, is in every way the greatest colt trotter ever handled by C. L. DeRyder. The services of The Anvil are recommended to you without reserve.

Fee for The Anvil 2:02¾, $100 with usual privilege

Vernon McKinney 2:01 1-2

Fastest member of the great family of McKinney 2:11¼

Sire of VERNA McKINNEY (2) 2:13 (his first foal raced), fastest two-year-old pacing filly of 1915.

Son of Guy McKinney 37625 (by McKinney 2:11¼ out of Flossie Drais by Guy Wilkes 2:15¼); dam Maud Vernon by Mount Vernon 2:15¼, sire of the dams of Leata J. 2:03, etc.; grandam Mag by General McClellan, sire of the dams of Mack Mack 2:08, etc.

Vernon McKinney's racing career was not an extensive one but will long be remembered for the excellence of his performances, as his winnings include a Chamber of Commerce stake in time very near the record for that event at the time, and he is the fastest of all the McKinneys.

He is a horse of rare qualities in the way of individual excellence, almost ideal in behavior and temperament in harness or out. Since his retirement he has been a popular horse in the stud and our claim that he would prove a very great sire of pacing speed has been fully substantiated, his first foal to be raced being the season champion for the age and gait in 1915, a most excellent testimonial to his potency. He is a very sure breeder, his get are uniformly endowed with natural speed and the physical and mental requirements of modern race horses and find ready sale at most gratifying prices.

Fee for Vernon McKinney 2:01½, $50 with usual privilege

The best of care taken of mares in any manner owners may desire, but no responsibility assumed for accidents or escapes. Address for particulars

CHAS. L. DeRYDER, Superintendent, PLEASANTON, CAL.

MR BROODMARE OWNER, do you realize the importance of the simple facts that sixty of McKinney's sons and nearly fifty of his daughters are producers of standard performers? That the McKinneys won more money than any other family in 1915? That the McKinneys won the largest percentage of the futurities, both east and west, in 1915? That McKinney has more sons to sire 2:10 performers than any other stallion living? Keep these facts in mind, and remember that I offer you the services of

THE VERY BEST SON OF McKINNEY

CARLOKIN 2:07 1-2 EXHIBITION MILE 2:05 1-4

Champion Trotter and Champion Sire of Trotters in the West

Reg. No. 36548. Licensed Pure Bred, Cert. No. 41.

Mahogany bay. Height 15.1½. Weight 1060.

Sire of ESPERANZA (3) 2:09, only three-year-old to win every trotting stake for that age on the Pacific coast, and also the following colt performers:

The Lark (4)	2:09½	Carsto (2)	2:22½
Ethel D. (3)	2:11	Helen Belle (2)	2:22½
Carl (3)	2:14¼	Carlschen (2)	2:23
Doctor S.	2:14½	Santiago (3)	2:24¼
Johnny Dugan p (3)	2:16	May Marian p (3)	2:24¼
Hermes (2)	2:16½	Carlrich p (2)	2:24½
John Warwick (2)	2:17	El Carbine (2)	2:27½
Nicola B. (3)	2:18½	Eileen C. (3)	2:29
Miss Carlokin p	2:20	Carlos (2)	2:29¼
Carleta (2)	2:20¾	Fulton G. (2)	2:30

Carlokin is the best son of McKinney not only by performance but by breeding as well, his dam being the famous producer Carlotta Wilkes, whose ten performers include four with records below 2:10, while his grandam and great grandam were also producers, by Alcantara and Clark Chief. He has demonstrated that he sires more early and extreme speed than any other stallion in California, and his get are courageous race horses, endowed with soundness and wonderful vitality.

Fee: $75 the season, usual privileges; details on request.

Breed to him for "Horses that will race." Fee for 1916, seventy-five dollars with usual privilege or money refunded at our option. Write for detailed particulars, all information gladly furnished.—Licensed Pure Bred, Cert. 23.

Derbertha Bells

Licensed Pure Bred, Cert. No. 226

NO. 60907 :: A. T. R. RULE 1.

Derbertha Bells, foaled 1911, stands 15.3, weighs 1200 pounds and is a solid dark bay or brown of magnificent conformation, style and trotting action. His breeding, too, is of the best, tracing 20 times to Hambletonian 10—5 through Electioneer, 5 through George Wilkes, 4 through Strathmore and 4 through Abdallah 15 (the big four of the sons of Hambletonian) and twice through his daughters; balanced by 18 crosses to Mambrino Chief 11—five c these through his greatest son Mambrino Patchen 58 (leading progenitor of the dam of trotting sires); 25 crosses to Imp. Bellfounder, 8 to Henry Clay, 8 to Imp. Truste 5 to Pilot Jr. 12, and sustained by such other famous broodmare sires as The Moo A. W. Richmond, Black Hawk, St. Clair, Geo. M. Patchen, Grey Eagle, Imp. Glencoe Williamson's Belmont, etc. His broodmare inheritance is incomparably great—crosses to Green Mountain Maid (dam of 9 including a world's champion and 4 sire including Electioneer, the world's greatest trotting progenitor), 3 crosses to Alm Mater (dam of 8 and 7 sires, including Alcyone and Alcantara), and one each to Mis Russell (dam of 8 including Maud S. 2:08¾ and 6 sires including Nutwood, the world greatest broodmare sire), Dolly (dam of 4 and 5 sires, including Director and Onward) Beautiful Bells (dam of 11 trotters including 4 world's champions and 9 sires) and Min nehaha (dam of 8 including a champion yearling and 6 sires). These are the greates mares of history in number of descendants in the standard list, to which add tw crosses to Bertha (the only mare with 2 in 2:04½, 5 in 2:10 and 13 in the list; with tw 2:05 producing sons, five 2:10 producing sons and two other sons with produce only fraction slower).

This pedigree contains the blood of 20 mares (counting duplicates) with an averag of 9 performers each and presents an aggregation of family founding sires and dam unexcelled, if not unequaled. Neither is it necessary to confine ourselves to the stand ard or even to the 2:10 list, or go into the musty records of the distant past for exam ples of the prepotency of these blood lines in the production of speed, but we can easil and abundantly demonstrate their value in speed of the first flight in the present gen eration. He has 1 two-year-old and 2 yearlings that stamp him as a sire entirel worthy of his superlative antecedents, as they (like their sire) are uniformly large handsome, intelligent, tractable and of great speed promise. Come and see them an the new crop and you will breed to him. Fee $25 the season with return privilege Tabulated pedigree upon request.

SUSPENDED OWNER BENEFICIARY OF NEW N. T. A. RULE.

Nearly a year and a half ago the Breeder and Sportsman took up the matter of the propriety of having Section 5, Rule 3, changed to allow a suspended owner to be made more directly a beneficiary of the working of the rule rather than the horse alone, the following comment appearing in our columns at that time:

Of all the numerous new rules of the National Trotting Association for 1914-1915—most of which have been the subjects of considerable discussion both in and out of print—there is one that is "open to argument" that so far has escaped much notice, Rule 3, Section 5, which reads as follows: "If in the opinion of the Secretary of the National Trotting Association the circumstances surrounding a case of suspension for non-payment of entrance fees warrant it, he may issue a permit for such horse allowing it to compete in races. The permit shall provide that fifteen per cent of the gross winnings shall be withheld and sent by the member to the National Trotting Association to be applied pro rata on the suspensions, and the amount collected shall be endorsed on the back of the permit. The National Trotting Association may withdraw the permit at any time."

The placing of this rule upon the records of the association was effected in an effort to alleviate the hardships imposed upon a horse under a suspension surrounded by conditions showing that failure to start or pay entrance fee was due to circumstances beyond ordinary control, making the starting of the horse a physical impossibility owing to his or her own condition, or making the payment of entries an untoward hardship upon the owner from conditions arising from no fault of his own, and an obligation which he might be given, without injustice to anyone, a chance to work out; provide an earning capacity for suspended horses, under a new ownership, that would lead to a full reinstatement, and to increas the number of eligible horses in order to provide better fields for contests. Recent correspondence with Secretary Gocher elicits the information that to date the rule has not been far reaching in its effect, a matter which the writer ascribes to an insufficient knowledge and understanding of the same on the part of horsemen in general, and to the belief that the rule, as it stands, falls short of accomplishing the purpose for which it was intended by the mere fact that it confines its clemencies solely to the horse. No provision whatsoever is made for the owner or driver coupled with the horse in the suspension, and it is not the purpose of the rule for any suspended person to profit by its application, pending the complete removal of the suspension by the installment earning capacities of the horse.

Note the language of the text of the rule in this passage: "If in the opinion of the Secretary of the National Trotting Association the circumstances surrounding a case of suspension warrant it," etc. Such extenuating circumstances must of necessity be confined to a comparatively slight range, and must be of a nature where "extenuating" qualities are unassailable, and whose proof is beyond doubt. If, then, these satisfactory proofs are made and in the opinion of the secretary of the parent association the horse is entitled to clemency, why not go the one step further that would make the rule accomplish the further purpose and provide the person suspended with a chance to "work out his salvation"? Aside from the matter of a permit issued to a bona fide innocent purchaser whose pocketbook would not allow a lump payment of any considerable amount before starting his campaign, but who is able and willing to pay out in installments from his winnings, the only circumstances that would be a solid basis for the issue of a permit of this kind to a horse would of necessity, at least in the eyes of the writer, be of a nature that would justify the extension of the same proportionate amnesty to the person coupled in the suspension.

There are always a certain number of persons under suspension from circumstances which, fully displayed, would absolve them from any blame for their suspension, and prove that the starting of the horse or horses or the payment of entry or entries were physical and financial impossibilities. Some of these men, in hard straits at the time of suspension and unable to pay themselves out, find their occupation gone; the secretaries lost an entrant who under any ordinary circumstances is good for his fees, and the public watches race upon race whose field is deprived of perhaps the one horse and trainer whose performances would have brought them to their feet with a cheer.

The owner who, under the new rule, finds himself and his horse suspended under circumstances entitling the horse to a starting permit, is no better off than before. The permit is of no use so long as the horse remains his property, and to win himself out by horseflesh he must sell at a sacrifice and take a chance on the new owner clearing the suspension. In the meantime he has no earning capacity in his profession, his other horses must be sold or carried over to the problematic day of his delivery at another's hands. Under forced sale his horses may not net enough to pay him out and give him another start, or he may be one of hundreds of horsemen of very moderate circumstances who have pinned their faith to the one favorite of promise. Would not the man of honest intentions (and to none others could the rule ever be made applicable under the spirit of its conception) be more than willing to pay 15 per cent of his gross winnings from each and every race he makes with every member of his stable until the debt is cleared in order to stay in his profession and right himself with the world?

No clemency is permissible in suspensions for nonpayment of entrance where bona fide circumstances of a completely exonerating nature cannot be indubitably established, but a ruling giving owners who are the victims of such misfortunes a chance to pay themselves out as they go would do much to give new impetus to the breeding and training of the harness horse.

While none of our contemporaries saw fit to join in with us in an effort to secure the change in the rule suggested as desirable, it is pleasing to note that at the last meeting the N. T. A. has worked this particular section over to a point at which it becomes, in our estimation, much more acceptable both to horsemen and to the associations scattered broadcast throughout the land. As it will appear in the book of rules which will govern harness racing on the tracks of members of the N. T. A. for the seasons of 1916-1917, the rule will read as follows:

> If in the opinion of the Secretary of the National Trotting Association the circumstances surrounding a case of suspension for non-payment of entrance fees warrants it, he may issue a permit for such person and horse to compete in races. The permit shall provide that the net winnings, unless they exceed the amount of the suspension and if they do enough to pay the same, shall be withheld and sent by the member to the National Trotting Association to the applied pro rata on the suspensions, and the amount so collected shall be endorsed on the back of the permit. The National Trotting Association may withdraw the permit at any time.

While very many horses under suspension were allowed to start in races in 1914-1915 under the workings of the old rule, it did not prove highly satisfactory in a number of important respects. The important defect pointed out in our first comments upon it worked against its fullest success to a large degree, and at fifteen per cent the matter of working out a suspension was a "mighty slow way of serving the Lord," as well as one that gave rise to a great many arguments and misunderstandings, and caused secretaries and clerks to mislay their natural pleasand sunny dispositions and melt down a collar an hour sooner than should have been the case under ordinary circumstances. As the rule now reads a man and horse racing on a permit should pay themselves out very shortly if they are any good at all, as the amount of suspensions would hardly pile up to the extent usual under the old system, and every horse raced by the party holding a permit is working all the time to get the owner in the clear.

While there may be some hostility to the rule as it now stands, it is evident that when fully understood and fairly taken advantage of it will become of great assistance to all parties connected with harness racing. Owners will not find themselves in such hard straits as the result of adverse luck to a few members of their stables, fewer horses will be prevented from racing owing to suspensions hanging over them, a suspended owner has an excellent chance to work himself out, and there will be fewer "dead" or compromised suspensions on the books of the various associations, while at the same time no burdensome clerical work will be imposed upon secretaries and their assistants. All in all, we are inclined to view the new rule as one of the most important and far reaching changes to be put in effect this season.

THE PROGRAM AT VANCOUVER.

Vancouver, B. C., March 1, 1916.

Breeder and Sportsman:

Early in February at the meeting of the representatives of the North Pacific Fair Association in Seattle the dates of August 12-17 were assigned to the Vancouver Exhibition, making it the first event of importance of its kind in the northwest for the year. The race committee of the association met here yesterday and after a pretty thorough review of all the conditions in this section which have a direct bearing upon the success or failure of fairs and race meetings decided to offer a few hundred dollars more in purse money this season than was the case last year, a course which we believe will be appreciated very much by horsemen campaigning in this part of the country. The program as arranged by the committee, the early closers to close June first and the balance later in the summer, is as follows:

OPEN TO ALL COMERS

2:12 trot, early closing, $500; 2:18 trot,$500; 2:25 trot, early closing, $700; 2:30 trot, $300; 2:05 trot, or 2:10 pace, early closing, $500; 2:15 pace, early closing, $700; 2:18 pace, $500; 2:20 pace, $500; 2:25 pace, early closing, $500; 2:30 pace, $300.

FOR BRITISH COLUMBIA HORSES

2:24 trot, $200; 2:15 pace, $200; three-year-old trot, $200; three-year-old pace, $200; amateur trot, to be open only to horses, the property of members of some duly recognized amateur association in B. C. and which have competed in at least three matinees during the season, $150; amateur pace, same conditions, $150.

There are not a great number of horses in training in this vicinity this season. Mr. Loomis has five head at Minoru, including Prince Malone 2:29¼, by Kinney Lou 2:07¾ and regarded as a 2:10 pacer; Myrtha Pointer, a green pacer by Star Pointer, also regarded as very fast; Red Squirrel, three-year-old pacer by Bland S. 2:03¼, dam Chipmunk by Lecco; Frank D. Nicholl 2:20½, winrace 2:24¼, by Cresceus 2:02¼, and two others.

Mr. Lewis has recently arrived from the Prairies with twelve head, mostly colts. He has, I am informed, two record horses, both pacers, one with a record of 2:10¼, the other with a record of 2:14¼. I have not been able to ascertain anything definite about them.

Mr. McCullough has a good five-year-old trotting filly by Walter Barker that he is going to place in Mr. Loomis's hands this year. This filly looks like a real trotter. Mr. Alex Miller contemplates taking his good horse Bonaday 2:11¼, and Greco McKinney, a good trotting son of Greco B., to Edmonton shortly. T. A. Morris has a three-year-old pacer by Bland S., dam Nellie Wilkes 2:16¼, grandam the dam of William 1:58½, of which he is very proud. The little fellow did not do much last year owing to an accident which caused him to be turned out in the early summer but he is regarded as having lots of lick.

W. C. BROWN.

A MATTER OF REGRET.

Robert S. Strader of Lexington has asked to be released from numerous engagements as presiding judge for the coming season owing to the demands made upon his time through taking over the management of Stoughton Fletcher's recent acquisition, Peter the Great. This is the only objectionable feature that has resulted from the transaction involving title to the great son of Pilot Medium, as we have always had a little idea of our own that there were too few presiding judges of the Strader stamp. However, it's an ill wind, etc. (Vance Nuchols et al, please note).

The Dam of Julia M.

A SIMPLE CASE OF MISTAKEN IDENTITY

Some weeks ago, in the issue of the Breeder and Sportsman for December 18 to be exact, there appeared in our "Notes and News" department the following innocent appearing little item concerning a most excellent new performer of the season last passed:

Julia M. (2) 2:13¾, her record made in the third heat of the junior pacing division of the Pleasanton futurity (a race which, by the way, she seemed amply capable of winning had it been raced "to a finish" on the old system) is the first performer to be credited to the seven-year-old stallion El Angelo 57039 by The Angelus 2:10¼, the latter horse being a son of Zombro 2:11 and the fast trotting mare Hazel Kinney 2:09¼ by McKinney 2:11¼. El Angelo was bred by T. W. Barstow of San Jose, passing eventually to D. W. Wallis of Los Banos and at present owned by Miller & Lux; his dam is Maud Jay C. by Nearest 2:22½ and out of Fanny Menlo by Menlo 2:12½, a son of Nutwood, Maud Jay C. being the dam of the trotter and speed sire Nearest McKinney 2:13¼. Through her dam Julia M. inherits a sturdy line of speed crosses, being out of Record Searcher by Searchlight 2:03¼, grandam Zeta Carter (dam of Chestnut Tom 2:17¼, etc.) by Director 2:17, third dam Lida W. 2:18¼ (dam of four, including Nutwood Wilkes 2:16½) by Nutwood 2:18¾, fourth dam Belle by Geo. M. Patchen Jr. 31, etc. This is certainly a husky combination of the families that have made California famous in the trotting world, and Julia M. will do to remember next season. She was trained and raced by Dave Allen of Newman and is still owned by her breeder, D. W. Wallis of Los Banos.

The information given above concerning the dam of Julia M. was correct to the best of the writer's knowledge and belief at the time and was in accord with the entry blanks upon which the nominations of the dam of Julia M. had been made in the local futurities from 1911 to the time of her death from poisoning in 1913. No question had ever arisen as to the correctness of the pedigree as given by Mr. Wallis and we were therefore considerably surprised to receive a letter early in January, from which the following excerpts are presented:

Chilliwack, B. C., Jan. 12, 1916.

Editor Breeder and Sportsman:

I have your favor of Dec. 23 for which accept my sincere thanks; also marked copy of Dec 18 giving full breeding of the good filly Julia M. which is absolutely correct on her dam's side, but very much out on the sire, as El Angelo is not the sire of Julia M. Now, Mr. Editor, we have here a very unfortunate and I think a most serious misrepresentation of the breeding of Julia M. as this filly's sire is Oro Willis Jr. 46743, obtained his record as Oro Wilkes Jr., record 2:12¾ trotting, and is by Oro Wilkes 30347, record 2:11. Oro Willis Jr. should have been Oro Wilkes Jr. 2:12¾ but was not registered until after his record of 2:12¾ at four years of age. When registration was applied for there was another of that name registered, thus the above explanation.

Here are a few facts regarding that filly Julia M.: The writer owned her dam, namely Record Searcher, for three years and sold her in the year 1913, April. She foaled this filly Julia M. in August of same summer. I also owned half interest in Oro Wilkes Jr. 2:12¾ and still have him here in Chilliwack, having won the Grand Champion and Sweepstakes for best stallion of any breeding on the grounds this year, and he will be fifteen years of age in April, having been foaled at Mt. Kisco, N. Y., April, 1901. Now this mare Record Searcher was bred to Oro Wilkes (or Willis) Jr. in September, 1912, in my own stables, handled by Mr. Clark Knowles, who was caretaker of the horse at that time and who is easily available and most reliable—is now a veterinary surgeon.

Now, Record Searcher was on my farm here for two years, namely 1911—1912, was bred to Oro Wilkes in 1912, foaled Julia M. the summer of 1913, who is now two years old. Record Searcher passed from me to John Graves of Vancouver in April, 1913, with whom she had this colt, he having sold mare and foal to parties who took her south. I might just add that we had considerable trouble getting this mare to breed, and had the writer thought she was in foal, Julia M. would not be in California now. I tried every possible way to get her back before Graves sold her but he would not put a price on the mare and filly, which was a beauty at four weeks old.

I think I have made things pretty clear to you, and this matter must be straightened out, and your valuable paper is entitled to the first chance at it, which I am hereby giving. If any further information you require before making a public break, I should be most pleased to furnish same as to affidavits, etc., as this must be made right in every horse paper in America, as Oro Wilkes (or Willis) Jr. 46743, 2:12¾, has always ranked among the best that can be produced and one of the few capable of siring a filly such as Julia M.

Thanking you for past favors and hoping to hear successfully from you in the near future, I remain, dear sir,

Yours truly,

N. GERALD BLANCHFIELD.

Along with his letter Mr. Blanchfield submitted documentary evidence and copies of the registration papers of Record Searcher, both in the A. T. R. and the Canadian National Live Stock Records, leaving little room to doubt as to the fact that he had owned the mare registered under that name and sold at the Nutwood Stock Farm dispersal sale at Pleasanton in 1909 to Henry Busing of Pleasanton, passing thence to Oscar Hartnagel, Seattle, to John McLeod, Vancouver, B. C., and to Mr. Blanchfield himself. These transfers are matters of official record.

Immediately upon the receipt of this letter we wrote Mr. Blanchfield, whose stand was the one any man would have taken under the circumstances, asking his indulgence while we made a thorough research into the matter, and endeavoring to free his mind of any suspicion of misrepresentation on the part of Mr. D. W. Wallis. The records of the P. C. T. H. B. A. proved conclusively that Mr. Wallis and Mr. Blanchfield had each owned a mare known to them as Record Searcher by Searchlight, dam Zeta Carter by Director, etc., at the same time, so that the first conclusion reached by us was to the effect that one or the other of them had been "gyped," presumably Mr. Wallis, as Mr. Blanchfield had all the documentary evidence in his favor. Now it has always been our experience that such matters as these are more easily confused than they are to straighten out, and the present instance was no exception. Several letters passed between us and all parties concerned, personal interviews of a number of horsemen were made, including Mr. Wallis, and recourse was had to catalogs and sales reports of the Nutwood Stock Farm dispersal. We had long been satisfied that Mr. Wallis had never owned Record Searcher, and a few days ago the entire matter was finally straightened out.

Mr. Wallis became the owner of the mare known by him as Record Searcher in the winter of 1910-1911, securing her in a transaction with the Concord firm of Foskett & Ellsworthy. Now Foskett & Ellsworthy had bought one of the Carter mares by Searchlight at the sale at which Record Searcher was sold (the two mares being sold within a few minutes of each other and many of the same parties having been bidders on each one) and in some manner Mr. Wallas gained the impression that the one knocked down to Foskett & Ellsworthy by Auctioneer William Higginbottom was named Record Searcher. He was still of that opinion when he acquired her personally, some months later, and so gave her in his entry blanks. Investigation reveals that Messrs. Foskett & Ellsworthy secured at this sale and subsequently sold to Mr. Wallis the bay mare foaled in 1904 by Searchlight, dam Lida W. 2:18½, a line of breeding so similar to that of the mare bid in a few minutes previously by Henry Busing that ample grounds were provided for future misunderstanding unless due care was exercised—the lack of the same being the cause of the subsequent annoyance to Mr. Blanchfield. The mare bought by Foskett & Ellsworthy was named Search Lida and was a full sister to the extremely fast pacer Alberta 2:03¾ and half sister to a number of other performers, including the great stallion Nutwood Wilkes 2:16½, and this is the identical mare purchased by Mr. Wallis. There was no misrepresentation of any description practiced or in any way intended by the parties variously connected with the mare, Mr. Wallis simply failing to identify her positively owing to the impression lingering in his memory that Foskett & Ellsworthy had bought Record Searcher.

Search Lida was trained a little by D. A. Allen in the spring of 1911 but met with an accident to one wing and was bred to El Angelo and turned out, producing a male foal now four years old. The following season she was returned to El Angelo and in due time foaled the filly, now a three-year-old, known to racing fame as Julia M. (2) 2:13¾, one of the very best two-year-old pacers seen in the United States last season. A third time she was mated to the same stallion and a third time delivered a foal in safety, a filly. When this lassie was but a few months of age Search Lida, along with six or seven others of the best mares owned by Mr. Wallis, died at the Miller & Lux ranch at Los Banos from the effects of poisoning, presumably caused through the carelessness of some member of the squirrel dopster brigade constantly engaged in the warfare of extermination waged upon the thousands of ground squirrels infesting the company's ranges and alfalfa fields. The baby filly escaped the poison route but died from other causes not long afterward.

This is the complete history of the entire transaction and the family of Search Lida, fully substantiated in every respect. At the same time there is somewhere here in the west, presumably, the mare Record Searcher and a filly the same age as Julia M., this one the real daughter of Oro Willis Jr. and the identical young lady believed, quite naturally, by Mr. Blanchfield to be Julia M. This lass by every right in the world should be a young thing of exceptional quality, and should any of our readers be able to supply us with any information concerning either Record Searcher or her filly we would greatly appreciate being advised fully of the same, not only as a matter of general interest but also for the further enlightenment of Mr. Blanchfield, former owner of the one and breeder of the other.

Now that the matter has been fully straightened out, we trust to the complete satisfaction of all persons concerned therein, we wish to express our appreciation of the great assistance rendered us in cleaning up the tangle by the American Trotting Register Association. Acting on the assumption, which we considered a highly proper one, that the registered description of Record Searcher would go far toward determining first of all which of the two mares was really Record Searcher, we made application many weeks ago to the office of the register association for this information. Aside from one notification to the effect that a clerk in the office was unable to find the original papers we are just as wise on this point as we were before. Thank you—also why is a hen?

PACIFIC BREEDERS' FUTURITY No. 14.

Last week we intimated that the response of breeders to call for payments on two-year-olds engaged in the number of the Breeders' Futurity whose junior divisions will be raced this season portended some excellent sport later in the year, a prediction that will be found to be well grounded if you will take the trouble to glance through the accompanying list of colts that are still eligible to the event. Sixty-two youngsters in all are paid up for another year, quite a number of which have received some schooling as yearlings and shown themselves to be possessed of much promise as futurity prospects, the complete list being as follows:

C. A. Arvedson's b or s c Ansel Mack by Prince Ansel, dam Constancia by McKinney.

E. T. Barnette's b c by Carlokin, dam Zephyr by Zombro.

I. L. Borden's ch c by Ed McKinney, dam Ramona by Prince Robert; b or br c by Ed. McKinney, dam Hester McKinney by McKinney; b f by Ed. McKinney, dam Miss Nutwood by Nutwood Wilkes; b g by Tom Smith, dam Carrie B. by Alex. Button.

W. C. Brown's ch c Prince Pat by Prince Ansel, dam Princess Bessum by Egyptian Prince.

I. J. Cornett's b f Boness by The Bondsman, dam Salinas Princess by Eugeneer.

S. H. Cowell's s f Don Alberta by Palo King, dam Hulda by Guy Wilkes; b c by Jim Logan, dam Two Minutes by Wildnut.

C. L. DeRyder's b c by The Bondsman, dam Arawanna B. by Sidney Dillon.

Wm. E. Detels' b f by Graham Bellini, dam Daphne McKinney by McKinney.

J. Doran's b f Nelley McCarty by Vernon McKinney, dam Zaalam by Searchlight.

W. G. Durfee's b c Troubadour by Carlokin, dam My Irene S. by Petigru; b c by Copa de Oro, dam Lady H. by Del Coronado.

Revel Lindsay's ch f Wilbertha by Wilbur Lou, dam Lady Bertha by Constantine.

Byron Erkenbrecher's b f by Copa de Oro, dam Reta H. by McKinney.

Sam Gault's b c Peter Klyo Bell by Peter McKlyo, dam Iran Belle by Iran Alto.

Alex. Grant's b c Kinsman Lou by Wilbur Lou, dam Sona by McKinney.

C. A. Harrison's br f Hilda Ansel by Prince Ansel, dam Bonhilda by Moko.

Hemet Stock Farm's ch f by Kinney de Lopez, dam Louise Carter by Chestnut Tom; ch f by Wilbur Lou, dam Lady Zombro by Zombro; ch c by Wilbur Lou, dam Betsy Direct by Direct; ch c by Wilbur Lou, dam Little Louis A. by Boodle; ch f by Wilbur Lou, dam Zeta W. by Nutwood Wilkes; b f by Wilbur Lou, dam Stambia by Stam B.; bl f by Kinney de Lopez, dam Bonnie Ailse by Faustino.

H. A. Hershey's b c Galen by Jim Logan, dam Palo Maid by Palo King.

H. S. Hogoboom's b f Eva Dungan by Palo King, dam Miss Ione by Iran Alto; b f Lilly of the Valley by Palo King, dam by Iran Alto.

Wm. Howell's b c Kinney Benton by True Kinney, dam Princess Viola by Prince Ansel; ch f Miss Sirius by Graham Bellini, dam Lady Sirius by Sirius.

S. H. Hoy's b c Elmo Logan by Jim Logan, dam Suisun by Demonio.

Craig Hyde's b f Mona Logan by Jim Logan, dam Switchtail by Demonio.

W. J. Ivey's b g Boniska by Bonaday, dam Oniska by Nutwood Wilkes.

Abe W. Johnson's ch c Willie G. D. by Directum Penn, dam Babe by Son of McKinney.

R. J. MacKenzie's br f by Pan Boy, dam Merry Widow by Red Pac.

Roy D. Mayes' b g El Paso by True Kinney, dam Ella J. by Bob Mason.

J. R. McKay's b c J. R. McK. by Quintell, dam Josie Ansel by Prince Ansel.

J. E. Montgomery's b c Marshall Logan by Jim Logan, dam Leota by Diablo.

Chris G. Owen's br f Ella O. by Moko Hall, dam by Kinney Lou.

J. W. Pendleton's ch f Bertha Thrice by Derbertha Bells, dam Abbie McNutward by Guy McKinney.

W. A. Perley's b c Pietro Ghisleri by The Proof, dam Belle by Kinney Lou.

Sadie L. Porter's br c Sequoia by The Bondsman, dam Yu Tu by R. Ambush.

Geo. F. Ryan's b c by Frank Perry, dam Miss Harris by Sidney Dillon.

A. L. Scott's br f by Wilbur Lou, dam Weatewater by Sidney Dillon; ch f by Wilbur Lou, dam Lady Nez by Nutwood Wilkes.

Chas. F. Silva's ch c by Teddy Bear, dam Camille by Stam B.; ch f by Teddy Bear, dam Polka Dot by Mendocino; b c Silver Ansel by Prince Ansel, dam Silver Haw by Silver Bow.

Jas. Stewart's ch c Robert Bruce by Copa de Oro, dam Easter D. by Diablo.

W. A. Stow's b f Alconda Girl by Alconda Jay, dam Salinas Girl by Nutwood Wilkes.

Sutherland & MacKenzie's b c Rhyolite by F. S. Whitney, dam Rubelle by Del Coronado.

L. B. Taylor's b f Olivet by Yoncalla, dam Yolanda by McKinney.

L. H. Todhunter's foal by Peter McKlyo, dam Osmuda by Bon Voyage; foal by Peter McKlyo, dam Sweet Bow by Bon Voyage.

Valencia Stock Farm's b c by Pegasus, dam Rosie by McKinney.

F. W. Wadham's br c Adam Treat by Prince Ansel, dam Johanna Treat by Thos. Rysdyk.

D. W. Wallis' br f Eline by El Angelo, dam Search Lida by Searchlight; b c Robert Mc by El Angelo, dam Annie McKinney by McKinney.

Alex M. Wilson's br c Kewpie by Carlokin, dam The Blonde by Strathway.

M. L. Woy's br f Expressive Mac, dam Loma B. by Stam B.

THE STRAIGHT DOPE ON KEARNEY.

While Kearney, Nebraska, lies about halfway between the Atlantic and the Pacific oceans and approximately equi-distant from the Mexican and Canadian boundary lines, and while it is the home of the widely famed Midway Stock Farm (whose proprietor can say "no" very gracefully to thirty thousand dollar offers for three-year-old trotters) and also of the busiest halfmile track in the west (the scene of three race meetings in 1915), there must be a whole lot of folks even in the horse business who are not overly familiar with Kearney. We ourselves were well aware that Kearney "had a history," being familiar with the same in a "scatterin' way" only, but last Sunday while taking a day off from our perusal of the 1914 Year Book, the one for 1915 not yet having appeared at that time, we found the following condensed and authoritative report—though not prepared by Magnus Flaws—upon Kearney and her surroundings:

"Kearney takes its name from old Fort Kearney, which stood south of the river, a few miles east of the city, at the junction of the emigrant trail from Kansas Ciy and the Platte Valley trail. It was a center of turbulence during the time of Indian warfare. Here during the construction of the Union Pacific Railroad, according to Gen. G. M. Dodge, there were more desperate fights and literally hair-rasing adventures than James Fennimore Cooper ever dreamed of, and here Maj. Frank J. North, with his four companies of Pawnee Indians, made history defending the Overland Route against hostile Indians. The Plum Creek, Ogalalla, and Summit Springs campaigns under Maj. North's direction did much to prove conclusively to the Sioux and Cheyenne that he was their absolute master. The same writer says that every mile of the railroad had to be surveyed and built within range of the rifle and under military protection, and much of the success of the enterprise he attributes to the active support of Gen. Grant and Gen. Sherman.

"West of Kearney the bluffs, consisting of loess overlying rocks of late Tertiary age, are about a mile from the railroad. Could the traveler restore the landscape of late Tertiary time, he would find himself surrounded by scenes greatly different from those of the present. The swampy lowlands of that time were covered with vegetation similar to that now

[Concluded on page 6.]

"Everlasting Puzzle"

IS MARQUE'S DESCRIPTION OF THE TROTTER IN THE REVIEW

The man who knows all about horses hasn't as yet graced this terrestial sphere of ours, but one can find a lot of fellows who are willing to admit that they know about everything regarding horses; also, that what they don't know isn't worth knowing, anyway.

Sometimes I think our lack of knowledge of horses keeps the business active and adds to its spice and seasoning. Now, what a stereotyped, cut-and-dried, unattractive sport this would be were it possible to select winners with absolute certainty! Or to put a certain amount of money in one's purse and with deliberation unfailing, purchase horses that "bring home the bacon." It can't be done—and therein lies the element of uncertainty which keeps many people in the business, driving out, too, others who lack the true sporting instinct.

And let us suppose that breeding had reached the condition of such an exact science that all that was necessary to assure the successful production of stake winners was to mate certain stallions with certain mares. Were this possible of achievement, the whole business would quickly go hooey, reverting, as it would, into a mere matter-of-fact affair, thus eliminating from it every element of chance and speculation. All its interest would disappear, and instead of being the seductive sport it is, it would lose its zest and flavor.

It's our very uncertainty, our oft-proven and demonstrated lack of knowledge of horses, that gives us the incentive to own and breed them. Some horses are bound to prove failures despite the fact that they are, so far as expert human knowledge can enable us to judge, the most hopeful prospects, vice versa, others that offer no such outward evidences of merit improve and turn out to be head-liners. So there you are! Always up against a problem that only the experience which the future develops can solve.

We cannot tell how far a frog will leap by looking at it—and no teacher can tell which one of his or her pupils will go out into the world and successfully fight the battle of life. The smartest and most capable boy, the one that most easily acquires book knowledge, more often than otherwise, "also runs" to the boy whose capabilities as a scholar seemed to indicate he was too thick-headed to make a living. The prize scholar, the brilliant student, may subsequently be found keeping books in the other's bank.

* * * *

We had two excellent examples of this very uncertainty which bring into our sport is constant element of chance the past season when Mary Putney 2:05½ and Humfast 2:09¾ were doing things to the three-year-old trotters in the fall futurities. Did anyone ever figure on these two fillies when the two-year-olds were battling for honors in 1914? Chances are that you never even heard of them! I happened to know about Humfast, for I am fairly familiar with Mr. L. E. Brown's horses; but when I saw Mary Putney's name in the list of eligibles to the futurities, I thought to myself, "What indulgent patron of Walter Cox is putting up money for that one?"

Cox is one of the most capable trainers, and unquestionably one of the shrewdest men in the business, on top of which he is a New England, blue-bellied Yankee. There we have a proven combination of skill, brains and capability out of the ordinary. Well—Walter trained Mary, lived and traveled with her, and knew as much about her as it is humanly possible for a trainer to know about a trotter—yet he sold her to Chauncey L. Sears, of Fall River, Mass., for $5,000! Be it known that the said New Englander and Mr. Sears are close friends, and that Walter could thereafter have driven Mary had he so elected. But he chose for his mount his other pupil, Native Spirit—bet on her, too, when the pair met for the first time in the Review futurity at Columbus, O. Walter turned Mary over to Dick McMahon to drive, and it was afterward remarked what a good fellow he was and how kind to his fellow reinsman, to hand him a world's champion, etc., etc. Now, Walter is a good fellow, I know that. But—I have some knowledge of trainers, too. It strikes me as being just as likely for a trainer to knowingly let another ride in front with a world's champion and himself remain back in the dust with an "also ran," as it would be for him to give up his right eye or his left lung—dear and gentle reader, there is nothing transpiring in that line, and you and I know it very well.

* * * *

Did you ever hear this story of Napoleon Direct 2:00¾? Well, it fits into the subject which I am treating, and I will take a chance of getting under the hide of my good friends, Mr. Geers and his secretary, Robert Neill, in telling it. In the spring of 1914 Mr. Geers was training at Memphis both Napoleon Direct and a mare called Tuah Worth. "Bob" Neill, who always has an eye out for a bargain in horse flesh, and who, by the way, has picked up some good ones, including Walter W. 2:04¾, suggested to Mr. Geers that they purchase one of these two pacers. The price of each was approximately the same, and both had at the same time worked around 2:08. And after giving the matter their mature consideration and threshing over the pros and cons, they purchased Tuah Worth! Well—as matters transpired, they put up their money on the "black" and "red" turned up! Napoleon, as everyone knows, turned out to be a super-sensation, while Tuah has yet to put any red ink on the right side of her owner's ledger. She proved a bill of expense and was afterwards disposed of for a comparatively small figure.

Now, how is one going to plume oneself on having a knowledge of horses when facts like this continuously confront one?

* * * *

Just the other day I received a letter from E. D. Gould, the Kearney, Neb., breeder, stating that he had been offered $35,000 for his two-year-old colt, Bingen Silk 2:08¾. Now, there is in Lexington a colony of colt trainers, a group of the country's real specialists in colt training and everything pertaining to early speed marvels. Yet J. B. Chandler put one over on the whole bunch of them. "Chan" slipped down to Lexington and led Bingen Silk away after the mild separation of just $1,000 from Mr. Gould's bank roll, and, by so doing, played a winner at odds of 35 to 1. Last fall, when I visited Lexington, several of the locals told me that they knew Bingen Silk was a real star, etc., etc.—but just at the time of his purchase there were at least eight other yearlings quartered there that were priced at three times Bingen Silk's figure, but none of them have proved to be in his class.

Now, gentlemen of Lexington, each and every one of you have had to pull the "excuse book"—and it won't get by yours truly!

* * * *

I remember very well another incident which refers to my Lexington friends, and what happened to a bunch of them. I have written this story previously, perhaps, but it's worth repeating, since it goes to prove that the best of horsemen can always be fooled.

I had been down to Memphis to see the horses there at work, and stopped on my way home for a week's stay in Lexington. Reports of Highball's (2:04¾) sensational work had drifted up from Memphis and it so happened that no less than six—count 'em, six—of his former owners were grouped in the K. T. H. B. A. grand stand when I reached it. After stating that I had just come from Memphis, I was immediately besieged for news about Highball, all his former owners questioning me in concert. I hold of his work in a very mild way, I thought, winding up by saying that I thought him to be a very high-class trotter. It was not, however, until the sextette tramped all over the gelding, denounced him as the worst "morning glory," and the largest piece of cheese ever wrapped up in horse hide, that I ventured to make my statements anent him strong. I then told them that if he wasn't a first-class stake trotter I would have to quit guessing. It was one against six, and I fear I came off very badly in the argument which ensued. You see, Highball had been a "trading hoss" around Lexington, and during the afternoon when there was nothing else to do, the trainers used to swap him back and forth for jack-knives and whetstones. Upon being transferred from one to the other he was trained some more, and each of his successive owners found some new thing to cuss him for. How Highball later on sold for $17,500 to Mr. Jones, and proved a champion, is now turf history, so it only remains for me to state that while I won six hats that fine June morning at Lexington, all but one of Highball's detractors subsequently forgot that the wagers were made—right here I want to state that if I had collected all of the hat and suit bets that I have won since I have been in this business, all that I would have to do in order to start a clothing store would be to put in a line of neckties and collars. My method of betting is this—in the winter time I wager with owners that their steeds won't do so and so, and since the winter hopes of nearly every owner may be discounted at least 50 per cent, I have that much advantage.

* * * *

But I will return to my text. One day I landed in Columbus, O., having been away from the Grand Circuit for some weeks, and meeting Ed Benyon, he proceeded to inform me that he had the greatest two-year-old filly that ever wore hair. Forthwith he introduced me to The Leading Lady, but hadn't a word to say anent a roan colt whose head had projected from an adjoining stall. Perhaps the roan colt overheard what Ed had said about the filly and didn't like it, but at any rate just two weeks later I saw him defeat the greatest, etc., filly, and win the Kentucky futurity in world's record time. The roan colt was Tramp-fast (2) 2:12¼, and Ed turned him over to Tommy Murphy to drive, little thinking that he was putting into the New Yorker's hands a record-breaking victor. Had Ed known—but what's the use of rubbing it in?

I think all of you will agree that Billy Andrews is "some hoss professor"; that he is a post graduate and an honor man in the great school of trotterdom. So he is—but I saw Prof. Andrews made to appear upon one occasion as if he didn't know the first three letters in the equine alphabet. Billy had taken his caravan to Fort Erie, on the Canadian side of the Niagara river, and according to the rules, was permitted to start a pair from his stable there in the

$5,000 2:10 trot. He had the mount behind Uncle Biff 2:06¾, and Jimmy Benyon was selected to drive Tenara, who was at that time "a maiden," having not as yet won brackets. It would be unfair to Billy to single him out as the only man present that day who was fooled, for there were, as a matter of fact, 'steen hundreds of the wisest G. C. regulars that "got theirs" as well. Uncle Biff went to the post an air-tight favorite, and in the pools of $450 Tenara brought just $15. They paid about as much attention to the Moko mare as the senatorial veterans do to a new tall-grass congressman who lights down in Washington, D. C. Well—she won with comparative ease, and about the only man who had backed her was a saloon keeper from Buffalo, whose knowledge of horses extended to the fact that they have four legs and (sometimes) a mane and tail. The dispenser of liquid inspiration had been patronizing his own wares with the result that his speculative instinct was aroused—he was looking for something cheap, and Tenara happened to be on the ten-cent counter. I was told that the next day the suds-merchant assumed an attitude of superior wisdom, put his thumbs under his apron, threw out his chest, and told his patrons that he had the race all doped out, knew that Tenara was a cinch, and proceeded to eat it up—such is the basis of much alleged hoss knowledge.

* * * *

The first time I ever saw Uhlan 1:58 was in the $50,000 American Trotting Derby, raced at Boston in 1908. I was stationed at the starting point, near the three-quarter pole, and noted that the gelding was turned the wrong way of the track when the word was finally given. In view of what he afterwards did, the Derby would, without doubt, have been easy for Uhlan, had he gotten away from the mark assigned him. But leaving that feature aside, the future champion had worked a mile in 2:06¾, and could have been purchased for $6,000 or less. A number of horsemen who were on the lookout for racing material, turned him down, their criticism being that he was too much of a show horse, and had too much action to ever make a high-class race horse. For some inexplicable reason, doubt continued to be expressed anent Uhlan even after he had beaten Spanish Queen 2:04¼ that fall at Lexington. She was the largest stake winner of the year, and when they met horsemen said: "Now, just see what will happen to him when he meets class." The race was as easy as breaking sticks for him, but it was not until the followin season, at North Randall, that the majority of G. C. horsemen began to see in the black gelding true greatness. Here he won a second heat in 2:03¾, with apparent ease—yet even then some of the critics said that he "wasn't beating anything."

When they will turn down the grandest looking horse in the world, and the most impressively gaited one, where, or how, in the name of reason, is one going to find a basis upon which to judge horses? It would seem that the veriest tyro could have detected Uhlan's greatness, but I can assure you that he was severely criticised and his merits frequently questioned.

* * * *

The great difficulty in judging horses that have never met the supreme test is occasioned by our lack of knowledge of what nature did for them. We can get a line on their speed, their gait and their manners, for these are the features which the eye and the mind can observe and analyze. But another factor must be reckoned with, viz., did nature supply them with that great qualification which we term "class." Speed, gait and manners are but the outward signs, while "class" is the thing that is locked away invisibly somewhere inside the horse. An old horseman once said to me in reference to class: "It isn't to be found in their legs, their hearts, their lungs, or their stomachs, nor is it always evidenced by their speed, their gait or their manners, so the only other place we have to look for it is in their heads."

But perhaps class results from a combination of physical and mental excellencies, a happy mingling of anatomical, organic and temperamental endowments. However, the question is too deep for me, and when I get to using big words in order to attempt to express myself, I get all muddled up and must ask the court's indulgence.

When it comes to physical make-up, the turf has been provided with numerous striking contrasts among its select ones. So we cannot depend upon that feature. Can you imagine two mares, for instance, more unlike than Sweet Marie 2:02 and Dudie Archdale 2:03¼? Marie fittingly termed "the amazon," and Dudie as appropriately could be called "the slim princess"—the one powerful, heavily made, proportioned like a giantess, and the other slim, even frail in form and outline. And the same dissimilarity is to be noted as to their gaits, Marie being a mare with lots of action and the powerful front stroke of a stallion, while her antithesis was cat-like in her stride and action. Dudie fooled everyone with the exception of Mr. Geers, and those closely associated with her—and who, for that matter, could have selected her for a great trotter were they not intimate with her capability? Sweet Marie herself was not above suspicion when she came over from California to tackle the big ring stake horses. Several of her California observers said that she would stop, and I distinctly recall receiving a letter to that effect from a Coast horseman. So Marie, like numerous others in the list of the "greats," was discounted by capable judges who were very close to her.

I have seen a lot of trotters that nature went just as far with and then suddenly stopped, declining, as it were, to put upon their efforts the finishing touches. The best example I can recall of such a trotter was the California gelding George G. 2:05¼. Unless you were "onto" George, you would pronounce him a sure champion at first sight. Few trotters were ever more attractively gaited, none were sounder, very few were faster, and practically none made a better impression than did he when seen in action. But something had been left out when George was "assembled"—some vital necessity, lacking which he was one of the turf's most pronounced disappointments. I remember one day when he lost a race at Columbus, O., that he should have and could have won in a walk, had he possessed real class. Mr. Geers had him then, and after dismounting at the conclusion of the last heat, glanced at George with disgust written on his face, remarking, "Dog-gone! That's the most no 'count hoss I ever sat behind!" Coming from the G. O. M. that remark was as expressive as the most violent abuse would be from the average horseman. And, be it known, the previous spring Mr. Geers believed George the making of the best trotter he had ever trained!

* * * *

There are three stages in the career of every horseman. First, the initiatory stage; second, the know-it-all stage; third, the know-very-little stage.

All of us connected with the sport have to pass through these three periods or epochs. After our initiation we begin to assume that we are wonderfully equipped in horse knowledge, splendidly versed in equine dope and secrets, but with maturity we begin to realize that we are possessed of very little read wisdom, and have all the while been fooling ourselves.

I have known the most skilful trainers to become thoroughly discouraged when things broke badly for them, and lose heart to the extent of questioning their own ability. In fact, I have had more than one trainer tell me that he seemed to have lost all his knack with horses, and that everything he did with his pupils was calculated to make them worse rather than improve them. One familiar with these trainers could not question their gameness, for upon many occasions they had evidenced that qualification to a marked degree, but the fact that temporarily they had run up against a series of misfortunes simply augmented the feeling that they no longer possessed their former skill and ability, until it became a certainty to them. There is always hope for the horseman who recognizes the fact that he doesn't know it all, but very little for the sort that think they hold the master key to universal equine knowledge.

THE STRAIGHT DOPE ON KEARNEY.

[Concluded from page 5.]

growing in moist climates farther south. He would recognize few of the animals. Though they formed an assemblage very different from that of today, they much more closely resembled the living animals than those of former ages. Camels and llamas were abundant and great ground sloths and glyptodonts, whose relatives now live in South America, inhabited western Nebraska during Pliocene time. Mastodons with tusks on both the upper and the lower jaws, much like those of the Miocene epoch, still persisted. Short legged rhinoceroses remained abundant, and there was a great variety of wolf-like carnivora. Saber-toothed tigers and true cats, some of them considerably larger than the modern tigers, were also abundant. Three-toed horses were still numerous, but the modern genus Equus was not among them. One of the most curious animals of the time in Kansas and Nebraska was a gopher-like rodent that had two large horns on its nose. Its enormous claws indicate good burrowing powers and its horns may have been used in digging."

Thus it would seem that E. D. Gould, in establishing his Midway Stock Farm, had picked out a sort of perpetual paradise for quadrupeds. Just exactly how far back in history the Tertiary age really is the writer does not know but it is bound to be a long time as neither Charley Durfee nor S. S. Bailey have ever mentioned it to the writer in relating their personal experiences in the days when the west was young. Roughly speaking the various stages or epochs in the history of the horse in the Kearney country may be defined as the Tertiary or prehistoric, when the eohippus was the lord of his kind; then the Caballa Tejano, or the age of the cowtrail; then that of the mulus scraperinus, or railroad mule; then that of Shadeland Onward, or the early trotting period, followed by several "gradings" of the same until we come to the present and the tomorrow, which will be known properly as, shall we say, the Robertus Bingeniferosus age. Anyway, we have given you the straight dope on Kearney according to the records of the United States Geological Survey, so you can see for yourself that she has a long and honored place in horse history.

There have been prices and rumors of prices offered for Peter Mac since that gentleman began looming up like a champion last season, and at last a definite figure has been put on him by Captain Shaw. Believing that he has a record breaking horse he insists that if sold he be sold for a record breaking price, so anyone putting in a dollar raise on the one hundred and twenty-five thousand iron men paid for Arion may become possessed of Peter Mac. The bids from this coast will probably not be numerous.

Notes and News

The San Franciscos were the original hot cakes at the Midwinter Sale.

◈ ◈ ◈

Five thousand six hundred dollars for a yearling at auction makes things look a little better in trotting horse circles down east.

◈ ◈ ◈

The dates of September 13-18 have been claimed by the Alameda County Fair Association for their fair this year, but no announcement has as yet been made concerning the course to be adopted in regard to the racing program.

◈ ◈ ◈

Good old Earl Jr. and Frank Bogash Jr. went under the hammer at the recent sale at New York, the old gray warrior bringing $2,700 and his oft-time rival going for seven hundred less. It's the halfmile track free-for-alls for theirs from now on, quite probably.

◈ ◈ ◈

Hal McKinney 2:06¼, the gamecock pacer raced for five years by Fred Ward, Al Russell and Bob Sebastian and now owned by the Omaha enthusiast, Tom Dennison, will be allowed to serve a limited number of mares this season before going away to the races.

◈ ◈ ◈

Henry Thomas, who trains and races the horses of D. A. Dinnie of Minot, North Dakota, shipped from that summer resort this week for Davenport, Iowa, where he will put the finishing touches to the string that will go down the line this season, including Sadie Densmore (4) 2:02, Miss Densmore 2:10¾, Don B. 2:16½, Don Conamore 2:18¼, Lieutenant Aubrey (3) 2:21¼ and a number of promising green things.

◈ ◈ ◈

Peter McKlyo (3) 2:12½ is the latest comer to our list of stallions advertised for service for the season of 1916. He is the only son of the fifty-thousand dollar Peter the Great whose services are available to California breeders, and his youngsters are looming up as worthy representatives of their famous family. He is at the state fair grounds at Sacramento in charge of Col. Jim Thompson, from whom all particulars may be obtained.

◈ ◈ ◈

Peter McCormick 2:05½, the big trotter that V. L. Shuler raced at the June meeting at the exposition, is in service at the state fair grounds at Indianapolis, the Shuler home town, and is attracting quite a number of good mares. No son of Peter the Great possesses more of the genuine "trotting instinct" than does Peter McCormick, and had Mr. Shuler so desired he could have booked a number of mares to him here in California last spring.

◈ ◈ ◈

The early closers for the first meetings of the Grand Circuit have been announced and cover a wide range of classes. Cleveland's stakes close on March fourteenth for The Ohio for 2:08 trotters, $3,000; the Tavern Steak (Devereux system) for trotters that never won two thousand gross nor have a time or race record faster than 2:14¼, $3,000; the Edwards for 2:10 pacers, $3,000; the Fasig Sweepstakes open to all three-year-old trotters except Volga, $500 added; the North Randall Sweepstakes for three-year-old trotters eligible to the 2:18 class, $500 added, and the Forest City Sweepstakes for all two-year-old trotters, $500 added.

◈ ◈ ◈

Clinton A. Harrison, who objects strenuously to having it made known in print that he comes occasionally to our civilized midst from his haunts in the heart of the wilds of the Puget Sound country, has been spending the past week or ten days at Los Angeles accompanied by Mrs. Harrison, and from the City of Angels they make almost daily trips out into the surrounding country where they have many friends and acquaintances. Their visit in that vicinity was to have been of about three days' duration but from latest advices from there it bids fair to stretch over into the summer. Yes, really, it must be a welcome change, as Clint had to spend all his Robert Bingen money hiring snow shovelers almost before he got it. Just how to report his journeyings to and from our pleasure resorts without tipping it off that he really hails from the wilds above mentioned is something of a puzzle, as both Seattle and Tacoma are known around the world as the twin metropoli (is this right, Volunteer, our learned friend?) of the Puget Sound section, and to report him as coming from Everett or Bellingham or Anacortes would serve but ill as a means of hiding his trail, as practically all readers of horse papers in this enlightened age know that these habitats of the sockeye and the shingle-weaver are part and parcel of the w. o. t. P. S. country, as aforesaid. Just where to—but wait, we have it at last. Ballard! Why didn't we think of that before? Right in his back yard and yet it will not tip it off to anyone as to just where he hails from. There never were but three people whose names figure in the year book or the racing guide who ever discovered Ballard, and as two of these were biling drunk at the time and have probably forgotten all about it, the field narrows down to one. "C. A. Harrison of Ballard." It looks well in print.

Cam P. Caylor of La Grande, Ore., still has his old Mare Indian Girl 2:29½, by Tentabit, son of Pilot Medium, and he thinks she is about the "best ever." She is the dam of Jim Hill 2:09¼, a son of The Commonwealth, and of Hot Cakes 2:21½, a son of King Lamont. Mr. Caylor has a fine filly from the old Mare that will be a-year old in May, by Harold Welcome, and she is again safe in foal to the great sire Imaden D. Cam sent her clear to Seattle to be bred last year.—Rural Spirit.

◈ ◈ ◈

Princess Bessum 2:29½ by Egyptian Prince, dam Carrie Malone (dam of three and grandam of quite a number, including Lovelock 2:05½ and Ray o' Light (p) 2:08¼) has recently foaled a fine youngster by Robert Bingen 2:11¼, the laddie having a whole lot of attractive points about him. Mare and colt are the property of W. C. Brown of Vancouver, B. C., and are now at Whalen Brothers' Santa Rita Stock Farm in the Livermore Valley where there is grass and water in profusion and where both old horses and young ones do famously at all times of the year.

◈ ◈ ◈

Lou Taylor, who has been located at Hemet since the close of the races at southern California fairs last season, has taken his horses to the mile track at Los Angeles to get them ready for the season's races. He reports all in nice shape but not far along with their work right at this moment, though he has lots of time to get ready before anything starts in the campaigning line. His pacer, Baxter Lou 2:14¼, looks to be the making of one other real fast performer for that good matron Carrie B., while the trotter, Luana 2:16¼, is liable to crowd 2:10 considerably if she continues to come along as she did late last year.

◈ ◈ ◈

Roy D. Mayes of Dixon has recently sent to Sutherland & Chadbourne at Pleasanton the two-year-old bay colt El Paso by True Kinney, dam the great matron Ella J. by Bob Mason, and this well-known firm will prepare him for his futurity engagements, which include all the California classics. El Paso is in several respects a more attractive individual than was his famous half brother, Natalday (2) 2:13½ at the same age, but is a natural pacer while the other lad is as naturally a trotter. Fred Chadbourne, who with Pa Jim Sutherland has developed a dozen or a dozen two-year-old pacers that could race in 2:13 or better, believes that this boy is the making of a great pacer, as he shows more at this stage of the game than any Chad has ever handled.

◈ ◈ ◈

Fred E. Ward of Los Angeles has recently purchased the good young trotter Bon Courage (4) 2:08¼, formerly owned by W. A. Clark Jr. and the late Ted Hayes, the latter having driven the chestnut fellow to the season's record for four-year-old trotting geldings in 1915 only a few months prior to his death. Bon Courage as a two- and three-year-old was one of the fastest of coast trotters and in Ward's hands he should make a highly useful campaigner, as age has brought him a good deal of strength and substance that were lacking in his younger years, as he was one of the slightly built kind. Fred drove him in his last engagements here at the exposition last fall, the horse improving steadily in his hands in a manner that promises well for the success of their future partnership.

◈ ◈ ◈

Andrew Albright Jr. of Prospect Farm, one of New Jersey's foremost speed nurseries, has purchased another California brood mare to send east when his winter visit with us is over, the last acquisition being the bay mare Bessie Tea 2:22 by Zombro 2:11, dam the triple producer Manila (dam of Elloretta 2:12¼, etc.) by Shadeland Hero. She is an extremely nice individual, a good mannered mare in company, with a good deal more speed than her present record indicates. That she will breed good ones is evident from the youngster produced to the cover of Baronteer 2:odd, now a member of the training stable of J. H. Morrey at Los Angeles and credited with trials better than standard time at both ways of going. The Zombros are in excellent repute in the east, and Bessie Tea will no doubt prove a good investment for the new owner.

◈ ◈ ◈

Full reports of the recent Midwinter Sale of the Casig-Tipton Company at Madison Square Garden have not yet reached us, but the first two days were very good ones indeed. Walter Cox was one of the best buyers present and took home a number of young things that caught his fancy, not hesitating to pay the price. If he didn't want one he didn't bid on it, and if he wanted one very badly he got it. In several instances he engaged in brisk skirmishes with Tommy Murphy's patron, A. H. Cosden of New York, usually carrying that gentleman wide on the final turn and beating him through the stretch. The elongated New Englander separated himself from $5,600 for the yearling St. Frusquin by San Francisco out of the seven-year-old untried mare Melisande by Walnut Hall, $3,225 for the yearling Truxton by San Francisco and out of a daughter of Walnut Hall, $4,000 for the three-year-old colt Mr. Hawthorne by Foxworthy and out of the grand old race trotter Hawthorne 2:06¼ by Jay Bird, and good prices for others of lesser attractiveness. Altogether the sale is pronounced to have been a most successful one, and a further report of it will be made in our next issue, when we will have the complete returns.

One of the richest classics of the Australian trotting turf, the Victoria thousand at a mile and a half, will be raced on Thursday, April 27 over the course at Victoria Park, the Australian Trotting Club being the sponsors of the stake.

◈ ◈ ◈

G. D. Armstead, proprietor of the Hotel Reynolds at Riverside and incidentally one of the most enthusiastic friends of the trotter and the county fair to be found in California, is recuperating after an illness of several months, during the course of which he was made the subject of an investigation on the part of a committee of anatomical architects who discovered that portions of his internal structure were badly in need of alterations. Plans and specifications were immediately drawn up and without waiting to advertise for bids the work was at once put under way. Just what the experts did to him while they had him down for the count in a San Berdoo hospital is not yet fully known to Mr. Armstead, but they evidently did the right thing and he will soon be as good as ever and able to put in his customary hard licks on behalf of the Riverside county fair.

◈ ◈ ◈

Here is a hot one that comes to us via the scissors from an eastern exchange: "As a result of a novel operation in horse dentistry up at Clapham, N. Y., Lester Clapper's old sorrel pacing mare, Rickety Ann, may be back on the circuit next season with nothing rickety about her except her name. Soon after the fall fairs were over last year Ann's owner observed with dismay that most of the 75-cent oats he was feeding her took a back track and came out of her nose. Flabbergasted at this peculiar leakage, he called in the plumber, and when that expert gave it up he led the old mare around to Dr. Franklin Du Bois Smith's veterinary hospital, where they chloroform animals that are beyond repair. Dr. Smith, on examining Ann, found one of her upper molars had dropped out, leaving a hole which extended to her nostril. He consulted with Dr. W. E. Walker, a dentist, and together they constructed a hard rubber tooth to fill the hole, fastening it in place by means of a bolt and a silver plate. The artificial tooth was so successful that Rickety Ann now eats like other horses and already looks like a winner at the fall fairs next year."—Doctor Ira Barker Dalziel, please write!

Last year the trotting stallion El Angelo 57039 passed from the ownership of D. W. Wallis to that of the Miller & Lux corporation, but when Mr. Wallis retired from the service of that concern some months ago he bought the horse back and placed him in the hands of D. A. Allen at the track at Newman, where he will make a limited stud season and be prepared for racing. An accident to one of his feet when he was a youngster prevented him from being trained to any amount as a colt, but the effects of this mishap have disappeared entirely and it is Allen's belief that he will be able to give him a highly creditable record this season. He has already gotten an excellent start on the road to fame as a speed sire, his first foal raced being the pacing filly Julia M. (2) 2:13¾, one of the best lassies of the age and gait to be found in the entire country last year. Allen will point her for her three-year-old engagements, and as she is absolutely sound she ought to be better than a two-ten wiggler this season by a good margin.

◈ ◈ ◈

Having sent the best pair of trotters that he owns to Lexington to be fitted for a campaign on the big line, Rodney MacKenzie evidently figures that there will not be enough racing in California to pay him to train an extensive stable to race here at home, so early this month all the horses owned by him at Pleasanton were ordered turned out with the exception of the stallions. The youngsters of racing age having futurity engagements in the coast classics will probably be taken up again later in ample time to get them ready for the fall meetings at which the stakes will be raced. The yearlings that have just been broken are a classy lot and while every one of them showed plenty of natural inclinations to go fast at one gait or the other, the especial pride of the stable seemed to be centered in the Joe Patchen II—Zombro Belle colt, who is a trotter of the first degree from all present indications. The let-up on the MacKenzie stable does not mean that Boss Charley DeRyder will have to apply to the government free employment bureau for a job, however, as the MacKenzie interests require a good deal of looking after just the same, and C. L. has a pretty extensive stable of his own in hand, whose training will be continued and a number of whose members will go to the races in the west.

Gahagan's Story of Cresceus 2:02 1-4

An interesting item of news drifted to this country from war-torn Russia a few days ago in the belated announcement of the death of the former world's champion trotter, Cresceus 2:02¼. For some months various stories have been circulated in regard to the champion, one being copied generally in the daily press to the effect that the stallion had been impressed for military use in one of the armies of the Czar, but this proved to be without foundation. The news of his death, however, is apparently authentic, coming from the American trainer, Frank Caton, who has spent years in Russia and is naturally in touch with harness horse affairs in the land of the Cossacks.

Cresceus was bred and raced to his record by George Ketcham, of Toledo, formerly more or less prominent in theatrical affairs, owning a theater in his home city and managing several others in cities in the central states. Ketcham took up the racing of trotters as a method of regaining his health, and owned the stallion Robert McGregor 2:17½, a star trotter back in the days of the high-wheel sulky, when he was known as "The Monarch of the Home Stretch." Ketcham mated a mare named Mabel with Robert McGregor, and the produce foaled in 1894 was the chestnut colt afterward to be known as Cresceus and at one time to be crowned as the greatest trotter of all time. So little was thought of the youngster in his early days that at one time his owner ordered an employee to destroy him, the disobedience of the employee saving a future champion of the turf.

Right from the start Cresceus proved himself a real bulldog trotter. When he was a three-year-old, Ketcham raced him against aged horses, among other events participating in a long-drawn-out battle at Ft. Wayne, which developed into the fastest eight-heat race ever trotted, the youngster winning out over a high class racing field of aged horses, including such stars as The Monk 2:05¾ and Eagle Flannigan 2:07½. Cresceus won the sixth, seventh and eighth heats, his final mile in 2:11¼ still being the world's record for an eighth heat. This race stamped the colt as a wonderful trotter; subsequent seasons proved him to be a real champion.

Cresceus was the real John L. Sullivan of the harness turf; his owner never side-stepped any opponent, pitted him against any and all comers over any track where the money was hung up and the bulldog trotter from Toledo was never found wanting. His greatest race was a match with The Abbott 2:03¼ at the Brighton Beach track in 1901. "Pop" Geers at that time had charge of the Village Farm stable of C. J. Hamlin and piloted The Abbott in his match with the "yellow horse." The first heat was a battle between the pair all the way, Cresceus winning in 2:03¼, but The Abbott went all to pieces in the next round and was shut out when Cresceus finished in 2:06¼. The first heat stood as the best heat by a trotter for eight years, Hamburg Belle lowering the mark to 2:01¼ in the match race with Uhlan at North Randall in 1909.

Previous to his match with The Abbott Cresceus over the Glenville track at Cleveland had set the trotting record at 2:02¾ in a trial against the watch, and at that same season he cut this to 2:02¼ at Columbus. This stood as the best for two seasons, when Lou Dillon appeared and, aided by a runner in front, a method which is now tabooed by the turf authorities, set the trotting record at 1:58½. Even such an iron-sided horse as Cresceus could not stand up under the continued hard campaigns and the champion stallion was on the down grade. During the season that Lou Dillon wrested his championship laurels from him, he was subjected to unmerited disgrace on account of the notorious attempt to "put across" a faster record for him at Wichita, Kansas. In his previous exhibition miles that season the king had shown that he was far from being in championship form. When the report was sent out that he had trotted the Wichita track in 1:59¾, doubt was at once cast upon the performance by those familiar with the condition of the horse.

An investigation was ordered by the turf authorities, with the result that the plot was discovered and the track and timers expelled. Ketcham, however had excellent legal talent to look after his interests before the board of appeals and he was exonerated. The record, of course, was refused, the best evidence being that the mile was trotted somewhere around 2:05.

Sometime afterward Cresceus passed under the hammer at one of the Madison Square Garden sales in New York and was purchased by M. W. Savage, owner of Dan Patch, for $21,000. As an exhibition horse, however, the star of the famous Toledo trotter was on the wane, and as he had proved himself almost an absolute failure in the stud, an offer from Russia was snapped up by Savage and the stallion king became an expatriate. In Russia Cresceus was more successful as a sire and many of his get have shown well over there, but in the United States it will be the record of his wonderful achievements on the turf that will give him a niche of prominence in the hall of fame of the harness horse.

Faster trotters have appeared than Cresceus; he never possessed the wonderful flights of speed which Uhlan and Lou Dillon could display; he did not have the individuality to attract the crowd, such as is possessed by the present day stallion king, The Harvester, but as a racing machine of courage, stamina and speed combined, usually racing under adverse conditions, the harness turf has never seen his like. The pity is that he was allowed "to lag superfluous on the stage" when it was apparent to all that his day had passed and the saddest feature of all was the blot placed upon his escutcheon by the affair at Wichita.—Tom Gahagan, in the Western Horseman.

Thoroughbred Matters

EDWARD CEBRIAN'S STUD.

While the organization last summer of the Golden Gate Thoroughbred Breeders' Association and the staging of its inaugural race meeting at the exposition track was the means of awakening a good deal of interest in the thoroughbred and the increase of holdings in horseflesh of this kind on the part of numerous California sportsmen, none have gone at the matter in a more enthusiastic and extensive way than has Mr. Edward Cebrian of this city, who has through numerous purchases assembled one of the most pretentious studs in the west. Some months ago Mr. Cebrian purchased of Al Joseph of this city the stallion Von Tromp and a number of highbred mares, augmenting this band more recently by a draft from the Oakwood Stock Farm of Lawrence & Comstock, including the handsome son of Star Ruby—Ladybug, Tim Payne, the last arrivals bringing his brood mare holdings well along toward the storied "three score and ten" mark.

Wishing to have his breeding and training operations conducted at a point easy of access to San Francisco and having no realty of his own in this radius suitable for the establishment of a stock farm, Mr. Cebrian leased the San Jose Driving Park from the Campbell estate and assembled his horses at that well equipped plant. There, with that well known horseman, Al Ferrell, as superintendent and trainer, he hopes to breed and develop many youngsters who will carry his colors to the front on American tracks both east and west. That he has laid an excellent foundation for the fulfilment of this desire is evident when the quality of his stud is considered, as both mares and stallions spring from the best families known to the running turf. Von Tromp, whose services will be used much more extensively than those of his stable mate, Tim Payne, is of the rugged, substantial type and is one of the best bred horses in America, being a son of the mighty Ben Brush (sire among many others of the famous stake winner Broomstick, who earned in excess of seventy-five thousand dollars during his career on American tracks), while his dam, Cinderella by Hermit, also produced Peter Pan, who carried the colors of James R. Keene to victory so frequently some eight or ten years ago. Himself a very fast horse, Von Tromp gave an excellent account of himself for his opportunities, and while his stud advantages have been very slight he has demonstrated that he is a sire of coming fame, three youngsters by him, Illuminator, Recluse and San Leandro, having proven winning two-year-olds during the season last passed. That he will now have an excellent chance to demonstrate his true worth is readily gleaned from a cursory inspection of the class of mares to which he will have access under his new ownership, the following "samples" having been taken at random from the assembly of seventy now at San Jose:

Rosegal by Galveston—Roseamonde by Ormonde.
Ishtar by Sam Lucas—Isiac by Roseberry.
Isolation by George Kessler—Fair Recluse by Gailliard.
Bonsetta by Masetto—Bon Bon by Hindoo.
DuBarry by imp. St. George—Palmetto by Virgil.
Candlewick by imp. Candlemas—Intrepid by Hindoo.
Andrewetta by St. Andrew—Princess Noretti by Emperor of Norfolk.
Jourdain by imp. Watercress—The Dome by imp. Maxim.
Modesia by Canopus—Moderocia by Sir Modred.
Ruth W. by imp. King's Counsel—Letter B. by Erdenheim.
Lottie Creed by Hammon—My Fair Kentucky by Ingoldsby.
Mammy by Sempronius—Manola Mason by Top Gallant.
Ledatrix by Brutus—Ledette by Nathan Coombs.
Dally by Giganteum—Dal by imp. Mortemer.
Tendercrest by imp. Gold Crest—imp. Tenderness by Roseberry
Zalordea by imp. Chesterfield—La Palada by Verano.
Chico by Gotham—Blue Dress by Enquirer.
Alondra by Emperor of Norfolk—Vera 2nd by Verano.
Foul Play by Foul Shot—Theresia by Duke of Montrose.
Trained Nurse by Yo El Rey—Santa Rosa by Wheatley.
Dod Anderson by The Commoner—Leora by Leonatus.
Cricket by imp. Chesterfield—Miss Boggs by Joe Hooker.
Bertola by imp. Albert—Bonnie Ola by Elkwood.
Gottleiben by Rubicon—Seraphine by Emperor of Norfolk.
Helen Atkins by Kingston—Hazel W. by imp. The Sailor Prince.
Sister Modred by Sir Modred—Sister to Jim Douglas by Wildidle.
Calonia by Amigo—Martina 2nd by The Hook.
Amadora by Gano—Armada by Crichton.
La Sinaloa by Emperor of Norfolk—Janora by Grinstead.
Katherine Ennis by Bonnie Joe—Night Shade by Free Knight.
Palisada by Gano—Formosa by Rutherford.
Sula H. by Rubicon—Sebastiana by Foul Shot.
Arcadia Belle by Emperor of Norfolk—Annabell by Friar Tuck.
La Poeta by Honduras—Paola by Rutherford.
Sain Shot by Sain—Belle Shot by Foul Shot.
Escarola by Amigo—Colonias by Emperor of Norfolk.
Illusion by Mesmerist—Marmerica by Duke of Montrose.
Mi Reina by Santiago—Leola by Lead On.
Zorita by Cerito 2nd—Savannah by Grinstead.
Ardiente by Gano—Sister Annie by imp. Glenelg.
Directa by Vinctor—Santa Zoleda by Gabo.
Charm II by imp. Mariner—Charm by imp Cheviot.
Future Bright by Ben Brush—Palianthus by Springbok.
Symphorien Castle by St. Symphorien—imp. Castle Hill by Forager.
Zenana by Kismet—Cimeter by Hyder Ali.
Saleska by Salvation—Escarola by Amigo.

Mr. Cebrian's advent to the ranks of California's breeders of the thoroughbred has been widely welcomed, and the progress of his operations will be watched with much interest. In addition to the stallions and mares limited to the breeding ranks he owns a few younger things of quality which will be raced in the western meetings of the present season, but he plans to rely entirely upon his own products when once the first crop comes to racing age ,and hopes—and believes—that by that time the state of California will have joined the roster of enlightened communities where a racing commission and the use of the pari-mutual are everyday affairs.

Here's hoping, Mr. Cebrian!

—o—

Memories of the militant suffragettes in England, whose activities have subsided to a noticeable extent since the beginning of the great war, were refreshed last week when press dispatches bore the announcement that the King of England had presented to the Canadian government, for use in breeding remounts, the thoroughbred stallion Anmer. In 1913 Anmer was leading the field in the English Derby at Epsom Downs when a Miss Davidson, a "suff" of the violent type, rushed out upon the course and grabbed the bridle reins close to the bit, throwing the horse and rider directly in the path of the big field. Crushed under the weight of Anmer and struck by the feet of others in their headlong flight, death rather than the franchise was the reward of the woman's temerity. In the words of Colonel Marmaduke Ruggles, "Such things would never do with us."

—o—

A number of A. Kingsley Macomber's recently imported English youngsters are entered in the juvenile stakes at the spring meeting of the Kentucky Association, which attracted a high class lot of young things throughout. The Macomber candidates have been in the capable hands of Walter B. Jennings down in Carolina since their arrival last fall and have progressed nicely in every way since coming to America. They are grandly bred boys and girls and will doubtless give good accounts of themselves when they face the barrier in Kentucky.

—o—

E. R. Bradley of the Idle Hour Stud, Lexington, who follows the practice of giving his two-year-olds names beginning with the letter B, has claimed a record half dozen this time in Believe Me Boys, Bell Cow, Bit of a Devil, Bully Good Time, Broom-Sweep and Breathing Spell. As might be said, Believe Me Boys, even if I am a Bit of a Devil, a Breathing Spell is mighty acceptable after trailing the Bell Cow through a regular Broom-Sweep of a Bully Good Time. Don't shoot, I'll come down!

The extensive stable of thoroughbreds from Nevada Stock Farm which has been in training at Pleasanton Driving Park since the close of the meeting of the Golden Gate Thoroughbred Breeders' Association last September was shipped home this week, Honeywood to take his place as head of the stud at the Wingfield establishment and the other members of the lot to continue their education over the Reno course, where they will be raced at the spring meeting. Ed Davis, who has had charge of them since the departure of Trainer George Strate and the older members of the farm's campaigners for the New Orleans meeting in December, has made nice progress with everything he has handled and at their final tryouts over the Pleasanton track all could show a highly gratifying amount of whizz. Superintendent George Berry, for many years in charge of the racing operations of A. B. Spreckels, came over from Reno to say hello to his host of local friends and acquaintances and look after the final details of the shipment. Skeer Face, mentioned last week as Nevada Stock Farm's candidate for this year's Kentucky Derby, was sold a few days ago at New Orleans for the nice sum of eight thousand dollars, and while Mr. Wingfield was rather reluctant to part with him even at that figure he is confident that he has more coming along that will be just as good. Foals are already appearing at the farm and about thirty-five in all are expected before the season ends, while an even larger number will put in appearance in 1916.

—o—

Sandy McNaughton, well known here on this coast, has taken over the engagements of the Von Tromp two-year-olds bred by Parker Whitney of this city, acting in the transaction as agent for Mrs. McNaughton. The youngsters, which are nine in number, are named in this year's Futurity and are distinguished by the following descriptions:

Palisade, b f by Von Tromp—Andrewetta by St. Andrew.
Brooklyn, b c by Von Tromp—Bonsetta by Masetto.
Chelsea, b c by Von Tromp—Candlewick by imp. Candlemas.
Hudson, b c by Von Tromp—DuBarry by imp. St. George.
Harlem, b c by Von Tromp—Jourdain by imp. Watercress.
Manhattan, br f by Von Tromp—Modesia by Canopus.
Riverside, ch c by Von Tromp—Rosegal by Galveston.
Riverdale—br c by Von Tromp—Ruth W. by imp. King's Counsel.
Spinster, bl f by Von Tromp—Spinosa.

—o—

As a sample of the "sportsmanship" evident in the ranks of Blue Grass horsemen we take pleasure in citing the following instance: Some weeks ago former President Catesby Woodford of the Kentucky Association resigned and his successor was to be chosen at a special meeting of the directors two weeks ago today. Vice-President O. H. Chenault presided, and when nominations were called for A. B. Hancock presented the name of ex-Senator J. N. Camden, chairman of the Kentucky racing commission and owner of Hartland Stud, while Hal Price Headley nominated Mr. Chenault. The resultant ballot was a tie, and Mr. Chenault promptly settled that little matter by casting his vote for Mr. Camden.

—o—

A bit of fresh renown was attracted to California thoroughbreds recently at New Orleans when the Chantilly—Antioch filly Aunt Liz, bred at El Palomar and running in the colors of that establishment, put the track record for the half mile at :47 2-5, winning by several lengths and showing so impressively that she was the center of a runner-up attack, the price going to four hundred and five dollars over the figure at which she was entered.

—o—

The Marta Santas tried to make a day of it recently at New Orleans, taking four out of the six races carded for one afternoon. The imported son of Martley—Luxette, now in service at Walter S. Payne's Mapleton Farm near Lexington, has ranked among the ten leading sires of America for the last few seasons while his get have proved winners on the tracks of England, Australia and France also.

—o—

Unless something went radically wrong at the last minute, thoroughbred racing in Arkansas was revived today at Hot Springs, when a twenty-one day "businessmen's meeting" was to be inaugurated at Oaklawn course.

ROD, GUN AND KENNEL

CONDUCTED BY FISHER HUNT

FOUR HUNDRED AND TWELVE REGISTERED TOURNAMENTS.

The Interstate Association through Secretary E. Reed Shaner has sent a complete list of 412 tournaments registered so far. These include the four Interstate Association Handicap tournaments and the seven tourneys that were announced in a bulletin issued February 19th.

The whole list will hardly prove of vital interest to Pacific Coast shooters and we therefore pick up only the ones that will be staged out here. They are—

Ogden, Utah—March 17th, Utah State Sportsmen's Association, A. R. Bain, Secretary.

Bingham, Utah—May 5th, Utah State Association.

Los Angeles, Cal—May 8, 9, Vernon Gun Club, Wm. Pugh, Manager.

San Jose, Cal.—May 28, 29, 30, San Jose Blue Rock Club, O. N. Ford, Secretary.

Chehalis, Wash.—May 30, Chehalis Rod and Gun Club, Gus T. Thacker, President.

Portland, Ore.—June 5, 6, 7, Sportsmen's Association of the Northwest Tournament, under auspices of Portland Gun Club, Frank Templeton, Secretary.

Eureka, Cal.—July 4th, Eureka Blue Rock Club, H. A. Hine, President.

Tacoma, Wash.—July 18, 19, 20, 21, Pacific Indians, F. C. Riehl, Secretary.

COURSING MEET IS POSTPONED.

If the weather will permit, the members of the Buffalo Coursing Club are planning to hold a meet at Galt tomorrow, March 12th. The various dogs that will be entered in the meet are in condition as their owners have been putting them through their paces for the past two weeks. The proposed Capital City Coursing meet has been postponed, probably until March 19th.

All entries for next Sunday's meet will cost $2.50. No dogs, regardless of size or breed, are barred from participation. Sunday will be the last time the famous Pepper Kid, one of Sacramento's best canines, will appear in a coursing meet.

Information regarding the meet can be secured from A. G. Cases, 1827 Twenty-first street.

The officials of the coming meet follow: A. B. Cases, president; H. J. Humbert, vice-president; Thomas Kennedy, judge; Jack Maley, slipper; "Doc" Young, assistant slipper.

Such dogs as Cordova Girl, Buffalo Girl, Sweet Alice and Fighting Little will take part in the meet. Cases will also enter his unnamed dog, recently imported by him from France, in Sunday's competition.

ARGUMENT OVER JACK RABBITS.

Is the common Fresno county jack rabbit a member of the order of rodentia or that of lagomorpha?

To the average person it makes little difference, perhaps, to which order bunny has the honor of belonging, but it is a matter of vital importance to the rabbit.

Hunters of Fresno county insist that he belongs to the order of rodentia, which would classify him as a rodent and make him a predatory animal. The Fish and Game Commission, however, insists that he is of the order of lagomorpha, and of the family of leporidae, which brings the rabbit into the classification of game animals.

No license is required to hunt predatory animals but a license is required to hunt game animals.

The Fish and Game Commission uses the classification of Joseph Grinnell, director of the museum of vertebrate zoology of the University of California, a classification that is said to be accepted by all authorities.

EAGLES ARE TRAPPED AT NAPA.

Lester Walker last week trapped an eagle in the Napa redwoods that measured seven feet from tip to tip. The eagle was caught in ordinary steel trap set for coyotes and put up such a terrible fight that it had to be killed before the trap could be approached.

This makes the second eagle that has been taken lately in coyote traps. Only last week an eagle measuring seven feet four inches was trapped on the A. A. Watson place at Napa Junction.

Eagles and coyotes this year are causing much damage for the sheep men.

* * * *

A rabbit drive, organized by the farmers of the Round Mountain district, was staged the other day, resulting in the destruction of about one thousand rabbits, which have been destroying the young vines in that neighborhood. The plan originated with August Gandrau, who was the marshal of the day, and he was ably assisted by Allen Hill, R. W. Edmiston, W. T. Burnetti, M. G. Vernon, W. Fiddes, Hartly, Oscar Bacon, M. W. Bacon and the three Pierson brothers. About forty-five men with guns started from the gardner ranch at 9 o'clock and drove in a westerly course toward the Fairview school house, where a lunch was served at noon, after which the party drove back again toward the place of beginning. A prize of $10 was offered for the party bringing in the largest number of ears and it was won by Allen Hill, with S. L. Netzer a close second. Hill had fifty sets and Netzer thirty-five sets of ears. The farmers voted the drive a success and concluded to have another in two weeks.

The only accident mentioned was the blowing off of the end of the shotgun used by Vincent Hutchings, but no one was injured. R. H. Bailey attempted to navigate a jitney back to Sanger for some of the parties that could not go out with the first load, and got stalled on the top of the hill at the double bridges, where he waited in the rain until help arrived and pulled him out.

BIG YEAR FOR SOUTHERN CALIFORNIA.

This starts like a big year in fish game lines. The last rain came at just the right time to assure big breedings. The streams are high and big runs of steelheads are going up all the water systems of the Southland.

Last year was the best all-around year for the sportsmen, considering the number to enjoy fishing and hunting, that Southern California ever saw, and every present indication points to better sport for an even larger number in 1916.

Fish and game is rapidly becoming one of our leading industries.

A rather interesting sidelight upon the plenty of game in Southern California is the steadily increasing demand for smaller bore guns shown by sportsmen in this section. As game grows more plentiful and limits are reduced men everywhere are turning to some means of gaining pleasure by prolonging the time of their bag, and this placing of an added premium upon skill by the use of less shot is most popular.

A steady improvement is noted in the efficiency of the small-gauge shotguns turned out by our leading maker, the average increasing to such a degree with modern boring experience that a man can get a good 20-gauge nowadays with a little effort, while a few years ago it was exceedingly hard to pick up one passably good with any size of shot.—Los Angeles Express.

BIRDS RETURN TO BATTLEFIELDS.

The Associated Press correspondent in France writes:

Bird life along the battle front appears to have been little disturbed by the continual thundering of the guns. Birds disappeared from the war zone after the battle of the Marne, and some naturalists attributed their migration to the din of war. They came back again, however, and little by little accustomed themselves to the noise of explosives and even find an advantage in being close to the conflict where there is ample nourishment around the soldiers' quarters. Doves and wild pigeons are the most abundant, while there are many cuckoos, thrushes, crows, magpies and jays. Starlings are very common, nesting in trees as close as they find them in the trenches.

Monsieur Louis Rousseau, a well known ornithologist, has discovered that the war has changed the character of these birds and made them thrifty. He has found their nests in the holes of dead oaks, with a provision of bread crumbs stored away prudently underneath. Doves fly about between the two lines, paying no attention to the bursting shrapnel; and none of them appear to be afraid of either aeroplanes, observation balloons or dirigibles.

ASTOR CUP RIFLE MATCH.

The attention of school clubs is called to the Astor Cup Match, entries for which will close April 1st. The match is open to teams of ten members from any schoolboy club. The five highest scores will count for the team's record score. A club can enter more than one team, but entry fee must be paid for each team. A competitor, however, cannot shoot on more than one occasion.

In making entry the team should submit the names of suitable parties to act as judge and witness for the shooting.

The entrance fee is $2 and entries will not be accepted unless the fee acmompanies the entry. The match is to be shot on home ranges during the period between April 15th and 30th. Scores not turned in by May 10th will not be considered.

If your school desires to enter the competition, kindly forward notice to the Assistant Recorder and Secretary, National Rifle Association.

DATE SET FOR KENNEL SHOW.

The Golden Gate Kennel Club will hold its seventh annual dog show April 26, 27, and 28. Walter H. Reeves, famous English terrier expert, will pass on all breeds. O. F. Vedder, Pacific Coast representative of the American Kennel Club, will manage the affair. A five point show is expected.

‡ ‡ ‡

Walter W. Stettheimer, owner of the Tellac fox terrier kennels at Redwood City, returned from New York City last week. Stettheimer was one of the many Californians to attend the Westminster show.

‡ ‡ ‡

Dr. T. Martin Smith will show his crack Boston terrier, "Art Smith," at the Golden Gate show. "Art" looped over every dog of his breed at the Exposition show and the Doctor expects him to duplicate the trick at the coming show.

‡ ‡ ‡

Matford Vic, a wire-haired fox terrier, won the highest honors in dogdom in this country by defeating two thousand dogs for the premier honor of best dog of any breed in the show. Vic has the honor of being the only dog to ever win the prize twice in succession. With Wire Boy of Paignton, her famous kennel mate, they won everything offered for wire-haired fox terriers.

‡ ‡ ‡

Fred M. Stephenson has bought from George B. Robertson the two Llewellin setter bitches, Polly Halifax and Miss Dan, both well known winners at field trials. Polly Halifax, we believe, is in whelp to Mr. Robertson's great stud dog, Prince Rodney's Count.

‡ ‡ ‡

R. L. Bettis has moved his Hy-Born kennels a little farther out of Fresno. He has some fine puppies out of Hy-Born Bells and claims that he has one that is almost a duplicate of her mother Belle, and also claims that he has one pup that is better than Hy-Born Belle. He lauds the richness of her tan and says that she is better in head, ear and bone. Hy-Born Belle was at the Panama-Pacific Exposition for seven months in the Dogs of All Nations concession.

‡ ‡ ‡

The California bred Airedale terrier, Crack Shot, owned by John M. Williams of this city, was shown at the great New York show a couple of weeks ago and was awarded the special prize for the best American bred Airedale, defeating among others York Master Key, heretofore considered invincible in American bred classes. Mr. Williams made the trip East especially to show the Easterners what California could do in Airedale breeding. Crack Shop is only a puppy and will make the older dogs go some to beat him on his return home.

LORDLY PEACOCK PIECE DE RESISTANCE.

New York City.—A lordly peacock furnished the piece deresistance at the dinner given at the Waldorf Astoria Hotel March 6 in connection with the annual conference on game breeding. The bird came from Kentucky, and was the gift of Mr. R. A. Chiles, a well known attorney of that State, who maintains at his home near Mt. Sterling, a model game and poultry farm. Oscar, the Waldorf's celebrated maitre d'hotel, asserts that a peacock presents no problem to the Waldorf's chefs and that an ostrich, tinamou, or dodo bird could be handled with equal success were they procurable.

Permission was given the American Game Protective Association by Colonel Anthony R. Kuser and the New York Zoological Society to show at the conference colored stereopticon slides of pheasants made from plates used to illustrate the monumental work on the pheasants of the world which is being prepared under the direction of the Zoological Society by C. William Beebe. It will be in four volumes and will be sold for $250.

The expense of collecting the material for this work and its publication, amounting to more than $100,000, is being borne by Colonel Kuser. This will be the first public exhibition of these slides. The paintings from which they were made are the work of the foremost American and English artists. The slides were shown on the afternoon of March 6th in connection with a talk on practical pheasant breeding by E. A. Quarles, director of the Association's Department of Game Breeding and Preserving.

Washington, D. C.—At a meeting on Friday evening, February 18th, of the Executive Committee of the District of Columbia Rifle Association, held at the headquarters of the National Rifle Association in the Woodward Building, there were present representatives from 25 organized clubs and from clubs in process of organization in the Interstate Commerce Commission, the Washington Board of Trade and from several divisions of the Department of Agriculture.

Captain Harllee, president of the Association, announced that clubs were in process of organization also in the Government Printing Office, Department of Commerce, Southern Railway Building, and Bureau of Printing and Engraving, and that other clubs would be organized in due time.

Requisitions for ammunitions from all the clubs present were collected and the ammunition will be delivered in one lot at the Marine Corps rifle range at Winthrop, Md.

Sportsmen's Row

John H. Rosseter is confident that the grand sport of coursing will return to popularity. He is giving his support and interest to the revival that is taking place in Sacramento. Mr. Rosseter owned some of the most famous greyhounds in the world.

* * * *

C. L. DeRyder, the popular manager of the Pleasanton race track, is an enthusiastic hunter. He had great sport the past season with his dog and gun up in the hills near Pleasanton.

* * * *

Al Cook was up country last week and found a lot of activity at Sacramento in the organization of a new blue rock club. E. O. Putzman, 1122 Tenth street, Sacramento, is one of the workers in getting the new club started.

* * * *

Ed Hoag is keeping his shooting arm in shape by bowling on the San Mateo Elks' team. He says that he will be in shape for a strenuous hunting trip up in Tehama county in the fall.

* * * *

What about O. N. Ford's idea for an interclub shoot this summer? The plan has been given publicity throughout the country. The Golden Gaters are willing to go in, so says Bill Price, and Sacramento, Martinez and the other clubs should fall in line.

* * * *

Edward C. Crossman, secretary of the Los Angeles Rifle and Revolver Club, announces that on the nineteenth of March, which will come on a Sunday, the club's best marksmen will engage in a rifle match with the best shooters from the Turners. A silver trophy will be presented by Wild Bill Ruess to the local club making the highest score.

* * * *

The Youghiogheny Country Club has been selected as a place for one of the big all-day shoots of the League of Western Pennsylvania. The day has not been set by the League, but it will be some time during the month of May and a big time is being looked for. The next shoot at the Country Club will be on March 18th.

* * * *

The new live bird champion of Philadelphia, Earle B. Melrath, is a prominent member of the Keystone Shooting Association of Philadelphia. He held the championship trophy during a part of 1915, winning it from Joseph H. Graves at Delaware Water Gap last spring, and last October lost to Graves in a shoot at Manoa. Melrath will be called upon to defend his trophy and championship title. J. P. Reitz of Winfield, a member of the Milton Sportsmen's Association of Milton, who lost out by losing his twentieth bird, will most likely be the challenger.

* * * *

The next meeting of the Washington State Fish and Game Commissioners' and Wardens' Association will be held in Tacoma on December 11th next. At the first annual meeting of the association, which was held in Spokane, E. J. Merryman of Kittitas county was elected president for the ensuing year and Clay Fruit of Okanogan county and H. M. Fisher of Clallam county, vice-presidents.

* * * *

John F. Short of Foster, Ore., one day recently, took to the county clerk's office of his county the skins of one coyote, four cougars and ten wildcats, on which he received a bounty of $121.50. In the killing of the enemies of game Mr. Short is evidently no slouch, but a man of high rank in this class of business.

* * * *

Judge Harold M. Ball is perhaps the luckiest shot with a shotgun in Woodland. While hunting for jack rabbits with Harold Rehmke, Ball spied one of the long-eared bunnies hopping through the brush. He jumped up on a log to get a shot, and as he did so the log gave way and the Judge fell. The gun was discharged, however, and a blackbird fell from the sky. Soon afterward Ball saw another jack running ahead of Rehmke's dog. He took a shot, missed his mark, but succeeded in placing a few shots in one of the dog's feet.

* * * *

Splashing is not supposed to be the best thing in the world for a fisherman to do, but in Gatun lake, Panama, fish crowd around in large numbers whenever the surface is disturbed, the explanation being that they find their richest food on the limbs of water-killed trees, which are continually breaking off and falling. "Green" visitors are often convinced that the fish in Gatun lake will come to answer to a call, the call being a splash made with a dough ball at the end of a pole and line.

* * * *

The Fresno Rifle and Revolver Club, a new organization which has been affiliated with the National Rifle Association, is making an appeal to the business men of Fresno to support the preparedness program and is further conducting a campaign for membership. Facilities have been arranged at Herndon and Laton for ranges and provision has been made for an indoor range at Fresno. Expert rifle and pistol shots are directing the training of the club members. They are not subject to compulsory military service.

Clarence A. Haight, the "Daddy of trap-shooting on the Pacific Coast," is back from his Eastern trip. He had a great time and reports that the sport allurring is booming across the Rockies. Mr. Haight also sees bright prospects for the game out here this season.

* * * *

Capt. W. A. Simonton, well known out here, recently had the good fortune to win a complimentary shoot at Wilmington, in which the salesmen of the DuPont company participated. He beat Gilbert, Hank Stephens and a number of good shots.

* * * *

Billy Price has nothing but regrets because he cannot go to Salinas to enjoy the big doings. The Salinas bunch always do things up proper. As it is Billy is going over with the Alameda Elks.

SAN JOSE GETS STATE SHOOT.

"This is to advise you that the San Jose Blue Rock Club has been awarded the California-Nevada tournament in accordance with your letter of January 26, the tournament to be of dates May 28, 29 and 30, and practice day May 27."

The above wire, which was received Wednesday by O. N. Ford, secretary and manager of the San Jose Blue Rock Club, gives to San Jose the largest shoot of the season in California—an event which is expected to attract a large number of shooters. Los Angeles was in the field for the state shoot but San Jose won out on her more central location.

The officers of the local club are: George H. Anderson, president; Clem R. Arques, vice-president; O. N. Ford, secretary-manager; Charles Nash, A. F. Baumgartner, E. W. Jack, R. C. Hogg, William McKagney, Dr. A. M. Barker, board of directors.

Next Sunday a squad of five of the club's best shooters will go to Salinas to shoot with the Salinas Rodeo Gun Club and the following week the local stars will make the trip to San Francisco to shoot at the dedication of the new Golden Gate Gun Club's clubhouse.

Salinas Rodeo Gun Club.—In a letter to W. P. Price, Henry W. Collins announces a big time at Salinas tomorrow. His letter follows:

"Friend Billy: This club will hold its opening shoot on Sunday, March 12th. We will have one big time. A real old-fashioned Monterey county barbecue, with plenty of other good things. We have installed a new Leggitt trap—and have ordered all the other necessaries to make this a most successful shoot. Invitations have been sent to the following clubs: Hollister, Santa Cruz, Watsonville, Saratoga, San Jose, Monterey and Pacific Grove.

"As the roads are in good shape we expect quite a crowd and have made all arrangements to accomodate one hundred shooters. We want you to be with us at this shoot and as many of your friends who wish to enjoy a good day's sport.

"Expecting the pleasure of your company on the above mentioned date, I am,

"Yours truly, HENRY W. COLLINS."

* * * *

Alameda Elks.—The newly organized Alameda Elks Club will stage its initial shoot on the Golden Gate grounds Sunday, March 12th. A large membership has been enrolled and the boys are figuring on turning out in round numbers. A batch of beginners will put in an appearance and a big day is promised.

SHARK-CATCHING A FINE ART.

Mr. G. F. D. Morgan of Bondi has reduced shark-catching to a fine art. He is an ardent sportsman, who believes in giving his prey a sporting chance, even though it be a shark. Mr. Morgan has for some time indulged in the hobby of shark-catching by the old method, namely, meeting force with force. This, of course, is lacking in the first principles of sport, so, armed with a two-piece split cane tuna rod, fitted with a 6-in. Hardy reel, 600 yards of 24-cord Cuttyhunk line (breaking strain, 48 lbs.), at 12-0 Bartlett hook, a long piece of piano wire for an end trace, and an 8-oz. sinker, with grappler, he decided to try his skill single-handed.

Since then Mr. Morgan has, with the same gear, landed sharks over 10 feet long. The point is that the majority of our rod men, who are unable, through lack of time or money, to try their hand at the big game fish (tuna and king-fish), can obtain all the sport they could desire on almost any of our beaches by following Mr. Morgan's example, besides rendering a great public service by ridding our beaches of these monsters.

Mr. Morgan grades sharks according to their fighting abilities, as under: The Black Whaler, an easy first; is fast and strong, and game up to the last. The Blue and Grey Pointers are also rattling good fighters. The Grey Nurse is not so good, and the Wobbigong no good.

The shark season starts with the salmon about the middle of October, and extends to the end of December, during which they can be caught on any of our beaches on a clear, calm night. A 30 foot or 40 foot cast into 5 foot or 6 foot of water is quite sufficient. Salmon is the best bait, but, failing that, mullet will do. The weight of a shark of fair size runs from 300 to 500 pounds, so one can see the great skill and care required in landing the fish through the surf and backwash on a line, the breaking strain of which is 48 pounds.—Sydney Referee.

Vernon Club.—With the wind sweeping across the traps, making the clay birds find a fall or rise, and gently hinting to the shooters not in action to seek the warmth of the clubhouse, the Billy Wilshire unique trophy was contested for at the Vernon Gun Club for the eighteenth time at distance handicaps.

Heinie Pfirrmann, the "shootin' Dutchman," shot from twenty yards, and after the fun was over the scorer announced that the trophy had been tied for between Pfirrmann and Charlie White, each with a score of 49x50.

The two went to their respective handicap marks immediately, each with determination written on his face and a box of twenty-five shells in his pocket.

Neither had won a leg on the trophy, and getting this near to it naturally made him all the more determined.

White has been shooting a good deal of late and hails from down Compton way. He had it on Pfirrmann in the handicap line, shooting from seventeen yards, while Pfirrmann was—well, back near the fence!

They started firing. Bird after bird dropped. All was still, no noise being heard but the guns' reports and the shooters' call "Pull."

The shooters continued firing, the birds being shattered one by one; none escaped the hot fire of the German person or the gentleman from Compton until the fifth frame was started. Then they both missed a bird. Pfirrmann missed another, swore and shot again and killed the bird and killed the next one, making his score 23x25. White's score stood 24x25, and he was declared the winner of the week for the trophy. More power to him.

Despite the cold, strong gale that swept through the club grounds Sunday, forty-two local bluerock crushers were ready for the first advance to the firing line. Over 4000 targets were thrown and a number of class A scores hung up.

Frank Nichols, who hasn't shot for some time, according to all local score sheets, was among those present Sunday, and wherever he has been he has certainly picked up in his scoring, breaking forty-eight out of fifty without half trying.

Robert Bole, well known as a manufacturer of oil machinery, again visited the club, bringing along his repeating blunderbuss. He took heed of a sideliner's warning and hugged his gun more, and bored twenty-two out of twenty-five in the open event. The Hoegee company was well represented on the grounds, both Bill Dougherty and Fred Grewell being there.

That well known rifle shot, Ed Crossman, was also among those present and insisted on shooting a 20-gauge gun along with his old pal, "Red" Hedderly, who proved the best shot with the small-bore gun, breaking 61 out of 75. The scores:

Wilshire trophy event—

The San Francisco Fly-Casting Club will start the season in earnest next month. The date has not been definitely set as yet.

Portland Awarded Coast Handicap Shoot

TRAP-SHOOTERS' LEAGUE FORMED IN NORTHWEST

Portland, Ore.—Enthusiastic over the securing of the 1916 Pacific Coast Handicap trapshooting tournament, President A. W. Strowger of the Portland Gun Club stated that a big effort would be made to make this year's event the greatest ever staged in the west. Word that Portland was awarded the handicap was received in a telegram to H. R. Everding, ex-president of the local trap organization, from Elmer E. Shaner of the Interstate Association of Pittsburg.

The date of the tournament has not been decided upon, , but it will probably be held during the Rose Festival, when the local club will stage the annual Rose Festival championship shoot. The two biggest tournaments ever held on the coast were staged by the Portland club. In 1912, 126 shooters entered and in 1914 the entry list was 139.

The details of the program will be arranged as soon as the dates of the other registered tournaments, the local club will stage, are ratified by the Interstate Association.

Another announcement, which is of great interest to the blue rock breakers, was made by President Strowger, and that was the formation of a Northwestern Trapshooting League, an organization similar to the Philadelphia Trapshooting League. The Northwest league will be composed of Spokane, Seattle, Tacoma and Portland.

President Strowger stated that Tacoma was very much in favor of the league and Seattle will doubtless welcome the organization. According to the present plans, the clubs will shoot seven matches, beginning a week from Sunday, March 5, and closing just before the trapshooting tournament at Lewiston, Idaho. All members of each club will be eligible to shoot in the league matches, but only the scores of the five high shooters will count.

The third event of the series between the women shooters of the Portland Gun Club and the Spokane Club will bs shot March 12th.

* * * *

Golden Gate Club.—Local trapshooting enthusiasts are not going to be caught when the season opens in earnest out of practice. This was indicated by the big gathering that was on hand last Saturday and Sunday at the Golden Gate grounds. Despite the fact that it rained pretty much all day Saturday and a strong northwest wind was blowing on Sunday, the boys and a couple of lady shots were at the traps. Manager Pete Ashcroft has the new grounds in shipshape and work is progressing on the clubhouse that is in the course of construction.

The scores set up in practice were creditable, considering the adverse weather conditions. Barney Worthen was especially in good form for he smashed 92 birds out of a 100. In the same contest, Stahl broke 86, Hennessy 85, A. G. Wilkes 84, Roy Avery 83 and Mrs. A. G. Wilkes 79.

Valleau 47, Carman 43 and Martine 32 were the scores in a fifty-bird event. Dr. Topham led three companions in 100 birds with 87 breaks, while N. A. Howard and Orr scored 81 each and Lockhart 66. Out of fifty targets Chichester busted 42 while Frank Webster and "Pop" Best got 40 each. In another fifty event, Terry landed 45, Ed Garritt 41, Martine 38 and Mrs. Ed Garritt 29.

The club's opening monthly shoot will be held on Sunday, March 19th. The third Sunday in every month will be the club's regular time at the traps.

* * * *

Bay View Club.—The Bay View Club did not hold its monthly shoot last Sunday. There is a report current that the organization does not intend to be active this season. It was hoped that the three clubs in Alameda would keep the blue rocks humming this season and it may be that the Bay View boys will get busy later on when fair weather puts in an appearance for a permanent stay.

* * * *

San Jose Club.—In the opening club shoot of the San Jose Blue Rock Club last Sunday, O. N. Ford displayed sensational form in breaking 98 out of a 100 birds. The conditions for high scores were not the best, either, as a strong wind was in evidence.

Bobby ran the last 70 straight. Louis Baumgartner was second with 88 and Clem Arques third with 86. C. H. Nash, who finished fourth, finished with 30 straight hits.

Ford won the second amateur trapshooter's medal on the great score of 479 out of 500. Clem Arques took the third medal with 434 out of 500. M. O. Feudner and W. Ellis of San Francisco were down to break in their shoulders and Leo Thornton of San Jose did some good work with a new 20-gauge, hitting 62 clays out of 100.

Baumgartner and Arques defeated Anderson and Feudner in a special match by a margin of two birds.

It was announced that a squad of San Jose shooters would attend the opening shoot of the Golden Gate club, March 19. At that time the San Francisco shooters will dedicate their new clubhouse.

Sunday's scores follow: O. N. Ford 98, L. Baumgartner 88, C. R. Arques 86, C. H. Nash 84, Dr. Heidleburg 83, M. O. Feudner 82, E. C. Stamper 80, Geo. H. Anderson 80, William McKagney 80, R. C. Hogg 77, W. Ellis 75, A. Smith 70.

Probably the most important happening in the shooting world since the formation of the National Rifle Association is the recent incorporation of the American Amateur Trapshooters' Association for the purpose of providing an official supervisory body for the half-million shooters and nearly 5,000 trapshooting clubs in this country. The national officers of the association are as follows: John Philip Sousa of New York, President; Dr. Horace Betts, President Delaware State Sportsmen's Association, First Vice-President; Charles W. Billings of New Jersey, Captain of the trapshooting team which won for America in the Olympic Games at Stockholm, Second Vice-President; Professor James L. Kellogg of Williams, Third Vice-President; Stanley Frederic Withe, Secretary of the Intercollegiate Trapshooting Association, Secretary-Treasurer.

Coming as it does at the close of the most successful season in the history of trapshooting, the announcement of the new association is particularly timely, and though not at all unexpected by close followers of the sport, this latest development has for the moment taken precedence over all other topics among shotgun enthusiasts. In announcing the organization of the new association, Secretary Withe made this statement:

"Amateur shooters have long felt the need of a strictly amateur organization, directed by amateur sportsmen and in the interests of the amateur gunner. It is owing to the increasing sentiment that such an organization would prove of inestimable value to the sport and to the individual shooter that the A. A. T. A. has come into being. In addition to standardizing the rules governing the sport the association aims to increase interest in club shooting and to bring about a greater development of the individual shooter by instituting a system of medal and trophy awards. As soon as a shooter has scored breaks of 38 out of 50 targets he will be awarded a 75% of bronze, and so on as his skill increases until he has won the 95% medal of solid gold, each medal representing the association's official recognition of the degree of proficiency attained."

The headquarters of the association will be in Baltimore, Maryland, in charge of Secretary Withe.

Santa Ana Club.—A good attendance was present last Sunday at the regular shoot of the Santa Ana Blue Rock Club held on West Fifth street. Increasing interest in the doings of the club was manifested. Among participants and their scores were the following:

E. Ross shot at 10, broke 10; A. Slaback 30—28. Evans 50—40, P. Knoff 25—22, C. Burr 10—8, Felt 15—12, F. Leonard 50—45, E. Frambes 30—22, T. Rainey 25—19, Jones 50—29, Wilson 40—20, L. Ross 45—28, Lacy 50—30, Sutton 35—18, Young 45—21, Kile 5—4, L. Burr 15—4, C. Smith 15—14, S. Burr 15—7, Skiles 15—9, Wiekherst 35—31, Shipkey 40—28.

Eureka Club.—At the Eureka, Cal., Gun Club shoot Feb. 22, Dr. C. O. Falk was high over all, breaking 95 out of the 100 target program. Dr. H. T. Hinman took second amateur honors, scoring 88, and Warren Innes third, with 84. Otto Feudner kas high professional, scoring 91 x 100.

Trade Notes.—The three high men in the Eureka shoot of Feb. 22nd shot Peters Shells; in fact, a majority of those present pinned their faith to the shells with "Steel where steel belongs."

SNIPE BUTCHERED IN WINTER HOME.

The number of weeks between the time migrant Wilson snipe appear in the Northern States in sufficient numbers to afford fair shooting and that when most of the birds have been forced south by freezing weather marks the bounds set by nature to the length of the fall snipe-hunting season, usually from six to seven weeks in this section of the country.

If all sportsmen are to have an even chance under the law, open seasons must be so regulated that the gunners in the middle and the southern parts of the country will be restricted to the same number of weeks. Unfortunately, under existing State laws the opposite condition prevails. Most of the Northern States do not open the snipe-shooting season until September 1—New York not until September 10—and there is not much good hunting after early November.

On the other hand, when the birds reach the Gulf State in October they find the legal hunting season already open, and under the State laws they are subject to a continuous fusillade during the entire time of their residence in the South until they depart the following spring for their northern grounds.

Under this system the Southern gunner has a shooting season about three times as long as that of his Northern competitor and also a chance to bag even more than three times as many birds, because the Wilson snipe while in migration is erratic and likely to occur in numbers for only a few days in any one swamp or thicket, but after it reaches its winter home it congregates in certain favorite localities, where it is abundant every day throughout the entire winter.

Winter shooting at these places in the Gulf and South Atlantic States is responsible for the heavy falling off in the numbers of the Wilson snipe. How they abounded formerly and how they were slaughtered by Southern gunners is forcibly shown by the record of a single hunter in Louisiana, who, during the twenty years from 1867 to 1887, killed 69,087 birds, an average of 3,500 snipe a winter.

In 1870 about 100 snipe were killed by this man for each day that he hunted. The maximum was reached in 1875, with 150 birds a day; this fell to 100 in 1880 and to 80 in 1887. Individual days far exceeded these average figures.

The highest score for seven consecutive shooting days was reached in 1877, when, on December 8, 270 snipe were killed; December 10, 255; December 11, 286; December 17, 233, and December 19, 262—an average of 278 a day and a total of 1,943 birds in seven days of shooting. The bag on December 11—366 snipe—is supposed to be the world's record for slaughter by one man in one day.

With such butchery in its winter home, it is no wonder that the numbers of the Wilson snipe have markedly decreased. Aside from other considerations, such wholesale destruction is contrary to sound business principles. Among the better class of sportsmen such a hunter is sometimes called a "game hog," whether he shoots for his own table and that of his friends, as was the case in the instance cited above, or whether he is a plain market hunter, who kills thousands of birds as a means of obtaining a livelihood. Had these 3,500 snipe been obtained in one season by a hundred different gunners in widely separated localities, instead of by one man in one place, their sport value to the community would have been increased many fold.

WELLS W. COOKE,
Assistant Biologist, Bureau of Biological Survey.
Washington, D. C.

SCORES ON SHELL MOUND RANGE.

Carl Weggenmann made the three best centers of the year in the Deutscher Krieger Schuetzen competition Sunday at Shell Mound Park, winning the Captain Siebe trophy. The scores:

Deutscher Krieger Schuetzen, monthly medal shoot—First champion class, Carl Metzger, 360; champion class, Captain Fritz Kaiser, 320; first class, Louis Laubscher, 298; fourth class, A. Zellsberger, 260; first best shot, Chris Hartmann, 23; last best shot, John Bender, 20; most red flags, W. Pfiester; bullseye prizes, Xavier Gilberzahn, Carl Weggenmann, William Pfiester, Louis Laubscher, John Bender.

Germania Schuetzen Club, public prize shoot, bullseye scores—B. P. Jonas 89, George A. Pattberg 104, G. C. Gunther 144, F. P. Schuster 186, William F. Blasse 219, D. W. McLaughlin 247, N. Ahrens 273, M. F. Blasse 398, G. Heino 408, D. A. Huntemann 425, Herman Huber 467, E. Schierbaum 482, A. L. Ott 502, C. M. Henderson 610, Otto A. Bremer 692, Philo Jacobi 696, W. H. McLaughlin 730, H. Luneberg 758, E. Hoffman 797, P. F. Rathjens 815; most bullseyes, W. F. Blasse 106, George A. Pattberg 76, Herman Huber 49, Ben Jonas 40, E. Schierbaum 26, N. Ahrens 14.

Shell Mound Pistol and Rifle Club, monthly medal shoot, rifle scores, class A—E. Schierbaum 207, 207; K. O. Kindgren 213, A. Thompson 204, R. S. Wixson 220, 203. Class B—A. M. Paulson 184, H. Kleinenbroich 179, 186; O. P. Peterson 159, 166; F. A. McLaughlin 169, 167; F. P. Poulter 180, 192; H. Purrmann 186, 161; C. M. Kraul 200, 216; C. H. Atten 143. Class C—L. Ericksen 195, 195; G. R. Hauser 177, 184. Class B—P. Kulik 163, 125; P. Paulson 161, 108. Unclassified: F. A. Johnson 140, 162; G. Bender 177, 175.

Independent Rifles, monthly medal shoot—K. Edel 47, Corporal J. Menke 36, H. C. Lunsmann 23, A. Zimmermann 36, Lieutenant J. Siebe 50, J. Donovan 21, Carl Abraham 27, Sergeant M. C. Schleemann 22, Lieutenant P. Volkmann 38, G. W. Steffens 48, Henry Schlichtmann 36, Captain Harry Gaetjen 56, Sergeant P. C. Petersen 65, Corporal E. Golsch 38, G. J. Steiger 33, J. M. Hansen 33, B. Hassler 45, Corporal H. Pape 47, J. Westergaard 18, L. Laubscher 15.

Shell Mound Pistol and Rifle Club, monthly medal scores—Class A: O. L. Nemo 88, 93; R. S. Wixson 92; H. J. Harris 89, 93. Class B: Captain George Larson 79, 80; L. Ericksen 80, 85; C. M. Kraul 87, 87. Class C: F. P. Poulter 86, 87; Captain Harry Gaetjen 78, 78; W. Guild 80, 81; A. Thompson 75, 77. Class D: H. W. Kleinenbroich 70, 73; O. P. Peterson 78, 75; H. Hartmann 80, 82. Unclassified: T. H. Johnson 54.

Danish-American Rifle Club, monthly medal shoot—S. Mathisen 44, F. Andersen 50, C. Riis 33, H. Frank 45, F. Nielsen 54, J. N. Hansen 30, J. Miller 30, T. Westergaard 37, C. L. Nielsen 72, M. C. Hansen 54, P. C. Petersen 55, O. Christensen 57.

The scores of C. A. O'Connor against Everding: O'Connor 21, 22, 23, 25—90.

Spokane Women's Team—Mrs. C. A. O'Connor 20, Miss L. March 17, Miss B. Lamar 15—total, 52.

Portland Women's Team—Mrs. Schilling 88, Mrs. G. Reid 14, Mrs. E. H. Keller 9—total, 45.

In a special telegraph match Charles A. O'Connor won from H. R. Everding of Portland, 90 to 83.

* * * *

Salt Lake Club.—Twenty-two members of the Salt Lake Gun Club were in attendance at the traps for the regular weekly trophy shoot Feb. 27th. Incidentally they bumped into the worst batch of shooting weather that has been dealt out for many a day, between the wind and the dazzling light in the background it was next to impossible to see the targets at times.

Morgan was high over all with 43x50, which is one of the lowest scores that ever won high honors at the local club.

Fisher and Engle tied for first place in the handicap trophy event for the amateur class, with 47x50. They decided to wait for more favorable conditions to shoot off the tie. The following are the scores:

Professionals—Morgan 43x50, Hood 41x50, Cummings 41x50, Anderson 36x50.

Amateurs—

	Broke	Hdcp.	Ttl.
Engle	38	9	47
Fisher	37	10	47
Tingey	41	2	43
Shepherd	37	5	42
J. F. Cowan	37	3	40
Bain	35	3	38
Luff	34	3	37
A. W. Cowan	30	7	37
Moffat	35	1	36
Gallagher	34	2	36
Bray	29	5	34
Williams	28	3	31
Becker	31	0	31
Johnston	24	4	28
Edmonds	22	3	25
Neill	16	4	20
Johnson	10	5	15

* * * *

New Club for Sacramento—Organization of a new trap shooting club in Sacramento is now under way, and within the next two weeks it is expected that permanent organization will be effected with the election of officers. A. L. Pierson, formerly president of a gun club in Oroville, has been named temporary secretary of the new body.

The name of the organization has not yet been selected. Inasmuch as grounds have been secured in West Sacramento, there is a possibility that the club will be named the West Sacramento Gun Club. By the middle of the month installation of traps and other paraphernalia will be started.

Under the present plan no more than 150 members will be taken into the club. Those behind the club favor a low membership fee and no assessments. It is planned to offer special inducements to join to beginners and women who are interested in the sport.

* * * *

Portland Gun Club.—Despite the rain March 1st, H. R. Everding, former Portland Gun Club president, gave a nifty exhibition of scattergun accuracy when he broke 48 clay birds out of 50 in a match shoot with Frank Templeton, another Portland crack. The latter was not far behind with 45 out of 50.

Mr. Everding likewise was high gun among the coterie of shooters on hand for the regular Wednesday practice. He broke 90 per cent of his birds.

Here's the Place to Get Caribou

PETE STANDRIDGE'S EXPERIENCE IN CANADIAN ROCKIES

One of the greatest spots in the country in which to find caribou and wild game of all descriptions in abundance is in the Canadian Rockies in British Columbia, some 300 miles northeast of Seattle, according to Pete Standridge, the baseball pitcher who was with the Chicago Cubs last season and previously with the San Francisco Coast League team. Standridge was in San Francisco during the week and had an interesting and rather thrilling experience up in that country during the past winter.

"Together with four friends, two of them old trappers, I went up in the Canadian Rockies in November," says Standridge. "We packed in 43 miles from Riverstoke with seven horses and invaded some wild and woolly country that had not been tramped over by human beings for fourteen years. It was very evident when we started going in that few had been that way before. If I had it to do over again I certainly would take the precaution to lead my horse rather than to sit on his back and take a chance.

"The way we found game of all descriptions was wonderful and well repaid us for the trouble and hardship we underwent. Caribou was especially plentiful and anyone caring for this sport can secure plenty of it in the Canadian Rockies. We had little or no difficulty in securing the limit of three apiece. We also brought down five bear and seven mountain sheep and no end of smaller game.

"We were having one high old time until it started to snow. The first few days we didn't mind it in the least as it added to our fun in hunting game. Then it started to get deep. When the four-foot mark was reached we made a hasty decision that it would be well to get out. Our plan was to take the five horses we retained in camp and switch them around in breaking a trail for us to follow. This worked for just one mile when our horses played out. There was nothing let for us to do but to shoot the poor animals, as with the snow getting deeper all the time it was impossible to secure feed for them.

"The surprising thing was to see how the deer of that wild country take care of themselves. They located in ravines, where some protection was offered them, and secured feed by eating the leaves of trees and nibbling off the bark. We noticed few that were in any distress for want of food. The caribou herded together in droves. I counted 130 in one band, which will give you somewhat of an idea of the abundance of the game."

Standridge and a couple of friends are going to make another trip up in the same locality next winter for the express purpose of trapping beavers. These busy workers were seen everywhere.

"I cannot imagine a prettier picture than I saw up there," continues Pete. "We climbed a hill overlooking a dam on which they were working and after sitting quietly for a couple of hours a pair of beavers came out and started to work. We had our field glasses to take in the scene. The boys tackled a big tree and in no time they had it down. Then they cleaned off the limbs with the exception of two at the end. These they used to take hold so as to steer the log, that was fully twelve feet long, up the creek. The way they handled that log to get it in its proper place in the dam was wonderful. I figure we are going to have a lot of fun with Mr. Beaver next winter."

Standridge has had quite a deal of experience in hunting. When with the San Francisco team he made two trips up in Siskiyou county.

THE FARM

SOUDAN GRASS VALUABLE CROP FOR UNIRRIGATED LANDS.

Soudan grass is proving valuable for California conditions, as dry forage on lands unsuited for irrigation, according to Professor John W. Gilmore of the Division of Agronomy of the University of California.

Experiments at the University Farm showed that the planting of April 15 produced the largest yield of both hay and seed. Moreover, only two cuttings per year were obtained from the later plantings, but three from the plantings of April 15.

The yield of hay from three cuttings, under dry culture, was 5.95 tons per acre; under irrigation, 7.43 tons. The yield of both the later and earlier plantings was considerably less.

The yields at Davis with 15 pounds of seed, under dry culture, were 6.93 tons per acre, and under irrigation, 7.7 tons. The yield from 35 pounds of seed per acre, under both cultures, was somewhat more than 15 pounds, but the extra yield did notpay for the extra seed.

Experiments were conducted also as to the method of seeding. The planting in rows 18 inches apart and cultivated gave better results than the drilled seeding. The yields under this method were 7.2 tons per acre, while the drilled seeding yielded only 5.1 tons. It must be remembered, however, that the 18-inch planting was cultivated and this required labor. The hay produced by this method was coarser and consequently of poorer quality than that produced by drilled seeding.

In the Stretch

You can be sure the leaders are horses without limb troubles. Sore muscles, stiff joints and strained tendons never go under the wire in front, no matter how fine the breed of the horse. Many a good horse is now a working plodder, when he might have held his place as a racer if only his owner had used

The Only Spavin Remedy in the Mack's SPAVIN $1000 REMEDY *World Sold Under a $1,000 Bond*

There are no limb diseases known among horses that cannot be cured with this powerful penetrating remedy. It goes right to the seat of the trouble and will absolutely cure Ringbone, Thoroughpin, Curb, Capped Hock, Shoe Boil, Sprung Knee, Ruptured Tendons, Sweeny, etc. quickly and without scars or blemishes. No matter how long the horse has been lame—from what cause—or what you have tried—we'll guarantee that Mack's $1,000 Spavin Remedy will cure him permanently. If it fails, we will refund every cent you pay us.

You Can't Lose

We have a special deposit with the First National Bank of Binghamton, N. Y., of $1,000 which we must forfeit if we do not do exactly as we say. You take absolutely no chances. Send for a copy of this bond. Read it. See for yourself!

Your Druggist Will Obtain Mack's $1000 Spavin Remedy for You— if you ask him. Price $5.00 a bottle. If he refuses, remit $5.00 to us and we will see that your order is filled without delay.

Valuable Horse Book Free

RACE TRACK FOR SALE.

The Ukiah race track, located a little less than a mile from the Court House at Ukiah and bounded by the State Highway on the west, the county road on the south, and the Northwestern Pacific Railroad nearly the entire length on the east side of the track. The property consists of twenty acres. Fifty-nine good box stalls, good grandstand, fencing in good order, and one of the best half mile tracks in the state. An excellent winter track and an ideal place to work horses during that season. Plenty of adjoining drives for jogging horses. Two wells on the premises as well as water from the city water works, with tanks conveniently arranged for sprinkling.

This is the only race track in Mendocino county and the location of the county fairs. Ukiah is the county seat and has a population of about 3000, is in a most fertile valley in which all kinds of fruit, vegetables, hay, grain and hops are grown. Has excellent water; no malaria or mosquitos. It has paved streets, good sewerage, and splendid gas and electric light works. There are many standard and thoroughbred horses in this county and the people are a race loving lot. This property is offered for sale at a less price than adjoining property is held at. WANTED.

Pacer, five to eight years. One that has been campaigned; sound. Address A. B., This Office.

ASSESSMENT NOTICE.

MAY DAY GOLD MINING COMPANY—Location of principal place of business, San Francisco, California. Location of works, Calaveras County, California.

Notice is hereby given that at a meeting of the Board of Directors, held on the 24th day of February, 1916, an assessment (No. 4) of five (5) cents per share was levied upon the capital stock of the corporation, payable immediately in United States Gold Coin, to the Secretary, at the office of the company, 1215 Van Ness Ave., San Francisco.

Any stock upon which this assessment shall remain unpaid on the 20th day of April, 1916, will be delinquent and advertised for sale at public auction, and unless payment is made before, will be sold on Friday, the 19th day of May, 1916, to pay the delinquent assessment, together with the cost of advertising and expenses of sale.

By order of the Board of Directors.

C. E. HEALD, Secretary.

Office—1215 Van Ness Ave., San Francisco, California.

FOR SALE.

BEST POLICY 42378, one of the best bred horses in the world. Handsome bay horse, small star in forehead, left hind pastern and left fore heel white. Has size, heavy boned, stylish, pure gaited trotter, sound, and a splendid individual in every respect. Best Policy is by Allerton 5128, dam Exine 2:18¼ by Expedition, next dam Euxine by Axtell, next dam Russia by Harold 413, next dam Miss Russell, dam of Maud S., etc. Best Policy has trotted a mile on the Hanford half mile track in 2:12. He is ten years old and with little training would make a good game race horse, and ninety percent of his colts are trotters. He will be sold at a great sacrifice. For price and further particulars address

BREEDER & SPORTSMAN,
P. O. Box 447, San Francisco, Cal.

HIGH-CLASS TROTTING BRED COLTS FOR SALE.

No. 1. Three-year-old filly sired by All Style, dam Dr. Hicks. This filly is registered.

No. 2. Two-year-old colt, full brother to the above.

No. 3. Two-year-old filly sired by Dan Logan, dam a Wilkes mare who was a great natural pacer but unfortunately was crippled by a barbed wire accident as a yearling and was never worked.

The All Styles are large, strong built, with all the style of their sire, perfect in action, and all three of the above colts should make race horses second to none. The Dan Logan filly is perfectly gentle to handle and drive and is a high-class filly in every respect. Apply to or address,

SAVE-THE-HORSE

TRADE-MARK REGISTERED

Use It Firts and You'll Not
Have to Use Any Other After

Save-the-Horse has stood alone and unique among veterinary remedies for twenty years.

Our Answer Gave Him Hope

San Leandro, Cal., Sept. 14, 1915.

Troy Chemical Company, Binghamton, N. Y.

Dear Sirs: It is a long time since I corresponded with you. I thought several times to write, but kept from doing so because I wanted to be sure not to give any false report of what Save-the-Horse has done. It is surely all you claim. It has actually done wonders for my black mare, Phoebe. She was foundered so bad that neither I nor anybody else who looked at her, ever thought that she would walk again.

I was told to kill her for the chickens, but could not bear to do so. I wrote you, and your answer gave me hope, so I got Save-the-Horse, and used it faithfully. It cured the founder so entirely that I can't see any remains of it whatsoever.

Thank you very much for the remedy, it is good. I also thank you for the promptness and kindness that you awarded me in your dealings.

Respectfully yours, JOHN P. PETERSON.

Save-the-Horse goes through and through both bone and tissue.-It works inside not outside

It has the highest potency—it is the King of Remedies—for any blemish or lameness—it cures to stay cured;—and every bottle is sold with a contract to cure or refund the money. Save-the-Horse enjoys the distinction of being recommended by more satisfied users, and of having more imitators and counterfeiters, than any other veterinary remedy in the world today.

Druggists everywhere sell Save-the-Horse WITH CONTRACT or sent by us Express prepaid.

$5 with a binding contract to refund money or cure any case of BONE AND BOG SPAVIN, THOROUGHPIN, RINGBONE (except low), CURB, SPLINT, CAPPED HOCK, WIND-PUFF, SHOE BOIL, INJURED TENDONS AND ALL LAMENESS. No scar or loss of hair. Horse works as usual.

Harpers Weekly and The Breeder and Sportsman

$5.50 WORTH FOR $3.25

Breeder and Sportsman

One Year, 52 Copies, Regular Price $3

THE BREEDER AND SPORTSMAN is the oldest weekly journal devoted to the Horse west of Chicago, having been established in 1882. This interest, together with the Kennel, Gun, Fishing, Coursing and kindred sports receiving the most attention in its columns; together with Agricultural and Dairying Departments, under whose headings especial attention is paid to the breeding, etc., of Cattle, Sheep, Hogs, Poultry, and all other animals connected with stock raising.

As an advertising medium to Racing Associations, Horsemen, Stock Breeders, Manufacturers of Sulkies, Carriages, Wagons, Agricultural and Dairying Implements and Machinery, Sporting Goods, Fanciers, Stock Foods, and all others desiring to bring their wares to the attention of the classes to whose interests the paper is devoted within the field mentioned above, the BREEDER AND SPORTSMAN will be found indispensable.

Harpers Weekly

Six Months, 26 Copies, Regular Price $2.50

At no time has it been so evident to Americans as now, that the most important thing in the lives of all of us is the progress of the European War.

Next to your daily bread the war interests you most vitally. It may even come to be the most important part of your problem of living.

The periodical of greatest fundamental interest to you today is the one that can best report those phases of the war that come closest to your country and you.

Because of connections abroad and at home, HARPER'S WEEKLY is that publication.

As a critical commentary that presents inside facts, it is the necessary bridge for intelligent readers between the daily newspaper and the monthly review.

You want HARPER'S WEEKLY now. You can get it now on trial at a remarkable reduction.

Send $3.25 Now and Get Them Both

THIS OFFER is made to all who will send us $3.25 before March 31st, 1916, whether for extension of subscription, renewal of subscription or a new subscription. Address:

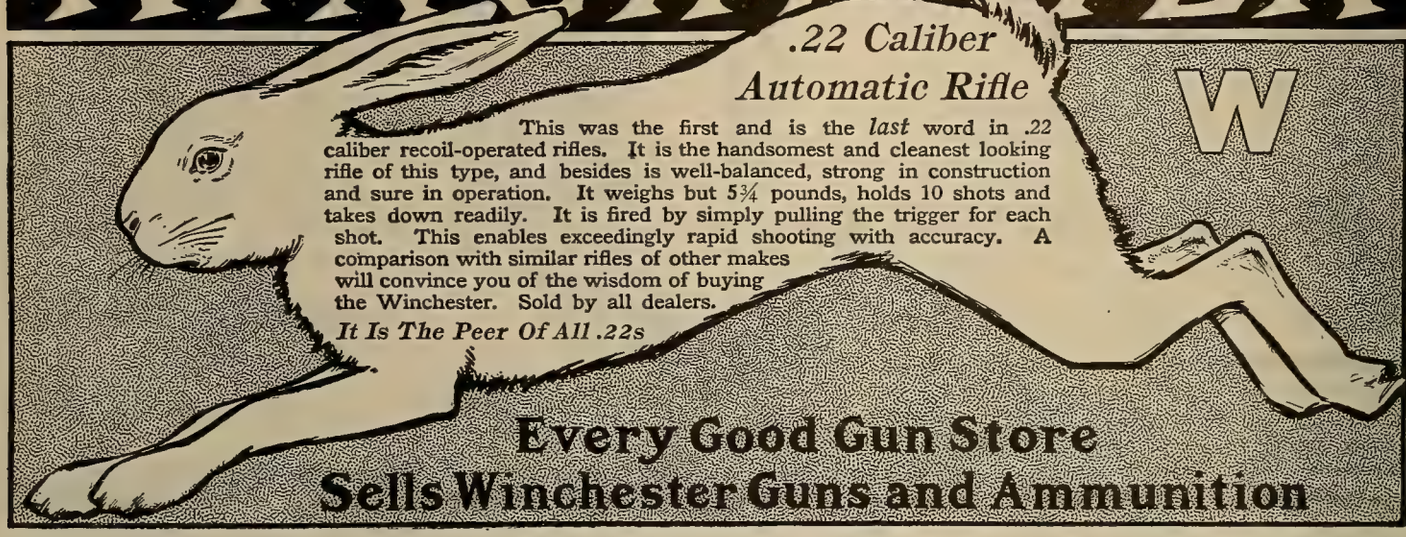
REID'S REMARKABLE RECORD

Adds Further Evidence of the Superlative Quality of

Peters SHELLS

Shooting at Registered Tournaments during the past four years L. H. Reid of Seattle, has made a phenomenal Record of consistent High Scores



1912—	2115 ex	2200, 96.14%,	Pacific Coast High General Average.
1913—	3843 ex	4005, 95.95%,	Pacific Coast High General Average.
1914—	2146 ex	2225, 96.44%,	Professional Average for United States.
1915—	2482 ex	2550, 97.33%,	Pacific Coast High General Average.
Total,	10,586 ex	10,980, 96.46%	

During the above four years, Mr. Reid has shot at nearly 30,000 Registered and non-registered targets, breaking an average practically equal to the above. In accomplishing these results, he used about two-thirds TARGET (medium grade) and one-third IDEAL (high grade) shells, all with

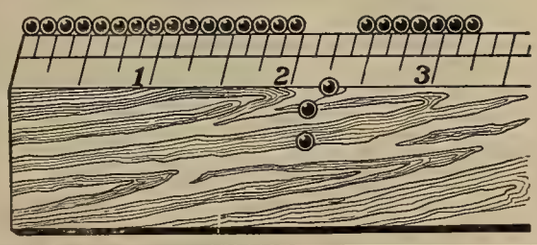
THE PETERS CARTRIDGE CO., — Pacific Coast Branch, — 585-587 Howard St., SAN FRANCISCO, CAL.

WINCHESTER

.22 Caliber

Automatic Rifle



W

This was the first and is the *last* word in .22 caliber recoil-operated rifles. It is the handsomest and cleanest looking rifle of this type, and besides is well-balanced, strong in construction and sure in operation. It weighs but 5¾ pounds, holds 10 shots and takes down readily. It is fired by simply pulling the trigger for each shot. This enables exceedingly rapid shooting with accuracy. A comparison with similar rifles of other makes will convince you of the wisdom of buying the Winchester. Sold by all dealers.

It Is The Peer Of All .22s

Every Good Gun Store
Sells Winchester Guns and Ammunition

Is Shot Always SHOT?

DO YOU KNOW the shot that goes into your shells? If you use Remington UMC factory-loaded shells — as most prominent sportsmen do — you are assured of absolutely uniform shot.

Prove the superiority of Remington UMC shot for yourself. Cut open a Remington UMC shell and you will find that every shot pellet is of the same size. This uniformity means a closer pattern and greater penetration — the load sticks together. No one knows better than the experienced sportsman how essential uniformity in shot is whether afield or at the traps.

The Remington UMC ten-story shot tower at Bridgeport, Conn. (one of the tallest buildings in the State), is equipped with the most modern devices to turn out shot of the highest quality. From the expert mixing of the metal down through the various stages of sorting, tumbling, polishing cooling and grading, the whole process is under scientific supervision. It is largely in the grading of shot sizes that the superiority of Remington UMC lies since grading determines the uniformity of the product. Upon such painstaking effort — evident in this and many other features — has been built up the Remington UMC reputation for quality in arms and ammunition.

REMINGTON UMC

Remington UMC shot shells are made in a variety of loads. You will find standard combinations of loads and sizes at your dealer's. Look for the Red Ball Sign and ask for the Red Ball Brand.

THE WORLD'S RECORD!!!

At Atlantic City Sept. 15 to 17 Mr Lester German broke all Tournament Records by scoring 647 OUT OF 650 TARGETS, with one run of 372 straight, which is longest for the year.

PARKER GUNS have won the Grand American Handicap 9 times out of 25 offers, once with 100 straight, only time made. Also 7 out of 9 Interstate Championship Events with highest scores ever made, twice with 198 x 200 at 18 yards rise.

Remember

PARKER PACIFIC COAST RECORDS

In California Mr. Henry Pfirrmann won the Pacific Coast Handicap and Mr. J. Foster Couts won the Championship of California.

In Portland, Oregon, Mr. P. H. O'Brien by scoring 241 straight made the record for the Pacific Coast.

If interested in small bore guns write for instructive booklet which will be sent free on request. For further particulars regarding guns from 8 to 28 gauge, address

TRAINING THE HOUND

A PRACTICAL TREATISE ON THE TRAINING OF FOX HOUNDS, BEAGLES, AND COON HOUNDS.

The system of training advocated is simple and effective, so that anyone who carries out instructions can easily develop a foxhound, a beagle or a coon dog to the highest state of usefulness or organize a pack in which each hound will work independently and at the same time harmoniously with the others. The subjects are: The Hound's Ancestry, History, Instinctive Tendencies, English and Native Hounds, Developing the Intelligence, Training the Foxhound, Voices and Pace of the Hound, Qualities of Scent, Manners, Training the Coon Dog, Coon Hunting, Training the Beagle, Forming a Pack, Field Trial Handling, Faults and Vices, Conditioning, Selecting and Rearing Puppies, Kennels and Yards, Diseases of Hounds and Their Treatment. The chapters on field trial training and handling are alone worth the price of the book, which is one that every man who loves the voice of a hound should read.

The book contains 224 pages, is clearly printed, nicely bound, and handsomely illustrated with bloodhounds, various types of English and American foxhounds, beagles and cross-bred dogs for 'possum and coon hunting.

Price, in heavy paper cover, $1; $1.50, postpaid.

BREEDER AND SPORTSMAN

VOLUME LXVIII. No. 12. SAN FRANCISCO, SATURDAY, MARCH 18, 1916. Subscription—$3.00 Per Year

Charley Guion and the crack Northwestern Trotter
FLORADORA Z. 2:11½
by Zombro 2:11, dam Flora G. 2:21 by Altago 9320—Winner of nine out of eleven starts in 1915 and now being prepared for an eastern compaign this season.

Pleasanton Driving Park

PLEASANTON, CALIFORNIA

offers for service for the season of 1916 the following stallions:

THE ANVIL 2:02 3-4

Fastest trotting stallion ever offered for service in California, and fourth fastest entire trotter in the world

Son of St. Valiant Vincent 2:11¾ (by St. Vincent 2:13½ out of the triple producer Grace Lee 2:29¼ by Electioneer 125); dam Amy Smith by Emperor Wilkes 2:20¾, sire of Princess Eulalia (4) 2:09¼, etc.; grandam by Hambletonian 539.

The Anvil is regarded by Edward F. Geers as one of the very greatest trotters that he has ever raced. For five years the pair of Tennesseeans went to the races together and in that time were but twice unplaced, while winning a total of fifteen races, including the historic M. and M.

As an individual he is most pleasing, not too large or coarse in any way but smoothly and compactly made and "all horse" in every line. He is a perfect headed, pure gaited trotter, with the very best of disposition, and is destined to become a very great sire of trotting speed. His opportunities in the stud have been very slight as he has been retired from racing only since the close of 1914, and has but three or four foals now three years old. He was selected to head the stud at Pleasanton Driving Park not only on account of his great qualities as a race trotter, but because one of his first foals, Anvilite (2) 2:22¼, with a trial of ten seconds or more faster, is in every way the greatest colt trotter ever handled by C. L. DeRyder. The services of The Anvil are recommended to you without reserve.

Fee for The Anvil 2:02¾, $100 with usual privilege

Vernon McKinney 2:01 1-2

Fastest member of the great family of McKinney 2:11¼

Sire of VERNA McKINNEY (2) 2:13 (his first foal raced), fastest two-year-old pacing filly of 1915.

Son of Guy McKinney 37625 (by McKinney 2:11¼ out of Flossie Drais by Guy Wilkes 2:15¼); dam Maud Vernon by Mount Vernon 2:15¼, sire of the dams of Leata J. 2:03, etc.; grandam Mag by General McClellan, sire of the dams of Mack Mack 2:08, etc.

Vernon McKinney's racing career was not an extensive one but will long be remembered for the excellence of his performances, as his winnings include a Chamber of Commerce stake in time very near the record for that event at the time, and he is the fastest of all the McKinneys.

He is a horse of rare qualities in the way of individual excellence, almost ideal in behavior and temperament in harness or out. Since his retirement he has been a popular horse in the stud and our claim that he would prove a very great sire of pacing speed has been fully substantiated, his first foal to be raced being the season champion for the age and gait in 1915, a most excellent testimonial to his potency. He is a very sure breeder, his get are uniformly endowed with natural speed and the physical and mental requirements of modern race horses and find ready sale at most gratifying prices.

Fee for Vernon McKinney 2:01½, $50 with usual privilege

The best of care taken of mares in any manner owners may desire, but no responsibility assumed for accidents or escapes. Address for particulars

CHAS. L. DeRYDER, Superintendent, PLEASANTON, CAL.

MR BROODMARE OWNER, do you realize the importance of the simple facts that sixty of McKinney's sons and nearly fifty of his daughters are producers of standard performers? That the McKinneys won more money than any other family in 1915? That the McKinneys won the largest percentage of the futurities, both east and west, in 1915? That McKinney has more sons to sire 2:10 performers than any other stallion living? Keep these facts in mind, and remember that I offer you the services of

THE VERY BEST SON OF McKINNEY

CARLOKIN 2:07 1-2 EXHIBITION MILE 2:05 1-4

Champion Trotter and Champion Sire of Trotters in the West

Reg. No. 36548. Licensed Pure Bred, Cert. No. 41.

Mahogany bay. Height 15.1½. Weight 1060.

Sire of ESPERANZA (3) 2:09, only three-year-old to win every trotting stake for that age on the Pacific coast, and also the following colt performers:

The Lark (4)	2:09½	Carsto (2)	2:22½
Ethel D. (3)	2:11	Helen Belle (2)	2:22½
Carl (3)	2:14¼	Carlschen (2)	2:23
Doctor S.	2:14½	Santiago (3)	2:24¼
Johnny Dugan p (3)	2:16	May Marian p (3)	2:24¼
Hermes (2)	2:16½	Carlrich p (2)	2:24½
John Warwick (2)	2:17	El Carbine (2)	2:27½
Nicola B. (3)	2:18½	Eileen C. (3)	2:29
Miss Carlokin p	2:20	Carlos (2)	2:29¼
Carleta (2)	2:20¾	Fulton G. (2)	2:30

Carlokin is the best son of McKinney not only by performance but by breeding as well, his dam being the famous producer Carlotta Wilkes, whose ten performers include four with records below 2:10, while his grandam and great grandam were also producers, by Alcantara and Clark Chief. He has demonstrated that he sires more early and extreme speed than any other stallion in California, and his get are courageous race horses, endowed with soundness and wonderful vitality.

Fee: $75 the season, usual privileges; details on request.

Record made in third heat of winning race as 3-year-old.

A world's champion as a yearling, record (1) 2:19½; unbeaten as a two-year-old, a famous futurity winner at three, and at six years of age the "sire of the day" in California, his first crop of two-year-olds including

NATALDAY (2) 2:13½

Champion two-year-old race trotter of the Pacific Coast, winner of Pleasanton and State Fair Futurities, 1915

FIESTA LOU (1) 2:25, (2) 2:22½, pacer, half-mile track records, separately timed in a race in 2:14½.
GOLDSMITH LOU (2) 2:29, trotter, breeder's record on halfmile track.
BILLIE BOYD (2) 2:30, trotter, breeder's record on halfmile track.
SELMA PALEY (2) trial 2:26½, trotter, public trial on halfmile track.

Colts and Fillies by WILBUR LOU Always on Sale

Wilbur Lou is by the great race horse and sire Kinney Lou 2:07¾, out of the triple producer Louise Carter (3) 2:24, grandam the famous Ingar, dam of 6 including John A. McKerron 2:04½, etc.

Breed to him for "Horses that will race." Fee for 1916, seventy-five dollars with usual privilege or money refunded at our option. Write for detailed particulars, all information gladly furnished.—Licensed Pure Bred, Cert. 23.

HEMET, CAL.

Derbertha Bells

Licensed Pure Bred, Cert. No. 226

NO. 60907 :: A. T. R. RULE 1.

Derbertha Bells, foaled 1911, stands 15.3, weighs 1200 pounds and is a solid dark bay or brown of magnificent conformation, style and trotting action. His breeding, too, is of the best, tracing 20 times to Hambletonian 10—5 through Electioneer, 5 through George Wilkes, 4 through Strathmore and 4 through Abdallah 15 (the big four of the sons of Hambletonian) and twice through his daughters; balanced by 18 crosses to Mambrino Chief 11—five of these through his greatest son Mambrino Patchen 58 (leading progenitor of the dams of trotting sires); 25 crosses to Imp. Bellfounder, 8 to Henry Clay, 8 to Imp. Trustee, 5 to Pilot Jr. 12, and sustained by such other famous broodmare sires as The Moor, A. W. Richmond, Black Hawk, St. Clair, Geo. M. Patchen, Grey Eagle, Imp. Glencoe, Williamson's Belmont, etc. His broodmare inheritance is incomparably great — 5 crosses to Green Mountain Maid (dam of 9 including a world's champion and 4 sires including Electioneer, the world's greatest trotting progenitor), 3 crosses to Alma Mater (dam of 3 and 7 sires, including Alcyone and Alcantara), and one each to Miss Russell (dam of 8 including Maud S. 2:08¾ and 6 sires including Nutwood, the world's greatest broodmare sire), Dolly (dam of 4 and 5 sires, including Director and Onward), Beautiful Bells (dam of 11 trotters including 4 world's champions and 9 sires) and Minnehaha (dam of 8 including a champion yearling and 6 sires). These are the greatest mares of history in number of descendants in the standard list, to which add two crosses to Bertha (the only mare with 2 in 2:04½, 5 in 2:10 and 13 in the list; with two 2:05 producing sons, five 2:10 producing sons and two other sons with produce only a fraction slower).

This pedigree contains the blood of 20 mares (counting duplicates) with an average of 9 performers each and presents an aggregation of family founding sires and dams unexcelled, if not unequaled. Neither is it necessary to confine ourselves to the standard or even to the 2:10 list, or go into the musty records of the distant past for examples of the prepotency of these blood lines in the production of speed, but we can easily and abundantly demonstrate their value in speed of the first flight in the present generation. He has 1 two-year-old and 2 yearlings that stamp him as a sire entirely worthy of his superlative antecedents, as they (like their sire) are uniformly large, handsome, intelligent, tractable and of great speed promise. Come and see them and the new crop and you will breed to him. Fee $25 the season with return privilege. Tabulated pedigree upon request.

J. W. PENDLETON,
1601 Seminary Avenue, Oakland, California

Don't Make a Mistake by not Breeding to the Great

KING LILLY POINTER

Registered No. 5223.

By the great Star Pointer 1:59¼, 3183, dam Lilly S. by Direct 2:05¼, 20113,—two world's champions for many years.

Second dam the great race and broodmare Lilly Stanley.

King Lilly Pointer is a green horse with remarkable speed. With very little work he has paced a mile on the Los Angeles track in 2:08¼ with ease. He goes without straps and has paced a half in 1:01¼ in third position all the way around, and has easily stepped quarters in 29 seconds. In another work out he went to the quarter in 30½ seconds, the second eighth in 14 seconds, finishing the last quarter in 30 seconds, going the seventh eighth in 14 seconds,—a 1:52 gait.

He is a seal brown in color, 15.2½ hands high, weighs 1100, and his get prove that he will be a sire of high-class race horses.

Fee $35 cash with return privilege, or right of substituting another mare. Best of care taken of mares, but no responsibility assumed for accidents of any kind.

Address for particulars, tabulated pedigree showing that he is the greatest bred pacing stallion in the United States,

W. H. NESMITH, 4218 S. Figueroa St., Los Angeles, Cal.

King Lilly Pointer can be seen at Los Angeles Exposition Park. Phone Home 28446.

Expressive Mac 2:25½

A. T. R. No. 41513. Licensed Pure Bred, Cert. No. 1041.

SIRE OF

Clara Mac 2:04½; Vera Hal 2:05; Madam Mac 2:07¼

Only stallion offered for service in California to sire two in 2:05, three in 2:10.

Also sire of Eddy Mac (3) 2:29½, trial 2:13; Nellie Mac trial 2:09½ trotting, 1915, and others with fast trials

Son of McKINNEY 2:11¼ (sire of 27 in 2:10) and the greatest living broodmare, EXPRESSIVE (3) 2:12½ (dam of 6 trotters, 2 in 2:10) by ELECTIONEER 125. Ideal in color, size and conformation — seal brown, height 16½ hands, weight 1275 pounds. Permanently in the stud at my ranch three miles south of Selma at $25 the season, usual return privilege, or $35 to insure. Good pasture at $2 per month and best of care given mares but no responsibility assumed for accidents or escapes. Address for all particulars,

J. H. NELSON, Selma, Cal.

PERCHERON SOCIETY RAISES FEES, ALSO ANNOUNCES SPECIAL PRIZES FOR 1916.

At a recent meeting of the Board of Directors of the Percheron Society of America, the registration fee on imported horses was increased to $100 per head, taking effect July 1, 1916. The object sought is to discourage the importation of inferior horses, and it is believed this high fee will have the desired effect. Provision is further made to refund $85 of the $100 paid to importers, on horses that are good enough to win at fairs recognized by the Percheron Society of America. It is believed this action will effectually bar inferior horses, without interfering with the importation of really valuable animals. Members of the Percheron Society have already been advised of this action, and breeders generally appear to be heartily in accord with the new ruling.

Forty-one fairs and expositions in the United States were accorded recognition by the Percheron Society for 1916. Classification and list of fairs is attached hereto. Provision was also made to recognize, with a special classification, all Canadian fairs that obtain recognition from the Canadian Percheron Association. Strong exhibits of Percherons at the fall fairs will benefit the Percheron breed, and all breeders. These awards, to be included in the premium list of the California State Fair, are as follows:

Special A.—Stallion three years old or over, bred and owned by exhibitor. 1st prize, sterling silver medal; 2d prize, bronze medal; 3d prize, reserve ribbon.

Special B.—Stallion under three, bred and owned by exhibitor. 1st prize, sterling silver medal; 2d prize, bronze medal; 3d prize, reserve ribbon.

Special C.—Champion stallion, bred and owned by exhibitor. Open to only 1st and 2d prize winners in Specials A and B. Champion, sterling silver medal; Reserve Champion, bronze medal.

Special D.—Mare three years or over, bred and owned by exhibitor. 1st prize, sterling silver medal; 2d prize, bronze medal; 3d prize, reserve ribbon.

Special E.—Mare under three, bred and owned by exhibitor. 1st prize, sterling silver medal; 2d prize, bronze medal; 3d prize, reserve ribbon.

Special F.—Champion mare, bred and owned by exhibitor. Open only to 1st and 2d prize winners in Specials D and E. Champion, sterling silver medal; Reserve Champion, bronze medal.

Special G.—Get of stallion, four colts, either sex, get of same stallion; bred and owned by exhibitor, or shown with stallion. 1st prize, sterling silver medal; 2d prize, bronze medal; 3d prize, reserve ribbon.

Special H.—Produce of mare, two colts, either sex, American bred, produce of same mare, bred and owned by exhibitor. 1st prize, sterling silver medal; 2d prize, bronze medal; 3d prize, reserve ribbon.

Special I.—Champion stud, consisting of stallion and four mares, mares only to be bred and owned by exhibitor. 1st prize, Champion trophy of sterling silver; 2d prize, silver medal; 3d prize, reserve ribbon.

Special J.—Five stallions owned by exhibitor. 1st prize, Champion trophy of sterling silver; 2d prize, silver medal; 3d prize, reserve ribbon.

Special K.—Best three mares, owned by exhibitor. 1st prize, Champion, trophy of sterling silver; 2d prize, silver medal; 3d prize, reserve ribbon.

Special L.—Champion stallion, open class. Champion, sterling silver medal; Reserve Champion, bronze medal.

Special M.—Champion mare, open class. Champion, sterling silver medal; Reserve Champion, bronze medal.

Specials L and M are open only to the first and second prize winners in the regular open classes.

Conditions.—All animals competing for above prizes must be recorded in the Percheron Stud Book of America, and the owner must be a member of the Percheron Society of America. All animals competing must be regularly entered on the books of the Secretary of the Fair when he shows his stock and the correct name and number of each animal given. No medals or prizes will be sent forward until this information is received in proper form by the Secretary of the Percheron Society of America, and names and numbers of animals found correct, according to the records of his office. When such information is received at the Secretary's office, the medals will be properly engraved and forwarded to the owner.

Memorial resolutions on the death of M. Charles Aveline, President of the Society Hippique Percheronne de France, were adopted and a copy was ordered sent to the family and to the Society Hippique Percheronne.

Records in the office of the Percheron Society show an active trade, particularly as to sales made by breeders. Prices are gradually growing stronger on good Percherons, but demand is slack for poorer sorts. More men are seeking stallions of exceptional merit, fit to head pure bred studs, than at any time in the last three years, and more confidence is expressed by purchasers generally.

More than 112 million dollars' worth of horses, and over 23 million dollars' worth of mules, have been exported from the United States in the sixteen months ending January 1, 1916. This is a greater total in cash received than we obtained for all horses and mules exported during the preceding sixteen years, and our shipments show no signs of lessening. Good draft geldings are in good demand also, and are bringing from $275 to $325 on the Chicago market, despite the pessimistic comments of country horse buyers, who generally seek to give, for selfish reasons, the impression that drafters are not wanted. Farmers who cannot secure satisfactory prices at home should club together and ship their draft geldings direct to the large markets. Country horse buyers are doing all they can to hammer down prices on drafters in the country, for their own profit, and are having fair success. The war horse demand keeps business going, and if a big drafter is passed by often enough, the farmer who owns him may take the price offered. For this reason, direct shipments should receive consideration.

The urgent need—more apparent than ever before—is for men to assemble small but select bands of mares, absolutely sound and right in every way, breed them to really high class sires, and develop the colts. From such hand picked studs, stallions can be developed fit to head any band of pure bred mares. This is precisely what American breeders are most urgently in need of now, and the opportunity is a great one.

HOPES FOR PUBLICITY AND BROADER POLICIES.

San Francisco, March 11, 1916.

Breeder and Sportsman:

I have just finished a ten day vacation in southern California, where I was the guest of Mr. Louis Streuber, one of Los Angeles' solid men. I was motored by Mr. Streuber over many miles of the beautiful southland roads amongst the groves of the Sunkist oranges, and while I enjoyed every moment (and we averaged about one hundred miles each day) yet in all my travels I only saw two good looking driving horses. One was Golden Nut 2:11¼, the sixteen-year-old beauty owned and driven every day by G. W. Ford of Santa Ana; the other was an elegant black roadster driven by a beautiful young lady, and believe me I was almost tempted to stop the lady and compliment her on her elegant horse. I saw many poor scrawny steeds hauling old buggies; I saw thousands of autos; I told my friend that a horse owner could cheat his horse but no man can cheat an automobile. It must be fed gasoline and oil and kept in perfect tune, else it won't work, but our faithful friend the horse is too often cheated of his just amount of feed, water and care, and instead he is whipped and yanked about by man and often by women.

Well, I have been thinking about harness horse conditions on my trip, and wondering if they would not probably improve now that the National Trotting Association has washed all of its soiled linen, cast President Johnson in the background and elected Mr. Welty, whom I understand is a young, vigorous man in touch with present-day harness horse conditions. Probably Mr. Welty will issue an order for the expenditure of some of the money that is being hoarded up by the N. T. A., this money to be used for publicity of the harness horse affairs, and perhaps a share of this money may be used for the betterment of harness horse racing conditions such as inducing railroad and express companies to make more reasonable rates for harness horses during the racing season, also to keep the harness horse game before the public by way of the daily press. The automobile people keep the auto before the public but it costs money to do this. The war chest of the N. T. A. should be opened up for the good of the harness horse game.

Mr. Welty has a lot to do and as he is an active business man, a man of the mid-west, he can do much for the business of which he has been honored with the presidency. Horsemen need encouragement and this encouragement should come from the men who absolutely control the harness horse affairs. We have already too many rules, too many arbitrary conditions. What the game wants is help, publicity and encouragement. No other sport on earth gets less aid from its headquarters than harness racing. President Welty has a big field to operate on. I hope he makes good and proves himself a real leader and a real benefit to harness horsemen.

Yours truly,
C. A. HARRISON.

PREPAREDNESS AND THE HORSE MARKET.

As a distinctively non-partisan, non-political and non several other things publication, devoted strictly to the furtherance of the interests of livestock breeders and the great family of sportsmen in general, this paper seldom makes note of matters of daily occurrence save in its particular field, but the happenings of the last several days along the border have brought to light a condition that affects the entire nation and horse and mule breeders in particular. We have at various times in the year and a half last passed called attention to the inroads made into our horse and mule holdings by European governments and have advanced the idea that livestock of this kind would be in demand at enhanced prices for many years to come as a result of the great conflict being waged between the governments across the sea.

For over two years the American people have faced the probability of having to step into the breach and take some action to restore normal conditions in Mexico. It has not been merely a probability; in the eyes of thousands of men familiar with the ways and wiles of the little brown brother some action on our part was inevitable. For months and months we have maintained troops along the border at various places and at nearby camps from which the border could be reached promptly on short notice, but in spite of this it seems that our preparedness fell far short of the mark when the test came. On March ninth the nation was stirred out of its policy of watchful waiting by the Villista raid at Columbus, New Mexico, and the order was at once issued to get Villa alive or dead. The general supposition was that a quick move would be made toward the pursuit of the wily bandit, but in reality it lacked but a few hours of being a week before our boys got across the line. What that delay of a week means in the way of advantage to a man who has successfully evaded capture for twenty years and what it means to us in money and lives lost is something not easily calculated. It is an odds on bet, however, that the cost of capturing him at this date will be enormously greater than would have been the case had the task been assumed immediately after the order to get him was issued. Under the present condition of affairs it seems that our border guards and our concentration(?) of troops in convenient places in case of an emergency amounted to almost as much as a whoop in a high wind.

About the only thing that we were really "prepared" for was to receive an extremely rude jolt when the emergency arose. We got it good and we will get it good in other ways before the incident may be considered closed, for catching Villa is not going to be any Cuban Fourth of July.

Just exactly why it took a week to start the pursuit after two years of preparedness(?) is traceable to a good many causes, probably, most of them unknown to the writer, but the following article appearing this week in a local daily (and not a yellow sheet

[Concluded on page 7]

Trotters at Santa Rosa

"SUNDAY STUFF" FOR A CHANGE

The inclement weather of the earlier portion of that season of the year we refer to, through force of universal custom, as "winter" has made week end trips to nearby training points few and far between for "yours truly," as Friday and Saturday have seemed to be the weather man's favorite days for shedding a few tears. Having been gloriously ducked on trips to Woodland and Pleasanton as well as on one attempted journey to San Jose, the end of last week was awaited with some uneasiness. Then it came, bright and sunshiny, and some unexpected matters bobbed up that were as successful as the rains had been previously in keeping me close to home and the office. Sunday the weather was of the same brand as for the few days previous, save for an early morning fog on the bay, and as the old expression "the better the day the better the deed" has long been accepted as gospel, the occasion was decided to be a most auspicious one for paying a little visit to the Santa Rosa colony. Of course there would be nothing doing, but most of the boys would be on deck and I could at any rate find out what they had. I hit it. There wasn't, and they were, and I did. Read it again if you want to.

* * * *

Frank S. Turner, who is one of the few California breeders who have sent mares to the court of eastern stallions in recent years, has a stable of nine in hand at present, largely the get of Maple Lawn Farm's good son of Bingen, The Exponent 2:11¾, who at the end of his eleventh year is credited with nearly half a hundred standard performers, all but six or seven of which are trotters, with a goodly sprinkling of yearlings and a veritable host of two-year-olds among them. Exponent Mac, the oldest of the band bred at the Illinois speed nursery, is now a three-year-old, and a fine cut of a horse is he, richly colored and put together just about the way the doctor ordered. He could show a forty gait as a yearling, and now that some training weather has come our way out here on the coast his real education will be started promptly. He is out of a nice daughter of McKinney, Caromia C. by name, grandam By Guy by Guy Wilkes, great grandam By By by Nutwood, etc., so he ought to be as good a trotter as he looks. Caritone's Exponent, a two-year-old filly out of Caritone 2:27¼ by Antone, has a nice way of trotting in the paddock but mixes a little once in a while and strikes a pace in a manner to make Frank think she may adopt that way of going when he ties into her. The others by The Exponent are all two-year-old studs, well filled out and handsome as can be, apparently chock full of trot, F. S. Montgomery being out of Caratina by McKinney, F. S. Jennings out of Centerguy by McKinney, and Harry H. Whiting out of Lady Caritone by Guy Dillon 2:23½. Harry is a fall colt and is the least matured of the three, but he certainly can mock a trotter in a lot or on a lead-rope. Frank has still another member of the tribe of Bingen in the way of a ten month old colt by Robert Bingen 2:11¼ out of Centerguy by McKinney, running on back on the maternal side through direct crosses to such famous producers as By Guy, By By, Rapidan and Madam Headly, so if breeding makes 'em this boy ought to do. He is just fairly halter broken but has a nice open trot and acts like he might keep his pedigree in mind and live up to it in days to come.

The readiest horse in the Turner stable is the chestnut gelding, Dr. Wm. S. Jennings, with a breeder's record of 2:11 pacing, made at the record meeting given last August under the auspices of the Sonoma County Driving Club. The Doctor is a sturdily built fellow by F. S. Turner 2:24 and out of Caritone, being the second of the produce of this daughter of Antone to pace in the neighborhood of the two-ten mark. As he came to his speed rapidly last season after things began to be asked of him and has never had any troubles in the way of unsoundness, Frank figures him as quite a little better than a two-ten wiggler. He has earned his keep all winter, being used to cart on the road at all hours of the day, and making a daily trip through the stormy season to the pasture up on the hill where the brood mares are kept, hauling the boss and a good load of hay through the sticky "doby."

Highly as he regards all his eastern bred youngsters, I think the real favorite of Frank's inner heart is the bay stallion Guy Dillon 2:23½, who outranks all sons of Sidney Dillon as a speed sire. Guy Borden 2:07¼, who died practically at the outset of what promised to be a brilliant career, was one of the best pacers seen in California in late years, while other members of the family are also showing exceptionally well. Here in California Emmaline Dillon was a winner in 2:12¾ over a two lapper last season, working the same course in 2:08½, while down in the states bordering on the Great Lakes another sidewheeler, Adioo Guy, was winning races in a manner that set the turf writers to watching him, annexing a winrace of 2:10¾ over a halfmile track and taking seven races out of ten starts. This doesn't tell all the tale by any means, but if Guy Dillon was in a community where there was any breeding to speak of he would soon have a good big list of fast representatives in the books. He is a good looking, fine tempered horse, quite suggestive of his family in general makeup. Frank is handling a green mare by him and out of a daughter of Anteeo, owned by George Trowbridge of Santa Rosa, and while she has had not much done with her so far she is a good sort of a trotter and could beat the standard mark last season.

* * * *

W. A. Stewart of Humboldt county has been at the Santa Rosa track most of the winter and promises to have a good deal of speed on tap by the time the first races start in California, most of the members of his stable of half a dozen being addicted to the pacing habit. The lady who rules the roost in the way of previously demonstrated speed is the brown mare Emmaline Dillon 2:12¾ by Guy Dillon 2:23½ and out of Katie Darling by John L., a son of Anteeo. She is a very pleasing mare all around, with a lot of punch and power, and at the Humboldt county fair last season cleaned up twice on the Eureka standby, Maude McAttee, later on making a trip over the Ferndale speedway in 2:08½. She is six years old and has the marks of a real pacer, so she will do to remember later in the year. Stewart has a half sister to her but a year younger, owned by John S. Taylor of Santa Rosa, that he is just beginning to start up a little. She is by California Dillon 2:10¼, and while she is a bit mixed gaited she has taken most of her work so far at the trot.

A young member of the stable that has already had a bit of experience in company is the three-year-old pacing gelding Don Remo by Irving Pointer and out of a daughter of Greco B. This boy never knew anything but pace and has never worn the pantalets at any time during his young life, and while perhaps he wasn't quite up to racing last summer with the two-year-old pacers out here that were hanging up season records for the whole country, he did help out the boss by grabbing some winter feed money at Ferndale, winning the event there for the age and gait. Another nice young thing by Irving Pointer is getting her first lessons in pacing, and though broken but a couple of months is going quarters in forty seconds handily and acts like she liked 'em. She is owned by D. C. Campbell of Eureka and is out of a daughter of Glendale.

Two good pacing mares complete the string, the elder one being a seven-year-old daughter of Bonnie Steinway 2:06¼, dam by Waldstein, owned by Pat Quinn of Eureka. She was also a winner at Ferndale last season and has turned a twice around for the full route in 2:16, so she has some little lick herself. Bonnie Quinn is the name she will be entered under. The other mare, the property of J. C. McConnell of Santa Rosa, is a couple of years younger and bears the responsibility of having to guard the family honor all by herself as she is the one and only member of her generation and there will be no more, her sire being no longer that kind of a horse. She is by the now gelded Potrero Boy 2:06¼ and out of a daughter of Alton, the result of an accidental mating some seasons ago when the Boy was a colt in charge of Mannie Reams. She may not prove possessed of the sizzle that characterizes her pop and his brother Airlie Demonio, both of them being rated as 2:03 pacers or thereabouts, but she has the natural inclination to get hence when turned the right way of the track. Last season she was given a breeder's record of 2:22 and in private trials went the distance some five or six seconds faster.

* * * *

John N. Compton, one of the younger generation of Santa Rosa horsemen, has a pair in hand that look to be as good as they generally come, for the amount of education that they have had, one a trotter and the other a pacer. The trotter is a seven-year-old chestnut gelding known as Pfeister's Lynwood (a little too much name to be real handy on an Irish tongue) and gives promise of being able to go the route three times better than 2:10 in comfortable fashion. He is a son of Lynwood W. 2:20½ (sire among others of that grand stake trotter Sonoma Girl 2:04¼) and his dame is a daughter of Gossiper 2:14¾ (sire of the dams of Zolock 2:05¼, Zephyr 2:07¼, etc., Zephyr being the dam of Willie Durfee's speed marvel Virginia Barnette (3) 2:08¼). This is pretty racy breeding, and the horse that carries it is a racy looking fellow himself, not a drafter in size but substantial and sound and with the general air of a racehorse. Last season, before Compton really got wise to him properly, he stepped on a quarter one day while working barefooted but this has grown out in good shape and in spite of this handicap he made a lot of speed last season, working a number of miles from 2:13 to 2:15, negotiating halves in 1:03½ and quarters in :30¼. The pacer, Lennie C., is of a similar age and is also by Lynwood W., his dam being by L. W. Russell. He is a nifty looking chestnut boy with a few white hairs scattered through his coat and carrying the Indian sign of toughness, three white feet and ankles, a star, strip and snip and a bit of white on the underlip. He received his first lessons last season and developed to a mile in 2:17, half in 1:05 and eighths at a two-minute clip, so he has some idea of what speed is.

* * * *

Harry H. Whiting, as old in the game as Mr. Compton is young to it, is handling but one horse at present, the trotter Guy Carlton 2:30, gelded last season and apparently improved in the operation, as he began coming to himself and worked some seconds better than his former record. He is a good looking fellow and one of the best bred ones in the land, being by Guy Dillon and out of the famous producer Carlotta Wilkes, dam of ten in the list, four of them with records well on the shady side of 2:10.

* * * *

F. D. McGregor, the local liveryman, has a pair of full sisters by Guy Dillon and out of a Gossiper dam with which he has a good deal of pleasure when he breaks away from town long enough to get out to the track. Jessie Dillon, the five-year-old, started in her first race last summer at a local matinee and won handily from a field of five in straight heats, trotting her best one in 2:21¼, a pretty nice performance under all the circumstances surrounding it. Mabel Dillon, a year younger, is just starting in to learn the business but is taking to it very handily.

* * * *

Sam Norris, without whom the Santa Rosa plant would not seem like the old familiar place, is giving lessons to a small stable of green ones, all of whom seem to have plenty of that highly necessary old "natural instinct" to make speed either at the trot or the pace. One of the likeliest of the pacers, to my notion, is the six-year-old chestnut horse The Potrero, full brother to those two fast birds Airlie Demonio 2:05½ and Potrero Boy 2:06¼ and, in some ways, a more pleasing individual than either of that famous pair. He is shorter coupled than the Boy and is very stoutly put together. Sam handled him a bit last season and won a matinee with him by slapping in a couple of heats between twenty-two and twenty-four, and on another occasion he showed Sam and Owner Tobe Mitchell that he could go the route in twelve. From the looks of him now it would not be strange to see Potrero Girl the dam of three full brothers in the 2:10 list some of these fine mornings. A three-year-old brown gelding by Dickens B. 2:15 out of a mare by Secretary, grandam by Seymour Wilkes, is just getting a start in life as a pacer, and the balance of the stable are trotters.

Sir John S. 2:04½, second fastest of the sons of Diablo 2:09¼, might more readily be expected to sire pacers rather than trotters, but his standard list is fifty-fifty and Sam has one in his string that seems due to throw the balance of the argument in favor of the square gaited kind. He is a five-year-old bay gelding bred by the Stevensons at Marysville and now owned by Stewart Peterson of Santa Rosa, and while

his education is so slight as to have barely been commenced he is crowding 2:40 with less than thirty days' work. The Prince Ansel family is represented by a nice four-year-old bay mare called Princess Ayres, out of Heiress by Lynwood W., grandam a full sister to the trotting gelding Jasper Ayres 2:09, whose record was made eighteen or twenty years ago when the woods were not as full of two-ten trotters as they are now. She hasn't had much crowding yet, but can show a quarter in :37 without boots or shoes. The lad that Sam is pinning his faith to for a trotter for his own personal use is a four-year-old bay gelding by Lynwood W. out of a Gossiper mare, being a brother to the chestnut trotter described in John Compton's stable. Sam broke both of them and has a preference for his own horse on early showing and general makeup, as he is a more rugged looking horse than the other one and in his first pair of shoes is showing a forty gait.

* * * *

Keefer & Spencer, who transferred the scene of their activities to this point shortly after the close of the exposition race meeting last fall, have about the most extensive stable at Santa Rosa and also the most horses already familiar to race goers. The Proof 2:10¾, who was tagged by several of his very numerous catch drivers last season as a 2:06 trotter for this year, has wintered in fine style and bears more distinct resemblance to the Bingen family than I ever noticed in him before. He has filled out well and I marked a decided improvement in his stable deportment. He had a notion at one time that he had to boss the whole works, but a year's racing experience has been highly beneficial in getting these notions out of his head and I believe that he will be a right good trotter this year. His three-year-old daughter, The Expense, who in spite of a couple of curbs was a contender and a money winner in the junior trotting divisions of the stakes here last season, occupies a stall near him and is making a fine looking girl. The boys have her set down in the winter dope book as a 2:10 trotter this fall.

Bonnie Ansel 2:09¼ heads this string in point of recorded speed, and while she hardly lived up to expectations last season her trainers think well of her and are going to make another attempt for some profit with her. Sure it is that she has been well wintered, as she looks in the pink of condition. She is sort of a gangly thing and would never win a beauty prize, but at that she may yet make a real good campaigner. Nuristo 2:10¼, still owned by Alexander Brown, has wintered better than usual and will also be raced again this season, with another second time allowance after his campaign of last year. Another Woodland product, Arista Ansel (2) 2:18, now the property of E. M. Barber of San Diego, has entirely recovered from the effects of running a nail into one of her feet some time ago at Sacramento, and has matured into a good sized mare and quite a promising trotter. She is sound as a bell and has been working lately around 2:40, about as fast as anything has been going at Santa Rosa this winter.

Vallejo King 2:10½, Mr. Tom Smith's fast son of Gen. J. B. Frisbie, is now a member of the Keefer & Spencer stable and the boys will try and get him over some of the notions that have proven detrimental to his interests and success in former seasons. The King used to be sort of an equine Jack Johnson and when Sutherland & Chadbourne drew the color line on him last year and followed that act up by castration, the owner turned him out for several months. He is a strapping, husky horse, bred well enough to trot in any company, and should be a much improved performer after his alteration and long rest. Pacers are as scarce in this bunch as they are numerous in Stewart's barn across the way but Nick Haberlach, who came to Santa Rosa with his old employers, still has his big bay fellow by Alcona Wilkes, a mile in the neighborhood of 2:17 being the best that has been asked of him so far.

Two green ones arrived in the stable some days ago and will be sampled thoroughly as the season advances, one a nice made six-year-old gelding by Kinney Lou 2:07¾ and out of the triple producer Missie Medium by Rampart, grandam Belle Medium by Happy Medium, while the other is a futurity prospect, a three-year-old filly by Nutwood Demonio out of Caromia King by Valencia King. She is owned by Len Brittain of Santa Rosa, and if she makes as good a trotter as she is an individual they will have a hard time keeping her out of the money in some of her engagements, no matter how fast they go.

The harness horse business in general in Santa Rosa and vicinity is suffering a good deal from the same causes that have made it bad all over the state in recent years, no fair appropriation and no betting. There are twelve thousand people within the city limits of this thriving place and half that many more within a short distance. They take pretty well to the fair with racing and when the revival was attempted some three years ago by the local fair association and the P. C. T. H. B. A. jointly the result was a most gratifying success. One more successful meeting followed the next year, and then came the exposition and tore the playhouse all up. Now they are getting ready to start in all over again and have a fair this year, though plans have not as yet reached concrete form. The Breeders have not yet made any arrangements for their annual events, and perhaps a joint affair like the one so successful in 1913 might be planned. The people are for it, the track is one of the best in the west, and the grounds are almost ideal for the purpose of holding a real old-fashioned fair, with picnic dinners on the grass and all those sort of things. Given annual fairs with pari-mutual betting and Santa Rosa would take a permanent place on the map and all the glories that were hers in the famous days of Santa Rosa Stock Farm would bloom again, as there are plenty of people in the neighborhood just "honing" to own a trotter or pacer if there was a chance to race and pay expenses. Maybe if we all keep rustling pretty briskly we may yet have all those much desirable things, with good times in the horse business back again to stay.—[N.]

Stallions for Service

BRIEF STORIES OF THREE WORTHY OF NOTE

WILBUR LOU (3) 2:10¼

The youngsters by grandsons of the incomparable McKinney 2:11¼ were very much in the limelight during the racing season last passed, both in the east and here in the west, while the recent Midwinter Sale at Madison Square Garden indicates that the next crop of young things of the same brand is the most salable thing that the trotting horse breeder can produce at this moment. While San Francisco 2:07¾ is setting the pace among the grandsons of McKinney in the way of siring early and extreme speed, we have a number of members of the clan of the same generation who are holding their own right well here in the west, most notable among them at this writing being the Hemet Stock Farm premier, Wilbur Lou, one-time world's champion yearling trotting stallion, an undefeated two-year-old, and a famous futurity winner at three. Mated with seven mares in the spring of the year in which he achieved his greatest fame as a racehorse, he became in due season the sire of seven foals as his first "crop," and from among these there have developed four standard two-year-olds, only one of them a pacer, while one other has shown ability at the same age to trot a halfmile track well below the standard limit, and the other two bid fair to go into the list as three-year-olds, a showing seldom approached. Natalday (2) 2:13½, his fastest performer, is not merely a double futurity winner, having annexed the junior trotting divisions of the Pleasanton and State Fair futurities, but he enjoys the added distinction of holding the Pacific coast race record for youngsters of his age and gait.

Wilbur Lou's blood lines are most pleasing, as he is a son of the good race trotter and sire Kinney Lou 2:07¾ and Louise Carter (3) 2:24, grandam the famous matron Ingar by Director 2:17, etc. Both mares are producers several times over, the latter numbering six among her offspring to achieve fame on the racetrack, including John A. McKerron 2:04½, who also takes high rank as a sire. Wilbur Lou is permanently in the stud at Hemet Stock Farm, Hemet, California, and a card to that address will bring all the particulars concerning him and his rapidly growing family.

DERBERTHA BELLS

While the members of the McKinney family are more numerous than those of any other equine house in California at the present day, the descendants of Charles Derby run them a close second. As was the case with the McKinneys, the eastern wise men picked up many of the best of them and took them from us, including the head of the family himself, but those left to our California farms have played a most important part in the perpetuation of the family of the trotter. Many of the best horses now racing on the coast own allegiance to the Derby clan in one way or another, and in almost every instance they are horses of rare speed and stamina. Those who have had the slightest of opportunities in the stud have proven themselves potent to a high degree, and the older members of the family are firmly established in public esteem.

That the younger representatives will, with time, prove in every way up to the standard of family excellence long established, is accepted as a foregone conclusion, and it is one of these whose services are offered to the public by J. W. Pendleton of 1601

DERBERTHA BELLS

Seminary Avenue, Oakland—the fellow being registered as Derbertha Bells 60907. But five years of age this spring he has his fame all before him, and the few colts by him that are now yearlings and two-year-olds show plainly that, given a chance, the fame he will achieve will be no inconsiderable one. The tabulation of his pedigree is crammed with the names of great race horses, great sires, and dams of unparalleled prolificacy in an unusual manner, the individuals represented being among the greatest in the land. Mr. Pendleton has his colts to show for him at his home, and will gladly furnish inquirers with all desired information.

KING LILLY POINTER

Star Pointer 1:59¼, for so many years the kingpin of the fast pacing brigade and the identical gentleman that inaugurated the two-minute list, left no great number of entire sons in the State of California, and among the very best of these is the stallion whose name heads this brief story, now the property of W. H. Nesmith of 4218 South Figueroa Street, Los Angeles, and in the stud at Exposition Park, that city. With the extreme speed that he has shown with limited training at the hands of his owner, an amateur at the business, it would seem that he is endowed by nature with all the requisites of race horse quality needed to stamp him as one of the very fastest of the get of his famous sire. A mile in 2:08¼ has been negotiated by the pair very handily, and Mr. Nesmith has had shorter rides at a very much faster rate, such as halves in 1:01¼, quarters in :29 and eighths in :14.

One of the secrets of King Lilly Pointer's speed—and that of countless other individuals, as well—lies in the fact that he "has a good dam," one of the best things that can be said for any horse. Lilly S., a daughter of the great Direct 2:05½, was herself possessed of a considerable turn of speed, and has produced at least two horses of very high quality, the pacer under consideration and the good trotter Zomrect 2:12¼, with a trial last fall two seconds faster and now in training for a campaign this year. With the least bit of luck in her favor, Lilly S. should be a duly recorded double two-ten producer before the bell rings for the last time in 1916. Performance and production on the maternal side do not stop with the dam, as the grandam of King Lilly Pointer is Lilly Stanley 2:17½, a triple producing daughter of Whippleton. Mr. Nesmith has colts in his barn that are ample testimony to the potency of their sire, and he will be pleased to have broodmare owners come and inspect them, or send for the detailed information concerning his horse and his get which space will not permit us to include herewith.

WITH SANTA ANA HORSEMEN.

Santa Ana, March 14, 1916.

Santa Ana is sure one busy place when it comes to the horse end of entertainment. I was informed by one of the board of directors of the Orange County Fair that there would be another county fair here this coming fall, but the date is not yet set, although some time in September is proposed. However, the Orange County Driving Club is preparing for another matinee on April first, which will consist of three harness races and two running races. It is no uncommon thing to see a thoroughbred go prancing down Bristol street toward the track for its morning breeze now, as Mr. Lucas has bought Hardy, the white runner, from Mr. Livengood of Pomona, and I also saw Light Comedy, another well known thoroughbred, out taking exercise today.

Dutch, the colt that took the honor of winning his first race here last fair time, is looking fine and promises the boys their money's worth on April Fool day.

I was out to the fair grounds the other day, and while there met "Silent" Murphy, who has a very nice bunch of horses. He is just beginning to work them after a two-month layoff. His stable consists of twelve head in all:—

1—Red McK. 43766, the blue-ribbon winner at our fair in 1915. He is a handsome horse and is attracting people who contemplate breeding. He will make the season of 1916 at the Santa Ana fair grounds.

2—Doctor S. 2:14½, by Carlokin, dam by Guide 2:16, may be seen on the California Circuit this fall.

3—Tommy Murphy, another green trotter that I saw work two heats last fall better than 2:17, looks stronger and has grown wonderfully.

4—Lilly Marie, a green pacing mare sired by Hal McKinney, dam Lilly Mack. Murphy expects things of this mare and I believe he is right.

5—Dick W. 2:20, by Walter Barker, dam Sue 2:12½ by Athadon. This horse can do a quarter in 30 seconds and has done a half in 1:04.

6—Green pacer by Carpus, dam Kitty Wilkes 2:12 by George Wilkes.

7—Bonita Pen by Directum Pen 2:12, dam Bonita 2:16 by Knight. This colt goes like a trotter and has lots of steam just like his sire.

8—Wanna Wilkes by San Juan 2:16, dam by Seymour Wilkes. This mare is a nice trotter.

9—The one the writer likes is a bay colt 21 months old, named Harold M. I saw Murphy step him an eighth in 20½ seconds. He is by Red McK., dam Celendine.

10—Green pacer by Junior Dan Patch, dam by Early Reaper, has been a half in 1:05.

11—Miss Patterson, green pacer by Zenith, dam by On Stanley.

12—Bondine, brown colt by Bon McKinney, dam Celendine. Murphy likes this colt also.

Mr. Fred Schultz keeps his trotter Laddie at wire edge all the time an enjoys a breeze every week.

Black Diamond, L. F. Clapp's pacer, was on the track Monday. He is looking fine and hearty.

Another remarkable improvement that I have noticed in a green colt is a little gray mare owned by W. M. Yost, four years old, who was never hitched single until January 3, came out this morning with her toeweights on for the first time and stepped a quarter in :40.

Other horses frequently seen upon the track are Brownie, trotter, owned by Fred Culver, Atlantic Fleet, pacer, owned by Fred Cole, and California Chief, trotter, owned by Wm. English of El Toro.

There are several colts training here by outsiders that I did not learn the names of who look good to me.

The Orange County Driving Club invites everybody to join in and help make a good matinee on the Santa Ana track on Saturday, April 1.

E. F. HALL.

THE MIDWINTER SALE.

Taken all in all the results of the recent Midwinter Sale in New York were very satisfactory. There was a pretty healthy demand for everything that looked like it would earn itself out at the races, with a scarcity of aged horses present and the buyers expressing a preference for staked youngsters. Stallions were on the other end of the see-saw, being about the slowest sellers considering the high quality offered, while a certain per cent of mediocre stuff went through the ring at the usual bargain prices. Some of the most noteworthy sales were commented on briefly in our last issue, while in the following list is presented each horse that sold for a figure in excess of three hundred dollars:

Northern Queen, b f (2), by The Northern Man—Margaret Kenney, by Prodigal; Wm. Whatton, Irvington, N. J. ..... $ 330
Commodore Sybil, rn c (4), by Vice Commodore—Baroness, by Baron Wilkes; Harry E. Seamon, South Manchester, Conn. 350
Genteel Joe 2:13¼, b m (9), by The Mediator—Zoey, by Gambetta Wilkes; F. P. Feiger, Erie, Pa. 400
Mistle Thrush, ch f (2), by Axworthy—Mantua Maker, by Red Wilkes; H. S. Crossman, New York 1000
Mahomet Watts 2:08¼, b s (7), by General Watts—Alla (Alla P.), by Palo Alto; R. E. Morris, Jersey City 800
Twinkling Dan 2:06¼, br s (9), by Dan Patch—Twinkle, by Mercury C.; Jas. Harwood, New York 700
Miss Watts 2:28¼, b m (5), by General Watts—Twinkle, by Mercury C.; Frank J. Sinclair, 141 Ocean street, Lynn Mass. 700
Oscar Watts 2:23, b c (3), by General Watts—Silva T., by Wiggins; D. B. Burnham, Park Avenue Hotel, New York 750
Bella Watts, b f, yearling, by General Watts—Proxy Belle, by Adbell; A. L. Thomas, Benson, Neb. 310
Dark Pearl, b c, 1915, by General Watts—Earl Poindexter, by Sam Estes; H. W. Hauger, Vanderbilt building, New York 335
George Watts, ch c, 1915, by General Watts—Ashleaf Wilkes, by Ashland Wilkes; A. L. Thomas, Benson, Neb. 575

DEATH CLAIMS HORSES' FRIEND.

Forty-odd years ago there came to this city from the Mendocino county home where his family had settled after their arrival in America from Scotland, a husky young fellow in his early twenties by the name of James McNab. His first job was driving a dray, and before the time came when death cut short his career early this week he had risen to be one of the best known and most successful men in San Francisco, the head of large enterprises, director in others including the P.-P. I. E. (in whose service he is believed to have brought on the long illness which finally proved fatal), one-time president of the Chamber of Commerce and at all times one of the best judges of heavy horses in the world. Entering into an early partnership with John Smith, the business being continued under the name of McNab & Smith after the latter's death, he made that concern the foremost user of high grade draft horses on the coast. Quality was the watchword in buying horsepower with James McNab, and to the admirer of animals there is no finer sight in San Francisco today than the big teams of McNab & Smith, from pairs to multiple hitches, doing daily service on our streets. The firm was proud of its horses and seldom allowed an opportunity to exhibit them to pass by, believing that course to be a prime incentive for the breeder to raise horses of the highest class. At the exposition and at many minor horse shows in this section their black sixes have been invincible, and mighty little preparation is sufficient to prepare any number of their stable for the show ring. James McNab was a man in whom the west could well take pride, and in his passing the draft horse and the draft horse breeder have lost one of their best friends.

THE NORTHWEST'S TROTTING QUEEN.

Last summer while the get of the dead Zombro 2:11 were performing so consistently over eastern tracks, it being stated at one time during the season by a prominent turf writer that he could name about ten of the family then racing who were capable of beating the two-ten mark, one of his daughters was giving a very nice object lesson in consistent trotting on the tracks of the North Pacific Fair Circuit. She was a brown mare, nine years of age, who had been more or less familiar to racegoers in that section since the year she was a three-year-old, and while her sire was a Californian she was a genuine "Web-foot" on the maternal side of the house, her dam being the bay mare Flora G. 2:21 by Altago, a Washington-bred son of Altamont. Flora G. raced around Willamette valley points twenty years or so ago and on one occasion she and Zombro were both heat winners in the same race, so it seems fitting that the offspring of their mating should also be a trotter of considerable note. Maurice Winter of Albany owned Flora G. at the time she was bred to Zombro, and when a neat brown filly eventually made her appearance he cribbed a bit from the names of both sire and dam, added a couple of syllables for reasons of his own and called her Floradora Z.

Now when this lassie was a three-year-old she went away to the races and continued to go about every year afterward, missing one or two, perhaps, and while she showed at times to be a pretty fair kind of a prospect most of the trainers who handled her had very poor lunck with her, so that when she came into the hands of McCormack & Cudihee of Seattle it was a case of "thumbs down" for hers whenever her name was brought up in fast company on the coal stove circuit.

However, the McKinneys usually come late when they fail to come early if the owners and trainers are just sufficiently persistent, and last winter Floradora was given just a little better deal through the cold months and went into spring training in very promising style. Her owners turned her over to Charley Guion before the season was well advanced, and she and Charley proceeded to organize a close corporation, the new firm's place of business being any halfmile track in the northwest where the going was good, and its avowed intention being to annex as many of the slow trots as possible, surely a laudable ambition and one that was pretty well fulfilled.

Their first start came in the middle of August over the course at Vancouver, B. C., and by trotting the first, third and fourth heats between nineteen and twenty they were able to make a proper start for a successful season. Frank D. Nichol won the second heat in 2:20¾ and there were nine in all in the race, but at that one of Floradora's erstwhile trainers confided to one of the judges that she was a sour old cow and that she would not be heard from again all summer. Over at Centralia-Chehalis where she went from the Canadian metropolis it looked like the joy-killer might be right at that, as she was fourth in her first start to Hallie B. and behind the money in the next one to Novela 2:15¼, this being the race in which John B. Stetson's mare annexed the figures that adorn her name in the year book at present, or at any rate will do so when the year book comes out. We have to be careful even in these little things or somebody will make us out a liar, and while of course we don't mind that on occasions and really expect it every so often, we hate to waste a misstatement on so negligible a thing as the year book, which may or may not be out.

This was the last chance the anvil chorus had to get in its deadly work, however, as Floradora and Charley proceeded to annex the top of the summary eight times in a row, eleven starts being the sum total for their campaign. Once in a while Novela or Hallie B., or Columbia T., driven by such pesky highliners as J. B. Stetson and George Swisher and Lon Daniels, would slide down in front for one heat, but no more. She demonstrated her ability to handle herself nicely in any kind of footing and at North Yakima, closely followed by Hallie B., she stepped three heats in 2:13¼, 2:11½ and 2:13.

She closed up her season at the Oregon State Fair at Salem where she was a two time winner, dropping one heat in each start to Novela, and was sent home in the best of condition. She has been jogged daily through the winter and Guion plans to take her down through the Central West, unless enough 2:12 classes are announced in the northwest to make it worth while for her to stay at home. Good judges who are familiar with the form she displayed last year predict her ability to trot in seven or eight this season, and wherever she races she is liable to prove pretty bothersome to the balance of the field in the final brush in the stretch.

PREPAREDNESS AND THE HORSE MARKET.

[Concluded from page 3.]

at that) is undoubtedly well grounded for the most part:

"Scarcity of mules suitable for military purposes, and almost as great a scarcity of horses for cavalry and field artillery, has already caused two days' delay in preparing any Mexican expeditionary force for taking the field.

"This was learned yesterday from entirely reliable sources here. Entraining of cavalry and field artillery from various points in the United States for the border, was delayed solely because of shortage of mules and horses, for while the United States Army is recruited to practically its full peace strength in men, it is short of animals. The Government of Great Britain has grabbed all those in sight that might fulfill the requirements of American military service.

"Thousands of mules that would otherwise be available for use in the United States Army, are now 'somewhere in France.' Twice that number of horses are today carrying soldiers of the allied troops or pulling their field artillery up in the direction of the intrenched forces of Germany.

"There was twenty-four hours of delay in shipping the First Cavalry from the Presidio of Monterey because the regiment was short of horses and mules, according to the Quartermaster's Department. Other posts had to be called on to supply the deficiency before the command could move. Every regiment of horse on the border, or en route to it, has been handicapped for the same reason.

"During the last year the allies have purchased in the United States not less than 250,000 mules and 500,000 head of horses. The requirements of the allies in horses and mules are almost identically that of the United States, from the standpoint of individual animals. The allies have bought up, at almost any price asked, all the horses and mules that suited them, and that therefore such as would suit the United States Army. The American service has not met the prices the allies have been willing to pay—and has therefore not bought many horses and mules during the last year. The result is a greater scarcity of animals in the service than has existed at any time since the Civil War.

"During the last year the Kansas City mule and horse market has furnished the allies with 60,000 mules and 120,000 horses. This is but one American market visited by the representatives of the allies. It is the American Army's one standby for mules, however, and the mule shortage here can be directly traced to the fact that the allies have swept Kansas City clean of these animals."

While there may be a certain amount of chaff with the grain in the foregoing, almost every stockgrower who has had experience with the United States system of securing remounts and who has kept in touch with affairs since the European buying began some months ago will say amen to most of it. At the same time there is no necessity for going to the extreme the other way and prophesy that in a given length of time the army of the United States will be put entirely a-foot. What is needed is the establishment of a special bureau for the supplying—or purchasing—of remounts which would cut out the middleman and which would be composed of persons who know an army horse when they see it, and the raising of the minimum price paid for accepted animals of the various classes to a point at which it would pay farmers and breeders to raise them. At present our beneficent government expects our breeders to bring to maturity and thoroughly educate a horse which should combine all the desirable points of the famous horses of history of all breeds, including that deceptive and highly successful strategist, the Wooden Horse of Troy. The horny handed farmer having complied with all these requirements and having produced a horse that ought to be worth not less than three hundred dollars he will now be allowed to dispose of him to a gyp for the munificent sum of forty to a hundred dollars, less if possible. The gyp will proceed to pass him along up the line to the outfit with a pull who were awarded the original contract, the balance of the contract price being cut among the various handlers. Moreover, authorities differ as to what constitutes an acceptable animal in his class. One army inspector will turn horses down and a few weeks later another will accept them. The sub-contractor and the sub-sub-contractor and so on down to the "nth" degree of sub-contractors have to make a big profit to guard against the losses from rejects at the final inspection, for while the things to be considered in determining an army horse's fitness are numerous enough, the Lord knows, they pale into insignificance beside the veritable legion of things which may be considered, properly or improperly, as constituting unfitness.

Given direct purchasing at a price that gives the breeder a run for his money, with a fairly established standard of type for each branch of service for which the horse or mule is desired, a fair inspection by inspectors who know what they want and who are not reached by outside influence, and the army horse shortage will in a very short time become a myth.

The shortage will not be supplied, however, through the passing of a measure now before the House of Representatives of our national Congress and entitled "A bill to increase the efficiency of the United States Cavalry and Artillery," from which we extract the following:

"Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Secretary of Agriculture be, and is hereby, authorized to employ expert advice and assistance to ascertain, by anatomical research and experimental breeding, the type and proportions of horses best suited to the service required in the Army. Also to determine and record the proportions of horses noted for great speed at running and trotting, and especially to what extent the short back of the Arab horse is found in his immediate descendants.

"Sec. 2. That for the purposes of carrying this into effect there is appropriated the sum of $25,000, or as much thereof as may be necessary, from any money in the Treasury not otherwise appropriated."

To go far into an analysis of this particular piece of foolishness were futile in the extreme. The only reason apparent to our mind for the introduction of such a measure is that some political panhandler is badly in need of twenty-five thousand dollars, or as much of it as he may safely grab. A second and third reading of the bill engenders a feeling of disgust which in the writer's particular case is expressed most aptly by terse but plebeian expletive:

Oh, hell!

With the building of the new course known as The Speedway last summer at Omaha, that thriving city arrived back on the trotting horse map with a bump. With three meetings scheduled for this season, two at the Benson track and one at the new course, things begin to look livelier than ever. A correspondent of the Spirit of the West tells briefly of the Omaha winter colony as follows: "Preparations are being made by the various trainers who have been winter training at the Speedway and Benson tracks to start shaping their charges up for the next campaign. Marvin Childs, who is in charge of the Peterson stable, may take his string to a mile track for their work around April 1, according to reports circulated in Omaha. Childs is jogging Major Bye Bye 2:19¼, Ben Earl 2:12¼, Tom Smith 2:11¼, Sad Thoughts 2:06¼, and a couple of colts which Peterson recently obtained from Pat McAvoy. Pimmy Ronin has been industriously engaged in keeping the winter kinks out of the muscles of Hal McKinney 2:06¼, Hal Connors and Tina G., the trio owned by Tom Dennison, and Pronto J. 2:17¼, and Frank Holloway, a green pacer, both owned by Bob Sebastian. Lee Dale 2:09¼, the good pacer owned by Wall Brothers, of Fremont, also has been added to the Ronin string and will be prepared by him for the races. Hal Connors, which was credited with phenomenal speed while in the Geers stable last season, is reported to be working in splendid shape with the straps and likely to show the racing form of which he is capable at this style of going. It was only because of the veteran Geers' aversion to riding behind a hoppled nag that Dennison was able to buy this speedy youngster. Fred Meyers, the proprietor of the Horseman Hotel, has a trio of steeds at work under Ronin. One of these, the double-gaited veteran Jim O'Shea, has been assigned permanently to the sidewheel way of going and encased in straps to make certain he will stick consistently to this gait. Meyers is confident that Jim will prove a bearcat among brush pacers when once the old timer gets accustomed to traveling exclusively at the one style of racing. In addition to the O'Shea horse, Meyers has McKinney Wilkes and Sir Charles K., the latter a green pacer with lots of whiz. Around the first of the present month R. R. (Buck) Laughlin will start work with a stable at the Speedway track.

Thoroughbred Matters

IMPORTED HORSES TO RACE THIS YEAR.

So many American horsemen have taken advantage of the hard times across the sea to replenish their holdings with fresh infusions from the European branch of the family of the thoroughbred that the array of imported horses of racing age has reached quite impressive proportions. So much interest has been displayed in the newcomers that the Jockey Club has prepared a list of those of racing age now under American ownership that have been brought over since the close of the last season's racing, while the ranks of the emigrants will receive several additions before this year's major meetings have gotten far under way. The following had been registered with the parent body up to March first:

Adroit, ch f, 3, by Broomstick—Artful.
Ardent, b f, 3, by Broomstick—Heart's Desire.
Arliet, ch m, 5, by Harry Melton—Koster Girl.

Uffizzi, b f, by Burgomaster—Fiesole.
Upper-Cut, b f, 3, by St. Denis—Smasher.

Harry Morrisey, who returned to his home in Kentucky shortly after the suspension of the Tia Juana meeting, was stricken with pneumonia a few days ago but is reported improving nicely at present.

LEE ROSE TO MANAGE TIA JUANA.

Horsemen throughout the west who are eagerly awaiting the reopening of the plant of the Lower California Jockey Club at Tia Juana, which is scheduled to take place early in April, will learn with pleasure of a change in officials which has been made by President Coffroth, Lee Rose of Los Angeles succeeding Jake Holtman as Mr. Coffroth's right hand man. Mr. Rose is not only one of the best qualified men obtainable to manage such an enterprise but he is also one of the best liked men in the business. Bred and raised with horses from the time of the extensive operations of his father, the late L. J. Rose who occupied a position of such prominence among the early day breeders on this coast, he has learned the game from all angles and will be able to do even more than his able predecessor in the way of popularizing the Tia Juana track with horsemen and public and in maintaining amicable relations between the management and all parties with whom they have business of any nature. When Tia Juana reopens there is every assurance of its success and for its permanent establishment as the racing center of the Pacific coast. The sport was good before, as we have yet to talk with a single disgruntled visitor to the races as conducted before the flood, and with Mr. Rose at the helm we believe that it will be even better. His selection is one of the very best of the numerous good moves made by Mr. Coffroth and his associates.

The winter meeting of the Juarez Jockey Club, which has been conducted in the face of obstacles of various natures since its opening last winter, was brought to an abrupt close early this week when things began to look squally between our Uncle Samuel and the little brown brother to the south of us, most of the horsemen in attendance losing little or no time in getting themselves and their horses back across the bridge into El Paso. Rumors that the meeting was to be discontinued have been rife at different times in the past, but this time it was not a rumor, but an accomplished fact. Monday's program was raced before a very small and noticeably uneasy crowd, and as there was but a few days longer to run at best, all hands and the cook turned in and called it a day and vamoosed poco prontito. Some of the stables shipped on out for eastern points to await the opening of the season there, but many with western inclinations will come on to the coast to take part in the spring meeting at Reno and in the revival at Tia Juana, which is now but a matter of a few weeks removed. Doubt is expressed in some quarters as to whether Juarez will ever "come back," now that winter racing has been revived both in the central south and out here, but with settled conditions across the border it will probably continue as a racing center with a considerable degree of success.

The initial meeting at Reno last summer under the pari-mutual system, controlled by a state racing commission, met with such marked success that Reno folks as well as those from many other sections of the west have anxiously awaited the announcement of the dates for the second meeting. Deciding that the total allotment of days would bring even more enjoyment and meet with even greater success if cut two ways the association has decided to give a spring and fall meeting this year, the early event to begin very probably on Saturday, May 27. While there was some feeling in Nevada against the establishing of speculation of the kind in evidence under the new bill, on the part of people unfamiliar with conditions engendered thereby, all doubts as to the the new bill, all on the part of people unfamiliar with days of actual experience. Nevada is on the racing map to stay, and with the plant at Tia Juana soon to be in operation again, and the whole state of California in the "receptive stage" the outlook for the thoroughbred in the west is much rosier than has been the case at any time since 1911.

KENTUCKY DERBY DRAWS WELL.

Fifty-six of the best bred three-year-olds in America, among them a number from France and England, have been nominated for the forty-third renewal of the historic Kentucky Derby, which will be run in all probability on May 13 at Churchill Downs under the auspices of the New Louisville Jockey Club. Harry Payne Whitney, whose great filly Regret captured last year's Derby, is the heaviest patron of the stake with seven nominations including Thunderer, winner of the last Futurity, and Dominant, leading money winner of the two-year-olds last season. The west will be interested especially in the entries of A. K. Macomber and the youngsters Skeer Face, formerly owned by George Wingfield, and Big Smoke, T. C. Bradley & Co.'s bay son of Duke of Ormonde—Gold Lace. The complete list of entries is as follows:

King Gorin, ch c by Transvaal—Ethel Simpson, and Hops, ch g by Hastings—Crimea, R. L. Baker & Co.
Big Smoke, b c by Duke of Ormonde—Gold Lace, and Pockichoo, ch c by Stalwart—Miss Peggy, T. C. Bradley & Co.
*Desmond's Day, b c by Desmond—Palmy Days, and Blind Baggage, b c by Sain—Love Not, E. R. Bradley.
Spur, b c by King James—Auntie Mum, James Butler.
Bank, b c by Mint—Miss Blair, L. E. Clark.
Greenwood, br c by Marathon—Presentation, F. D. Cregler.
*Neville II, ch c by Joe Chamberlain—Kate Angelo; Mustard, ch c by Golden Maxim—Bit of Spice, and White Hackle, ch c by Star Shoot—Mary Talbott, W. R. Coe.
Huffaker, b c by Dick Welles—Outwai, W. F. Cisco.
Cosmic, ch c by Countless—Mjosen, J. G. Greener.
Kinney, b c by Dick Welles—Lady Strathmore, T. P. Hayes.
Votary, ch c by Voter—Ecstasy, J. B. Haggin Estate.
Meadoworth, br c by Sain—Jennie J., H. C. Hallenbeck.
Lubelski, ch c by Ferole—English Esther, W. G. King-Dodds.
Churchill, br c by Sweep—Lamp Girl, Foxhall P. Keene.
Candle, ch g by Charles Edward—Torchlight, J. Lumsden.
*Palroma, b c by Polymelus—Lacroma; *Colonel Vennie, b c by Picton—Shy Missie; *Sanward, ch g by Santoi—Edwardine; *Fleuro, b c by Cicero—Fleurette II., and Julia L., ch f by Harrigan—Princess Tulane, Jefferson Livingston.
J. J. Murdock, b c by Contestor—Grotesque, Milam & Levy.
Jack O'Dowd, br c by Peter Pan—Lauretta Burke, P. J. Millett.
Checks, ch g by Marathon—Monarda, T. C. McDowell.
Gillies, ch c by Ogden—Golden Drop, J. E. Madden.
*Baffouilleur, b c by Meddler—Ballantrae, and *Esprit Gaulois, br c by Rabelois—Gunfire, Clarence H. Mackay.
Gipsey George, b g by Dick Welles—Animosity, M. C. Moore.
*Hesperus, b or br c by Sunstar—Our Lassie; *Star Hawk, b c by Sun Star—Sweet Finch, and *The Cock, ch c by Poussin—Dam by Volodyovski—Wise Saw, A. K. Macomber.
Lena Micha, ch c by King James—Gatien Belle, F. J. Nolan (Beverwyck Stable).
Ed Bond, br g by Mint—La Dotta, W. L. Oliver.
Bulse, ch c by Disguise—Nethersole, J. W. Parrish.
Dr. Moore, ch c by Disguise—Lardella, Parrish & Rodgers.
Heir Apparent, ch c by Blues—Royal Lady, Al Rogers.
Dick Williams, br g by Dick Finnell—Annie Williams, John W. Schorr.
Prince Harry, ch c by McGee—White Plume, and Ethel May, b c by McGee—Virginia Moore, J. H. Stamper Jr.
Blackie Daw, blk c by Transvaal—Mary Day, Jesse Spencer.
George Smith, blk c out of Reach—Consuelo II, and St. Isidore, ch g by Isidor—Onaga, John Sanford.
Skeer Face, b c by Hippodrome—Fleeing Venus, George Wingfield.
Thunderer, ch c by Broomstick—Jersey Lightning; Dominant, br c by Delhi—Dominoes; Chicle, b c by Spearmint—Lady Hamburg II.; Bromo, b c by Broomstick—Leayonara; Slipshop, b g by Burgomaster—Slippers; *Clapperbill, ch c by Thrush—Azores, and Hansa, ch f by Hamburg—Daisy F., H. P. Whitney.
Dodge, b c by Jim Gaffney—Flora Willoughby, and Franklin, ch c by Jim Gaffney—Gliding By, J. S. Ward.
*Imported.

The stakes for the spring meeting of the Kentucky Association were patronized to an extent that is highly gratifying to Secretary G. D. Wilson and his associates, there being seventy nominations to the Brewers' Selling Stakes, sixty-three to the Hinata Stakes, forty-five to the Idle Hour Stakes, thirty-four to the Camden Handicap and twenty-nine to the Ashland Oaks. A goodly number of two-year-olds are also eligible to the Breeders' Futurity to be contested at the same meeting.

California bred two-year-olds have held their own very well so far this year in the winter meetings, six races having fallen to their lot up to the first of the present month. Napa Stock Farm stallions are the successful sires, Burbank, Lantana and Lobelia being credited to Dr. Leggo and Savilla to Solitaire II, Burbank and Lobelia having been double winners.

ROD, GUN AND KENNEL

CONDUCTED BY FISHER HUNT

HONOLULU TO DEVELOP BIG GAME FISHING.

Honolulu has ambitions to be a fishing center. The idea is to attract visitors and develop the sport in the way of furnishing accommodations and the like. A Honolulu paper carried the following article on the subject recently:

While it transpires that the recent catch of tuna off Maui by Harold L. Morris of Denver, J. W. Jump of Los Angeles and F. K. Burnham of Martinez, California, does not constitute a world's record, it undoubtedly constitutes a local record. The world's record is believed to be held by Mr. Jump, who is said to have taken twenty-nine tuna in one day at Catalina.

Twelve big fish were taken on the recent cruise, including nine tuna, the largest of which scaled 92 pounds. Only one ono was brought to boat and no swordfish were encountered. The miscellaneous bag included barracuda, dolphin, kawakawa, ahaaha, aawa and uku. Sharks bothered the fishermen considerably and on at least two occasions their lines were cut by contact with their fins. A week ago more than 500 pounds of fish were caught, including five tuna. The party were the guests of Harold L. Mor, ris, and the trip was made in his commodious and well-found fishing sampan, the Dixie Maru.

A well known big game fisherman, at present staying in Honolulu, speaking of the possibilities of sport in local waters, said:

"The big fish are undoubtedly here and in large quantities. I hear that fishing for tuna and other game fish may be prosecuted here practically all the year round. At Catalina there is practically no fishing from November 1 to April 1. During the season from seventy-five to 100 boats a day are out at Catalina all summer, and during the winter months eight or ten boats are out every day.

"You have a tuna club here which sends out some very pretty literature but you will have to provide boats, fishermen and other things before you can expect a visitor to return here for another spell of fishing.

"At present a few gentlemen in the Islands take care of visitors who may be fortunate enough to get in touch with them, and they certainly treat their guests in princely style. If, however, a visiting fisher-man has no friends here and expects to get his sport by paying for it in the ordinary way, he is apt to return to the States a very disappointed man. The game fish that I have met with here appear to be every bit as hard fighters as they are in California waters.

"The ulua I consider a No. 1 game fish, and as hard a fighter, if not more so, than the tuna. Foot for foot and pound for pound I don't believe that a more sporting fish swims in any waters than the ulua."

TARPON ANIMATED MERCURY IN ACTION.

The mighty tarpon, king of the sea fishes, now comes in from Gitchu Gunmae, the Big Sea Water, to do battle with those who find joy in the scream of a reel which the thumbs cannot stop, the wild bend and sway of a good rod and the hot line soaring out in smoking runs.

Of all sea fish, the tarpon is generally conceded and acclaimed king royal. The great tuna is a wonderful fighter, an ocean bulldog, but his fight has not the beauty of action and lacks the sensational features of the tarpon's battle. Usually one cannot expect tarpon in Florida until March. April is fair, but May and June are the best months. Yet the unpleasant weather north makes February an especially desirable month to spend in Florida.

Naples on the Gulf is one of the most attractive places to be found. The winter here is like June in New York. The nights are cool and the days a joy and rest. Small fish abound at weights of one to several pounds: Jack, snook, the wonderful jumping lady fish, mangrove snappers, etc., surly, bull-like, old jewfish, up to 100 pounds (and sometimes far heavier) hug the shores in many places if one wants a tussle—a regular wrestle, with one at close quarters. But to the sportsman, the tarpon is the great objective.

Lincoln's Birthday dawned here clear and perfect as a sunny day can be. A light breeze, clear air and the great expanse of green gulf stretching to the horizon. And not often does one also find so efficient, quiet and satisfactory a guide as Roscoe Walker. Keen indeed is his desire to get a tarpon any time, but especially so to have the honor of bringing in the first silver king of the season.

He had noted a few feeding and breaking in the so-called rivers or inlets; had heard of a few hooked that broke away. So on this day, we started off in a small motor boat to match our skill and wits against the worthy antagonist we seek.

First we stop where we know mullet nets are being hauled and select a few unusually fine live mullets for a tempting lure. Now we work down to a bay noted as a tarpon habitat. We cast far out from the boat. Soon the line moves, and at the strike we have only a mackerel shark, but he gives us a good fight and ere long is dispatched.

Long we wait, our bait bothered anon by the top gallant cats, and then we catch a 21-pound snook, which breaks water and makes fine fun. Ah, that line now moves fast! Yes, tarpon! tarpon! "Careful; watch him!" shouts the guide, amid a medley of advice and objurgations from my friend, as nearly six feet of animated mercury flies through the air at the first touch of restraint, shaking its head in a fury to cast out the clinging bit of steel, so small and yet so tenaciously sticking like a burr to a bony jaw. Do we dream, or is that before our eyes the mythical Pegasus steed, incarnate, flying by on silver wings?

Now a great rush of nearly half a hundred yards, the line humming like a wire as it cuts the water, and then a trembling somersault in midair, up, up, and clean over, with a falling splash and smash of the tail that sends the green water into smithereens of white spray. Within ten minutes this powerful fish has thrown himself clear of the water in wild abandon five separate times. Now he tries runs and surges in all directions, and every trick his wily instinct or experience has taught him.

If there be any sight grander to a sportsman's eyes than a great tarpon in midair, burnished, iridescent, purple back and glistening silver sides like molten metal in the sun's rays, arching and shaking in his hurtling leaps, I have yet to see it, and he whose blood will not surge and pulse in unison, lacks the true "red."

But now our prize begins to tire. Again and yet again he makes noble efforts and violent struggles, and though we also tire ourselves, we begin to see victory in sight and less doubtful as the minutes fly. (But you can never safely feel sure of a tarpon till in the boat. Not always then. Last year one threw our guide in the water.) Twice we miss him as he nears the boat and makes his final fight. Ah! At last we have him! The first tarpon of 1916 (in this section of the country, at least).

Mounted at his best, simulating one of his great leaps, the body curved, tail and fins spread wide, the head with that undaunted, untamed fighting look we love, thus we picture him among our other trophies from the great outdoors, whereby we hope to while away pleasant hours in future memories of the past as age creeps and gains upon us. Yet here at Naples, even men of three-score and more, can find ease and comfort on land, and waters abounding in game fish. Would that I were able to spend more time here. As it is, Brothers of the Rod, I have tried to give you a glimpse in this poor way of the pleasure I wish you could all share. But yet a few days now and I will be in the cold North once more, working out man's burden as most of us must, and wish. It gives us the greater zest to enjoy true sport when it comes.

NATURE FACTOR.

Naples on the Gulf, Fla.

SPORT FOR SPORT'S SAKE.

Henry Stelling is getting very ambitious to show his prowess with the gun. He has publicly challenged Ed Hoag to a match of 100 "white flyers." Mr. Hoag has not taken kindly to the methods pursued by Mr. Stelling in trying to force a match, and you cannot blame him. Mr. Hoag is engaged in a large real estate business in San Francisco and such challenges through the daily papers with talk of side bets and the like may have the effect of injuring his standing as a business man. Mr. Hoag is not a professional shooter. He is in the game because he is a true sport who likes the recreation of getting out to the traps to mingle with his friends. Certainly Mr. Stelling should not create such a commotion for a match shoot as Mr. Hoag is rated as an A-No. 1 shot, but he shoots only for pleasure. It is possible that Mr. Stelling did not take these things into consideration in his enthusiasm for the match. One of the commendable things about the shooting game is the friendships that are formed and it will be well to try and preserve that feeling.

WAR ON ENGLISH SPARROWS.

Trouble is ahead for the few colonies of venturesome English sparrows which have taken up their residence in certain portions of Southern California. Bird-sharps from the University of California have been getting a line upon these colonies and have communicated to Commissioner Connell the location of certain of them. The order has gone forth to Deputy Pritchard to grease up the trusty 16-gauge and "go to 'em" with No. 10 shot. Pritchard is reputed to be "some shot" on these "birds."

Bird-lovers and students everywhere are dead against the sparrow, as it drives away song and insectivorous birds, does no good itself, and is a nuisance about houses where it nests, bringing vermin and filth. It was a serious mistake ever to import it into this country, and it, with the German carp, carry Gypsy moth, etc., forming the reason for some of the drastic laws recommended by the Fish and Game Commission to regulate the trying of such dangerous experiments with the public welfare by providing for rigid inspections, and prohibition altogether of known evil species.

* * * *

By way of still further shutting down upon the efforts of crooked crawfishermen to "run in" California-caught lobsters under the provision permitting Mexican lobsters to be imported through the San Diego customs house under fish and game commission inspection and marketing, during the season when no lobster may be taken in local waters, Inspector Norton has been authorized to pass no lobsters of illegal size. Those which do come in must conform to the California law. They are designated with a punch mark in the tail, affixed by the inspector.

BASS PROTEST FROM THE SOUTH.

Bass are artificially propagated in California, having been planted throughout the State by the Fish and Commission. The first spawn was imported and hatched to plantable size in the great mother hatchery at Cisson, in Shasta county. Bass have come to be the chief pond fish of the State. They are wonderfully plentiful in parts of the San Joaquin valley and attain enormous size, but need nursing in the south of a far different type than letting down the bars in March and April.

Fish and Game Commissioner Connell has written a letter to Mr. Mulholland, protesting in the name of fish and game propagation and protection against allowing the public to attack the future supply in Silver Lake, explaining that the misfit in the law was an unfortunate accident which the commission was unable to control. The commissioner considers it bad business from a future point of view, although, being a bass-fisherman of long experience, he "called the turn" on developments by stating that in all probability those who fished would have their trouble for their pains, for such time as the present weather conditions continued at the least.—Los Angeles Express.

MORE DOGS IMPORTED.

Champion Marck of Keswick and Paul of of Keswick, two famous St. Bernard dogs, were recently imported from England by Col. Jacob Ruppert, of New York. The dogs were purchased from Tailer Messenger, one of England's most successful breeders of the Saintly breed.

‡ ‡ ‡

Marck of Keswick, a dog of enormous size, has been pronounced by many English judges to be the best smooth dog of his breed ever bred. He won his championship when only fifteen months old. He is a noted sire. Among his offspring is the noted smooth coated dog King of Northumbria, a greatly admired dog in England.

‡ ‡ ‡

The annual meeting of the Ladies' Kennel Association was held at Royal Agricultural Hall, Islington, Lady Evelyn Ewart presiding, recently. The chief business was whether or not an open show would be held in the summer. Mr. Faudel-Phillips advised the formation of a guarantee fund, for which at least $1,000 would be required. Correspondence between the secretary and Sir George Hastings in regard to holding the show in the grounds of the Ranelagh Club was read, and in the end it was decided to hold the show, provided the guarantee fund could be arranged.

Queen Alexandria was re-elected patron, the Duchess of Connaught president and Miss Desborough secretary, while Mr. Lionel Faudel-Phillips consented to act as honorary treasurer.

‡ ‡ ‡

Mrs. Kate Carlin, the well known international judge and owner of the Eastney kennels of London, arrived on board the steamship California last week, with eight Pomeranians. The pick of the lot is Eastney Wee Freddie, which weighs three and a half pounds, winner of four firsts at the last Cruft's show. He is a brilliant orange sable. Mrs. Carlin also brought over Tango, the smallest chocolate Pom bitch living—weight only one pound and three-quarters. A very high class pair of Yorkshires also came along. Both are bitches and one has been sold to Mrs. Thorpe and the other to Dr. Cappell, of New Jersey. Mrs. Carlin reports that though many leading fanciers are in the trenches there is still a great interest in dogs in England, and that the Cruft's show was a remarkable one, not only in numbers of dogs shown, but in attendance. The summer shows that were practically abandoned last year have all claimed dates, and fanciers look for a busy season.

‡ ‡ ‡

A big entry is expected for the Golden Gate show. Jack Bradshaw will show his famous bulldog Country Model; Mayor James Rolph will show several of his famous cocker spaniels, including his famous champion Mission Chief; Fred B. McCay will show his imported pack of English Beagle hounds; Miss Thelka Eickhoff will exhibit Oakcourt Tatters, a crack Scottish terrier; A. J. Molera, the well known Monterey dog fancier, will send a string of crack Irish, Airedale and Scottish terriers to the show in charge of Dan Shuttleworth; H. M. Robertson of Pasadena will personally bring a large string of blue-blooded dogs of many breeds,

Sportsmen's Row

The State Game and Fish Commission of Oregon now has sixty guns of all sizes, values and degrees of usefulness which have been confiscated from game law violators in that state within the last few years. Some of them, no doubt, will be redeemed by those from whom they were taken, but the majority of them may be sold if the commissioners decide that that is the best use to make of them.

* * * *

At the annual meeting of the Washington Field Trial Club, held on February 22, the following officers were elected for the ensuing year: President, F. D. Dean; vice-president, M. A. Howe; secretary-treasurer, F. E. King. Trustees, J. A. Balmer, Cle Elum; W. W. Kurtz, Hoquiam; G. H. Macdougall, Spokane, and F. W. Siddall, Tacoma. It was decided to hold the next field trials in the first half of September, the exact date to be announced soon. The board of trustees say that the next meet will be a hummer. The slogan of the club will be "the sport is the first consideration." Watch for the date. Don't miss it.

* * * *

Plans for the immediate moving of the Los Angeles Gun Club's traps and other belongings were arranged for at the annual meeting of the organization two weeks ago. The club is at present located in Venice, near the old Vernon ball park, and the new club site will be up on a beautiful plat of land adjoining Eastlake Park. Here, in about two weeks, announces Secretary Fred H. Teeple, the club will hold its first practice shoot of the season, and by the first of April everything will be in readiness for the grand opening. A program, to consist of several trophy and championship shoots, together with one or two registered tournaments, will be arranged within the next two weeks. At last week's meeting new directors were elected, including Steve Fullerton, a young shooter of prominence.—Will A. Wright, Los Angeles, Cal.

* * * *

Uncle Joe Hineman of Wausau, Wis., a man who is 91 years old, recently celebrated his ninety-first birthday by breaking 100 targets straight, and he did it without the aid of glasses. He uses glasses when reading or writing, but not when shooting.

* * * *

The Midwick County Club members have taken a fond liking to shooting, the sport being nearly as popular as golf. A rifle contest for club cups will be staged on next Saturday and the first trap-shooting tournament will be held on March 25th. Cups were presented by Mr. Center to Mrs. S. C. Pierce and E. D. Peterson, who won cups in rifle shoots during February. Cups were also presented to Mrs. J. V. Eliot and E. S. Armstrong by Mr. Peterson for rifle contest wins.

* * * *

Fish and Game Commissioner Connell plans to send in the stripping experts to Bear Valley as soon as possible to begin taking eggs there, and is preparing to operate the hatchery there as soon as accessible. High water is certain to complicate the egg-taking operations and interfere greatly with getting around the shores of the lake, but the men will be instructed to do the best they can and make a new record for Bear Valley egg-taking, if that be possible. They have not much to beat, as last year only about 340,000 eggs were gathered there.

* * * *

One of California's most famous ball players, Cactus Cravath of the Phillies, is still another diamond celebrity who has taken to the sport alluring. During the winter sports he has put in his time at the traps and in the field in Southern California.

* * * *

N. J. Glover has removed from St. Josephs, Mo., to Los Angeles, Cal., and will do his trapshooting in that city from now on.

* * * *

Annie Oakley (Mrs. Frank E. Butler) recently gave an exhibition of target shooting before a distinguished gathering at Pinehurst, N. C. In the audience were Governor and Mrs. Brumbaugh, of Pennsylvania.

* * * *

O. N. Ford very appropriately celebrated the 39th anniversary of his birthday last Sunday at Salinas by breaking 99 out of 100 targets. Bobby is certainly starting the season auspiciously and he is booming the California-Nevada shoot that will be held in San Jose this year.

* * * *

There was an odd thing at the Elks' Club shoot on Sunday. The members of the two teams for the grub stakes were picket at random and after the twenty-five on a side had banged away at fifteen birds each it was discovered that the teams were tied. If the teams had been carefully picked to try and equalize the strength it would have been odd even then.

* * * *

Instead of putting up merchandise prizes as in the past, the Gate City Gun Club of Atlanta, Ga., will have a ribbon system for the three high men—blue ribbon for first, red ribbon for second and yellow ribbon for third—each to count for so many points. At the end of the season the shooter with the greatest number of points will be awarded a valuable trophy.

Willie Perkins, 8 years old, living at Third and T streets, Sacramento, has caught the largest catfish taken from the Sacramento river in many years. Willie was fishing from a barge anchored below P street. After a struggle the lad landed the fish. It weighed 11 pounds and as soon as the boy had it safely tied to a heavy string he slung it over his shoulder and hurried home. He stopped long enough to weigh the fish, which is said by some authorities to have been large enough to have swallowed Jonah.

* * * *

The Utah Kennel Club will hold an all-terrier show in September. James Keefe, owner of the Mountain View Airedale kennels, has been invited by the show committee to judge the affair.

* * * *

One of the finest specimens of a Japanese spaniel ever imported to the Pacific Coast from Japan arrived on the China mail steamer China last week. The dog, which is from a kennel of Royalty, was consigned to H. B. Beddeau, of this city. Beddeau will show Chin Chin at the Golden Gate show next month.

* * * *

A good catch of mackerel were caught by Al Reed of the Dyas Company off the long wharf at Santa Monica. Reed declares that the runs of smelt, mackerel and pompano were good, but fishing in the surf was very poor.

BURNHAM BACK FROM HONOLULU.

Frank K. Burnham of Martinez returned during the week from a trip to the Hawaiian islands, where he enjoyed some of the best fishing that has fallen to his lot during a long term of rod and reel experience.

Burnham is enthusiastic about the opportunities for angling in the waters of the Pacific islands. The size and the gameness of the fish impressed the local fisherman and he has many tales to tell of long fights with the finny denizens of the waters surrounding the islands.

On a four-day trip in company with James W. Jump of Los Angeles, Garrett P. Wilder, president of the Hawaiian Tuna Club, and H. Gooding Fielding, secretary of the club, Burnham had a big four days fishing off the coast. Although the trip was made in January—usually an off season in other parts of the world—the four fishermen landed this grand basket:

Two yellow-fin tuna, 70 and 62 pounds.

One long-finned tuna, 18 pounds.

Three dolphin—length 4 feet, weight 16 pounds; length 4 feet 6 inches, weight 20 pounds; and length 4 feet 3 inches, weight 17 pounds.

Seven ono—one 6 feet long and weighing 61 pounds; two 5 feet long and weighing 42 pounds each; two 5 feet long and weighing 41 and 40 pounds; one 4 feet 6 inches, weighing 38 pounds; and one 4 feet long and weighing 36 pounds.

Seven ulua—a game fish resembling a giant pompano. The total weight of the ulua catch was 140 pounds.

One kaku, length 4 feet.

And a number of smaller fish, including the oceanic bonito.

In one week's fishing in February Burnham, Jump and J. A. Morris of Denver made a catch of over seven hundred pounds of game fish. Included in the spoil were nine yellow-fin tuna, three long-fin tuna, two dolphins and a number of barracuda. The largest of the yellow-fin tuna weighed 92 pounds and the smallest 47 pounds.

A "BIRD" OF A FILM.

If anyone thinks for a moment that the wild game life of California is a thing of the past, or nearly so, let him drop in for twenty minutes' rest and entertainment in the lecture hall of the California Development Board, third floor, Ferry Building, San Francisco. A moving picture film, shown here free of charge every day at 2:30 p. m., Sundays, Wednesdays and holidays excepted, will convince the doubtful ones that California still has enough fat, plump, toothsome geese and ducks for many, many square meals.

This very interesting film is something entirely new, and different from the usual pictures thrown on the screen at the "movies."

It was obtained at a cost of thousands of dollars, with the assistance of some of California's most enthusiastic sportsmen, who appear in it at times. Taken during the winter of 1914 on the marsh or tule lands near the Buttes in Sutter county, the scenes are wild and picturesque. Thousands, yes, millions of wild geese and ducks are seen flying, lighting and resting upon the great smooth body of fresh water. A most striking feature of the film is the hunter in action. The sportsmen, hidden in their blinds, can be seen picking off the birds as the flocks come within range of the "shooting irons." The birds are seen to scatter and the victims of the sportsmen's true aim drop with a splash into the water below.

A well known sportsman, who saw the picture, remarked that there seemed to be enough wild geese and ducks in sight during the 200 feet of film to supply every home in California with a good wild dinner, with plenty left over for all the cats and dogs.

For those who love outdoor sports this film will be a rare joy. It is not unlikely that a similar picture was never obtained by the "movie" camera, and possibly will never be obtained again.

The picture will be shown absolutely free of charge for several weeks.

ARMIES USE CARRIER PIGEONS.

It is not generally known that all the armies and navies of the world can fall fack on official pigeons, if necessary, and that the birds belonging to the British navy have their official standing and numbers just as the handymen have.

During the Boer war the British army had its carrier pigeon system. The birds brought messages from all the towns beleaguered by the Boer invaders, and when Sir George White's force was cooped up in Ladysmith winged messengers carried several despatches from that gallant officer to the men who were slowly fighting their way to his relief.

The first war in which pigeons were used as messengers was the Franco-Prussian, and the birds carried news into and out of besieged Paris. A post was established at Tours, and right through the siege regular mails were carried between Paris and Tours by pigeons.

SCORES ON SHELL MOUND RANGE.

Norddeutscher Schuetzen Club, monthly medal shoot—George W. Dieckmann, 224, 223, 221.

Germania Schuetzen Club, yearly medal shoot—Expert class, Otto A. Bremer 218, 221; C. M. Henderson 219, 217; George A. Pattberg 215, 225. Champion class, E. Hoffmann 194; John de Wit 198, 188. First class, S. Heino 185, 177.

Company A., Irish Volunteers, monthly medal shoot—Lieutenant M. Gaul 43, Captain J. F. Waters 41, F. Dugan 40, Corporal P. J. Kelly 38, Corporal F. D. Cronin 33, Corporal T. Moynihan 26, W. Gaul 23, H. O'Connor 21, D. O'Connor 20, D. Cotter 20.

Independent Rifles, monthly medal shoot—Major B. Hilken 56, F. Schohay 52, A. Williams 39, Sergeant J. Eichner 35, Sergeant L. J. Mayer 28, W. O. Biermann, 33.

Swiss Rifle Club, monthly medal shoot—A. Schwarz 222, 221; John Frei 222, 219; F. Meuhlbach 220, 215; Charles Ott 212, 198; L. Hauser 212, 193; H. Perrin 210, 209; John S. Leutenegger 204, 203; U. Imdorf 200, J. A. Sutter 196, 193; J. R. Statder 196, 190; John Baumann 195, 176; A. E. Hintermann Jr. 195, H. Tschopp 183.

Swiss Rifle Club, monthly bullseye shoot—John Baumann 270, E. Ott 317, F. Sutter 362, J. R. Statder 405, A. Hintermann 565, L. Hauser 800, A. Schwarz 813, John Frei 885, H. Perrin 1064, J. A. Sutter 1080, A. von Wyl 1280, H. Tschopp 1400, J. S. Leutenegger 1515, U. Imdorf 1710, F. Muehlbach 1770.

Golden Gate Rifle and Pistol Club, monthly medal shoot—C. M. Henderson 235, 231; George A. Pattberg 232, B. P. Jonas 217, 226, 219, 219, 226, 219; F. Sutter 181, F. M. Nett 172, E. Bernhardt 156, 163, 175, 163, 167, 165; G. H. Meyer 170, 188; F. Hildebrandt 157, 170, 197; J. F. Bridges 210, 189; O. A. Bremer 223.

Pistol scores—O. L. Lilenjo 91, 86, Dr. R. A. Summers 86, 82, C. T. Sisson 88, 87, George Armstrong 97, 92, 92, 96, J. J. Currier 92, 91, W. C. Prichard 93, 91, 91, T. Laine 89, 88, 84.

CATAMOUNT KING IS 70 YEARS OLD.

Chambersburg (Pa.)—William Wright, nearly seventy years old, is the catamount king of the East, and is ready to defend against anyone denying this assertion. "Wildcat Bill," as he is commonly known, is from Horse Valley, Franklin county, and claims the distinction of killing the last wolf in the east Atlantic States. Wright killed this wolf about six years ago and still has the tanned fur of the beast among his many trophies of the forests.

Wright raises various kinds of live stock and poultry on his farm. He also hunts, fishes and traps. He derives a neat income from his sale of pelts of the muskrat, skunk, wildcat, fox, squirrel, deer and sometimes bear. He is a dead shot and uses a rifle which does not mar the skin.

"Wildcat Bill" is fearless, and thinks no more of killing a catamount than he does of bagging a rabbit in his grass field. He is as hardy as pine knots growing on the trees of the forests through which he roams.

NEW IDEA FOR HUNTING BADGES.

A bill has been introduced in the New York State Legislature, which, if passed, will require every hunter to wear a hunter's badge or button and to carry his hunting license in his pocket whenever he is afield after game. Failure to comply with the law will cause a sportsman to forfeit his license. So much for the hunter. If he takes a dog with him, the latter also must wear a metal tag in lieu of a button, bearing the number of his master's license, and this must be securely fastened to his (or her) collar. The bill also grants permission to hunters to hunt with dogs in the forest preserve.

* * * *

W. C. Beck, a deputy state fish and game warden of Wichita, Kan., says that the ducks that were found dead in the Cheyenne bottoms recently were the victims of frozen feet. He heard from the bottoms not long ago that during a sleet and snow storm ice formed on the ducks so thickly that they could not fly. Many of them suffered from frozen feet. Unable to fly away to get feed, they grew thin and, he believes, died of starvation. Is Mr. Beck right in his solution of the question as to what caused the death of so many wild ducks in Kansas?

High Scores At Many Coast Traps

SAN JOSE IS BOOSTING FOR BANNER STATE SHOOT

San Jose, Cal.—Interest has been aroused in the California-Nevada Interstate Shoot that has been awarded to the San Jose Blue Rock Club. The dates have been set for May 28, 29, 30 and 31, with a practice shoot for the 28th. O. N. Ford is out to get everything in ship-shape for holding a banner tournament.

The local booster confidently expects to secure the entry of 150 shooters from all sections of California and Nevada for the events. Trap-shooting enthusiasts from nearby points are invited to practice at the San Jose grounds so as to get their hands in.

The San Jose squad will shoot a friendly six-man team race with the Golden Gate club on the latter's grounds on March 19th. The following Sunday, March 26th, the club will stage its monthly shoot.

* * * *

Elks' Club Shoot.—Billy Price—you all know the popular Golden Gate booster—distinguished himself last Sunday in finishing high amateur at the initial shoot of the newly organized Alameda Elks' Club. Billy went great in the club event of 25 birds, busting 24, and he concluded by breaking 12 out of 15 in the grub event, giving him a score of 34 out of 40. Barney Worthen and H. Meineke tied for the next honors with 35x40.

In the competition among the professionals R. C. Reed did some sensational shooting in missing only one of the forty targets he aimed at. Dick has been away for several months and he returned with the same old eye. L. D. Hawxhurst cracked 38 out of 40, which was some consistency in itself. This little story would not be complete without calling attention to the fact that Clarence A. Haight was next with 37x40. The "Father of Trap-shooting on the Coast" has been at the traps for years and he steps right along with the speediest. At that, you would hardly suspect him of having been a prominent trap enthusiast away back in the eighties.

The Elks are to be complimented on the banner turn-out. There were many newcomers who were having their first experience with the tarhawks and each and every one seemed to enjoy the sport alluring. The results were:

Shooter—	Club.	Grub.	Bke.	Targ.

Vernon Club Shoot.—Once more the Billy Wilshire unique trophy went into the hands of a shooter other than a local when it was contested for at the Vernon Gun Club grounds Sunday for the nineteenth time and a first leg taken by F. A. Richter, of Minneapolis, who hung up the good score of 49x50.

Immediately following the Wilshire contest the Vernonites lined up for the bronze cup shoot. This was also captured by Richter with a score of 47x50. The easterner was certainly knocking the clay out of the targets. Very few of them got away from him.

There were also several other blackbird squelchers from the east at the Vernon Club shoot, among them being Dr. Houston of Montana, McQuaid, Famechon and Kunz, all from Minneapolis.

Fatty George Tuckett of New York, who has been shooting at Vernon for several months, announced at the shoot that he would leave for New York this week. The boys will sure miss the jolly laugh of Tuckett's, who is one good fellow. Tuckett is a member of the New York Athletic Club.

T. P. Smith, who recently won his first leg on Billy Wilshire's diamond-studded ink magazine, was close on the heels of Richter in the trophy event, breaking 48 out of 50. He also tied for second place in the bronze cup shoot with Dr. L. M. Packard, each with 46 dead birds to his credit.

The shooters were favored with a regular day once more, and a large crowd—forty-six—shot in all three events. An even 4800 targets were thrown.

The scores:

Wilshire Trophy Event—

Shooter—	Hdcp.	Bke.	Targ.
George Tuckett	17	43	50
Van Nest	16	37	50

* * * *

Salinas Club Shoot.—The opening shoot of the Salinas Rodeo Gun Club, held Sunday at Sherwood Park, was a big success, a large number of participants enjoying the shoot, both from Salinas and the outside towns. O. N. Ford, the San Jose crack shot, made 99 out of a possible 100, while other correspondingly good scores were made. The day was ideal and the barbecue served at noon with Zabala brothers' salsa made a big hit, especially with the visitors. Of the latter, San Francisco, San Jose, Hollister, the Monterey Peninsula, Watsonville and Santa Cruz were well represented.

A meeting will be held some time this week to fix the date for the next shoot. Sunday's scores follow:

F. Marbach, shot at 135, broke 100; Pete Breschini 85—73, Otto Feudner 75—65, A. Eleshio 150—104, Harry Eleshio 75—64, Ashley Walker 85—72, C. Floyd 50—29, H. Gross 60—39, O. N. Ford 100—99, A. Barker 100—96, Philip 75—46, Baumgartner 100—96, Huntsman 100—90, H. Rickelson 125—109, Fred Chappell 175—145, Schulz 100—85, Sherman 75—64, Black 100—68, Dr. Garth Parker 50—38, Roland Vierra 75—64, V. Massera 50—45, Dr. H. C. Murphy 50—38, Frank Pura 75—61, A. Horton 75—58, D. McFadden 100—88, Frank Casey 50—27, Chas. McFadden 100—74, Jarver 25—23, E. Horigan 100—64, R. Cashin 50—27, Brewington 50—27, Snow 25—15, Griffin 25—11, Bramers 25—12, A. G. Winckler 50—33, Fred Tholcke 50—36, Ed Smith 25—12, John Murphy 25—17, D. S Flinn 25—5.

Golden Gate Club.—The Golden Gate Club will stage its first monthly shoot of the season on its Alameda grounds today. It is expected that there will be a crowd of fully sixty on hand. The officers of the club—Thomas Wilkes, president; Frank Webster, vice-president; Clarence A. Haight, secretary, and T. R. Riley, treasurer—have everything in readiness to entertain visitors. The regular program will be carried through, which includes twenty targets for championship, first, second and third classes; a ten-bird grub race and a twenty-bird challenge trophy event.

* * * *

Portland Club.—Portland took all the honors in the telegraphic trapshoots held on March 12th between the Portland Gun Club and the Spokane (Wash.) club. The Portland women broke 59 out of 75 birds at the Everding Park traps near Jenne Station and their opponents 40.

A much closer race was experienced between the men of the two organizations. But one "dead" bird separated Portland from Spokane, the locals breaking 110 out of a possible 125. Thirty-four shooters were at the Portland Gun Club grounds.

High amateur of the events went to James W. Seavey, with 92 per cent. Seven scatter-gun artists scored one point on the Imperial Hotel diamond medal. They are: Abner Blair, Al Seguin, Miss Gladys Reid, Mrs. C. J. Schilling, A. W. Strowger, president of the Portland Gun Club; E. H. Keller and H. R. Everding.

James K. ("Our Jim") Simpson, president of the Stevenson (Wash.) Rod and Gun Club, was a Portland visitor, the guest of A. W. Strowger, president of the Portland Club, and H. R. Everding, ex-president. Mr. Simpson made 86 per cent, the highest he has ever recorded. He has not been at the traps since last year, but he expects to enter all the tournaments this season.

The scores for the women's telegraphic shoot are: Portland, Mrs. C. J. Schilling 23, Miss Gladys Reid 19, Mrs. E. H. Keller 17; total 59. Spokane—Mrs. C. A. O'Connor 18, Mrs. Fred Dryden 13, Miss Bessie LaMar 9; total 49.

Men's Shoot—Portland: Al Seguin 23, James W. Seavey 23, H. R. Everding 22, Archie Parrott 22, F. Duncan 20; total, 110 out of 125. Spokane—March 23, Chingren 22, McElroy 22, Tiffany 21, Williams 21; total, 109.

Following are the scores of the regular events: Abner Blair 84, J. C. Morris 64, Al Seguin 90, J. S. Crane 52, E. B. Van Arman* 88, W. C. Bristol, with 20-gauge gun, 50; J. P. Bull* 92, H. A. Pollock 72, James Reid* 88, Miss Gladys Reid 76, A. W. Strowger 74, J. K. Simpson, president Stevenson (Wash.) Gun Club, 86; A. L. Zacherson 66, E. H. Keller 80, E. F. Platt 86, J. D. Platt 38, H. W. Robare 48, P. J. Holohan* 88, John G. Clemson 48, C. B. Caldwell 70, C. M. J. Schilling* 92, Archie Parrott 88, James W. Seavey 92, J. T. Brooks 54, Dr. O. D. Thornton 80, Mrs. C. J. Schilling 86, Ben Trenkman, with 20-gauge gun, 48; B. E. Leonard 44, Mrs. E. H. Keller 68, F. Duncan 88, H. R. Everding 88, W. J. Houser 80, W. B. Honeyman 80, and L. Beeson 70.

*Professionals.

* * * *

Trade Notes.—C. T. Rankin, the Kansas City, Mo., amateur recently had the distinction of winning eight successive shoots held at different towns throughout the state of Kansas. Shooting Nitro Club shells at 500 targets during these meets he succeeded in smashing 448.

Frank Sanders, of the Des Moines (Ia.) Gun Club, shooting Nitro Club shells, recently broke 90 of his quota of 100 clay birds.

At a practice shoot held recently by the Salt Lake (Utah) Gun Club, J. Tingey, shooting the perfect combination of Remington pump gun and Nitro Club shells, broke 83 out of a possible 100.

* * * *

Some of the Denver's (Colo.) professional men held an enthusiastic and well-attended meeting recently at the Savoy Hotel in that city, and organized the Denver Trap Club, electing officers as follows for the current year: President, C. M. McCutcheon; vice-president, T. H. Smith; secretary-treasurer, Dwight Osborne; field captains, Capt. A. H. Hardy and Maj. P. J. Hamrock. The club hopes to have a membership of over one hundred before the first day of July.

* * * *

The Vernon Gun Club management announces that dates have been received from the Interstate Association awarding the club a registered tournament, to be held at the Vernon traps on May 8 and 9.

The club will put on an extra day of the tourney on the 7th of May, which comes on Sunday. The affair will be 200 birds the first day, 300 the second and 100 the third. The club also declares that they will have enough money up to get 100 shooters on the grounds each day of the shoot.

* * * *

Competing with more than twenty men experts with the gun, Mrs. R. R. Barber of Minneapolis, in a recent shoot of the Twin Cities Gun Club in Minneapolis, pulverized 196 of the 200 targets thrown, the best she has ever made. There are several women shots who will bear watching in the next G. A. H.

FLY-CASTERS OPEN APRIL FIFTEENTH.

This year will see a marked difference in the recording of the records of the San Francisco Fly Casting Club. Realizing that the demerit method of keeping the records is far more satisfactory than the percentage form, we will this year so record our scores. In the event of a person wishing to make a comparison between our scores and those of other clubs, all that will be necessary is to reduce our demerits to the percentage basis of computation heretofore in vogue. We hope our method of keeping score, together with pending conclusions on the part of the National Association, will result in all the clubs scoring on the demerit idea, rather than the percentage. Our regular schedule for the season will begin this year on Saturday and Sunday, April 15 and 16, about two weeks later than usual.

F. J. COOPER, Pres.

Tacoma, Wash.—Plans for the opening of the bait and fly casting season with a tournament open to the public in Point Defiance Park April 29 were decided upon at a meeting of the Tacoma Bait and Fly-Casting Club. The project of leasing or purchasing a permanent fishing preserve was again discussed at the meeting, but it was decided to accept none of the sites now offered to the club and to make no decision until further inquiry could be made. The club is planning a preserve that will be provided with various kinds of game fish, but the committee in charge of selecting a site has not yet found a place that suited all requirements.

The tournament to be held next month in Point Defiance Park will be an invitational affair in which the members of the recently organized Seattle Bait and Fly Casting Club will be invited to take part. Tacomans, who are interested in the scientific side of angling, will also be asked to "wet a line" in the tournament, if they are so inclined.

BIRDS AND FISH DISTRIBUTED IN WASHINGTON.

With thousands of game fish planted in the lakes and streams and quail and pheasants liberated in all sections of Washington through the efforts of Ira D. Light, county game warden, sportsmen in Pierce county should find even keener pleasure in the future than in the past. According to an announcement made by Game Warden Light, 200,000 Chinook salman from the Muck creek hatchery have been planted in nearby lakes one recent week.

Of this number, 75,000 were placed in American lake, 75,000 in Steilacoom lake and 50,000 in Spanaway lake. The game commissioners have also ordered 600,000 silver trout fry to be placed in the lakes and streams of the county. These are expected daily and will probably be distributed before the end of this week.

Orders for 500 Chinese pheasants have been placed with dealers by the county game commissioners and these also are expected to arrive in Tacoma in the near future. They will be liberated in various parts of the county. Light has liberated 15 pairs of pheasants in the American lake game preserve.

Because of the large numbers of quail in the game preserve and the scarcity of them outside, quite a quantity of mountain, valley and Bob White quail have been trapped by the game warden during the past few weeks and sent to portions of the county that are not protected. During the past year the quail in the game preserve have multiplied rapidly, but in the other sections of the county they have not been seen in great numbers. Game Warden Light is now preparing his annual report and expects to submit it to the game commissioners this week.

SMALLER SHORE BIRDS SHIPPED TO MARKET BY WAGONLOAD.

The smaller shorebirds, or sandpipers or "peeps," as they are commonly called, which are not large enough to be considered legitimate game birds, number about thirty species, or about half of all the species of the shorebird group in North America.

Along the eastern United States coast are hundreds of miles of shore exactly suited to their needs, and until about 1870 these places swarmed with countless thousands of the dainty creatures, which made a charming and ever-shifting panorama as they moved from one feeding place to another, thus adding an attractive touch of life to the wind-swept beaches.

Then, as the great flocks of ducks and geese shrank under the attacks of the market hunter until they ceased to supply the ever-increasing demand for game, themarket hunters turned to the tiny shorebirds.

These unsuspicious victims, bunching so closely that dozens of the mites could be killed at a single discharge, were shipped to market by the wagonload to furnish a scant mouthful of meat apiece as the only return for the destruction of one of nature's most beautiful creations.

The assaults of the market hunter were supplemented by the incessant attacks of the boy, who, with the modern small-bore high-power gun, views anything alive as a fair target, and of late years he has swarmed in the summer on the beaches from Virginia to Maine.

A peculiarity in the migration of the smaller shorebirds increased opportunities for their destruction. Many remain nearly all summer along the coasts of the United States, with only a few days between the disappearance in June of the last north-bound migrants and the reappearance in early July of the vanguard of the fall migration.

Thus in the case of the greater yellow-legs, the last leave Long Island going north the final week in May and return on their southward journey the middle of July; while in the case of the knot, the breeding area lies north of the Arctic Circle, and the earliest possible spring migrants do not arrive there until about the first of June, yet fall migrants enter the United States early in July at just about the time the first eggs are hatching in the Arctic nests.

It is certain that these very early fall migrants cannot have raised families that season. It is not known whether these birds, which for one reason or another never bred after they reached the northland and started at once on their return journey, or whether they are disappointed pairs whose eggs have been destroyed, and which, instead of attempting a second mating, as is common among birds in temperate climates, began forthwith their southern flight, knowing instinctively that if a second set of eggs should hatch the young birds would surely perish in early autumnal storms.

Be that as it may, shorebirds become numerous on the beaches soon after the first of July, and during August, the month of the greatest outpouring of city dwellers to the seashore, many species reach their full fall numbers, and consequently are subject to the greatest embarrassment as they flee from beach to beach vainly seeking a place of refuge.

WELLS B. COOKE.
Assistant Biologist, Bureau of Biological Survey.
Washington, D. C.

"DEAD," SWEETEST MUSIC TO SOUSA.

John Philip Sousa, the veteran bandmaster, has just been elected president of the newly created Amateur American Trapshooters' Association, the latest organization to be added to the sport world.

Sousa is probably the most enthusiastic trapshooter in the country. The next best thing to trapshooting is talking about it, and in Mr. Sousa the scattergun enthusiast finds a very interesting talker. "Trapshooting," says the bandmaster, "is the baby of the great American sports, but it is a healthy infant. It is estimated that more than 400,000 men (and yes, women) face the traps in the course of a year, and there are said to be more than 4,000 guns clubs.

"It's a poor town that doesn't boast of at least one trapshooting organization.

"Trapshooting appeals to the lover of sports from many angles. I should say that, first, it is fine because it develops self-reliance. A man must call 'pull" and shoot his own gun. Nobody may do these things for him. From experience I say that one exercises when he lifts an eight-pound gun to his shoulder hundreds of times a day. He builds muscle and he's tired—so tired that insomnia doesn't hang around when his head hits the pillow.

"One must do some thinking, and the eyes and arms must move in unison with the brain."

Mr. Sousa was asked his opinion on women taking up the sport. He said: "Women are finding trapshooting even more enjoyable than golf. In the shotgun game woman is not classified as a woman, she is not segregated from the men. She meets men shooters on an equal footing, and there is nothing that pleases her more than to beat her lord and master at his own game. Indeed, women have so far advanced in trapshooting that they will be permitted to enter the Grand American Handicap this year.

"Shooting makes a woman agile and alert. I have shot at the traps with many women, and never have I seen an ungraceful one who used a shotgun well."

As additional proof that the "great master" is an enthusiastic shooter as well as talker, his closing statement was:

"In conclusion, let me say that just about the sweetest music to me is when I call 'pull',' the old gun barks, and the referee, in perfect key, announces 'Dead.'"

Bull and Bear Fight in Hilltown Days

OLD-TIMERS HAD ONE BIG DAY OF SPORT

I occupied the land where the Spreckels sugar factory is located. A. T. Buell occupied the Buena Vista on the opposite side of the river and we were annoyed by having our stock killed by bears that made their homes in the mountains back of the Buena Vista.

They would come down at night and hide in the timber by some of the trails. When the stock went to water the next day the bear would catch the first animal that came along. Both Buell and myself had five or six California boys in our employ, who proposed that if each of us would spare a man for two days without charging them for lost time they would take one of those bears alive, and on the following Sunday they would have an old-fashioned Mexican bull and bear fight. To this we assented. The trap was made of cottonwood logs one foot in diameter in the timber back of where the sugar factory now stands, with a door in one end made of heavy plank, held open by a figure 4. Then they caught a calf about one week old and tied it in the back end of the hut. He was fastened so that he could not reach the spindle that held the door open.

The bellowing of the calf for its mother attracted the bear, who lumbered over the spindle that held the door open and down it came with a crash. He ate the calf and tore the bark off the logs, but he was fast. He was then transferred to an iron cage and taken to the Davis hotel at Riverside and left in the corral.

Then they scoured the country and got the biggest, wildest and sharpest-horned bull they could find. They drove him with tame cattle and put him in the corral. This was on Friday and on Saturday they notified Castroville, Monterey and Watsonville that on the morrow there would be a bull and bear fight at 12 o'clock noon.

Well, what a crowd, about one-half native Californians, and the remainder a mixture of many nations.

The big barn on the north side of the corral was boarded up seven feet from the ground and opened from there to the eaves and filled with hay to the top. There were the reserved seats for women and children only. Men and boys covered the roof of the house, barn and hen house. They sat on horses and wagons and fences. When all was ready eight or ten of the California boys rode into the corral, lassoed the bull and tied his legs. Then they made the end of a chain about sixty feet long fast to one of his fore feet. The door of the cage was opened and the bear let out and the other end of the chain was fixed to one of his fore feet. Then both bull and bear were released. In the meantime an old white-haired Mexican from Castroville, riding a dilapidated pinto pony and with a cracked fiddle, entered the corral. This was called the orchestra, and he played for the bull and bear fight. The animals took a good look at each other and met half way. When the bear appeared to have the best of the fight the children on the hay would cry, and when the bull got the best of it they would laugh.

For some time we thought the bull was worsted. The bear had both arms around his neck and had a vicious grip on the side of his head, but finally he broke loose and got one of those sharp horns between his ribs and into his vitals. Then they backed off the length of the chains. Cold water was dashed on them, but neither would advance. They had no way of digging trenches as in Europe, and the fight was over.

They put the bear back into the cage where he died. Then they drove the bull across the river. Then followed some racing and fights over the results and the curtain dropped. It was a bank of fog floating in from the bay.—Carl S. Abbot of Salinas.

Talk on Birds.—Mr. Elmer Bickford addressed the pupils of the Central School at Napa on "Birds." He spoke of the fun of watching birds and studying their habits in our own yards and in the outlying fields and woods. He dwelt upon the necessity of protecting birds from their natural enemies, and also from the man and boy hunter. He advised the girls to look out for their pet cats, lest they should kill more birds than they were worth. Nearly all birds are beneficial. Mr. Bickford mentioned Cooper's hawk, the Shinir hawk and the English sparrow as harmful birds that should be killed on sight. The children were greatly entertained and instructed by this interesting talk on birds and will be glad to have Mr. Bickford come again.

*Won shoot from H. H. Ott, Gresham, Ore.
**Won shoot-off from J. F. Couts, San Diego; A. Ervast, San Diego and H. N. Williams, U. S. S. South Dakota.

Club at Watsonville.—A Blue Rock club was organized in Watsonville last week at a meeting of about thirty sportsmen in that city. The shoots will be held at intervals at the car shops of the old Watsonville Railway and Navigation Company on West Third street. It is possible teams will be chosen from the members of the club to compete with other clubs from neighboring cities.

The following officers were elected at the meeting: C. A. Palmtag, president; Harry Brewington, vice-president; E. B. Walling, secretary; Will Whitton, field captain.

THE FARM

HOW TO TELL THE BOARDERS.

One of the main purposes of the cow-testing association is to enable the dairyman to have a tester to keep the records, which in practiceit is almost impossible for the farmer to keep. Thetester will arrive at the farm in time for the afternoon milking, weigh the milk given by each cow in the herd, and take a sample of it to test for butterfat. The following morning the individual production of the herd will be weighed again. Later the Babcock test is used to determine the percentage of butterfat in each cow's milk. From these figures the tester estimates the amount of milk and butterfat given in a month by each cow and sets against this the amount of feed consumed. These records he leaves with the dairy farmer. By studying theserecords it may be determined which cows are not paying and must be culled out.

PUREBRED CALVES AT WEANING TIME.

Weaning time is one of the most critical periods in the calf's life, as well as one of the most important for the breeder. If the calf has been taught to eat grain before this time it may be taken over the crisis without serious results arising, yet we often see calves lose many pounds of flesh, much of their bloom and a great deal of the fresh, attractive appearance given them by a liberal amount of their dam's milk while undergoing this ordeal. Proper precaution should be taken to avoid this. I shall undertake to outline what in m y experience has proved the most practical method of handling the calves, trying at the same time to utilize the products of the farm.

Cattle breeding is a practical man's occupation and if any money is made every cent possible must be saved. The farm's own products must be made the basis of our feeds. While some things may very profitably be added which we do not grow, many of them are too high-priced to be economically used.

The calves when weaned should be separated, keeping the bulls and heifers apart. If it is winter time they should be given box stalls and not crowded. Two or three calves in a stall will do better than a larger number. All the profit of a breeding herd comes through the sale of the calves produced, so there are two essential things to bear in mind: one is to raise as many calves as possible, and the other is to make them as good as we can. The many little details are all to be looked after carefully.

Theheifers may be kept together in larger numbers than the bulls and get along better. A bunch of bull calves can not be run together and be kept in condition to be most attractive to intending purchasers. To the owner of the strictly high-class breeding herd making his bull calves good and giving them the opportunity of the highest development are of the greatest importance. In any herd the bull calf is the chief source of income, hence his proper development is essential.

Plenty of feed and plenty of exercise are a good rule. A bull calf shut in a box stall and not allowed exercise may put on more fat than otherwise, but this is getting too far from nature's way and he is liable to go wrong as a result. We have found that two calves given a box stall together will get along very well for awhile after weaning, but the most satisfactory way is to give each one a stall, feed separately and turn in a lot for exercise.

The kind of feed may be varied, but as a general rule corn forms the foundation with us. Silage made of well-matured corn is nearest to bluegrass of anything we get hold of. Give the calf all of this he will eat; add some corn and a little wheat bran to it and the calf will have a grain ration which should develop him properly. If an ideal ration is desired or if one has not plenty of corn and is compelled to buy feed, cornmeal, ground oats and wheat bran mixed equal parts by measure, with a little oatmeal added, are about what I would choose. Plenty of mixed hay, timothy and clover, is also necessary if the best feed is desired. If one has no hay and plenty of cornfodder is may be used to good advantage.

Water should be always within the easy reach of the calf, especially in warm weather. The box stall is just as essential in the summer as it is in the winter. The calf must be given some place where he can get away from the flies, so we give him the box stall during the day and a gross lot at night.

Just because the bull calf has a box stall do not forget to break him to the halter. Tie him up while he is yet small, the sooner the better, and have him so well broken that he can be led out of his stall and easily managed when a prospective buyer comes along. As soon as he is weaned he may have a ring in his nose which will enable one to handle him more easily, as well as to show him to getter advantage.

This weaning time has to come to all bull calves as a matter of course, but the longer one can put it off the better for the calf. Nothing has yet been discovered containing all the nutritive properties so nicely combined and evenly balanced as his mother's milk and the longer he can have that the better. The only thing better for him than his mother's milk is the milk of some other cow which gives more than his dam. Give him milk fat and keep it on him. Do not wean him until he is eight months old or more, and 10 months is much better than 8.

If the calf's horns are inclined to grow in the wrong direction do not neglect them but put the trainers on them at once. This may seem like a little thing, but it will help his appearance and may be enough to cause some man to buy him who would not take a bull with an ugly horn. Keep his stall well bedded, so that the manure will not be hanging on him in great big bunches. The more manure the farmer saves the better, but keep it off the calf and haul it to the field. One can not afford to curry the calves every day, so do not forget to bed them.

The heifer calves should be treated in the same way as the bulls, except that they can be run together in a large stable or shed if desired, where they will do just about as well as if kept singly. In fact, I would rather have two or three heifer calves together than to have them alone. In making show calves I think the best results are obtained where two or three are fed together. For producing the best breeding heifers at a minimum cost there is no better way than to keep them in a grass lot with plenty of shade during the summer season. In the lot there should be located a stable of some kind into which they can get in order to avoid the flies during the day; plenty of water should be provided and the feedbox should be well supplied at all times with shelled corn, some oats if convenient, or a little wheat bran. Corn is the main thing to have before them. In this way they get plenty of exercise and they show to better advantage before visitors. They can be turned with their dams mornings and evenings to suck, then returned to their grass lot, thus requiring but a small amount of labor to care for them.

When winter comes the heifers must have shelter and also be fed liberally, the same as the bulls. Keep them in dry and not too warm stables, giving them plenty of ventilation and a run in the lot every day the weather will permit. When they go out on grass after they are a year old it is well to put up a feed trough in their pasture and give them some grain until the grass gets good. If given only a little corn once a day they will be much the better for it and the further into the summer they are fed the better heifers they will be the next fall.—W. S. Robbins, in Breeders' Gagette.

Warranted to give satisfaction.

GOMBAULT'S
CAUSTIC BALSAM

A safe, speedy and positive cure for

Curb, Splint, Sweeny, Capped Hock, Strained Tendons, Founder, Wind Puffs, and all lameness from Spavin, Ringbone and other bony tumors. Cures all skin diseases or Parasites, Thrush, Diphtheria. Removes all Bunches from Horses or Cattle.

As a HUMAN REMEDY for Rheumatism, Sprains, Sore Throat, etc., it is invaluable.

Every bottle of Caustic Balsam sold is Warranted to give satisfaction. Price $1.50 per bottle. Sold by druggists, or sent by express, charges paid, with full directions for its use. Send for descriptive circulars, testimonials, etc. Address

RACE TRACK FOR SALE.

The Ukiah race track, located a little less than a mile from the Court House at Ukiah and bounded by the State Highway on the west, the county road on the south, and the Northwestern Pacific Railroad nearly the entire length on the east side of the track. The property consists of twenty acres. Fifty-nine good box stalls, good grandstand, fencing in good order, and one of the best half mile tracks in the state. An excellent winter track and an ideal place to work horses during that season. Plenty of adjoining drives for jogging horses. Two wells on the premises as well as water from the city water works, with tanks conveniently arranged for sprinkling.

This is the only race track in Mendocino county and the location of the county fairs. Ukiah is the county seat and has a population of about 3000, is in a most fertile valley in which all kinds of fruit, vegetables, hay, grain and hops are grown. Has excellent water; no malaria or mosquitos. It has paved streets, good sewerage, and splendid gas and electric light works. There are many standard and thoroughbred horses in this county and the people are a race loving lot. This property is offered for sale at a less price than adjoining property is held at. GUNCRAFT

By W. A. Bruette

A modern treatise on guns, gun fitting, ammunition, wing and trap shooting.

The theoretical side of the subject has been covered with a scientific accuracy which makes it an up-to-date book of reference, and the practical side of wing shooting, gun fitting, the master eye, defects in vision and other important questions have been treated in a way that will enable either the expert or the amateur to determine if he is shooting with a gun that fits him and how to decide upon one that does. It will enable him to ascertain why he misses some shots and is successful with others. The secrets of success in trap shooting, as well as the peculiarities in flight of the quail, the jacksnipe, the woodcock, the ruffed grouse, and the duck family, are illustrated by drawings and described in a way that will facilitate the amateur in mastering the art of wing shooting.

Harpers Weekly and The Breeder and Sportsman

$5.50 WORTH FOR $3.25

Breeder and Sportsman

One Year, 52 Copies, Regular Price $3

THE BREEDER AND SPORTSMAN is the oldest weekly journal devoted to the Horse west of Chicago, having been established in 1882. This interest, together with the Kennel, Gun, Fishing, Coursing and kindred sports receiving the most attention in its columns; together with Agricultural and Dairying Departments, under whose headings especial attention is paid to the breeding, etc., of Cattle, Sheep, Hogs, Poultry, and all other animals connected with stock raising.

As an advertising medium to Racing Associations, Horsemen, Stock Breeders, Manufacturers of Sulkies, Carriages, Wagons, Agricultural and Dairying Implements and Machinery, Sporting Goods, Fanciers, Stock Foods, and all others desiring to bring their wares to the attention of the classes to whose interests the paper is devoted within the field mentioned above, the BREEDER AND SPORTSMAN will be found indispensable.

Harpers Weekly

Six Months, 26 Copies, Regular Price $2.50

At no time has it been so evident to Americans as now, that the most important thing in the lives of all of us is the progress of the European War.

Next to your daily bread the war interests you most vitally. It may even come to be the most important part of your problem of living.

The periodical of greatest fundamental interest to you today is the one that can best report those phases of the war that come closest to your country and you.

Because of connections abroad and at home, HARPER'S WEEKLY is that publication.

As a critical commentary that presents inside facts, it is the necessary bridge for intelligent readers between the daily newspaper and the monthly review.

You want HARPER'S WEEKLY now. You can get it now on trial at a remarkable reduction.

Send $3.25 Now and Get Them Both

THIS OFFER is made to all who will send us $3.25 before March 31st, 1916, whether for extension of subscription, renewal of subscription or a new subscription. Address:

REID'S REMARKABLE RECORD

Adds Further Evidence of the Superlative Quality of

Peters SHELLS

Shooting at Registered Tournaments during the past four years L. H. Reid of Seattle, has made a phenomenal Record of consistent High Scores

1912—	2115 ex	2200, 96.14%,	Pacific Coast High General Average.
1913—	3843 ex	4005, 95.95%,	Pacific Coast High General Average.
1914—	2146 ex	2225, 96.44%,	Professional Average for United States.
1915—	2482 ex	2550, 97.33%,	Pacific Coast High General Average.
Total,	10,586 ex	10,980, 96.46%	

During the above four years, Mr. Reid has shot at nearly 30,000 Registered and non-registered targets, breaking an average practically equal to the above. In accomplishing these results, he used about two-thirds TARGET (medium grade) and one-third IDEAL (high grade) shells, all with

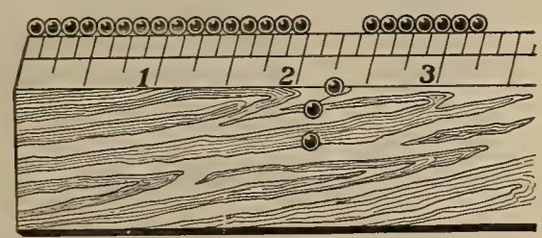
WINCHESTER

.22 Caliber



Automatic Rifle

This was the first and is the *last* word in .22 caliber recoil-operated rifles. It is the handsomest and cleanest looking rifle of this type, and besides is well-balanced, strong in construction and sure in operation. It weighs but 5¾ pounds, holds 10 shots and takes down readily. It is fired by simply pulling the trigger for each shot. This enables exceedingly rapid shooting with accuracy. A comparison with similar rifles of other makes will convince you of the wisdom of buying the Winchester. Sold by all dealers.

It Is The Peer Of All .22s

Every Good Gun Store Sells Winchester Guns and Ammunition

Is Shot Always SHOT?

DO YOU KNOW the shot that goes into your shells? If you use Remington UMC factory-loaded shells — as most prominent sportsmen do — you are assured of absolutely **uniform** shot.

Prove the superiority of Remington UMC shot for yourself. Cut open a Remington UMC shell and you will find that every shot pellet is of the **same** size. This uniformity meanss a closer pattern and greater penetration — the load sticks together. No one knows better than the experienced sportsman how essential uniformity in shot is whether afield or at the traps.

The Remington UMC ten-story shot tower at Bridgeport, Conn. (one of the tallest buildings in the State), is equipped with the most modern devices to turn out shot of the highest quality. From the expert mixing of the metal down through the various stages of sorting, tumbling, polishing cooling and grading, the whole process is under scientific supervision. It is largely in the grading of shot sizes that the superiority of Remington UMC lies since grading determines the uniformity of the product. Upon such painstaking effort — evident in this and many other features — has been built up the Remington UMC reputation for quality in arms and ammunition.

REMINGTON UMC

Remington UMC shot shells are made in a variety of loads. You will find standard combinations of loads and sizes at your dealer's. Look for the Red Ball Sign and ask for the Red Ball Brand.

TRAINING THE HOUND

A PRACTICAL TREATISE ON THE TRAINING OF FOX HOUNDS, BEAGLES, AND COON HOUNDS.

The system of training advocated is simple and effective, so that anyone who carries out instructions can easily develop a foxhound, a beagle or a coon dog to the highest state of usefulness or organize a pack in which each hound will work independently and at the same time harmoniously with the others. The subjects are: The Hound's Ancestry, History, Instinctive Tendencies, English and Native Hounds, Developing the Intelligence, Training the Foxhound, Voices and Pace of the Hound, Qualities of Scent, Manners, Training the Coon Dog, Coon Hunting, Training the Beagle, Forming a Pack, Field Trial Handling, Faults and Vices, Conditioning, Selecting and Rearing Puppies, Kennels and Yards, Diseases of Hounds and Their Treatment. The chapters on field trial training and handling are alone worth the price of the book, which is one that every man who loves the voice of a hound should read.

The book contains 224 pages, is clearly printed, nicely bound, and handsomely illustrated with bloodhounds, various types of English and American foxhounds, beagles and cross-bred dogs for 'possum and coon hunting.

Price, in heavy paper cover, $1; $1.50, postpaid.

BREEDER AND SPORTSMAN

VOLUME LXVIII. No. 13. SAN FRANCISCO, SATURDAY, MARCH 25, 1916. Subscription—$3.00 Per Year

The gray futurity winning gelding
JOHN WARWICK 2:17
Who is being fitted by W. G. Durfee for racing again after a rest of a couple of years.

Pleasanton Driving Park

PLEASANTON, CALIFORNIA

offers for service for the season of 1916 the following stallions:

THE ANVIL 2:02 3-4

Fastest trotting stallion ever offered for service in California, and fourth fastest entire trotter in the world

Son of St. Valiant Vincent 2:11¾ (by St. Vincent 2:13½ out of the triple producer Grace Lee 2:29¼ by Electioneer 125); dam Amy Smith by Emperor Wilkes 2:20¾, sire of Princess Eulalia (4) 2:09¼, etc.; grandam by Hambletonian 539.

The Anvil is regarded by Edward F. Geers as one of the very greatest trotters that he has ever raced. For five years the pair of Tennesseeans went to the races together and in that time were but twice unplaced, while winning a total of fifteen races, including the historic M. and M.

As an individual he is most pleasing, not too large or coarse in any way but smoothly and compactly made and "all horse" in every line. He is a perfect headed, pure gaited trotter, with the very best of disposition, and is destined to become a very great sire of trotting speed. His opportunities in the stud have been very slight as he has been retired from racing only since the close of 1914, and has but three or four foals now three years old. He was selected to head the stud at Pleasanton Driving Park not only on account of his great qualities as a race trotter, but because one of his first foals, Anvilite (2) 2:22¼, with a trial of ten seconds or more faster, is in every way the greatest colt trotter ever handled by C. L. DeRyder. The services of The Anvil are recommended to you without reserve.

Fee for The Anvil 2:02¾, $100 with usual privilege

Vernon McKinney 2:01 1-2

Fastest member of the great family of McKinney 2:11¼

Sire of VERNA McKINNEY (2) 2:13 (his first foal raced), fastest two-year-old pacing filly of 1915.

Son of Guy McKinney 37625 (by McKinney 2:11¼ out of Flossie Drais by Guy Wilkes 2:15¼); dam Maud Vernon by Mount Vernon 2:15¼, sire of the dams of Leata J. 2:03, etc.; grandam Mag by General McClellan, sire of the dams of Mack Mack 2:05, etc.

Vernon McKinney's racing career was not an extensive one but will long be remembered for the excellence of his performances, as his winnings include a Chamber of Commerce stake in time very near the record for that event at the time, and he is the fastest of all the McKinneys.

He is a horse of rare qualities in the way of individual excellence, almost ideal in behavior and temperament in harness or out. Since his retirement he has been a popular horse in the stud and our claim that he would prove a very great sire of pacing speed has been fully substantiated, his first foal to be raced being the season champion for the age and gait in 1915, a most excellent testimonial to his potency. He is a very sure breeder, his get are uniformly endowed with natural speed and the physical and mental requirements of modern race horses and find ready sale at most gratifying prices.

Fee for Vernon McKinney 2:01½, $50 with usual privilege

The best of care taken of mares in any manner owners may desire, but no responsibility assumed for accidents or escapes. Address for particulars

CHAS. L. DeRYDER, Superintendent, PLEASANTON, CAL.

MR BROODMARE OWNER, do you realize the importance of the simple facts that sixty of McKinney's sons and nearly fifty of his daughters are producers of standard performers? That the McKinneys won more money than any other family in 1915? That the McKinneys won the largest percentage of the futurities, both east and west, in 1915? That McKinney has more sons to sire 2:10 performers than any other stallion living? Keep these facts in mind, and remember that I offer you the services of

THE VERY BEST SON OF McKINNEY

CARLOKIN 2:07 1-2 EXHIBITION MILE 2:05 1-4

Champion Trotter and Champion Sire of Trotters in the West

Reg. No. 36548. Licensed Pure Bred, Cert. No. 41.

Mahogany bay. Height 15.1½. Weight 1060.

Sire of ESPERANZA (3) 2:09, only three-year-old to win every trotting stake for that age on the Pacific coast, and also the following colt performers:

The Lark (4).....2:09½	Carsto (2) 2:22½
Ethel D. (3).....2:11	Helen Belle (2).....2:22½
Carl (3) 2:14¼	Carlschen (2) 2:23
Doctor S. 2:14½	Santiago (3) 2:24¼
Johnny Dugan p (3)2:16	May Marian p (3)..2:24¼
Hermes (2) 2:16½	Carlrich p (2).....2:24½
John Warwick (2) 2:17	El Carbine (2).....2:27½
Nicola B. (3).....2:18½	Eileen C. (3).....2:29
Miss Carlokin p....2:20	Carlos (2) 2:29¼
Carleta (2) 2:20¾	Fulton G. (2).....2:30

Carlokin is the best son of McKinney not only by performance but by breeding as well, his dam being the famous producer Carlotta Wilkes, whose ten performers include four with records below 2:10, while his grandam and great grandam were also producers, by Alcantara and Clark Chief. He has demonstrated that he sires more early and extreme speed than any other stallion in California, and his get are courageous race horses, endowed with soundness and wonderful vitality.

Fee: $75 the season, usual privileges; details on request.

W. G. DURFEE 2019 South Figueroa St. LOS ANGELES, CAL.

Saddle Horse Breeders are Respectfully Offered the Services of the Magnificent young Stallion

Offers for service the best grandson of McKinney 2:11¼

WILBUR LOU 2:10¼

Record made in third heat of winning race as 3-year-old.

A world's champion as a yearling, record (1) 2:19½; unbeaten as a two-year-old, a famous futurity winner at three, and at six years of age the "sire of the day" in California, his first crop of two-year-olds including

NATALDAY (2) 2:13½

Champion two-year-old race trotter of the Pacific Coast, winner of Pleasanton and State Fair Futurities, 1915

FIESTA LOU (1) 2:25, (2) 2:22½, pacer, halfmile track records, separately timed in a race in 2:14½.
GOLDSMITH LOU (2) 2:29, trotter, breeder's record on halfmile track.
BILLIE BOYD (2) 2:30, trotter, breeder's record on halfmile track.
SELMA PALEY (2) trial 2:26½, trotter, public trial on halfmile track.

Colts and Fillies by WILBUR LOU Always on Sale

Wilbur Lou is by the great race horse and sire Kinney Lou 2:07¾, out of the triple producer Louise Carter (3) 2:24, grandam the famous Ingar, dam of 6 including John A. McKerron 2:04½, etc.

Breed to him for "Horses that will race." Fee for 1916, seventy-five dollars with usual privilege or money refunded at our option. Write for detailed particulars, all information gladly furnished.—Licensed Pure Bred, Cert. 23.

HEMET, CAL.

Derbertha Bells

Licensed Pure Bred, Cert. No. 226

NO. 60907 :: A. T. R. RULE 1.

Derbertha Bells, foaled 1911, stands 15.3, weighs 1200 pounds and is a solid dark bay or brown of magnificent conformation, style and trotting action. His breeding, too, is of the best, tracing 20 times to Hambletonian 10—5 through Electioneer, 5 through George Wilkes, 4 through Strathmore and 4 through Abdallah 15 (the big four of the sons of Hambletonian) and twice through his daughters; balanced by 18 crosses to Mambrino Chief 11—five of these through his greatest son Mambrino Patchen 58 (leading progenitor of the dams of trotting sires); 25 crosses to Imp. Bellfounder, 8 to Henry Clay, 8 to Imp. Trustee, 5 to Pilot Jr. 12, and sustained by such other famous broodmare sires as The Moor, A. W. Richmond, Black Hawk, St. Clair, Geo. M. Patchen, Grey Eagle, Imp. Glencoe, Williamson's Belmont, etc. His broodmare inheritance is incomparably great—5 crosses to Green Mountain Maid (dam of 9 including a world's champion and 4 sires including Electioneer, the world's greatest trotting progenitor), 3 crosses to Alma Mater (dam of 8 and 7 sires, including Alcyone and Alcantara), and one each to Miss Russell (dam of 8 including Maud S. 2:08¾ and 6 sires including Nutwood, the world's greatest broodmare sire), Dolly (dam of 4 and 5 sires, including Director and Onward), Beautiful Bells (dam of 11 trotters including 4 world's champions and 9 sires) and Minnehaha (dam of 8 including a champion yearling and 6 sires). These are the greatest mares of history in number of descendants in the standard list, to which add two crosses to Bertha (the only mare with 2 in 2:04½, 5 in 2:10 and 13 in the list; with two 2:05 producing sons, five 2:10 producing sons and two other sons with produce only a fraction slower).

This pedigree contains the blood of 20 mares (counting duplicates) with an average of 9 performers each and presents an aggregation of family founding sires and dams unexcelled, if not unequaled. Neither is it necessary to confine ourselves to the standard or even to the 2:10 list, or go into the musty records of the distant past for examples of the prepotency of these blood lines in the production of speed, but we can easily and abundantly demonstrate their value in speed of the first flight in the present generation. He has 1 two-year-old and 2 yearlings that stamp him as a sire entirely worthy of his superlative antecedents, as they (like their sire) are uniformly large, handsome, intelligent, tractable and of great speed promise. Come and see them and the new crop and you will breed to him. Fee $25 the season with return privilege. Tabulated pedigree upon request.

J. W. PENDLETON,
1601 Seminary Avenue, Oakland, California

Don't Make a Mistake by not Breeding to the Great

KING LILLY POINTER

Registered No. 5223.

By the great Star Pointer 1:59¼, 3183, dam Lilly S. by Direct 2:05¼, 20113,—two world's champions for many years.

Second dam the great race and broodmare Lilly Stanley.

King Lilly Pointer is a green horse with remarkable speed. With very little work he has paced a mile on the Los Angeles track in 2:08¼ with ease. He goes without straps and has paced a half in 1:01¼ in third position all the way around, and has easily stepped quarters in 29 seconds. In another work out he went to the quarter in 30½ seconds, the second eighth in 14 seconds, finishing the last quarter in 30 seconds, going the seventh eighth in 14 seconds,—a 1:52 gait.

He is a seal brown in color, 15.2½ hands high, weighs 1100, and his get prove that he will be a sire of high-class race horses.

Fee $35 cash with return privilege, or right of substituting another mare. Best of care taken of mares, but no responsibility assumed for accidents of any kind.

Address for particulars, tabulated pedigree showing that he is the greatest bred pacing stallion in the United States,

W. H. NESMITH, 4218 S. Figueroa St., Los Angeles, Cal.

King Lilly Pointer can be seen at Los Angeles Exposition Park. Phone Home 28446.

Expressive Mac 2:25½

A. T. R. No. 41513. Licensed Pure Bred, Cert. No. 1041.

SIRE OF

Clara Mac 2:04½; Vera Hal 2:05; Madam Mac 2:07¼

Only stallion offered for service in California to sire two in 2:05, three in 2:10.

Also sire of Eddy Mac (3) 2:29½, trial 2:13; Nellie Mac trial 2:09½ trotting, 1915, and others with fast trials

Son of McKINNEY 2:11¼ (sire of 27 in 2:10) and the greatest living broodmare, EXPRESSIVE (3) 2:12½ (dam of 6 trotters, 2 in 2:10) by ELECTIONEER 125. Ideal in color, size and conformation—seal brown, height 16½ hands, weight 1275 pounds. Permanently in the stud at my ranch three miles south of Selma at $25 the season, usual return privilege, or $35 to insure. Good pasture at $2 per month and best of care given mares but no responsibility assumed for accidents or escapes. Address for all particulars,

J. H. NELSON, Selma, Cal.

THE RACING OUTLOOK.

With the programs for various circuits in the east and central west announced and with those of the major meetings in the northwest already published, it behooves California associations to get a rustle on them and announce their intentions for the present season, unless they expect to attract merely the homeguards within the confines of their own counties. Horses cannot be trained on an uncertainty, and unless classes and purses for California events are arranged very shortly all the best horses in the state, or at least a very large proportion of them, will have been entered elsewhere. There are plenty of horses in training to provide good programs at every fair in the state even after the Grand and Great Western Circuiters have made their departure, but if many of the smaller stables ship out to the north and central west, as a number of them are planning to do, the shortage of horses for our own fairs will be felt very considerably. Scarcely a horseman in the state but prefers to stay here at home if possible, but if not assured of a certain amount of racing at an early date the most of them will pull for other sections.

We receive at this office many letters showing that the interest in fairs and race meetings is most excellent throughout the state, and that the sentiment in their favor is very strong and encouraging in almost every section that is adequately equipped for the staging of such events. The main trouble is to get some one at the head of things to push them along, and from many correspondents we receive expressions of regret over the failure of the late Pacific Coast Fair Association to accomplish its ends, or at least to live long enough to make an effort along that line. In numerous places there is a demand for a fair with horse racing, but they need an organizer of thorough experience and unflagging energy to push the thing through—the one particular in which the secretary of the fair association could have been of inestimable assistance. It is the lack of experience in a number of instances that has been responsible for the delay in the announcement of California programs, while the associations at some points have been waiting to see what the others intended doing. The concerted action that would have resulted in a harmonious circuit is the thing most sadly lacking at the present moment.

Program announcements may be expected at an early date from such places as Santa Rosa, Woodland, Sacramento, Dixon, Hanford, Bakersfield, Riverside, Ventura and Santa Ana, as well as from Pleasanton and perhaps some other points where the future seems in doubt. The associations or their representatives at these places have announced that fairs with racing would be given and we would respectfully suggest to each and every one that an early arrangement of their speed program will do much toward guaranteeing the success of their venture.

At Santa Rosa, which has all the natural advantages for staging one of the very best fairs in the west, a meeting of the directors of the Sonoma and Marin District Fair Association is being held this morning for the purpose of taking definite steps toward the staging of this year's show. Edward H. Brown, who as secretary of the association in former years and as manager of other county exhibits, including the great showing made by the Sonoma folks at the P.-P. I. E., has acquired much experience and achieved notable success, will in all probability be the guiding spirit of the association in its present project, and writes in a recent letter that there is a general desire for the fair and races which should make it an easy matter to secure the necessary local support.

Bakersfield is another point at which the movement is getting well under way in a manner that promises most excellent results. We announced some time ago on the authority of Mr. C. L. Claflin, the well known attorney who takes a deep interest in all affairs pertaining to the horse, that Bakersfield would be in line, and take pleasure in presenting the following confirmation of the same as conveyed to Secretary Paine of the State Agricultural Association by Mr. O. O. Barlow, secretary of the Bakersfield Board of Trade: "Your favor at hand and we wish to say that Kern county is going to hold an Agricultural Fair sometime in October; we will also have a fine string of horses here and expect some good sport. The Board of Supervisors are going to give a goodly sum of money for premiums on products of the county and while we are new at the game we believe that our fair will be worth coming to and shall endeavor to give all who attend a "run for their money." We will greatly appreciate any assistance that you may be able to render us. I might say that Mr. H. A. Jastro is very much interested in this matter and is giving it his hearty support, and that means much in this 'neck of the woods.'"

It is now assured that we will have a number of fairs, enough to make quite a little racing. We should now like to present to our readers some definite information as to what they will have to race for and will take pleasure in making the announcement of speed programs through our reading columns and, later, through our advertising pages. We have printed the programs from a number of northwestern points already. What association in California will set a pattern by announcing one for here at home?

DIXON CLAIMS DATE FOR FAIR.

As announced some time ago through these columns, the wideawake little city of Dixon is right in line for a fair and race meeting this summer, the matter being definitely settled by the following letter:

Dixon, Cal., March 22, 1916.

Dixon has decided definitely to hold a County Fair and Race Meet and would like to claim the dates of August 16, 17, 18 and 19, which we understand would bring us just before Woodland. We stand ready to send a delegate to any meeting or convention to arrange details such as purses and classes.

Yours truly,
HARRY McFADYEN.

Every man who has attended the May Day festivities in the Solano county town has been more than pleased with the way he was treated by the gentlemen in charge of the speed program, and highly gratified by the amount of interest and enthusiasm displayed in the doings of the trotters and pacers. Her advent to the circle of cities giving fairs and races will be eagerly welcomed, and we predict that the fair there will be a success from the start, as the people want it and will give it a hearty support, while the generous participation of horsemen is assured. We extend congratulations to all quarters over the action taken by Mr. McFadyen and his associates and assure them of our heartiest support in every way possible to make their venture a glowing success. The announcement of the speed program will be made by us as soon as arranged, which will be at no far distant day.

The book of Peter the Great, whose fee for 1916 was raised to a round thousand dollars after his purchase by Stoughton Fletcher, is not only reported full but a number of excellent matrons had to be denied service. These Indiana folks are foolish like a fox.

YOU ALL KNOW THE TUNE.

Oh where, oh where
Is the Year Book gone?
Oh where, oh where can it be?
Wid it's ricords so nice
(Savin' thim on the ice)
An' it's "of-fish-al" pidigree!

All winter I've tried
Fer me frind Mike McBride,
To find how his coltie was bred,
But colic an' gout
Have been rife hereabout—
Now Mike an' his coltie are dead!

Oh the stud ads I've wrote
Wid mesilf fer the goat
Fer mistakes made in ignerance drear,
While I looked every day
(Like a hoss fer his hay)
Fer vol-ume thir-ty-wan av last year!

It was promised in Jan.,
'Twas ixpicted in Feb.,
In March it was t'ought a sure ting,
Some day it will come
(Wid a whoop an' a hum)
Whin me nade av it's over, be jing!

PACIFIC COAST SPORTS ALMANAC.

Sportsmen who keep in touch with their world in general and with Pacific coast sports in particular will find the recently published Sports Almanac and Record Book of the well known local authority, William Unmack, a source of much valuable information. While world's records are given in almost all instances the doings of Pacific coast sportsmen are the ones most extensively exploited, and there seems to be almost no branch of professional or amateur sport that has been overlooked. The records include those made up to and during the season of 1915 and as every care has been used in compiling them from the most authentic statistics obtainable the degree of "reliability" attained by the publication is most pleasing. The harness horse department includes not only the more important world's records but those of especial local interest, such as the present world's records held by coast horses, the fastest performers of both gaits bred in this locality, and the fastest performances of the season last passed, other sports being represented in a similar manner. The book is on sale at newsstands at a very low price, or may be ordered direct from Mr. Unmack, 742 Market Street, this city, at a cost of twelve cents.

LEST WE FORGET!

Just a few little extracts from an A. P. dispatch from Chicago dated March 22: "Nine persons were killed, scores injured and half a hundred families made homeless by a freak storm which swept Chicago and vicinity this morning. . . . . Unusual and spectacular combinations of vivid lightning, driving sleet and snow. . . . . Trains covered with ice and sleet crept into their stations hours behind their schedules. . . . . The level of Lake Michigan was raised three feet and icefloes were hurled upon the shore. . . . . During the night the temperature fell rapidly," etc., etc.

Under these circumstances how true are those three lines of "Trotters" in our s. s. C. c. for March 15:

"Still.
"Winter lingers.
"In the lap of Spring!"

Oh, you little old climatic paradise!

Optime, famed as a producing matron throughout the world of the race track, was put to death at Kingston Farm several days ago after having been a sufferer from rheumatism for many years. Fifteen years ago she was imported to this country by the late Marcus Daly of Bitterroot fame, and a few months later was purchased at the Daly dispersal sale by James R. Keene for a consideration of six thousand six hundred dollars. She was then in foal to Melton, the laddie to whom she subsequently gave birth becoming known to fame as Sysonby, winner of fourteen races out of fifteen starts and standing second to the great Domino in the matter of gross winnings for a campaigner on the American turf, the amounts placed to his credit reaching the total of $184,438.

Marque on the Mudders

FROM OUR E. S. S. C. C.

What sort of a horse is best calculated to race in high form on wet, muddy, or sticky tracks Now this is a question that I have for a long time tried to solve, but never reached first base, so to speak, in arriving at anything definite. I have asked trainer after trainer for their version of the matter, but found that while some were willing to express themselves, their views as to why certain horses were naturally good "mudders," and others were not, were as opposite as the poles. I suppose I have been asked 'steen thousand times if this or that horse was good on a muddy track, but always refrained from expressing myself on a subject that I knew nothing about. The inquirers very often were financially interested in certain races which were to be decided over soft tracks, and they would quiz every horseman that they met in the hope of securing information that would help them to win. Rain has frequently caused the M. and M. and other big stakes to be postponed after several heats had been raced, and the concluding ones were certain to be decided next day over a soft track. The speculators were in the pool box, hook, line and sinker, and with feverish anxiety they were trying to pick on the most capable "mudder," and back him to save their coin. These regular Grand Circuit speculators are for the most part nervous men, and since they are always looking for a little the best of it, races which are postponed on account of rain work them up to a high pitch.

"How is your horse in the mud?" they will ask the drivers, and the reinsmen are generally unable to give a satisfactory reply. You see, horses are not worked out in the mud, and very seldom are asked to race under wet conditions, so the drivers are as much in the air as are the gamblers.

* * * *

Since I could secure no adequate information from the drivers of trotters and pacers, I sought the trainers of thoroughbreds, and from them learned nothing to enlighten me on the subject.

The Pirate of Penzance family of thoroughbreds are the most noted of all American runners, in respect to their pronounced ability to race in high form in the mud, so I inquired from the trainers what it was that made the Pirate family such noted "mudders." But the trainers disagreed. One told me that their penchant for the mud was due to their strong hind quarters; another said that they were a family of large footel horses; still another said that their feet were small and that it was the undersized foot that was best in the mud, that such feet didn't gather the mud and thus force the horses to carry excessive weight, etc., etc. So there we are up against a proposition that's simply guesswork, and that no one seems to know anything about.

When I asked Mr. Geers for his views, his reply was, to my way of thinking, the correct solution. He said: "A first-class race horse is superior to a second-class one on all kinds of tracks and under all sorts of conditions. Where two or more horses are equally matched, then certain kinds of footing might help one and handicap the other, but as a rule, the best horse is the best all the time."

In reckoning the ability or non-ability of horses to negotiate soft or wet tracks, many horsemen take the matter of action into consideration, but that, according to my observation, does not cut any figure. I have seen high-acing trotters that wore elbow boots plow through the mud and seem to like it, and I have seen the daisy-cutters do the same. Sometimes I have thought that big, stout horses were superior "mudders," and then I would be forced to change my mind upon seeing some light-made one step away with races. I saw Baron Rogers 2:07¼, who was a very low-going hobbled pacer, beat Nervolo 2:04¼ one day at Galesburg, Ill., over a heavy track, and that more than convinced me that there was nothing to my idea that the big, stout horse had the call. Nervolo was a gladiator, also free-legged, while Rogers was a slim-made horse, with his legs tied together. On good footing, Nervolo outclassed his opponent by seconds, but the hobbler was a "mudder" for fair. But the most remarkable race I ever witnessed over a heavy track was that won by Dan R., p, 2:01¾, at Columbus, O., in 1902. Mr. Geers had Fred S. Wedgewood, p, 2:05¼ in the race, which was postponed after Fred had won the first two heats and Captain Sphinx the third. Mr. Geers left for Hartford, Conn., that night to drive Lord Derby 2:05¼ in his match against Boralma, requesting M. E. McHenry to team Fred for him. It rained that night, and with the exception of a well-worn patch a position out from the pole, the track was very heavy. Jimmy Stahl was driving Dan, and McHenry saw to it that he was kept over near the pole in the mud, while Wedgewood's route was along the beaten path. With the mud flying and plastering Jimmy all over, Dan stepped three heats in 2:06¼, 2:06¼, 2:06¼, the six heats being at the time very close to the world's record. McHenry was supremely confident and was putting in his checques even on the sixth heat, for he argued that no pacer could step through such footing at that rate of speed and not weaken his mainspring. But Dan did the trick, and I have never seen another like it. Long ago I signified my admiration of the slender plebeian-bred Dan R. He was one of the greatest characters of the pacing type, being a horse of marked individuality. We used to call him the "clothes line" pacer, on account of his build, but let me tell you that Dan had a twelve-cylinder motor tucked beneath his projecting ribs, and possessed gameness of the sort which enabled Andy Jackson to win the battle of New Orleans. Sometimes he broke, and sometimes he was cheated with (not by his owner, but by some of his various drivers), but when he paced and was "meant," his backers were assured that no race would be too long for him and no clip would kill him off.

* * * *

Horses are very deceptive in regard to racing over heavy footing. Sometimes they will go a bad or indifferent race, and perhaps the very next time out they will fool everyone, including their trainers. I recall an instance of this sort in connection with Evelyn W., p, 2:00½. Bert Shank, her driver, never figured her worth a cent in heavy going, but had occasion to change his mind one day at Columbus. She was beaten at Detroit (Michigan state fair) by Earl, Jr., and the following week met the gray king and a good field in the Ohio city. The track conditions were similar in both places, the courses being heavy and the footing, while not muddy, was tough and tiring. Bert didn't think she had a chance until he went on and won. After the race he told me that he couldn't account for her showing on other grounds than that the Detroit race legged her up and made her familiar with the footing, and I know that he was conscientious in his statement.

* * * *

Trainers will tell you that there is nothing calculated to dull a horse's speed so much as a hard race over a heavy track. It seems to tear them to pieces, very often making them sore and crimpy, but the reverse is true in some cases. A horse that gets extremely tired in a race, either goes back in form or improves. It is, of course, a well recognized fact that in order to key horses up they have either to be subjected to a few miles right near their limit, or be made very tired by giving them repeats. The point is that when the reaction comes, which means when they are thoroughly rested from their work, they are ready to race for their lives. It is for that reason that some horses, after being made thoroughly weary from racing over soft tracks, acquire a flood of speed and energy when the reaction occurs.

I will sidestep the subject momentarily to remark that with some horses there is a period during the progress of their spring and early summer preparation when they possess a greater turn of speed than they do after contesting a number of races. The "bloom is on them," and while they cannot carry their lick over a distance of ground, they can fly for a short stretch. It may be readily appreciated that repeats in work-outs followed by heat racing dulls their keen edge. Were extreme speed the only thing sought for, the training process would call for brush work only, but so long as horses have to race heats (sometimes six or seven), the trainers of necessity must give them repeats in order to enable them to last through their races. And, by the way, were we racing on the dash, or even the best two-in-three system, we would not kill off or lame such a large percentage of our horses in getting them ready to race. But these observations are aside from the text of this article.

* * * *

Just at this point in my story Murray Howe came in for a "hoss talk," as he frequently does, now that he is divorced from the business, and, as "Doc" Tanner puts it, is chained to a desk and has to call his keeper when he wants the shackles removed. Murray, as all of us familiar with him appreciate, is one of the foremost students of gait and everything pertaining to it.

"It's an old subject," said Murray, "and one that I have heard discussed many times, but, like yourself, I found that the trainers disagreed as to why some horses race better over soft tracks than others.

"I believe that it is due to the manner in which their feet land on the track. Some horses land on their heels, others land almost flat-footed, and there is another kind that land on their toes. It's my impression that horses that strike on their heels are handicapped by soft footing, for the reason that they have to go through a double movement before they break over their toes. It is possible that the flat-footed horses (the kind that leave a clear impression of their feet on firm tracks, making very little slip or slide), are good 'mudders.' But it stands to reason that those which land on their toes are better fitted for soft tracks, as they immediately upon landing secure a good foothold and are thus able to lift themselves for a fresh stride. A lot of trotters and pacers have a slide of from two to four inches on good tracks, and it is easy to figure that soft footing would cause them to slip farther, making them sprawl and lose control of their gait."

This dope of Murray's sounds mighty good to me, and it is far and away the best analysis of the matter that I have heard.

* * * *

In June, 1914, when I visited Lexington, I found the trainers very much worked up over the condition of the track. They were divided into two camps, Mike Bowerman being the captain of the faction which fought for a hard, smooth and firm track, Johnny Dickerson heading the contingent which desired a track with plenty of loose surface on it. The hard track fellows accused Johnny of getting to track superintendent Mac Wethers, and inducing him to harrow the track and thus keep a nice cushion on it. And Johnny, who is some fighter when he espouses a cause, was free to admit thathe did want a cushion on the track. Said he: "When I came up from Memphis the track was like cement, and I feared to work fast over it less it break my horses down."

Mike Bowerman averred that a firm, hard track never was known to injure a horse, and that all the cripples he had ever seen or trained were made so over soft tracks; that all tracks with cushions broke out, making horses slip and scramble, thus playing hob with their legs. It was a merry war, and I rather enjoyed it till we had it served throughout the daylight hours and well into the nights. But poor Wethers! he was the goat, standing as he had to between two bombardments and getting hit from both sides.

There can be no doubt that Uncle Mike's ideas are correct so far as colt training is concerned. You cannot make speed with colts over soft tracks, and the smoother they are the beter it is for the babies. Their gait is not well established, and soft tracks are not conducive to speed-making. At Lexington nowadays the majority of youngsters wear rubber pads, and these, of course, protect their feet, taking up a lot of the jar and concussion. But I believe that Johnny was equally correct in desiring a cushion on which to train his aged horses, but the trouble is that you cannot have both sorts of tracks at the same time.

Mr. Geers is one of the most even-tempered men I ever knew, but there is one thing that will disturb the even tenor of his way, and that is a hard race track. He begins to suffer the moment he reaches one with his horses, and until he leaves he is out of sorts. Mr. Geers will tell you that hard tracks are responsible for more crippled, lame and sore horses than result from any other cause. He will tell you, too, that hard tracks cause the soundest of horses to shorten their strides, flinch and become rough-gaited. I look forward to the time when I can get the G. O. M. and Uncle Mike together so as to hear them thresh out the hard and soft track proposition.

* * * *

Leather pads do much to relieve the jar and sting occasioned to horses' feet by hard tracks, but still horses wearing this protection frequently are badly

punished by the flint-like footing of some of our race courses. You can see them falter and shorten up, and you can easily perceive that every stride they take is attended by pain. But it's really wonderful that our horses' feet withstand, as well as they do, the strain put upon them. Just think of the impact resulting from 1,000 or more pounds weight hurtling through space at a 2:00 clip, the feet having to bear the concussion as best they can! In order to appreciate what this concussion and friction means, just pick up a horse's foot after he has negotiated a fast heat over one of those hard clay tracks, and you will find that the shoe, especially the front ones, is so hot that you can scarcely leave your hand on it, the hoof, too, being abnormally hot. Were it not for the care given the feet, the use of hoof ointments, etc., they would quickly lose their natural elasticity and become dead and brittle.

* * * *

Sometimes I wonder how it is possible for shoes to stay on and nail-clinches hold when a trotter is racing on one of our hard tracks. Very often they do not, particularly where pads underlie them, for the leather gives, thus loosening the nails. I have seen shoes thrown thirty feet in the air, and recall hunting for one that must have been hurled clear over the outside fence, for it was nowhere in sight. Were a shoe at the force with which they are sometimes cast to hit a driver trailing in the rear, it would come pretty near finishing him. One day at Lexington Millard Sanders was driving one of the Sidney Dillon mares (I think it was Ruth Dillon 2:06½), and she cast a shoe which struck the sulky arch, making a dent over half an inch deep in the hard hickory. I remember another occasion when I was helping to look for a lost shoe, and when I had returned after an unsuccessful search, the boys laughingly told me that they had found it. You will scarcely believe it possible when I tell you that it was discovered hanging on the braces beneath the sulky arch. The driver said he heard it strike against the sulky, but never dreamed that it would catch and hold onto the vehicle like it did.

Some of our very fastest race tracks are constructed from yellow clay, which becomes very firm and hard when being made extensive use of. The presence of a great number of horses working over these clay tracks packs the soil, and even sharp tooth harrows scarcely tend to cut into them and make a cushion. After a night's sprinkling, the harrows are put on, but by noon the soil is again packed and hard.

Throughout the middle west our tracks are, for the most part, made of black soil, which lends itself readily to efforts to make it fast. Nail harrows are the sort used, and when followed up by floats, these black soil tracks can be made fast with very little effort or expense. Our sandy tracks, while not fast, are best adapted for wet weather, and, taken the year around, are the most useful that we have. They are at their best shortly after hard rains, thus making racing possible over them, when clay or black soil tracks would be out of commission.

CHANGE IN DATE AT PHOENIX.

We are advised by a recent communication from Secretary T. D. Shaughnessy of the Arizona State Fair, that the date for the big event this year has been changed to make it fall the week of November 13 to 18, several days later than originally planned. The change was made largely on the plea submitted by the cattlemen, who are among the most ardent supporters of the fair, to the effect that fall range work keeps them and their ranch and range outfits busy as can be right up to the first of November, when there comes a slight lull until winter sets in some weeks later. With the grass beef off to market, the calves in the weaning pasture and the poorest of the old cows fixed up on good feed the cowman has few worries for the time being and can take his family and most of the "boys" and hit the Phoenix trail. The election breaks into the favorite week this time, and in deference to the big interests involved it was deemed best to make the week's delay.

While a date a week or even two weeks earlier would have been most acceptable to campaigning horsemen in general, the change will work no especial hardship upon them. By that time the local fairs will be all cleaned up and out of the way, while trainers who have been east of the mountains will have ample time to get to Phoenix and rest their bones a few days before commencing the final battle of the campaign. Last year's fair was later even than this year's will be, and while the nights were a bit sharp there was no sickness contracted even by non-acclimated horses and there was quite a bit of very keen racing. As entries will not close until late in the season the fields should be very well balanced and some high class sport result.

By a recent ruling of the local courts, it is also within the range of possibilities that Phoenix may have pari-mutual speculation this fall, though we have as yet received no definite information on this matter. A test case has met with a favorable decision, and were the iron men put in operation horse racing in Arizona would receive a wonderful impetus. The outcome will be awaited with much interest.

BOARD OF REVIEW MEETS MAY 2.

Hartford, Conn., March 14, 1916.

A special meeting of the Board of Review will be held at the Murray Hill Hotel, New York, N. Y., at 10 o'clock A. M., on Tuesday, May 2, 1916, by order of the President.

All communications intended for the consideration of the Board at the May meeting must be forwarded to the Secretary not later than April 18.

The Board of Review is empowered to act in place of the full Board with the same authority and jurisdiction, and at the above meeting will consider business arising in each and all of the districts.

W. H. GOCHER, Secretary.

Vernon Airs a Grouch

THE EDITOR IS THE FALL GUY

"And how is every little thing?" queried V. McKinney Esquire Sunday morning between showers at Pleasanton. "I lamped you coming down the driveway a few minutes ago and hoped you'd stop for a minute before you tied in with some of these Indians aroud here and made a getaway. What's the matter with you, anyway? You don't look so worse for a sawed off runt but you're going awfully bad gaited. Ankle? That's what I thought when I saw you toddling down this way. It didn't seem to be high in your hip and it oughtn't to be corns because God knows them shoes don't look like your feet hurt 'em, and let me tell you this one thing: You may have a bum joint low down but you got a lot of birds skinned in one respect, you ain't never going to hit them knees, hobbled or free-legged. Let me wise you up on one other small matter, Bill, and then I'll take up my own troubles. You're too blamed fat to start training even if you got sound, and what I'd suggest is a lot of slow miles, for you ain't never going to step no fast heat with all that grass belly you're carrying. Plenty of light work the wrong way of the track for a month and you'd do to speed up a little, but speed would be mighty bad for you right now, bo, mighty bad.

"However, that ain't what I wanted to see you about. What got me on the prod is the things some of you guys that make a bum living writing about things you don't know a damn thing about have said since you and me had our last little pow wow together. Some overpaid space spoiler up at Sacramento a few days ago said in the paper that has the hard luck to support him and his affinity that if White Sox won the Chamber of Commerce (and you can get a long price on her in my book right now even if she is my cousin and a perfect lady so far as I know) she would be the first California horse that had figured prominently in that stake for fifteen years, or since Bonnie Direct won it in 1900. Ain't it hell, the way these wisenheimers scatter wisdom along their path! Who do you reckon does he suppose won the C. of C. some few seasons back, say in 1911 to be exact, if it wasn't a California pacer? I'll break it to this guy right now that it was a bay horse foaled and trained in California. His first name was Vernon and the last part was McKinney, me being the identical son of a sea cook.

"Now I know that most of us Native Sons is accused of being over-enthusiastic in our remarks concerning everything in California and everything raised here, and this guy don't have to take my word for it that I win this here Michigan classic in 1911. Any of the books prove it beyond any doubt, but if he wants some of this 'viva voce' testimony, as that friend of yours in Chi would call it, refer him to that Yank highliner that invaded the New York sale the other day and took away all them children of that second cousin of mine that lives down at Walnut Hall, Walter Cox his name is. 'Long Shot' they call him for short around the big line tracks, but believe me, Bill, you wouldn't dare print the things I've heard this guy called when the ham mocking the phonograph had some heat in his system and plenty of time and the inclination to do the subject justice. Let this Sacramento boner ask Walter if I won the Chamber of Commerce in 1911, providing information is what he is looking for and he can stand to have some new language added to his limited vocabulary. Of course a lot of other fellows could tell him so, too, but I know Coxey recalls the occasion some forcible. You see him and Branham Baughman fraled the everlasting tar out of me and Havis early in the week at Detroit and Longshot and his friends had some few tickets on Branny for the Chamber of Commerce. Some few is conservative figures. Havis and me buggy ride in fifth place in the opening skirmish and then we springs it on 'em for three in a row. What become of all them nice bright Branny tickets? Durned if I know what Long Shot and his gang really done with 'em, but they don't cash 'em by several degrees, the pay out all coming on boards bearing my personal monicker.

"Once again before we leave this sad subject let me remind the same trotting horse Solomon that two years later another California pacer figured quite prominently in the same event, so blamed emphatically that Frankie Bogash 'fils,' as they say in France, had to hang up the stake record to win. The runnerup was a lady and a relative of mine, Leata J. by name, born in my county and educated at the same little red school house, if you ask me, the one in the edge of Stockton. Still we ain't never figured prominently in the C. of C. since Bonnie Direct's time, fifteen years ago, huh? Where did this hick ever tend bar, anyway?

"One more kick and I'm through. You know them eastern bull peddlers had me up in Canada here a while back until you and me broke it to 'em where to head in, and now they are all circulating a story that John Porter has booked Izetta R. to me. You know her, that red-haired Pactolus woman that used to live with Directum Kelley after they both went east. Why do I say they both went east? Because that's just what I mean. Kelley, he was raised right here and this skirt lacks a lot of being a bean eater by birth, having been born in Nebraska. DeRyder used to have her and can tell you all there is to know about her, anyway, so cut out this query stuff. Like I was saying when you cut into the good going, this couple took to each other right smart down east, and when the authorities got through investigating the matter they settled on Kelley as the father of the child, which develops gradual to the point where he becomes Directum I. 1:56¾, chief kicker of the unpaced sidewheelers. Believe me, Bill, this little red runt is quite some speed merchant in his own generation. Hearing I was going to be in Winnipeg this man Porter figures up of course that I was the logical candidate for Izetta's affections now that all her former steadies is either dead or Renoed, so he announces the forthcoming nuptials on the strength of what he reads in the papers. Then he dreams at night about owning a colt that would sift sand in Directum I.'s nose on the best day he ever saw. Then he wakes up and finds I ain't in Canada at all, and naturally he feels pretty sore, but I ain't to blame, am I? That's where you guys come in, and believe me if that woman jumps me on a breach of promise charge or for annexing her affections under false pretenses I am going to have the whole outfit subpoenaed and teli the exact truth about the entire matter. I've got troubles enough of my own without having a lot more wished on me by a bunch of solid topped reporters.

"You looking for DeRyder? There he is up at the end of the barn, just come from looking at them cows he bought. Talk about your cow barons, keep your eye on the big boss. He's got cows on the brain and if they give him half a chance he will have outfits like Tom Pollock's or Dave Wallis's or Harry Cowell's on the run in a few years. Go on, beat it. He wants to show you that two hundred dollar bull calf and I've talked myself out and relieved my system of a big load, so don't mind me. Just remember what I told you and drop in the next time you come around. I might be in a better humor then. Adios."

Trotters Are Popular at Santa Maria

Santa Maria, Cal., March 16, 1916.

All the horsemen around here were greatly disappointed to hear of the failure of the California Circuit being formed. It seems to me that there are enough men interested in the harness horse in California to support a circuit and I am sure there are enough horses. Every year enough horses are shipped out of California to the races to support a circuit here at home. The ships in California are shorter than you will find in any racing section. The cheapest ship a stable had all last summer was by express from Los Angeles to San Francisco. As it is California horses that raced away from home contribute rather heavily to the railroad companies.

The interest in the harness horse is not on the decline in California as some people think but is rather on the upgrade. A few of the most prominent patrons have dropped out but there are a greater number of owners of harness horses in California at the present time than ever before.

Sunday, Feb. 27 we held matinee races and a little broncho busting mixed in which drew a crowd of about 800 people in a town of 3,000 inhabitants. An admission of 50 cents was charged as this is the only means of support the track has.

The main attraction was the match race between Mono Ansel and R. W. The horses were both raced last year, Mono Ansel through the Colorado-Wyoming Circuit and R. W. through the Kansas Grand Circuit. Both horses met at Albuquerque in the 2:24 class. Mono Ansel in winning the race beat the favorite R. W. rather handily. After returning home the owner and trainer of R. W. were not quite satisfied with the race in New Mexico and finally arranged a match race with Mr. Young, the owner of Mono Ansel for $500 a side, best three in five. The rain Saturday and Sunday morning left the track rather soft and slow but Mono Ansel was again returned the victor in three straight heats. The winner acts as if he would become a very useful race horse in another year's time. He is an exceptionally nice mannered stallion and is eligible to the 2:20 class. He has been a mile in 2:12½ over a halfmile track and in 2:07 over a mile track. Has plenty of speed and on the halfmile track here has shown eighths in 14¼ seconds and quarters around 30½ seconds. He goes free legged and uses only quarter and coronet boots. W. L. Young, the owner, has refused several nice offers as he intends racing him this year.

There are several other horses being prepared here for the races. C. W. Short is working several good prospects. The trotting stallion Skidoo Wilkes and several of his colts are doing very nicely. A short time ago he purchased the little pacing gelding Silver Tips, a full brother to Chorro Prince 2:08¾. He appears to have the makings of a fast pacer, having been quarters in 30 seconds over this track, and with any kind of luck should do to race this year.

Frank Treanor is working both of his fillies by The Proof. The bay filly Catherine T. which Chas. Spencer worked some at Pleasanton last year is coming along very nicely and looks as if she would be able to fill her engagements this fall. She worked this track the other day in 2:30, the last half in 1:12, last quarter in :34 and eighth in 16 seconds, which is very encouraging considering the amount of work she has had.

Harry Steinhart, the popular "mixologist" of the Hotel Bradley, has his mare Queen Rapallo in nice shape and expects great things from her this coming season. He has an eleven months old colt out of this mare by Nuristo which is nicely broken and does nothing but pace. His Proof colt from Nelmonia is turned out but showed he could trot last summer with no work at all.

James Hall, the "veteran reinsman" of the valley, is working two very pleasing prospects. His three-year-old filly by The Proof is developing very fast and is nice mannered. He also has a four-year-old by Rapallo which resembles his sire both in appearance and action.

I have a brown filly by El Zombro and out of My Trueheart 2:19½ which has trotted this track in 2:30, with halves in 1:10 and eighths in 16 seconds.

Blosser's Pointer's Daughter, Finley's Pope-Hartford, and Young's Ben Corbett Jr. are being worked slowly and will be prepared and raced by W. H. Finley, who had a successful season last fall through the Colorado-Wyoming Circuit.

So you see the harness horse game is in a very flourishing condition in Santa Maria and we would like very much to see a circuit formed this coming season in California.

Yours very truly,

WM. MEAD.

NEWS FROM THE BLUE GRASS.

Lexington, Ky., March 11.—The sudden and unexpected death of Eugene Bowerman the past week has cast a gloom over the entire colony of local trainers and horsemen. Bowerman was taken ill Sunday afternoon when about four squares from his home. After going into the house his condition did not improve, but he decided to stay for the night. Upon attempts made to arouse him the next morning he was found to be dead. The popular young trainer had been in bad health for some months past, but was apparently much improved recently and his death was unexpected. The death of his young wife, Mrs. Etta Wells Bowerman, some few weeks ago, also preyed somewhat on his mind and added to the seriousness of his condition. He is survived by his father and mother, Mr. and Mrs. Mike Bowerman, and one son, Michael Bowerman Jr., one of the brightest young fellows in the city. To all of these the deepest sympathies of horsemen are due.

The deceased was 45 years of age, and was a horseman by blood, as well as by profession. All his life had been spent with trotters, and he was accounted one of the best trainers at the Lexington track. He never cared to race horses, but spent his time in developing colts, principally. He also worked his horses with a view to future usefulness in racing rather than to see how much speed he could get or how fast a mile he could work his charges. For several years he has worked for his uncle, George Bowerman, and since the illness of the latter has done practically all of the training. Assisted by the sound judgment and wisdom of the older horseman, the combination was a peculiarly successful one. Announcement was recently made that George Bowerman, wishing to be relieved of all business cares, would retire and that Gene and his father would train together this season. This new arrangement had just been entered upon.

Gene Bowerman had developed many fast trotters and pacers in recent years, among which were the sensational futurity winner, Manrico (3) 2:07¼, to which he gave his early lessons; Reusens 2:07¼, an M. and M. winner, that he trained the season before winning the Detroit classic; Sister Spier, that he gave a record of 2:07 the past season; Lulu Arion (4) 2:08¼, that he trained as a yearling and two-year-old, and at five drove a mile in 2:06¼; Alma Sedley, that he worked in 2:11½ at three early in the season; Don Pronto 2:02¼, the good race pacer and former champion five-year-old stallion; also a host of others. The funeral services were held at the residence Wednesday afternoon, the following friends acting as pall-bearers: James Snell, John Davis, Roy Miller, W. T. Griffy, J. A. Willis and Dr. E. W. Hagyard.

* * * *

Roy Miller received the past week from W. W. Estill, Elmwood Farm, the two-year-old chestnut filly, Rosa Watts, that he will train the coming season. The filly is said to be quite a nice trotter, being trained a little the past season by Rodes Estill. She is a daughter of General Watts and Rosa Lake (2) 2:22¾, by The Bondsman, making the filly a nicely-bred one, especially as she runs in the female line to the family of the champion yearling Airdale, etc. Rosa Lake was trained by Miller and given her record by him when he conducted a public stable here before working for the Dromore Farm.

Walter Cox has not stopped his purchase of high-class trotters, for he concluded a deal the past week for the four-year-old trotting mare, Busy Lassie, in the stable of H. C. Moody, paying for her the reported price of $6,000. The mare received practically all of her training the past season, being hardly broken at the beginning and trotted a mile last fall in 2:09¾. She is a nicely bred one, too, being a daughter of the champion sire, Peter the Great 2:07¼ out of Miss Busy by Clay, son of Electioneer—second dam by Baron Wilkes 2:18, then running back to the great brood mare, Tidy, by Mambrino Chief, from which have come a number of high-class trotters. With Mabel Trask, a sensational prospect by Peter the Great, in his stable, it is not likely that Cox will attempt to stake Busy Lassie the coming season, and with another year's training she should prove one of the star stake trotters of 1917. The mare was owned jointly by Moody and Mr. W. N. Reynolds, of Winston-Salem, N. C.

* * * *

Hugh Moore, the Georgetown horseman, whose principal business is hardware and stoves, but who always handles a few horses on the side, bought the past week from Ed. D. Smith, of Scott county, a three-year-old brown colt that is a brother of the good Virginia trotter, Doctor Peter 2:17¼, and the fast pacer, Sheriff Peter (3) 2:24¼. Their dam is by the good trotter Dr. Sparks 2:12¼, that was a few years ago one of the best trotters racing. The colt is barely broken, not even having been named, but gives every evidence of becoming a fast trotter with a little training.

* * * *

James Snell received the past week from Lester Darnaby two promising young trotters to train. They were a two-year-old colt and a yearling filly, both by the futurity winner Siliko (3) 2:11¼, out of Susie Darnaby, by Todd 2:14¾. Snell has trained most of the produce of Susie Darnaby, which ranks as one of the leading daughters of Todd. Her first foal was Dorothy Gay 2:10¾, and the second Peter Hopeful (4) 2:09¾, both of which received their early development in Snell's hands. Susie Darnaby is also a sister of Sir Todd 2:10¾, and a half-sister of Larabie the Great 2:12¾.

Lawrence Rogers, who has been superintendent at the farm of J. L. Dodge for the past year, has resigned and his place is being filled temporarily by W. H. Harrison. In addition to his duties with his stable, Harrison now has his hands full. Among other things Harrison is having the old track shaped up, the course not having been used since the place was owned by Mr. Metcalfe. This track is to be used principally as a training place for the yearlings before being brought to the track. The Dodge horses will probably be brought up from Mr. Dodge's winter quarters in Georgia about April 1.

Stoughton Fletcher, of Indianapolis, who recently became the owner of the world's greatest sire, Peter the Great, is a visitor in Lexington, having come down to see the horse and to attend to some other matters. At this writing he has made no purchases.—Western Horseman.

WASHINGTON STATE FAIR RACE PROGRAM ANNOUNCED.

Secretary Frank Meredith has prepared the program of horse races for the forthcoming Washington State Fair, which will be held at North Yakima September 18 to 23. There will be but five days devoted to horse racing this year, as automobile races will be held on Monday, the first day of the fair.

The program which follows is well balanced, and it will give all classes of both harness and running horses a chance for some of the money. The 2:08 pace, free-for-all pace and 2:12 trot are best three in five heats. All of the other races are on every heat a race plan.

All entries close June 1, except the 2:15 and 2:20 paces and the 2:15 and 2:20 trots, which close on September 4.

TUESDAY, SEPTEMBER 19	
2:15 Trot, every heat a race	$600.00
2:15 Pace, every heat a race	600.00
⅜ Mile Run	75.00
⅝ Mile Run	100.00
WEDNESDAY, SEPTEMBER 20	
2:25 Trot, every heat a race	500.00
2:08 Pace, three in five	700.00
½ Mile Run	75.00
⅞ Mile Run	100.00
THURSDAY, SEPTEMBER 21	
2:25 Pace, every heat a race	500.00
2:12 Trot, three in five	700.00
⅜ Mile Run	75.00
⅝ Mile Run	100.00
FRIDAY, SEPTEMBER 22	
2:30 Trot, every heat a race	500.00
2:20 Pace, every heat a race	500.00
2:10 Pace, every heat a race	600.00
1 Mile Run	150.00
SATURDAY, SEPTEMBER 23	
2:20 Trot, every heat a race	600.00
Free-For-All Pace, three in five	700.00
½ Mile Run	75.00
⅞ Mile Run	100.00

Notes and News

The Montana Livestock & Casualty Insurance Company, with an organized capital of $250,000, has been issued a certificate by the insurance commissioner to do business in California, and will be represented by Mr. Douglas Keith, whose office is in the Royal Insurance Building, San Francisco.

◈ ◈ ◈

The latest news from Ontario, Can., is to the effect that Bion Shively shipped all his summer clothes to Howard Perry, at Shreveport, La., receiving in exchange a certain well known muskrat fur overcoat. The exchange of garments was just the thing for both parties, and Mrs. Shively called By her little "Teddy bear," after seeing him the first time in his sheep's wool-lined boots and the aforementioned fur overcoat.—Horse Review.

◈ ◈ ◈

Bernice R. 2:07¼, bred by A. B. Spreckels of this city and now owned at Curles Neck Farm, Virginia, has foaled a fine bay filly by The Harvester 2:01, the aristocratic little lady having born on March 4 at the Billings establishment. Bernice R. is the fastest member of the get of Dexter Prince and was driven to her record in 1912 at Fresno by Charley Spencer, the pair winning five out of six starts that season. Save for the mud at Salem they would probably have made a clean sweep.

◈ ◈ ◈

Expedio 2:09¼, the good trotting daughter of Lijero that was a familiar figure on local tracks only a very few seasons ago, has been sent to Pleasanton from Sacramento by Frank Ruhstaller and has been mated with The Anvil. She is a fine type for a brood mare and when bred to stallions such as Anvil should throw a very high class foal. Nobody would appreciate a world beater any more than Mr. Ruhstaller and if he should get one nobody will begrudge him his good fortune.

◈ ◈ ◈

Should auld acquaintance be forgot and never brought to mind? Say not so, and then guess where this report comes from: "The weather was wretched yesterday at ——— and very little of the racing could be seen owing to the mist which enveloped a great part of the course." No, gentle reader, you missed it. The item was not an old one telling about something at the exposition race track in 1915 nor yet at Bay District or Tanforan in days gone by, but is taken from an English contemporary's description of a day's racing recently at Gatwick, so you see there are others.

◈ ◈ ◈

Anvil 2:02¾, according to our eseemed sole surviving Chicago contemporary, is the fastest stallion that ever stood in California. Put in the word trotting before stallion and we may stand for it, or do you suppose that the hard winter has gone to the head of the Chicago editor to the extent that he no longer regards a pacer as worthy of mention as a stallion? As pacers are welcome on their stallions for service pages, however, the latter surmise seems hardly so well grounded as one to the effect that the item as it appeared was merely one of those things alluded to by Magnus Flaws as a fox paw, whatever that is.

◈ ◈ ◈

Marvin Childs, who wintered at Omaha and as a consequence has been missed greatly by his many friends in this particular section of the country, has shipped to Indianapolis to put the finishing touches to the prep of the horses he will race this summer, mostly the property of Edward Peterson of Omaha. The five taken to the Hoosier training center are Sad Thoughts (3) 2:06¾, Ben Earl (4) 2:11¼, R. C. H. 2:13¼, Major By By 2:19¼ and Tom Smith 2:11¼. Marvin believes that the Major and the Nebraska-bred gelding will stand up this year and both are better than 2:10 trotters if they do, while in R. C. H. he has one better than the average from what he showed last season. Marvin had him at Pleasanton and worked him there in 2:10 before the owners sent for him to race on the minor tracks. He was a good consistent horse in other hands and for Marvin he ought to race very well indeed.

◈ ◈ ◈

James S. ("Budd") Murray has been renominated for the office of mayor of Chester, N. Y. Mr. Murray has filled the position so satisfactorily during the past several years that the people of that thriving town would not consider his retiring. "Budd" is a hustler and takes a great deal of pride in Chester. Brook Farm, where he resides, is a model-kept place, and one of the finest racing plants in the United States owned by an individual.—Horse Review. Now that the secretaries are doing their dingedest to surpass each other in the way of conditions, why not have some enterprising eastern or central western association hang up a purse open to horses driven by mayors only and have one really "honorable" horse race? Mayor Murray has plenty of material to select from, Mayor Shank has a few droves of trotters and pacers, and His Honor Eddie Hansen usually has one or two somewhere about the place or can borrow anything in the International stable. Who else is eligible under the mayoralty clause?

Mildred Togo (3) 2:11¾ has foaled a nice filly by Mahomet Watts 2:08¼ and has been bred to The Anvil 2:02¾. She was a highclass trotter at the juvenile stage and should throw a lot of speed to the cover of either of the stallions mentioned.

◈ ◈ ◈

Madam Mac, who has been among the very best of the ice pacers this season, certainly "did herself proud" the other day at Lake of the Isles when she stepped the second, third and fourth heats in 1:01½, 1:01¼ and 1:01½.

◈ ◈ ◈

On the first of the present month at Piedmont Stock Farm, Huntsville, Alabama, the gray stallion Re-Election 2:27¼ was put to death as an act of mercy, after having achieved a greater success than any sire owned in that portion of the south. Re-Election was foaled in 1888 at Palo Alto the property of A. J. Alexander of Kentucky, who had sent his dam to be bred to Electioneer. Lady Russell came rightly by the color she transmitted to her first foal by Electioneer, as she sprang from the family of Pilot Jr., but her next foal, Expedition 2:15¾, followed the color of the paternal side, being a brown or dark bay, from which Mr. David Hollins, given the preliminary dope that goes with it, would doubtless deduct that the star of Lady Russell was in the ascendancy at one mating while that of Electioneer ruled at the time of the other. Re-Election begot forty-three standard performers, mostly trotters, as well as the dams of quite a number of more than ordinary caliber, including the good trotter King Clansman 2:06¾, campaigned with considerable success in late seasons by Richard McMahon. His death leaves his brother Expedition the oldest living son of the one-time monarch of Palo Alto.

Bob Sebastian, who has spent the winter with his home folks at Hemet, leaves in a few days for Omaha to get the Dennison horses in shape to race on the western circuits and will take along a couple that he has just acquired, the former Hemet Stock Farm trotters Miss Gailey and Kinney de Lopez, going into the four figures on each one of them. Miss Gailey, who has had a year's letup after having been a most excellent trotter as a three- and four-year-old, has matured into a most pleasing mare and acts like she was good for quite a little better than two-ten before the season is far advanced. She is the best daughter of George W. McKinney, while her dam is that sterling producer Lady Zombro 2:24¾, whose produce have played such important parts in the racing of the Pacific coast colt stakes in recent years. Kinney de Lopez, a handsome son of Kinney Lou 2:07¾ and Betsey Direct 2:25¾, is one of the most perfectly gaited trotters in the land and has long been regarded by his former owner, Budd Doble, as one of the very fastest horses that veteran has ever ridden behind. He has had some trouble behind in former seasons that interfered with his usefulness but Bob writes that he is sound now, in which case he ought to be one of the best green trotters in the west this year, as the two minute gait is no measure of his brush. Miss Gailey was purchased for the account of Thomas Dennison, while Bob assumed title to Kinney de Lopez for himself. Jimmy Ronin has been keeping the Dennison and Sebastian horses at Omaha in shape all winter, so that when Bob arrives at the Nebraska trotting center he will find everything ready to go right ahead with. He has done nicely with the Dennison horses ever since becoming identified with them and will no doubt roll up some profit both for the owner and himself again this season.

Doble Resigns Management at Hemet

Letters received at this office this week from Messrs. W. F. Whittier and Budd Doble announce the resignation of the latter from the vice presidency and general managership of the Hemet Stock Farm, of which he has been the guiding spirit for the past four or five years. Mr. Doble has not made his future plans known, but from personal conversations during the winter with the editor of this paper it may be stated that the first thing to be sought by him is a complete rest of some weeks or months, absolutely free from care and responsibility of every kind.

While Mr. Doble's resignation, which probably means his retirement from active participation in the trotting horse industry, is a matter for general regret, it occasions small surprise to his more intimate friends, who have known for some months that this action was under consideration, the veteran champion maker having an ardent desire to make a change to some less strenuous pursuit. Not wishing to continue longer in the sulky he also felt himself under obligations to Mr. Whittier to make way for a man who would not only look after the farm's affairs in general but also do the bulk of the training and practically all of the race driving, two things of which Mr. Doble believes he has had about his full share in the course of the nearly three score years that he has been in the business. Since 1912, when he achieved such signal success with Wilbur Lou (3) 2:10¼ as a three-year-old, winning two of the greatest colt races ever contested on this coast and hanging up a then world's record for a five heat race for the age and gait, Budd (as we all still love to call him) has delegated a good deal of the training and race driving to his capable assistants, devoting the greater portion of his personal activities in those lines to his particular favorites among the older horses.

Under the management of Mr. Doble, Hemet Stock Farm has achieved a worthy standing among contemporary establishments of the kind throughout the land. The farm itself is one of the show places of southern California and is visited by large numbers of people annually, confined by no means to the "profession," as the general public find almost as much of interest at Hemet as does the trotting horse fraternity. The get of its stallions and the produce of its mares have made history in recent seasons in the western colt stakes, achieving the fame that comes to holders of world and coast records, while during the season last past the winnings of its great three-year-old trotting filly, Allie Lou, were exceeded by those of but one other campaigner of the age and gait, the incomparable Mary Putney. (Incidentally we find it impossible to fail to note that both are by grandsons of McKinney with strong infusions of the blood of Nutwood Wilkes on the maternal side.)

With these things to look back to as accomplished at a time of life at which many men are in the discard, Mr. Doble may well feel that his "valedictory" as a reinsman has been delivered with striking success and that the vacation on which he is soon entering has been well earned. It is not likely that he will leave California, but wherever he goes, and in whatever undertaking he assumes when his playday is over, he carries with him the very warmest and heartiest of best wishes of a circle of friends and admirers whose name is legion. Mr. Whittier, in his letter to the editor, pays his tribute to his retiring manager in these words: "I am very loath indeed to accept Mr. Doble's resignation and part with his services as he has been very successful with the farm and its horses, using every care to bring out the best that is in them and endeavoring generally to make the farm a success. He has been with me over four years and has been faithful, thoroughly reliable and competent in every way, so that as I said before, I am sorry indeed to part with him."

Mr. Whittier also announces Mr. Doble's successor, who is none other than that highly successful southern California horseman, Fred E. Ward of Los Angeles, who for the last several seasons has taken rank among the best trainers and drivers of the younger generation of the fraternity. With horses owned by himself and his northwestern patrons, the Porter Brothers, Ward has been a hard one to head in any ordinary and some extraordinary company both here on the coast and in the central west. Last season, racing principally over halfmile tracks and for very moderate purses, he won nearly nine thousand dollars with the three horses in his own stable, while his additional winnings in the capacity of catch driver, in which his services were much in demand when circumstances left him a free agent for an occasional race, brought his total credit in excess of twelve thousand dollars. In addition to his rare qualifications as a trainer and race driver Mr. Ward is thoroughly familiar with farm management and the theory and practice of horse breeding, while also being generally accepted as a "good business man." Under his management Hemet Stock Farm should prosper in a most gratifying manner and its horses achieve future fame in keeping with that of the past. As Fred already had a pretty nifty stable of horses, which we understand he took to Hemet with him, he is liable to prove a genuine pest at the races this season, as the combination of the two strings ought to be a mighty formidable affair, and while extending to Mr. Doble our best wishes for many years of quiet comfort, the best luck we can wish Fred is that he may be right in where the dust and dirt are thickest and the roar of the battle the loudest every time he starts a horse—say trailing the leader into the stretch with a good place to pull out for a shoot to the wire, for instance. Given half a chance, he'll be there, too.

Thoroughbred Matters

IMPORTED HONEYWOOD.

We are permitted to publish the following interesting estimate of Honeywood, the son of Polymelus, now making his first season at the Nevada Stock Farm. The letter was recently addressed to Mr. Wingfield by Mr. A. A. Wheeler:

"I have just received the extended pedigree you sent me of Honeywood, and will now amplify the suggestions I made a few days ago in conversation.

"Honeywood has the advantage of belonging to family No. 1, the foremost of the running lines, but his pedigree is not strong in sire line blood. Only one of his grandparents, Maid Marion, belongs to a sire family, No. 3. In the next generation this sire line is repeated by Quiver, but the other seven crosses are running lines. In the next there are five sire lines and eleven running lines. In the next, thirteen sire lines against nineteen running lines. Therefore I think it will be important for Honeywood's success at the stud to assist him by a judicious choice of mates. These will be: (1) Mares that repeat the leading strains in his dam, which are families No. 2, No. 5, and No. 15, represented by Friar's Balsam, Hermit, and Skylark. (2) Mares that repeat the nearest strains in the dam of Polymelus, which are No. 3 and No. 10. Another reason for expecting a good influence from No. 3 blood is because Skylark is by a sire of that family.

"It is a piece of luck that you happen to have imported a horse whose second dam was sired by a No. 15 horse, as that family has had some remarkable representatives in America. Alarm and Hanover were its greatest members. You will recall also Magnet and Gerolstein. I look upon Orsini as the best sire of No. 2 family we have had in California, much better than Golden Garter, and his dam was a daughter of Alarm. Watercress I consider the highest representative of No. 10 family we have had, a horse that has transmitted stamina as well as speed. Ossary belongs to the same family. From all these sources suitable mares will be available for Honeywood.

"Of the mares and fillies I recall in your own stud, the maiden mare Pepperwood not only comes from the same great sire family as Polymelus, but repeats through Magnet the No. 15 of the second dam of Honeywood. Your two Voter mares should be reserved for him, for both the family number and the individual are repeated in that son of Friar's Balsam. The Dark Ronald filly repeats the No. 2, and the Hampton (10), and the family number (9) of Cyllene, making her a promising mate. Perhaps the Minoru filly, repeating both Friar's Balsam and Cyllene, is a bit too closely inbred for perfect vigor, though something phenomenal might be the result. The William III filly would make a strong return of No. 2 as well as of No. 3 in the dam of Polymelus. You probably have other promising mates that are ready for use.

"Honeywood's breeding is made up almost entirely of the two great lines of fifty years ago—Stockwell and Touchstone. There is not a trace in him of the Blacklock blood, which has made such a stir for twenty-five years. And the dashes of Herod blood are few and remote. The Hermit blood of his dam has been a little out of fashion in England, though in Germany and France the very successful stallions, Hannibal and St. Hilaire, were both from Hermit mares. But now with the great Pommern in evidence, the double occurrence of Hermit's daughter, Distant Shore, in the pedigree of Pommern will make English breeders dispute whether she or the repeated Hampton blood is responsible for Pommern's class. It has to be remembered that this same mare, Distant Shore, was the dam of St. Hilaire and the second dam of Cyllene. Both Hampton and Hermit are Touchstones in tail male, and this is the virile line that has produced Domino and his descendants in America. On the sire side Honeywood is a Stockwell."

Tia Juana will open not later than April 15.

CAPTAIN TIMMIS WRITES OF THE ENGLISH ARMY HORSE.

The question of the future supply of horses for army use, both in the cavalry and the artillery, has never been quite so important to so many people as at this time. Here in America we have been supplying thousands of horses and mules to the warring nations of Europe at the expense of our own forces, as was so thoroughly demonstrated a few days ago by the delay caused in starting the Villa punitive expedition into Mexico, while in the European nations at war horses have been recruited from racing stables and hunting fields in very large numbers. England, like America, is trying to find a way out through government participation in horse breeding, both countries being "open to pursuasion" and neither at this moment being able to arrive at a satisfactory conclusion in the matter. The following interesting consideration of conditions from various angles is contained in a letter recently written to the editor of our English contemporary, Horse and Hound, by a gentleman well known in this country through a considerable term of residence in Canada as well as through his numerous contributions to the press and his most enjoyable book, "Modern Horse Management":

Sir: Horse-lovers have been much interested of late in one problem that faces the government—namely, that of the future supply of horses for army purposes. I think I can safely say that all those who have studied this problem from a practical and common-sense point of view fully realize that it is an extremely serious one. For some time the government seemed undecided as to what action to take. Many horsemen advocated state stud-farms, while the majority were against such a measure, on account of the expenses involved and also the risk. There would be no fear of the latter if the government insisted on experts being employed to handle the whole business. We cannot afford to waste money, but we can afford to spend it with proper discretion.

In the past paltry sums of money have been granted towards horse-breeding, as if this industry were of minor consideration, instead of one of the most important. A little over a year ago the dye industry required money for the purpose of erecting new plants, and the government provided one million out of the two millions required towards this object. Is not the horse question worthy of some such consideration? It is not only the future of the remount supply that is involved, but the future of the horse industry of the British Isles; one that will bring in fortunes to the treasury. Some of the sporting papers have suggested that if only a quarter of that sum (£1,000,000) could be devoted to horse production it would be well. But why only a quarter? And how will any such money be disposed of? After some indecision the government accepted that most generous gift of Colonel Hall Walker, and we have now an embryonic stud farm. Surely the purpose of such a stud is not primarily to produce remounts, but thoroughbred stock from which to breed remounts. After nearly a year's experience in France, and although mostly in the front line, I can but agree with most of your writers regarding the high value of the thoroughbred for cavalry and even artillery work. The thoroughbred is always game, while the coarse-bred, when cold, is almost as bad as a mule. The heavier breeds of horse are often no better. I refer to times when guns and wagons become quagmired. How often have I not seen even an officer's charger temporarily put into harness to save the situation! I have frequently wondered if such horses, when flying over ditch and dale on a day when running was fast, ever anticipated that they would be used for a sport more noble than the chase—that of war. The British thoroughbred is a wonder. But if the unsporting Radicals who cry down racing and hunting do not soon realize that they are endangering our future existence we shall have no thoroughbreds left to breed from. I would like them to hear what Thomas Atkins has to say about them over in Flanders. It was a lucky day for our army when the tide turned in the hunting-field in favor of the thoroughbred. We owe a very great deal to the Hunters' Improvement Society.

The Board of Agriculture's Premium System will require to be greatly enlarged. Stallion fees will require to be reduced, and suitable mares only should be served. Successful horse-breeding can only be assured by scientific mating and rearing. As Sir John Robinson reminded us a short time ago, the vast improvement in thoroughbred stock in the last ten years has been due to scientific mating, breeding and rearing. It is therefore extremely important that farmers be instructed in modern methods of breeding and rearing young stock. To quote Sir Merrik Burrell's words from a letter of his in Horse and Hound of January 23, 1915, "Two-thirds of the profitless and bad horses about were not born so, but have been made so by stupidity, ignorance and neglect on the part of their breeders." One has only to visit the Front to corroborate these remarks, let alone those horses that were "turned down" by the A.V.D.

How can we then make it worth while for the farmer to breed army horses? It is clear that he will have to be our largest source of supply in peace time. The answer is that we never will until we raise the price paid for a remount at four years of age. At present only misfits are sold to the army. No farmer is going to breed horses as a hobby, and he certainly cannot make a sure living by selling them at £40. The British farmer is not a fool. When war comes he and his family will give up their lives, but in peace time he must not be blamed if he finds stock-rearing more profitable than remount-rearing. And far less skill is required for the former.

If something is not done—and done soon—to assist in keeping hunting going throughout the country we shall find the horse industry permanently crippled. Grants should be given on a large scale, and all possible taxes on hounds, etc., removed. What would we have done in this war but for the thousands of hunters impressed by the army? And they are the very best horses we have. And what about the 10,000 hunting-men that are now with the colors? And is there any school in the world better for man or horse, to train him and keep him in condition, to fit him for war, than the hunting-field? And do not let us forget that it is such sport as this that makes a nation. It would be a sorry day for the British Empire if the anti-racing and anti-hunting men controlled Parliament. And what about racing? Why should that not continue more normally now—merely to bring back thoroughbred horse breeding to its normal activity? The excuse that it keeps men away from enlisting is absurd. The time has long passed for talking about "persuasion."

Your obedient servant,
R. S. TIMMIS (Captain).
British Expeditionary Force, France, February 9th.

KENTUCKY SPRING AND SUMMER DATES.

The Kentucky State Racing Commission held its first meeting of the present year on Monday of this week at Louisville, the especial purpose of the session being the determining of dates for the spring and summer racing over which they exercise control. Sixty-two days in all are provided for, distributed as follows:

Lexington twelve days, April 27 to May 10.
Churchill Downs thirteen days, May 13 to May 27.
Douglas Park thirteen days, May 29 to June 12.
Latonia twenty-four days, June 14 to July 11.

It is a safe bet right now that the alibi crop in the Derby is going to be a good one, as it is to be run on May the thirteenth, the first day of a thirteen day meeting. Now if there happens to be thirteen starters a superstitious man will be afraid to put a bet on any horse at any odds.

The Lower California Jockey Club was so fortunate in securing the services of Harry Morrisey as starter at its inaugural meeting that it was hoped by horsemen and public that he would continue in that capacity when the track reopens next month. Numerous eastern engagements preclude this as a possibility, however, so President Coffroth made another selection that is meeting with general approbation, Edward Tribe of Arlington, Virginia, having been engaged to handle the gate when racing is resumed. Mr. Tribe is one of the best known among starters in the east and the presence of himself and other officials of like excellent repute will add much to the excellence of the racing and the consequent popularity of the plant.

ROD, GUN AND KENNEL

CONDUCTED BY FISHER HUNT

TROUT SEASON OPENS MAY FIRST.

Attention of the anglers of California is called to the new State fishing regulations that go into effect this year. They set forth a change in the opening of the trout season. In years gone by the bars were let down in some districts on April 1st, but this year it will not be until May 1st over practically the whole State. J. S. Hunter, assistant executive officer of the Fish and Game Commission, says there is some confusion on the point and an effort will be made to set anglers right.

The one exception to the general opening on May 1st is in District 23, which comprises the watersheds of the Truckee river and Lake Tahoe. It opens a month later there. July 31st is the date of the angling for golden trout.

Prospects are for a banner trout season once it gets under way. There has been plenty of water and trout have been thriving. Earl Downing of Pleasanton was in San Francisco for a visit during last week and is enthusiastic over conditions in his territory and the surrounding country. The season will undoubtedly be late in the Sierra Nevadas and the mountainous country, which was visited by so much snow, but the fish have been doing nicely, according to all reports.

The Fish and Game Commission moved into more specious office quarters in the new Call building on Monday and will issue licenses and transact its business there.

SHOOTERS IMPROVE WITH AGE.

The story published recently about "Uncle Joe" Hineman, of Wausau, Wis., and other venerable gentlemen who have passed the four score years' mark and who keep young and healthy by going to the traps and mingling with the boys, has been the means of uncovering a few more veterans who though well along in years can yet pulverize the clay targets in such a manner as to win the respect of the younger generation.

Uncle Joe has just turned his ninety-first birthday and he knocks over the "clay birds" twice a week at the Wausau Club. He is the oldest living trapshooter and is proud of the honor. He is more interested in the sport now than he was 20 years ago.

John Meunier, of Wilwaukee, Wis., is 82 years of afe, and he asserts he is the best shot with either rifle or shot gun of any man of his age in the United States. How this is going to be proved is beyond us but some of the Wisconsin folk might suggest a match between "Uncle Joe" and "Uncle John" to take place at one of the Wisconsin tournaments this summer. Such a meeting would attract no end of attention.

Meunier was born in Woerishofen, Germany, and when he was 12 years of age he was regarded as the best sharpshooter in Germany. Meunier's father and grandfather before him were schutzenfest kings and the medals they received, and those he won 69 years ago, are still in his possession. Meunier came to America 60 years ago and opened a gun shop in Milwaukee. He continued his practice and taught many who have since become famous as experts.

Before he closed the shop Meunier had won 70 medals in local and national tournaments and any numbers of silver trophies. In the national schutzenfest tournament in Chicago in 1866 he won first prize—a sterling silver trophy, $500 in cash and a solid gold watch. While he pays no attention to business these days Meunier still goes to the traps and he is always willing to meet men much his junior to demonstrate his ability with the gun.

Norwalk, Ohio, boasts of a 73-year-old "boy shooter," in the person of Leroy Burton. Leroy is the best shot in Norwalk. Any time any one disputes his title he takes them to the traps and convinces them of his right to the honor. Burton conducts a shooting gallery but he likes "clay pigeon bustin' " better than anything else.

On November 25, 1913, "young" Burton celebrated his 70th birthday. In honor of the occasion he closed the gallery and hiked to the traps of Norwalk Gun Club. He fired at 100 targets and broke 95 of them. He won all the prizes that were offered. 95 breaks in 100 thrown is a nifty score at any time and all the more remarkable when made by a man in the 70's. For thirty years Burton has been firing at the "clay boys." He broke in at Sandusky, O., with a borrowed gun. After paying his bills he had $26 in cash, a gold watch, a case of wine and a rug. This haul convinced Burton that he could shoot—and he has been shooting ever since—and he hopes to continue shooting for many more years. He thinks pretty well of his ability to break the blue rocks and is always willing to "take a chance."

Toronto, Can., boasts of three veterans who are wonderful shots for their years. Williams Bowls, 88 years, recently bagged three deer in one afternoon's hunting. This proves that Mr. Bowls can shoot. John Maughan and James Douglass are the other two. They will always go better than 80 per cent. at the traps. J. B. Williams of Louisville, Ky., is 80 years of age, but he seldom misses a shoot of the Louisville Gun Club. A. N. Thornburg, of Mason City, Ia., is another who has turned the 80 year mark and who can still "bust" the targets or bring down the game. Dr. O. R. Britton, of Indianapolis, Ind., never misses a trapshoot of any importance in his home city, and can generally be found among the winners despite his 74 years.

Age doesn't seem to dim the eyesight of any of these men and they keep young, healthy and active by mixing with younger men and women at the traps| It is a wholesome sport—trapshooting.

"KING OF DOG STEALERS."

There is great rejoicing in English dogdom. William Cook, known as the "King of Dog Stealers," has at last been put behind the prison bars. Cook followed his nefarious "profession" for a period of more than fifty years and many were the shekels he reaped from it.

Hardly a day passes in which the English newspapers, and American too for that matter, do not have at least a half dozen advertisements seeking to recover "lost dogs." Generous rewards are usually offered for the return of these animals. The expert thief, and such was Cook, waits until the reward has been increased to a figure to make it worth his while and then surrenders his spoil, being assured beforehand that "no questions will be asked."

Various means are employed to lure valueable dogs away from their owners. The modern dog snatcher is usually provided with a decoy dog and some specially prepared meat. A few years ago a notorious thief of this type was arrested in Leeds. A huge pocket was found sewn into his coat which contained several pieces of liver that had been boiled in aniseed.

The traffic in stolen dogs has assumed such porportions that there is a regular exchange of these animals between the larger cities of Europe and America.

COURSING MEET AT GALT.

Sweet Alice of Sacramento, entered by A. G. Cases, won the first prize in the Buffalo Coursing Club's meet at Galt Sunday afternoon a week ago. Lodi Maid of Lodi was second, and Wild Rose of Galt finished third.

The meet was a big success and was enjoyed by a large crowd. The ground was good, and the sport was excellent. Another meet will be held in a few weeks.

* * * *

Patrick Carroll of Mayhews Station, where he has lived for forty-seven years, came to Secramento the other day as has been his custom. He came to assist in celebrating St. Patrick's Day. Carroll is 80 years old and he celebrated his birthday along with those who celebrated St. Patrick's Day.

Carroll is an enthusiastic coursing sportsman. He had a fast dog, "Mayhew Boy," entered in the coursing meet at Franklin Sunday.

"I haven't missed a coursing meet in forty-seven years," said Carroll, "and I'm not going to miss any in the near future. I've a dog that'll make the other hounds jump to beat him."

Carroll is hale and hearty at the age of eighty. It is his belief that his splendid health and longevity are due principally to his having been born on St. Patrick's Day, for he has noticed that if he lives to see St. Patrick's Day, he has always lived the whole year out.

* * * *

Much enthusiasm is being taken in the rabbit drive to be held near Arbuckle, in Colusa county, Thursday, April 6th, under the auspices of the Chamber of Commerce.

A. L. Hobbs, of San Francisco, a large land owner, is chairman of the committee in charge. Invitations are being sent to other towns.

In connection with the rabbit drive, the chamber of commerce is arranging for a banquet and a get-together meeting at the Hotel Ash on the evening of April 5th. There will be speakers from out of town.

* * * *

Breeder and Sportsman:—

Enclosed is a copy of our new booklet entitled "Trapshooting Leagues." As you know, the policy of the Interstate Association has long been one of encouragement to leagues, because it is a well known fact in trapshooting as in other sports, that participation in and enjoyment from the game reaches the most satisfactory point in well organized and conducted leagues.

Hoping you will announce this booklet through your columns and make known the fact that a copy will be sent free upon request to any one interested, and with kindest regards, I am

Yours very truly,

T. E. DOREMUS,

Manager Sporting Division, Du Pont Co.

ALONG KENNEL ROW.

At the annual meeting of the A. K. C., Mr. Belmont resigned and Mr. H. H. Hunnewell was elected president and Messrs. Bloodgood and Willets vice-presidents. The two new directors are Dr. DeMund and Mr. Sinnott.

All these gentlemen take an active interest in the management of the club and it is beginning to look as if they are to have a real governing body.

‡ ‡ ‡

Mr. Charles Heffernan, Stockton, Cal., one of the Pacific Coast's best Airedale judges, writes: "I have a young bitch I am getting ready to show which I think can top the lot. She is by Ch. Baughfell Briar ex Dotty D. by Ch. El Sur Roseben and is one of the best I ever saw."

‡ ‡ ‡

Mr. H. B. Hungerford of Chicago has been selected to judge all breeds at Seattle Kennel Club show to be held March 30-31 and April 1. His selection will without doubt meet with approval by all dog fanciers in the Northwest.

‡ ‡ ‡

Victoria, B. C., Kennel Club will hold its show April 5, 6 and 7, and Portland, Ore., expects to hold one immediately following. Vancouver, B. C., will hold theirs May 24, 25 and 26.

‡ ‡ ‡

Fred Baum of Bellingham, Wash., well known as a breeder of bulldogs in his own section, who was compelled to give up his kennel of bulldogs for some time on account of bad health, is again back on the job and working with renewed vigor to out-do his previous record in raising the short-nosed ones.

‡ ‡ ‡

High honors went to the Southern Californians in Boston's. Mr. Freeman Ford's recent purchase, Arroyo Anarchist, walked away with everything in sight in the Boston classes both at New York and Philadelphia. At both shows Anarchist won best either sex and he has now all his championship points and several to spare. Meantime he remains at stud in the East.

‡ ‡ ‡

The winning bulldog at the New York show was Mr. Horrax' Toll Bar Jack, with Mr. Minturn's Lord Brilliant in reserve. The latter gentleman's Oak Nana annexed best of the opposite sex, with the former's recently imported Chestnut Ginger in reserve—turn about is fair play. As the awards at New York generally put the hall mark of fame upon the specimen, it is now Toll Bar Jack; hail to the chief

‡ ‡ ‡

Mr. Hardebeck, the owner of that fine Airedale Letrim Storm Prince that took all the ribbons in the 1915 show, will enter him in the spring show and thinks he will again show the fancy the way to go to the front. If he enters the show ring in as good shape as he did last year it will take a good one to beat him.

‡ ‡ ‡

Anna R. Judd of the Melita kennels of Maltese terriers recently imported the splendid little English Champion Maltese terrier, Champion Impy. This grand little fellow is a son of the famous undefeated English Champion Snow Cloud of Esperance, and a grandson of Normacot Lassie, and the celebrated Major Mite, the latter considered the handsomest Maltese ever produced, carrying a coat twenty-eight inches from tip to tip.

‡ ‡ ‡

Mrs. Judd also owns Normacot Camille, the only brood matron daughter of Major Mite in the United States.

‡ ‡ ‡

Major Mite and Snow Cloud are both dead, and the offspring from these dogs are very valuable.

‡ ‡ ‡

Mrs. Judd won the premier honors at the P.-P. I. E. show last fall.

‡ ‡ ‡

The winning Airedale bitch, Mountain View Countess, owned by James G. Keefe, was sold to Mrs. A. F. Sharp of Oak Park, Ill. Countess will await at Pasadena, where she has been since the L. K. A. show there, until she is bred to Rebounds Revival, and then shipped East. Her kennel mate, Mt. View Caprice, was bought the previous week by Mr. Bourget of South Pasadena. She will also be bred to Mr. Olker's dog and then taken on to Idaho by her new owner.

ARRESTED FOR ILLEGAL FISHING.

Deputy Fish and Game Commissioner Richard Squire, in conjunction with Deputy Heacock, arrested W. G. Leonard and William Rhoebacher for illegal fishing at Paradise Cut on Monday of last week, and had, at the time he left, seized forty-odd nets with a lot more in prospect. Paradise Cut is in the third district and the use of nets there is barred.

The officer further states that if properly protected, this place will develop into an "angler's paradise," and that a special effort will be made to stop abuses in all closed districts.

Mr. Squire brought home a quantity of fine catfish and a catfish skinning bee was held in the rear of Henderson Brothers' store. "Chubby" Williams was in charge, and a number of entrants with as many systems, demonstrated their various abilities. None of them, however, came up to the class of the game commissioner, who easily walked off with the honors.

Sportsmen's Row

Mrs. Roy Avery has taken up the "sport alluring." She was out to the Golden Gate traps during the week for the first time and had the satisfaction of breaking 20 out of 50. Mrs. Avery gives promise of giving her popular husband a contest with a little more practice.

* * * *

The Golden Gate Club insists on keeping Alameda on the trapshooting map.

* * * *

Secretary Fred Hillyer of the Alameda Elks is working like a Trojan to make a success of the baby gun club. Keep it up, Fred.

* * * *

It was good for sore eyes to see our old friend Charley Breidenstein helping out last Sunday.

* * * *

Clarence A. Haight must enjoy each working hour. Very few shooters could exhibit "Pop's" patience in running a shoot.

* * * *

One of the pretty features of the season so far is the number of new faces that are showing up at the traps. All the old timers like to see beginners breaking in.

* * * *

Ted Riley's first shoot at the traps since last season shows that what you learn as a boy cannot easily be forgotten. Some shooting, Ted.

* * * *

The Golden Gate Club should make the new grounds a preserve, said President Frank Newbert of the Fish and Game Commission, when he heard of the herd of Elks that were roaming around a couple of weeks ago.

* * * *

There's only one fault been found with the grounds and that has been registered by Jack Nelson. The schooners in the estuary bother him. Jack says every time he sees a schooner he wants to drag it across the bar. Oh, you Jack!

* * * *

R. C. Reed, the Remington representative, speaks glowingly of the prosperous condition of the trapshooting game in the northwest ,especially at Portland. He went all through the country up there and sees visions of expansion of the sport alluring. Dick was greeted back by devotees of the traps around the bay for he is a booster and one of the finest shots who aims at the tarhawks.

* * * *

Mrs. Ida Schilling is making a hit with her high-class shooting at Portland. Mrs. Schilling weighs but ninety pounds but she handles a gun with rare skill.

* * * * *

While pumping out the Union mine in the vicinity of Banner hill, near Grass Valley, a few days ago a trout 10 inches in length was found in the water that came through the column pipe. How the fish ever got into the mine is a question, but it is believed that at some time the ditch overflowed and went into the mine shaft and that the trout went along with it.

* * * *

Governor R. L. Williams of Oklahoma has issued a proclamation announcing that Friday, April 14, shall be "bird day" in that state, and calling upon the teachers of all schools and the people generally to befittingly observe the day.

* * * *

A most interesting sight is now being witnessed at the Meek dam, in San Lorenzo creek, California. Scores of fine salmon trout are trying to leap over the barriers at this dam, in order to reach the upper waters to spawn. The fish ladder has been put out of commission, but the trout are given every opportunity to reach the headquarters. There are many ten and twenty pounders among the fish leaping over the barricade and the spectacle is attracting large audiences.—American Field.

* * * *

Herman Zastrow of Merrill, Wis., caught a large black fox in a trap a few days ago. The fox was almost entirely black and the hide, no doubt, will bring a considerable sum of money. The market price of black fox skins is said to run as high as $2,000 according to quality and color.

* * * *

There will be a big jackrabbit drive March 26th in the southern part of San Joaquin county. Throughout the whole county the rabbits are doing much damage to crops. In the south San Joaquin they have destroyed some of the sugar beet stands and it is feared they will damage the beans and corn unless action be taken at once by the farmers. The Ripon farm bureau center and the Manteca center, along with the Nile Garden farmers, are planning the drive and Ed Powers is in charge of arrangements. A small drive was carried out as an experiment a few weeks ago and 500 rabbits were killed. It is expected that fully 5,000 rabbits will be killed this time. Everyone is invited to join in the big drive, and it is expected that many people will go out, as this is closed season for practically all hunting except jackrabbits. No revolvers or rifles will be allowed. Shotguns must be used.

No immediate decision on the constitutionality of the Federal Migratory Bird Law is likely for the reason that the United States Supreme Court has ordered a reargument of the case, but has fixed no date for the rehearing. The probability is, therefore, that the case will not be reargued during the present term of court, possibly not until next autumn.

To ascribe a reason for this action would be mere conjecture, but it probably means that only six of the nine justices took part in the deliberations and the court was evenly divided on the constitutionality of the law.

* * * *

When two-score of sportsmen charter a special train and go to another city some distance away to engage in a team trapshooting contest, especially with the thermometer 12 below zero, they are indeed "gun bugs." But that is what business men of Omaha, Neb., did but a short time ago. They shot against the Wisner, Neb., team, and won by a few targets. The razor-like wind had its effect on the scores, but not on the shooters. Incidentally there was a gallery of 109 persons. It would be difficult to name another sport that would interest 200 persons with the thermometer below the zero mark.

HERMOSA BEACH ROD CLUB MEETS.

Hermosa Beach, Cal.—The Hermosa Beach Rod and Reel Club pulled off a unique entertainment Friday evening, March 3rd. The club engaged a large hall, invited everybody in town to attend and then gave a fine free entertainment, winding up with a dance.

A jointed fishing rod was presented Mrs. Herbert Preston for having caught the largest fish registered by any lady from the Hermosa pier. Four of the members were presented with silver cups for prize catches with light tackle. An interesting and humorous feature of the evening was the burlesque initiation of eight new members . The candidates were seated on the stage on electrically wired chairs and when the president asked those who were willing to contribute $150 each to the purchase of a site for the new town library to rise, the current was turned on and all promptly rose.

For the present year, thirty-five prizes have been offered for record fish, three being open to any lady in the "Beach."

The newly elected officers of the club are as follows: President, H. M. Moran; firse vice-president, E. B. Smith; second vice-president, E. W. Van Deveer; treasurer, V. R. Huddleston; secretary, W. L. Donohugh; chairman tournament committee, B. C. Hibbetts. W. L. DONOHUGH, Sec'y.

PRIVATE GAME FARM HERE.

A. Schilling, a San Francisco spice merchant, together with Adeline C. Shaw, Grant Cardray and Walter Graf are to establish a private game farm, on which a variety of ducks are to be raised at first and later on pheasants and quail. Mr. Schilling and his friends have incorporated under the name of the Arden Game Farm and have received permission from the State Fish and Game Commission of California to raise and market ducks and other game. C. H. Shaw will have charge of the enterprise and the farm will be located on the Schilling place near Newark, Cal. Different varieties of ducks will be purchased from the State farm and from other States and the game farm will endeavor to develop a fancy line of wildfowl. At first they will supply the tables of their friends, but later will raise game for commercial purposes. All game sold from the farm must bear the stamp of approval of the State Fish and Game Commission.

Seattle Association.—Although the rain kept a good part of the bunch at home on March 19th, those shooters that turned out were treated to some fine exhibitions. To say the least, there were some high scores made.

It has been left to C. E. McKelvey, president of the club, to set a new pace for Harbor Island. The Seattle Trapshooters' Association has a just reason to be proud of its president. The fireworks began shortly after the bunch had finished the regular program. McKelvey made a straight run of 100 targets without missing a single bird. The 101st bird came up and was missed, but he then continued on with 74 straight and was in good form to go on through the rest of the day at the same rate. In a little competition shooting Tom Wilkes went through several events with McKelvey and kept up well with him until the last twenty-five birds.

In the regular program of the day Hugh Fleming ran like a house afire, making a 50 straight and then a 47, or a total of 97 targets out of 100. Needless to say Fleming was high score. Matt Grossman stuck next to Fleming, with 47 out of each 50, giving him a total of 94 out of 100.

George Garrison, the only professional on the grounds, knocked 47 out of the 50. Garrison has been laid up with sickness to a great extent for some time and certainly shows up well for an invalid.

The new shooters were in evidence again and made good scores despite their greenness at the game. In N. F. Gay, a new trap man, the Seattle bunch will have somethingg to contend with in the near future. L. S. McIntyre and J. J. Hubbell were out for the first time this year and showed that they certainly know something about the game. F. K. Kaynor brought out his 20-gauge again and showed up well despite his handicap.

The second part of the Everding handicap was pulled off in the regular program of fifty yards. Next Sunday will see the finish of this 150 handicap event and decide the owner of the gold pin presented to the club by Mr. Everding of Portland, Ore. Scores:

Fifty targets—

M. Grossman 47, A. E. Drake 43, H. S. Searle 39, J. H. Hopkins 43, G. M. Valentine 31, Hugh Fleming 50, Mr. Cochran 27, Dr. King 47, M. James 28, A. J. Gerrard 39, K. S. Lapp 28, George Garrison 47, Fred Landwehr 42, C. W. Bandy 38, J. D. Kesner 34, I. J. Wright 23, V. G. Kesner 36, Tom Wilkes 42, C. E. McKelvey 44, W. B. Taft 33, G. H. Young 43, C. C. Ward 40, N. F. Gay 28, Dr. Burt 35, F. K. Kaynor 35, L. S. McIntyre 22, J. J. Hubel 20.

Those shooting 100 targets—Mat Grossman 94, J. H. Hopkins 80, G. M. Valentine 72, Hugh Fleming 97, Fred Landwehr 84, C. W. Bandy 69, Tom Wilkes 86, C. E. McKelvey 90, W. B. Taft 78, Dr. Burt 65.

William Schilpin and J. Morris took part in the program, but did not shoot the regular program.

Dr. Burt, C. E. McKelvey, Tom Wilkes, Fred Landwehr, W. B. Taft, J. H. Hopkins, L. S. McIntyre and F. K. Kaynor shot in several special events after the regular program.

* * * *

Tacoma Club.—The Tacoma Gun Club held its regular shoot March 19th with a small attendance owing to a steady downpour of rain. A. Riehl won the Mellinger gold medal and also the White Flyer fob. F. F. Baker won the Majestic Cafe trophy. Four men, Griffin, Bates, Dague and Baker, tied for the high average on the Everding diamond stick pin. J. A. Dague won the Challenge cup from N. Aubrey. The following scores were made out of 50 birds, with added bird handicap for the Mellinger medal:

	Broke.	Hdcp.	Total.
Riehl	45	5	50
Bales	41	7	48
Baker	33	15	48
L. Riehl	42	6	48
Young	46	1	47
Mellinger	35	12	47
Aubrey	44	1	45
Griffin	33	10	43
Dague	36	6	42

Scores on Majestic Cafe trophy, 100 birds, added bird handicap—

	Broke.	Hdcp.	Total.
Baker	76	21	97
A. Riehl	89	5	94
Griffin	75	19	94
L. Riehl	85	8	93
Young	85	6	91
Dague	77	14	91
Aubrey	88	3	91
Bales	80	10	90
Mellinger	59	25	84

* * * *

Fresno to Shoot.—There is going to be a registered shoot at Fresno on April 28th as part of Raisin Day celebration, according to Clarence A. Haight. The Fresno blue rock busters are already booming things along and they will unquestionably attract an entry of shooters from all sections of the State.

HUNT FOR MOUNTAIN LIONS.

Deputy Fish and Game Commissioner John J. Barnett of Ventura county is framing up a big mountain lion hunt for this spring, and will stage it on some of the big ranches of that section where there is a chance of getting on terms with several of the big cats.

Barnett is a keen hunter, and, like most such, is death on vermin of all sorts. He thinks one great weakness of our game-preservation program is that we do not pay enough attention to cleaning out the vermin, which are at work all the time, and obey no laws except their own appetites.

Many men and a lot of "varmint dogs" are to take part in Barnett's big lion hunt, which bids fair to prove about the biggest thing in a sporting way that has been pulled off in that section for years.

* * * *

Members of the Buffalo Coursing Club have announced that a coursing meet will be held under the auspices of the club at Franklin on Sunday, April 2d. Dogs from all parts of northern California will be entered in the meet. The date of the closing of the entries has not been fixed. The officials of the meet, transportation arrangements to the grounds, etc., will be announced later.

Joe Coughlin, member of the Buffalo Club, declared that he is willing to bet from $50 to $500 that Samparlel, a dog owned by John Cases, can beat Oakland Girl, the hound that won the meet held at Franklin last Sunday under the auspices of the Capital City Coursing Club.

BASS AT SAN PABLO BAY.

Striped bass are once again reported running in San Pablo Bay. Several parties were out during the week and made catches of some big bass. There is the old trouble, however, of oil in the bay spoiling the fish for the table. The Fish and Game Commission has been trying to enforce the law relative to permitting oils and acids to be emptied in the waters but they are up against many handicaps in bringing about arrests.

New Trap-Shooting Clubs Enter Field

ELKS MAY ORGANIZE LEAGUE ON THE PACIFIC COAST

Golden Gate Club.—Sixty-six faced the traps Sunday at Alameda for the opening monthly shoot of the Golden Gate Club. The weather was threatening but this did not dampen the enthusiasm of the large gathering on hand.

The regular three events, the club race of twenty birds, grub stakes of 10 birds and the challenge trophy of 20 birds, were contested with some very good scores in evidence. The veteran Toney Prior came through high amateur with a score of 48 breaks out of 50 targets. W. A. Landry was a bang-up second with 47x50. Other creditable scores were N. A. Howard 46x50, Capt. Barney Worthen 45x50, H. D. Swales 44x50, F. D. Riley 43x50, H. Brickell 43x50 and Billy Price 42x50.

Dick Reed was consistent as usual in the professional ranks, missing only one out of 50. C. H. Knight scored 48, Al Cook 47 and W. Willet 47. Hugh Poston was around greeting friends after a highly successful tour of the northwest and busted 46.

There was some close competition in the club race, Prior, E. Hoelle, F. D. Riley and N. A. Howard getting 19 out of 20. H. D. Swales and W. A. Landry tied with 20 straight in the challenge trophy.

It was pleasing to see two fair trap-shooting enthusiasts in the competition. Mrs. A. G. Wilkes showed a deal of skill in breaking 33 and her score would have been considerably better save for getting only two birds out of the grub race. Miss Meyers made the smoke fly out of 28. The club's next regular shoot is scheduled for April 17th. The scores last Sunday were:—

Events—	Club.		Challenge.		Grub.	
	10	10	10	10	10	Bke.
*C. A. Haight	8	7	9	9	9	42

Stockton Gun Club.—Officers of the Stockton Gun Club were elected at a meeting held in the county clerk's office. They are planning shoots with neighboring cities and also intend to secure a banner shoot for Stockton this year. The officers elected were: Eugene Graham, president; J. R. Ross, secretary; G. E. Ellis, treasurer, and J. W. Fitzgerald, field captain. The directors elected were Henry Lonjers, H. G. Balkwill and George Ellis.

* * * *

Portland Club.—A number of members of the Portland Gun Club attended the first quarterly meeting of the association in the Imperial. The dates of the two big trapshooting tournaments were discussed, as was the advisability of staging the two events during the same week.

Eleven members were added to the club books. They are K. K. Kubli, J. D. Platt, J. D. Platt Jr., L. S. Beeson, W. A. Shaner, C. C. Wright, H. W. Robare, B. F. Leonard, C. J. Schilling and A. W. Strowger Jr. The following ladies were unanimously elected: Mrs. E. H. Keller, Miss Gladys Reid and Mrs. Ada Schilling.

Following are the scores made March 15th in the 20-bird events:

D.F. Allen, shot at 100, broke 87; H. Derrick 100—87, P. Wade 150—116, J. K. Simpson 100—73, O. D. Thornton 100—88, George Bertz 100—62, H. B. Critchlow 75—40, J. W. Seavey 100 96, W. B. Honeyman 100—96, W. Crew 100—73, H. E. Poston 100—94, R. A. Leith 50—31, J. P. Bull 100—98, H. R. Everding 100—87, Earl R. Goodwin 100—81, P. J. Holohan 100—97, E. H. Keller 125—110, F. Templeton 100—80.

* * * *

Oakland Elks Form Club.—At an enthusiastic meeting of members of the Oakland Elks Lodge No. 171 Monday night a blue rock club was organized. Fred Miller was elected president and Harry Newton secretary. Plans were discussed for holding the opening shoot on April 2nd, the first Sunday of the month.

The Oakland gunners are being assisted by Dick Reed in getting the new club started. They responded readily to the suggestion of Bill Ellis of the Alameda Lodge that the Elks about the bay get busy and have some friendly competition at the traps. Bill pointed out that baseball, bowling and the like have been fought out by the rival brothers and a good opportunity was being offered through trap-shooting. Alameda and Oakland will now try and interest San Francisco, Berkeley and Richmond Elks to put teams in the field so that a trap-shooting league can be promoted. The boys should have a lot of fun out of the sport.

The Alameda Elks got started a couple of weeks ago and had one big time. Many of the members had never before sighted a blue rock and they were quick to appreciate the pleasure and recreation in the game.

Utah State Shoot.—A. P. Bigelow of Ogden on March 17th won the high average in the registered tournament of the Utah State Sportsmen's Association held under the auspices of the Ogden Gun Club. Bigelow registered 147 breaks on 150 targets, incidentally making long runs of 84 and 51. E. J. Morgan of Salt Lake won the high average for professionals, breaking 146 out of 150 and breaking the first 105 targets straight. The complete results of the shoot were as follows:

Shooters	Class.	Broke.
*Cummings	..	143
Bain	C	116
M. Browning	C	121
G. L. Becker	A	142
Asher Cowan	A	134
*Morgan	..	146
Reilley	A	145
Mitchell	B	130
Nelson	A	144
G. Browning	A	135
*Hood	..	137
Murphy	B	128
Stoney	B	130
Skeen	B	138
*Anderson	..	132
A. Becker	B	127
J. Browning	C	118
S. Browning	A	135
Bigelow	A	147
*McGaney	..	97
Packard	C	114
Draney	B	127
Riter	B	133
Williams	C	125

*Professionals, not eligible to competition for trophies.

Shoot at Saratoga.—An erratic trap, high wind and dull light combined last Saturday in cutting down the scores of trapshooters at the Saratoga Blossom festival. R. C. Reed of San Francisco made high score of the day, leading both professionals and amateurs, breaking 89 out of 100, Feudner being second in the professional class with 84; Ellis got 79, Moore 64 and O. N. Jones 57.

In the amateur class Ford led with 85, C. H. Nash was second with 84, G. H. Anderson 81, C. R. Arques 79, R. C. Hogg 78 and Dr. Heidelberg 76.

Standing of the San Jose Blue Rock Club, 1916 averages on 200 shots: C. R. Arques 192, George H. Anderson 189, A. F. Baumgartner 184, C. H. Nash 183, Dr. Heidelberg 180. Class B on 100 shots—W. J. McKagney 90, E. C. Stamper 80, E. W. Jack 79, Leo Thornton 62.

Vernon Gun Club.—The Los Angeles Gun Club came back, Champion Gotch did likewise, and so did C. E. Groat, the Vernon Gun Club's president, winning his initial leg on Billy Wilshire's trophy, when it was placed up for competition at the Vernon Club Sunday morning at fifty targets, distance handicaps for the twentieth time, by beating F. A. Richter of Minneapolis in the 25-bird shoot-off after the two had tied with forty-four broken birds to their credit.

Richter won his first leg on the prize the previous Sunday and shoots from twenty yards. Groat has been pegging along since the prize was put up, always hopeful of winning some day, and the old saying proved true, "All things come to him who waits."

Groat shoots from sixteen yards and had that much advantage on Richter. The two lined up for the shoot-off and the race was close throughout to the last bird. Groat broke twenty-two and Richter twenty-one.

Louis Mellus breezed in at the last minute and took a fling at the handicap from twenty yards, but succeeded in breaking only thirty-four birds.

Bob Bole, well known pump and rimmer manufacturer, and erratic in the trap-shooting game, broke only twenty-eight out of fifty in the open event, but hung up a forty-out-of-fifty score in the handicap event.

Following are the scores in both events:

Wilshire event of fifty targets—

Shooter—	Hdcp.	Bke.	Targ.
J. F. Dodds	20	43	50
Famechon	18	39	50
L. D. Forest	18	42	50
White	18	42	50
Bole	16	40	50
Peterson	17	37	50
Manderville	16	43	50
Dierdoff	17	36	50
Evans	18	38	50
Groat	16	44	50
Pugh	18	38	50
Dougherty	18	39	50
Richter	20	44	50
Stan Bruner	20	43	50
Palmer	16	33	50
T. P. Smith	18	38	50
Meek	18	41	50
Packard	21	40	50
Lou Mellus	19	34	50

Open event at sixteen yards—

Doods, shot at 75, broke 68; Famechon 125—113, L. D. Forest 50—46, White 125—100, Daniels 50—27, Bob Bole 50—28, Peterson 50—38, Cornelius 75—71, Manderville 50—42, Dierdoff 25—23, Peet 25—16, Evans 50—48, Groat 50—38, Mrs. Groat 75—65, Pugh 50—43, Van Nest 75—50, Dougherty 75—69, Norton 75—51, French 25—20, Richter 100—94, Brown 25—20, Stan Bruner 50—47, Palmer 50—18, Jassen 75—38, Dressen 25—16, Sutke 50—17, T. P. Smith 50—40, Hahn 50—16, Meek 50—39, Packard 25—19.

* * * *

Salt Lake Club.—With a strong wind blowing, which made good scores hard to get, Charley Reilley led both the professional and amateur clay bird shots at the traps March 19th, by smashing 16 out of 50 targets.

In the handicap shoot, which has been running for the past few weeks, Bray and Heagren tied with 48 points each and it will be necessary for them to shoot the tie off next Sunday.

In addition to breaking the greatest number of birds, Reilley also defended his title to the state association challenge medal by defeating Becker and Riter.

Sunday, March 26, will be the first day for members who have been unable to attend previous shoots to bring their scores up to date.
